Overview

Interface

The RxNova Reimbursements application provides a web based interface allowing users to:

- Establish and maintain DMRs
- Search for existing DMRs
- Add DMRs
- Update DMRs

Objectives

After reviewing this guide, users are able to complete these tasks:

- Outline the different types of DMRs, including the functionality differentiating each
- Access the Reimbursements application
- Find claims within RxNova Reimbursements and RxNova Claim
- Navigate within the Reimbursements application
- Perform a search for DMRs
- Create and maintain DMRs
- Change the member's cost share for the DMR
- Add multiple reason codes to DMR
- Override the default claim disposition to pay or deny the claim as directed by the customer (override errors to pay the claim or deny a paying claim)
- Override the default claim calculation from plan calculated to submitted as directed by the customer
- Describe the processing options used by RxNova Reimbursements

What is a DMR?

A DMR, or direct member reimbursement, is a request by a member to be refunded for a claim they paid in total out of pocket at the pharmacy rather than the claim processing through the member's coverage. The member may or may not be entitled to partial or full payment based on the customer's DMR options.

The claim may not process through the member's coverage as the member expects for a number of reasons (these are not all possible scenarios):

- The pharmacy's automated system may be down, thereby, not allowing the claim to be submitted for processing.
- The pharmacy may not be a participating pharmacy in the member's plan.
- The copay or coinsurance indicated on the processed claim may be in question by the member, who then decides to pay for the claim and submit for repayment directly to them.
- The claim may be rejected when processed. The member is then required to pay for the prescription in order to take it.

Each customer determines the parameters in which they repay the member when a DMR is submitted.

Types of DMRs

There are two types of DMRs submitted within Reimbursements.

No Drug

This short form DMR contains the minimum number of fields needed to reimburse a member. The most common use is to process one or more claims as a result of audits or escalated situations.

Some customers do not allow No Drug DMRs because there are so few required fields. No Drug DMRs cannot be used for Medicare Part D claims, as they require more detail.

New Claim

The longer form DMR closely mimics a claim submitted by a pharmacy.

New Claim DMRs require pharmacy data, drug data, member data, prescriber data, and claim data (such as quantity and day supply) to process.

Accessibility

Please refer to the below manuals for information regarding logging into RxNova.

For RxNova Landing Page refer to the RxNova Landing Page Training Manual.

For RxNova Desktop refer to the RxNova Desktop Training Manual.

Search

Basics

RxNova provides two ways to search for DMR claims: through the Reimbursements application and through the Claim application.

Search versus Report

The goal of searching within RxNova is to find one thing or a small group of things. Searching does not support reporting; for reports, please use RxNova Intel.

Security

Security is divided into two parts: application access and data retrieved.

All users with access to the Reimbursements application are able to search.

Security dictates the customer data viewable by the user. For example, associates from Customer A may not view data for Customer B. Or, depending on job responsibilities, a Pharmacy Solutions associate may be able to view data from more than one customer

Conducting a Search in Reimbursements

The REIMBURSEMENTS application allows the user to find existing DMRs. To find a DMR, follow the steps below.

From the REIMBURSEMENTS HOME PAGE:

1. Enter **MASTER CUSTOMER SET NAME** (optional).

Note: The field is labeled as Customer Name but it is the Master Customer Set.

2. Enter **CUSTOMER ID**.
3. Enter **MEMBER ID** or **ALTERNATE ID** or **MEMBER LAST NAME AND FIRST NAME** or **CLAIM ID**.
4. Enter additional search criteria (optional).
5. Click **SEARCH**.

The screenshot shows the 'Reimbursements' search form. It has a header bar with a home icon and the title 'Reimbursements'. Below the header is a search bar with several fields: 'Customer Name', 'Customer ID', 'Member ID', 'Alt ID', 'Member Last Name', 'Member First Name', 'Member DOB' (with a dropdown arrow), and 'Claim ID'. To the right of these fields is a 'SEARCH' button. Numbered callouts are placed over the form: '1' is over 'Customer Name', '2' is over 'Customer ID', '3' is over 'Member ID', and '4' is over 'Claim ID'. Arrows point from the callout boxes to their respective fields.

6. Click the → next the correct Member ID to view the Claims for the member.

The screenshot shows the 'Reimbursements' application after a search. The top section shows the search criteria: 'Customer Name: Test Customers', 'Customer ID: 9109', 'Member ID: 77777701', and a 'SEARCH' button. Below this is a 'Member List' section. A callout box with the number '5' points to the first row of the table. The table has columns: 'Customer ID', 'Member ID', 'Alt ID', 'Member Last Name', 'Member First Name', 'Member DOB', 'Eligibility Start Date', and 'Eligibility End Date'. The first row has a blue arrow to its left. Below the table, there is a 'Max rows per page' dropdown set to '10' and navigation links '<PREV' and 'NEXT>'.

Customer ID	Member ID	Alt ID	Member Last Name	Member First Name	Member DOB	Eligibility Start Date	Eligibility End Date

→ 9109	000000012312312302		TRAINING	TWO	02/03/1956	01/01/2015	12/31/9999

Conducting a Search in Claim

The CLAIM application allows the user to search for DMRs. To locate DMRs, follow the steps below.

1. Enter a Claim ID if the claim number is available (optional).
2. Select a Master Customer Set.
3. Select a Customer.
4. If Claim ID is not provided, enter or select one more piece of data.
5. Click Search.

The screenshot shows the 'Claim Home' tab with the 'Show Criteria' section. Numbered callouts point to the following fields:

- 1: Claim ID input field
- 2: Master customer set dropdown
- 3: Customer dropdown
- 4: Client dropdown
- 5: Search button

Other visible fields include: Claim/Claim test (dropdown), Member ID/Alt ID (input), Claim status (dropdown), Fill date from/to (date pickers), and Pharmacy ID/NPI (input). Buttons for 'Advanced Search Fields', 'Search', and 'Reset' are at the bottom.

