1 INTRODUCTION

The Standardization Committee within the National Council for Prescription Drug Programs (NCPDP) is responsible for maintaining standard formats for the electronic submission of third party pharmacy claims and other related transactions. NCPDP revises the standard format as industry requirements change and as new technology becomes available.

The Standardization Committee within NCPDP, in conjunction with Work Group members, develops the telecommunication standard to provide a consistent format for electronic pharmacy transaction processing. The NCPDP Telecommunication Work Group receives input from all aspects of the pharmacy services administration industry, and the standard is designed to be easy to implement and yet flexible enough to respond as the needs and technology change. The Telecommunication Work Group continually reviews the format design and recommends revisions when appropriate.

The Standardization Committee also pursues standardization of other requirements in the pharmacy industry. NCPDP recommends the use of a standardized format for electronic communication of pharmacy service-related billing, prior authorization processing, and information reporting between pharmacies and other responsible parties. This standard addresses the data format and content, the transmission protocol, and other appropriate telecommunication requirements. NCPDP does not endorse any specific electronic device or network that is used to support these communication vehicles.

If you have any questions regarding the availability or content of the NCPDP *Telecommunication Standard Implementation Guide*, see www.ncdp.org, or contact the Council office at (480) 477-1000 or via email at ncdp@ncdp.org.

1.1 DOCUMENT SCOPE

This document contains the standard formats and implementation guide. Users of this document must consult the NCPDP documents incorporated by reference listed below for further information and clarification.

BILLING UNIT STANDARD IMPLEMENTATION GUIDE

Standard billing units used for claim submission.

DATA DICTIONARY

Full reference to all fields and values (contained within or reference to the *External Code List*) used in the NCPDP standard with examples.

EXTERNAL CODE LIST

Full reference to values used in the NCPDP standard.
The NCPDP *External Code List* (ECL) values and descriptions are applicable to each specified ECL publication date. Since the NCPDP ECL may be updated on a quarterly basis, more current ECL publications may reflect additions, deletions and/or modifications to those values and descriptions in this document.

STANDARDS MATRIX

This document contains charts that list the Standards and Implementation Guides versions approved or under consideration by NCPDP, with reference to the Data Dictionary and External Code List documents appropriate for use.

EDITORIAL AND BEST PRACTICES DOCUMENT

This document contains clarifications, corrections, examples, questions/answers, and best practices that were obtained after the publication of the NCPDP *Telecommunication Standard Implementation Guide*. It must be used as a reference between official publications of the implementation guide. This document may be updated as often as quarterly and new versions should be downloaded. It is available from the public and members only sections of the NCPDP website.

BATCH IMPLEMENTATION GUIDE

This document supports the business need to support the same functionality as the NCPDP *Telecommunication Standard Implementation Guide*, except in a batch environment.

BATCH STANDARD SUBROGATION IMPLEMENTATION GUIDE

The NCPDP *Batch Standard Subrogation Implementation Guide* provides guidelines for the process of requesting reimbursement of a claim from a payer when a payer has paid a claim that is subsequently determined to be the responsibility of another payer. This is commonly referred to as "pay and chase".

PRODUCT IDENTIFIERS STANDARD IMPLEMENTATION GUIDE

The NCPDP *Product Identifier Standard Implementation Guide* provides education and general guidance for consistent formatting and utilization of product identifiers in healthcare. Additionally, it provides rules to avoid changes to identifiers that would disrupt the provision of healthcare and have negative effects on patient care.

EMERGENCY PREPAREDNESS INFORMATION

The NCPDP *Emergency Preparedness Information* document provides guidance for the pharmacy industry for resources available during a declared emergency. The intended audience is healthcare industry providers who would need resource information for eligibility and claims processing affecting displaced individuals. It is available at <http://www.ncdp.org/Resources/Emergency-Preparedness>. Other guidance on patient demographic information during displacement is given.

TELECOMMUNICATION STANDARD VERSION F6 TRANSMISSION EXAMPLES

The NCPDP *Telecommunication Standard VF6 Transmission Examples* document contains examples of transaction requests and responses based on the NCPDP *Telecommunication Standard Implementation Guide*. The *Telecommunication Standard Examples Guide* is version dependent on the *Telecommunication Standard Implementation Guide*. The specified version of the *Telecommunication Standard Examples Guide* is applicable only to the same version of the *Telecommunication Standard Implementation Guide*.

NCPDP produces a comprehensive *Data Dictionary* for all approved standards. The NCPDP *Data Dictionary* specifies valid field values and definitions for all elements in this standard as well as other NCPDP approved standards. The NCPDP *Data Dictionary* has been modified to remove some data elements contained in the previous releases of the standard that were considered impractical and unnecessary for the new standard.

These documents are available to NCPDP members in the "Members" section of the website at www.ncdp.org. Non-members may obtain the documents with membership; please see www.ncdp.org or contact the NCPDP office at 480-477-1000, or via email at ncdp@ncdp.org.

2 BACKGROUND

This document describes NCPDP *Telecommunication Standard Implementation Guide* (Version F and above) standards for the transmission of transactions via telecommunication facilities among health care entities. It is intended for use by organizational decision makers who need to understand the essential features of electronic transmission of transactions and as a guide for software developers and others who must implement the standard.

To understand the development and intent of this format and implementation, it is necessary to first review its background and objective, the framework within which it has been developed, and its intended use in the third party environment.

This version of the standard has been developed for the use of direct electronic submission and adjudication of transactions in an on-line, real-time environment. It is the next logical step in an evolutionary process marked by the following key events:

Submission of paper claims using claim forms unique to each carrier or administrator.

- Development of a Universal Claim Form by NCPDP (1980).
- Submission of claims via magnetic tape and diskette using a format unique to each carrier or administrator (1984).
- Direct electronic submission and adjudication of claims in an on-line, real-time environment using processor-specific formats (1988).
- Development of a telecommunication standard format (version 1.0) by NCPDP (1989).
- Development of an enhanced telecommunication standard format (version 3.2) by NCPDP (1992).
- Development of on-line, real-time compound claim submission within the telecommunication standard format (version 3.3) by NCPDP (1996).
- Development of prior authorization transaction sets within the telecommunication standard format (version 3.4) by NCPDP (1996).
- Development of enhanced, variable telecommunication standard format (version 5.0) by NCPDP (June 1999).
- The naming of the Telecommunication Standard Version 5.1 in the Health Information Portability and Accountability Act (HIPAA) (2000).

Usage of a common transaction format brings advantages to participants in the pharmacy industry. There are significant advantages to both the Originator of the claim and the Processor of the transaction by adopting this version of the standard, such as:

- Common syntax and dictionary
- Adaptability
- Reduced system development expense
- Reduced equipment requirements
- Reduced errors

3 BUSINESS ENVIRONMENT

3.1 OBJECTIVES

The NCPDP *Telecommunication Standard Implementation Guide* (Version F and above) is intended to meet two needs within the pharmacy drug claim industry: to provide practical guidelines for software developers throughout the industry as they implement the Version F and above Standard, and to ensure a consistent implementation of the Version F and above Standard.

This version of the standard facilitates a specific type of business communication among diverse parties within the third party environment. To do this successfully, it must accomplish the following goals:

- Support the needs of a wide base of potential users.
- Maximize use of existing relevant standards wherever possible.
- Be flexible enough to change as needs and technology change.
- Be unambiguous.
- Be easy to implement by carriers and vendors.

3.2 PARTICIPANTS

The NCPDP *Telecommunication Standard Implementation Guide* (Version F and above) supports prescription claim transactions, services, and reporting between the following industry participants:

- Between Providers and Adjudicators, and
- Between Adjudicators (aka Payer-to-Payer)
- Between these entities and Switches/Intermediaries as determined by business need

The NCPDP *Telecommunication Standard Implementation Guide* facilitates the exchange of information supporting REMS (Risk Evaluation & Mitigation Strategies) operations, PDMP (Prescription Drug Monitoring Program) reporting, and general communications between the following participants:

- Between Providers and REMS Administrators
- Between Providers and PDMP program administrators
- Between these entities and Switches and/or Intermediaries as determined by business need

3.2.1 BETWEEN PROVIDERS AND ADJUDICATORS

The communication between Providers and Adjudicators is two-way and the record layout for the transmitted claim and the response to the claim are defined by the Version F and above standard. The diagram below illustrates the typical business environments in which the NCPDP *Telecommunication Standard Implementation Guide* (Version F and above) is employed between providers and adjudicators.

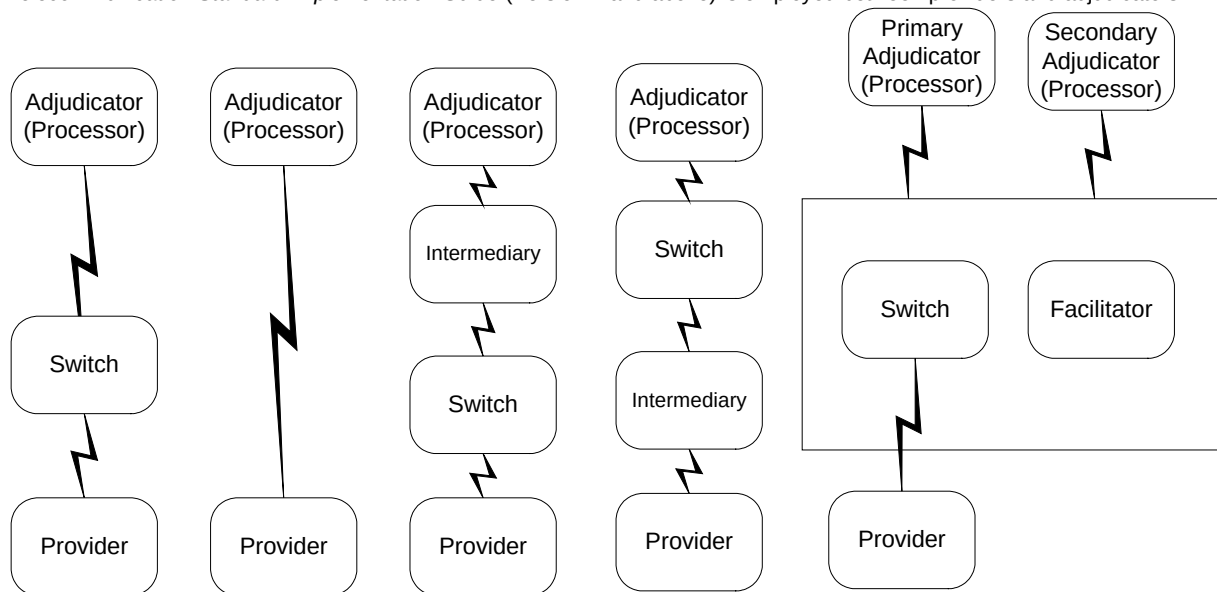

Figure 1. Provider/Adjudicator Participants

A "PROVIDER" may be a retail pharmacy, mail order pharmacy, doctor's office, clinic, hospital, long-term care facility, or any other entity, which dispenses prescription drugs and submits those prescriptions to a payer for reimbursement. A provider may be an entity that collects and reports information about prescribing, dispensing, and consumption of dangerous or abusable drugs or products such as a grocery store or convenience store.

The "ADJUDICATOR" (hereinafter referred to as the "PROCESSOR") is often a third-party administrator of prescription drug programs on behalf of insurers. The Adjudicator also may be an insurer, a governmental program or any other entity, which receives prescription drug claims, makes a decision regarding the level of reimbursement to the provider, and transmits a response to the provider. An adjudicator may be an entity that receives reporting information, record keeping, auditing, or authorizations of services, such as an entity performing drug utilization review reporting or reporting related to abusable products.

Providers may choose to transmit certain prescription drug claims to an "INTERMEDIARY". Intermediaries receive claims from switches or providers, perform editing/messaging and then either pass the claims to the appropriate switch or adjudicator or return (reject) claims to the providers. The reply from the adjudicator also may pass to an intermediary for editing and messaging on its return to the provider.

Providers may choose to transmit claims to an intermediary for a number of reasons, including the following:

- Consolidated provider reporting
- Inventory tracking
- Consolidated claim editing and messaging

The "SWITCH" also receives transactions from providers and intermediaries as claims pass from providers to adjudicators. Switching companies accept transactions, optionally perform format conversions, and optionally perform pre-edits or post-edits.; the switch passes the transaction to the appropriate processor. The reply from the processor also may pass through the switch on its return to the provider. (In some instances the switch returns an approved response if the transaction is for a "cash" prescription.)

Providers utilize the services of a switch for a number of reasons, including the following:

- Capture of data
- Pre and/or post editing
- A processor may not support "Dial-Up" communications
- All transactions can be transmitted to one central point, the "Switch"
- Increased reliability of communications

3.2.2 BETWEEN ADJUDICATORS (PAYER-TO-PAYER)

The communication between Adjudicators is two-way. The record layout for the transmitted claim and the response to the claim (if supported) are defined by the Version F and above standard. Uses, for example:

- **Medicare Crossover** - Coordination of benefits of claims between Medicare and other payers. *This is referred to as "payer-to-payer".*
- **Information Reporting transactions for Medicare Part D from payer to facilitator to payer.** *This is referred to as "Medicare Part D payer-to-payer facilitation".*

The diagram below illustrates the typical business environments in which the NCPDP *Telecommunication Standard Implementation Guide* (Version F and above) is employed between adjudicators (payer-to-payer).

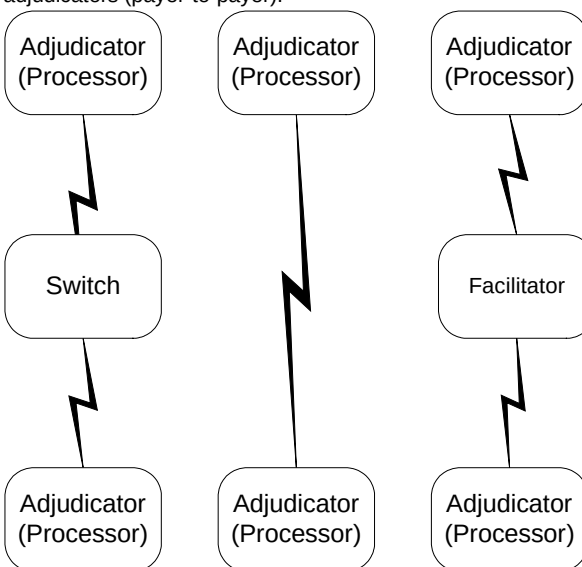

Figure 2. Between Adjudicator Participants

The sections that follow address a variety of issues including the following:

- Implementation practices which are generally accepted throughout the industry although they may not be defined as part of the standard.
- Updates and corrections to the document that defines the Version F and above standard.

There is a unique communication occurring for Medicare Part D claims involving true-out-of-pocket (TrOOP) facilitation that introduces the "FACILITATOR" entity. There is a need for the primary processor Part D plan, hereafter referred to as the Prescription Drug Plan (PDP) to know the patient's pay amount from all other payers.

The Provider transmits all non-primary claims to the Switch, which routes them to both the Secondary, Tertiary, etc. Adjudicator and to the Facilitator. The Facilitator creates and sends reporting transactions containing Secondary, Tertiary, etc. patient's pay amount information to the Primary Adjudicator (Processor).

Third-party activities, as they pertain to the prescription drug industry, can have the following key participants:

Participant	Description	Functions Performed
Patient	Recipient of Service	Request for service
Insurer	Provider of Insurance	- Plan Definition - Covered Group - Covered Services - Benefit Level - Pricing of Contract (Premiums) - Assume Risk of Actual Plan Experience
Administrator	Delivers Administrative Services	- Authorization of Individual Patient - Adjudicator of Claim or Service
Processor	Authorization/Adjudication of Services	- Authorization of Individual Service - Adjudication (Claim or Service Processing) - Predetermination of Benefits information (Claim only)
Reporting Entity	Contractual Service	- Record Keeping - Authorization of Individual Service - Auditing
Provider/Originator	Provider of Service	- Claims/Service Submission - Information Reporting Submission - Prior Authorization Submission - Predetermination of Benefits information (Claim only)
Switch	Communication/Translation Service	- Network or communication services - Format/syntax translation
Intermediary	Contractual Service	- Reconciliation Services - Formulary Services - Pre-Claim editing
Facilitator	Contractual Service	- Eligibility Inquiry - Reporting to the Prescription Drug Plan (PDP) for True Out-Of-Pocket (TrOOP) calculation

The following information may be true of business framework relationships:

- A given entity might serve multiple roles (for example, Insurer and Processor).
- Certain roles might be split among multiple organizations, for example, the Administrator and Processor could be different.
- This version of the telecommunication standard addresses the submission of a claim or service by an Originator to an Administrator/Processor, and identifies the response of the Administrator/Processor to the Originator. For the purpose of this document, the term "Processor" will be used to identify the entity performing the authorization/adjudication function.
- This version of the standard also addresses the submission of an information reporting action by an Originator to a Reporting Entity. This action may be separate from the actual dispensing of a product or service.
- This version of the standard also addresses the trading partner requirement of prior authorizations performed by an Originator to an Administrator/Processor prior to a claim or service being performed.

3.2.3 BETWEEN PROVIDERS AND REMS ADMINISTRATORS

The communication between Providers and a REMS Administrator is two-way and the record layout for the billing functions is defined by this Telecommunication Standard. (Note, the value of Prescription/Service Reference Qualifier (455-EM) differentiates Claim versus Service Billing.)

3.2.3.1 REGISTRATION VERIFICATION VIA BILLING FUNCTIONS

The diagram below illustrates the typical business environments in which the NCPDP *Telecommunication Standard Implementation Guide* is used between pharmacy providers and adjudicators for requests supporting REMS registration verification activities. The "REMS billing functions" process flow affects the following transactions for REMS:

- Claim Billing (B1)

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

- Claim Reversal (B2)
- Claim Rebill (B3)
- Service Billing (S1)
- Service Reversal (S2)
- Service Rebill (S3)
- Prior Authorization Request And Billing (P1)
- Prior Authorization Reversal (P2)

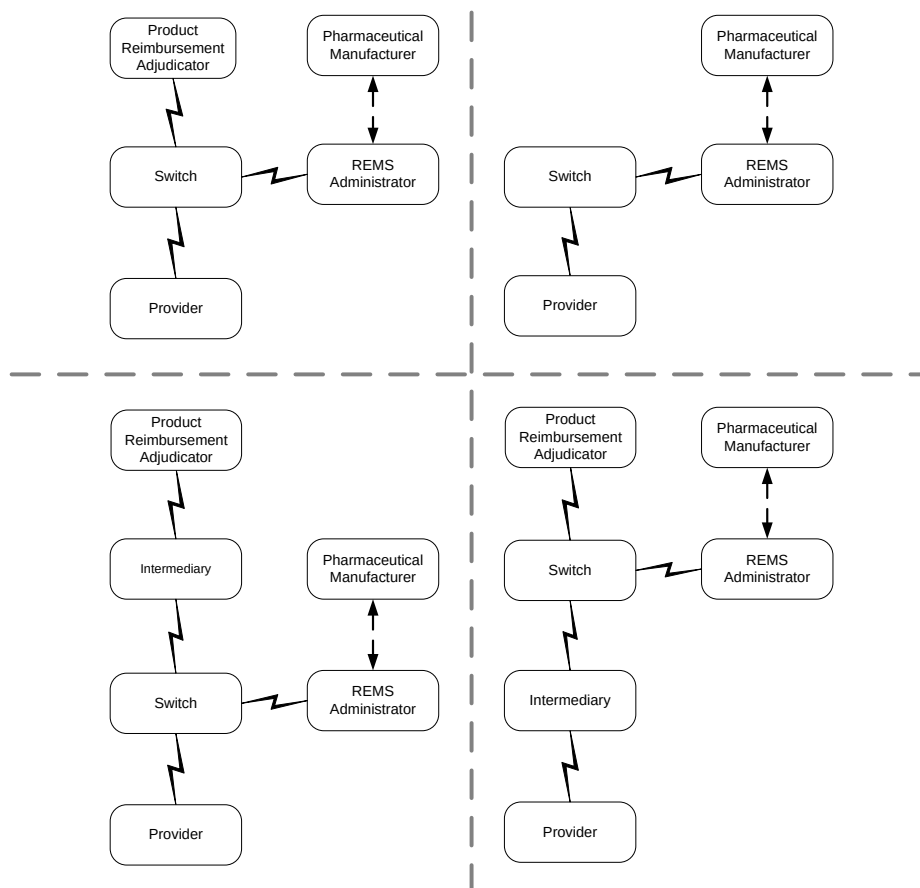

Figure 3. Registration Verification via Billing Functions

The entities depicted in the diagram above are arranged and defined below based on function. Depending on the REMS implementation a single entity may perform one or more of the functions. Examples may include but are not limited to the following:

- The Switch may have the role of a Processor and adjudicate REMS billing functions cited above.
- The Switch may perform the REMS Administration process.
- The REMS Administrator may be the Switch.
- The REMS Administrator may be a Processor.
- The Product Reimbursement Adjudicator may also be the switch (e.g., cash claims).

A “(Dispensing) PROVIDER” may be a retail pharmacy, mail order pharmacy, specialty pharmacy, doctor’s office, clinic, hospital, long-term care facility, or any other entity, which dispenses prescription drugs with a Risk Evaluation and Mitigation Strategy (REMS) registration verification requirement and Elements To Assure Safe Use (ETASU). However, the subset of the above named dispensing providers involved in REMS and ETASU are those dispensers open to the public (“open door pharmacies”) and some “closed door pharmacies” that typically submit billing requests to a payer for processing. This standard is not intended to be used for dispensing providers who bill using other standards or who dispense or administer REMS drugs in an inpatient or office setting or as part of a procedure.

The “SWITCH” receives request transactions from providers and intermediaries as they pass these requests from providers to adjudicators. Switching companies accept REMS billing requests, optionally perform format conversions, and optionally perform pre-edits and post-edits. The Switch sends the transaction to the REMS Administrator. The Switch passes the request transactions to the appropriate processor or returns an approved response if the transaction is for a “cash” prescription. The reply from the processor also passes through the switch on its return to the provider. The Switch coordinates and delivers REMS transactions per contractual agreements with providers.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

The “REMS ADMINISTRATOR” executes the pharmaceutical manufacturer’s REMS program. Upon receipt of the request, the REMS Administrator determines if the dispensing provider, prescriber, and/or patient registration verification activities have been completed, if patient consultation is required, etc. The REMS Administrator may support program reporting, record keeping, auditing, or authorizations of services, such as performing drug utilization review reporting or program adherence reporting for the REMS. It is important to note that the REMS Administrator must ensure a consistent process model, whereby the purpose of REMS is achieved. A standard process should be developed to ensure safe-use specifically for a multi-source (innovator and generic) or “Class wide” REMS and direct all transactions to a single REMS Administrator, regardless of the number of manufacturers.

An “INTERMEDIARY” may be used by dispensing providers to transmit their REMS billing transactions to a claims processor. Intermediaries receive REMS billing requests from switches or dispensing providers, perform editing/messaging and then either pass the request transactions to the appropriate switch or processor or return a denied transaction response to the providers. The reply from the processor also may pass to an intermediary for editing, messaging, or data capture on its return to the dispensing provider.

The “PRODUCT REIMBURSEMENT ADJUDICATOR (PROCESSOR)” receives drug, medical supply or professional service transactions from a provider, applies rules regarding reimbursement based on contracted benefits, and responds to the submitted request.

The “PHARMACEUTICAL MANUFACTURER” develops, produces, and markets drugs or devices licensed for use as medications. The pharmaceutical manufacturer is responsible for the REMS and for contracting with the REMS Administrator.

3.2.3.2 BILLING FOR A REMS SERVICE TRANSACTION

The diagram below illustrates the typical business environments in which the NCPDP *Telecommunication Standard Implementation Guide* is used between providers and Service Reimbursement Adjudicators for service billing functions supporting REMS counseling services activities via a billing request transaction.

Billing of the services uses the Service Billing transactions (Transaction Code = “S1”, “S2” and “S3”).

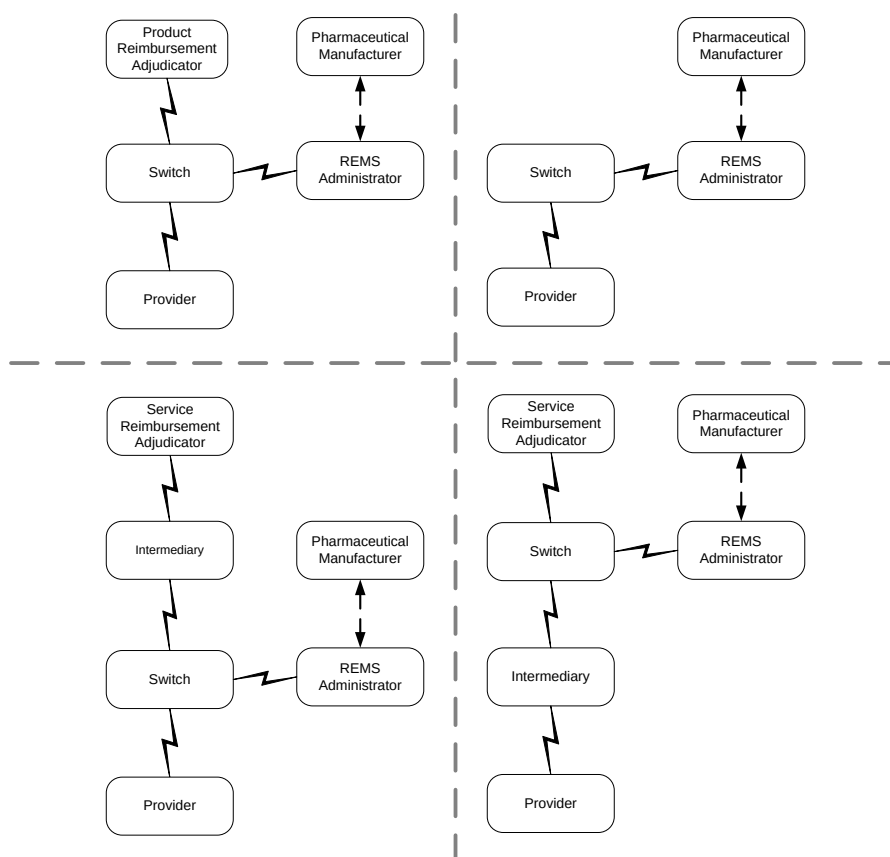

Figure 4. Counseling Documentation via Service Billing Functions

The entities depicted in the diagram above are arranged and defined below based on function. Depending on the REMS implementation a single entity may perform one or more of the functions. Examples may include but are not limited to the following:

- The service reimbursement adjudicator may also be the switch

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

- The service reimbursement adjudicator may also be the REMS Administrator

A “PROVIDER” may be a retail pharmacy, mail order pharmacy, specialty pharmacy, doctor’s office, clinic, hospital, long-term care facility, or any other entity, which dispenses prescription drugs with a Risk Evaluation and Mitigation Strategy (REMS) registration verification requirement and submits a service billing request (i.e., Service Billing) to the pharmaceutical manufacturer via the REMS Administration process.

The “SWITCH” receives REMS billing request transactions from providers and intermediaries as they pass these requests from providers to adjudicators. Switching companies accept REMS billing requests, optionally perform format conversions, and optionally perform pre-edits and post-edits. The switch passes the request transactions to the appropriate processor or returns an approved response if the transaction is for a “cash” prescription. The reply from the processor also may pass through the switch on its return to the provider. The Switch coordinates and delivers REMS and/or PDMP transactions per contractual agreements with providers.

An “INTERMEDIARY” may be used by providers to transmit their REMS billing requests to a “SERVICE REIMBURSEMENT ADJUDICATOR”. Intermediaries receive these transaction requests from switches or providers, perform editing/messaging and then either pass the request transactions to the appropriate switch or processor or return a denied transaction response to the providers. The reply from the processor also may pass to an intermediary for editing, messaging, or data capture on its return to the provider.

The “SERVICE REIMBURSEMENT ADJUDICATOR” receives drug, medical supply or professional service transactions, applies rules regarding reimbursement based on contracted benefits, and responds to the submitted request.

The “PHARMACEUTICAL MANUFACTURER” develops, produces, and markets drugs or devices licensed for use as medications. The pharmaceutical manufacturer is responsible for the REMS.

3.2.4 BETWEEN PROVIDERS AND PDMP ADMINISTRATORS

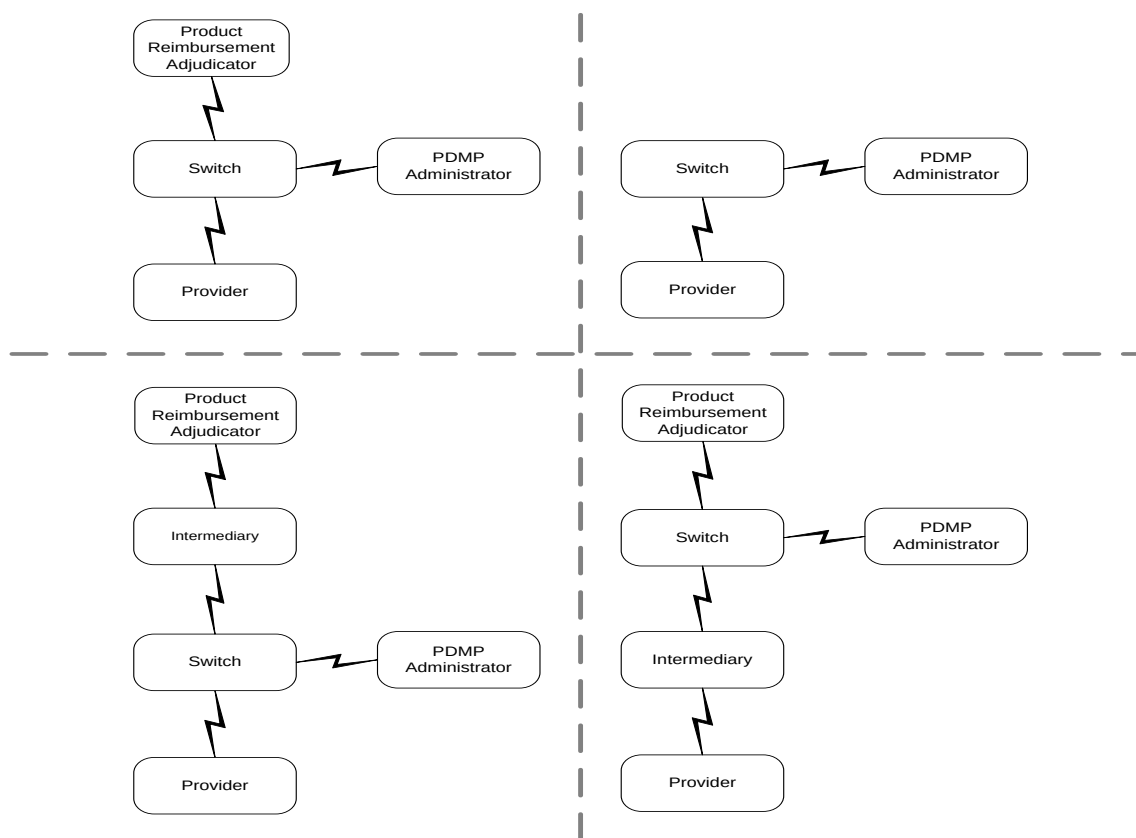

Figure 5. PDMP Reporting via Billing Functions

The communication between Providers and a Prescription Drug Monitoring Program (PDMP) Administrator is two-way and the record layout is based upon a subset of the data populated in the REMS billing transactions and defined by the Telecommunication Standard. PDMP program reporting requirements are statutorily defined.

A “(Dispensing) PROVIDER” may be a retail pharmacy, mail order pharmacy, specialty pharmacy, doctor’s office, clinic, hospital, long-term care facility, or any other entity, which dispenses prescription drugs that are reportable to a PDMP program.

The “SWITCH” receives Billing request transactions from providers and intermediaries as they pass these requests from providers to adjudicators. Switching companies accept REMS billing requests, optionally perform format conversions, and optionally perform pre-edits and post-edits. The switch passes the request transactions to the appropriate processor or returns an approved response if the transaction is for a “cash” prescription. The reply from the processor also passes through the switch on its return to the provider. The Switch coordinates and delivers PDMP transactions per contractual agreements with providers. Providers utilize the services of a switch for a number of reasons, including the following:

- Pre-editing and/or post-editing of request transactions
- Aggregation and consolidation of reportable information
- Single communication network
- Automated processing

The “PDMP ADMINISTRATOR” is a statewide electronic database which collects designated data on substances dispensed in the state. The PDMP is housed by a specified statewide regulatory, administrative or law enforcement agency. The housing agency distributes data from the database to individuals who are authorized under state law to receive the information for purposes of their profession.

An “INTERMEDIARY” may be used by dispensing providers to transmit their Billing transaction requests from switches or dispensing providers, perform editing/messaging and then either pass the request transactions to the appropriate switch or processor or return a denied transaction response to the providers. The reply from the processor also may pass to an intermediary for editing, messaging, or data capture on its return to the dispensing provider.

The “PRODUCT REIMBURSEMENT ADJUDICATOR (PROCESSOR)” receives drug, medical supply or professional service transactions from providers, applies rules regarding reimbursement based on contracted benefits, and responds to the submitted request.

The diagram above illustrates the typical business environments in which the NCPDP *Telecommunication Standard Implementation Guide* is used between pharmacy providers and adjudicators for prescription claim billing functions supporting PDMP reporting activities via a prescription billing request transaction. The process flow affects the following transactions for “PDMP billing functions”:

- Claim Billing (B1)
- Claim Reversal (B2)
- Claim Rebill (B3)
- Prior Authorization Request And Billing (P1)
- Prior Authorization Reversal (P2)

4 BUSINESS FUNCTIONS

4.1 INTRODUCTION

This version of the standard addresses the types of communication between entities defined in section “Participants”. It is not expected that all transaction types will be used by all entities. Trading partner and business needs will determine transaction type usage.

This section describes the different functional transactions defined in this version of the standard.

It is expected that endorsement of this version of the standard will ensure that whenever a receiver needs to process transactions defined by this standard, they will do so only in the formats defined herein.

Please refer to the section “*Transmission Structure*” for a list of the mandatory, situational, and optional segments that may be used in the different transaction types. Also, each transaction has an information section (for example “*Claim Billing or Encounter Information*”) that describes the transactions, segments, and fields usage.

The formats for telecommunicated information include the following situations:

1. Eligibility verification.
2. Claim or Service(s) billings.
3. Eligibility verification as part of full claim or service (s) adjudication as dictated by plan parameters.
4. Claim or service reversals for previously captured or adjudicated claims or services.
5. Claim or service(s) rebilling with an implied reversal - A combination of items 2 or 3, and 4 above. Previously captured or adjudicated claims or services are reversed and then the new claims or services are processed.
6. Information reporting –
 - a. An example of this type of transmission may occur when a drug conflict has been identified and a pharmacist has executed some form of intervention with a specific outcome or to capture other DUR information.
 - i. This type of transaction can be used for a variety of Drug Use Review (DUR) activities.
 - ii. Examples of these transactions include capture of dispensed non-covered prescriptions, override of DUR information-only alerts, or Medicare Part D notifications to PDP regarding record of supplemental payment. Note that CMS requires N transactions to either be accepted or rejected. Capture is not allowed for N transaction relative to Part D reporting of supplemental payment.
 - b. Another example is a pharmacy reporting Section 340B status after providing service being required by trading partner agreement to alert the payer. See “[Appendix E 340B Information Reporting Flow](#)”.
7. Information reporting reversals for previously accepted/captured information.
8. Information reporting rebilling with an implied reversal - A combination of items 6 and 7 above. Previously accepted/captured information is reversed and then the new information is processed.
9. Prior authorization request and billing - Transaction to request simultaneous adjudication/capture of the transaction by the processor upon approval of the prior authorization.
10. Prior authorization reversal for previously captured authorizations.
11. Prior authorization inquiry - Transaction to request the status of a previously submitted prior authorization request that was pended by the processor.
12. Prior authorization request only - Transaction to request a prior authorization only and exclude the processing of a claim or service.
13. Subrogation – See “*Subrogation Standard*” section below. More information on this business function is found in the NCPDP “*Batch Standard Subrogation Implementation Guide*”.
14. Predetermination of benefits – Transaction for a provider to assist the patient in determining if a given prescription would be covered under their program and to provide guidance on patient responsibility costs to make an informed decision about whether the patient would proceed.

The standard addresses the types of communication between Provider, Program Administrators (such as REMS or PDMP), Switches, and Processors using some of the transactions above. The formats for telecommunicated information are defined by the Claim or Service Billing function transactions and the Prior Authorization Request and Billing function transactions. The business functions include:

1. REMS Administration Processing – As part of a billing function transaction to validate program adherence and reporting requirements.
2. PDMP Program Reporting – As part of a prescription billing function transaction to validate program adherence and reporting requirements.

The mandatory and situational fields and segment designations as noted in this document must be followed. Though some fields are designated as situational in this document, the receiver/processor/payer/adjudicator may choose to “require” the field, provided the situation(s) stated for that field in this document (and the requirements of the Implementation Guide) are met. When a situational field is used, the situation must be noted in the plan sheet or provider manual.

4.2 SUBROGATION STANDARD

Subrogation occurs when a payer has paid a claim that is subsequently determined to be the responsibility of another payer. This is commonly referred to as “pay and chase”. This situation occurs when

- Enrollment information is updated retroactively
- Original payer is unaware of other coverage for the member at point of service (POS)
- Pharmacy is unaware of other coverage for the member at POS
- Member presents multiple insurance coverages, however the incorrect order of payers is billed at POS
- Complex rules/facts governing the payer order are unknown at POS

Version F6

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

Since the Subrogation Standard transactions use the Telecommunication Standard transactions, where situations have been defined for fields specifically for subrogation purposes, they are included in this guide as separate charts. More information on this business function is found in the NCPDP *"Batch Standard Subrogation Implementation Guide"*.

5 GENERAL STRUCTURAL OVERVIEW

5.1 OVERVIEW

5.1.1 TRANSMISSION

Transmission - The highest level of data transfer is the transmission. The transmission contains information, which is global to the entire data set. This includes routing information, identification, and information, which determine the parsing of the transaction within. As of Version E7, a transmission contains one transaction.

The Transaction Header and Response Header segments contain fixed length data elements. These segments do not use field separators to separate data elements. In these segments, each data element is transmitted at its **maximum length positionally**. The Header Segment is required and must be first in the transmission. When a field is not used, depending upon trading partner needs, the field must be filled with zeroes or spaces, as appropriate.

At the Request level, the Transaction Header Segment must appear first. The other segments may occur in any order. A segment may only appear once in any transaction and only according to the rules for that transaction.

At the Response level, the Response Header Segment must appear first. The other Response Segments may occur in any order. A segment may only appear once in any transaction and only according to the rules for that transaction

5.1.2 TRANSACTION

Transaction – A transaction occurs within a transmission. A transaction is comprised of data segments of related data elements. As of Version E7, only one transaction occurs within a transmission.

A transaction is a collection of segments.

5.1.2.1 SEGMENTS

Segments are a collection of data fields. Segments denote similar data elements or functions. Segments are separated with the use of a Segment separator and a Segment identifier.

The receiver must not force an order of segments.

The non-header segments contain mandatory and situational or optional fields. All data fields within these segments **are separated from one another by the use of a field separator character**. Data fields are identified with the use of a field identifier.

Mandatory data elements must occur first within the appropriate segment. Each mandatory field is preceded by the field separator and the field's identifier. Mandatory fields may be truncated.

Situational or optional fields occur after the mandatory fields in a segment. Each situational or optional field is preceded by the field separator and the field's identifier. Situational or optional fields may be truncated. Situational or optional fields may occur in any order in a segment except for those designated with a qualifier or in a repeating group. Refer to section “*Standard Conventions*”, “*Qualifiers*” and “*Repetition And Multiple Occurrences*” for information on qualifiers and repeating fields usage.

Segments must not occur multiple times within a transaction. The Segment Identification field should not be submitted if no ensuing fields will be sent in that segment. However, if a transmission contains a Segment Identification with no data elements following, a syntax rejection must not result, unless trading partners have agreed that one or more data elements are necessary in this segment.

For all transaction types, if only the Segment ID field applies (i.e., no information will be submitted in any of the situational or optional fields), the segment is not required. However, if the Segment ID is sent, even though no ensuing situational or optional fields are transmitted, the transaction must not be rejected by the processor.

5.2 TRANSMISSION LEVEL FOR A REQUEST

The following segment occurs at the transmission level in a request. Refer to section “*Transmission Structure*” to determine which segments are appropriate for each transaction code.

- Transaction Header Segment

For every request, the following rules apply:

- The Transaction Header Segment is mandatory and must appear first in the request.
- Other Request segments are mandatory, situational, optional, or not used according to the matrices published in this document.
- The Transaction Count on the request must equal one.