The search results screen appears.

The screenshot shows the search results screen with a table of DMRs. The table has the following columns: Claim ID, Paid Date, Claim Status, Member ID, Claim Source, GCN, Rx Number, and Member Name. The table contains 15 rows of data, all with a status of '70-DNI'.

Claim ID	Paid Date	Claim Status	Member ID	Claim Source	GCN	Rx Number	Member Name

Buttons at the bottom: View Selected, Compare Selected, Reverse Selected.

Claim application additional functionality is outlined in the Claim manual.

4

Add

Basics

The Reimbursements application provides one way to add a new DMR. Users must first search for the member ID.

Note: Not all users have security to add DMRs. Users possessing this security access find the **NEW CLAIM** and/or **NO DRUG** button enabled. Those who do not have such access find these buttons disabled.

Finding the Member

The REIMBURSEMENTS application allows the user to add new DMRs. To add a new DMR, follow the steps below.

From the REIMBURSEMENTS HOME PAGE:

1. Enter **MASTER CUSTOMER SET NAME** (optional).

Note: The field is labeled as Customer Name but it is the Master Customer Set.

2. Enter **CUSTOMER ID**.
3. Enter **MEMBER ID** or **ALTERNATE ID** or **MEMBER LAST NAME AND FIRST NAME** or **CLAIM ID**.
4. Enter additional search criteria (optional).
5. Click **SEARCH**.

The screenshot shows the 'Reimbursements' search interface. It features a header bar with a home icon and the title 'Reimbursements'. Below the header is a search form with several input fields: 'Customer Name', 'Customer ID', 'Member ID', 'Alt ID', 'Member Last Name', 'Member First Name', 'Member DOB' (with a dropdown menu showing 'mm/dd/ccyy'), and 'Claim ID'. A 'SEARCH' button is located on the right side of the form. Five numbered callout boxes are overlaid on the form: Box 1 points to the 'Customer Name' field; Box 2 points to the 'Customer ID' field; Box 3 points to the 'Member ID', 'Alt ID', 'Member Last Name', and 'Member First Name' fields; Box 4 points to the 'Member DOB' dropdown; and Box 5 points to the 'SEARCH' button.

6. Click the  next the correct Member ID.

Entering a Short Form DMR

1. Enter or select the **FILL DATE**.

Note: The format for dates is MM/DD/YYYY. Slashes are required.

2. Enter the **TOTAL PAID**.
3. Enter 1 into the **NUMBER OF SCRIPTS**.
4. Click **OVERRIDE COPAY AMOUNT** or **OVERRIDE COINSURANCE PERCENTAGE** (optional).
5. Enter **OVERRIDE COPAY AMOUNT** (enter if **OVERRIDE COPAY AMOUNT** box is checked).
6. Enter **OVERRIDE COINSURANCE AMOUNT** (enter if **OVERRIDE COINSURANCE AMOUNT** box is checked.)
7. Select a **REASON CODE** (optional).

Note: Reason Codes are customer specific.

8. Add up to three more Short Form DMRs (optional).
9. Click **PROCESS CLAIMS**.

The screenshot shows the 'Reimbursements' form interface. At the top, there is a header bar with a home icon and the title 'Reimbursements'. Below this, a member information section displays: Member Name: TEST TEST, Member ID: 0000000077777701, Member Address, Customer: 9109 - U9109TEST-91, Relationship: 01, and Gender: M. The main form area contains a table with columns: Fill Date* (mm/dd/ccyy), Total Paid*, # of Scripts*, Override Copay Amount, Override Coinsurance Percentage, and Reason Code. There are three rows for entering data. Numbered callouts are placed as follows: 1 points to the first 'Fill Date*' field; 2 points to the first 'Total Paid*' field; 3 points to the first '# of Scripts*' field; 4 points to the first 'Override Copay Amount' checkbox; 5 points to the first 'Override Copay Amount' text input; 6 points to the first 'Override Coinsurance Percentage' checkbox; 7 points to the first 'Reason Code' dropdown; and 9 points to the 'PROCESS CLAIMS' button at the bottom right.

A list of processed short form DMRs appears below the entry panel.

10. Click  to return to the list of members.

Entering a Long Form DMR

1. Enter or search for a **PHARMACY ID**.

Note: Appendix C outlines how to search for a pharmacy.

2. Enter the **Rx NUMBER**.

3. Enter or select the **FILL DATE**.

Note: The format for dates is MM/DD/YYYY. Slashes are required.

4. Enter or select the **RECEIVED DATE**.

Note: The format for dates is MM/DD/YYYY. Slashes are required.

5. Enter the **REFILL NUMBER** (optional).

6. Enter the **NDC NUMBER**.

7. Enter the **DAYS SUPPLY**.

8. Enter the **QUANTITY**.

9. Select the **DISPENSE AS WRITTEN** option (optional).

10. Select **REASON CODE** (optional).

Note: Multiple reason codes may be selected by clicking the Multiple Link in the Reason Code box. Click  to add more than one reason code.

11. Slide the button to Yes for **COMPOUND CODE** if the prescription is a compound (optional).

Note: Appendix C provides more information about submitting compound DMR claims.

12. Enter or search for the **PRESCRIBER ID**.

Note: Appendix C outlines how to search for a prescriber.

13. Enter the **TOTAL PAID** by the Member (total cost of the prescription).

14. Enter the **COPAY AMOUNT** (optional).

15. Select the **APPLY TO MEMBER ACCUMULATOR** (default is 01-included in accumulator).

16. Enter the **ADMINISTRATIVE FEE** (optional).

17. Check **OVERRIDE COPAY AMOUNT** and enter **OVERRIDE COPAY AMOUNT** (if box is checked copay amount is required, copay and coinsurance fields are mutually exclusive, optional).

18. Check **OVERRIDE COINSURANCE AMOUNT** and enter **OVERRIDE COINSURANCE AMOUNT** (if box is checked coinsurance amount is required, copay and coinsurance fields are mutually exclusive, optional.)

19. Select **DMR REPRESENTATIVE** (may be required for Part D members).

20. Select **PATIENT LOCATION** (may be required for Part D members).

21. Select **PHARMACY SERVICE TYPE** (may be required for Part D members).

22. Select **LEVEL OF SERVICE** (may be required for Part D members).

23. Select **PATIENT RESIDENCE** (may be required for Part D members).

24. Select **SUBMISSION CLARIFICATION CODE** (may be required for Part D members).

25. Click **CALCULATE CLAIM**.

26. Verify the pricing of the claim.

27. Review the claim errors.

Note: See Appendix C for information about adding reason codes to denied claims.

28. Click **UPDATE CLAIM** if any of the fields need to be updated (optional). Make updates and return to Step 25.

29. Select a **PROCESSING OPTION**.

Note: See Appendix C for additional information about the processing options.

30. Click **PROCESS CLAIM** or **PROCESS & RETAIN**.

Note: Process Claim submits the claim for payment.

Process & Retain processes the claim and moves the user to an entry window for another DMR. The pharmacy and received date pre-populate with the previous claim's data.

See Appendix C for more information about this functionality.

Update

Basics

The Reimbursements application provides a way to update a DMR not yet finalized. Users must first search for the member ID.

Note: Not all users have security to update DMRs. Users possessing this security access find the  PENCIL ICON enabled. Those who do not have such access find this icon disabled.

Finding the Member

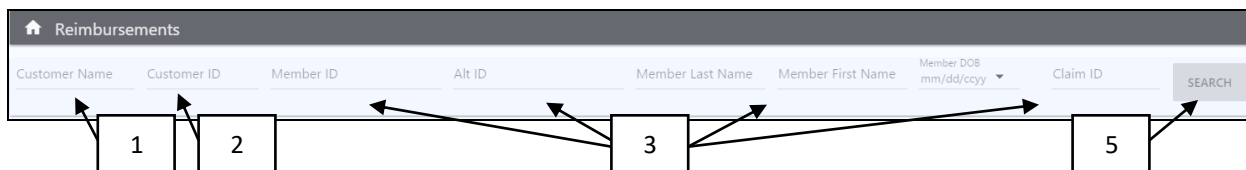

The REIMBURSEMENTS application allows the user to update DMRs not yet finalized. To update a new DMR, follow the steps below.

From the REIMBURSEMENTS HOME PAGE:

1. Enter **MASTER CUSTOMER SET NAME**.

Note: The field is labeled as Customer Name but it is the Master Customer Set.

2. Enter **CUSTOMER ID**.
3. Enter **MEMBER ID** or **ALTERNATE ID** or **MEMBER LAST NAME AND FIRST NAME** or **CLAIM ID**.
4. Enter additional search criteria (optional).
5. Click **SEARCH**.

The screenshot shows the 'Reimbursements' search interface. It features a header bar with a home icon and the title 'Reimbursements'. Below the header is a search form with several input fields: 'Customer Name', 'Customer ID', 'Member ID', 'Alt ID', 'Member Last Name', 'Member First Name', 'Member DOB' (with a dropdown menu showing 'mm/dd/ccyy'), and 'Claim ID'. A 'SEARCH' button is located on the right side of the form. Numbered callouts are placed below the form fields: '1' points to 'Customer Name', '2' points to 'Customer ID', '3' points to 'Member ID', '4' points to 'Alt ID', and '5' points to the 'SEARCH' button.

6. Click the  next the correct Member ID.

Delete

Basics

At times DMRs are entered in the Reimbursements application and after review they need to be deleted from RxNova. DMRs may not be deleted once they are finalized. DMRs must be adjusted to deny after they are finalized. It is important to know the schedule to finalize claims; some customers finalize every day.

Very few users have access to delete a DMR once it is entered into the system. Only members of the Account Management team have access to delete a DMR once it is entered.

The Reimbursements application does not allow users to delete DMRs. Account Managers must delete claims.

DMRs may be deleted if:

- They are not finalized. DMRs through the finalization process may not be deleted.
- Executed by a member of the account management team. Contact your management team when a DMR must be deleted.

Security

Basics

Security is divided into two portions:

- The tasks within an application a user may perform
- The customer data the user may view.

Both must be provided before a user can be set up in the RxNova security system.

Task Security

Task security for Member includes:

- Inquire
- Add/Update
 - Add
 - Update
- Delete (DMRs)

Data Security

Data Security outlines the customer information a user is allowed to view. Customer associates are restricted to, at most, the data for their Master Customer Set. Security may be restricted at lower levels when necessary.

Some users may view more than one customer's data, depending on the job function necessity.

Delete

The security to "delete" strictly means the ability to delete a DMR which changes the status to 70 DEL.

Only members of the account management team have the security to delete a DMR.

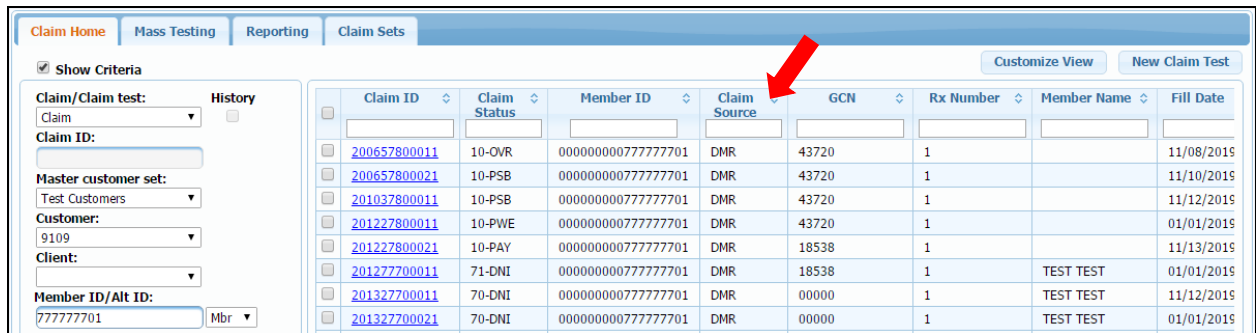

Claim Data

Basics

RxNova Claim displays all claims for the member. Several fields indicated the claim is a DMR. A couple of other fields are important when talking to members about their DMR claims.