5.3 TRANSACTION LEVEL FOR A REQUEST

The following segments occur at the transaction level in a request. Refer to section “*Transmission Structure*” in this document to determine which segments are appropriate for each transaction code.

- Insurance Segment

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

- 25 -

- Patient Segment
- Pharmacy Provider Segment
- Prescriber Segment
- Coordination of Benefits/Other Payments Segment
- Workers' Compensation Segment
- Claim Segment
- DUR/PPS Segment
- Compound Segment
- Pricing Segment
- Prior Authorization Segment
- Clinical Segment
- Additional Documentation Segment
- Facility Segment
- Narrative Segment
- Intermediary Segment
- Last Known 4Rx Segment
- N Transaction Payer Identification Segment

5.4 TRANSMISSION LEVEL FOR A RESPONSE

The following segments occur at the transmission level in a response. Refer to section "*Transmission Structure*" to determine which segments are appropriate for each transaction code.

- Response Header Segment

Response Header, field Header Response Status (501-F1) is limited to:

"A " for transmission "*accepted*"
"R " for transmission "*rejected*"

5.5 TRANSACTION LEVEL FOR A RESPONSE

The following segments occur at the transaction level in a response. Refer to section "*Transmission Structure*" to determine which segments are appropriate for each transaction code.

- Response Message Segment
- Response Insurance Segment
- Response Insurance Additional Information Segment
- Response Patient Segment
- Response Status Segment
- Response Claim Segment
- Response Pricing Segment
- Response DUR/PPS Segment
- Response Prior Authorization Segment
- Response Other Payers Segment
- Response Intermediary Segment
- Response Other Related Benefit Detail Segment
- Response Provider Segment

Response Status Segment, field Transaction Response Status (112-AN) is limited to:

"A" for "*Approved*"
"B" for "*Benefit*"
"C" for "*Captured*"
"D" for "*Duplicate of Paid*"
"F" for "*Prior Authorization Deferred*"
"P" for "*Paid*"
"Q" for "*Duplicate of Captured*"
"R " for "*Rejected*"
"S" for "*Duplicate of Approved*"

For every response, the following rules apply:

- The Response Header segment is mandatory and must appear first in the response.
- Other Response segments are mandatory, situational, optional, or not used according to the matrices published in this document and may appear in any order.

6 NOTABLE CHANGES FROM PREVIOUS TELECOMMUNICATION VERSIONS

Refer to [Appendix A – History of Document Changes](#) for changes to previous versions of this document.

7 STANDARD CONVENTIONS

This section discusses the generally accepted practices used by the industry and provides guidelines for determining which variant(s) of the standard to use.

7.1 VARIABLE USAGE GUIDELINES

The NCPDP *Telecommunication Standard Implementation Guide* (Version F and above) allows variable length transactions only.

- Sending only necessary data elements and truncating whenever possible assures minimal transmission time.
- Situational or optional fields and segments may be added to or deleted from the transmission as necessary to accommodate changing needs.
- The segment usage matrix included with this Guide specifies required, situational, optional and not used segments for each transaction type.
- As of Version E7, only one transaction per transmission is allowed. Version D through Version E6 supports up to four transactions per transmission for transaction codes B1-B3 (except for compounds), S1-S3, N1-N3 (except for Medicare Part D), and C1-C3.
- Fields in the Version F and above record are defined as alphanumeric, numeric, or dollar fields.
- Dollar fields have no default value and are always signed. The least significant digit of a dollar field must always be an Overpunch Sign, not a digit.
- Reject Code (511-FB) guidance can be found in the NCPDP *External Code List*.

7.2 GENERAL SYNTAX OUTLINE

Data elements have been grouped into segments to assist in usage of similar information.

7.2.1 HEADER SEGMENT

The first segment of every transmission (request or response) is the Header Segment. This is the only segment that does not have a Segment Identifier since it is a fixed field and length segment. After the Header Segment, other segments are included, according to the transaction type (see section "*Transmission Structure*"). Every other segment has an identifier to denote the particular segment for parsing. Segments may appear in any order after the Header Segment, according to whether the segment occurs at the transmission or transaction level. Segments are not allowed to repeat within a transaction.

In the Header Segment, all fields are required positionally and filled to their maximum designation. This is a fixed segment. If a required field is not used in the Header Segment, it must be filled with spaces or zeroes, as appropriate. The fields within the Header Segment do not use field separators.

7.2.2 OTHER SEGMENTS

Other segments may have both required and situational or optional fields. Situational or optional fields in a segment are submitted after the required fields. Both types of fields must be preceded by a field separator and the field's identifier. Situational or optional fields may appear in any order except for those designated with a qualifier or in a repeating group. The required, situational, and optional fields may be truncated to the actual size used. Refer to the "*Standard Conventions*", "*Qualifiers*" and "*Repetition And Maximum Occurrences*" sections that follow.

The Segment ID field should not be submitted if no ensuing fields will be sent. If the Segment is situational or optional for that transaction and there are no Mandatory fields within that Segment, the Segment Identification (111-AM) can be sent without an error generated. This is not recommended, but is possible.

The key is the Segment must be situational or optional for that transaction **and** there must not be any Mandatory fields within that Segment. If the Segment contains Mandatory fields, failure to send the mandatory fields is an error.

If the Segment is not used for that transaction, it is an error to send a Segment that is not defined for that transaction.

Parsing is accomplished with the use of separators. Version F2 and above uses two separators.

- Segment separator Hex 1E (Dec 30)
- Field separator Hex 1C (Dec 28)

7.2.3 A TRANSMISSION

A transmission includes the total request or response being sent. A transmission consists of the Header Segment followed by situational or optional Segments relating to the entire transmission.

A transmission consists of one transaction.

7.2.4 A TRANSACTION

Within a transaction, appropriate segments are included. Segments are delineated with the usage of segment separators. Segments are also identified with the usage of a Segment Identifier in the first position of each segment. One to many segments may be included in each transaction. Field separators are used to delineate fields in the segments.

The general syntax of a transmission request and response will appear as follows:

Header Segment

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

	Header Segment Fields
Segment Separator	
	Mandatory Fields within Segment as appropriate, with field separators
	Situational or Optional Segment Fields with field separators
Segment Separator	
	Mandatory Fields within Segment as appropriate, with field separators
	Situational or Optional Segment Fields with field separators

7.2.5 ORDER OF SEGMENTS

The Transaction Header Segment must appear first in a Request. The other segments may occur in any order. Note, the Segments must occur only once and according to the rules for that transaction.

The Response Header Segment must appear first in a Response. The rest of the Segments may occur in any order. Note, the Segments must occur only once and according to the rules for that transaction.

The receiver must not force an order of segments.

The general structure of a request, for most transactions, will appear as follows (recognizing that some segments may not be used for a given transaction):

Transmission

Header Segment

Transaction Segments (one transaction per transmission)

- Patient Segment
- Insurance Segment
- Claim Segment
- Pharmacy Provider Segment
- Prescriber Segment
- Coordination of Benefits/Other Payments Segment
- Workers' Compensation Segment
- DUR/PPS Segment
- Pricing Segment
- Compound Segment
- Prior Authorization Segment
- Clinical Segment
- Additional Documentation Segment
- Facility Segment
- Narrative Segment
- Intermediary Segment
- Last Known 4Rx Segment
- N Transaction Payer Identification Segment

The general structure of a response, for most transactions, will appear as follows (recognizing that some segments may not be used for a given transaction):

Response

Response Header Segment

Transaction Segments (one transaction per transmission)

- Response Message Segment
- Response Insurance Segment
- Response Status Segment
- Response Claim Segment
- Response Pricing Segment
- Response DUR/PPS Segment
- Response Prior Authorization Segment
- Response Other Payers Segment
- Response Intermediary Segment
- Response Other Related Benefit Detail Segment
- Response Provider Segment

7.2.6 SYNTAX ERROR

Syntax errors encompass all errors that are associated with the parsing of the transmission. The purpose of a syntax error in the standard is to document an error in the structure of the transmission as opposed to an error in the data associated with the transmission. A syntax error applies only to structural errors within a transmission and a message must be communicated, if possible, identifying the location (e.g., byte count, the last parsed field) within the transmission at which the syntax error was encountered. A syntax error does not apply to the data content of a properly parsed field. In this case, a M/I or more specific reject code must be returned.

7.3 EXPLANATION OF SEGMENT AND FIELD DESIGNATION

Categorization		Explanation
MANDATORY		Segment: The Segment is mandatory for the Transaction. Field: The Field is mandatory for the Segment for the Transaction. Mandatory field elements must occur first in the Segment, in the order specified. Fields defined as Mandatory are required when the segment is sent.
SITUATIONAL		Segment: The Segment has been further designated for usage for the Transaction. See section "Order of Segments" above. Field: The Field has been further designated for usage for the Transaction. See indentation below for specific guidance. Situational fields may occur in any order, as long as the qualifier rule and count or counter rules are followed. Qualifier fields must be submitted first, followed by the field qualified. If the field is not needed in the transaction type, both the qualifier and the field qualified are eliminated.
	Required	Field: The Field has been designated with the situation of "Required" for the Segment for the Transaction.
	Required for Subrogation only	The Field has been designated with the situation of "Required" for the Segment for the Transaction for Subrogation usage only.
	Qualified Requirement	The situations designated have qualifications for usage ("Required if x", "Not required if y") for the Segment for the Transaction.
	Qualified Requirement for Subrogation only	The situations designated have qualifications for usage ("Required if x", "Not required if y") for Subrogation.
INFORMATIONAL ONLY		The field is not designated as mandatory, required, or situational but communicates information that should be included when applicable for the Segment for the Transaction.
OPTIONAL		The Field has been designated as optional usage (situations were not intentionally defined) for the Segment for the Transaction.
NOT USED		The Segment is not used for the Transaction or The Field is not used for this Segment for the Transaction.

7.4 SEPARATOR CHARACTERS

Level of Separator	Decimal Representation	Hex Representation	Comment
Segment	030	1E	Separates segments from each other.
Field	028	1C	Separates fields from each other.

For example, in a sample transmission, shown with very simplified syntax below, the following data stream might appear. Please note this uses the hex values represented above as <1E>, <1C>.

This example represents a Billing request transmission with one prescription. Please refer to the NCPDP *Data Dictionary* for field and segment cross-reference.

Note: the presence of a string of b's (bbbb) in the Content column designates a field that must be padded out to spaces.

Field #	ID	Name	Content	Comment
102	A2	Version/Release Number	F6	
103	A3	Transaction Code	B1	
101	A1	IIN Number	61122000	
104	A4	Processor Control Number	1234567890	
109	A9	Transaction Count	1	One billing transaction
202	B2	Service Provider ID Qualifier	07	
201	B1	Service Provider ID	4563663bbbbbbb	
401	D1	Date of Service	20170525	
110	AK	Software Vendor/Certification ID	98765bbbb

7.4.1 SEPARATOR CHARACTER RULES

The software that creates transactions according to the rules of this document must ensure that the segment and field separator characters do not appear as data in any field.

7.5 FIELD DEFINITIONS AND VALUES

A definition of each data element and appropriate values is provided in the NCPDP *Data Dictionary*. The NCPDP *Data Dictionary* identifies and defines the information that is specified in the NCPDP Standard Formats. Each data element that is presented in a transaction data set is identified in the NCPDP *Data Dictionary*.

Every effort has been made to keep references to the names of data elements in the standard consistent with the NCPDP *Data Dictionary*. To facilitate presentation and readability within this document, customarily acceptable abbreviations may be used (e.g., "#" for number, "RX" for prescription, "DAW" for Dispense As Written, etc.). Please refer to the *Data Dictionary* for the complete names and definitions of the data elements.

The NCPDP *External Code List* defines the valid values for the data elements.

7.6 CHARACTER SETS DESIGNATION

N	Unsigned Numeric, always right justified, zero filled. Example: 9(7)v999 is represented as 9999999999
D	Signed Numeric, sign is internal and trailing. Zeroes are always positive, always right justified. Dollar-cents amount with 2 positions to the right of the implied decimal point. All other positions to the left of the implied decimal point. Example: D field of length 8 is represented \$\$\$\$\$\$cc
A/N	Alphanumeric, always left justified, space filled. A-Z, 0-9, and printable characters.
ECS	Email Character Set Upper Case and Lower Case and the following symbols - !#\$%&'/?^`{ }~@ and can only be used in email addresses.

7.7 CHARACTER SET DESIGNATION TRUNCATION

The following field format values are supported and are subject to truncation described in previous sections.

7.7.1 OVERVIEW

Version F and above allows for variable length transactions. "Variable" implementation allows the sender and receiver the option of compressing or eliminating "situational" or "optional" data elements to reduce message length where these data elements are not required by Processor or Reporting Entity.

The request and response contain "Mandatory" segments. The Transaction Header and Response Header segments contain fixed length data elements. These segments do not use field separators to separate data elements. In these segments, each data element is transmitted at its maximum length positionally. Data elements not needed for a transmission are to be zero or space filled as appropriate. See "Transmission Structure" section for more detail.

For other segments, situational or optional fields which are identified by field separators and field identifiers are utilized. "Situational" or "optional" data elements may be present for both the header and transaction sections of a request or response. See "General Syntax Structure" section above for more information.

Situational or optional data elements that are not mandatory may be eliminated or truncated. In the truncated method, data compression of leading zeros in numeric ("N" & "D") fields and trailing spaces in the alphanumeric ("A/N") fields may be suppressed to decrease transmission time. Processors must indicate the extent of their ability to accept variable transactions in their user documentation. Note: Processors must be prepared to ignore situational or optional fields submitted by providers that are not used. These fields may not be of importance to the processor, but may be required of the originating pharmacy system.

When transmitting a Version F and above record, truncating trailing blanks and leading zeroes within fields in the variable portions of the record is recommended. If a field in one of the variable portions is empty, omit the field entirely (including the Field Separator and Field Identifier). Do not truncate or eliminate any fields in the required header segments.

7.7.2 NUMERIC

"N" = Unsigned Numeric, always right justified, zero filled.
Example: 9(7)v999 represents 9999999999
Truncation: 0000000400 becomes 400
Remove leading zeros

Numeric fields default to zeroes.

Version F6
January 2020
OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

7.7.2.1 NUMERIC TRUNCATION

When numeric fields are in a **mandatory fixed length segment**, such as the Transaction Header Segment or Response Header Segment, the numeric fields must be padded with zeroes to the maximum length of the numeric field.

For **all other numeric fields** used in the NCPDP *Telecommunication Standard Implementation Guide*, sending the leading zero(es) is permissible (but not recommended), or truncating the leading zero(es) is permissible (and recommended). For a situational or optional numeric field, a value of 01 is the same as 1 and either is permitted. A value of 0015 is the same as 15 and either is permitted.

7.7.3 DOLLAR

"D" = Signed Numeric, sign is internal and trailing (see section "*Internal Representation of Overpunch Signs*" below), zero always positive, always right justified, zero filled dollar-cents amount with 2 positions to the right of the implied decimal point, all other positions to the left of the implied decimal point.

Example: "D" fields of length 8 represent \$\$\$\$\$\$cc
Truncation: 00000210{ becomes 210{
Remove leading zeros

7.7.3.1 DOLLAR TRUNCATION

Truncation of dollar fields must be limited to removing the leading zeroes for dollar fields sent.

Examples:

409-D9 value of \$25.34 is calculated as 0000000253D and truncated to 253D
506-F6 value of \$12.21 is calculated as 0000000122A and truncated to 122A
438-E3 value of \$5.00 is calculated as 0000000050{ and truncated to 50{
521-FL value of \$0.00 is calculated as 0000000000{ and truncated to {

If a dollar field is not sent, it must not be assumed to be zero since there is no default value for any dollar field.

A single open brace, "{", should be used to populate zero dollar fields.

See section "*Pricing Guidelines*".

7.7.4 ALPHANUMERIC

"A/N" = Alphanumeric, upper case when alpha, always left justified, space filled, upper case, printable characters.

Truncation: "1234ABC44bbbb" becomes "1234ABC44"
Remove trailing spaces

The NCPDP *Telecommunication Standard Implementation Guide* allows the use of

```
<space>
0123456789
ABCDEFGHIJKLMNOPQRSTUVWXYZ
~!@#$%^&*()_-=+|{}[]:;<.>/?;"
```

Alphanumeric fields default to spaces, not null characters, when empty.

The use of lower case letters ASCII 97 - 122 (61 - 7A hex) is not allowed in the NCPDP *Telecommunication Standard Implementation Guide* format except for email addresses.

7.7.4.1 ALPHANUMERIC TRUNCATION

For situational or optional alphanumeric fields used in the NCPDP *Telecommunication Standard Implementation Guide*, sending the trailing space(s) is permissible (but not recommended), or truncating the trailing space(s) is permissible (and recommended). For a situational or optional alphanumeric field, a value of "1 " is the same as "1" and either are permitted. A value of "001 " is the same as "001" and either are permitted.

When alphanumeric fields are in a mandatory fixed length segment, such as the Transaction Header Segment or Response Header Segment, the alphanumeric fields must be padded with spaces to the maximum length of the alphanumeric field.

An alphanumeric field may contain a space or spaces anywhere within the field. For example (where *b* is a space)

"ABC*b*DE" or
"bbABC*b*DE"

are valid uses of a field with spaces. They are **technically different values**.

Trailing spaces may be truncated. For example,

"ABC" and
"ABC*bbb*"

are the same value when the trailing spaces are truncated.

Spaces at the beginning of the field must not be truncated. For example,

"ABC" and

"bbABC"

represent **technically different values** for the same field.

However, while leading spaces are *technically* valid, leading spaces are **not** recommended as one must consider the individual who will enter or view the data in question. For example, spaces at the beginning of a Cardholder ID or Group ID appear to be "white" space on the ID card so it is unlikely that it will be known that a leading space exists.

For example, Person Code (303-C3) is defined as a format of alphanumeric 3. In an alphanumeric field, every digit has significance, with trailing spaces allowed to be truncated. The value "60" in a three-byte alphanumeric field is actually "60 " (six-zero-blank) and is not the same value as "060" (zero-six-zero).

7.8 DEFAULT VALUES

The NCPDP *Data Dictionary* defines values and default values for the fields contained in this document. In general, unless otherwise specified by the *Data Dictionary*,

- Alphanumeric ("A/N") fields have default values of *spaces*
- Numeric ("N") fields have default values of *zeros*
- Signed Numeric ("D") used for dollar fields have *no* default values

7.9 INTERNAL REPRESENTATION OF OVERPUNCH SIGNS

The purpose of using Overpunch signs in dollar fields is to allow the representation of positive and negative dollar amounts without expanding the size of the field (i.e., to hold the plus or minus character).

The Overpunch sign replaces the right most character in a dollar field. The signed value designates the positive or negative status of the numeric value. The dollar field of \$99.95 would be represented as 999E with truncation. A negative dollar amount of \$2.50 would be represented as 25J with truncation.

UNITS		SIGNED POSITIVE				SIGNED NEGATIVE			
Digit	Graphics	Oct	Dec	Hex		Graphics	Oct	Dec	Hex
0	{	173	123	7B		}	175	125	7D
1	A	101	65	41		J	112	74	4A
2	B	102	66	42		K	113	75	4B
3	C	103	67	43		L	114	76	4C
4	D	104	68	44		M	115	77	4D
5	E	105	69	45		N	116	78	4E
6	F	106	70	46		O	117	79	4F
7	G	107	71	47		P	120	80	50
8	H	110	72	48		Q	121	81	51
9	I	111	73	49		R	122	82	52

Table shows ASCII values

7.10 DATE FORMAT

All dates are in the format "CCYYMMDD". A 4-digit year is used to minimize software conversion at the change of the century, and to properly handle situations such as when patients are older than 100 years.

7.10.1 DEFAULT DATE FORMAT

Fields defined as Date format (CCYYMMDD) must not be defaulted to 00000000.

A date field must not default to zeroes, as this is an invalid date. If a pharmacy submits a date of zeroes, the processor must reject it as an invalid date, even if the processor ignores/does not use this field in their processing, but must store this field as part of the original transaction data. In databases that store this field as "date", write routines would fail with a write exception for the invalid date.

A processor that returns a date field is held to the same valid date rule.

7.11 IMPLIED DECIMAL POINTS

Decimal points in dollar fields are implied. Diagnosis code fields must adhere to the owner's code set rules and formats.

7.12 QUALIFIERS

Some data elements are further defined with the use of qualifiers. Qualifier fields must be submitted first, followed by the field qualified. If the field is not needed in the transaction type, both the qualifier and the field qualified are eliminated. Reject Codes (511-FB) exist for situations where a qualifier is not in the defined order. Refer to the NCPDP *External Code List* for guidance on the use of reject codes.

7.13 REPETITION AND MULTIPLE OCCURRENCES

Version F and above includes the ability to repeat certain fields and groups of fields. This document has detailed information and examples.

7.13.1 REPEATING DATA ELEMENTS

Data elements are allowed to be repeated according to rules described in this document. Repeating fields are always preceded with a count or counter field.

Repeating fields may also be part of a set of common or similar fields, which means fields have a natural occurrence within a group that repeats. These sets/logical groupings are outlined in this document.

When multiple repeating fields are part of a set, the fields are situational or optional. If the field is not needed for this set, the field identification and data must be eliminated. Reject Codes (511-FB) exist for repeating fields that are out of order for their set, when applicable.

Version F and above contains repeating fields that are formatted to accommodate a greater number of occurrences than might be practical for real-time transmissions. Every occurrence sent or received should be displayed by the software formatting the transaction. However, if more repetitions occur than can reasonably be displayed on the pharmacy terminal, the following **recommendations** for maximum number to display are offered. These are recommendations only; trading partner requirements will determine the final number of occurrences displayed.

7.13.1.1 COUNT FIELDS

Certain fields are used as count field. A count field indicates the number of repetitions that follow. It is the **total** number of repetitions that follow. For example, a count field containing 4 means that four occurrences of the field or set/logical grouping will follow.

A count is the total number of repetitions that follow. To denote count usage in this section, the table is indented to show the Count field offset from the fields that occur with the Count. The Count field occurs once and the fields occur the number of times denoted in the Count. For example:

Field	Field Name
YYY-YY	Count field that contains the total number of repetitions
456-BB	Field A that occurs repetition 1
789-CC	Field B that occurs repetition 1
456-BB	Field A that occurs repetition 2
789-CC	Field B that occurs repetition 2
456-BB	Et cetera

In the Response Status Segment, the Reject Count (510-FA) would contain the value 4, with Reject Code (511-FB) following 4 times with each reject code value. The following is for illustration only.

For illustration only.

Field #	ID	Field Name	Value	Comment
111	AM	Segment Identification	21	Response Status Segment
112	AN	Transaction Response Status	R	
510	FA	Reject Count	4	Total number of occurrences = Four
511	FB	Reject Code	01	M/I IIN
511	FB	Reject Code	04	M/I Processor Control Number
511	FB	Reject Code	05	M/I Service Provider ID
511	FB	Reject Code	06	M/I Group Number

An example of the usage of "count" follows. Italics denote the counts. Coordination of Benefits/Other Payments Count has a value of 2, and two repetitions follow (Other Payer Coverage Type = "02" and "01"). Other Payer Reject Count has a value of 1, and one repetition follows. Other Payer Amount Paid Count has a value of 2, and two repetitions follow of Other Payer Amount Paid Qualifier and Amount Paid.

Field	Field Name	Value
337-4C	Coordination of Benefits/Other Payments Count	2
338-5C	Other Payer Coverage Type	02
339-6C	Other Payer ID Qualifier	01
340-7C	Other Payer ID	1234567890
C47-9T	Other Payer Adjudicated Program Type	1 (Medicaid Title XIX)
C49-9V	Other Payer Reconciliation ID	20160202XYZ1213
443-E8	Other Payer Date	20160526
471-5E	Other Payer Reject Count	1
472-6E	Other Payer Reject Code	70
338-5C	Other Payer Coverage Type	01
339-6C	Other Payer ID Qualifier	03
340-7C	Other Payer ID	234567
C47-9T	Other Payer Adjudicated Program Type	3 (Commercial)
C49-9V	Other Payer Reconciliation ID	20160202003366

	431-DV	Other Payer Amount Paid	150{

7.13.1.2 COUNTER FIELDS

The term "counter" as used in this standard, is synonymous with occurrence number. A counter field may occur multiple times. A counter field indicates which loop of the repetition. A counter field will be followed by fields in a set or logical grouping. Each repetition of the set/logical grouping must use the counter field, in sequential, ascending order (repetition 1, then 2, then 3, et cetera). A counter field is used when all fields in the repetition set/logical grouping are situational or optional.

Note, not all fields within a set/logical grouping must be present in each repetition. The fields needed within each set/logical grouping will be determined by what is being reported for each counter repetition.

For example, in a repetition of four, the first occurrence of the field or set/logical grouping would be preceded by a counter with a value of 1. The second occurrence of that field or set/logical grouping would be preceded by a counter with a value of 2. The third occurrence would be preceded by a value of 3 and the fourth by a counter with a value of 4.

A counter field identifies a specific loop in a series of loops, in sequential order. To denote counter usage in this section, the table is indented to show the Counter field column lined up with the fields that occur with each repetition of the Counter field. For example:

Field	Field Name
YYY-YY	Counter field that increments for each occurrence
123-AA	Field that occurs with each counter occurrence
222-BB	Field that occurs with each counter occurrence
333-CC	Field that occurs with each counter occurrence
YYY-YY	Counter field that increments for each occurrence
123-AA	Field that occurs with each counter occurrence
222-BB	Field that occurs with each counter occurrence
333-CC	Field that occurs with each counter occurrence

For example, in the Clinical Segment, the Clinical Information Counter (493-XE) would contain 1 with any/all of the measurement fields following for this repetition. The Clinical Information Counter would then repeat and contain 2 with any/all of the measurement fields following for this repetition. The Clinical Information Counter would then repeat and contain 3 with any/all of the measurement fields following for this repetition. The Clinical Information Counter would then repeat and contain 4 with any/all of the measurement fields following for this repetition.

Below for each repetition of Clinical Information Counter, the measurement fields are situational or optional within the set/logical grouping. Each repetition may have different combinations of the measurement fields, depending on what is being reported. This chart also shows a count example of Diagnosis Code.

For illustration only.

Field #	ID	Field Name	Value	Comment
111	AM	Segment Identification	13	Clinical Segment
491	VE	Diagnosis Code Count	2	Two occurrences total
492	WE	Diagnosis Code Qualifier		First diagnosis qualifier
424	DO	Diagnosis Code		First diagnosis code
492	WE	Diagnosis Code Qualifier		Second diagnosis qualifier
424	DO	Diagnosis Code		Second diagnosis code
493	XE	Clinical Information Counter	1	First repetition
494	ZE	Measurement Date		
495	H1	Measurement Time		
496	H2	Measurement Dimension		
497	H3	Measurement Unit		
499	H4	Measurement Value		
493	XE	Clinical Information Counter	2	Second repetition
495	H1	Measurement Time		
496	H2	Measurement Dimension		
497	H3	Measurement Unit		
499	H4	Measurement Value		
493	XE	Clinical Information Counter	3	Third repetition
494	ZE	Measurement Date		
495	H1	Measurement Time		
496	H2	Measurement Dimension		
497	H3	Measurement Unit		
499	H4	Measurement Value		

Version F6

January 2020

OFFICIAL RELEASE

<i>473-7E</i>	<i>DUR/PPS Code Counter</i>	<i>3</i>
	439-E4 Reason For Service Code	TD
	440-E5 Professional Service Code	M0
	441-E6 Result of Service Code	1B
	474-8E DUR/PPS Level of Effort	11
	475-J9 DUR/DUE Co-Agent ID Qualifier	01
	476-H6 DUR/DUE Co-Agent ID	17236056901

7.13.1.3 USAGE

The following **counter** fields are submitted by the provider:

- ☐ Clinical Information Counter (493-XE) – maximum 5 occurrences supported
- ☐ DUR/PPS Code Counter (473-7E) – maximum 9 occurrences supported

The following **count** fields are submitted by the provider:

- ☐ Coordination of Benefits/Other Payments Count (337-4C) – maximum count of 3
- ☐ Procedure Modifier Code Count (458-SE) – maximum count of 10
- ☐ Diagnosis Code Count (491-VE) – maximum count of 5
- ☐ Compound Ingredient Component Count (447-EC) – maximum count of 25 ingredients
- ☐ Compound Ingredient Modifier Code Count (362-2G) – maximum count of 10
- ☐ Other Amount Claimed Submitted Count (478-H7) – maximum count of 3
- ☐ Intermediary ID Count (B44-8G) – maximum count of 5
- ☐ Regulatory Fee Count (D60-RK) – maximum count of 3
- ☐ Other Payer Regulatory Fee Type Count (D53-P9) – maximum count of 3
- ☐ Other Payer Reject Count (471-5E) – maximum count of 5
- ☐ Other Payer Amount Paid Count (341-HB) – maximum count of 9
- ☐ Other Payer-Patient Responsibility Amount Count (353-NR) – maximum count of 25. Note, the occurrences are dependent upon the number of component parts returned from a previous payer.
- ☐ Submission Clarification Code Count (354-NX) – maximum count of 5
- ☐ Question Number/Letter Count (377-2Z) – maximum count of 50
- ☐ Benefit Stage Indicator Count (C50-9W) – maximum count of 4
- ☐ Submission Type Code Count (D16-KZ) – maximum count of 5
- ☐ Patient ID Count (618-RR) – maximum count of 9

The following **counter** fields are returned by the processor:

- ☐ DUR/PPS Response Code Counter (567-J6) – maximum 9 occurrences

The following **count** fields are returned by the processor:

- ☐ Reject Count (510-FA) – maximum count of 5
- ☐ Approved Message Code Count (547-5F) – maximum count of 5
- ☐ Additional Message Information Count (130-UF) – maximum count of 25
- ☐ Payer/Health Plan ID Count (C96-KR) – maximum count of 3
- ☐ Help Desk Support Type Count (C72-BH) – maximum count of 5
- ☐ Help Desk Business Unit Type Count (C67-BB) – maximum count of 5
- ☐ Formulary Alternative Product Count (551-9F) – maximum count of 6
- ☐ Formulary Alternative Required Therapy Indicator Count (D44-PO) – maximum count of 6
- ☐ Plan Benefit Override Value Count (D55-RD) – maximum count of 9
- ☐ Intermediary ID Count (B44-8G) – maximum count of 5
- ☐ Intermediary Help Desk Support Type Count (C86-KC) – maximum count of 5
- ☐ Intermediary Help Desk Business Unit Type Count (C81-G9) – maximum count of 5
- ☐ Patient Pay Component Count (C94-KP) – maximum count of 25
- ☐ Regulatory Fee Count (D60-RK) – maximum count of 3
- ☐ Other Amount Paid Count (563-J2) – maximum count of 3
- ☐ Other Benefit Count (D26-M8) – maximum count of 9
- ☐ Other Benefit Detail Information Count (D37-N8) – maximum count of 9
- ☐ Other Payer ID Count (355-NT) – maximum count of 4 for claim, service and prior authorization response transactions. Maximum count of 9 for eligibility response transactions.
- ☐ Benefit Stage Indicator Count (C50-9W) – maximum count of 4
- ☐ Benefit Type Opportunity Count (C59-AF) – maximum count of 9
- ☐ Patient ID Count (618-RR) – maximum count of 9

Section “*Structure Quick Reference*” of this guide lists mandatory, situational, and optional fields within each segment. In addition, some repeating fields contain logical groupings that facilitate parsing. Logical groupings include:

7.13.1.4 REQUEST SEGMENTS

7.13.1.4.1 COORDINATION OF BENEFITS/OTHER PAYMENTS SEGMENT

7.13.1.4.1.1 In Payment Scenarios

In the following charts, the previous payer returned payment information. This payment information is then sent on to the next payer in the “Other Payer” fields.

The Coordination of Benefits/Other Payments Segment may be represented multiple ways in payment scenarios. The requirements will be determined by business need.

7.13.1.4.1.1.1 1. Other Payer Amount Paid Repetitions Only

The processor has a business need to know information reported from previous payers, which includes the other payer amounts (shipping, delivery, incentive, cognitive service, et cetera) only. The chart representation would be as follows. In this scenario, only the Other Payer Amount Paid Count repetitions would be present. The Other Payer Percentage Tax Exempt Indicator (D51-P7), the Other Payer Regulatory Fee Type Count (D53-P9) and its grouping, and/or the Benefit Stage Indicator Count (C50-9W) and its grouping can also be returned when applicable for an Other Payer.

See the below excerpt from the COB/Other Payments segment for an example of a single Other Payment instance that would repeat when there are multiple payers.

Field	Field Name
337-4C	Coordination of Benefits/Other Payments Count
338-5C	Other Payer Coverage Type
339-6C	Other Payer ID Qualifier
340-7C	Other Payer ID
C47-9T	Other Payer Adjudicated Program Type
C49-9V	Other Payer Reconciliation ID
443-E8	Other Payer Date
341-HB	Other Payer Amount Paid Count
342-HC	Other Payer Amount Paid Qualifier
431-DV	Other Payer Amount Paid
D51-P7	Other Payer Percentage Tax Exempt Indicator
D53-P9	Other Payer Regulatory Fee Type Count
D63-RN	Other Payer Regulatory Fee Type Code
D52-P8	Other Payer Regulatory Fee Exempt Indicator
C50-9W	Benefit Stage Indicator Count
C51-9X	Benefit Stage Indicator

7.13.1.4.1.1.2 2. Other Payer-Patient Responsibility Amount Repetitions Only

The processor has a business need to know information from previous payers, which includes the patient's responsibility amounts only. The chart representation would be as follows. In this scenario, the Other Payer-Patient Responsibility Amount Count repetitions would be present.

The Other Payer Percentage Tax Exempt Indicator (D51-P7), the Other Payer Regulatory Fee Type Count (D53-P9) and its grouping, and/or the Benefit Stage Indicator Count (C50-9W) and its grouping can also be returned when applicable for an Other Payer.

See the below excerpt from the COB/Other Payments segment for an example of a single Other Payment instance that would repeat when there are multiple payers.

Field	Field Name
337-4C	Coordination of Benefits/Other Payments Count
338-5C	Other Payer Coverage Type
339-6C	Other Payer ID Qualifier
340-7C	Other Payer ID
C47-9T	Other Payer Adjudicated Program Type
C49-9V	Other Payer Reconciliation ID
443-E8	Other Payer Date
D51-P7	Other Payer Percentage Tax Exempt Indicator
D53-P9	Other Payer Regulatory Fee Type Count
	D63-RN Other Payer Regulatory Fee Type Code
	D52-P8 Other Payer Regulatory Fee Exempt Indicator
353-NR	Other Payer-Patient Responsibility Amount Count
	351-NP Other Payer-Patient Responsibility Amount Qualifier
	352-NQ Other Payer-Patient Responsibility Amount
C50-9W	Benefit Stage Indicator Count
	C51-9X Benefit Stage Indicator

7.13.1.4.1.1.3 3. Other Payer Amount Paid, Other Payer-Patient Responsibility Amount, and Benefit Stage Repetitions Present (Government Programs)

The processor has a business need to know information reported from previous payers, which includes *both* the other payer amounts (shipping, delivery, incentive, cognitive service, et cetera), *and* the patient's responsibility amounts. This is represented in the following chart. In this scenario, both the Other Payer Amount Paid Count repetitions and the Other Payer-Patient Responsibility Amount Count repetitions would be present. The Other Payer Percentage Tax Exempt Indicator (D51-P7), the Other Payer Regulatory Fee Type Count (D53-P9) and its grouping, and/or the Benefit Stage Indicator Count (C50-9W) and its grouping can also be returned when applicable for an Other Payer.

See the below excerpt from the COB/Other Payments segment for an example of a single Other Payment instance that would repeat when there are multiple payers.

Field	Field Name
337-4C	Coordination of Benefits/Other Payments Count
338-5C	Other Payer Coverage Type
339-6C	Other Payer ID Qualifier
340-7C	Other Payer ID
C47-9T	Other Payer Adjudicated Program Type
C49-9V	Other Payer Reconciliation ID
443-E8	Other Payer Date
341-HB	Other Payer Amount Paid Count
	342-HC Other Payer Amount Paid Qualifier
	431-DV Other Payer Amount Paid
D51-P7	Other Payer Percentage Tax Exempt Indicator
D53-P9	Other Payer Regulatory Fee Type Count
	D63-RN Other Payer Regulatory Fee Type Code
	D52-P8 Other Payer Regulatory Fee Exempt Indicator
353-NR	Other Payer-Patient Responsibility Amount Count
	351-NP Other Payer-Patient Responsibility Amount Qualifier
	352-NQ Other Payer-Patient Responsibility Amount
C50-9W	Benefit Stage Indicator Count
	C51-9X Benefit Stage Indicator

7.13.1.4.1.2 General Information

From the above information, the field Coordination of Benefits/Other Payments Count (337-4C) when supported will contain a maximum count of 3. The Count *will contain* a value between 1 and 3 when used and the indented fields below (Other Payer Coverage Type, Other Payer ID Qualifier, et cetera) will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section "Structure Quick Reference".

The field Other Payer Amount Paid Count (341-HB) when supported will contain a maximum count of 9. The Count *will contain* a value between 1 and 9 when used and the indented fields (Other Payer Amount Paid Qualifier and Other Payer Amount Paid) will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section "Structure Quick Reference". When Other Payer Amount Paid Count (341-HB) is supported, Other Payer Amount Paid Qualifier (342-HC) and Other Payer Amount Paid (431-DV) must be supported.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

The field Other Payer Regulatory Fee Type Count (D53-P9) when supported will contain a maximum count of 3. The Count will contain a value between 1 to 3 when used and the indented fields (Other Payer Regulatory Fee Type Code (D63-RN) and Other Payer Regulatory Fee Exempt Indicator (D52-P8)) will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section “*Structure Quick Reference*”. Note, the occurrences are dependent upon the number of component parts returned from a previous payer.

The field Other Payer-Patient Responsibility Amount Count (353-NR) when supported will contain a maximum count of 25. The Count *will contain* a value between 1 and 25 when used. The indented fields (Other Payer-Patient Responsibility Amount Qualifier (351-NP) and Other Payer-Patient Responsibility Amount (352-NQ)) will repeat the number of times the Count specifies with mandatory/situational/optional requirements as defined in the section “*Structure Quick Reference*”. Note, the occurrences are dependent upon the number of component parts returned from a previous payer.

The field Benefit Stage Indicator Count (C50-9W) when supported will contain a maximum count of 4. The Count *will contain* a value between 1 and 4 when used. The indented field Benefit Stage Indicator (C51-9X) will repeat the number of times the Count specifies with mandatory/situational/optional requirements as defined in the section “*Structure Quick Reference*”.

Please see the section in this document called “*Specific Segment Discussion*”, “*Request Segments*”, “*Coordination of Benefits/Other Payments Segment*”. This section defines important rules for usage of the field Other Payer-Patient Responsibility Amount Count (353-NR) depending upon the value in the field Other Payer-Patient Responsibility Amount Qualifier (351-NP).

7.13.1.4.1.3 In Reject Scenarios

From the above information, the field Coordination of Benefits/Other Payments Count (337-4C) when supported will contain a maximum count of 3. The Count *will contain* a value between 1 and 3 when used and the indented fields below (Other Payer Coverage Type, Other Payer ID Qualifier, et cetera) will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section “*Structure Quick Reference*”.

7.13.1.4.1.3.1 Other Payer Reject Fields

In the next chart, the previous payer returned rejection information. This rejection information is then sent in a separate transmission to the next payer in the Other Payer Reject fields.

The field Other Payer Reject Count (471-5E) when supported will contain a maximum count of 5. The Count *will contain* a value between 1 and 5 when used and Other Payer Reject Code will repeat the number of times the Count specifies.

Field	Field Name
337-4C	Coordination of Benefits/Other Payments Count
338-5C	Other Payer Coverage Type
339-6C	Other Payer ID Qualifier
340-7C	Other Payer ID
C47-9T	Other Payer Adjudicated Program Type
C49-9V	Other Payer Reconciliation ID
443-E8	Other Payer Date
471-5E	Other Payer Reject Count
472-6E	Other Payer Reject Code

Either “Other Payer Amount Paid” or “Other Payer Reject Count and Code” will occur, depending on the outcome of a previous claim or service submitted.

The next chart indicates the previous payer returned multiple reject codes. These multiple reject codes are sent to the next payer.

In this scenario example, the Coordination of Benefits/Other Payments Count contains a value of 1. Other Payer Coverage Type, Other Payer ID Qualifier, Other Payer ID, Other Payer Adjudicated Program Type, Other Payer Reconciliation ID, Other Payer Date, and Other Payer Reject Count would each occur once, with mandatory/situational/optional requirements as defined in the section “*Structure Quick Reference*”.

The field Other Payer Reject Count (471-5E) in this scenario example would contain a value of 3. Other Payer Reject Code (472-6E) would occur 3 times, with 3 unique values, to denote the 3 reject codes as specified by the Count.