Claim Search Results

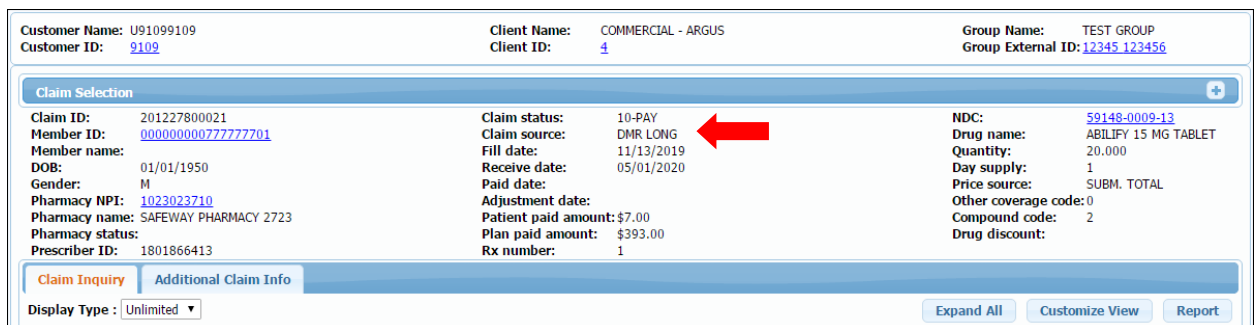

The Claim Source column displays if the claim is a DMR.

Claim ID	Claim Status	Member ID	Claim Source	GCN	Rx Number	Member Name	Fill Date

Processing Options

Basics

Processing Options is a standalone application within RxNova. It houses parameters and options for different services. The answers to these options may change claims processing or may change the interface appearance.

Processing options are set at the Master customer set level. If any customer or client needs to deviate from what is set, the different option may be set at the appropriate level. Only differences need to be entered lower than Master Customer set.

The effective date range on the left column indicates the date range when the options are effective.

Reimbursements is not a standalone product, but rather is affected by options within other products.

Processing Options—Claims Processing—DMR: Direct Member Reimbursement

Auto Create DMR

The Auto Create DMR option indicates whether to allow the creation of a Short Form DMR from an unmatched Cash/Carry/Reimburse Shoebox claim (Alternate Business option is set to Shoebox), and what copay and/or coinsurance to use for the claim if the Short Form DMR is allowed.

When a Shoebox paper claim is entered, the system tries to find a match against a claim that is waiting in a hold status. Subject to the option selected, if the system does not find a match for the paper claim, it can create a Short Form DMR claim in order to reimburse the member for the unmatched claim.

Because the member has sent in the paper receipt or claim, which indicates proof of purchase, the customer may choose to use this option to allow reimbursement even though the system cannot find a held claim that matches the paper claims criteria. Default for this field is blank.

Below are the available options.

Option	Definition
Blank	Do not create a short form DMR
A	Use brand copay
B	Use generic copay
C	Use miscellaneous copay 1
D	Use miscellaneous copay 2
E	Use brand coinsurance
F	Use generic coinsurance
G	Use miscellaneous coinsurance 1
H	Use miscellaneous coinsurance 2
I	Use brand copay and brand coinsurance

Information on this page constitutes a trade secret, privileged or confidential information, as such terms are interpreted under the Freedom of Information Act and applicable case law. CONFIDENTIAL and PROPRIETARY.

Option	Definition
J	Use generic copay and brand coinsurance
K	Use miscellaneous copay 1 and miscellaneous coinsurance 1
L	Use miscellaneous copay 2 and miscellaneous coinsurance 2
M	Use miscellaneous copay 3
N	Use miscellaneous coinsurance 3
O	Use miscellaneous copay 3 and miscellaneous coinsurance 3
P	Use miscellaneous copay 4
Q	Use miscellaneous coinsurance 4
R	Write claim to reject file, do not create short form DMR
S	Use miscellaneous copay 4 and miscellaneous coinsurance 4
T	Use miscellaneous copay 5
U	Use miscellaneous coinsurance 5
V	Use miscellaneous copay 5 and miscellaneous coinsurance 5
W	Use miscellaneous copay 6
X	Use miscellaneous coinsurance 6
Y	Use miscellaneous copay 6 and miscellaneous coinsurance 6
Z	Create a denied short form DMR
1	Use miscellaneous copay 7
2	Use miscellaneous coinsurance 7
3	Use miscellaneous copay 7 and miscellaneous coinsurance 7
4	Use miscellaneous copay 8
5	Use miscellaneous coinsurance 8
6	Use miscellaneous copay 8 and miscellaneous coinsurance 8

Check to Cardholder Flag

The Check to Cardholder flag indicates which member name within a family to use as the name on the member check for a Direct Member Reimbursement (DMR). This is the name to whom the DMR check is written. One of the main objectives for using this option (value Y) is to prevent checks being written to young children when prescriptions are filled for them. Default for this field is blank.

Below are the available options.

Option	Definition
Blank	Use the member name on the member record
N	Use the member name on the member record
Y	Use the cardholder's name

DMR Check Indicator

The DMR Check Indicator flag identifies the rules regarding checks issued to support Direct Member Reimbursement. Default for this field is blank.

Note: This option is intended for those customers who do not issue checks. If the situation should arise in which a member is not found and the user opts to process the claim, the claim is added without a name.

Below are the available options.

Option	Definition
Blank	No DMR processing
A	DMR processing allowed, use member address on checks
B	DMR processing allowed, no address on checks
C	DMR processing allowed, no checks issued
D	Exclude from all address processing

DMR Copay Option

Identifies which copay, coinsurance or combination thereof to use for a claim entered using the DMR Short Form option of the Direct Member Reimbursement system. The copay and coinsurance are located on the coverage code record. Default for this field is A.

Below are the available options.

Option	Definition
A	Use brand copay
B	Use generic copay
C	Use miscellaneous copay 1
D	Use miscellaneous copay 2
E	Use brand coinsurance
F	Use generic coinsurance
G	Use miscellaneous coinsurance 1
H	Use miscellaneous coinsurance 2
I	Use brand copay and brand coinsurance
J	Use generic copay and brand coinsurance
K	Use miscellaneous copay 1 and miscellaneous coinsurance 1
L	Use miscellaneous copay 2 and miscellaneous coinsurance 2
M	Use miscellaneous copay 3
N	Use miscellaneous coinsurance 3
O	Use miscellaneous copay 3 and miscellaneous coinsurance 3
P	Use miscellaneous copay 4
Q	Use miscellaneous coinsurance 4

Information on this page constitutes a trade secret, privileged or confidential information, as such terms are interpreted under the Freedom of Information Act and applicable case law. CONFIDENTIAL and PROPRIETARY.

Option	Definition
R	Use brand copay
S	Use miscellaneous copay 4 and miscellaneous coinsurance 4
T	Use miscellaneous copay 5
U	Use miscellaneous coinsurance 5
V	Use miscellaneous copay 5 and miscellaneous coinsurance 5
W	Use miscellaneous copay 6
X	Use miscellaneous coinsurance 6
Y	Use miscellaneous copay 6 and miscellaneous coinsurance 6
Z	Use brand copay
1	Use miscellaneous copay 7
2	Use miscellaneous coinsurance 7
3	Use miscellaneous copay 7 and miscellaneous coinsurance 7
4	Use miscellaneous copay 8
5	Use miscellaneous coinsurance 8
6	Use miscellaneous copay 8 and miscellaneous coinsurance 8

DMR Long Form Option

These options indicate whether the Direct Member Reimbursement (DMR) claim should be excluded from the plan limitations.

Below are the available options.

Option	Definition
I	Include the claim in the plan limitations
E	Exclude the claim from plan limitations

End Notes

Update Log

The following tracks what updates were made to this current version of the manual since the previous version.

Date of Update	Description of Update	Page Number of Update
10/2015	Created Manual	All
11/2015	Edited Manual	All
9/2019	Updated footer and chapter two	All
10/2019	Edited and Formatted	All
12/2021	Added new functionality of Reason Codes Added info about intellisense box for searching Added info about reason codes in appendix	Page 16 Page 47 Page 48

Appendix

Appendix A—Best Practices—Reimbursements

This appendix outlines best practices for Reimbursements.

Member Address

A DMR check cannot be mailed to a member if the address is missing. Ensure a complete address is available for all members when entering DMRs.

Processing Options

The best practice is to use the “Process as Calculated” option and reimburse the member based on the contracted rate for the selected pharmacy/provider.

Appendix B—The Way Things Work—Searching in Reimbursements

Customer Name

The field displays as “customer name” but it is the Master Customer Set.

Customer

This field is an intellisense field. Options appear based on the information entered in the field. Users must select from the drop down for this field to work.

Member ID and Name

The Member ID, Member Alternate ID, and Name are mutually exclusive fields. When data is entered into one of the fields, the other two become disabled.

Appendix C—The Way Things Work—Adding in Reimbursements

Number of Scripts

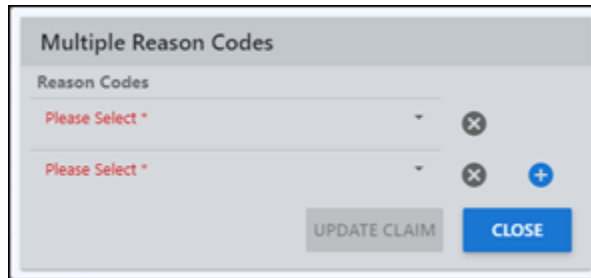

The number of scripts field uses the value entered and populates the Quantity field on the claim when it is processed. Nothing changes based on the number entered in this field.

Default is 1.