Field	Field Name
337-4C	Coordination of Benefits/Other Payments Count
338-5C	Other Payer Coverage Type
339-6C	Other Payer ID Qualifier
340-7C	Other Payer ID
C47-9T	Other Payer Adjudicated Program Type
C49-9V	Other Payer Reconciliation ID
443-E8	Other Payer Date
471-5E	Other Payer Reject Count
472-6E	Other Payer Reject Code
472-6E	Other Payer Reject Code
472-6E	Other Payer Reject Code

Version F6

7.13.1.4.2 CLAIM SEGMENT**7.13.1.4.2.1 Procedure Modifier Code Count**

Field	Field Name
458-SE	Procedure Modifier Code Count
459-ER	Procedure Modifier Code

From the above information, the field Procedure Modifier Code Count (458-SE) when supported will contain a maximum count of 10. The Count *will contain* a value between 1 to 10 when used and Procedure Modifier Code will repeat the number of times the Count specifies.

7.13.1.4.2.2 Submission Clarification Code Count

Field	Field Name
354-NX	Submission Clarification Code Count
420-DK	Submission Clarification Code

From the above information, the field Submission Clarification Code Count (354-NX) when supported will contain a maximum count of 5. The Count *will contain* a value between 1 to 5 when used and the Submission Clarification Code will repeat the number of times the Count specifies.

7.13.1.4.2.3 Submission Type Code Count

Field	Field Name
D16-KZ	Submission Type Code Count
D17-K8	Submission Type Code

From the above information, the field Submission Type Code Count (D16-KZ) when supported will contain a maximum count of 5. The Count *will contain* a value between 1 to 5 when used and the Submission Type Code will repeat the number of times the Count specifies.

7.13.1.4.3 DUR/PPS SEGMENT**7.13.1.4.3.1 DUR/PPS Code Counter**

Field	Field Name
473-7E	DUR/PPS Code Counter
439-E4	Reason For Service Code
440-E5	Professional Service Code
441-E6	Result of Service Code
474-8E	DUR/PPS Level of Effort
475-J9	DUR/DUE Co-Agent ID Qualifier
476-H6	DUR/DUE Co-Agent ID

From the above information, the field DUR/PPS Code Counter (473-7E) when supported *will repeat* a maximum of 9 occurrences. The counter field indicates which sequential loop of the repetition. For each repetition of the DUR/PPS Code Counter (1, 2, 3, et cetera.), the fields Reason for Service Code, Professional Service Code, Result of Service Code, et cetera will occur, with mandatory/situational/optional requirements as defined in the section "Structure Quick Reference".

7.13.1.4.4 COMPOUND SEGMENT**7.13.1.4.4.1 Compound Ingredient Component Count**

Field	Field Name
447-EC	Compound Ingredient Component Count
488-RE	Compound Product ID Qualifier
489-TE	Compound Product ID
448-ED	Compound Ingredient Quantity
449-EE	Compound Ingredient Drug Cost
490-UE	Compound Ingredient Basis of Cost Determination
362-2G	Compound Ingredient Modifier Code Count
363-2H	Compound Ingredient Modifier Code

From the above information, the field Compound Ingredient Component Count (447-EC) when supported will contain a maximum count of 25 ingredients. The Count *will contain* a value between 1 to 25 when used and the indented fields (Compound Product ID Qualifier, Compound Product ID, Compound Ingredient Quantity, et cetera) will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section "Structure Quick Reference".

The Compound Ingredient Modifier Code Count (362-2G) when supported will contain a maximum count of 10. The Count *will contain* a value from 1 to 10 when used and the indented field, Compound Ingredient Modifier Code, will repeat the number of times the Count specifies.

7.13.1.4.5 PRICING SEGMENT**7.13.1.4.5.1 Other Amount Claimed Submitted Count**

Field	Field Name
478-H7	Other Amount Claimed Submitted Count
479-H8	Other Amount Claimed Submitted Qualifier
480-H9	Other Amount Claimed Submitted

From the above information, the field Other Amount Claimed Submitted Count (478-H7) when supported will contain a maximum count of 3. The Count *will contain* a value between 1 to 3 when used and the fields Other Amount Claimed Submitted Qualifier and Other Amount Claimed

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

Submitted will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section "Structure Quick Reference".

7.13.1.4.5.2 Regulatory Fee Count

Field	Field Name
D60-RK	Regulatory Fee Count
D61-RL	Regulatory Fee Type Code
481-HA	Regulatory Fee Amount Submitted

From the above information, the field Regulatory Fee Count (D60-RK) when supported will contain a maximum count of 3. The Count *will contain* a value between 1 to 3 when used and the fields Regulatory Fee Type Code and Regulatory Fee Amount Submitted will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section "Structure Quick Reference".

7.13.1.4.6 CLINICAL SEGMENT

7.13.1.4.6.1 Diagnosis Code Count

Field	Field Name
491-VE	Diagnosis Code Count
492-WE	Diagnosis Code Qualifier
424-DO	Diagnosis Code
493-XE	Clinical Information Counter
494-ZE	Measurement Date
495-H1	Measurement Time
496-H2	Measurement Dimension
497-H3	Measurement Unit
499-H4	Measurement Value

From the above information, the field Diagnosis Code Count (491-VE) when supported will contain a maximum count of 5. The Count *will contain* a value between 1 to 5 when used and the fields Diagnosis Code Qualifier and Diagnosis Code will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section "Structure Quick Reference".

7.13.1.4.6.2 Clinical Information Counter

From the above information, the field Clinical Information Counter (493-XE) when supported *will repeat* a maximum of 5 occurrences. The counter field indicates which loop of the repetition, in sequential order. For each repetition of the Clinical Information Counter (1, 2, 3, et cetera.), the fields Measurement Date, Measurement Time, et cetera will occur, with mandatory/situational/optional requirements as defined in the section "Structure Quick Reference".

7.13.1.4.7 ADDITIONAL DOCUMENTATION SEGMENT

7.13.1.4.7.1 Question Number/Letter Count

Field	Field Name
377-2Z	Question Number/Letter Count
378-4B	Question Number/Letter
379-4D	Question Percent Response
380-4G	Question Date Response
381-4H	Question Dollar Amount Response
382-4J	Question Numeric Response
383-4K	Question Alphanumeric Response

From the above information, the field Question Number/Letter Count (377-2Z) when supported will contain a maximum count of 50. The Count *will contain* a value between 1 to 50 when used, and will indicate the number of times Question Number/Letter (378-4B) will occur. Question Number/Letter (378-4B) is required when Question Number/Letter Count (377-2Z) is submitted and will indicate the question number of the **one** field in the logical grouping (Question Percent Response, Question Date Response, Question Dollar Amount Response, Question Numeric Response, and Question Alphanumeric Response) that follows. (See section "Specific Segment Discussion", "Request Segments", "Additional Documentation Segment").

7.13.1.4.8 INTERMEDIARY SEGMENT

7.13.1.4.8.1 Intermediary ID Count

Field	Field Name
B44-8G	Intermediary ID Count
B45-8H	Intermediary ID Type Code
B46-8J	Intermediary ID Type Entity
B47-8K	Intermediary ID Qualifier
B48-8M	Intermediary ID
B49-8N	Intermediary ID State/Province Address
B55-8U	Intermediary ID Country Code

From the above information, the field Intermediary ID Count (B44-8G) when supported will contain a maximum count of 5. The Count *will contain* a value between 1 to 5 when used and the fields Intermediary ID Type Code (B45-8H), Intermediary ID Type Entity (B46-8J), Intermediary ID Qualifier (B47-8K), Intermediary ID (B48-8M), Intermediary ID State/Province Address (B49-8N), and Intermediary Country Code (B55-8U), and

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section “Structure Quick Reference”.

7.13.1.4.9 PATIENT SEGMENT

7.13.1.4.9.1 Patient ID Count

Field	Field Name
618-RR	Patient ID Count
331-CX	Patient ID Qualifier
332-CY	Patient ID

From the above information, the field Patient ID Count (618-RR) when supported will contain a maximum count of 9. The Count *will contain* a value between 1 to 9 when used and the Patient ID Qualifier(331-CX) and Patient ID(332-CY) will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section “Structure Quick Reference”.

7.13.1.5 RESPONSE SEGMENTS

7.13.1.5.1 RESPONSE STATUS SEGMENT

7.13.1.5.1.1 Approved Message Code Count

The following denotes an accepted response.

From the above information, the field Approved Message Code Count (547-5F) when supported will contain a maximum count of 5. The Count *will contain* a value between 1 to 5 when used and the field Approved Message Code will repeat the number of times the Count specifies.

Field	Field Name
547-5F	Approved Message Code Count
548-6F	Approved Message Code

7.13.1.5.1.2 Reject Count

The following denotes a rejected response.

From the above information, the field Reject Count (510-FA) when supported will contain a maximum count of 5. The Count *will contain* a value between 1 to 5 when used and the fields Reject Code and Reject Field Occurrence Indicator will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section “Structure Quick Reference”.

Field	Field Name
510-FA	Reject Count
511-FB	Reject Code
546-4F	Reject Field Occurrence Indicator

Either the reject or approved fields will appear, but not both, based on the response. If the field rejected is not a repeating field, the “Reject Field Occurrence Indicator” must be eliminated.

7.13.1.5.1.3 Additional Message Information Count

The Additional Message Information loop may appear on an accepted or a rejected response.

From the above information, the field Additional Message Information Count (130-UF) when supported will contain a maximum count of 25. The Count *will contain* a value between 1 to 25 when used and the fields Additional Message Information Qualifier (132-UH), Additional Message Information (526-FQ), and Additional Message Information Continuity (131-UG) will repeat the number of times the Count specifies. Note, Additional Message Information Continuity (131-UG) will only occur for each count if the applicable situation stated is satisfied.

Field	Field Name
130-UF	Additional Message Information Count
132-UH	Additional Message Information Qualifier
526-FQ	Additional Message Information
131-UG	Additional Message Information Continuity

7.13.1.5.1.4 Help Desk Support Type Count

Field	Field Name
C72-BH	Help Desk Support Type Count
C71-BG	Help Desk Support Type
C67-BB	Help Desk Business Unit Type Count
C66-BA	Help Desk Business Unit Type
C70-BF	Help Desk Contact Information Qualifier
C68-BC	Help Desk Contact Information
C69-BD	Help Desk Contact Information Extension

The Help Desk Support loop must appear on all responses.

From the above information, the field Help Desk Support Type Count (C72-BH) will contain a maximum count of 5. The Help Desk Support Type Count *will contain* a value between 1 to 5 when used and the indented fields (Help Desk Support Type, Help Desk Business Unit Type Count) will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section “Structure Quick Reference”. The Help Desk Business Unit Type Count (C67-BB) will contain a value between 1 to 5 when used and the indented fields (Help Desk Business Unit Type, Help Desk Contact Information Qualifier, Help Desk Contact Information, Help Desk Contact Information Extension)

will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section “*Structure Quick Reference*”. The Help Desk Business Unit Type loop will repeat within an occurrence of the Help Desk Support Type loop.

7.13.1.5.2 RESPONSE CLAIM SEGMENT

7.13.1.5.2.1 Formulary Alternative Product Count

Field	Field Name
551-9F	Formulary Alternative Product Count
E89-ZO	Formulary Alternative Effective Date
D42-PV	Formulary Alternative Plan Benefit Tier
D43-PZ	Formulary Alternative Reason Code
D44-PO	Formulary Alternative Required Therapy Indicator Count
D45-P1	Formulary Alternative Required Therapy Indicator
D46-P2	Formulary Alternative Required Therapy Time Period Qualifier
D47-P3	Formulary Alternative Required Therapy Time Period Duration
D48-P4	Formulary Alternative Required Therapy Time Period Start Date
D49-P5	Formulary Alternative Required Therapy Time Period End Date
552-AP	Formulary Alternative ID Qualifier
553-AR	Formulary Alternative ID
554-AS	Formulary Alternative Incentive
555-AT	Formulary Alternative Estimated Patient Cost Share
556-AU	Formulary Alternative Description

NOTE: If the Formulary Alternative Product Count is sent, the Formulary Alternative ID Qualifier must precede each occurrence of the Formulary Alternative ID.

From the above information, the field Formulary Alternative Product Count (551-9F) when supported will contain a maximum count of 6. The Count *will contain* a value between 1 to 6 when used and the indented fields (Formulary Alternative ID Qualifier, Formulary Alternative ID, et cetera) will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section “*Structure Quick Reference*”.

From the above information, the field Formulary Alternative Required Therapy Indicator Count (D44-PO) when supported will contain a maximum count of 6. The Count *will contain* a value between 1 to 6 when used and the indented fields (Formulary Alternative Required Therapy Indicator, Formulary Alternative Required Therapy Time Period Qualifier, et cetera) will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section “*Structure Quick Reference*”.

7.13.1.5.2.2 Benefit Type Opportunity Count

Field	Field Name
C59-AF	Benefit Type Opportunity Count
C58-AE	Benefit Type Opportunity

From the above information, the field Benefit Type Opportunity Count (C59-AF) when supported will contain a maximum count of 9. The Count will contain a value between 1 to 9 when used and the indented field (Benefit Type Opportunity) will repeat the number of times the Count specifies, with the mandatory/situational/optional requirements as defined in the section “*Structure Quick Reference*”.

7.13.1.5.2.3 Plan Benefit Override Value Count

Field	Field Name
D55-RD	Plan Benefit Override Value Count
D56-RF	Plan Benefit Override Value

From the above information, the field Plan Benefit Override Value Count (D55-RD) when supported will contain a maximum count of 9. The Count will contain a value between 1 to 9 when used and the indented field (Plan Benefit Override Value) will repeat the number of times the Count specifies, with the mandatory/situational/optional requirements as defined in the section “*Structure Quick Reference*”.

7.13.1.5.3 RESPONSE INSURANCE SEGMENT

7.13.1.5.3.1 Payer/Health Plan ID Count

Field	Field Name
C96-KR	Payer/Health Plan ID Count
568-J7	Payer/Health Plan ID Qualifier
569-J8	Payer/Health Plan ID

From the above information, the field Payer/Health Plan ID Count (C96-KR) when supported will contain a maximum count of 3. The Count *will contain* a value between 1 to 3 when used and the fields Payer/Health Plan ID Qualifier and Payer/Health Plan ID will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section “*Structure Quick Reference*”.

7.13.1.5.4 RESPONSE PRICING SEGMENT

7.13.1.5.4.1 Other Amount Paid Repetitions Only

Field	Field Name
-------	------------

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

563-J2	Other Amount Paid Count
564-J3	Other Amount Paid Qualifier
565-J4	Other Amount Paid

From the above information, the field Other Amount Paid Count (563-J2) when supported will contain a maximum count of 3. The Count *will contain* a value between 1 to 3 when used and the fields Other Amount Paid Qualifier and Other Amount Paid will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section “Structure Quick Reference”.

7.13.1.5.4.2 Patient Pay Component Repetitions Only

Field	Field Name
C94-KP	Patient Pay Component Count
C95-KQ	Patient Pay Component Qualifier
C93-KN	Patient pay Component Amount

From the above information, the field Patient Pay Component Count (C94-KP) will contain a maximum count of 25. The Count *will contain* a value between 1 to 25 and the fields Patient Pay Component Qualifier and Patient Pay Component Amount will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section “Structure Quick Reference”.

7.13.1.5.4.3 Benefit Stage Repetitions Only

The payer has applied specific benefit stage(s) to the claim response. The specific Medicare Part D Benefit Stage Indicator value(s) associated to the claim are required when the plan is a participant in a Medicare Part D program. The chart representation would be as follows. In this scenario, the Benefit Stage Indicator Count repetitions would be present.

Field	Field Name
C50-9W	Benefit Stage Indicator Count
C51-9X	Benefit Stage Indicator

7.13.1.5.4.4 Regulatory Fee Count

Field	Field Name
D60-RK	Regulatory Fee Count
D61-RL	Regulatory Fee Type Code
D62-RM	Regulatory Fee Exempt Indicator
558-AW	Regulatory Fee Amount Paid

From the above information, the field Regulatory Fee Count (D60-RK) will contain a maximum count of 3. The Count *will contain* a value between 1 to 3 and the fields Regulatory Fee Type Code, Regulatory Fee Exempt Indicator and Regulatory Fee Amount Paid will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section “Structure Quick Reference”.

7.13.1.5.5 RESPONSE DUR/PPS SEGMENT

7.13.1.5.5.1 DUR/PPS Response Code Counter

Field	Field Name
567-J6	DUR/PPS Response Code Counter
439-E4	Reason for Service Code
528-FS	Clinical Significance Code
475-J9	DUR/DUE Co-Agent ID Qualifier
476-H6	DUR/DUE Co-Agent ID
E93-ZC	DUR/DUE Co-Agent Description
529-FT	Other Pharmacy Indicator
E95-Z9	Other Pharmacy ID Qualifier
E96-Z8	Other Pharmacy ID
E97-Z7	Other Pharmacy Name
E98-Z6	Other Pharmacy Telephone
530-FU	Previous Date of Service
531-FV	Quantity of Previous Dispensing
E94-ZA	Unit of Measure for Previous Dispensed Quantity
532-FW	Database Indicator
533-FX	Other Prescriber Indicator
F01-Z4	Other Prescriber ID Qualifier
F02-Z3	Other Prescriber ID
E99-Z5	Other Prescriber Last Name
F03-Z2	Other Prescriber Telephone Number
F05-Z0	DUR/DUE Compound Product ID Qualifier
F04-Z1	DUR/DUE Compound Product ID
F06-YO	DUR/DUE Maximum Daily Dose Quantity
F07-YL	DUR/DUE Maximum Daily Dose Unit of Measure
F08-YJ	DUR/DUE Minimum Daily Dose Quantity

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

F09-YI	DUR/DUE Minimum Daily Dose Unit of Measure
544-FY	DUR/DUE Free Text Message

From the above information, the field DUR/PPS Response Code Counter (567-J6) when supported *will repeat* a maximum of 9 occurrences. The counter field indicates which loop of the repetition, in sequential order. For each repetition of the DUR/PPS Response Code Counter (1, 2, 3, etc.), the fields Reason for Service Code, Clinical Significance Code, et cetera will occur, with mandatory/situational/optional requirements as defined in the section “*Structure Quick Reference*”.

7.13.1.5.6 RESPONSE OTHER PAYERS SEGMENT

7.13.1.5.6.1 Other Payer ID Count

Field	Field Name
355-NT	Other Payer ID Count
338-5C	Other Payer Coverage Type
D41-PQ	Other Payer Relationship Type
D50-P6	Other Payer Benefit Classification
C47-9T	Other Payer Adjudicated Program Type
339-6C	Other Payer ID Qualifier
340-7C	Other Payer ID
991-MH	Other Payer Processor Control Number
356-NU	Other Payer Cardholder ID
992-MJ	Other Payer Group ID
142-UV	Other Payer Person Code
127-UB	Other Payer Help Desk Telephone Number
B23-7Q	Other Payer Help Desk Telephone Number Extension
143-UW	Other Payer Patient Relationship Code
144-UX	Other Payer Benefit Effective Date
145-UY	Other Payer Benefit Termination Date
D23-M5	Other Payer Name

NOTE: If the Other Payer ID Count and the Other Payer Coverage Type (338-5C) are sent, the Other Payer ID Qualifier must precede each occurrence of the Other Payer ID.

From the above information, the field Other Payer ID Count (355-NT) when supported will contain a maximum count of 4 for claim, service and prior authorization response transactions and a maximum count of 9 for eligibility response transactions. The Other Payer Coverage Type, Other Payer Relationship Type, Other Payer Benefit Classification, Other Payer Adjudicated Program Type, Other Payer ID Qualifier, Other Payer ID, and the Other Payer fields associated to the Count will repeat the number of times the Count specifies. Other Payer ID Qualifier and Other Payer ID will occur, but Other Payer Processor Control Number, Other Payer Cardholder ID, and the rest of the Other Payer fields will only occur if supported.

7.13.1.5.7 RESPONSE OTHER RELATED BENEFIT DETAIL SEGMENT

7.13.1.5.7.1 Other Benefit Count

Field	Field Name
D26-M8	Other Benefit Count
D40-PN	Other Benefit Type Code
D34-MZ	Other Benefit Effective Date
D39-NN	Other Benefit Termination Date
729-TA	State/Province Address
D38-N9	Other Benefit Type ID
D35-N1	Other Benefit Facility Name
D36-N7	Other Benefit Facility Telephone Number
D37-N8	Other Benefit Detail Information Count
D32-MS	Other Benefit Detail Information Indicator
D28-MM	Other Benefit Detail Information Effective Date
D33-MX	Other Benefit Detail Information Termination Date
D31-MR	Other Benefit Detail Information Provider Number
D29-MN	Other Benefit Detail Information Facility Name
D30-MP	Other Benefit Detail Information Facility Telephone Number

From the above information, the field Other Benefit Count (D26-M8) when supported will contain a maximum count of 9. The Count *will contain* a value between 1 to 9 when used and the indented fields (Other Benefit Type Code, Other Benefit Effective Date, et cetera) will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section “*Structure Quick Reference*”.

From the above information, the field Other Benefit Detail Information Count (D37-N8) when supported will contain a maximum count of 9. The Count *will contain* a value between 1 to 9 when used and the indented fields (Other Benefit Detail Information Indicator, Other Benefit Detail Information Effective Date, et cetera) will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section “*Structure Quick Reference*”.

7.13.1.5.8 RESPONSE INTERMEDIARY SEGMENT

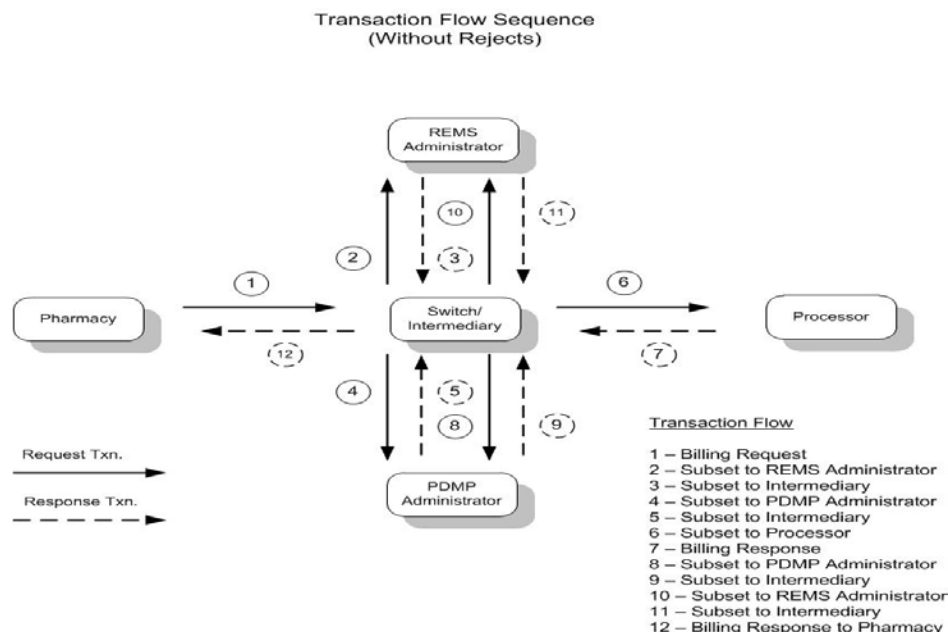

The Response Intermediary Segment is used to report the outcome of intermediary functions. These functions include Risk Evaluation and Mitigation Strategy (REMS), Prescription Drug Monitoring Programs (PDMP) and intermediary pre and post processor editing.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

The flow of a billing function transaction which includes intermediary processing would be as follows:

- Pharmacy
- Switch/Intermediary
- REMS Administrator
- PDMP Administrator
- Intermediary Pre- Processor Edit
- Third Party Processor
- Switch/Intermediary
- Intermediary Post-Processor Edit
- PDMP Administrator
- REMS Administrator
- Pharmacy

The rules for Switch/Intermediaries who are accepting billing function transactions that require some type of intermediary action are as follows:

- If REMS Product & Pre & Post Edit Processing:
 - o Pharmacy
 - Submits a billing function transaction that may or may not contain an Intermediary Segment
 - o Switch/Intermediary
 - Receives the billing function transaction
 - Delivers the billing function request transaction to the REMS Administrator
 - o REMS Administrator
 - Receives the request transaction
 - Determines if there are any pharmacy actions
 - Accept
 - Reject
 - Communicates determination to the Switch/Intermediary
 - o Switch/Intermediary
 - Receives the transaction
 - Interprets REMS Administrator response
 - If REMS Administrator rejects the request, the Switch/Intermediary delivers a reject to pharmacy using the Response Intermediary Segment to relay any additional messaging
 - If REMS Administrator accepts the request, the Switch/Intermediary performs pre edit processing
 - Performs Pre Edit Processing
 - If pre-edits fail, the Switch/Intermediary delivers a reject to the pharmacy using the Response Intermediary Segment to relay any additional messaging to the pharmacy.
 - If pre-edits pass, the Switch/Intermediary delivers the submitted billing function transaction to the Third Party Processor
 - o Third Party Processor
 - Receives the request transaction
 - Processes the request transaction
 - Delivers the billing request response to the Switch/Intermediary

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

- o Switch/Intermediary
 - Receives the response transaction
 - Delivers the billing function response transaction to the REMS Administrator
 - o REMS Administrator
 - Receives the billing function response transaction
 - Interprets the Third Party Processor Response
 - Delivers the billing function response transaction to the Switch/Intermediary
 - o Switch/Intermediary
 - Receives the billing function response transaction
 - Interprets the response transaction
 - Performs Post Edit Processing and determines if any messages should be delivered to the pharmacy
 - If "messages", inserts the Response Intermediary Segment with message
 - If "no message", does not insert the Response Intermediary Segment
 - Delivers the billing function response transaction to the Pharmacy
 - o Pharmacy
 - Receives the billing function response transaction
- If PDMP Product & Pre & Post Edit Processing:
 - o Pharmacy
 - Submits a billing function transaction that may or may not contain an Intermediary Segment
 - o Switch/Intermediary
 - Receives the billing function transaction
 - Delivers the billing function request transaction to the PDMP Administrator
 - o PDMP Administrator
 - Receives the request transaction
 - Determines if there are any pharmacy actions
 - Accept
 - Reject
 - Communicates determination to the Switch/Intermediary
 - o Switch/Intermediary
 - Receives the transaction
 - Interprets PDMP Administrator response
 - If PDMP Administrator rejects the request, the Switch/Intermediary delivers a reject to pharmacy using the Response Intermediary Segment to relay any additional messaging
 - If PDMP Administrator accepts the request, the Switch/Intermediary performs pre edit processing
 - Performs Pre Edit Processing
 - If pre-edits fail, the Switch/Intermediary delivers a reject to the pharmacy using the Response Intermediary Segment to relay any additional messaging to the pharmacy.
 - If pre-edits pass, the Switch/Intermediary delivers the submitted billing function transaction to the Third Party Processor
 - o Third Party Processor
 - Receives the request transaction
 - Processes the request transaction
 - Delivers the billing request response to the Switch/Intermediary
 - o Switch/Intermediary
 - Receives the response transaction
 - Delivers the billing function response transaction to the PDMP Administrator
 - o PDMP Administrator
 - Receives the billing function response transaction
 - Interprets the Third Party Processor Response
 - Delivers the billing function response transaction to the Switch/Intermediary
 - o Switch/Intermediary
 - Receives the billing function response transaction
 - Interprets the response transaction
 - Performs Post Edit Processing and determines if any content should be delivered to the pharmacy
 - If "content", inserts the Response Intermediary Segment with message
 - If "no content", does not insert the Response Intermediary Segment
 - Delivers the billing function response transaction to the Pharmacy
 - o Pharmacy
 - Receives the billing function response transaction
- If REMS Product, PDMP Product & Pre & Post Edit Processing:
 - o Pharmacy
 - Submits a billing function transaction that may or may not contain an Intermediary Segment
 - o Switch/Intermediary
 - Receives the billing function request transaction
 - Delivers the billing function request transaction to the REMS Administrator
 - o REMS Administrator
 - Receives the transaction
 - Determines if there are any pharmacy actions

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

- Accept
 - Reject
- Communicates determination to the Switch/Intermediary
- o Switch/Intermediary
 - Receives the request transaction
 - Interprets REMS Administrator response
 - If REMS Administrator rejects the request, the Switch/Intermediary delivers a reject to pharmacy using the Response Intermediary Segment to relay any additional messaging
 - If REMS Administrator accepts the request, the Switch/Intermediary delivers the continue with Intermediary pre-processor edit
 - Delivers the billing function request transaction to the PDMP Administrator
- o PDMP Administrator
 - Receives the transaction
 - Determines if there are any pharmacy actions
 - Accept
 - Reject
 - Communicates determination to the Switch/Intermediary
- o Switch/Intermediary
 - Receives the transaction
 - Interprets the PDMP Administrator response
 - If PDMP Administrator rejects the request, the Switch/Intermediary delivers a reject to pharmacy using the Response Intermediary Segment to relay any additional messaging
 - If PDMP Administrator accepts the request, the Switch/Intermediary performs pre edit processing
 - Performs Pre Edit Processing
 - If pre-edits fail, the Switch/Intermediary delivers a reject to the pharmacy using the Response Intermediary Segment to relay any additional messaging to the pharmacy.
 - If pre-edits pass, the Switch/Intermediary delivers the submitted billing function transaction to the Third Party Processor
- o Third Party Processor
 - Receives the request transaction
 - Processes the request transaction
 - Delivers the billing request response to the Switch/Intermediary
- o Switch/Intermediary
 - Receives the response transaction
 - Delivers a transaction to the REMS Administrator
- o PDMP Administrator
 - Receives the transaction
 - Interprets the Third Party Processor Response
 - Delivers a transaction to the Switch/Intermediary
- o Switch/Intermediary
 - Receives the response transaction
 - Delivers a transaction to the REMS Administrator
- o REMS Administrator
 - Receives the transaction
 - Interprets the Third Party Processor Response
 - Delivers a transaction to the Switch/Intermediary
- o Switch/Intermediary
 - Receives the transaction
 - Performs Post Edit Processing and determines if any messages should be delivered to the pharmacy
 - If "messages", inserts the Response Intermediary Segment with message
 - If "no message", does not insert the Response Intermediary Segment
 - Delivers the billing function response transaction to the Pharmacy
- o Pharmacy
 - Receives the billing function response transaction
 - Pass billing function transaction to pharmacy

Any rejection in the flow would cause all steps in the flow to start again. REMS and PDMP Administrators should look at the billing function transaction as a new transaction and not report duplications.

7.13.1.5.8.1 Response Intermediary Authorization Count

The Response Intermediary Segment loop may appear on an accepted or a rejected response.

From the below information, the field Response Intermediary Authorization Count (B52-8R) when supported will contain a maximum count of 9. The Count *will contain* a value between 1 to 9 when used and the fields Response Intermediary Authorization Type ID (B53-8S), Response Intermediary Authorization ID (B54-8T), and Intermediary Message (B51-8Q) will repeat the number of times the Count specifies.

Field	Field Name
B52-8R	Response Intermediary Authorization Count
B53-8S	Response Intermediary Authorization Type ID

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

B54-8T	Response Intermediary Authorization ID
B51-8Q	Intermediary Message

7.13.1.5.8.2 **Intermediary Help Desk Support Type Count**

Field	Field Name
C86-KC	Intermediary Help Desk Support Type Count
C85-KB	Intermediary Help Desk Support Type
C81-G9	Intermediary Help Desk Business Unit Type Count
C80-G8	Intermediary Help Desk Business Unit Type
C84-KA	Intermediary Help Desk Contact Information Qualifier
C82-JP	Intermediary Help Desk Contact Information
C83-JR	Intermediary Help Desk Contact Information Extension

The Intermediary Help Desk Support loop must appear on all responses that use the Response Intermediary segment. From the above information, the field Intermediary Help Desk Support Type Count (C86-KC) will contain a maximum count of 5. The Intermediary Help Desk Support Type Count *will contain* a value between 1 to 5 when used and the indented fields (Intermediary Help Desk Support Type, Intermediary Help Desk Business Unit Type Count) will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section “*Structure Quick Reference*”. The Intermediary Help Desk Business Unit Type Count (C81-G9) will contain a value between 1 to 5 when used and the indented fields (Intermediary Help Desk Business Unit Type, Intermediary Help Desk Contact Information Qualifier, Intermediary Help Desk Contact Information, Intermediary Help Desk Contact Information Extension) will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section “*Structure Quick Reference*”. The Intermediary Help Desk Business Unit Type loop will repeat within an occurrence of the Intermediary Help Desk Support Type loop.

7.13.1.5.9 **RESPONSE PATIENT SEGMENT**7.13.1.5.9.1 **Patient ID Count**

Field	Field Name
618-RR	Patient ID Count
331-CX	Patient ID Qualifier
332-CY	Patient ID

From the above information, the field Patient ID Count (618-RR) when supported will contain a maximum count of 9. The Count *will contain* a value between 1 to 9 when used and the Patient ID Qualifier(331-CX) and Patient ID(332-CY) will repeat the number of times the Count specifies, with mandatory/situational/optional requirements as defined in the section “*Structure Quick Reference*”.

7.13.2 **REJECT FIELD OCCURRENCE INDICATOR**

When an error condition arises on fields that are repeatable, the Reject Field Occurrence Indicator (546-4F) is used to denote which occurrence of the field or set in question has been rejected. See section “*Structure Quick Reference*” for a list of the repeating fields or sets.

When a repeating field or set is in error, a Reject Code (511-FB) must denote the missing/invalid field or set, and the Reject Field Occurrence Indicator (546-4F) denote which occurrence is in error. For example, if an occurrence of the Reason For Service Code (439-E4) is in error, one Reject Code (511-FB) is “E4” to denote “Missing/Invalid Reason For Service Code”, and the Reject Field Occurrence Indicator (546-4F) must specify which iteration is in error (for example, “1” or “2”). By denoting the missing/invalid field in error, and which occurrence, the transaction may be interrogated to determine which field is in error. A partial view of the Response Status Segment follows:

Field #	ID	Field Name	Value	Comment
111	AM	Segment Identification	21	
112	AN	Transaction Response Status	R	
510	FA	Reject Count	1	One occurrence
511	FB	Reject Code	E4	M/I Reason for Service Code
546	4F	Reject Field Occurrence Indicator	1	First iteration of Reason for Service Code is in error

Another example is a high dosage alert for an ingredient within a compound. A Reject Code (511-FB) should denote a Missing/Invalid Product/Service ID. The Reject Field Occurrence Indicator (546-4F) must denote which ingredient is in error within the compound occurrences. Other Reject Codes are included which further explain the error condition, and in this instance, the Response DUR/PPS Segment may denote additional pertinent information. An example follows:

Field #	ID	Field Name	Value	Comment
111	AM	Segment Identification	21	
112	AN	Transaction Response Status	R	
510	FA	Reject Count	2	Two occurrences
511	FB	Reject Code	88	DUR Reject Error
511	FB	Reject Code	21	M/I Product /Service ID
546	4F	Reject Field Occurrence Indicator	3	Third iteration (ingredient) of Compound Product ID

The Reject Field Occurrence Indicator (546-4F) must directly follow the Reject Code (511-FB) when signifying a repeating field or set is in error. The Reject Code must denote the repeating field that is in error

Note, the Reject Field Occurrence Indicator is a situational or optional field, and therefore, if the Reject Code is not denoting a repeating field, the Reject Field Occurrence Indicator must not be sent. It must only be sent when relaying error information about a repeating field.

7.13.2.1 REJECT FIELD OCCURRENCE INDICATOR USE FOR MULTI INGREDIENT COMPOUND TRANSACTION

When an error condition arises on fields, which are repeatable, the Reject Field Occurrence Indicator (546-4F) is used to denote which occurrence of the field or set in question has been rejected.

When returning a rejected response for a Multi-Ingredient Compound Segment submission and when a repeating field is in error, Reject Code (511-FB) is populated with the a reject code that provides the clearest reason for the reject and the Reject Field Occurrence Indicator (546-4F) denotes which occurrence is in error.

The second occurrence of Compound Product ID (489-TE) is in error for Product Not Covered. Reject Code (511-FB) will be populated with the most appropriate reject code to denote "Product/Service Not Covered – Plan/Benefit Exclusion" (Reject "70"). The Reject Field Occurrence Indicator (546-4F) will specify which iteration is in error (for example,"2"). By returning the reject code and the reject field occurrence indicator, the transaction response may be interrogated. A partial view of the Response Status Segment follows:

Field #	ID	Field Name	Value	Comment
111	AM	Segment Identification	21	Response Status Segment
112	AN	Transaction Response Status	R	Rejected
510	FA	Reject Count	1	One occurrence
511	FB	Reject Code	70	Product/Service Not Covered – Plan/Benefit Exclusion
546	4F	Reject Field Occurrence Indicator	2	Second iteration of Compound Product ID is not covered

Another example is a drug-to-drug interaction rejection for an ingredient within a compound. Reject Code (511-FB) should denote an "88" if the transaction is rejected. The Reject Field Occurrence Indicator (546-4F) must denote which ingredient is in error within the compound occurrences. Other Reject Codes can be included which further explain the error condition, and in this instance, the Response DUR/PPS Segment may denote additional pertinent information. An example follows:

Field #	ID	Field Name	Value	Comment
111	AM	Segment Identification	21	Response Status Segment
112	AN	Transaction Response Status	R	Rejected
510	FA	Reject Count	1	One occurrence
511	FB	Reject Code	88	DUR Reject Error
546	4F	Reject Field Occurrence Indicator	1	First iteration (ingredient) of Compound Product ID

Field #	ID	Field Name	Value	Comment
111	AM	Segment Identification	24	Response DUR/PPS Segment
567	J6	DUR/PPS Response Code Counter	1	One occurrence
439	E4	Reason for Service Code	DD	Drug-Drug Interaction
528	FS	Clinical Significance Code	1	Major
529	FT	Other Pharmacy Indicator	1	Your Pharmacy
530	FU	Previous Date of Service	20080102	CCYYMMDD
531	FV	Quantity of Previous Dispensing	30	
532	FW	Database Indicator	2	Medi-Span Product Line
533	FX	Other Prescriber Indicator	1	Same Prescriber
F05	Z0	DUR/DUE Compound Product ID Qualifier	03	NDC
F04	Z1	DUR/DUE Compound Product ID	65162062701	Tramadol
544	FY	DUR/DUE Free Text Message	ING01: WARFARIN TAB 1 MG	The first ingredient in this compound interacts with Warfarin.

The Reject Field Occurrence Indicator (546-4F) must directly follow the Reject Code (511-FB) when signifying a repeating field or set is in error. The Reject Code must denote the repeating field that is in error.

Note, the Reject Field Occurrence Indicator is a situational or optional field, and therefore, if the Reject Code is not denoting a repeating field, the Reject Field Occurrence Indicator must not be sent. It must only be sent when relaying error information about a repeating field.

8 TERMINOLOGY USED THROUGHOUT

Standard –

In this document “standard” as in “Standard Rejected Response” is meant as a generic transaction response that does not need to be differentiated as emanating from a Receiver.

Grouped –

Defined in the Situational column of the charts, as in “Grouped with Other Payer ID Qualifier, Other Payer ID, Other Payer Date, Other Payer Adjudicated Program Type, Other Payer Reconciliation ID and either Other Payer Amount Paid Count and its grouping, or Other Payer Reject Count and its grouping.” Grouped refers to a natural occurrence of fields that together form valuable information. The Group does not mean that all fields must be present. Refer to each field for instructions.

Required if –

Used in the Situation column and Notes sections, “Required if” designates the field is to be used if the requirement is satisfied. For example, “Required if Patient ID (332-CY) is used” means that if the Patient ID (332-CY) field contains a value, the Patient ID Qualifier (331-CX) must also contain a valid value.

Not required if –

Used in the Situation column and Notes sections, “Not required if” designates the field is not to be used if the requirement is satisfied. For example, “Not required if Prescription/Service Reference Number Qualifier (455-EM) = “1” (Rx Billing)” means that the Procedure Modifier Code Count is not to be used if Prescription/Service Reference Number Qualifier = “1”. However in other situations, the Procedure Modifier Code Count may be used.

Not used –

Used in the Situation column and Notes sections, “Not used if/for” designates the field is not available for usage in this transaction. For example, “Not used for a Transaction Code = “E1” (Eligibility Verification)” for field Approved Message Code Count means the Approved Message Code Count field is not to be used in an Eligibility Verification transaction.

Optional –

Used when no situations are defined but the field is to be used. The use of the field is left to trading partner agreement.

Sender and Receiver –

For this situational usage charts, the following definitions are used for these entities, depending on the role they are taking at a given moment in time.

Sender – initiates the request

Receiver – receives the request

Sender – initiates the response

Receiver – receives the response

For example, when a pharmacy submits an Eligibility Verification request to the health plan, the pharmacy is the sender; the health plan is the receiver.

When the health plan returns a response to the pharmacy, the health plan is the sender; the pharmacy is the receiver.