Reason Code

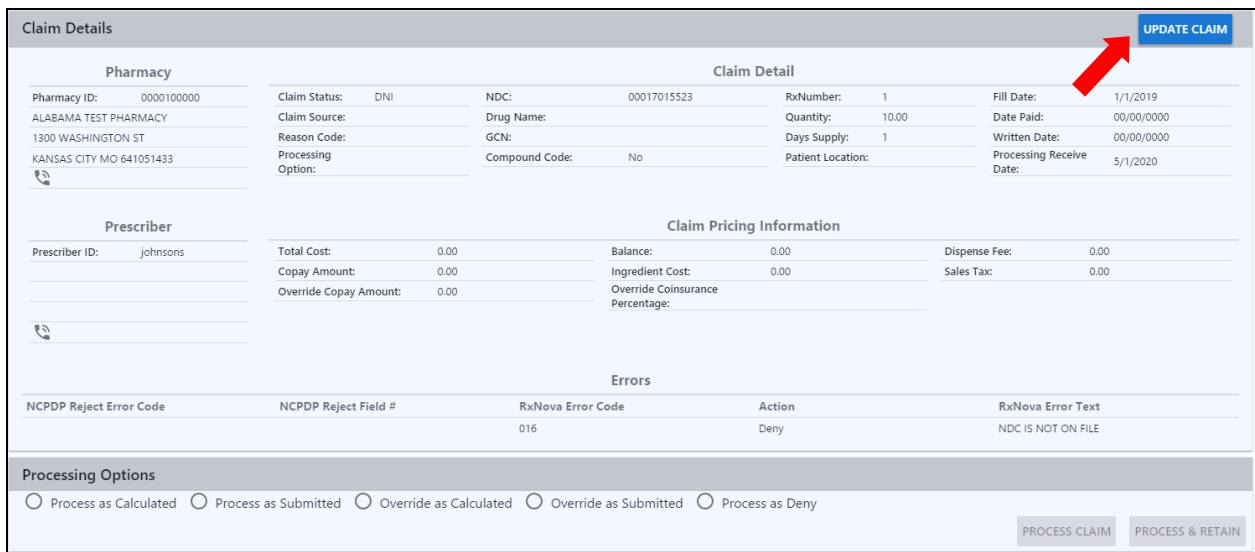

When the down arrow is clicked an additional box appears. The reason codes populated are based on the Customer entered for the DMR. The reason code field may be populated with customer specific messaging. More than one reason code may be selected.

Note: This example does not contain error codes because it is displaying a test customer and nothing is set up for it. When a DMR in production is selected, this box will contain error codes specific for the customer.

A dialog box titled "Multiple Reason Codes" with a light gray background. It contains two "Reason Codes" sections, each with a "Please Select *" dropdown menu. To the right of each dropdown is a small "X" icon. Below the second dropdown is a small blue "+" icon. At the bottom of the dialog are two buttons: "UPDATE CLAIM" and "CLOSE".

The reason code selected on the claim can appear on DMR denial letters. Medicare Part D requires member communication for all denied claims explaining the reasons for denials. The reason code functionality can specify what language is printed on DMR denial letters.

At Step 28 when the DMR is denied and the customer requires Reason Codes on the claim, click Update Claim.

A screenshot of the "Claim Details" form. The form is divided into several sections: "Pharmacy" (Alabama Test Pharmacy, 1300 Washington St, Kansas City MO 641051433), "Prescriber" (johnsons), "Claim Detail" (Claim Status: DNI, NDC: 00017015523, RxNumber: 1, Fill Date: 1/1/2019), "Claim Pricing Information" (Total Cost: 0.00, Balance: 0.00, Dispense Fee: 0.00), "Errors" (NCPDP Reject Error Code, NCPDP Reject Field #, RxNova Error Code, Action, RxNova Error Text), and "Processing Options" (Process as Calculated, Process as Submitted, Override as Calculated, Override as Submitted, Process as Deny). A red arrow points to the "UPDATE CLAIM" button in the top right corner.

Select at least one Reason Code. Click Calculate Claim when finished. Return to Step 29 in Chapter 4.

Claim Entry

Pharmacy Search

Users may use the Pharmacy Search functionality if the Pharmacy NPI is not included in the documentation.

1. Click .

Claim Entry	
Pharmacy	
Pharmacy ID *	
	

2. Enter pharmacy data.

Note: The search feature requires the pharmacy ID OR pharmacy name and zip code to search for a pharmacy.

3. Click **SEARCH**.

The screenshot shows the 'Pharmacy Lookup' form. It has input fields for 'Pharmacy NCPDP/NPI', 'Pharmacy Name', 'City', 'State' (a dropdown menu), and 'Zip'. To the right of these fields are 'SEARCH' and 'CANCEL' buttons. A box with the number '2' has an arrow pointing to the 'City' field. Another box with the number '3' has an arrow pointing to the 'SEARCH' button.

Results return.

4. Click on the row of the correct pharmacy.

The screenshot shows the 'Pharmacy Lookup' form with search results. The top section contains the search criteria: 'Pharmacy NCPDP/NPI' (empty), 'Pharmacy Name' (cvS), 'City' (empty), 'State' (dropdown), and 'Zip' (64105). Below this is a table of results. A box with the number '4' has an arrow pointing to the 'State' column of the first result row.

Pharmacy NCPDP/NPI	Pharmacy Qualifier	Pharmacy Name	Pharmacy Address	City	State	Zip Code
1992749360	01	CVS PHARMACY 08592	921 MAIN	KANSAS CITY	MO	64105

The pharmacy data is populated to the DMR.

The screenshot shows a 'Pharmacy' form with the following fields populated:

- Pharmacy ID *: 2636592
- CVS PHARMACY 08592
- 921 MAIN
- KANSAS CITY MO 64105
- (816)842-2514

Pharmacy Not Found

A message of “no results were found” returns If the pharmacy search does not find a pharmacy.

Received Date

The Received Date cannot be a date in the future. The date can be the day the user is entering the DMR and before, but must not be older than 90 days prior.

Compound DMRs

Customer Number Entry in GOTM Table Required

If a customer wishes to allow multi-ingredient compound DMRs, the selection on the MIC Inform Doc is selected. Then their customer number is added to GOTM table CLNT00020019. If the customer number is not added, a single NDC may be added to the claim even if the Compound Code button is moved to “yes”.

2. Enter the number of MIC Ingredients.

52

3. Select the Dosage Form Description.
4. Select the Dispensing Unit Form Indicator.
5. Enter the Compound Dispense Fee.
6. Enter the NDC number.
7. Select Qualifier of 03.
8. Enter Quantity.
9. Enter Ingredient Cost.
10. Select Method Cost Basis.

Note: Repeat steps 6-10 until all ingredients are entered.

Note: The Method Cost Basis is the price source used to compute the drug cost.

11. Click Calculate Claim.

The screenshot shows the 'Compound Ingredients' form. At the top, there are three fields: 'Number of MIC Ingredients *' (value 3), 'Dosage Form Description *' (callout 3), 'Dispensing Unit Form Indicator *' (callout 4), and 'Compound Dispense Fee *' (callout 5). Below these are three rows for ingredients. Each row has fields for 'Ingredient NDC *' (callout 6), 'Drug Name', 'Qualifier *' (callout 7), 'Quantity *' (callout 8), 'Ingredient Cost *' (callout 9), and 'Method Cost Basis *' (callout 10). At the bottom right, there is a 'CALCULATE CLAIM' button with callout 11 pointing to it.

Continue adding the claim picking up at Step 27 in chapter 4: Adding a Long Form DMR.

Prescriber Search

Users may use the Prescriber Search functionality if the Prescriber NPI is not included in the documentation.

1. Click .

The screenshot shows the 'Prescriber' search form. It has a title 'Prescriber' and a search bar labeled 'Prescriber ID *' with a magnifying glass icon (callout 1). Below the search bar is a dropdown menu labeled 'Prescriber Qualifier *' with the selected value '01 - National Provider Identifier ('. At the bottom left, there is a telephone icon.

2. Enter prescriber data.

Note: The search feature requires the prescriber ID and prescriber qualifier OR first name, last name, and state to search for a prescriber.

3. Click **SEARCH**.

The image shows a 'Prescriber Lookup' form. It has input fields for 'Prescriber ID', 'Prescriber Qualifier' (with a dropdown arrow), 'First Name', 'Last Name', 'City', and 'State' (with a dropdown arrow). A 'SEARCH' button is on the right, and a 'CANCEL' button is at the bottom right. A box with the number '2' points to the 'Last Name' field, and a box with the number '3' points to the 'SEARCH' button.

Results return.

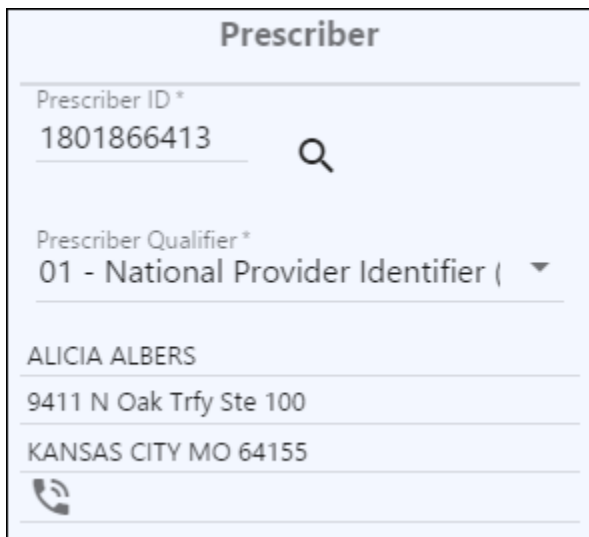

4. Click on the row of the correct prescriber.

The image shows the 'Prescriber Lookup' form with search results. The 'First Name' field is populated with 'alici', 'Last Name' with 'albers', and 'State' with 'MO - MISSOURI'. The 'SEARCH' button is highlighted. Below the form, a table of results is shown. A box with the number '4' points to the first row of the table.

Prescriber ID	Prescriber Qualifier	First Name	Last Name	Prescriber Address	City	State	Zip Code
1801866413	01	ALICIA	ALBERS	9411 N Oak Trfy St...	KANSAS CITY	MO	64155

The prescriber data is populated to the DMR.

The image shows a 'Prescriber' data form. It has fields for 'Prescriber ID *' (1801866413), 'Prescriber Qualifier *' (01 - National Provider Identifier), 'ALICIA ALBERS', '9411 N Oak Trfy Ste 100', and 'KANSAS CITY MO 64155'. There is a magnifying glass icon next to the ID field and a phone icon at the bottom.

Prescriber Not Found

A message of “no results were found” returns if the prescriber search does not find a prescriber.

The screenshot shows a web form titled "Prescriber Lookup". At the top, there are input fields for "Prescriber ID", "Prescriber Qualifier" (a dropdown menu), "First Name" (containing "a"), "Last Name" (containing "albaw"), "City", and "State" (containing "MO - MISSOURI"). A blue "SEARCH" button is to the right of these fields. Below the search fields is a table with the following headers: "Prescriber ID", "Prescriber Qualifier", "First Name", "Last Name", "Prescriber Address", "City", "State", and "Zip Code". The table body contains the text "No results were found." centered across the rows. At the bottom right of the form is a blue "CANCEL" button.

Overriding Copay or Coinsurance

Users have the option to override the file copay or coinsurance if they wish.

When the Override Copay Amount box is checked the user must enter a copay value to apply to the claim.

The screenshot shows a form section for "Override Copay Amount". It features a blue checkmark icon in a box on the left. To the right of the icon is a text input field containing the value "10.00".

When the Override Coinsurance Amount box is checked the user must enter a coinsurance value to apply to the claim.

The screenshot shows a form section for "Override Coinsurance Percentage". It features a blue checkmark icon in a box on the left. To the right of the icon is a text input field containing the value "5".

Vaccine Administration Fee

If a DMR for a Vaccine claim is entered, the Administration Fee field is used to enter the vaccine admin fee. This fee is given to the pharmacy for time spent administering the vaccine.

The screenshot shows a form section for "Administration Fee". It consists of a single text input field with the placeholder text "Administration Fee".

DMR Representative

DMR Representative allows system generated communication to be mailed to an alternative address, such as to a Power of Attorney. The alternative address must be updated in the member record in RxNova.

Patient Location

Indicates where the patient is, such as nursing home (03) or long term care (04). The option selected for this field may change how the claim pays.

Pharmacy Service Type

This field indicates the type of service performed by the pharmacy when different contractual terms exist between a health plan and the pharmacy or when benefits are based upon the type of service performed. The option selected for this field may change how the claim pays

For example if the pharmacy is a normal retail store or a home infusion service.