Commercial Health Plan –

In this document Commercial Health Plan is meant as a non-Medicaid agency that is processing pharmacy transactions.

Health Plan –

When used by itself, “Health Plan” means either Commercial or Medicaid Health Plan, as when used in “Standard Rejected Response from a Health Plan to a Pharmacy”. The response in this scenario is not different enough when emanating from a Medicaid or a Commercial Health Plan to warrant a separate scenario.

Claim – Throughout the situational fields if the terminology “Claim” or “Claim Billing” is used, this means if the Transaction Code (103-A3) = “B1” or “B3” and the Prescription/Service Reference Number Qualifier (455-EM) = “1” (Rx Billing). For example, “Claim Billing/Claim Rebill/Encounter:” Or the Transaction Code (103-A3) is specific to a transaction, but the Prescription/Service Reference Number Qualifier (455-EM) = “1” (Rx Billing) – for example “Prior Authorization Inquiry (Claim):”

Service – Throughout the situational fields, if the terminology “Service” or “Service Billing” is used, this means if the Transaction Code (103-A3) = “S1” or “S3” and the Prescription/Service Reference Number Qualifier (455-EM) = “2” (Service Billing). For example “Service Billing/Service Rebill”. Or the Transaction Code (103-A3) is specific to a transaction, but the Prescription/Service Reference Number Qualifier (455-EM) = “1” (Rx Billing) – for example “Prior Authorization Inquiry (Service):”

In cases where the Claim or Service situations are the same, the terminology does not specify a function. For example, “Prior Authorization Inquiry:” or “Prior Authorization Reversal:” is synonymous with “Prior Authorization Inquiry (Claim/Service)” or “Prior Authorization Reversal (Claim/Service)”. This means that for a claim or service, the situation applies.

8.1 TABLE DESIGNATION – LEGEND

Designation	Value	Explanation
MANDATORY	M	The Segment is mandatory for the Transaction or The Field is mandatory for the Segment for the Transaction. Mandatory elements have structural requirements.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

- 52 -

Designation	Value	Explanation
SITUATIONAL		The Segment has been further designated for usage for the Transaction or The Field has been further designated for usage for the Transaction.
Required	R	The Field has been designated with the situation of "Required" for the Segment for the Transaction.
Required for Subrogation only	RM	The Field has been designated with the situation of "Required" for the Segment for the Transaction for Subrogation usage only.
Qualified Requirement	Q	The situations designated have qualifications for usage ("Required if x", "Not required if y").
Qualified Requirement for Subrogation only	QM	The situations designated have qualifications for usage ("Required if x", "Not required if y") for Subrogation.
INFORMATIONAL ONLY	I	The field is not designated as mandatory, required, or situational but communicates information that should be included when applicable.
OPTIONAL	O	The Field has been designated as optional usage (situations were not intentionally defined).
NOT USED	N	The Segment is not used for the Transaction or The Field is not used for the Segment for the Transaction. Not used are shaded for clarity.
Repeating	***R***	The three asterisks, "R", and three asterisks designates a field is repeating. Example "Q***R***" means a situationally qualified field that repeats. Example "N***R***" means a not used field that repeats when used.

8.2 TABLE DESIGNATION

Throughout the document, font color is used to designate a field that is not used in the specific transaction.

Reject Count (510-FA) and Reject Code (511-FB) are not used in this specific example and are therefore shown in gray. The gray designation is only used when a field is **not used in the specific transaction**. Note the example below.

Field	Field Name	Mandatory or Situational	Situation
503-F3	AUTHORIZATION NUMBER	Q	Claim Billing/Encounter: Required if needed to identify the transaction.
510-FA	REJECT COUNT	N	Claim Billing/Encounter: Not used.
511-FB	REJECT CODE	N***R***	Claim Billing/Encounter: Not used.

Note also that Reject Code (511-FB) is a repeating field (***R***) but in this transaction, the field is not used (N***R***).

When a field is not used for a particular situation, such as below, the gray designation is not used. For example below, even though the Prior Authorization Inquiry (Service) situation is "Not used", the field is not gray because other situations apply to this field (for the Claim). Note in this example, the Claim and Service have different situations, so the "Mandatory or Situational" column shows both designations (Q and N).

Field	Field Name	Mandatory or Situational	Situation
506-F6	INGREDIENT COST PAID	Q N	Prior Authorization Inquiry (Claim): Required if this value is used to arrive at the final reimbursement. Service: Not used.
507-F7	DISPENSING FEE PAID	Q N	Prior Authorization Inquiry (Claim): Required if this value is used to arrive at the final reimbursement. Service: Not used.

8.3 TRANSMISSION DISCUSSION

In each Transmission defined, there is general overview information, followed by the Segment Usage in table form.

Next follows the actual Segments, denoted as Mandatory or Situational, and each field within the Segment. Each field is designated as to its use.

Each section lists each segment, with all fields included in this segment. In some cases, fields within that segment are not used for the particular transaction or scenario. All fields are shown to illustrate that each field was reviewed with recommendations, whereas the absence of a field might lead a reader to wonder if the field was left off intentionally.

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

Note, if the sender chooses to send in more fields than are required or situational by the receiver, but which the sender needs for their business, the receiver is to ignore these fields or segments.

After each Segment is a “Notes” section, that further explains any rules, situations, or notes on this Segment.

The Transaction Header Segment and the Response Header Segment are mandatory, fixed length segments. In the segment usage charts for the Transaction Header Segment and the Response Header Segment, the column denoted “Situation” is not applicable.

9 ELIGIBILITY VERIFICATION INFORMATION

9.1 ELIGIBILITY VERIFICATION

This transaction is used by the Originator to request that the Administrator, Processor, or Reporting Entity verify the eligibility of a specific patient according to appropriate plan parameters. This transaction is used to request verification of a patient's or cardholder's status for a given benefit program.

The Transaction Code is "E1".

The Processor responds with either of the following:

Approved Response – The patient is eligible for service.

Rejected Response – The patient is not eligible for service, or the transaction is in error.

If a duplicate transmission occurs, the returned response must be the same as the original transmission response. See section "Transaction Response Status", "Duplicate Transactions".

9.1.1 MEDICARE PART D ELIGIBILITY

For Medicare Part D the Eligibility transaction (E1) is used to determine patient eligibility. If a patient enrolled in Medicare Part D does not present a Medicare Part D ID card to the pharmacy provider or the pharmacy provider wants to verify coverage, this transaction can be used to determine which plan(s) to bill and if known, in what order. The Facilitator provides this information on the E1 response to the pharmacy provider.

This Eligibility enrollment response will be different than a normal Eligibility response from a Processor. In the normal Eligibility Response, the Processor supplies Eligibility information specific to coverage provided under that Plan. In the Medicare Part D Eligibility Response, the Facilitator supplies Eligibility Enrollment information for Medicare Part D coverage and Other Health Insurance coverage via the Eligibility request by the Pharmacy Provider. CMS provides to the Facilitator eligibility enrollment data, which includes plans in which the Patient is enrolled.

9.1.1.1 BUSINESS RULES FOR MEDICARE PART D ELIGIBILITY TRANSACTIONS BETWEEN THE PHARMACY AND THE FACILITATOR

9.1.1.1.1 DATE OF SERVICE

Eligibility Verification is always based on Date of Service.

- Consult the Transaction Facilitator website (<http://medifacd.relayhealth.com/e1>) for the allowable date range and the current search parameters.
- The response will be based on Date of Service for Part D coverage.
- The most current information as of the date of request for that date of service will be returned.
- If the date of service requested exceeds the available search data for the Facilitator, a rejected response will be returned with Reject Code of "VD" (Eligibility Search Time Frame Exceeded).
- Future Coverage from the Date of Service will only be provided if current coverage exists. The effective date of future dated coverage will be returned in Next Medicare Part D Effective Date (140-UF) and when available the termination date will be returned in the Next Medicare Part D Termination Date (141-UT) in the Response Insurance Additional Information Segment.

9.1.1.1.2 OTHER HEALTH INSURANCE INFORMATION

Other Health Insurance (OHI) other than Part D will be sent if the following criteria are met:

- There is Medicare Part D coverage as of date of service and
- The other coverage is in effect as of date of service.
- If more than one payer exists, the Other Payer Coverage Type (338-5C) in the Response Other Payers Segment and the Medicare Part D Coverage Code (139-UR) in the Response Insurance Additional Information Segment reflect the payer order determined by CMS.

9.2 ELIGIBILITY VERIFICATION REQUEST DIAGRAMS

Notes on Patient Segment on an Eligibility Verification Request:

The Patient Segment is situational for an Eligibility Verification request. It is used when a receiver needs some of the patient demographic information to perform eligibility determination. The Patient Segment must be submitted when needed to differentiate between the patient and the cardholder. If the cardholder and the patient are the same, then the Patient Segment is not submitted unless additional information about the patient is needed to clarify the eligibility inquiry.

9.3.4 PHARMACY PROVIDER SEGMENT (ELIGIBILITY VERIFICATION)

PHARMACY PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation

D57-RG	PRESCRIBER PLACE OF SERVICE	N	Eligibility Verification: Not used.
E12-0F	PRESCRIBER MIDDLE NAME	N	Eligibility Verification: Not used.

Notes on Prescriber Segment on an Eligibility Verification:

The Prescriber Segment is situational for an Eligibility Verification request. It is used when prescriber information is needed to perform eligibility determination. The Segment is mandatory if required under provider payer contract or mandatory on eligibility verification where this information is necessary for eligibility determination.

When checking eligibility for a recipient under various restricted programs, the ordering provider (Prescriber ID (411-DB)) and referring provider (Primary Care Provider ID (421-DL)) may be validated by the recipient eligibility check to verify that the recipient is eligible for services.

9.3.6 ADDITIONAL DOCUMENTATION SEGMENT (ELIGIBILITY VERIFICATION)

ADDITIONAL DOCUMENTATION SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation

ADDITIONAL DOCUMENTATION SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Required if needed to provide response to narratives.
378-4B	QUESTION NUMBER/LETTER	Q***R***	Eligibility Verification: Required if necessary for state/federal/regulatory agency programs to respond to questions included on a Medicare form. Required if Question Number/Letter Count (377-2Z) is greater than 0.
379-4D	QUESTION PERCENT RESPONSE	Q***R***	Eligibility Verification: Required if necessary for state/federal/regulatory agency programs to respond to questions included on a Medicare form that requires a percent as the response. (At least one response is required per question.)
380-4G	QUESTION DATE RESPONSE	Q***R***	Eligibility Verification: Required if necessary for state/federal/regulatory agency programs to respond to questions included on a Medicare form that requires a date as the response. (At least one response is required per question.)
381-4H	QUESTION DOLLAR AMOUNT RESPONSE	Q***R***	Eligibility Verification: Required if necessary for state/federal/regulatory agency programs to respond to questions included on a Medicare form that requires a dollar amount as the response. (At least one response is required per question.)
382-4J	QUESTION NUMERIC RESPONSE	Q***R***	Eligibility Verification: Required if necessary for State/federal/regulatory agency programs to respond to questions included on a Medicare form that requires a numeric as the response. (At least one response is required per question.)
383-4K	QUESTION ALPHANUMERIC RESPONSE	Q***R***	Eligibility Verification: Required if necessary for state/federal/regulatory agency programs to respond to questions included on a Medicare form that requires an alphanumeric as the response. (At least one response is required per question.)

Notes on Additional Documentation Segment on a Eligibility Verification Request:

The Additional Documentation Segment is situational for Eligibility Verification request. It is used to provide additional information on Medicare forms.

9.3.7 LAST KNOWN 4Rx SEGMENT (ELIGIBILITY VERIFICATION)

LAST KNOWN 4Rx SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
B56-3E	LAST KNOWN IIN NUMBER	M	
B57-3F	LAST KNOWN PROCESSOR CONTROL NUMBER	M	
B58-3G	LAST KNOWN GROUP ID	Q	Eligibility Verification: Required if needed for receiver inquiry validation and/or determination. Required if necessary for state/federal/regulatory agency programs.
B59-3H	LAST KNOWN CARDHOLDER ID	M	
B60-3J	YEAR OF LAST PAID CLAIM	M	
B61-3K	MONTH OF LAST PAID CLAIM	M	

Notes on Last Known 4Rx Segment on a Eligibility Verification Request:

The Last Known 4Rx Segment is situational for Eligibility Verification request. It is sent by the pharmacy with last known claim information which is then used to locate the member/beneficiary. The use of this segment is for Transaction Facilitator Eligibility Verification only.

9.4 ELIGIBILITY VERIFICATION RESPONSE DIAGRAMS AND SEGMENTS**9.4.1 TRANSMISSION ACCEPTED/TRANSACTION APPROVED**

9.4.1.1 DIAGRAM FOR TRANSMISSION OF ELIGIBILITY VERIFICATION RESPONSE (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

Eligibility Verification transmission response

Header Response Status (501-F1) of "A" (Accepted) and

Transaction Response Status (112-AN) of "A" (Approved)

A value of "A" (Accepted) in the Header Response Status (501-F1) indicates that the **transmission** was accepted. A value of "A" (Approved) in the Transaction Response Status (112-AN) indicates the **transaction** was approved.

A value of "A" in the Transaction Response Status (112-AN) indicates the Patient is eligible.

Since there is no 'duplicate' response code to an Eligibility request, if a duplicate eligibility transaction is encountered, the processor must return the original approved response.

			pointer for the Other Payer Coverage Type (338-5C) in one of the response loops which designates the Medicare Part D coverage.
240-U1	CONTRACT NUMBER	Q	Eligibility Verification: Required if needed to identify the contract of the covered member. Used only in Eligibility Transaction.
926-FF	FORMULARY ID	Q	Eligibility Verification: Required if known to identify the formulary of the covered member. Used only in Eligibility Transaction.
757-U6	BENEFIT ID	Q	Eligibility Verification: Required when known for Part D to identify the PBP (Plan Benefit Package) Number. Used only in Eligibility Transaction.
140-US	NEXT MEDICARE PART D EFFECTIVE DATE	Q	Eligibility Verification: Required when future Medicare Part D coverage is known which is after the Date of Service submitted. Used only in Eligibility Transaction.
141-UT	NEXT MEDICARE PART D TERMINATION DATE	Q	Eligibility Verification: Required when future Medicare Part D coverage is known which is after the Date of Service submitted. Used only in Eligibility Transaction.
600-96	PLAN NAME	Q	Eligibility Verification Required if the data is available.

Notes on Response Insurance Additional Information Segment on an Eligibility Verification Response:

The Response Insurance Additional Information Segment is mandatory for Eligibility Verification transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) for Medicare Part D. This segment is used solely for Medicare Part D Eligibility transactions between the pharmacy and the Facilitator to provide Medicare specific benefit information.

The Response Insurance Additional Information Segment is not used for other than Medicare Part D Eligibility transactions between the pharmacy and the Facilitator.

9.4.1.2.5 RESPONSE PATIENT SEGMENT (ELIGIBILITY VERIFICATION) (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

RESPONSE PATIENT SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation

331-CX	PATIENT ID QUALIFIER	Q***R***	Eligibility Verification: Required if Patient ID (332-CY) is used.
332-CY	PATIENT ID	Q***R***	Eligibility Verification: Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.
310-CA	PATIENT FIRST NAME	Q	Eligibility Verification: Required if known.
311-CB	PATIENT LAST NAME	Q	Eligibility Verification: Required if known.
304-C4	DATE OF BIRTH	Q	Eligibility Verification: Required if known.

Notes on Response Patient Segment on an Eligibility Verification Response:

The Response Patient Segment is situational for Eligibility Verification transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) when patient demographic information needs to be sent from the sender to the receiver.

Medicare Part D Eligibility Transactions from Sender to Facilitator:

This segment is used for Medicare Part D Eligibility transactions to provide patient name and date of birth in order to provide additional patient information. This information could assist in the verification that the eligibility information returned is indeed the patient for which the eligibility request was intended. It is used only when the patient has had Medicare Part D eligibility at some point within the

Facilitator's files and within the search parameters established. The data returned is based on information within the Facilitator's files and not on information sent on the Eligibility Request.

9.4.1.2.6 RESPONSE STATUS SEGMENT (ELIGIBILITY VERIFICATION) (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation

Notes on Response Header Segment on an Eligibility Verification Response:

The Response Header Segment is a mandatory, fixed length segment for Eligibility Verification response when the Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The "Situation" column is not applicable.

9.4.3.2.2 RESPONSE MESSAGE SEGMENT (ELIGIBILITY VERIFICATION) (TRANSMISSION REJECTED/TRANSACTION REJECTED)

RESPONSE MESSAGE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Eligibility Verification: Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on an Eligibility Verification Response:

The Response Message Segment is situational for Eligibility Verification response when the Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). It is used when additional text information needs to be sent.

9.4.3.2.3 RESPONSE STATUS SEGMENT (ELIGIBILITY VERIFICATION) (TRANSMISSION REJECTED/TRANSACTION REJECTED)

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Eligibility Verification: Required if needed to identify the transaction.
B98-34	RECONCILIATION ID	N	Eligibility Verification: Not used.

Notes on Response Status Segment on an Eligibility Verification Response:

The Response Status Segment is mandatory for an Eligibility Verification response when the Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The Response Status Segment is sent from the sender to the receiver to identify the outcome of the request.

10 CLAIM BILLING OR ENCOUNTER INFORMATION

These messages include:

- Claim Billing (B1)
- Claim Reversal (B2)
- Claim Rebill (B3)
- Encounter (B1, see below)

As of Version E7, only one transaction per transmission is supported. For Transaction Code of “B1” or “B2” or “B3”, in the Claim Segment or Response Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is “1” (Rx Billing).

Billings may be for products dispensed, DUR conflict resolution, or professional services rendered. Services may be correlated with a dispensing event or may be separate and unrelated to any particular prescription. (See section “*Service Billing (Professional Pharmacy Service) Information*”).

For Risk Evaluation and Mitigation Strategies (REMS) or Prescription Drug Monitoring Program (PDMP) processing there is a need to ensure that all claim transactions (i.e., Billing, Reversal, Rebill) are delivered through the same path to ensure accurate reporting.

See section “*Transaction Response Status*”, “*Duplicate Transactions*”.

10.1 CLAIM BILLING

These transactions are used by the Originator to request payment from the Processor for a specific patient for claims billed according to appropriate plan parameters. The Transaction Code is “B1”.

Each claim submission request contains one occurrence of claim/service data.

Depending upon the particular claim submission request, the Processor must provide one of the following general types of responses:

Captured – This occurs when the Processor acknowledges receipt of the claim, but is not making any judgment regarding eligibility of the patient or payment for the claim at this time.

Duplicate of Captured – This occurs when the Processor has previously received the request and processed the transaction, but the response did not return to the Originator. The Duplicate response contains the same information as returned in the Captured original response.

Paid – This occurs when the Processor captures and processes the claim, and returns to the Originator the dollar amounts allowed under the terms of the plan. The Paid response is not used in payer-to-payer transactions.

Duplicate of Paid – This occurs when the Processor has previously received the request and processed the transaction, but the response did not return to the Originator. The Duplicate response contains the same information as returned in the Paid original response. The Duplicate of Paid response is not used in payer-to-payer transactions.

Rejected – This occurs when the Processor has encountered an error in the transaction or processing.

10.2 ENCOUNTER

Encounter transactions are used to report health care product/services from the provider to the payer. This guide uses the definition stated in the HIPAA regulations¹:

“If there is no direct claim, because the reimbursement contract is based on a mechanism other than charges or reimbursement rates for specific services, the transaction is the transmission of encounter information for the purpose of reporting health care.”

For example, a payer and provider have entered into a capitation agreement, i.e. \$50/PMPM (per member per month). On an agreed upon schedule, the encounter data will be reconciled with the capitated payments that have been made. The encounter data may support adjustment (settlement) of the amount paid to the provider, based on actual experience and products/services provided, as well as incentives, or other contract terms.

One method of distinguishing an encounter is the use of Submission Type Code (D17-K8) – AC (Encounters – Indicates the transaction is a transmission of provider services claim information for the purpose of healthcare reporting). The Transaction Code is “B1”.

This use of Encounter transaction is **not** a payer-to-payer transaction.

Each encounter submission request contains one occurrence of encounter data.

Depending upon the particular encounter submission request, the Processor must provide one of the following general types of responses:

¹ 45 CFR Parts 160 and 162 Subpart K—Health Care Claims or Equivalent Encounter Information § 162.1101 Health care claims or equivalent encounter information transaction.

Captured – This occurs when the Processor acknowledges receipt of the encounter, but is not making any judgment regarding eligibility of the patient or payment for the encounter at this time.

Duplicate of Captured – This occurs when the Processor has previously received the request and processed the transaction, but the response did not return to the Originator. The Duplicate response contains the same information as returned in the Captured original response.

Paid – This occurs when the Processor captures and processes the encounter, and returns to the Originator the dollar amounts allowed under the terms of the plan. The Paid response is not used in payer-to-payer transactions.

Duplicate of Paid – This occurs when the Processor has previously received the request and processed the transaction, but the response did not return to the Originator. The Duplicate response contains the same information as returned in the Paid original response. The Duplicate of Paid response is not used in payer-to-payer transactions.

Rejected – This occurs when the Processor has encountered an error in the transaction or processing.

10.2.1 ENCOUNTER DIAGRAMS

10.2.1.1 DIAGRAM FOR TRANSMISSION OF AN ENCOUNTER REQUEST TRANSACTION

The diagrams for Claim Billing must be used for Encounters. The field situations will designate the Encounter usage with the tag "Encounter".

10.2.1.2 DIAGRAM FOR TRANSMISSION OF AN ENCOUNTER RESPONSE TRANSACTION

The diagrams for Claim Billing responses must be used for Encounter responses. The field situations will designate the Encounter usage with the tag "Encounter".

10.3 CLAIM BILLING OR ENCOUNTER REQUEST DIAGRAMS

10.3.1 DIAGRAM FOR TRANSMISSION OF A CLAIM BILLING OR ENCOUNTER TRANSACTION

For a Claim Billing or Encounter the scenario defined includes a Claim Billing from a Sender to a Receiver.

10.4 CLAIM BILLING OR ENCOUNTER REQUEST SEGMENTS

10.4.1 TRANSACTION HEADER SEGMENT (CLAIM BILLING OR ENCOUNTER)

TRANSACTION HEADER SEGMENT		Mandatory or Situational	MANDATORY SEGMENT	
Field	Field Name		Situation	
102-A2	VERSION/RELEASE NUMBER	M		
103-A3	TRANSACTION CODE	M	For Transaction Code of "B1", in the Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "1" (Rx Billing).	
101-A1	IIN NUMBER	M		
104-A4	PROCESSOR CONTROL NUMBER	M		
109-A9	TRANSACTION COUNT	M		
202-B2	SERVICE PROVIDER ID QUALIFIER	M		
201-B1	SERVICE PROVIDER ID	M		
401-D1	DATE OF SERVICE	M		
110-AK	SOFTWARE VENDOR/CERTIFICATION ID	M		

Notes on Transaction Header Segment on a Claim Billing or Encounter Request:

The Transaction Header Segment is a mandatory, fixed length segment for a Claim Billing or Encounter request. The "Situation" column is not applicable.

10.4.2 INSURANCE SEGMENT (CLAIM BILLING OR ENCOUNTER)

INSURANCE SEGMENT		Mandatory or Situational	MANDATORY SEGMENT	
Field	Field Name		Situation	
111-AM	SEGMENT IDENTIFICATION	M		
302-C2	CARDHOLDER ID	M		
312-CC	CARDHOLDER FIRST NAME	Q	Claim Billing/Encounter: Required if necessary for state/federal/regulatory agency programs when the cardholder has a first name.	
313-CD	CARDHOLDER LAST NAME	Q	Claim Billing/Encounter: Required if necessary for state/federal/regulatory agency programs.	
524-FO	PLAN ID	O	Claim Billing/Encounter: Optional.	
309-C9	ELIGIBILITY CLARIFICATION CODE	Q	Claim Billing/Encounter: Required if needed for receiver inquiry validation and/or determination, when eligibility is not maintained at the dependent level. Required in special situations as defined by the code to clarify the eligibility of an individual, which may extend coverage.	
301-C1	GROUP ID	Q	Claim Billing/Encounter: Required if necessary for state/federal/regulatory agency programs. Required if needed for pharmacy claim processing and payment.	
303-C3	PERSON CODE	Q	Claim Billing/Encounter: Required if needed to uniquely identify the family members within the Cardholder ID.	
306-C6	PATIENT RELATIONSHIP CODE	Q	Claim Billing/Encounter: Required if needed to uniquely identify the relationship of the Patient to the Cardholder.	
359-2A	MEDIGAP ID	Q	Claim Billing/Encounter: Required, if known, when patient has Medigap coverage.	
360-2B	MEDICAID INDICATOR	Q	Claim Billing/Encounter: Required, if known, when patient has Medicaid coverage.	
361-2D	PROVIDER ACCEPT ASSIGNMENT INDICATOR	Q	Claim Billing/Encounter: Required if necessary for state/federal/regulatory agency programs.	
115-N5	MEDICAID ID NUMBER	Q	Claim Billing/Encounter: Required, if known, when patient has Medicaid coverage and Medicaid ID has not been provided in Cardholder ID (302-C2).

Notes on Patient Segment on a Claim Billing or Encounter Request:

The Patient Segment is situational for a Claim Billing or Encounter request. It is used when a receiver needs some of the patient demographic information to perform eligibility and claim/encounter determination. The Patient Segment must be submitted when needed to differentiate between the patient and the cardholder. If the cardholder and the patient are the same, then the Patient Segment is not submitted unless additional information about the patient is needed to clarify the claim/encounter determination. The Segment is mandatory if required under provider payer contract or mandatory on claims where this information is necessary for adjudication of the claim.

343-HD	DISPENSING STATUS	Q	Claim Billing/Encounter: Required for the partial fill or the completion fill of a prescription.
344-HF	QUANTITY INTENDED TO BE DISPENSED	Q	Claim Billing/Encounter: Required for the partial fill or the completion fill of a prescription.
345-HG	DAYS SUPPLY INTENDED TO BE DISPENSED	Q	Claim Billing/Encounter: Required for the partial fill or the completion fill of a prescription.
357-NV	DELAY REASON CODE	Q	Claim Billing/Encounter: Required when needed to specify the reason that submission of the transaction has been delayed.
391-MT	PATIENT ASSIGNMENT INDICATOR (DIRECT MEMBER REIMBURSEMENT INDICATOR)	Q	Claim Billing/Encounter: Required when the claims adjudicator does not assume the patient assigned his/her benefits to the provider or when the claims adjudicator supports a patient determination of whether he/she wants to assign or retain his/her benefits.
995-E2	ROUTE OF ADMINISTRATION	Q	Claim Billing/Encounter: Required if specified in trading partner agreement.
996-G1	COMPOUND TYPE	Q	Claim Billing/Encounter: Required if specified in trading partner agreement. Required when mandated by Workers' Compensation/ Property and Casualty statute/regulation.
C99-KU	PREPARATION ENVIRONMENT TYPE	Q	Claim Billing/Encounter: Required if specified in a trading partner agreement. If this field is submitted in conjunction with a compounded prescription claim, the value must be compatible with the value used in Compound Level of Complexity(C60-AG).
C98-KT	PREPARATION ENVIRONMENT EVENT CODE	Q	Claim Billing/Encounter: Required when the Preparation Environment Type (C99-KU) is used for a non-compound claim.
147-U7	PHARMACY SERVICE TYPE	Q	Claim Billing/Encounter: Required when the submitter must clarify the type of services being performed as a condition for proper reimbursement by the payer.
579-XX	ASSOCIATED PRESCRIPTION/SERVICE PROVIDER ID QUALIFIER	N	Claim Billing/Encounter: Not used.
580-XY	ASSOCIATED PRESCRIPTION/SERVICE PROVIDER ID	N	Claim Billing/Encounter: Not used.
581-XZ	ASSOCIATED PRESCRIPTION/SERVICE REFERENCE NUMBER QUALIFIER	Q	Claim Billing/Encounter: Required if the "completion" transaction in a partial fill (Dispensing Status (343-HD) = "C" (Completed)). See section "Specific Segment Discussion", "Request Segments", Claim Segment" for more information.
582-X0	ASSOCIATED PRESCRIPTION/SERVICE REFERENCE FILL NUMBER	Q	Claim Billing/Encounter: Required if the "completion" transaction in a partial fill (Dispensing Status (343-HD) = 'C' (Completed)) when the fill number is different than the partial transaction fill number.
678-Y6	TIME OF SERVICE	N	Claim Billing/Encounter: Not used.
681-ZF	SALES TRANSACTION ID	N	Claim Billing/Encounter: Not used.
A29-ZS	REPORTED ADJUDICATED PROGRAM TYPE	N	Claim Billing/Encounter: Not used.
C02-4P	ORIGINAL MANUFACTURER PRODUCT ID QUALIFIER	Q	Claim Billing/Encounter: Required if Original Manufacturer Product ID (C01-4N) is used.
C01-4N	ORIGINAL MANUFACTURER PRODUCT ID	Q	Claim Billing/Encounter: Required if a repackaged drug is being dispensed and the jurisdiction or payer requires the Original Manufacturer Product ID of the drug that was repackaged be submitted.
C91-KK	LTPAC DISPENSE FREQUENCY	Q	Claim Billing/Encounter: Required on short cycle eligible claims to meet CMS reporting requirements. Required when the submitter must clarify the type of services being performed as a condition for proper reimbursement by the payer.

CLAIM SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
C90-KH	LTPAC BILLING METHODOLOGY	Q	Claim Billing/Encounter: Required when the submitter must clarify the type of services being performed as a condition for proper reimbursement by the payer.
C92-KM	NUMBER OF LTPAC DISPENSING EVENTS	Q	Claim Billing/Encounter: Required when the submitter must clarify the number of dispensing events that occurred as a condition for proper reimbursement by the payer.
D18-K9	DO NOT DISPENSE BEFORE DATE	Q	Claim Billing/Encounter: Required when the prescriber indicates a "do not dispense before date" for CII's except for claims for patients residing in a Long Term and Post-Acute Care (LTPAC) setting.

Notes on Claim Segment on a Claim Billing or Encounter Request:

The Claim Segment is mandatory for a Claim Billing or Encounter Request. The Claim Segment defines the product dispensed, dispensing information, reference information for tieback to an original prescription in the case of partial fillings, or authorization information.

10.4.4.1 CLAIM SEGMENT (SUBROGATION STANDARD CLAIM BILLING OR ENCOUNTER)

CLAIM SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
B98-34	RECONCILIATION ID	RM	Subrogation – Claim Billing/Encounter: Required. Contains the Reconciliation ID returned on the original payers' paid claim response transaction.
A29-ZS	REPORTED ADJUDICATED PROGRAM TYPE	RM	Subrogation – Claim Billing/Encounter: Required. Contains the value returned in Adjudicated Program Type (A28-ZR) of the original payer's response transaction

Notes on Claim Segment on a Subrogation Standard Claim Billing or Encounter Request:

The rules above for a "Claim Segment (Claim Billing or Encounter)" are to be followed for Subrogation. Specific fields that are used differently in Subrogation are noted in the table above.

10.4.5 PRICING SEGMENT (CLAIM BILLING OR ENCOUNTER)

PRICING SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
409-D9	INGREDIENT COST SUBMITTED	R	Claim Billing/Encounter: Required.
412-DC	DISPENSING FEE SUBMITTED	Q	Claim Billing/Encounter: Required if its value has an effect on the Gross Amount Due (430-DU) calculation. Zero (0) is a valid value.
477-BE	PROFESSIONAL SERVICE FEE SUBMITTED	N	Claim Billing/Encounter: Not used.
433-DX	PATIENT PAY AMOUNT REPORTED	Q	Claim Billing/Encounter: Required only when the provider is responsible for applying the prescription pricing formula and determining the patient liability amount. Otherwise not used in real-time transactions. Not used in coordination of benefit transactions to pass patient liability information to a downstream payer. See section "Standard Conventions", "Repetition and Multiple Occurrences", "Repeating Data Elements", "Request Segments", "Coordination of Benefits/Other Payments Segment".
438-E3	INCENTIVE AMOUNT SUBMITTED	Q	Claim Billing/Encounter: Required if its value has an effect on the Gross Amount Due (430-DU) calculation. Zero (0) is a valid value.

PRICING SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
478-H7	OTHER AMOUNT CLAIMED SUBMITTED COUNT	Q	Claim Billing/Encounter: Maximum count of 3. Required if Other Amount Claimed Submitted Qualifier (479-H8) is used.
479-H8	OTHER AMOUNT CLAIMED SUBMITTED QUALIFIER	Q***R***	Claim Billing/Encounter: Required if Other Amount Claimed Submitted (480-H9) is used.
480-H9	OTHER AMOUNT CLAIMED SUBMITTED	Q***R***	Claim Billing/Encounter: Required if its value has an effect on the Gross Amount Due (430-DU) calculation. Zero (0) is a valid value.
D60-RK	REGULATORY FEE COUNT	Q	Claim Billing/Encounter: Maximum count of 3. Required if Regulatory Fee Type Code (D61-RL) is used.
D61-RL	REGULATORY FEE TYPE CODE	Q***R***	Claim Billing/Encounter: Required if Regulatory Fee Amount Submitted (481-HA) is used.
481-HA	REGULATORY FEE AMOUNT SUBMITTED	Q***R***	Claim Billing/Encounter: Required if its value has an effect on the Gross Amount Due (430-DU) calculation. Zero (0) is a valid value.
482-GE	PERCENTAGE TAX AMOUNT SUBMITTED	Q	Claim Billing/Encounter: Required if its value has an effect on the Gross Amount Due (430-DU) calculation. Zero (0) is a valid value.
483-HE	PERCENTAGE TAX RATE SUBMITTED	Q	Claim Billing/Encounter: Required if Percentage Tax Amount Submitted (482-GE) and Percentage Tax Basis Submitted (484-JE) are used. Required if this field could result in different pricing. Required if needed to calculate Percentage Tax Amount Paid (559-AX).
484-JE	PERCENTAGE TAX BASIS SUBMITTED	Q	Claim Billing/Encounter: Required if Percentage Tax Amount Submitted (482-GE) and Percentage Tax Rate Submitted (483-HE) are used. Required if this field could result in different pricing. Required if needed to calculate Percentage Tax Amount Paid (559-AX).
426-DQ	USUAL AND CUSTOMARY CHARGE	Q	Claim Billing/Encounter: Required if needed per trading partner agreement.
430-DU	GROSS AMOUNT DUE	R	Claim Billing/Encounter: Required. See Pricing Formula for fields used in calculation.
423-DN	BASIS OF COST DETERMINATION	Q	Claim Billing/Encounter: Required if needed for receiver claim/encounter adjudication.
D14-KX	SUBROGATION AMOUNT REQUESTED	N	Claim Billing/Encounter: Not used

Notes on Pricing Segment on a Claim Billing or Encounter Request:

The Pricing Segment is mandatory for a Claim Billing or Encounter Request. The Pricing Segment defines dollar amounts and basis of costs for a Claim Billing or Encounter.

It is highly recommended that whenever possible, the individual dollar fields are requested of the sender by the receiver. On the response, the sender should return the individual payment response fields to allow the receiver to reconcile against the requested payment fields. It is recommended that for the dollar fields, if the field is not required or situational in the calculation, that the dollar fields are not sent.

See section "Pricing Guidelines".

COORDINATION OF BENEFITS/OTHER PAYMENTS SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Must only have one value per iteration – value must not be repeated.

Notes on Coordination of Benefits/Other Payments Segment on a Claim Billing or Encounter Request:

The Coordination of Benefits/Other Payments Segment is not used for a Claim Billing or Encounter request to a primary payer.

The Coordination of Benefits/Other Payments Segment is required for a Claim Billing or Encounter request to a non-primary payer. It is used by downstream payers to access claim adjudication results (financial or reject code values) from all previous payers to determine their claim/encounter results.

The Coordination of Benefits/Other Payments Segment is also used by a payer to uniquely identify a claim or encounter in case of duplicate processing. For example, the same patient may have multiple prescription benefit plans from the same processor where the processor is the primary *and* secondary payer, or primary *and* tertiary, or secondary *and* tertiary payer, etc. The downstream payer uses the duplicate claim logic fields, including the Other Payer Coverage Type (338-5C) to differentiate which claim or encounter to process. See section “*Transaction Response Status*”, “*Duplicate Transactions*”.

Note, the Other Payer Coverage Type (338-5C) occurrences do not have to appear in sequential order (primary, secondary, tertiary).

The Other Payer Reconciliation ID (C49-9V) would not be reported when the COB occurrence is reporting a rejected response from that previous payer, represented by the values submitted in the Other Payer Reject Code (472-6E) field.

See section “*Other Coverage Code (308-C8)*”.

10.4.9 WORKERS’ COMPENSATION SEGMENT (CLAIM BILLING OR ENCOUNTER)

WORKERS’ COMPENSATION SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT

Notes on DUR/PPS Segment on a Claim Billing or Encounter Request:

The DUR/PPS Segment is situational for a Claim Billing or Encounter request. It is used when a sender notifies the receiver of drug utilization, drug evaluations, or information on the appropriate selection to process the claim/encounter. The DUR/PPS information may be sent on the initial submission or alternatively sent after a DUR/PPS rejection from a receiver. The Segment is mandatory if required under provider payer contract or mandatory on claims where this information is necessary for adjudication of the claim.

	COMPOUND SEGMENT		SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
			Maximum count of 10.
363-2H	COMPOUND INGREDIENT MODIFIER CODE	Q***R***	Claim Billing/Encounter: Required if necessary for state/federal/regulatory agency programs.

Notes on Compound Segment on a Claim Billing or Encounter Request:

The Compound Segment is situational for a Claim Billing or Encounter request. It is used for multi-ingredient prescriptions, when each ingredient is reported. The Segment is mandatory if required under provider payer contract or mandatory on claims where this information is necessary for adjudication of the claim.

10.4.12 CLINICAL SEGMENT (CLAIM BILLING OR ENCOUNTER)

	CLINICAL SEGMENT		SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
491-VE	DIAGNOSIS CODE COUNT	Q	Claim Billing/Encounter: Maximum count of 5. Required if Diagnosis Code Qualifier (492-WE) and Diagnosis Code (424-DO) are used.
492-WE	DIAGNOSIS CODE QUALIFIER	Q***R***	Claim Billing/Encounter: Required if Diagnosis Code (424-DO) is used.
424-DO	DIAGNOSIS CODE	Q***R***	Claim Billing/Encounter: The value for this field is obtained from the prescriber or authorized representative. Required if this field could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome. Required if this field affects payment for professional pharmacy service. Required if this information can be used in place of prior authorization. Required if necessary for state/federal/regulatory agency programs.
493-XE	CLINICAL INFORMATION COUNTER	Q***R***	Claim Billing/Encounter: Maximum 5 occurrences supported. Grouped with Measurement fields (Measurement Date (494-ZE), Measurement Time (495-H1), Measurement Dimension (496-H2), Measurement Unit (497-H3), Measurement Value (499-H4)).
494-ZE	MEASUREMENT DATE	Q***R***	Claim Billing/Encounter: Required if necessary when this field could result in different coverage and/or drug utilization review outcome.
495-H1	MEASUREMENT TIME	Q***R***	Claim Billing/Encounter: Required if Time is known or has impact on measurement. Required if necessary when this field could result in different coverage and/or drug utilization review outcome.
496-H2	MEASUREMENT DIMENSION	Q***R***	Claim Billing/Encounter: Required if Measurement Unit (497-H3) and Measurement Value (499-H4) are used. Required if necessary when this field could result in different coverage and/or drug utilization review outcome. Required if necessary for patient's weight and height when billing Medicare for a claim that includes a Certificate of Medical Necessity (CMN).
497-H3	MEASUREMENT UNIT	Q***R***	Claim Billing/Encounter: Required if Measurement Dimension (496-H2) and Measurement Value (499-H4) are used.

Notes on Response Insurance Segment on a Claim Billing or Encounter Response:

The Response Insurance Segment is situational for Claim Billing or Encounter response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). It is used when coverage or reimbursement parameters or identifiers need to be sent.

**10.5.1.2.3.1 Response Insurance Segment (Subrogation
Standard Claim Billing or Encounter)
(Transmission Accepted/Transaction Paid)**

RESPONSE INSURANCE SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
115-N5	MEDICAID ID NUMBER	QM	Subrogation – Claim Billing/Encounter: Required to identify the member as uniquely known to Medicaid. Not used for other types of subrogation.
116-N6	MEDICAID AGENCY NUMBER	QM	Subrogation – Claim Billing/Encounter: Required to identify the Medicaid agency. Not used for other types of subrogation.

Notes on Response Insurance Segment on a Subrogation Standard Claim Billing or Encounter Response:

The rules above for a "Response Insurance Segment (Claim Billing or Encounter)" are to be followed for Subrogation. Specific fields that are used differently in Subrogation are noted in the table above.

10.5.1.2.4 RESPONSE PATIENT SEGMENT (CLAIM BILLING OR ENCOUNTER) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE PATIENT SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
618-RR	PATIENT ID COUNT	Q	Claim Billing/Encounter: Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.
331-CX	PATIENT ID QUALIFIER	Q***R***	Claim Billing/Encounter: Required if Patient ID (332-CY) is used.
332-CY	PATIENT ID	Q***R***	Claim Billing/Encounter: Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.
310-CA	PATIENT FIRST NAME	Q	Claim Billing/Encounter: Required if known.
311-CB	PATIENT LAST NAME	Q	Claim Billing/Encounter: Required if known.
304-C4	DATE OF BIRTH	Q	Claim Billing/Encounter: Required if known.

Notes on Response Patient Segment on a Claim Billing/Encounter Response:

The Response Patient Segment is situational for Claim Billing or Encounter transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid) when patient demographic information needs to be sent from the sender to the receiver.

10.5.1.2.5 RESPONSE STATUS SEGMENT (CLAIM BILLING OR ENCOUNTER) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE STATUS SEGMENT			MANDATORY SEGMENT

--------	--	----------	---

Notes on Response Other Related Benefit Detail Segment on a Claim Billing or Encounter Response: The Response Other Related Benefit Detail Segment is situational for a Claim Billing or Encounter response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). Information will be returned when the Date of Service (401-D1) is in an active period for any of the records above (ESRD, Hospice, Institutional, Disability, or LIS or when other benefit information is available).

10.5.1.2.12 RESPONSE INTERMEDIARY SEGMENT (CLAIM BILLING OR ENCOUNTER) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE INTERMEDIARY SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
B52-8R	RESPONSE INTERMEDIARY AUTHORIZATION COUNT	Q	Claim Billing/Encounter: Required if Response Intermediary Authorization Type ID is used. Maximum count of 9.
B53-8S	RESPONSE INTERMEDIARY AUTHORIZATION TYPE ID	Q***R***	Claim Billing/Encounter: Required if Response Intermediary Authorization ID is used.
B54-8T	RESPONSE INTERMEDIARY AUTHORIZATION ID	Q***R***	Claim Billing/Encounter: Required if the Intermediary determines an authorization identifier needs to be communicated to the receiver.
B51-8Q	INTERMEDIARY MESSAGE	Q***R***	Claim Billing/Encounter: Required if text is needed for clarification or detail.
C86-KC	INTERMEDIARY HELP DESK SUPPORT TYPE COUNT	M	Claim Billing/Encounter: Maximum count of 5. Used to qualify the number of occurrences of Intermediary Help Desk Support Type (C85-KB) that is included in the Response Intermediary Segment.
C85-KB	INTERMEDIARY HELP DESK SUPPORT TYPE	M***R***	
C81-G9	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE COUNT	R	Claim Billing/Encounter: Maximum count of 5. Used to qualify the number of occurrences of the Intermediary Help Desk Business Unit Type, Intermediary Help Desk Contact Information Qualifier, Intermediary Help Desk Contact Information and Intermediary Help Desk Contact Information Extension that is included in the Response Intermediary Segment. Required if Help Desk Business Unit Type (C80-G8) is used
C80-G8	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE	Q***R***	Claim Billing/Encounter: Required if Intermediary Help Desk Contact Information Qualifier (C84-KA) is used.
C84-KA	INTERMEDIARY HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Claim Billing/Encounter: Required if Help Desk Contact Information (C84-KA) is used.
C82-JP	INTERMEDIARY HELP DESK CONTACT INFORMATION	Q***R***	Claim Billing/Encounter: Required if needed to provide help desk contact support information to the receiver.
C83-JR	INTERMEDIARY HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Claim Billing/Encounter: Required if needed to provide an extension to the Help Desk Contact Information (C82-JP).

Notes on Response Intermediary Segment on a Claim Billing or Encounter Response:

The Response Intermediary Segment is situational for a Claim Billing or Encounter response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). The segment is used to support the authorization from an intermediary such as a Prescription Drug Monitoring Program (PDMP) or Risk Evaluation and Mitigation Strategy (REMS) program.

10.5.1.2.13 RESPONSE PROVIDER SEGMENT (CLAIM BILLING OR ENCOUNTER) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Claim Billing/Encounter: Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Claim Billing/Encounter: Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Claim Billing or Encounter Response:

The Response Provider Segment is situational for a Claim Billing or Encounter response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

10.5.2 TRANSMISSION ACCEPTED/TRANSACTION CAPTURED

10.5.2.1 DIAGRAM FOR TRANSMISSION OF A CLAIM BILLING OR ENCOUNTER RESPONSE (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

Claim Billing or Encounter transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured)

The Response Pricing Segment and Response DUR/PPS Segments are not used in payer-to-payer transactions.

See section "Transaction Response Status", "Duplicate Transactions" for the handling of a duplicate transaction.

10.5.2.2 CLAIM BILLING OR ENCOUNTER RESPONSE SEGMENTS (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

10.5.2.2.1 RESPONSE HEADER SEGMENT (CLAIM BILLING OR ENCOUNTER) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

RESPONSE HEADER SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	For Transaction Code of "B1", in the Response Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "1" (Rx Billing).
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on a Claim Billing or Encounter Response:

The Response Header Segment is a mandatory, fixed length segment for Claim Billing or Encounter response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). The "Situation" column is not applicable.

10.5.2.2.2 RESPONSE MESSAGE SEGMENT (CLAIM BILLING OR ENCOUNTER) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE MESSAGE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Claim Billing/Encounter: Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Claim Billing or Encounter Response:

The Response Message Segment is situational for Claim Billing or Encounter response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). It is used when additional text information needs to be sent.

10.5.2.2.3 RESPONSE INSURANCE SEGMENT (CLAIM BILLING OR ENCOUNTER) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
301-C1	GROUP ID	Q	Claim Billing/Encounter: Required if needed to identify the actual cardholder or employer group, to identify appropriate group number, when available. Required to identify the actual group that was used when multiple group coverages exist. Note: This field may contain the Group ID echoed from the request. May contain the actual Group ID if unknown to the receiver.
524-FO	PLAN ID	Q	Claim Billing/Encounter: Required if needed to identify the actual plan parameters, benefit, or coverage criteria, when available. Required to identify the actual plan ID that was used when multiple group coverages exist.

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Required if needed to contain the actual plan ID if unknown to the receiver.
545-2F	NETWORK REIMBURSEMENT ID	N	Claim Billing/Encounter: Not used.
C96-KR	PAYER/HEALTH PLAN ID COUNT	N	Claim Billing/Encounter: Not used.
568-J7	PAYER/HEALTH PLAN ID QUALIFIER	N	Claim Billing/Encounter: Not used.
569-J8	PAYER/HEALTH PLAN ID	N	Claim Billing/Encounter: Not used.
115-N5	MEDICAID ID NUMBER	N	Claim Billing/Encounter: Not used.
116-N6	MEDICAID AGENCY NUMBER	N	Claim Billing/Encounter: Not used.
302-C2	CARDHOLDER ID	Q	Claim Billing/Encounter: Required if the identification to be used in future transactions is different than what was submitted on the request.

Notes on Response Insurance Segment on a Claim Billing or Encounter Response:

The Response Insurance Segment is situational for Claim Billing or Encounter response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). It is used when coverage information may be sent.

**10.5.2.2.3.1 Response Insurance Segment (Subrogation
Standard Claim Billing or Encounter)
(Transmission Accepted/Transaction Captured)**

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
115-N5	MEDICAID ID NUMBER	QM	Subrogation - Claim Billing/Encounter: Required to identify the member as uniquely known to Medicaid. Not used for other types of subrogation.
116-N6	MEDICAID AGENCY NUMBER	QM	Subrogation - Claim Billing/Encounter: Required to identify the Medicaid agency. Not used for other types of subrogation.

Notes on Response Insurance Segment on a Subrogation Standard Claim Billing or Encounter Response:

The rules above for a "Response Insurance Segment (Claim Billing or Encounter)" are to be followed for Subrogation. Specific fields that are used differently in Subrogation are noted in the table above.

10.5.2.2.4 RESPONSE PATIENT SEGMENT (CLAIM BILLING OR ENCOUNTER) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
618-RR	PATIENT ID COUNT	Q	Claim Billing/Encounter: Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.
331-CX	PATIENT ID QUALIFIER	Q***R***	Claim Billing/Encounter: Required if Patient ID (332-CY) is used.
332-CY	PATIENT ID	Q***R***	Claim Billing/Encounter: Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.
310-CA	PATIENT FIRST NAME	Q	Claim Billing/Encounter: Required if known.
311-CB	PATIENT LAST NAME	Q	Claim Billing/Encounter: Required if known.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

RESPONSE PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
304-C4	DATE OF BIRTH	Q	Claim Billing/Encounter: Required if known.

Notes on Response Patient Segment on a Claim Billing/Encounter Response:

The Response Patient Segment is situational for Claim Billing or Encounter transmission response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured) when patient demographic information needs to be sent from the sender to the receiver.

10.5.2.2.5 RESPONSE STATUS SEGMENT (CLAIM BILLING OR ENCOUNTER) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Claim Billing/Encounter: Required if needed to identify the transaction.
B98-34	RECONCILIATION ID	R	Claim Billing/Encounter: Captured "C" response: This is a unique processor assigned value that must be provided on a "C" response. See section "RESPONSE STATUS SEGMENT / RECONCILIATION ID". Duplicate of Captured "Q" response: The Reconciliation ID returned on a "Q" response must be that of the transaction found by processor that is resulting in the Duplicate response. See section "DUPLICATE TRANSACTIONS".
510-FA	REJECT COUNT	N	Claim Billing/Encounter: Not used.
511-FB	REJECT CODE	N***R***	Claim Billing/Encounter: Not used.
546-4F	REJECT FIELD OCCURRENCE INDICATOR	N***R***	Claim Billing/Encounter: Not used.
547-5F	APPROVED MESSAGE CODE COUNT	N	Claim Billing/Encounter: Not used.
548-6F	APPROVED MESSAGE CODE	N***R***	Claim Billing/Encounter: Not used.
130-UF	ADDITIONAL MESSAGE INFORMATION COUNT	Q	Claim Billing/Encounter: Maximum count of 25. Required if Additional Message Information (526-FQ) is used. Used to qualify the number of occurrences of the Additional Message Information (526-FQ) that is included in the Response Status Segment.
132-UH	ADDITIONAL MESSAGE INFORMATION QUALIFIER	Q***R***	Claim Billing/Encounter: Required if Additional Message Information (526-FQ) is used.
526-FQ	ADDITIONAL MESSAGE INFORMATION	Q***R***	Claim Billing/Encounter: Required when additional text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.
131-UG	ADDITIONAL MESSAGE INFORMATION CONTINUITY	Q***R***	Claim Billing/Encounter: Required if and only if current repetition of Additional Message Information (526-FQ) is used, another populated repetition of Additional Message Information (526-FQ) follows it, and the text of the following message is a continuation of the current.

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

RESPONSE PRICING SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
577-G3	ESTIMATED GENERIC SAVINGS	I	Claim Billing/Encounter: This information should be provided when a patient selected the brand drug and a generic form of the drug was available. It will contain an estimate of the difference between the cost of the brand drug and the generic drug, when the brand drug is more expensive than the generic. It is information that the provider should provide to the patient.
148-U8	INGREDIENT COST CONTRACTED/REIMBURSABLE AMOUNT	N	Claim Billing/Encounter: Not used.
149-U9	DISPENSING FEE CONTRACTED/REIMBURSABLE AMOUNT	N	Claim Billing/Encounter: Not used.
B33-6G	PROFESSIONAL SERVICE FEE CONTRACTED/REIMBURSABLE AMOUNT	N	Claim Billing/Encounter: Not used.

Notes on Response Pricing Segment on a Claim Billing or Encounter Response:

The Response Pricing Segment is situational for a Claim Billing or Encounter Response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured).

The Response Pricing Segment is not used in payer-to-payer transactions.

All dollar fields except Patient Pay Amount (505-F5) are estimated amounts. If actual amounts are returned on fields other than Patient Pay Amount (505-F5), the "P" (Paid) response must be used.

If the Transaction Response Status (112-AN) = "C" (Captured) or "Q" (Duplicate of Captured), dollar fields should be supplied in the response.

- If the response is a "true" Capture (i.e., replacement of batch billing, with no edits or pricing), then corresponding response fields should be populated with values as submitted. *Ideally, processor should provide "real" patient financial responsibility values on a Capture. If this is not possible, provider must **know** (by trading partner agreement) the patient financial responsibility to charge and factor that into their system so collection occurs.*
- If the response is captured by an Intermediary who can provide better pricing criteria, the corresponding response fields should be populated with the *probable* values and those values used to determine estimated pricing as noted above. Since the claim has **not** been fully adjudicated, this should remain a capture response.

It is highly recommended that whenever possible, the individual dollar fields are returned in the response. On the response, the sender should return the individual payment response fields to allow the receiver to reconcile against the requested payment fields.

See section "Pricing Guidelines".

10.5.2.2.8 RESPONSE DUR/PPS SEGMENT (CLAIM BILLING OR ENCOUNTER) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE DUR/PPS SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT

RESPONSE INTERMEDIARY SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
B54-8T	RESPONSE INTERMEDIARY AUTHORIZATION ID	Q***R***	Claim Billing/Encounter: Required if the Intermediary determines an authorization identifier needs to be communicated to the receiver.
B51-8Q	INTERMEDIARY MESSAGE	Q***R***	Claim Billing/Encounter: Required if text is needed for clarification or detail.
C86-KC	INTERMEDIARY HELP DESK SUPPORT TYPE COUNT	M	Claim Billing/Encounter: Maximum count of 5. Used to qualify the number of occurrences of Intermediary Help Desk Support Type (C85-KB) that is included in the Response Intermediary Segment.
C85-KB	INTERMEDIARY HELP DESK SUPPORT TYPE	M***R***	
C81-G9	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE COUNT	R	Claim Billing/Encounter: Maximum count of 5. Used to qualify the number of occurrences of the Intermediary Help Desk Business Unit Type, Intermediary Help Desk Contact Information Qualifier, Intermediary Help Desk Contact Information and Intermediary Help Desk Contact Information Extension that is included in the Response Intermediary Segment. Required if Help Desk Business Unit Type (C80-G8) is used
C80-G8	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE	Q***R***	Claim Billing/Encounter: Required if Intermediary Help Desk Contact Information Qualifier (C84-KA) is used.
C84-KA	INTERMEDIARY HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Claim Billing/Encounter: Required if Help Desk Contact Information (C84-KA) is used.
C82-JP	INTERMEDIARY HELP DESK CONTACT INFORMATION	Q***R***	Claim Billing/Encounter: Required if needed to provide help desk contact support information to the receiver.
C83-JR	INTERMEDIARY HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Claim Billing/Encounter: Required if needed to provide an extension to the Help Desk Contact Information (C82-JP).

Notes on Response Intermediary Segment on a Claim Billing or Encounter Response:

The Response Intermediary Segment is situational for a Claim Billing or Encounter response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). The segment is used to support the authorization from an intermediary such as a Prescription Drug Monitoring Program (PDMP) or Risk Evaluation and Mitigation Strategy (REMS) program..

10.5.2.2.11 RESPONSE PROVIDER SEGMENT (CLAIM BILLING OR ENCOUNTER) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Claim Billing/Encounter: Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Claim Billing/Encounter: Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Claim Billing or Encounter Response:

The Response Provider Segment is situational for a Claim Billing or Encounter response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

RESPONSE MESSAGE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Claim Billing/Encounter: Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Claim Billing or Encounter Response:

The Response Message Segment is situational for Claim Billing or Encounter response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). It is used when additional text information needs to be sent.

10.5.3.2.3 RESPONSE INSURANCE SEGMENT (CLAIM BILLING OR ENCOUNTER) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
301-C1	GROUP ID	Q	Claim Billing/Encounter: Required if needed to identify the actual cardholder or employer group, to identify appropriate group number, when available. Required to identify the actual group that was used when multiple group coverages exist. Note: This field may contain the Group ID echoed from the request. May contain the actual Group ID if unknown to the receiver.
524-FO	PLAN ID	Q	Claim Billing/Encounter: Required if needed to identify the actual plan parameters, benefit, or coverage criteria, when available. Required to identify the actual plan ID that was used when multiple group coverages exist. Required if needed to contain the actual plan ID if unknown to the receiver.
545-2F	NETWORK REIMBURSEMENT ID	Q	Claim Billing/Encounter: Required if needed to identify the network for the covered member. Required if needed to identify the actual Network Reimbursement ID, when applicable and/or available. Required to identify the actual Network Reimbursement ID that was used when multiple Network Reimbursement IDs exist.
C96-KR	PAYER/HEALTH PLAN ID COUNT	Q	Claim Billing/Encounter: Maximum Count of 3. Required if Payer/Health Plan ID (569-J8) is used.
568-J7	PAYER/HEALTH PLAN ID QUALIFIER	Q***R***	Claim Billing/Encounter: Required if Payer/Health Plan ID (569-J8) is used.
569-J8	PAYER/HEALTH PLAN ID	Q****R***	Claim Billing/Encounter: Required when identification of the Payer/Health Plan is necessary. Required when a Medicare Part D Contract ID applies to the response.
115-N5	MEDICAID ID NUMBER	N	Claim Billing/Encounter: Not used.
116-N6	MEDICAID AGENCY NUMBER	N	Claim Billing/Encounter: Not used.

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
302-C2	CARDHOLDER ID	Q	Claim Billing/Encounter: Required if the identification to be used in future transactions is different than what was submitted on the request.

Notes on Response Insurance Segment on a Claim Billing or Encounter Response:

The Response Insurance Segment is situational for Claim Billing or Encounter response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). It is used when coverage or reimbursement parameters or identifiers need to be sent.

**10.5.3.2.3.1 Response Insurance Segment (Subrogation
Standard Claim Billing or Encounter)
(Transmission Accepted/Transaction Rejected)**

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
115-N5	MEDICAID ID NUMBER	QM	Subrogation - Claim Billing/Encounter: Required to identify the member as uniquely known to Medicaid. Not used for other types of subrogation.
116-N6	MEDICAID AGENCY NUMBER	QM	Subrogation - Claim Billing/Encounter: Required to identify the Medicaid agency. Not used for other types of subrogation.

Notes on Response Insurance Segment on a Subrogation Standard Claim Billing or Encounter Response:

The rules above for a "Response Insurance Segment (Claim Billing or Encounter)" are to be followed for Subrogation. Specific fields that are used differently in Subrogation are noted in the table above.

10.5.3.2.4 RESPONSE PATIENT SEGMENT (CLAIM BILLING OR ENCOUNTER) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
618-RR	PATIENT ID COUNT	Q	Claim Billing/Encounter: Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.
331-CX	PATIENT ID QUALIFIER	Q***R***	Claim Billing/Encounter: Required if Patient ID (332-CY) is used.
332-CY	PATIENT ID	Q***R***	Claim Billing/Encounter: Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.
310-CA	PATIENT FIRST NAME	Q	Claim Billing/Encounter: Required if known.
311-CB	PATIENT LAST NAME	Q	Claim Billing/Encounter: Required if known.
304-C4	DATE OF BIRTH	Q	Claim Billing/Encounter: Required if known.

Notes on Response Patient Segment on a Claim Billing/Encounter Response:

The Response Patient Segment is situational for Claim Billing or Encounter transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected) when patient demographic information needs to be sent from the sender to the receiver.

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
C66-BA	HELP DESK BUSINESS UNIT TYPE	Q***R***	Claim Billing/Encounter: Required if Help Desk Contact Information Qualifier (C70-BF) is used.
C70-BF	HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Claim Billing/Encounter: Required if Help Desk Contact Information (C68-BC) is used.
C68-BC	HELP DESK CONTACT INFORMATION	Q***R***	Claim Billing/Encounter: Required if needed to provide help desk contact support information to the receiver.
C69-BD	HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Claim Billing/Encounter: Required if needed to provide an extension to the Help Desk Contact Information (C68-BC).
880-K5	TRANSACTION REFERENCE NUMBER	N	Claim Billing/Encounter: Not used.
993-A7	INTERNAL CONTROL NUMBER	N	Claim Billing/Encounter: Not used.
A28-ZR	ADJUDICATED PROGRAM TYPE	R	Claim Billing/Encounter: Required. The value of "UNKNOWN" is to be returned on a rejected response when the actual Adjudicated Program Type could not yet be determined. Also see section "Adjudicated Program Type (A28-ZR)" for appropriate use.
B04-BT	NEXT AVAILABLE FILL DATE	Q	Claim Billing/Encounter: Required if rejected for a refill too soon type error. To designate the earliest date in which the prescription fill can be processed.

Notes on Response Status Segment on a Claim Billing or Encounter Response:

The Response Status Segment is mandatory for a Claim Billing or Encounter response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). The Response Status Segment is sent from the sender to the receiver to identify the outcome of the request. Refer to the NCPDP *External Code List* for guidance on the use of reject codes.

10.5.3.2.6 RESPONSE CLAIM SEGMENT (CLAIM BILLING OR ENCOUNTER) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE CLAIM SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
455-EM	PRESCRIPTION/SERVICE REFERENCE NUMBER QUALIFIER	M	Claim Billing/Encounter: For Transaction Code of "B1", in the Response Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "1" (Rx Billing).
402-D2	PRESCRIPTION/SERVICE REFERENCE NUMBER	M	Claim Billing/Encounter: Significant digits on submission must be returned on response. See section "Standard Conventions", "Character Set Designation Truncation", "Numeric", "Numeric Truncation".
551-9F	FORMULARY ALTERNATIVE PRODUCT COUNT	Q	Claim Billing/Encounter: Maximum count of 6. Required if Formulary Alternative ID (553-AR) is used. Not used in payer-to-payer transactions.
E89-ZO	FORMULARY ALTERNATIVE EFFECTIVE DATE	Q***R***	Claim Billing/Encounter: Required when a future effective date applies to the formulary alternative product returned in Formulary Alternative ID (553-AR) or Formulary Alternative Description (556-AU) and can be communicated to the receiver. Not used in payer-to-payer transactions.
D42-PV	FORMULARY ALTERNATIVE PLAN BENEFIT TIER	Q***R***	Claim Billing/Encounter: Required if a product preference exists that needs to be communicated to the receiver.

F07-YL	DUR/DUE MAXIMUM DAILY DOSE UNIT OF MEASURE	Q***R***	Claim Billing/Encounter: Required when DUR/DUE conflict indicates a dosing threshold has been exceeded and maximum dose information is available.
F08-YJ	DUR/DUE MINIMUM DAILY DOSE QUANTITY	Q***R***	Claim Billing/Encounter: Required when DUR/DUE conflict indicates a dosing threshold has not been met and minimum dose information is available.
F09-YI	DUR/DUE MINIMUM DAILY DOSE UNIT OF MEASURE	Q***R***	Claim Billing/Encounter: Required when DUR/DUE conflict indicates a dosing threshold has not been met and minimum dose information is available.
544-FY	DUR/DUE FREE TEXT MESSAGE	Q***R***	Claim Billing/Encounter: Required if needed to supply additional information for the utilization conflict.

Notes on Response DUR/PPS Segment on a Claim Billing or Encounter Response:

The Response DUR/PPS Segment is situational for a Claim Billing or Encounter Response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). The segment is used to identify a drug utilization review or professional pharmacy service event, opportunity, or information.

The Response DUR/PPS Segment is not used in payer-to-payer transactions.

10.5.3.2.8 RESPONSE PRIOR AUTHORIZATION SEGMENT (CLAIM BILLING OR ENCOUNTER) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE PRIOR AUTHORIZATION SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
498-PR	PRIOR AUTHORIZATION PROCESSED DATE	N	Claim Billing/Encounter: Not used.
498-PS	PRIOR AUTHORIZATION EFFECTIVE DATE	N	Claim Billing/Encounter: Not used.
498-PT	PRIOR AUTHORIZATION EXPIRATION DATE	Q	Claim Billing/Encounter: Required when the prior authorization expiration date is known.

RESPONSE PRIOR AUTHORIZATION SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
498-RA	PRIOR AUTHORIZATION QUANTITY	N	Claim Billing/Encounter: Not used.
498-RB	PRIOR AUTHORIZATION DOLLARS AUTHORIZED	N	Claim Billing/Encounter: Not used.
498-PW	PRIOR AUTHORIZATION NUMBER OF REFILLS AUTHORIZED	N	Claim Billing/Encounter: Not used.
498-PX	PRIOR AUTHORIZATION QUANTITY ACCUMULATED	N	Claim Billing/Encounter: Not used.
498-PY	PRIOR AUTHORIZATION ID ASSIGNED	Q	Claim Billing/Encounter: Required when the receiver must submit this Prior Authorization ID in order to receive payment for the claim. (An example of a situation may include a Benefit Transition Period that allows for payment of claims, for a period of time that would normally reject.)

Notes on Response Prior Authorization Segment on a Claim Billing or Encounter Response:

The Response Prior Authorization Segment is situational for a Claim Billing or Encounter response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). It is used to relay the Prior Authorization ID Assigned (498-PY) which is returned when a Reject Code (511-FB) denotes that a prior authorization code needs to be submitted on the subsequent billing or when the Prior Authorization Expiration Date (498-PT) is known.

The Response Prior Authorization Segment is not used in payer-to-payer transactions.

10.5.3.2.9 RESPONSE OTHER PAYERS SEGMENT (CLAIM BILLING OR ENCOUNTER) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE OTHER PAYERS SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
355-NT	OTHER PAYER ID COUNT	M	Claim Billing/Encounter: Maximum count of 4.
338-5C	OTHER PAYER COVERAGE TYPE	M***R***	
D41-PQ	OTHER PAYER RELATIONSHIP TYPE	M***R***	
D50-P6	OTHER PAYER BENEFIT CLASSIFICATION	M***R***	
C47-9T	OTHER PAYER ADJUDICATED PROGRAM TYPE	M***R***	
339-6C	OTHER PAYER ID QUALIFIER	Q***R***	Claim Billing/Encounter: Required if Other Payer ID (340-7C) is used.
340-7C	OTHER PAYER ID	Q***R***	Claim Billing/Encounter: Required if other insurance Payer ID information is available. Required if any of the following are sent: - Other Payer Processor Control Number (991-MH) - Other Payer Cardholder ID (356-NU) - Other Payer Group ID (992-MJ)
991-MH	OTHER PAYER PROCESSOR CONTROL NUMBER	Q***R***	Claim Billing/Encounter: Required if other insurance Processor Control Number information is available.
356-NU	OTHER PAYER CARDHOLDER ID	Q***R***	Claim Billing/Encounter: Required if other insurance Cardholder ID information is available.
992-MJ	OTHER PAYER GROUP ID	Q***R***	Claim Billing/Encounter: Required if other insurance Group ID information is available.
142-UV	OTHER PAYER PERSON CODE	Q***R***	Claim Billing/Encounter: Required if needed to uniquely identify the family members within the Cardholder ID, as assigned by the other payer.
127-UB	OTHER PAYER HELP DESK TELEPHONE NUMBER	Q***R***	Claim Billing/Encounter: Required if needed to provide a support telephone number of the other payer to the receiver.
B23-7Q	OTHER PAYER HELP DESK TELEPHONE NUMBER EXTENSION	Q***R***	Claim Billing/Encounter: Required if needed to provide a support telephone number extension of the other payer to the receiver.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

RESPONSE OTHER PAYERS SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
143-UW	OTHER PAYER PATIENT RELATIONSHIP CODE	Q***R***	Claim Billing/Encounter: Required if needed to uniquely identify the relationship of the patient to the cardholder ID, as assigned by the other payer.
144-UX	OTHER PAYER BENEFIT EFFECTIVE DATE	Q***R***	Claim Billing/Encounter: Required when other coverage is known which will become effective after the Date of Service submitted. Other Payer Benefit Effective Date would not be returned for coverage that is current as of the claim date of service. This allows the receiver to identify other coverage that needs to be billed or stored for future use.
145-UY	OTHER PAYER BENEFIT TERMINATION DATE	Q***R***	Claim Billing/Encounter: Required when other coverage termination date is known which is after the Date of Service submitted. If the termination date is not known this field would not be returned.
D23-M5	OTHER PAYER NAME	Q***R***	Claim Billing/Encounter: Required if the data is available.

Notes on Response Other Payers Segment on a Claim Billing or Encounter Response:

The Response Other Payers Segment is situational for a Claim Billing or Encounter response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected) when other insurance information is available.

The following outlines different rejected claim scenarios and the use of the Response Other Payers Segment.

1. Non-Matched: If the identity of the patient cannot be validated and the Claim Billing or Encounter is rejected due to a non-match of field verification, then the Other Payer information is not sent.
2. COB Sequence: If the claim is rejected because it should be submitted to other payer(s) first, that Other Payer information must be sent, if available.
3. Change in 4RX (Change in Coverage): If the identity of the patient is verified and the Claim Billing or Encounter is rejected due to known alternate 4RX data required for claims processing, then the alternate 4RX data is returned as Other Payer information.
4. Plan Exclusion Alternate 4RX (Mutually Exclusive): If the claim is rejected due to plan benefit exclusions, then Other Payer information must be sent, if available.

10.5.3.2.10 RESPONSE OTHER RELATED BENEFIT DETAIL SEGMENT (CLAIM BILLING OR ENCOUNTER) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

111-AM	SEGMENT IDENTIFICATION	M	
B52-8R	RESPONSE INTERMEDIARY AUTHORIZATION COUNT	Q	Claim Billing/Encounter: Required if Response Intermediary Authorization Type ID is used. Maximum count of 9.
B53-8S	RESPONSE INTERMEDIARY AUTHORIZATION TYPE ID	Q***R***	Claim Billing/Encounter: Required if Response Intermediary Authorization ID is used.
B54-8T	RESPONSE INTERMEDIARY AUTHORIZATION ID	Q***R***	Claim Billing/Encounter: Required if the Intermediary determines an authorization identifier needs to be communicated to the receiver.
B51-8Q	INTERMEDIARY MESSAGE	Q***R***	Claim Billing/Encounter: Required if text is needed for clarification or detail.
C86-KC	INTERMEDIARY HELP DESK SUPPORT TYPE COUNT	M	Claim Billing/Encounter: Maximum count of 5. Used to qualify the number of occurrences of Intermediary Help Desk Support Type (C85-KB) that is included in the Response Intermediary Segment.
C85-KB	INTERMEDIARY HELP DESK SUPPORT TYPE	M***R***	
C81-G9	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE COUNT	R	Claim Billing/Encounter: Maximum count of 5. Used to qualify the number of occurrences of the Intermediary Help Desk Business Unit Type, Intermediary Help Desk Contact Information Qualifier, Intermediary Help Desk Contact Information and Intermediary Help Desk Contact Information Extension that is included in the Response Intermediary Segment. Required if Help Desk Business Unit Type (C80-G8) is used
C80-G8	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE	Q***R***	Claim Billing/Encounter: Required if Intermediary Help Desk Contact Information Qualifier (C84-KA) is used.
C84-KA	INTERMEDIARY HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Claim Billing/Encounter: Required if Help Desk Contact Information (C84-KA) is used.
C82-JP	INTERMEDIARY HELP DESK CONTACT INFORMATION	Q***R***	Claim Billing/Encounter: Required if needed to provide help desk contact support information to the receiver.
C83-JR	INTERMEDIARY HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Claim Billing/Encounter: Required if needed to provide an extension to the Help Desk Contact Information (C82-JP).

Notes on Response Intermediary Segment on a Claim Billing or Encounter Response:

The Response Intermediary Segment is situational for a Claim Billing or Encounter response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). The segment is used to support the authorization from an intermediary such as a Prescription Drug Monitoring Program (PDMP) or Risk Evaluation and Mitigation Strategy (REMS) program.

10.5.3.2.12 RESPONSE PROVIDER SEGMENT (CLAIM BILLING OR ENCOUNTER) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Claim Billing/Encounter: Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Claim Billing/Encounter:

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Claim Billing or Encounter Response:

The Response Provider Segment is situational for a Claim Billing or Encounter response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

10.5.4 TRANSMISSION REJECTED/TRANSACTION REJECTED**10.5.4.1 DIAGRAM FOR TRANSMISSION OF A CLAIM BILLING OR ENCOUNTER RESPONSE (TRANSMISSION REJECTED/TRANSACTION REJECTED)**

Claim Billing or Encounter transmission response Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected)

10.5.4.2 CLAIM BILLING OR ENCOUNTER RESPONSE SEGMENTS (TRANSMISSION REJECTED/TRANSACTION REJECTED)**10.5.4.2.1 RESPONSE HEADER SEGMENT (CLAIM BILLING OR ENCOUNTER) (TRANSMISSION REJECTED/TRANSACTION REJECTED)**

RESPONSE HEADER SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on a Claim Billing or Encounter Response:

The Response Header Segment is a mandatory, fixed length segment for Claim Billing or Encounter response when the Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The "Situation" column is not applicable.

If either the entire transmission or the Header is in error, the Header Response Status (501-F1) = "R" (Rejected). The transaction within the transmission must be rejected with an "R".

If the transaction rejects for detail errors, the Header Response Status (501-F1) = "A" (Accepted) and the Transaction Response Status (112-AN) will be "R".

10.5.4.2.2 RESPONSE MESSAGE SEGMENT (CLAIM BILLING OR ENCOUNTER) (TRANSMISSION REJECTED/TRANSACTION REJECTED)

11 PREDETERMINATION OF BENEFITS INFORMATION

The Predetermination of Benefits inquiry transaction is used by the Originator to request the following:

1. To determine if the patient is eligible for prescription coverage,
2. To determine if the submitted product is covered,
3. To identify the patient financial responsibility at that point in time, and
4. To potentially identify clinically relevant information.

The Transaction Code is "D1".

The Originator uses the Processor's response to communicate with the patient and determine if a subsequent prescription claim request is submitted. The Originator recognizes that the Processor's response is based upon the following:

1. Submitted information in the Predetermination of Benefits inquiry,
2. Processor plan parameters,
3. Date of Service, and
4. Patient's current prescription claim and financial profile at the processor.

The subsequent submission of the same Predetermination of Benefits Inquiry or a corresponding prescription claim request may result in a different response if any of the identified components (i.e., Submitted Data, Processor plan parameters, Date of Service, or Patient's current prescription and or financial profile) change between the period of time between the submission of a Predetermination of Benefits inquiry transaction and the associated Prescription Claim request.

Conversely, the Predetermination of Benefits transaction response is used by the Processor to communicate the following:

1. To identify if the patient is eligible for prescription coverage,
2. To identify if the submitted product is covered,
3. To identify the patient financial responsibility at that point in time, and
4. To potentially identify clinically relevant information that may influence the submission of a corresponding prescription claim request.

The Processor recognizes the Originator's inquiry is a "what if" transaction that may not result in the submission of a corresponding prescription claim request. The Reconciliation ID (B98-34) is not used for the request or any response for this transaction type.

The Predetermination of Benefits transaction does not result in payment or application to the patient's benefit.

The Predetermination of Benefits transaction is used on claim submission only. It is not valid for a service submission.

Each Predetermination of Benefits submission request contains one occurrence of claim data.

Depending upon the particular claim submission request, the Processor can provide one of the following general types of responses:

Benefit – This occurs when the Processor processes the claim, and returns to the Originator a snapshot of the patient's responsibility at this point in time.

Rejected – This occurs when the Processor has encountered an error in the transaction or processing.

There is no need for a duplicate response due to the nature of the Predetermination of Benefits transaction. Each submission of the transaction is processed with the response reflective of current information.

11.1 PREDETERMINATION OF BENEFITS REQUEST DIAGRAMS

For a Predetermination of Benefits the scenario defined includes a Predetermination of Benefits request from a Sender to a Receiver.

The Predetermination of Benefits transaction has no unique requirements for the segments.

12 SERVICE BILLING (PROFESSIONAL PHARMACY SERVICE) INFORMATION

These messages include:

- Service Billing (S1)
- Service Reversal (S2)
- Service Rebill (S3)

For Transaction Code of "S1" "S2" or "S3", in the Claim Segment or Response Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "2" (Service Billing).

If the Product/Service ID Qualifier (436-E1) is "06" (DUR/PPS), the DUR/PPS Segment is required.

Billings may be for professional services rendered. Services may be correlated with a dispensing event or may be separate and unrelated to any particular prescription. Professional pharmacy services may include but are not limited to blood pressure monitoring, taking a patient history for a new disease or diagnosis, referring patients to other health care providers and counseling and education beyond the simple act of describing a medication's use and side effects.

See section "Transaction Response Status", "Duplicate Transactions".

12.1 SERVICE BILLING

These transactions are used by the Originator to request payment from the Processor for a specific patient for services billed according to appropriate plan parameters. The Transaction Code is "S1".

Each service submission request contains one occurrence of claim/service data.

Depending upon the particular service submission request, the Processor must provide one of the following general types of responses:

Captured – This occurs when the Processor acknowledges receipt of the service, but is not making any judgment regarding eligibility of the patient or payment for the service at this time.

Duplicate of Captured – This occurs when the Processor has previously received the request and processed the transaction, but the response did not return to the Originator. The Duplicate response contains the same information as returned in the Captured original response.

Paid – This occurs when the Processor captures and processes the service, and returns to the Originator the dollar amounts allowed under the terms of the plan. The Paid response is not used in payer-to-payer transactions.

Duplicate of Paid – This occurs when the Processor has previously received the request and processed the transaction, but the response did not return to the Originator. The Duplicate response contains the same information as returned in the Paid original response. The Duplicate of Paid response is not used in payer-to-payer transactions.

Rejected – This occurs when the Processor has encountered an error in the transaction or processing.

12.2 SERVICE BILLING REQUEST DIAGRAMS

12.2.1 DIAGRAM FOR TRANSMISSION OF A SERVICE BILLING TRANSACTION

For a Service Billing the scenario defined includes a Service Billing from a Sender to a Receiver.

If the Product/Service ID Qualifier (436-E1) is "06" (DUR/PPS), the DUR/PPS Segment is required.

The Compound Segment and the Prior Authorization Segment are not used in Service Billing requests.

For Risk Evaluation and Mitigation Strategies (REMS) processing a Service Billing transaction should follow the same path as a Claim Billing transaction to ensure accurate reporting.

For Prescription Drug Monitoring Programs (PDMP) billing functions Service Billing is out of scope.

12.3 SERVICE BILLING REQUEST SEGMENTS

12.3.1 TRANSACTION HEADER SEGMENT (SERVICE BILLING)

TRANSACTION HEADER SEGMENT			MANDATORY SEGMENT
Field	Field Name	Mandatory or Situational	Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	For Transaction Code of "S1", in the Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "2" (Service Billing).
101-A1	IIN NUMBER	M	
104-A4	PROCESSOR CONTROL NUMBER	M	
109-A9	TRANSACTION COUNT	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	
110-AK	SOFTWARE VENDOR/CERTIFICATION ID	M	

Notes on Transaction Header Segment on a Service Billing Request:

The Transaction Header Segment is a mandatory, fixed length segment for a Service Billing request. The "Situation" column is not applicable.

12.3.2 INSURANCE SEGMENT (SERVICE BILLING)

INSURANCE SEGMENT			MANDATORY SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
302-C2	CARDHOLDER ID	M	
312-CC	CARDHOLDER FIRST NAME	Q	Service Billing: Required if necessary for state/federal/regulatory agency programs when the cardholder has a first name.
313-CD	CARDHOLDER LAST NAME	Q	Service Billing: Required if necessary for state/federal/regulatory agency programs.

INSURANCE SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
524-FO	PLAN ID	O	Service Billing: Optional.
309-C9	ELIGIBILITY CLARIFICATION CODE	Q	Service Billing: Required if needed for receiver inquiry validation and/or determination, when eligibility is not maintained at the dependent level. Required in special situations as defined by the code to clarify the eligibility of an individual, which may extend coverage.
301-C1	GROUP ID	Q	Service Billing: Required if necessary for state/federal/regulatory agency programs. Required if needed for pharmacy claim processing and payment.
303-C3	PERSON CODE	Q	Service Billing: Required if needed to uniquely identify the family members within the Cardholder ID.
306-C6	PATIENT RELATIONSHIP CODE	Q	Service Billing: Required if needed to uniquely identify the relationship of the Patient to the Cardholder ID.
359-2A	MEDIGAP ID	Q	Service Billing: Required, if known, when patient has Medigap coverage.
360-2B	MEDICAID INDICATOR	Q	Service Billing: Required, if known, when patient has Medicaid coverage.
361-2D	PROVIDER ACCEPT ASSIGNMENT INDICATOR	Q	Service Billing: Required if necessary for state/federal/regulatory agency programs.
115-N5	MEDICAID ID NUMBER	N	Service Billing: Not used.
116-N6	MEDICAID AGENCY NUMBER	N	Service Billing: Not used.

Notes on Insurance Segment on a Service Billing Request:

The Insurance Segment is mandatory for a Service Billing request.

12.3.3 PATIENT SEGMENT (SERVICE BILLING)

PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
618-RR	PATIENT ID COUNT	Q	Service Billing: Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.
331-CX	PATIENT ID QUALIFIER	Q***R***	Service Billing: Required if Patient ID (332-CY) is used.
332-CY	PATIENT ID	Q***R***	Service Billing: Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.
304-C4	DATE OF BIRTH	R	Service Billing: Required.
305-C5	PATIENT GENDER CODE	R	Service Billing: Required.
310-CA	PATIENT FIRST NAME	Q	Service Billing: Required when the patient has a first name.
E09-OC	PATIENT MIDDLE NAME	N	Service Billing: Not used
311-CB	PATIENT LAST NAME	R	Service Billing: Required.
E11-OE	PATIENT NAME SUFFIX	N	Service Billing: Not used
E10-OD	PATIENT NAME PREFIX	N	Service Billing: Not used
B08-7A	PATIENT STREET ADDRESS LINE 1	O	Service Billing: Optional.

PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
B09-7B	PATIENT STREET ADDRESS LINE 2	O	Service Billing: Optional. Use only when a second address line is needed and Patient Street Address Line 1 (B08-7A) has been used.
323-CN	PATIENT CITY ADDRESS	O	Service Billing: Optional.
324-CO	PATIENT STATE/PROVINCE ADDRESS	O	Service Billing: Optional.
325-CP	PATIENT ZIP/POSTAL CODE	O	Service Billing: Optional.
A43-1K	PATIENT COUNTRY CODE	Q	Service Billing: Required if country is not "US".
326-CQ	PATIENT TELEPHONE NUMBER	O	Service Billing: Optional.
307-C7	PLACE OF SERVICE	Q	Service Billing: Required if necessary for state/federal/regulatory agency programs. Otherwise, required when necessary to identify the Place of Service for non-self administered drugs.
333-CZ	EMPLOYER ID	Q	Service Billing: Required if "required by law" as defined in the HIPAA final Privacy regulations section 164.501 definitions (45 CFR Parts 160 and 164 Standards for Privacy of Individually Identifiable Health Information; Final Rule – Thursday, December 28, 2000, page 82803 and following, and Wednesday, August 14, 2002, page 53267 and following.) Required if needed for Workers' Compensation billing.
334-1C	SMOKER/NON-SMOKER CODE	N	Service Billing: Not used.
335-2C	PREGNANCY INDICATOR	Q	Service Billing: Required if pregnancy could result in different coverage, pricing, or patient financial responsibility. Required if "required by law" as defined in the HIPAA final Privacy regulations section 164.501 definitions (45 CFR Parts 160 and 164 Standards for Privacy of Individually Identifiable Health Information; Final Rule – Thursday, December 28, 2000, page 82803 and following, and Wednesday, August 14, 2002, page 53267 and following.)
350-HN	PATIENT E-MAIL ADDRESS	I	Service Billing: May be submitted for the receiver to relay patient health care communications via the Internet when provided by the patient. This field is informational only.
384-4X	PATIENT RESIDENCE	Q	Service Billing: Required if this field could result in different coverage, pricing, or patient financial responsibility.
A22-YR	PATIENT ID ASSOCIATED STATE/PROVINCE ADDRESS	N	Service Billing: Not used.
B38-1Y	PATIENT ID ASSOCIATED COUNTRY CODE	N	Service Billing: Not used.
A45-1R	VETERINARY USE INDICATOR	N	Service Billing: Not used.
E06-S8	SPECIES	Q	Service Billing: Not used for humans.

Notes on Patient Segment on a Service Billing Request:

The Patient Segment is situational for a Service Billing request. It is used when a receiver needs some of the patient demographic information to perform eligibility and service billing determination. The Patient Segment must be submitted when needed to differentiate between the patient and the cardholder. If the cardholder and the patient are the same, then the Patient Segment is not submitted unless additional information about the patient is needed to clarify the Service Billing determination. The Segment is mandatory if required under provider payer contract or mandatory on service billings where this information is necessary for adjudication of the service.

12.3.4 CLAIM SEGMENT (SERVICE BILLING)

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

- 154 -

CLAIM SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
455-EM	PRESCRIPTION/SERVICE REFERENCE NUMBER QUALIFIER	M	Service Billing: For Transaction Code of "S1", in the Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "2" (Service Billing).
402-D2	PRESCRIPTION/SERVICE REFERENCE NUMBER	M	Service Billing: See section "Standard Conventions", "Character Set Designation Truncation", "Numeric", "Numeric Truncation".
436-E1	PRODUCT/SERVICE ID QUALIFIER	M	Service Billing: If the Product/Service ID Qualifier (436-E1) = "06" (DUR/PPS), the Product/Service ID (407-D7) is zero. (Zero means "0".)
407-D7	PRODUCT/SERVICE ID	M	Service Billing: If the Product/Service ID Qualifier (436-E1) = "06" (DUR/PPS), the Product/Service ID (407-D7) is zero. (Zero means "0".) Populate the DUR/PPS segment as appropriate. If the Product/Service ID Qualifier (436-E1) = "07" (CPT-4), the Product Service ID (407-D7) is the actual CPT-4 value. If the Product/Service ID Qualifier (436-E1) = "09" (HCPCS), the Product Service ID (407-D7) is the actual HCPCS value. If the Product/Service ID Qualifier (436-E1) = "99" (Other), the Product Service ID (407-D7) is the business partner agreed value.
B98-34	RECONCILIATION ID	N	Service Billing: Not used.
456-EN	ASSOCIATED PRESCRIPTION/SERVICE REFERENCE NUMBER	Q	Service Billing: Required if needed to associate multiple prescriptions/services from the same sender to allow billing of the current prescription/service.
457-EP	ASSOCIATED PRESCRIPTION/SERVICE DATE	Q	Service Billing: Required if Associated Prescription/Service Reference Number (456-EN) is used. Required if needed to associate multiple prescriptions/services from the same sender to allow billing of the current prescription/service.
458-SE	PROCEDURE MODIFIER CODE COUNT	Q	Service Billing: Maximum count of 10. Required if Procedure Modifier Code (459-ER) is used.
459-ER	PROCEDURE MODIFIER CODE	Q***R***	Service Billing: Required if this field could result in different coverage, pricing, or patient financial responsibility. Occurs the number of times identified in Procedure Modifier Code Count (458-SE). Required to define a further level of specificity if the Product/Service ID (407-D7) indicated a Procedure Code was submitted.
442-E7	QUANTITY DISPENSED	Q	Service Billing: Required if value is greater than zero (0).
403-D3	FILL NUMBER	Q	Service Billing: Required if necessary for plan benefit administration.
405-D5	DAYS SUPPLY	Q	Service Billing: Required if necessary for plan benefit administration.
406-D6	COMPOUND CODE	N	Service Billing: Not used.
408-D8	DISPENSE AS WRITTEN (DAW)/PRODUCT SELECTION CODE	N	Service Billing: Not used.
414-DE	DATE PRESCRIPTION WRITTEN	Q	Service Billing: Required if necessary for plan benefit administration.
415-DF	NUMBER OF REFILLS AUTHORIZED	Q	Service Billing: Required if necessary for plan benefit administration.

PRICING SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
			Required if needed to calculate Percentage Tax Amount Paid (559-AX).
426-DQ	USUAL AND CUSTOMARY CHARGE	Q	Service Billing: Required if needed per trading partner agreement.
430-DU	GROSS AMOUNT DUE	R	Service Billing: Required. See Pricing Formula for fields used in calculation.
423-DN	BASIS OF COST DETERMINATION	N	Service Billing: Not used.
D14-KX	SUBROGATION AMOUNT REQUESTED	N	Service Billing: Not used.

Notes on Pricing Segment on a Service Billing Request:

The Pricing Segment is mandatory for a Service Billing request. The Pricing Segment defines dollar amounts for a Service Billing.

See the pricing formulae.

It is highly recommended that whenever possible, the individual dollar fields are requested of the sender by the receiver. On the response, the sender should return the individual payment response fields to allow the receiver to reconcile against the requested payment fields. It is recommended that for the dollar fields, if the field is not required or situational in the calculation, that the dollar fields are not sent.

See section "Pricing Guidelines".

12.3.6 PHARMACY PROVIDER SEGMENT (SERVICE BILLING)

PHARMACY PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
465-EY	PROVIDER ID QUALIFIER	Q	Service Billing: Required if Provider ID (444-E9) is used.
444-E9	PROVIDER ID	Q	Service Billing: Required if necessary for state/federal/regulatory agency programs. Required if necessary to determine if provider is credentialed to perform this service. Required if needed for reconciliation of encounter-reported data or encounter reporting.
B96-4A	PROVIDER FIRST NAME	Q	Service Billing: For Workers' Compensation only. The provider responsible for the dispensing of the prescription as required by state regulations.
B97-4M	PROVIDER LAST NAME	Q	Service Billing: For Workers' Compensation only. The provider responsible for the dispensing of the prescription as required by state regulations.

Notes on Pharmacy Provider Segment on a Service Billing Request:

The Pharmacy Provider Segment is situational for a Service Billing request if required under provider payer contract or situational on service billings where this information is necessary for adjudication of the service.

12.3.7 PRESCRIBER SEGMENT (SERVICE BILLING)

COORDINATION OF BENEFITS/OTHER PAYMENTS SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Required if identification of the Other Payer Date is necessary for service billing adjudication.
993-A7	INTERNAL CONTROL NUMBER	Q***R***	Service Billing: Required when used for payer-to-payer coordination of benefits to track the claim without regard to the "Service Provider ID, Prescription Number, & Date of Service".
341-HB	OTHER PAYER AMOUNT PAID COUNT	Q	Service Billing: Maximum count of 9. Required if Other Payer Amount Paid Qualifier (342-HC) is used.
342-HC	OTHER PAYER AMOUNT PAID QUALIFIER	Q***R***	Service Billing: Required if Other Payer Amount Paid (431-DV) is used.
431-DV	OTHER PAYER AMOUNT PAID	Q***R***	Service Billing: Required if other payer has approved payment for some/all of the billing. Zero (0) is a valid value. Not used for patient financial responsibility only billing. Not used for non-governmental agency programs if Other Payer-Patient Responsibility Amount (352-NQ) is submitted.
D51-P7	OTHER PAYER PERCENTAGE TAX EXEMPT INDICATOR	Q	Service Billing: Required if the other payer has reported a valid value as Percentage Tax Exempt Indicator (557-AV).
D53-P9	OTHER PAYER REGULATORY FEE TYPE COUNT	Q	Service Billing: Maximum count of 3. Required if Other Payer Regulatory Fee Type Code (D63-RN) is used.
D63-RN	OTHER PAYER REGULATORY FEE TYPE CODE	Q***R***	Service Billing: Required if Other Payer Regulatory Fee Exempt Indicator (D52-P8) is used.
D52-P8	OTHER PAYER REGULATORY FEE EXEMPT INDICATOR	Q***R***	Service Billing: Required if other payer has reported a valid value as Regulatory Fee Exempt Indicator (D62-RM).
471-5E	OTHER PAYER REJECT COUNT	Q	Service Billing: Maximum count of 5. Required if Other Payer Reject Code (472-6E) is used.
472-6E	OTHER PAYER REJECT CODE	Q***R***	Service Billing: Required when the other payer has denied the payment for the billing. Note: This field must only contain the NCPDP Reject Code (511-FB) values.
353-NR	OTHER PAYER-PATIENT RESPONSIBILITY AMOUNT COUNT	Q	Service Billing: Maximum count of 25. Required if Other Payer-Patient Responsibility Amount Qualifier (351-NP) is used. Note: The occurrences are dependent upon the number of component parts returned from a previous payer.
351-NP	OTHER PAYER-PATIENT RESPONSIBILITY AMOUNT QUALIFIER	Q***R***	Service Billing: Required if Other Payer-Patient Responsibility Amount (352-NQ) is used.
352-NQ	OTHER PAYER-PATIENT RESPONSIBILITY AMOUNT	Q***R***	Service Billing: Required if necessary for patient financial responsibility only billing. Required if necessary for state/federal/regulatory agency programs. Not used for non-governmental agency programs if Other Payer Amount Paid (431-DV) is submitted.
C50-9W	BENEFIT STAGE INDICATOR COUNT	Q	Service Billing: Maximum count of 4.

COORDINATION OF BENEFITS/OTHER PAYMENTS SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
			Required if Benefit Stage Indicator(s) (C51-9X) are submitted.
C51-9X	BENEFIT STAGE INDICATOR	Q***R***	Service Billing: As required by COB payer. Must only have one value per iteration - value must not be repeated.

Notes on Coordination of Benefits/Other Payments Segment on a Service Billing Request:

The Coordination of Benefits/Other Payments Segment is not used for a Service Billing request to a primary payer.

The Coordination of Benefits/Other Payments Segment is required for a Service Billing request to a coordination of benefit payer.

It is used by downstream payers to access claim adjudication results (financial or reject code values) from previous payers to determine their service billing results. This may be in the case of primary, secondary, tertiary et cetera health plan coverage.

The Coordination of Benefits/Other Payments Segment is also used by a payer to uniquely identify a claim or encounter in case of duplicate processing. For example, the same patient may have multiple prescription benefit plans from the same processor where the processor is the primary *and* secondary payer, or primary *and* tertiary, or secondary *and* tertiary payer, etc. The downstream payer uses the duplicate claim logic fields, including the Other Payer Coverage Type (338-5C) to differentiate which claim or encounter to process. See section “*Transaction Response Status*”, “*Duplicate Transactions*”.

Note, the Other Payer Coverage Type (338-5C) occurrences do not have to appear in sequential order (primary, secondary, tertiary).

The Other Payer Reconciliation ID (C49-9V) would not be reported when the COB occurrence is reporting a rejected response from that previous payer, represented by the values submitted in the Other Payer Reject Code (472-6E) field.

See section “[Other Coverage Code \(308-C8\)](#)”.

Notes on Response Header Segment on a Service Billing Response:

The Response Header Segment is a mandatory, fixed length segment for Service Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). The "Situation" column is not applicable.

12.4.1.2.2 RESPONSE MESSAGE SEGMENT (SERVICE BILLING) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE MESSAGE SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Service Billing: Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Service Billing Response:

The Response Message Segment is situational for Service Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). It is used when additional text information needs to be sent.

12.4.1.2.3 RESPONSE INSURANCE SEGMENT (SERVICE BILLING) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE INSURANCE SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
301-C1	GROUP ID	Q	Service Billing: Required if needed to identify the actual cardholder or employer group, to identify appropriate group number, when available. Required to identify the actual group that was used when multiple group coverages exist. Note: This field may contain the Group ID echoed from the request. May contain the actual Group ID if unknown to the receiver.
524-FO	PLAN ID	Q	Service Billing: Required if needed to identify the actual plan parameters, benefit, or coverage criteria, when available. Required to identify the actual plan ID that was used when multiple group coverages exist. Required if needed to contain the actual plan ID if unknown to the receiver.
545-2F	NETWORK REIMBURSEMENT ID	Q	Service Billing: Required if needed to identify the network for the covered member. Required if needed to identify the actual Network Reimbursement ID, when applicable and/or available. Required to identify the actual Network Reimbursement ID that was used when multiple Network Reimbursement IDs exist.
C96-KR	PAYER/HEALTH PLAN ID COUNT	Q	Service Billing: Maximum Count of 3. Required if Payer/Health Plan ID (569-J8) is used.
568-J7	PAYER/HEALTH PLAN ID QUALIFIER	Q***R***	Service Billing: Required if Payer/Health Plan ID (569-J8) is used.
569-J8	PAYER/HEALTH PLAN ID	Q****R***	Service Billing: Required when identification of the Payer/Health Plan is necessary. Required when a Medicare Part D Contract ID applies to the response.
115-N5	MEDICAID ID NUMBER	N	Service Billing:

Version F6

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Not used.
116-N6	MEDICAID AGENCY NUMBER	N	Service Billing: Not used.
302-C2	CARDHOLDER ID	Q	Service Billing: Required if the identification to be used in future transactions is different than what was submitted on the request.

Notes on Response Insurance Segment on a Service Billing Response:

The Response Insurance Segment is situational for Service Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). It is used when coverage or reimbursement parameters or identifiers need to be sent from the sender to the receiver.

12.4.1.2.4 RESPONSE PATIENT SEGMENT (SERVICE BILLING) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
618-RR	PATIENT ID COUNT	Q	Service Billing: Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.
331-CX	PATIENT ID QUALIFIER	Q***R***	Service Billing: Required if Patient ID (332-CY) is used.
332-CY	PATIENT ID	Q***R***	Service Billing: Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.
310-CA	PATIENT FIRST NAME	Q	Service Billing: Required if known.
311-CB	PATIENT LAST NAME	Q	Service Billing: Required if known.
304-C4	DATE OF BIRTH	Q	Service Billing: Required if known.

Notes on Response Patient Segment on a Service Billing Response:

The Response Patient Segment is situational for Service Billing transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid) when patient demographic information needs to be sent from the sender to the receiver.

12.4.1.2.5 RESPONSE STATUS SEGMENT (SERVICE BILLING) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Service Billing: Required if needed to identify the transaction.
B98-34	RECONCILIATION ID	R	Service Billing: Paid "P" response: This is a unique processor assigned value that must be provided on a "P" response. See section "RESPONSE STATUS SEGMENT / RECONCILIATION ID". Duplicate of Paid "D" response: The Reconciliation ID returned on a "D" response must be that of the transaction found by processor that is resulting in the Duplicate response. See section "DUPLICATE TRANSACTIONS".
510-FA	REJECT COUNT	N	Service Billing: Not used.

349-HM	BASIS OF CALCULATION—PERCENTAGE TAX	N	Service Billing: Not used.
512-FC	ACCUMULATED DEDUCTIBLE AMOUNT	I	Service Billing: Provided for Informational purposes only.
513-FD	REMAINING DEDUCTIBLE AMOUNT	I	Service Billing: Provided for Informational purposes only.
514-FE	REMAINING BENEFIT AMOUNT	I	Service Billing: Provided for Informational purposes only. The Remaining Benefit Amount must not be returned with zeroes unless there are no benefit dollars remaining. The default value of 999999999 from previous versions must not be used as a default in this field.
128-UC	SPENDING ACCOUNT AMOUNT REMAINING	I	Service Billing: This dollar amount will be provided, if known, to the receiver when the transaction had spending account dollars reported as part of the patient pay amount. This field is informational only. It is reported back to the provider and the patient the amount remaining on the spending account after the current claim updated the spending account.
575-EQ	PATIENT PERCENTAGE TAX AMOUNT	Q	Service Billing: Required when Percentage Tax Amount Paid (559-AX) is populated and the benefit is set up to directly pass on a percentage tax obligation or portion thereof to the patient.
D65-RS	PATIENT REGULATORY FEE AMOUNT	Q	Service Billing: Required when the Regulatory Fee Amount Paid (558-AW) is populated and the benefit is set up to directly pass on a regulatory fee obligation or portion thereof to the patient.
577-G3	ESTIMATED GENERIC SAVINGS	N	Service Billing: Not used.
148-U8	INGREDIENT COST CONTRACTED/REIMBURSABLE AMOUNT	N	Service Billing: Not used.
149-U9	DISPENSING FEE CONTRACTED/REIMBURSABLE AMOUNT	N	Service Billing: Not used.
B33-6G	PROFESSIONAL SERVICE FEE CONTRACTED/REIMBURSABLE AMOUNT	I	Service Billing: Required for payment response to service billings when Basis of Reimbursement Determination (522-FM) is "14" (Patient Responsibility Amount) or "15" (Patient Pay Amount) unless prohibited by state/federal/regulatory agency. This field is informational only.

Notes on Response Pricing Segment on a Service Billing Response:

The Response Pricing Segment is mandatory for a Service Billing Response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) is "P" (Paid) or "D" (Duplicate of Paid).

It is highly recommended that whenever possible, the individual dollar fields are returned in the response. On the response the sender should return the individual payment response fields to allow the receiver to reconcile against the requested payment fields.

See section "Pricing Guidelines".

F09-YI	DUR/DUE MINIMUM DAILY DOSE UNIT OF MEASURE	Q***R***	Service Billing: Required when DUR/DUE conflict indicates a dosing threshold has not been met and minimum dose information is available.
544-FY	DUR/DUE FREE TEXT MESSAGE	Q***R***	Service Billing: Required if needed to supply additional information for the service.

Notes on Response DUR/PPS Segment on a Service Billing Response:

The Response DUR/PPS Segment is situational for a Service Billing Response when the Header Response Status (501-F1) is "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). This would be used when a processor identifies an additional professional pharmacy service billing opportunity.

12.4.1.2.9 RESPONSE PRIOR AUTHORIZATION SEGMENT (SERVICE BILLING) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE PRIOR AUTHORIZATION SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
498-PR	PRIOR AUTHORIZATION PROCESSED DATE	N	Service Billing: Not used.
498-PS	PRIOR AUTHORIZATION EFFECTIVE DATE	N	Service Billing: Not used.
498-PT	PRIOR AUTHORIZATION EXPIRATION DATE	Q	Service Billing: Required when the prior authorization expiration date is known.
498-RA	PRIOR AUTHORIZATION QUANTITY	N	Service Billing: Not used.
498-RB	PRIOR AUTHORIZATION DOLLARS AUTHORIZED	N	Service Billing: Not used.
498-PW	PRIOR AUTHORIZATION NUMBER OF REFILLS AUTHORIZED	N	Service Billing: Not used.
498-PX	PRIOR AUTHORIZATION QUANTITY ACCUMULATED	N	Service Billing: Not used.
498-PY	PRIOR AUTHORIZATION ID ASSIGNED	N	Service Billing: Not used.

Notes on Response Prior Authorization Segment on a Service Billing Response:

The Response Prior Authorization Segment is situational for a Service Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). It is used to relay the Prior Authorization Expiration Date (498-PT).

12.4.1.2.10 RESPONSE OTHER PAYERS SEGMENT (SERVICE BILLING) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

Version F6

January 2020

OFFICIAL RELEASE

RESPONSE INTERMEDIARY SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
C82-JP	INTERMEDIARY HELP DESK CONTACT INFORMATION	Q***R***	Service Billing: Required if needed to provide help desk contact support information to the receiver.
C83-JR	INTERMEDIARY HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Service Billing: Required if needed to provide an extension to the Help Desk Contact Information (C82-JP).

Notes on Response Intermediary Segment on a Service Billing Response:

The Response Intermediary Segment is situational for a Service Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). The segment is used to support the authorization from an intermediary such as a Prescription Drug Monitoring Program (PDMP) or Risk Evaluation and Mitigation Strategy (REMS) program.

12.4.1.2.13 RESPONSE PROVIDER SEGMENT (SERVICE BILLING) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Service Billing: Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Service Billing: Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Service Billing Response:

The Response Provider Segment is situational for a Service Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

12.4.2 TRANSMISSION ACCEPTED/TRANSACTION CAPTURED**12.4.2.1 DIAGRAM FOR TRANSMISSION OF A SERVICE BILLING RESPONSE (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)**

Service Billing transmission response Header Response Status (501-F1) of "A" (Accepted)
and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured)

The Response Pricing Segment is not used in payer-to-payer transactions. Therefore, in this case, there are no situational transaction-level segments.

See section "Transaction Response Status", "Duplicate Transactions" for the handling of a duplicate transaction.

12.4.2.2 SERVICE BILLING RESPONSE SEGMENTS (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

12.4.2.2.1 RESPONSE HEADER SEGMENT (SERVICE BILLING) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE HEADER SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	For Transaction Code of "S1", in the Response Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "2" (Service Billing).
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on a Service Billing Response:

The Response Header Segment is a mandatory, fixed length segment for Service Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). The "Situation" column is not applicable.

12.4.2.2.2 RESPONSE MESSAGE SEGMENT (SERVICE BILLING) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE MESSAGE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Service Billing: Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Service Billing Response:

The Response Message Segment is situational for Service Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). It is used when additional text information needs to be sent.

12.4.2.2.3 RESPONSE INSURANCE SEGMENT (SERVICE BILLING) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
301-C1	GROUP ID	Q	Service Billing: Required if needed to identify the actual cardholder or employer group, to identify appropriate group number, when available. Required to identify the actual group that was used when multiple group coverages exist. Note: This field may contain the Group ID echoed from the request. May contain the actual Group ID if unknown to the receiver.
524-FO	PLAN ID	Q	Service Billing: Required if needed to identify the actual plan parameters, benefit, or coverage criteria, when available.

RESPONSE PRICING SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
507-F7	DISPENSING FEE PAID	N	Service Billing: Not used.
557-AV	PERCENTAGE TAX EXEMPT INDICATOR	Q	Service Billing: Required if percentage tax exemption applies to the claim.
D60-RK	REGULATORY FEE COUNT	Q	Service Billing: Max count of 3 Required if Regulatory Fee Type Code (D61-RL) is used.
D61-RL	REGULATORY FEE TYPE CODE	Q***R***	Service Billing: Required if Regulatory Fee Amount Paid (558-AW) or Regulatory Fee Exempt Indicator (D62-RM) is used.
D62-RM	REGULATORY FEE EXEMPT INDICATOR	Q***R***	Service Billing: Required if regulatory fee exemption applies to the claim.
558-AW	REGULATORY FEE AMOUNT PAID	Q***R***	Service Billing: Required if Regulatory Fee Amount Submitted (481-HA) is greater than zero (0) or if Regulatory Fee Amount Paid (558-AW) is used to arrive at the estimated reimbursement. Zero (0) value is valid. If reimbursement is not estimated, this field contains the submitted value.
559-AX	PERCENTAGE TAX AMOUNT PAID	Q	Service Billing: Required if Percentage Tax Amount Submitted (482-GE) is greater than zero (0) or if Percentage Tax Amount Paid (559-AX) is used to arrive at the estimated reimbursement. Zero (0) value is valid. If reimbursement is not estimated, this field contains the submitted value. Required if Percentage Tax Rate Paid (560-AY) and Percentage Tax Basis Paid (561-AZ) are used.
560-AY	PERCENTAGE TAX RATE PAID	Q	Service Billing: Required if Percentage Tax Amount Paid (559-AX) is greater than zero (0).
561-AZ	PERCENTAGE TAX BASIS PAID	Q	Service Billing: Required if this value is used to arrive at the estimated reimbursement. If reimbursement is not estimated, this field contains the submitted value. Required if Percentage Tax Amount Submitted (482-GE) is greater than zero (0). Zero (0) is a valid value. Required if Percentage Tax Rate Paid (560-AY) and Percentage Tax Basis Paid (561-AZ) are used.
521-FL	INCENTIVE AMOUNT PAID	N	Service Billing: Not used.
562-J1	PROFESSIONAL SERVICE FEE PAID	R	Service Billing: Required.
563-J2	OTHER AMOUNT PAID COUNT	Q	Service Billing: Maximum count of 3. Required if Other Amount Paid (565-J4) is used.
564-J3	OTHER AMOUNT PAID QUALIFIER	Q***R***	Service Billing: Required if Other Amount Paid (565-J4) is used.
565-J4	OTHER AMOUNT PAID	Q***R***	Service Billing: Required if this value is used to arrive at the estimated reimbursement. If reimbursement is not estimated, this field contains the submitted value. Required if Other Amount Claimed Submitted (480-H9) is greater than zero (0). Zero (0) is a valid value. Must respond to each occurrence submitted.
566-J5	OTHER PAYER AMOUNT RECOGNIZED	Q	Service Billing: Required if Other Payer Amount Paid (431-DV) is greater than zero (0) or if this field is used to arrive at the estimated reimbursement. Zero (0) value is valid.

RESPONSE PRICING SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			If reimbursement is not estimated, this field contains the submitted value.
522-FM	BASIS OF REIMBURSEMENT DETERMINATION	N	Service Billing: Not used.
C50-9W	BENEFIT STAGE INDICATOR COUNT	N	Service Billing: Not Used.
C51-9X	BENEFIT STAGE INDICATOR	N***R***	Service Billing Not Used
346-HH	BASIS OF CALCULATION—DISPENSING FEE	N	Service Billing: Not used.
347-HJ	BASIS OF CALCULATION—COPAY	N	Service Billing: Not used.
573-4V	BASIS OF CALCULATION—COINSURANCE	N	Service Billing: Not used.
348-HK	BASIS OF CALCULATION—REGULATORY FEE	N	Service Billing: Not used.
349-HM	BASIS OF CALCULATION—PERCENTAGE TAX	N	Service Billing: Not used.
512-FC	ACCUMULATED DEDUCTIBLE AMOUNT	N	Service Billing: Not used.
513-FD	REMAINING DEDUCTIBLE AMOUNT	N	Service Billing: Not used.
514-FE	REMAINING BENEFIT AMOUNT	N	Service Billing: Not used.
128-UC	SPENDING ACCOUNT AMOUNT REMAINING	N	Service Billing: Not used.
575-EQ	PATIENT PERCENTAGE TAX AMOUNT	Q	Service Billing: Required when Percentage Tax Amount Paid (559-AX) is populated and the benefit is set up to directly pass on a percentage tax obligation or portion thereof to the patient.
D65-RS	PATIENT REGULATORY FEE AMOUNT	Q	Service Billing: Required when the Regulatory Fee Amount Paid (558-AW) is populated and the benefit is set up to directly pass on a regulatory fee obligation or portion thereof to the patient.
577-G3	ESTIMATED GENERIC SAVINGS	N	Service Billing: Not used.
148-U8	INGREDIENT COST CONTRACTED/REIMBURSABLE AMOUNT	N	Service Billing: Not used.
149-U9	DISPENSING FEE CONTRACTED/REIMBURSABLE AMOUNT	N	Service Billing: Not used.
B33-6G	PROFESSIONAL SERVICE FEE CONTRACTED/REIMBURSABLE AMOUNT	N	Service Billing: Not used.

Notes on Response Pricing Segment on a Service Billing Response:

The Response Pricing Segment is situational for a Service Billing Response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) is "C" (Captured) or "Q" (Duplicate of Captured).

The Response Pricing Segment is not used in payer-to-payer transactions.

All dollar fields except Patient Pay Amount (505-F5) are estimated amounts. If actual amounts are returned on fields other than Patient Pay Amount (505-F5), the "P" (Paid) response must be used.

If the Transaction Response Status (112-AN) = C (Captured) or Q (Duplicate of Captured), dollar fields should be supplied in the response.

- If the response is a "true" Capture (i.e. replacement of batch billing, with no edits or pricing), then corresponding response fields should be populated with values as submitted. *Ideally, the processor should provide "real" patient financial responsibility values on a Capture. If this is not possible, the provider must **know** (by trading partner agreement) the patient financial responsibility to charge and factor that into their system so collection occurs.*
- If the response is captured by an Intermediary who can provide better pricing criteria, the corresponding response fields should be populated with the *probable* values and those values used to determine estimated pricing as noted above. Since the claim has **not** been fully adjudicated, this should remain a capture response.

It is highly recommended that whenever possible, the individual dollar fields are returned in the response. On the response the sender should return the individual payment response fields to allow the receiver to reconcile against the requested payment fields.

See section "Pricing Guidelines".

Notes on Response Other Related Benefit Detail Segment on a Service Billing Response: The Response Other Related Benefit Detail Segment is situational for a Service Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). Information will be returned when the Date of Service (401-D1) is in an active period for any of the records above (ESRD, Hospice, Institutional, Disability, or LIS or when other benefit information is available).

12.4.2.2.10 RESPONSE INTERMEDIARY SEGMENT (SERVICE BILLING) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE INTERMEDIARY SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
B52-8R	RESPONSE INTERMEDIARY AUTHORIZATION COUNT	Q	Service Billing: Required if Response Intermediary Authorization Type ID is used. Maximum count of 9.
B53-8S	RESPONSE INTERMEDIARY AUTHORIZATION TYPE ID	Q***R***	Service Billing: Required if Response Intermediary Authorization ID is used.
B54-8T	RESPONSE INTERMEDIARY AUTHORIZATION ID	Q***R***	Service Billing: Required if the Intermediary determines an authorization identifier needs to be communicated to the receiver.
B51-8Q	INTERMEDIARY MESSAGE	Q***R***	Service Billing: Required if text is needed for clarification or detail.
C86-KC	INTERMEDIARY HELP DESK SUPPORT TYPE COUNT	M	Service Billing: Maximum count of 5. Used to qualify the number of occurrences of Intermediary Help Desk Support Type (C85-KB) that is included in the Response Intermediary Segment.
C85-KB	INTERMEDIARY HELP DESK SUPPORT TYPE	M***R***	
C81-G9	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE COUNT	R	Service Billing: Maximum count of 5. Used to qualify the number of occurrences of the Intermediary Help Desk Business Unit Type, Intermediary Help Desk Contact Information Qualifier, Intermediary Help Desk Contact Information and Intermediary Help Desk Contact Information Extension that is included in the Response Intermediary Segment. Required if Help Desk Business Unit Type (C80-G8) is used

RESPONSE INTERMEDIARY SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
C80-G8	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE	Q***R***	Service Billing: Required if Intermediary Help Desk Contact Information Qualifier (C84-KA) is used.
C84-KA	INTERMEDIARY HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Service Billing: Required if Help Desk Contact Information (C84-KA) is used.
C82-JP	INTERMEDIARY HELP DESK CONTACT INFORMATION	Q***R***	Service Billing: Required if needed to provide help desk contact support information to the receiver.
C83-JR	INTERMEDIARY HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Service Billing: Required if needed to provide an extension to the Help Desk Contact Information (C82-JP).

Notes on Response Intermediary Segment on a Service Billing Response:

The Response Intermediary Segment is situational for a Service Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). The segment is used to support the authorization from an intermediary such as a Prescription Drug Monitoring Program (PDMP) or Risk Evaluation and Mitigation Strategy (REMS) program.

12.4.2.2.11 RESPONSE PROVIDER SEGMENT (SERVICE BILLING) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Service Billing: Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Service Billing: Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Service Billing Response:

The Response Provider Segment is situational for a Service Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

12.4.3 TRANSMISSION ACCEPTED/TRANSACTION REJECTED**12.4.3.1 DIAGRAM FOR TRANSMISSION OF A SERVICE BILLING RESPONSE (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)**

Service Billing transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected)

The Response Prior Authorization Segment is not used in payer-to-payer transactions. Therefore, in this case, there are no situational transaction-level segments.

12.4.3.2 SERVICE BILLING RESPONSE SEGMENTS (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)**12.4.3.2.1 RESPONSE HEADER SEGMENT (SERVICE BILLING) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)**

RESPONSE HEADER SEGMENT			MANDATORY SEGMENT
Field	Field Name	Mandatory or Situational	Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	For Transaction Code of "S1", in the Response Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "2" (Service Billing).
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on a Service Billing Response:

The Response Header Segment is a mandatory, fixed length segment for Service Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). The "Situation" column is not applicable.

12.4.3.2.2 RESPONSE MESSAGE SEGMENT (SERVICE BILLING) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE MESSAGE SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Service Billing: Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Service Billing Response:

The Response Message Segment is situational for Service Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). It is used when additional text information needs to be sent.

12.4.3.2.3 RESPONSE INSURANCE SEGMENT (SERVICE BILLING) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE INSURANCE SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
301-C1	GROUP ID	Q	Service Billing: Required if needed to identify the actual cardholder or employer group, to identify appropriate group number, when available.

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Required to identify the actual group that was used when multiple group coverages exist. Note: This field may contain the Group ID echoed from the request. May contain the actual Group ID if unknown to the receiver.
524-FO	PLAN ID	Q	Service Billing: Required if needed to identify the actual plan parameters, benefit, or coverage criteria, when available. Required to identify the actual plan ID that was used when multiple group coverages exist. Required if needed to contain the actual plan ID if unknown to the receiver.
545-2F	NETWORK REIMBURSEMENT ID	Q	Service Billing: Required if needed to identify the network for the covered member. Required if needed to identify the actual Network Reimbursement ID, when applicable and/or available. Required to identify the actual Network Reimbursement ID that was used when multiple Network Reimbursement IDs exist.
C96-KR	PAYER/HEALTH PLAN ID COUNT	Q	Service Billing: Maximum Count of 3. Required if Payer/Health Plan ID (569-J8) is used.
568-J7	PAYER/HEALTH PLAN ID QUALIFIER	Q***R***	Service Billing: Required if Payer/Health Plan ID (569-J8) is used.
569-J8	PAYER/HEALTH PLAN ID	Q***R***	Service Billing: Required when identification of the Payer/Health Plan is necessary. Required when a Medicare Part D Contract ID applies to the response.
115-N5	MEDICAID ID NUMBER	N	Service Billing: Not used.
116-N6	MEDICAID AGENCY NUMBER	N	Service Billing: Not used.
302-C2	CARDHOLDER ID	Q	Service Billing: Required if the identification to be used in future transactions is different than what was submitted on the request.

Notes on Response Insurance Segment on a Service Billing Response:

The Response Insurance Segment is situational for Service Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). It is used when coverage or reimbursement parameters or identifiers need to be sent from the sender to the receiver.

12.4.3.2.4 RESPONSE PATIENT SEGMENT (SERVICE BILLING) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
618-RR	PATIENT ID COUNT	Q	Service Billing: Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.
331-CX	PATIENT ID QUALIFIER	Q***R***	Service Billing: Required if Patient ID (332-CY) is used.
332-CY	PATIENT ID	Q***R***	Service Billing: Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.
310-CA	PATIENT FIRST NAME	Q	Service Billing:

RESPONSE PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Required if known.
311-CB	PATIENT LAST NAME	Q	Service Billing: Required if known.
304-C4	DATE OF BIRTH	Q	Service Billing: Required if known.

Notes on Response Patient Segment on a Service Billing Response:

The Response Patient Segment is situational for Service Billing transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected) when patient demographic information needs to be sent from the sender to the receiver.

12.4.3.2.5 RESPONSE STATUS SEGMENT (SERVICE BILLING) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Service Billing: Required if needed to identify the transaction.
B98-34	RECONCILIATION ID	N	Service Billing: Not used.
510-FA	REJECT COUNT	R	Service Billing: Maximum count of 5. Required.
511-FB	REJECT CODE	R***R***	Service Billing: Required.
546-4F	REJECT FIELD OCCURRENCE INDICATOR	Q***R***	Service Billing: Required if a repeating field is in error, to identify repeating field occurrence. This field must be sent when relaying error information about a repeating field or set. Note, if the Reject Code is not denoting a repeating field or set, the Reject Field Occurrence Indicator must not be sent.
547-5F	APPROVED MESSAGE CODE COUNT	N	Service Billing: Not used.
548-6F	APPROVED MESSAGE CODE	N***R***	Service Billing: Not used.
130-UF	ADDITIONAL MESSAGE INFORMATION COUNT	Q	Service Billing: Maximum count of 25. Required if Additional Message Information (526-FQ) is used. Used to qualify the number of occurrences of the Additional Message Information (526-FQ) that is included in the Response Status Segment.
132-UH	ADDITIONAL MESSAGE INFORMATION QUALIFIER	Q***R***	Service Billing: Required if Additional Message Information (526-FQ) is used.
526-FQ	ADDITIONAL MESSAGE INFORMATION	Q***R***	Service Billing: Required when additional text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.
131-UG	ADDITIONAL MESSAGE INFORMATION CONTINUITY	Q***R***	Service Billing: Required if and only if current repetition of Additional Message Information (526-FQ) is used, another populated repetition of Additional Message Information (526-FQ) follows it, and the text of the following message is a continuation of the current.
C72-BH	HELP DESK SUPPORT TYPE COUNT	M	Service Billing: Maximum count of 5.

12.4.3.2.8 RESPONSE PRIOR AUTHORIZATION SEGMENT (SERVICE BILLING) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE PRIOR AUTHORIZATION SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
498-PR	PRIOR AUTHORIZATION PROCESSED DATE	N	Service Billing: Not used.
498-PS	PRIOR AUTHORIZATION EFFECTIVE DATE	N	Service Billing: Not used.
498-PT	PRIOR AUTHORIZATION EXPIRATION DATE	Q	Service Billing: Required when the prior authorization expiration date is known.
498-RA	PRIOR AUTHORIZATION QUANTITY	N	Service Billing: Not used.
498-RB	PRIOR AUTHORIZATION DOLLARS AUTHORIZED	N	Service Billing: Not used.
498-PW	PRIOR AUTHORIZATION NUMBER OF REFILLS AUTHORIZED	N	Service Billing: Not used.
498-PX	PRIOR AUTHORIZATION QUANTITY ACCUMULATED	N	Service Billing: Not used.
498-PY	PRIOR AUTHORIZATION ID ASSIGNED	Q	Service Billing: Required when the receiver must submit this Prior Authorization ID in order to receive payment for the claim. (An example of a situation may include a Benefit Transition Period that allows for payment of claims, for a period of time that would normally reject.)

Notes on Response Prior Authorization Segment on a Service Billing:

The Response Prior Authorization Segment is situational for a Service Billing response when the Header Response Status (501-F1) is "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). It is used to relay the Prior Authorization ID Assigned (498-PY) which is returned when a Reject Code (511-FB) denotes that a prior authorization code needs to be submitted on the subsequent billing or when the Prior Authorization Expiration Date (498-PT) is known.

The Response Prior Authorization Segment is not used in payer-to-payer transactions.

12.4.3.2.9 RESPONSE OTHER PAYERS SEGMENT (SERVICE BILLING) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE OTHER PAYERS SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
355-NT	OTHER PAYER ID COUNT	M	Service Billing: Maximum count of 4.
338-5C	OTHER PAYER COVERAGE TYPE	M***R***	
D41-PQ	OTHER PAYER RELATIONSHIP TYPE	M***R***	
D50-P6	OTHER PAYER BENEFIT CLASSIFICATION	M***R***	
C47-9T	OTHER PAYER ADJUDICATED PROGRAM TYPE	M***R***	
339-6C	OTHER PAYER ID QUALIFIER	Q***R***	Service Billing: Required if Other Payer ID (340-7C) is used.
340-7C	OTHER PAYER ID	Q***R***	Service Billing: Required if other insurance Payer ID information is available. Required if any of the following are sent: - Other Payer Processor Control Number (991-MH) - Other Payer Cardholder ID (356-NU) - Other Payer Group ID (992-MJ)
991-MH	OTHER PAYER PROCESSOR CONTROL NUMBER	Q***R***	Service Billing: Required if other insurance Processor Control Number information is available.
356-NU	OTHER PAYER CARDHOLDER ID	Q***R***	Service Billing: Required if other insurance Cardholder ID information is available.

Version F6

- 202 -

RESPONSE OTHER PAYERS SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
992-MJ	OTHER PAYER GROUP ID	Q***R***	Service Billing: Required if other insurance Group ID information is available.
142-UV	OTHER PAYER PERSON CODE	Q***R***	Service Billing: Required if needed to uniquely identify the family members within the Cardholder ID, as assigned by the other payer.
127-UB	OTHER PAYER HELP DESK TELEPHONE NUMBER	Q***R***	Service Billing: Required if needed to provide a support telephone number of the other payer to the receiver.
B23-7Q	OTHER PAYER HELP DESK TELEPHONE NUMBER EXTENSION	Q***R***	Service Billing: Required if needed to provide a support telephone number extension of the other payer to the receiver.
143-UW	OTHER PAYER PATIENT RELATIONSHIP CODE	Q***R***	Service Billing: Required if needed to uniquely identify the relationship of the patient to the cardholder ID, as assigned by the other payer.
144-UX	OTHER PAYER BENEFIT EFFECTIVE DATE	Q***R***	Service Billing: Required when other coverage is known which will become effective after the Date of Service submitted. Other Payer Benefit Effective Date would not be returned for coverage that is current as of the claim date of service. This allows the receiver to identify other coverage that needs to be billed or stored for future use.
145-UY	OTHER PAYER BENEFIT TERMINATION DATE	Q***R***	Service Billing: Required when other coverage termination date is known which is after the Date of Service submitted. If the termination date is not known this field would not be returned.
D23-M5	OTHER PAYER NAME	Q***R***	Service Billing: Required if the data is available.

Notes on Response Other Payers Segment on a Service Billing Response:

The Response Other Payers Segment is situational for a Service Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected) when other insurance information is available.

The following outlines different rejected claim scenarios and the use of the Response Other Payers Segment.

1. Non-Matched: If the identity of the patient cannot be validated and the Claim Billing or Encounter is rejected due to a non-match of field verification, then the Other Payer information is not sent.
2. COB Sequence: If the claim is rejected because it should be submitted to other payer(s) first, that Other Payer information must be sent, if available.
3. Change in 4RX (Change in Coverage): If the identity of the patient is verified and the Claim Billing or Encounter is rejected due to known alternate 4RX data required for claims processing, then the alternate 4RX data is returned as Other Payer information.
4. Plan Exclusion Alternate 4RX (Mutually Exclusive): If the claim is rejected due to plan benefit exclusions, then Other Payer information must be sent, if available.

12.4.3.2.10 RESPONSE OTHER RELATED BENEFIT DETAIL SEGMENT (SERVICE BILLING) (TRANSMISSION ACCEPTED/ TRANSACTION REJECTED)

D30-MP	OTHER BENEFIT DETAIL INFORMATION FACILITY TELEPHONE NUMBER	Q***R***	Service Billing: Required as allowed by plan policy and is applicable to coordinating patient benefits.

Notes on Response Other Related Benefit Detail Segment on a Service Billing Response: The Response Other Related Benefit Detail Segment is situational for a Service Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). Information will be returned when the Date of Service (401-D1) is in an active period for any of the records above (ESRD, Hospice, Institutional, Disability, or LIS or when other benefit information is available).

12.4.3.2.11 RESPONSE INTERMEDIARY SEGMENT (SERVICE BILLING) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE INTERMEDIARY SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
B52-8R	RESPONSE INTERMEDIARY AUTHORIZATION COUNT	Q	Service Billing: Required if Response Intermediary Authorization Type ID is used. Maximum count of 9.
B53-8S	RESPONSE INTERMEDIARY AUTHORIZATION TYPE ID	Q***R***	Service Billing: Required if Response Intermediary Authorization ID is used.
B54-8T	RESPONSE INTERMEDIARY AUTHORIZATION ID	Q***R***	Service Billing: Required if the Intermediary determines an authorization identifier needs to be communicated to the receiver.
B51-8Q	INTERMEDIARY MESSAGE	Q***R***	Service Billing: Required if text is needed for clarification or detail.
C86-KC	INTERMEDIARY HELP DESK SUPPORT TYPE COUNT	M	Service Billing: Maximum count of 5. Used to qualify the number of occurrences of Intermediary Help Desk Support Type (C85-KB) that is included in the Response Intermediary Segment.
C85-KB	INTERMEDIARY HELP DESK SUPPORT TYPE	M***R***	
C81-G9	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE COUNT	R	Service Billing: Maximum count of 5. Used to qualify the number of occurrences of the Intermediary Help Desk Business Unit Type, Intermediary Help Desk Contact Information Qualifier, Intermediary Help Desk Contact Information and Intermediary Help Desk Contact Information Extension that is included in the Response Intermediary Segment. Required if Help Desk Business Unit Type (C80-G8) is used
C80-G8	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE	Q***R***	Service Billing: Required if Intermediary Help Desk Contact Information Qualifier (C84-KA) is used.
C84-KA	INTERMEDIARY HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Service Billing: Required if Help Desk Contact Information (C84-KA) is used.
C82-JP	INTERMEDIARY HELP DESK CONTACT INFORMATION	Q***R***	Service Billing: Required if needed to provide help desk contact support information to the receiver.
C83-JR	INTERMEDIARY HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Service Billing: Required if needed to provide an extension to the Help Desk Contact Information (C82-JP).

Notes on Response Intermediary Segment on a Service Billing Response:

The Response Intermediary Segment is situational for a Service Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). The segment is used to support the authorization from an intermediary such as a Prescription Drug Monitoring Program (PDMP) or Risk Evaluation and Mitigation Strategy (REMS) program.

12.4.3.2.12 RESPONSE PROVIDER SEGMENT (SERVICE BILLING) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

Version F6

January 2020

OFFICIAL RELEASE

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Service Billing: Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Service Billing: Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Service Billing Response:

The Response Provider Segment is situational for a Service Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

12.4.4 TRANSMISSION REJECTED/TRANSACTION REJECTED

Service Billing transmission response Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected)

12.4.4.1 DIAGRAM FOR TRANSMISSION OF ONE A SERVICE BILLING RESPONSE (TRANSMISSION REJECTED/TRANSACTION REJECTED)

12.4.4.2 SERVICE BILLING RESPONSE SEGMENTS (TRANSMISSION REJECTED/TRANSACTION REJECTED)**12.4.4.2.1 RESPONSE HEADER SEGMENT (SERVICE BILLING) (TRANSMISSION REJECTED/TRANSACTION REJECTED)**

RESPONSE HEADER SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on a Service Billing Response:

The Response Header Segment is a mandatory, fixed length segment for Service Billing response when the Header Response Status (501-F1) is "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The "Situation" column is not applicable.

If either the entire transmission or the Header is in error, the Header Response Status (501-F1) = "R" (Rejected). The transaction within the transmission must be rejected with an "R".

If the transaction rejects for detail errors, the Header Response Status (501-F1) = "A" (Accepted) and the Transaction Response Status (112-AN) will be "R" (Rejected).

12.4.4.2.2 RESPONSE MESSAGE SEGMENT (SERVICE BILLING) (TRANSMISSION REJECTED/TRANSACTION REJECTED)

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

- 206 -

RESPONSE MESSAGE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Service Billing: Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Service Billing Response:

The Response Message Segment is situational for Service Billing response when the Header Response Status (501-F1) is "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). It is used when additional text information needs to be sent.

12.4.4.2.3 RESPONSE STATUS SEGMENT (SERVICE BILLING) (TRANSMISSION REJECTED/TRANSACTION REJECTED)

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Service Billing: Required if needed to identify the transaction.
B98-34	RECONCILIATION ID	N	Service Billing: Not used.
510-FA	REJECT COUNT	R	Service Billing: Maximum count of 5. Required.
511-FB	REJECT CODE	R***R***	Service Billing: Required.
546-4F	REJECT FIELD OCCURRENCE INDICATOR	Q***R***	Service Billing: Required if a repeating field is in error, to identify repeating field occurrence. This field must be sent when relaying error information about a repeating field or set. Note, if the Reject Code is not denoting a repeating field or set, the Reject Field Occurrence Indicator must not be sent.
547-5F	APPROVED MESSAGE CODE COUNT	N	Service Billing: Not used.
548-6F	APPROVED MESSAGE CODE	N***R***	Service Billing: Not used.
130-UF	ADDITIONAL MESSAGE INFORMATION COUNT	Q	Service Billing: Maximum count of 25. Required if Additional Message Information (526-FQ) is used. Used to qualify the number of occurrences of the Additional Message Information (526-FQ) that is included in the Response Status Segment.
132-UH	ADDITIONAL MESSAGE INFORMATION QUALIFIER	Q***R***	Service Billing: Required if Additional Message Information (526-FQ) is used.
526-FQ	ADDITIONAL MESSAGE INFORMATION	Q***R***	Service Billing: Required if additional text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
			repetition of Additional Message Information (526-FQ) follows it, and the text of the following message is a continuation of the current.
C72-BH	HELP DESK SUPPORT TYPE COUNT	M	Service Billing: Maximum count of 5. Used to qualify the number of occurrences of Help Desk Support Type (C71-BG) that is included in the Response Status Segment.
C71-BG	HELP DESK SUPPORT TYPE	M***R***	
C67-BB	HELP DESK BUSINESS UNIT TYPE COUNT	R	Service Billing: Maximum count of 5. Used to qualify the number of occurrences of the Help Desk Business Unit Type, Help Desk Contact Information Qualifier, Help Desk Contact Information and Help Desk Contact Information Extension that is included in the Response Status Segment. Required if Help Desk Business Unit Type (C66-BA) is used.
C66-BA	HELP DESK BUSINESS UNIT TYPE	Q***R***	Service Billing: Required if Help Desk Contact Information Qualifier (C70-BF) is used.
C70-BF	HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Service Billing: Required if Help Desk Contact Information (C68-BC) is used.
C68-BC	HELP DESK CONTACT INFORMATION	Q***R***	Service Billing: Required if needed to provide help desk contact support information to the receiver.
C69-BD	HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Service Billing: Required if needed to provide an extension to the Help Desk Contact Information (C68-BC).
880-K5	TRANSACTION REFERENCE NUMBER	N	Service Billing: Not used.
993-A7	INTERNAL CONTROL NUMBER	N	Service Billing: Not used.
A28-ZR	ADJUDICATED PROGRAM TYPE	N	Service Billing: Not used.
B04-BT	NEXT AVAILABLE FILL DATE	N	Service Billing: Not used.

Notes on Response Status Segment on a Service Billing Response:

The Response Status Segment is mandatory for a Service Billing Response for Header Response Status (501-F1) = "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The Response Status Segment is sent from the sender to the receiver to identify the outcome of the request. Refer to the NCPDP *External Code List* for guidance on the use of reject codes.

12.4.4.2.4 RESPONSE PROVIDER SEGMENT (SERVICE BILLING) (TRANSMISSION REJECTED/TRANSACTION REJECTED)

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Service Billing: Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Service Billing: Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Service Billing Response:

The Response Provider Segment is situational for a Service Billing response when the Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

13 REVERSAL INFORMATION

The reversal transaction is used to “back out” a previously captured or paid prescription, service billing, or information reporting. Reversal Transaction Codes are “B2”, “S2”, “N2”.

For B2, S2 Reversal Transactions:

To facilitate the matching of a Claim or Service Billing Reversal request (B2/S2) to the intended (B1/S1) transaction for reversal, the Reconciliation ID (B98-34) supplied by processor on the Paid/Duplicate Paid or Captured/Duplicate of Captured B1/S1 response is transmitted in the Claim Segment on the Reversal Request (B2/S2). This identifies the exact transaction to be reversed, eliminating B2 to B1 matching conflicts in the following scenarios:

- multiple fills of the same Rx that occurred on the same day (e.g., regular fill; extra fill for vacation)
- same processor handling different levels of COB claims for the same prescription fill
- partial and completed fills on same day, etc.

See “**Reversal Guidelines**” for further guidance regarding Reversals.

The processor must return a Reconciliation ID (B98-34) on the Accepted Reversal Response (B2/S2). The Reconciliation ID (B98-34) returned on the accepted reversal response must be the Reconciliation ID (B98-34) from the transaction that was reversed. This allows the originator to reconcile the transactions within their system.

For example:

	B1 TRANSACTION RESPONSE	
102-A2	VERSION/RELEASE NUMBER	F6
103-A3	TRANSACTION CODE	B1
109-A9	TRANSACTION COUNT	1
501-F1	HEADER RESPONSE STATUS	A

402-D2	PRESCRIPTION/SERVICE REFERENCE NUMBER	2002002

Remaining segments and fields as needed

For N2 Reversal Transactions:

To facilitate the matching of the Information Reporting Reversal request (N2) with the intended Accepted Information Reporting transaction (N1) for reversal, the Reconciliation ID (B98-34) supplied by the information reporting processing system on the accepted N1 response is transmitted in the Claim Segment on the Reversal request (N2). The Reconciliation ID (B98-34) returned on the accepted reversal response must be the Reconciliation ID (B98-34) from the transaction that was reversed. This allows the originator to associate the Information Reporting Reversal transaction to the Information Reporting request (N1). Within the Medicare Part D program, this allows the Medicare Part D program to conduct post adjudication activities that may impact accumulators.

For Example:

	N1 TRANSACTION RESPONSE	
102-A2	VERSION/RELEASE NUMBER	F6
103-A3	TRANSACTION CODE	N1
109-A9	TRANSACTION COUNT	1
501-F1	HEADER RESPONSE STATUS	A

402-D2	PRESCRIPTION/SERVICE REFERENCE NUMBER	2002002

See "Reversal Guidelines" for further guidance regarding Reversals.

It is recommended the pharmacy not allow a reversed prescription to be deleted from their system without first receiving a response from the processor. A rejected reversal may require alternative processes to maintain financial integrity of the claim. *(This same recommendation should be used with the other reversal transactions between trading partners.)* If a Reversal is rejected for syntax related issues, the pharmacy should work with their corporate office and/or their software vendor to correct and re-transmit the Reversal transaction in a timely manner. Vendors or Corporate office personnel are encouraged to review Rejected Reversals to determine cause, so a timely correction can be made or discussion with the processor can occur.

Situational segments such as the Insurance Segment may be supported. If a processor/PBM needs this information to process a reversal, this segment can be used. Only one Insurance Segment must be submitted per transmission. If a processor/PBM does not need the Insurance Segment, but the pharmacy wishes to send it, the processor/PBM must ignore the valid optional and/or situational information.

If, during the transmission of a reversal, the communication or procedure is interrupted, a provider may not receive notification that the processor has reversed the transaction. If the provider retransmits the reversal, the processor must not apply the reversal more than once for a given transaction. A "Reversal" resubmission must prompt the processor to reply with the same information returned on the original reversal response, and use an "S" (Duplicate of Approved) status. The message field may be used to inform the submitter of the reason for the duplicate status, e.g., reversal previously accepted. See section "Transaction Response Status", "Duplicate Transactions".

13.1 COORDINATION OF BENEFIT REVERSALS

The Reconciliation ID (B98-34) enhances the match logic by identifying the specific transaction to be reversed. As a result, the COB Segment and the Other Payer Coverage Type may not be needed as primary match criteria to identify the specific transaction to be reversed when the processor is the payer for multiple levels of coverage.

Reversal requests for Approved COB claims must contain the Reconciliation ID (B98-34) of the specific claim (be it primary, secondary, tertiary, etc.) requested for reversal.

Reversal Transactions must be submitted in the reverse order (also called 'back out order') of the claim billing request (example: claim billing occurred as Primary, Secondary then Tertiary, reversal order should be Tertiary, Secondary, Primary). This is necessary so downstream claims are not 'orphaned'.

Example: Tertiary claim is based on payment made by both the Primary and Secondary claims. If one of these is reversed, without reversing the tertiary claim, the financials for the tertiary claim may be incorrect.

A rejected reversal for a COB claim may need to be addressed by alternative processes in order to maintain financial integrity for the claim associated to each payer (Tertiary, Secondary, Primary).

13.2 CLAIM OR SERVICE REVERSAL

These transactions are used by the Originator to cancel a claim or service submitted that had been processed previously.

Each claim or service reversal request contains one occurrence of claim/service data. The Transaction Code is "B2" (Claim Reversal) or "S2" (Service Reversal).

Depending upon the particular claim or service reversal request, the Processor must provide one of the following general types of responses:

Approved – This occurs when the Processor acknowledges receipt of the claim or service reversal, and successfully processes the backing out of the claim or service.

Duplicate of Approved – This occurs when the Processor has previously received the reversal request and processed the transaction, but the response did not return to the Originator. The Duplicate response contains the same information as returned in the original response of Approved.

Captured – This occurs when the Processor acknowledges receipt of the reversal, but is not processing the reversal at this time.

Duplicate of Captured – This occurs when the Processor has previously received the reversal request and processed the transaction, but the response did not return to the Originator. The Duplicate response contains the same information as returned in the original response of Captured.

Rejected – This occurs when the Processor has encountered an error in the transaction or processing.

13.3 CLAIM REVERSAL REQUEST DIAGRAMS

13.3.1 DIAGRAM FOR TRANSMISSION OF A CLAIM REVERSAL TRANSACTION

For a Claim Reversal, the scenario defined includes a Claim Reversal from a Sender to a Receiver.

For payer-to-payer transactions, the DUR/PPS Segment, Pricing Segment, and Coordination of Benefits/Other Payments Segment are not used. Therefore, in this case, there are no situational transaction-level segments.

INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Not used.
361-2D	PROVIDER ACCEPT ASSIGNMENT INDICATOR	N	Claim Reversal: Not used.
115-N5	MEDICAID ID NUMBER	N	Claim Reversal: Not used.
116-N6	MEDICAID AGENCY NUMBER	N	Claim Reversal: Not used.

Notes on Insurance Segment on a Claim Reversal Request:

The Insurance Segment is situational for a Claim Reversal request. If the Cardholder ID field is not submitted, the Insurance Segment is not used. The Segment is mandatory if required under provider payer contract or mandatory on claims where this information is necessary for reversal of the claim.

13.4.2.1 INSURANCE SEGMENT (SUBROGATION STANDARD CLAIM REVERSAL)

INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
301-C1	GROUP ID	QM	Subrogation – Claim Reversal: Required if needed to match reversal to original Subrogation billing transaction.
115-N5	MEDICAID ID NUMBER	QM	Subrogation - Claim Reversal: Required to identify the member as uniquely known to Medicaid. Not used for other types of subrogation.
116-N6	MEDICAID AGENCY NUMBER	QM	Subrogation - Claim Reversal: Required to identify the Medicaid agency. Not used for other types of subrogation.

Notes on Insurance Segment on a Subrogation Standard Claim Reversal Request:

The rules above for an "Insurance Segment (Claim Reversal)" are to be followed for Subrogation. Specific fields that are used differently in Subrogation are noted in the table above.

13.4.3 CLAIM SEGMENT (CLAIM REVERSAL)

CLAIM SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
455-EM	PRESCRIPTION/SERVICE REFERENCE NUMBER QUALIFIER	M	Claim Reversal: For Transaction Code of "B2", in the Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "1" (Rx Billing).
402-D2	PRESCRIPTION/SERVICE REFERENCE NUMBER	M	Claim Reversal: See section "Standard Conventions", "Character Set Designation Truncation", "Numeric", "Numeric Truncation".
436-E1	PRODUCT/SERVICE ID QUALIFIER	M	Claim Reversal: Must contain the Product/Service ID Qualifier (436-E1) value from original Billing.
407-D7	PRODUCT/SERVICE ID	M	Claim Reversal: Must contain the Product/Service ID (407-D7) value from original Billing.
B98-34	RECONCILIATION ID	R	Claim Reversal: Reconciliation ID allows the originator to indicate the exact transaction to be reversed should multiple claims for the same prescription be submitted to the same processor (COB, Refill, Partial Fill, etc.) See Section "Reversal Guidelines – Field Usage and in Reversal Request and Response; Criteria for Matching"
456-EN	ASSOCIATED PRESCRIPTION/SERVICE REFERENCE NUMBER	N	Claim Reversal: Not used.
457-EP	ASSOCIATED PRESCRIPTION/SERVICE DATE	N	Claim Reversal:

DUR/PPS SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Required if this field is needed to report drug utilization review outcome.
474-8E	DUR/PPS LEVEL OF EFFORT	Q***R***	Claim Reversal: Required if this field is needed to report drug utilization review outcome.
475-J9	DUR/DUE CO-AGENT ID QUALIFIER	N***R***	Claim Reversal: Not used.
476-H6	DUR/DUE CO-AGENT ID	N***R***	Claim Reversal: Not used.

Notes on DUR/PPS Segment on a Reversal Request:

The DUR/PPS Segment is situational for a Claim Reversal request. It is used when a sender notifies the receiver of drug utilization review outcome. The Segment is mandatory if required under provider payer contract or mandatory on reversals where this information is necessary for reversal of the claim.

The DUR/PPS Segment is not used in payer-to-payer transactions.

The Reason for Service Code (439-E4) is sometimes reported for DUR processing, and sometimes based on payment agreements. See section "Notes on Pricing Segment on a Reversal Request" below.

13.4.5 PRICING SEGMENT (CLAIM REVERSAL)

PRICING SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT

Notes on Pricing Segment on a Claim Reversal Request:

The Pricing Segment is situational for a Claim Reversal request. The Pricing Segment defines contractually agreed upon payment fields for a Reversal. See the pricing formulae. DUR may be reported with or without contractual pricing. Incentive Amount Submitted (438-E3) is used to report the contractual pricing.

The Pricing Segment is not used in payer-to-payer transactions.

The following examples are simplified to show only the fields needed for the example.

13.4.5.1 EXAMPLE 1: REPORTING A DUR EVENT ON A CLAIM REVERSAL WITHOUT ANY INCENTIVE SUBMITTED

REVERSAL TRANSACTION		
Field	Field Name	Value
	DUR/PPS Segment	
439-E4	Reason for Service Code	AT
440-E5	Professional Service Code	P0
441-E6	Result of Service Code	2A
474-8E	DUR/PPS Level of Effort	12
	No Request Pricing Segment submitted	

Field	Field Name	Value
501-F1	Header Response Status	A
112-AN	Transaction Response Status	A, S, C, Q
B98-34	Reconciliation ID	Reconciliation ID of originally approved claim
	No Response Pricing Segment returned	

13.4.5.2 EXAMPLE 2: NO INCENTIVE AMOUNT SUBMITTED (438-E3) FOR A CLAIM REVERSAL. INCENTIVE PAID

An Incentive Fee will be paid. The original claim was "P" (Paid) claim that includes a DUR alert.

REVERSAL TRANSACTION		
Field	Field Name	Value
	DUR/PPS Segment	
439-E4	Reason for Service Code	AT
440-E5	Professional Service Code	P0
441-E6	Result of Service Code	2A
474-8E	DUR/PPS Level of Effort	12

Field	Field Name	Value
501-F1	Header Response Status	A
112-AN	Transaction Response Status	A, S
B98-34	Reconciliation ID	Reconciliation ID of originally approved claim
	Response Pricing Segment	
521-FL	Incentive Amount Paid	140{
509-F9	Total Amount Paid	140{

13.4.5.3 EXAMPLE 3: INCENTIVE AMOUNT SUBMITTED (438-E3) FOR A CLAIM REVERSAL

The original claim was "P" (Paid) claim that includes a DUR alert.

REVERSAL TRANSACTION		
Field	Field Name	Value

Notes on Coordination of Benefits/Other Payments Segment on a Claim Reversal Request:

The Coordination of Benefits/Other Payments Segment is situational for a Claim Reversal request to a downstream payer. If the COB segment is sent, processors may choose to use the Other Payer Coverage Type (338-5C) information for secondary match criteria. Processors should not reject the reversal if the segment is not sent when Reconciliation ID (B98-34) is provided and a matching transaction is found.

Note, the Other Payer Coverage Type (338-5C) occurrences do not have to appear in sequential order (primary, secondary, tertiary), thus can appear in any order.

When multiple payers have paid a claim and the transactions are to be reversed, the originator must reverse claims in the correct back out order (see section "Reversal Information").

The Coordination of Benefits/Other Payments Segment is not used for a Claim Reversal request to a primary payer.

See section "[Other Coverage Code \(308-C8\)](#)".

See section "Transaction Response Status", "Duplicate Transactions".

13.4.6.1 COORDINATION OF BENEFITS/OTHER PAYMENTS SEGMENT USAGE IN CLAIM REVERSAL

The Coordination of Benefits/Other Payments Segment on a COB transaction is 'situational' since the Reconciliation ID (B98-34) provides the specific transaction to be reversed. If the COB Segment is sent, processors may choose to use the Other Payer Coverage Type (338-5C) information for secondary match criteria. Processors should not reject the reversal if the segment is not sent when the Reconciliation ID (B98-34) is provided and a matching transaction is found. The following excerpt examples provide legacy match criteria.

13.4.6.1.1 EXCERPT EXAMPLE 1

In this example, the claim reversal is sent to a payer. The highest value of Other Payer Coverage Type (338-5C) is "02" (Secondary). This means the claim reversal is being sent to the tertiary payer. This may be a payer that is involved in multiple coordination of benefits occurrences (for example primary and tertiary). The tertiary payer must interrogate the claim reversal and use the Other Payer Coverage Type (338-5C) to determine that the tertiary claim must be reversed, since "02" is the highest value.

13.4.6.1.2 EXCERPT EXAMPLE 2

In this example, the claim reversal is sent to a payer. The highest value of Other Payer Coverage Type (338-5C) is "01" (Primary). This means the claim reversal is being sent to the secondary payer. This may be a payer that is involved in multiple coordination of benefits occurrences (for example primary and secondary). The secondary payer must interrogate the claim reversal and use the Other Payer Coverage Type (338-5C) to determine that the secondary claim must be reversed, since "01" is the highest value.

13.5.1.2.2 RESPONSE MESSAGE SEGMENT (CLAIM REVERSAL) (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

RESPONSE MESSAGE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Claim Reversal: Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Claim Reversal Response:

The Response Message Segment is situational for Claim Reversal response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved). It is used when additional text information needs to be sent.

13.5.1.2.3 RESPONSE STATUS SEGMENT (CLAIM REVERSAL) (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Claim Reversal: Required if needed to identify the transaction.
B98-34	RECONCILIATION ID	R	Claim Reversal: Approved "A" response: The Reconciliation ID of the Approved transaction that has been reversed. The Reconciliation ID returned on the Reversal response represents the Reconciliation ID of the transaction found and reversed, which should be the same as the Reconciliation ID submitted on the Reversal request. See Section "Reversal Guidelines – Populating the Reconciliation ID" Duplicate of Approved "S" response: Required to provide the Reconciliation ID of the Reversal that has already occurred. This typically occurs when the originator experiences a 'time out' and does not receive the original response with the Approved reversal status.
510-FA	REJECT COUNT	N	Claim Reversal: Not used.
511-FB	REJECT CODE	N***R***	Claim Reversal: Not used.
546-4F	REJECT FIELD OCCURRENCE INDICATOR	N***R***	Claim Reversal: Not used.
547-5F	APPROVED MESSAGE CODE COUNT	N	Claim Reversal: Not used.
548-6F	APPROVED MESSAGE CODE	N***R***	Claim Reversal: Not used.
130-UF	ADDITIONAL MESSAGE INFORMATION COUNT	Q	Claim Reversal: Maximum count of 25. Required if Additional Message Information (526-FQ) is used. Used to qualify the number of occurrences of the Additional Message Information (526-FQ) that is included in the Response Status Segment.
132-UH	ADDITIONAL MESSAGE INFORMATION QUALIFIER	Q***R***	Claim Reversal: Required if Additional Message Information (526-FQ) is used.
526-FQ	ADDITIONAL MESSAGE INFORMATION	Q***R***	Claim Reversal: Required when additional text is needed for clarification or detail.

Notes on Response Pricing Segment on a Claim Reversal Response:

The Response Pricing Segment is situational for a Claim Reversal response when the Header Response Status (501-F1) is "A" (Accepted) and Transaction Response Status (112-AN) is "A" (Approved) or "S" (Duplicate of Approved).

The Response Pricing Segment is not used in payer-to-payer transactions.

It is highly recommended that whenever possible, the individual dollar fields are returned in the response. On the response the sender should return the individual payment response fields to allow the receiver to reconcile against the requested payment fields.

13.5.2 TRANSMISSION ACCEPTED/TRANSACTION CAPTURED

Claim Reversal transmission response Header Response Status (501-F1) of "A" (Accepted)
and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured)

There are no transaction-level situation segments for Claim Reversal transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured).

See section "Transaction Response Status", "Duplicate Transactions" for the handling of a duplicate transaction.

13.5.2.2 CLAIM REVERSAL RESPONSE SEGMENTS (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

13.5.2.2.1 RESPONSE HEADER SEGMENT (CLAIM REVERSAL) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE HEADER SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	For Transaction Code of "B2", in the Response Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "1" (Rx Billing).
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on a Claim Reversal Response:

The Response Header Segment is a mandatory, fixed length segment for Claim Reversal response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). The "Situation" column is not applicable.

13.5.2.2.2 RESPONSE MESSAGE SEGMENT (CLAIM REVERSAL) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE MESSAGE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Claim Reversal: Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Claim Reversal Response:

The Response Message Segment is situational for Claim Reversal response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). It is used when additional text information needs to be sent.

13.5.2.2.3 RESPONSE STATUS SEGMENT (CLAIM REVERSAL) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Claim Reversal: Required if needed to identify the transaction.
B98-34	RECONCILIATION ID	R	Claim Reversal: Captured "C" response:

Notes on Response Status Segment on a Claim Reversal Response:

The Response Status Segment is mandatory for a Claim Reversal response for Header Response Status (501-F1) = "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The Response Status Segment is sent from the sender to the receiver to identify the outcome of the request. Refer to the NCPDP *External Code List* for guidance on the use of reject codes.

13.6 SERVICE REVERSAL REQUEST DIAGRAMS

13.6.1 DIAGRAM FOR TRANSMISSION OF A SERVICE REVERSAL TRANSACTION

For a Service Reversal, the scenario defined includes a Service Reversal from a Sender to a Receiver.

The Coordination of Benefits Segment is situational only for reversals to downstream payers where legacy match criteria maybe needed. Processors are cautioned against rejecting the reversal if the segment is not sent when the Reconciliation ID is provided and a matching transaction is found.

See sections "Reversal Information" and "Reversal Guidelines" for additional clarifications.

Notes on Coordination of Benefits/Other Payments Segment on a Service Reversal Request:

The Coordination of Benefits/Other Payments Segment is situational for a Service Reversal request to a downstream payer. Reconciliation ID replaces the need to use the Coordination of Benefits/Other Payments Segment. If sent, processors may choose to use the Other Payer Coverage Type (338-5C) information for secondary match criteria, however are cautioned against rejecting the reversal if the segment is not sent when Reconciliation ID is provided and a matching transaction is found. **Note, the Other Payer Coverage Type (338-5C) occurrences do not have to appear in sequential order (primary, secondary, tertiary), thus can appear in any order.**

When multiple payers have paid and the transactions are to be reversed, originators must reverse claims in the correct back out order (see section "Reversal Information").

The Coordination of Benefits/Other Payments Segment is not used for a Service Reversal request to a primary payer.

See section "[Other Coverage Code \(308-C8\)](#)".

See section "Transaction Response Status", "Duplicate Transactions".

13.7.4.1 COORDINATION OF BENEFITS/OTHER PAYMENTS SEGMENT USAGE IN SERVICE REVERSAL

Reconciliation ID (B98-34) removes the need to send a Coordination of Benefits/Other Payments Segment on a COB transaction. If sent, processors may opt to use as noted in examples below.

13.7.4.1.1 EXCERPT EXAMPLE 1

In this example, the service reversal is sent to a payer. The highest value of Other Payer Coverage Type (338-5C) is "02" (Secondary). This means the service reversal is being sent to the tertiary payer. This may be a payer that is involved in multiple coordination of benefits occurrences (for example primary and tertiary). The tertiary payer must interrogate the service reversal and use the Other Payer Coverage Type (338-5C) to determine that the tertiary service must be reversed, since "02" is the highest value.

Coordination of Benefits/Other Payments Segment			
Field	Field Name		
111-AM	SEGMENT IDENTIFICATION		
337-4C	COORDINATION OF BENEFITS/OTHER PAYMENTS COUNT	2	
338-5C	OTHER PAYER COVERAGE TYPE	01	Primary
338-5C	OTHER PAYER COVERAGE TYPE	02	Secondary

13.7.4.1.2 EXCERPT EXAMPLE 2

In this example, the service reversal is sent to a payer. The highest value of Other Payer Coverage Type (338-5C) is "01" (Primary). This means the service reversal is being sent to the secondary payer. This may be a payer that is involved in multiple coordination of benefits occurrences

13.8.1.2.1 RESPONSE HEADER SEGMENT (SERVICE REVERSAL) (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

RESPONSE HEADER SEGMENT		MANDATORY SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	For Transaction Code of "S2", in the Response Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "2" (Service Billing).
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on a Service Reversal Response:

The Response Header Segment is a mandatory, fixed length segment for Service Reversal response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved). The "Situation" column is not applicable.

13.8.1.2.2 RESPONSE MESSAGE SEGMENT (SERVICE REVERSAL) (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

RESPONSE MESSAGE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Service Reversal: Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Service Reversal Response:

The Response Message Segment is situational for Service Reversal response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved). It is used when additional text information needs to be sent.

13.8.1.2.3 RESPONSE STATUS SEGMENT (SERVICE REVERSAL) (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Service Reversal: Required if needed to identify the transaction.
B98-34	RECONCILIATION ID	R	Service Reversal: Approved "A" response: Required to provide the Reconciliation ID of the Approved transaction that has been reversed. The Reconciliation ID returned on the Reversal response represents the Reconciliation ID of the transaction found and reversed, which should be the same as the Reconciliation ID submitted on the Reversal request. See Section "Reversal Guidelines – Populating the Reconciliation ID" Duplicate of Approved "S" response: Required to provide the Reconciliation ID of the Reversal that has already occurred. This typically occurs when the originator experiences a 'time out' and does not receive the original response with the Approved reversal status.
510-FA	REJECT COUNT	N	Service Reversal: Not used.
511-FB	REJECT CODE	N***R***	Service Reversal: Not used.

RESPONSE CLAIM SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
C59-AF	BENEFIT TYPE OPPORTUNITY COUNT	N	Service Reversal: Not used.
C58-AE	BENEFIT TYPE OPPORTUNITY	N	Service Reversal: Not used.
D15-KY	SUBROGATION REQUESTORS RECONCILIATION ID	N	Service Reversal: Not used.

Notes on Response Claim Segment on a Service Reversal Response:

The Response Claim Segment is mandatory for a Service Reversal response to identify the prescription/service reference number when the Header Response Status (501-F1) is "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved).

13.8.2 TRANSMISSION ACCEPTED/TRANSACTION CAPTURED

Service Reversal transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured)

There are no situational transaction-level segments in the Service Reversal transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured).

See section "Transaction Response Status", "Duplicate Transactions" for the handling of a duplicate transaction.

RESPONSE MESSAGE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Service Reversal: Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Service Reversal Response:

The Response Message Segment is situational for Service Reversal response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). It is used when additional text information needs to be sent.

13.8.2.2.3 RESPONSE STATUS SEGMENT (SERVICE REVERSAL) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Service Reversal: Required if needed to identify the transaction.
B98-34	RECONCILIATION ID	R	Service Reversal: Captured "C" response: Required to provide the Reconciliation ID of the Approved transaction that has been reversed. The Reconciliation ID returned on the Reversal response represents the Reconciliation ID of the transaction found and reversed, which should be the same as the Reconciliation ID submitted on the Reversal request. See Section "Reversal Guidelines – Populating the Reconciliation ID" Duplicate of Captured "Q" response: Required to provide the Reconciliation ID of the Reversal that has already occurred. This typically occurs when the originator experiences a 'time out' and does not receive the original response with the Approved reversal status.
510-FA	REJECT COUNT	N	Service Reversal: Not used.
511-FB	REJECT CODE	N***R***	Service Reversal: Not used.

546-4F	REJECT FIELD OCCURRENCE INDICATOR	Q***R***	Service Reversal: Required if a repeating field is in error, to identify repeating field occurrence. This field must be sent when relaying error information about a repeating field or set. Note, if the Reject Code is not denoting a repeating field or set, the Reject Field Occurrence Indicator must not be sent.
547-5F	APPROVED MESSAGE CODE COUNT	N	Service Reversal: Not used.
548-6F	APPROVED MESSAGE CODE	N***R***	Service Reversal: Not used.
130-UF	ADDITIONAL MESSAGE INFORMATION COUNT	Q	Service Reversal: Maximum count of 25. Required if Additional Message Information (526-FQ) is used. Used to qualify the number of occurrences of the Additional Message Information (526-FQ) that is included in the Response Status Segment.
132-UH	ADDITIONAL MESSAGE INFORMATION QUALIFIER	Q***R***	Service Reversal: Required if Additional Message Information (526-FQ) is used.
526-FQ	ADDITIONAL MESSAGE INFORMATION	Q***R***	Service Reversal: Required if additional text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.
131-UG	ADDITIONAL MESSAGE INFORMATION CONTINUITY	Q***R***	Service Reversal: Required if and only if current repetition of Additional Message Information (526-FQ) is used, another populated repetition of Additional Message Information (526-FQ) follows it, and the text of the following message is a continuation of the current.
C72-BH	HELP DESK SUPPORT TYPE COUNT	M	Service Reversal: Maximum count of 5.

RESPONSE STATUS SEGMENT		MANDATORY SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
			Used to qualify the number of occurrences of Help Desk Support Type (C71-BG) that is included in the Response Status Segment.
C71-BG	HELP DESK SUPPORT TYPE	M***R***	
C67-BB	HELP DESK BUSINESS UNIT TYPE COUNT	R	Service Reversal: Maximum count of 5. Used to qualify the number of occurrences of the Help Desk Business Unit Type, Help Desk Contact Information Qualifier, Help Desk Contact Information and Help Desk Contact Information Extension that is included in the Response Status Segment. Required if Help Desk Business Unit Type (C66-BA) is used.
C66-BA	HELP DESK BUSINESS UNIT TYPE	Q***R***	Service Reversal: Required if Help Desk Contact Information Qualifier (C70-BF) is used.
C70-BF	HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Service Reversal: Required if Help Desk Contact Information (C68-BC) is used.
C68-BC	HELP DESK CONTACT INFORMATION	Q***R***	Service Reversal: Required if needed to provide help desk contact support information to the receiver.
C69-BD	HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Service Reversal: Required if needed to provide an extension to the Help Desk Contact Information (C68-BC).
880-K5	TRANSACTION REFERENCE NUMBER	N	Service Reversal: Not used.
993-A7	INTERNAL CONTROL NUMBER	N	Service Reversal: Not used.
A28-ZR	ADJUDICATED PROGRAM TYPE	N	Service Reversal: Not used.
B04-BT	NEXT AVAILABLE FILL DATE	N	Service Reversal: Not used.

Notes on Response Status Segment on a Service Reversal Response:

The Response Status Segment is mandatory for a Service Reversal response for Header Response Status (501-F1) = "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The Response Status Segment is sent from the sender to the receiver to identify the outcome of the request. Refer to the NCPDP *External Code List* for guidance on the use of reject codes.

14 REBILL INFORMATION

A Rebill transaction is a prescription product or service billing or information submission with an implied reversal of the same Service Reference Number. A previously captured or adjudicated claim or service or information reporting is reversed and then the new claim, service or information reporting is processed, using a two-step procedure. Each part of the process works independently of the other. For the Rebill request, the Reconciliation ID of the transaction to be reversed must be sent.

The types of rebill transactions are:

- Claim Rebill (B3)
- Service Rebill (S3)
- Information Reporting Rebill (N3)

See Section *“Reversal Guidelines – Field Usage and in Reversal Request and Response; Criteria for Matching”*

First, the previously captured or adjudicated transaction is reversed. If the reversal cannot be processed, reject code “87 “ (Reversal not processed) must be returned in the reject response, as well as reject code “85” (Claim not processed). See section *“Appendix C Use Of Information Reporting (N1, N2, N3) Functionality For Medicare Part D Processing”* for instruction on processing of Medicare Part D Information Reporting Rebill (N3) transactions.

If the reversal is processed successfully, the second step is to process the “New” transaction. If the “New” transaction processes successfully, a “Paid” (B3, S3, N3), “Captured” (B3, S3, C3, N3 (Non Medicare Part D)) or “Approved” (N3, C3) response must be returned. If the “New” transaction is rejected, appropriate reject codes must be returned.

Duplicate response logic must not be applied by the processor to a Rebill transaction. There is no need for a duplicate response due to the nature of the rebill transaction and its implied reversal. Because the implied reversal would reverse the paid claim, a duplicate transaction would not exist.

If a processor supported duplicate responses in rebills the submitter would not be able to modify a field that is not included in the duplicate field check. See sections *“Transaction Response Status”*, *“Duplicate Transactions”* and *“Duplicate Processing For All Rebill Transactions”* for more information.

Trading partners are advised to clarify the use of Rebill transactions when original submission was a Coordination of Benefit transaction. Downstream entities depend on the ‘results’ of processing by the prior payers/approvers.

Example: A B1 transaction to a tertiary processor is based on processing by the primary and secondary processors. Should pertinent data require change, a B3 transaction would reverse the claim to the tertiary processor before that change is reversed and handle by either the primary or secondary processor.

- If the purpose of the rebill is to CHANGE submitted criteria, it is better to BACK OUT all transactions via Reversal (B2/S2/C2/N2) transactions and then submit changed data using the Submission (B1/S2/C1/N1) transaction for reprocessing in proper order.
- If the purpose of the Rebill transaction is to re-process original data then there should not be an issue with the B3 and COB.

For Risk Evaluation and Mitigation Strategies (REMS) and Prescription Drug Monitoring Program (PDMP) processing there is a need to:

- Ensure that all Reversal transactions are delivered through the same path as their corresponding Billing or Prior Authorization Request And Billing transactions to ensure accurate reporting, and
- Ensure an understanding of how reversals are handled when a reversal request is denied or there is a time-out condition.

For Prescription Drug Monitoring Programs (PDMP) billing functions Service Rebill is out of scope.

14.1 CLAIM OR SERVICE REBILL

This transaction is a claim or service submission with an implied reversal. It is used by the Originator to cancel a claim or service submitted that had been processed previously, and submit a new claim or service in the same transaction.

For claim or service reversal guidelines, see sections *“Reversal Information”*, *Claim or Service Reversal*” and *“Reversal Guidance”*. The Transaction Code is “B2” (Claim Reversal) or “S2” (Service Reversal).

Depending upon the particular claim or service rebill request, the Processor must provide one of the following general types of responses:

Captured – This occurs when the Processor acknowledges receipt of the claim or service rebill, but is not making any judgment regarding eligibility of the patient, reversal of the claim or service, or payment for the claim or service.

Paid – This occurs when the Processor processes the reversal, then processes the claim or service, and returns to the Originator the dollar amounts allowed under the terms of the plan. The Paid response is not used in payer-to-payer transactions.

Rejected – This occurs when the Processor has encountered an error in the transaction or processing.

Please see section *“Transaction Response Status”*, *“Duplicate Transactions”* and *“Duplicate Processing For All Rebill Transactions”* for more information about why duplicate responses are not supported in Rebill transactions.

14.2 CLAIM REBILL REQUEST DIAGRAMS

14.2.1 DIAGRAM FOR TRANSMISSION OF A CLAIM REBILL TRANSACTION

For a Claim Rebill, the scenario defined includes a Claim Rebill from a Sender to a Receiver.

Claim Rebill transactions use the same diagrams as the Billing transactions.

14.3 CLAIM REBILL REQUEST SEGMENTS

14.3.1 TRANSACTION HEADER SEGMENT (CLAIM REBILL)

TRANSACTION HEADER SEGMENT		MANDATORY SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	For Transaction Code of "B3", in the Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "1" (Rx Billing).
101-A1	IIN NUMBER	M	
104-A4	PROCESSOR CONTROL NUMBER	M	
109-A9	TRANSACTION COUNT	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	
110-AK	SOFTWARE VENDOR/CERTIFICATION ID	M	

Notes on Transaction Header Segment on a Claim Rebill Request:

The Transaction Header Segment is a mandatory, fixed length segment for a Claim Rebill request. The "Situation" column is not applicable.

14.3.2 INSURANCE SEGMENT (CLAIM REBILL)

INSURANCE SEGMENT		MANDATORY SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
302-C2	CARDHOLDER ID	M	
312-CC	CARDHOLDER FIRST NAME	Q	Claim Rebill: Required if necessary for state/federal/regulatory agency programs when the cardholder has a first name.
313-CD	CARDHOLDER LAST NAME	Q	Claim Rebill: Required if necessary for state/federal/regulatory agency programs.
524-FO	PLAN ID	O	Claim Rebill: Optional.
309-C9	ELIGIBILITY CLARIFICATION CODE	Q	Claim Rebill: Required if needed for receiver inquiry validation and/or determination, when eligibility is not maintained at the dependent level. Required in special situations as defined by the code to clarify the eligibility of an individual, which may extend coverage.
301-C1	GROUP ID	Q	Claim Rebill: Required if necessary for state/federal/regulatory agency programs. Required if needed for pharmacy claim processing and payment. Required if needed to match the reversal to the original billing transaction.
303-C3	PERSON CODE	Q	Claim Rebill: Required if needed to uniquely identify the family members within the Cardholder ID.
306-C6	PATIENT RELATIONSHIP CODE	Q	Claim Rebill: Required if needed to uniquely identify the relationship of the Patient to the Cardholder.
359-2A	MEDIGAP ID	Q	Claim Rebill: Required, if known, when patient has Medigap coverage.
360-2B	MEDICAID INDICATOR	Q	Claim Rebill: Required, if known, when patient has Medicaid coverage.
361-2D	PROVIDER ACCEPT ASSIGNMENT INDICATOR	Q	Claim Rebill: Required if necessary for state/federal/regulatory agency programs.
115-N5	MEDICAID ID NUMBER	Q	Claim Rebill: Required, if known, when patient has Medicaid coverage and Medicaid ID has not been provided in Cardholder ID (302-C2). Required when used for payer-to-payer coordination of benefits to track the claim without regard to the "Service Provider ID, Prescription Number, & Date of Service".
116-N6	MEDICAID AGENCY NUMBER	N	Claim Rebill: Not used.

Notes on Insurance Segment on a Claim Rebill Request:

The Insurance Segment is mandatory for a Claim Rebill request.

14.3.2.1 INSURANCE SEGMENT (SUBROGATION STANDARD CLAIM REBILL)

INSURANCE SEGMENT		MANDATORY SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
115-N5	MEDICAID ID NUMBER	QM	Subrogation - Claim Rebill: Required for Medicaid Subrogation to identify the member as uniquely known to Medicaid.
116-N6	MEDICAID AGENCY NUMBER	QM	Subrogation - Claim Rebill: Required for Medicaid Subrogation to identify the Medicaid agency.

Notes on Insurance Segment on a Subrogation Standard Claim Rebill Request:

The rules above for an "Insurance Segment (Claim Rebill)" are to be followed for Subrogation. Specific fields that are used differently in Subrogation are noted in the table above.

14.3.3 PATIENT SEGMENT (CLAIM REBILL)

PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
618-RR	PATIENT ID COUNT	Q	Claim Rebill: Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.
331-CX	PATIENT ID QUALIFIER	Q***R***	Claim Rebill: Required if Patient ID (332-CY) is used.
332-CY	PATIENT ID	Q***R***	Claim Rebill: Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.
304-C4	DATE OF BIRTH	R	Claim Rebill: Required.
305-C5	PATIENT GENDER CODE	R	Claim Rebill: Required.
310-CA	PATIENT FIRST NAME	Q	Claim Rebill: Required when the patient has a first name.
E09-OC	PATIENT MIDDLE NAME	N	Claim Rebill: Not used
311-CB	PATIENT LAST NAME	R	Claim Rebill: Required.
E11-OE	PATIENT NAME SUFFIX	N	Claim Rebill: Not used
E10-OD	PATIENT NAME PREFIX	N	Claim Rebill: Not used
B08-7A	PATIENT STREET ADDRESS LINE 1	O	Claim Rebill: Optional.
B09-7B	PATIENT STREET ADDRESS LINE 2	O	Claim Rebill: Optional. Use only when a second address line is needed and Patient Street Address Line 1 (B08-7A) has been used.
323-CN	PATIENT CITY ADDRESS	O	Claim Rebill: Optional.
324-CO	PATIENT STATE/PROVINCE ADDRESS	O	Claim Rebill: Optional.
325-CP	PATIENT ZIP/POSTAL CODE	O	Claim Rebill: Optional.
A43-1K	PATIENT COUNTRY CODE	Q	Claim Rebill: Required if country is not "US".
326-CQ	PATIENT TELEPHONE NUMBER	O	Claim Rebill: Optional.
307-C7	PLACE OF SERVICE	Q	Claim Rebill: Required if necessary for state/federal/regulatory agency programs. Otherwise, required when necessary to identify the Place of Service for non-self administered drugs.
333-CZ	EMPLOYER ID	Q	Claim Rebill: Required if "required by law" as defined in the HIPAA final Privacy regulations section 164.501 definitions (45 CFR Parts 160 and 164 Standards for Privacy of Individually Identifiable Health Information; Final Rule – Thursday, December 28, 2000, page 82803 and following, and Wednesday, August 14, 2002, page 53267 and following.) Required if needed for Workers' Compensation billing.
334-1C	SMOKER/NON-SMOKER CODE	N	Claim Rebill: Not used.
335-2C	PREGNANCY INDICATOR	Q	Claim Rebill: Required if pregnancy could result in different coverage, pricing, or patient financial responsibility. Required if "required by law" as defined in the HIPAA final Privacy regulations section 164.501 definitions (45 CFR Parts 160 and 164 Standards for Privacy of Individually Identifiable Health Information; Final Rule –

OFFICIAL RELEASE

PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Thursday, December 28, 2000, page 82803 and following, and Wednesday, August 14, 2002, page 53267 and following.)
350-HN	PATIENT E-MAIL ADDRESS	I	Claim Rebill: May be submitted for the receiver to relay patient health care communications via the Internet when provided by the patient. This field is informational only.
384-4X	PATIENT RESIDENCE	Q	Claim Rebill: Required if this field could result in different coverage, pricing, or patient financial responsibility.
A22-YR	PATIENT ID ASSOCIATED STATE/PROVINCE ADDRESS	N	Claim Rebill: Not used.
B38-1Y	PATIENT ID ASSOCIATED COUNTRY CODE	N	Claim Rebill: Not used.
A45-1R	VETERINARY USE INDICATOR	N	Claim Rebill: Not used.
E06-S8	SPECIES	Q	Claim Rebill: Not used for humans.

Notes on Patient Segment on a Claim Rebill Request:

The Patient Segment is situational for a Claim Rebill request. It is used when a receiver needs some of the patient demographic information to perform eligibility and claim/encounter determination. The Patient Segment must be submitted when needed to differentiate between the patient and the cardholder. If the cardholder and the patient are the same, then the Patient Segment is not submitted unless additional information about the patient is needed to clarify the claim/encounter determination. The Segment is mandatory if required under provider payer contract or mandatory on claims where this information is necessary for adjudication of the claim.

14.3.3.1 PATIENT SEGMENT (SUBROGATION STANDARD CLAIM REBILL)

PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
310-CA	PATIENT FIRST NAME	QM	Subrogation - Claim Rebill: Required for Medicaid Subrogation to assist in identifying the cardholder when specific eligibility cannot be established. Required for Subrogation to assist in matching the patient to the member eligibility record for benefit determination.
B08-7A	PATIENT STREET ADDRESS LINE 1	QM	Subrogation - Claim Rebill: Required for Medicaid Subrogation to assist in identifying the cardholder when specific eligibility cannot be established. Required for Subrogation to assist in matching the patient to the member eligibility record for benefit determination.
B09-7B	PATIENT STREET ADDRESS LINE 2	QM	Subrogation - Claim Rebill: Required for Medicaid Subrogation to assist in identifying the cardholder when specific eligibility cannot be established. Required for Subrogation to assist in matching the patient to the member eligibility record for benefit determination. Use only when a second address line is needed and Patient Street Address Line 1 (B08-7A) has been used.
323-CN	PATIENT CITY ADDRESS	QM	Subrogation - Claim Rebill: Required for Medicaid Subrogation to assist in identifying the cardholder when specific eligibility cannot be established. Required for Subrogation to assist in matching the patient to the member eligibility record for benefit determination.
324-CO	PATIENT STATE/PROVINCE ADDRESS	QM	Subrogation - Claim Rebill: Required for Medicaid Subrogation to assist in identifying the cardholder when specific eligibility cannot be established.

C02-4P	ORIGINAL MANUFACTURER PRODUCT ID QUALIFIER	Q	Claim Rebill: Required if Original Manufacturer Product ID (C01-4N) is used.
C01-4N	ORIGINAL MANUFACTURER PRODUCT ID	Q	Claim Rebill: Required if a repackaged drug is being dispensed and the jurisdiction or payer requires the Original Manufacturer Product ID of the drug that was repackaged be submitted.
C91-KK	LTPAC DISPENSE FREQUENCY	Q	Claim Rebill: Required on short cycle eligible claims to meet CMS reporting requirements. Required when the submitter must clarify the type of services being performed as a condition for proper reimbursement by the payer.
C90-KH	LTPAC BILLING METHODOLOGY	Q	Claim Rebill: Required when the submitter must clarify the type of services being performed as a condition for proper reimbursement by the payer.
C92-KM	NUMBER OF LTPAC DISPENSING EVENTS	Q	Claim Rebill: Required when the submitter must clarify the number of dispensing events that occurred as a condition for proper reimbursement by the payer.
D18-K9	DO NOT DISPENSE BEFORE DATE	Q	Claim Rebill: Required when the prescriber indicates a "do not dispense before date" for CII except for claims for patients residing in a Long Term and Post-Acute Care (LTPAC) setting.

Notes on Claim Segment on a Claim Rebill Request:

The Claim Segment is mandatory for a Claim Rebill Request. The Claim Segment defines the product dispensed, dispensing information, reference information for tieback to an original prescription in the case of partial fillings, or authorization information.

14.3.4.1 CLAIM SEGMENT (SUBROGATION STANDARD CLAIM REBILL)

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use
- 265 -

CLAIM SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
B98-34	RECONCILIATION ID	RM	Subrogation - Claim Rebill: Required. Contains the Reconciliation ID returned on the original payers' paid claim response transaction..
A29-ZS	REPORTED ADJUDICATED PROGRAM TYPE	RM	Subrogation - Claim Rebill: Required. Contains the value returned in Adjudicated Program Type (A28-ZR) of the original payer's response transaction

Notes on Claim Segment on a Subrogation Standard Claim Rebill Request:

The rules above for a "Claim Segment (Claim Rebill)" are to be followed for Subrogation. Specific fields that are used differently in Subrogation are noted in the table above.

14.3.5 PRICING SEGMENT (CLAIM REBILL)

PRICING SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
409-D9	INGREDIENT COST SUBMITTED	R	Claim Rebill: Required.
412-DC	DISPENSING FEE SUBMITTED	Q	Claim Rebill: Required if its value has an effect on the Gross Amount Due (430-DU) calculation. Zero (0) is a valid value.
477-BE	PROFESSIONAL SERVICE FEE SUBMITTED	N	Claim Rebill: Not used.
433-DX	PATIENT PAY AMOUNT REPORTED	Q	Claim Rebill: Required only when the provider is responsible for applying the prescription pricing formula and determining the patient liability amount. Otherwise not used in real-time transactions. Not used in coordination of benefit transactions to pass patient liability information to a downstream payer. See section "Standard Conventions", "Repetition and Multiple Occurrences", "Repeating Data Elements", "Request Segments", "Coordination of Benefits/Other Payments Segment".
438-E3	INCENTIVE AMOUNT SUBMITTED	Q	Claim Rebill: Required if its value has an effect on the Gross Amount Due (430-DU) calculation. Zero (0) is a valid value.
478-H7	OTHER AMOUNT CLAIMED SUBMITTED COUNT	Q	Claim Rebill: Maximum count of 3. Required if Other Amount Claimed Submitted Qualifier (479-H8) is used.
479-H8	OTHER AMOUNT CLAIMED SUBMITTED QUALIFIER	Q***R***	Claim Rebill: Required if Other Amount Claimed Submitted (480-H9) is used.
480-H9	OTHER AMOUNT CLAIMED SUBMITTED	Q***R***	Claim Rebill: Required if its value has an effect on the Gross Amount Due (430-DU) calculation. Zero (0) is a valid value.
D60-RK	REGULATORY FEE COUNT	Q	Claim Rebill: Maximum count of 3. Required if Regulatory Fee Type Code (D61-RL) is used.
D61-RL	REGULATORY FEE TYPE CODE	Q***R***	Claim Rebill: Required if Regulatory Fee Amount Submitted (481-HA) is used.
481-HA	REGULATORY FEE AMOUNT SUBMITTED	Q***R***	Claim Rebill: Required if its value has an effect on the Gross Amount Due (430-DU) calculation. Zero (0) is a valid value.

Version F6

January 2020

OFFICIAL RELEASE

PRICING SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
482-GE	PERCENTAGE TAX AMOUNT SUBMITTED	Q	Claim Rebill: Required if its value has an effect on the Gross Amount Due (430-DU) calculation. Zero (0) is a valid value.
483-HE	PERCENTAGE TAX RATE SUBMITTED	Q	Claim Rebill: Required if Percentage Tax Amount Submitted (482-GE) and Percentage Tax Basis Submitted (484-JE) are used. Required if this field could result in different pricing. Required if needed to calculate Percentage Tax Amount Paid (559-AX).
484-JE	PERCENTAGE TAX BASIS SUBMITTED	Q	Claim Rebill: Required if Percentage Tax Amount Submitted (482-GE) and Percentage Tax Rate Submitted (483-HE) are used. Required if this field could result in different pricing. Required if needed to calculate Percentage Tax Amount Paid (559-AX).
426-DQ	USUAL AND CUSTOMARY CHARGE	Q	Claim Rebill: Required if needed per trading partner agreement.
430-DU	GROSS AMOUNT DUE	R	Claim Rebill: Required. See Pricing Formula for fields used in calculation.
423-DN	BASIS OF COST DETERMINATION	Q	Claim Rebill: Required if needed for receiver claim/encounter adjudication.
D14-KX	SUBROGATION AMOUNT REQUESTED	N	Claim Rebill: Not used

Notes on Pricing Segment on a Claim Rebill Request:

The Pricing Segment is mandatory for a Claim Rebill Request. The Pricing Segment defines dollar amounts and basis of costs for a Claim Billing, Claim Rebill, or Encounter.

It is highly recommended that whenever possible, the individual dollar fields are requested of the sender by the receiver. On the response, the sender should return the individual payment response fields to allow the receiver to reconcile against the requested payment fields. It is recommended that for the dollar fields, if the field is not required or situational in the calculation, that the dollar fields are not sent.

See section "Pricing Guidelines".

14.3.5.1 PRICING SEGMENT (SUBROGATION STANDARD CLAIM REBILL)

PRICING SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
D14-KX	SUBROGATION AMOUNT REQUESTED	QM	Subrogation - Claim Rebill: Required for all types of subrogation.
433-DX	PATIENT PAY AMOUNT REPORTED	QM	Subrogation - Claim Rebill: Restricted, can only be sent to an entity with a state/federal/regulatory agency program authority to receive this information.

Notes on Pricing Segment on a Subrogation Standard Claim Rebill Request:

The rules above for a "Pricing Segment (Claim Rebill)" are to be followed for Subrogation. Specific fields that are used differently in Subrogation are noted in the table above.

14.3.6 PHARMACY PROVIDER SEGMENT (CLAIM REBILL)

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

- 267 -

PHARMACY PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
465-EY	PROVIDER ID QUALIFIER	Q	Claim Rebill: Required if Provider ID (444-E9) is used.
444-E9	PROVIDER ID	Q	Claim Rebill: Required if necessary for state/federal/regulatory agency programs. Required if necessary to identify the individual responsible for dispensing of the prescription. Required if needed for reconciliation of encounter-reported data or encounter reporting.
B96-4A	PROVIDER FIRST NAME	Q	Claim Rebill: For Workers' Compensation only. The provider responsible for the dispensing of the prescription as required by state regulations.
B97-4M	PROVIDER LAST NAME	Q	Claim Rebill: For Workers' Compensation only. The provider responsible for the dispensing of the prescription as required by state regulations.

Notes on Pharmacy Provider Segment on a Claim Rebill Request:

The Pharmacy Provider Segment is situational for a Claim Rebill request. It is used when a receiver needs pharmacy provider information to perform claim/encounter determination.

14.3.7 PRESCRIBER SEGMENT (CLAIM REBILL)

PRESCRIBER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
466-EZ	PRESCRIBER ID QUALIFIER	Q	Claim Rebill: Required if Prescriber ID (411-DB) is used.
411-DB	PRESCRIBER ID	Q	Claim Rebill: Required if this field could result in different coverage or patient financial responsibility. Required if necessary for state/federal/regulatory agency programs.
A24-ZK	PRESCRIBER ID ASSOCIATED STATE/PROVINCE ADDRESS	N	Claim Rebill: Not used.
B41-3B	PRESCRIBER ID ASSOCIATED COUNTRY CODE	N	Claim Rebill: Not used.
427-DR	PRESCRIBER LAST NAME	Q	Claim Rebill: Required when the Prescriber ID (411-DB) is not known. Required if needed for Prescriber ID (411-DB) validation/clarification.
498-PM	PRESCRIBER TELEPHONE NUMBER	Q	Claim Rebill: Required if needed for Workers' Compensation. Required if needed to assist in identifying the prescriber. Required if needed for Prior Authorization process.
B26-7T	PRESCRIBER TELEPHONE NUMBER EXTENSION	Q	Claim Rebill: Required if needed for Workers' Compensation. Required if needed to assist in identifying the prescriber. Required if needed for Prior Authorization process.
468-2E	PRIMARY CARE PROVIDER ID QUALIFIER	Q	Claim Rebill: Required if Primary Care Provider ID (421-DL) is used.
421-DL	PRIMARY CARE PROVIDER ID	Q	Claim Rebill: Required if needed for receiver claim/encounter determination, if known and available. Required if this field could result in different coverage or patient financial responsibility.

PRESCRIBER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Required if necessary for state/federal/regulatory agency programs.
470-4E	PRIMARY CARE PROVIDER LAST NAME	Q	Claim Rebill: Required if this field is used as an alternative for Primary Care Provider ID (421-DL) when ID is not known. Required if needed for Primary Care Provider ID (421-DL) validation/clarification.
364-2J	PRESCRIBER FIRST NAME	Q	Claim Rebill: Required if needed to assist in identifying the prescriber. Required if necessary for state/federal/regulatory agency programs.
B27-7U	PRESCRIBER STREET ADDRESS LINE 1	Q	Claim Rebill: Required if needed to assist in identifying the prescriber. Required if necessary for state/federal/regulatory agency programs.
B28-7V	PRESCRIBER STREET ADDRESS LINE 2	Q	Claim Rebill: Required if needed to assist in identifying the prescriber. Required if necessary for state/federal/regulatory agency programs. Use only when a second address line is needed and Prescriber Street Address Line 1 (B27-7U) has been used.
366-2M	PRESCRIBER CITY ADDRESS	Q	Claim Rebill: Required if needed to assist in identifying the prescriber. Required if necessary for state/federal/regulatory agency programs.
367-2N	PRESCRIBER STATE/PROVINCE ADDRESS	Q	Claim Rebill: Required if needed to assist in identifying the prescriber. Required if necessary for state/federal/regulatory agency programs.
368-2P	PRESCRIBER ZIP/POSTAL ZONE	Q	Claim Rebill: Required if needed to assist in identifying the prescriber. Required if necessary for state/federal/regulatory agency programs.
B42-3C	PRESCRIBER COUNTRY CODE	Q	Claim Rebill: Required if country is not "US".
A25-ZM	PRESCRIBER ALTERNATE ID QUALIFIER	N	Claim Rebill: Not used.
A26-ZP	PRESCRIBER ALTERNATE ID	N	Claim Rebill: Not used.
A27-ZQ	PRESCRIBER ALTERNATE ID ASSOCIATED STATE/PROVINCE ADDRESS	N	Claim Rebill: Not used.
B40-3A	PRESCRIBER ALTERNATE ID ASSOCIATED COUNTRY CODE	N	Claim Rebill: Not used.
D01-KV	PRESCRIBER DEA NUMBER	Q	Claim Rebill: Required if needed for Prescriber ID (411-DB) controlled substance prescriptive authority validation.
D57-RG	PRESCRIBER PLACE OF SERVICE	Q	Claim Rebill: Required when a valid prescriber place of service value is reported by the prescriber.
E12-0F	PRESCRIBER MIDDLE NAME	N	Claim Rebill: Not used.

Notes on Prescriber Segment on a Claim Rebill Request:

The Prescriber Segment is situational for a Claim Rebill request. It is used when prescriber information is needed to perform claim/encounter determination. The Segment is mandatory if required under provider payer contract or mandatory on claims where this information is necessary for adjudication of the claim.

14.3.8 COORDINATION OF BENEFITS/OTHER PAYMENTS SEGMENT (CLAIM REBILL)

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

- 269 -

COORDINATION OF BENEFITS/OTHER PAYMENTS SEGMENT		SITUATIONAL SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
337-4C	COORDINATION OF BENEFITS/OTHER PAYMENTS COUNT	M	Maximum count of 3.
338-5C	OTHER PAYER COVERAGE TYPE	M***R***	Claim Rebill: Occurs with Coordination of Benefits/Other Payments Count (337-4C). Grouped with Other Payer ID Qualifier (339-6C), Other Payer ID (340-7C), Other Payer Date (443-E8), Other Payer Adjudicated Program Type (C47-9T), Other Payer Reconciliation ID (C49-9V), and either Other Payer Amount Paid Count (341-HB) and its grouping, Other Payer-Patient Responsibility Amount Count (353-NR) and its grouping, or Other Payer Reject Count (471-5E) and its grouping. May be grouped with the Other Payer Percentage Tax Exempt Indicator (D51-P7), the Other Payer Regulatory Fee Type Count (D53-P9) and its grouping, and/or the Benefit Stage Indicator Count (C50-9W) and its grouping, when applicable for the Other Payer. See section "Repetition and Multiple Occurrences", "Repeating Data Elements", "Request Segments", "Coordination of Benefits/Other Payments Segment".
339-6C	OTHER PAYER ID QUALIFIER	Q***R***	Claim Rebill: Required if Other Payer ID (340-7C) is used.
340-7C	OTHER PAYER ID	Q***R***	Claim Rebill: Required if identification of the Other Payer is necessary for claim/encounter adjudication.
C47-9T	OTHER PAYER ADJUDICATED PROGRAM TYPE	Q***R***	Claim Rebill: Required if identification of the Other Payer Adjudication Program Type is known.
C49-9V	OTHER PAYER RECONCILIATION ID	Q***R***	Claim Rebill: Required if the identification of the Other Payer Reconciliation ID is known.
443-E8	OTHER PAYER DATE	Q***R***	Claim Rebill: Required if identification of the Other Payer Date is necessary for claim/encounter adjudication.
993-A7	INTERNAL CONTROL NUMBER	Q***R***	Claim Rebill: Required when used for payer-to-payer coordination of benefits to track the claim without regard to the "Service Provider ID, Prescription Number, & Date of Service".
341-HB	OTHER PAYER AMOUNT PAID COUNT	Q	Claim Rebill: Maximum count of 9. Required if Other Payer Amount Paid Qualifier (342-HC) is used.
342-HC	OTHER PAYER AMOUNT PAID QUALIFIER	Q***R***	Claim Rebill: Required if Other Payer Amount Paid (431-DV) is used.
431-DV	OTHER PAYER AMOUNT PAID	Q***R***	Claim Rebill: Required if other payer has approved payment for some/all of the billing. Zero (0) is a valid value. Not used for patient financial responsibility only billing. Not used for non-governmental agency programs if Other Payer-Patient Responsibility Amount (352-NQ) is submitted.
D51-P7	OTHER PAYER PERCENTAGE TAX EXEMPT INDICATOR	Q	Claim Rebill: Required if the other payer has reported a valid value as Percentage Tax Exempt Indicator (557-AV).
D53-P9	OTHER PAYER REGULATORY FEE TYPE COUNT	Q	Claim Rebill: Maximum count of 3. Required if Other Payer Regulatory Fee Type Code (D63-RN) is used.
D63-RN	OTHER PAYER REGULATORY FEE TYPE CODE	Q***R***	Claim Rebill: Required if Other Payer Regulatory Fee Exempt Indicator (D52-P8) is used.
D52-P8	OTHER PAYER REGULATORY FEE EXEMPT INDICATOR	Q***R***	Claim Rebill:

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

COORDINATION OF BENEFITS/OTHER PAYMENTS SEGMENT		SITUATIONAL SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
			Required if other payer has reported a valid value as Regulatory Fee Exempt Indicator (D62-RM).
471-5E	OTHER PAYER REJECT COUNT	Q	Claim Rebill: Maximum count of 5. Required if Other Payer Reject Code (472-6E) is used.
472-6E	OTHER PAYER REJECT CODE	Q***R***	Claim Rebill: Required when the other payer has denied the payment for the billing. Note: This field must only contain the NCPDP Reject Code (511-FB) values.
353-NR	OTHER PAYER-PATIENT RESPONSIBILITY AMOUNT COUNT	Q	Claim Rebill: Maximum count of 25. Required if Other Payer-Patient Responsibility Amount Qualifier (351-NP) is used. Note: The occurrences are dependent upon the number of component parts returned from a previous payer.
351-NP	OTHER PAYER-PATIENT RESPONSIBILITY AMOUNT QUALIFIER	Q***R***	Claim Rebill: Required if Other Payer-Patient Responsibility Amount (352-NQ) is used.
352-NQ	OTHER PAYER-PATIENT RESPONSIBILITY AMOUNT	Q***R***	Claim Rebill: Required if necessary for patient financial responsibility only billing. Required if necessary for state/federal/regulatory agency programs. Not used for non-governmental agency programs if Other Payer Amount Paid (431-DV) is submitted.
C50-9W	BENEFIT STAGE INDICATOR COUNT	Q	Claim Rebill: Maximum count of 4. Required if Benefit Stage Indicators (C51-9X) are submitted.
C51-9X	BENEFIT STAGE INDICATOR	Q***R***	Claim Rebill: As required by COB payer. Must only have one value per iteration – value must not be repeated.

Notes on Coordination of Benefits/Other Payments Segment on a Claim Rebill Request:

The Coordination of Benefits/Other Payments Segment is not used for a Claim Rebill request to a primary payer.

The Coordination of Benefits/Other Payments Segment is required for a Claim Rebill request to a non-primary payer. It is used by downstream payers to access claim adjudication results (financial or reject code values) from all previous payers to determine their claim/encounter results.

The Coordination of Benefits/Other Payments Segment is also used by a payer to uniquely identify a claim or encounter in case of duplicate processing. For example, the same patient may have multiple prescription benefit plans from the same processor where the processor is the primary *and* secondary payer, or primary *and* tertiary, or secondary *and* tertiary payer, etc. The downstream payer uses the duplicate claim logic fields, including the Other Payer Coverage Type (338-5C) to differentiate which claim or encounter to process. See section “*Transaction Response Status*”, “*Duplicate Transactions*”.

Note, the Other Payer Coverage Type (338-5C) occurrences do not have to appear in sequential order (primary, secondary, tertiary).

The Other Payer Reconciliation ID (C49-9V) would not be reported when the COB occurrence is reporting a rejected response from that previous payer, represented by the values submitted in the Other Payer Reject Code (472-6E) field.

See section “[Other Coverage Code \(308-C8\)](#)”.

14.3.9 WORKERS' COMPENSATION SEGMENT (CLAIM REBILL)

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

WORKERS' COMPENSATION SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Required if transaction is submitted by a provider or agent, but paid to another party.
B39-1Z	PAY TO COUNTRY CODE	Q	Claim Rebill: Required if country is not "US".
125-TZ	GENERIC EQUIVALENT PRODUCT ID QUALIFIER	Q	Claim Rebill: Required if Generic Equivalent Product ID (126-UA) is used.
126-UA	GENERIC EQUIVALENT PRODUCT ID	Q	Claim Rebill: Required if necessary for state/federal/regulatory agency programs.

Notes on Workers' Compensation Segment on a Claim Rebill Request:

The Workers' Compensation Segment is situational for a Claim Rebill request. It is used when processing a Claim Billing, Claim Rebill, or Encounter for a work-related injury or condition.

14.3.10 DUR/PPS SEGMENT (CLAIM REBILL)

DUR/PPS SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
473-7E	DUR/PPS CODE COUNTER	Q***R***	Claim Rebill: Maximum of 9 occurrences. Required if DUR/PPS Segment is used.
439-E4	REASON FOR SERVICE CODE	Q***R***	Claim Rebill: Required if this field could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome. Required if this field affects payment for or documentation of professional pharmacy service.
440-E5	PROFESSIONAL SERVICE CODE	Q***R***	Claim Rebill: Required if this field could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome. Required if this field affects payment for or documentation of professional pharmacy service.
441-E6	RESULT OF SERVICE CODE	Q***R***	Claim Rebill: Required if this field could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome. Required if this field affects payment for or documentation of professional pharmacy service.
474-8E	DUR/PPS LEVEL OF EFFORT	Q***R***	Claim Rebill: Required if this field could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome. Required if this field affects payment for or documentation of professional pharmacy service.
475-J9	DUR/DUE CO-AGENT ID QUALIFIER	Q***R***	Claim Rebill: Required if DUR/DUE Co-Agent ID (476-H6) is used.
476-H6	DUR/DUE CO-AGENT ID	Q***R***	Claim Rebill: Required if this field could result in different drug utilization review outcome. Required if this field affects payment for or documentation of professional pharmacy service.

Notes on DUR/PPS Segment on a Claim Rebill Request:

The DUR/PPS Segment is situational for a Claim Rebill request. It is used when a sender notifies the receiver of drug utilization, drug evaluations, or information on the appropriate selection to process the claim/encounter. The DUR/PPS information may be sent on the initial submission or alternatively sent after a DUR/PPS rejection from a receiver. The Segment is mandatory if required under provider payer contract or mandatory on claims where this information is necessary for adjudication of the claim.

14.3.11 COMPOUND SEGMENT (CLAIM REBILL)

COMPOUND SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
450-EF	COMPOUND DOSAGE FORM DESCRIPTION CODE	M	
451-EG	COMPOUND DISPENSING UNIT FORM INDICATOR	M	
C60-AG	COMPOUND LEVEL OF COMPLEXITY	Q	Required if specified in trading partner agreement.
447-EC	COMPOUND INGREDIENT COMPONENT COUNT	M	Maximum count of 25 ingredients.
488-RE	COMPOUND PRODUCT ID QUALIFIER	M***R***	
489-TE	COMPOUND PRODUCT ID	M***R***	
448-ED	COMPOUND INGREDIENT QUANTITY	M***R***	
449-EE	COMPOUND INGREDIENT DRUG COST	Q***R***	Claim Rebill: Required if needed for receiver claim determination when multiple products are billed.
490-UE	COMPOUND INGREDIENT BASIS OF COST DETERMINATION	Q***R***	Claim Rebill: Required if needed for receiver claim determination when multiple products are billed.
362-2G	COMPOUND INGREDIENT MODIFIER CODE COUNT	Q	Claim Rebill: Required when Compound Ingredient Modifier Code (363-2H) is sent. Maximum count of 10.
363-2H	COMPOUND INGREDIENT MODIFIER CODE	Q***R***	Claim Rebill: Required if necessary for state/federal/regulatory agency programs.

Notes on Compound Segment on a Claim Rebill Request:

The Compound Segment is situational for a Claim Rebill request. It is used for multi-ingredient prescriptions, when each ingredient is reported. The Segment is mandatory if required under provider payer contract or mandatory on claims where this information is necessary for adjudication of the claim.

14.3.12 CLINICAL SEGMENT (CLAIM REBILL)

CLINICAL SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
491-VE	DIAGNOSIS CODE COUNT	Q	Claim Rebill: Maximum count of 5. Required if Diagnosis Code Qualifier (492-WE) and Diagnosis Code (424-DO) are used.
492-WE	DIAGNOSIS CODE QUALIFIER	Q***R***	Claim Rebill: Required if Diagnosis Code (424-DO) is used.
424-DO	DIAGNOSIS CODE	Q***R***	Claim Rebill: The value for this field is obtained from the prescriber or authorized representative. Required if this field could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome. Required if this field affects payment for professional pharmacy service. Required if this information can be used in place of prior authorization. Required if necessary for state/federal/regulatory agency programs.
493-XE	CLINICAL INFORMATION COUNTER	Q***R***	Claim Rebill: Maximum 5 occurrences supported. Grouped with Measurement fields (Measurement Date (494-ZE), Measurement Time (495-H1), Measurement Dimension (496-H2), Measurement Unit (497-H3), Measurement Value (499-H4).

Required if necessary for patient's weight and height when billing Medicare for a claim that includes a Certificate of Medical Necessity (CMN). Required if necessary when this field could result in different coverage and/or drug utilization review outcome.
499-H4	MEASUREMENT VALUE	Q***R***	Claim Rebill: Required if Measurement Dimension (496-H2) and Measurement Unit (497-H3) are used. Required if necessary for patient's weight and height when billing Medicare for a claim that includes a Certificate of Medical Necessity (CMN). Required if necessary when this field could result in different coverage and/or drug utilization review outcome.

Notes on Clinical Segment on a Claim Rebill Request:

The Clinical Segment is situational for a Claim Rebill request. It is used to specify diagnosis information associated with the Claim Billing, Claim Rebill, or Encounter transaction. The Segment is mandatory if required under provider payer contract or mandatory on claims where this information is necessary for adjudication of the claim.

14.3.13 ADDITIONAL DOCUMENTATION SEGMENT (CLAIM REBILL)

ADDITIONAL DOCUMENTATION SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
369-2Q	ADDITIONAL DOCUMENTATION TYPE ID	M	
374-2V	REQUEST PERIOD BEGIN DATE	Q	Claim Rebill: Required if necessary for state/federal/regulatory agency programs.
375-2W	REQUEST PERIOD RECERT/REVISED DATE	Q	Claim Rebill: Required if necessary for state/federal/regulatory agency programs. Required if the Request Status (373-2U) = "2" (Revision) or "3" (Recertification).
373-2U	REQUEST STATUS	Q	Claim Rebill: Required if necessary for state/federal/regulatory agency programs.
371-2S	LENGTH OF NEED QUALIFIER	Q	Claim Rebill: Required if Length of Need (370-2R) is used.
370-2R	LENGTH OF NEED	Q	Claim Rebill: Required if necessary for state/federal/regulatory agency programs.

FACILITY SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Required if this field could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome. Use only when a second address line is needed and Facility Street Address Line 1 (B20-7M) has been used.
388-5J	FACILITY CITY ADDRESS	Q	Claim Rebill: Required if this field could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome.
387-3V	FACILITY STATE/PROVINCE ADDRESS	Q	Claim Rebill: Required if this field could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome.
389-6D	FACILITY ZIP/POSTAL ZONE	Q	Claim Rebill: Required if this field could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome.
B37-1X	FACILITY COUNTRY CODE	Q	Claim Rebill: Required if country is not "US".

Notes on Facility Segment on a Claim Rebill Request:

The Facility Segment is situational for Claim Rebill request. It is used when these fields could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome. The Facility identified in this section is not the dispensing pharmacy.

14.3.15 NARRATIVE SEGMENT (CLAIM REBILL)

NARRATIVE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
390-BM	NARRATIVE MESSAGE	Q	Claim Rebill: Required if necessary only to support exception handling of pharmacy claims for Medicare Part B claim billing.

Notes on Narrative Segment on a Claim Rebill Request:

The Narrative Segment is situational for Claim Rebill request. It is used to support exception handling of pharmacy claims for Medicare claim billing.

14.3.16 INTERMEDIARY SEGMENT (CLAIM REBILL)

INTERMEDIARY SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
B44-8G	INTERMEDIARY ID COUNT	M	