Level of Service

This outlines the service provided by the provider, such as home service (06) or Consultation (01). The option selected for this field may change how the claim pays

Patient Residence

This sounds the same as Patient Location but is not. Valid values include Hospice and Group Home. The option selected for this field may change how the claim pays.

Submission Clarification Code

This is additional clarification regarding the submission of the claim, usually to override a previously denied claim.

Processing Options

Five different processing options are available to users when adding a new DMR.

- Process as Calculated
- Process as Submitted (PSB)
- Override as Calculated (OVR)
- Override as Submitted (OPS)
- Process as Denied (DNY)

Option	Why Use This	Reimbursement	Errors
Process As Calculated	Default option Processes like a claim submitted by a pharmacy	Uses the contracted rates	Does not override errors
Process As Submitted	Ignores contracted rates and processes with submitted total	Uses the submitted total	Does not override errors
Override As Calculated	Override errors and processes like a claim submitted by a pharmacy	Uses the contracted rates	Overrides errors

Option	Why Use This	Reimbursement	Errors
Override As Submitted	Override errors and processes with submitted total	Uses the submitted total	Overrides errors
Process As Denied	Claim needs to deny but has no errors.	N/A	No errors assigned from processing, denies claim anyway

Process and Retain

Users may use the Process & Retain functionality when a member sends in multiple prescriptions and they must all be added to the application.

After adding the first DMR, rather than clicking the Process Claim button, click the Process & Retain button.

The existing claim processes and the user is presented with a new entry screen prepopulated with the pharmacy and received date from the original DMR.

Appendix D—The Way Things Work—Deleting in Reimbursements

Not the Same as Archive

Deleting is not the same as archiving. Archiving moves entities to another location for storage, out of the immediate area for use. Deleting changes the claim status to 70 DEL.

DMRs may not be deleted in the RxNova Reimbursements application but instead are deleted in IPNS (3270 sessions).

Appendix E—Member Application Error Codes

ID	Message
ADMR0001	Required field(s) are missing information.
ADMR0002	Invalid Date Format.
ADMR0003	The data entered is invalid.
ADMR0004	Invalid Member ID.
ADMR0005	No results were found.
ADMR0006	Member ID or Alternate Member ID are required.
ADMR0007	Member ID or Alternate Member ID or First Name and Last Name are required.
ADMR0008	Customer ID or Customer Name is required.
ADMR0009	First Name is required.
ADMR0010	Last Name is required.
ADMR0011	Invalid search combination.
ADMR0012	NDC Not on File.
ADMR0013	Pharmacy Not Found in Plan.
ADMR0015	Prescriber Not on File.
ADMR0016	Date Received Cannot be Greater than the Current Date.
ADMR0017	Fill Date Cannot be Greater than Received Date.
ADMR0019	Fill Date is required.
ADMR0020	Fill Date Cannot be Greater than Current Date.
ADMR0021	Pharmacy ID is Required.
ADMR0022	Rx Number is Required.
ADMR0023	Days Supply is Required.
ADMR0024	Quantity is Required.
ADMR0025	Receive Date Cannot be Older than 90 days.
ADMR0026	A Valid NDC is Required.
ADMR0027	Enter a Valid Dollar Amount.
ADMR0028	Total Paid Amount is Required.
ADMR0029	Override Coinsurance Percentage Cannot be Greater than 100%.
ADMR0030	Customer ID or Member ID or Alternate Member ID are required for the entered search criteria.
ADMR0031	Must Enter Search Criteria.
ADMR0032	Customer ID is Required.
ADMR0033	Member ID or First Name is Required.
ADMR0034	Member ID or Last Name is Required.
ADMR0036	Customer ID, First Name and Last Name are Required.
ADMR0037	Customer ID and Last Name are Required.

Information on this page constitutes a trade secret, privileged or confidential information, as such terms are interpreted under the Freedom of Information Act and applicable case law. CONFIDENTIAL and PROPRIETARY.

ID	Message
ADMR0038	Customer ID and First Name are Required.
ADMR0039	Customer ID and First Name or Member ID or Alternate ID are Required.
ADMR0040	The selected claim has been finalized and cannot be updated.
ADMR0041	Enter a Valid Percentage.
ADMR0042	Date of Birth is invalid.

Appendix F—Required Fields

These are all of the fields within the Reimbursements application. The second column indicates if the field is required, not required, or conditionally required.

Field	Required	Screen	Form		Field	Notes
			Long	Short		
Customer Name	N	Search			35 byte AN	Intellisense Box
Customer ID	Y	Search			4 byte N	Intellisense Box
Member ID	Conditional	Search			18 byte AN	Only one of these is allowed. Alt ID is Alternate Member ID 1
Alt ID	Conditional	Search			18 byte AN	
Member Last Name	Conditional	Search			80 byte AN	
Member First Name	Conditional	Search			80 byte AN	
Member DOB	N	Search			Date	Does not seem to work
Claim ID	N	Search			12 byte AN	
Fill Date	Y	Entry	X	X	Date	Slashes must be present. Date cannot be after date of entry.
Total Paid	Y	Entry	X	X	8 byte AN	Maximum of 999999.99
# of Scripts	N	Entry		X	2 byte N	
Override Copay Amount	N	Entry	X	X	8 byte N	Maximum of 999999.99
Override Coinsurance Amount	N	Entry	X	X	4 byte N	Two decimal places is allowed, for example 10.75%
Pharmacy	Y	Entry	X		10 byte N	May use the search feature rather than enter the ID
Rx Number	Y	Entry	X		12 byte N	
Received Date	Y	Entry	X		Date	Slashes must be present. Date cannot be after date of entry. Date cannot be older than 90 days from the date of entry.
Refill Number	N	Entry	X		2 byte N	
NDC	Y	Entry	X		11 byte N
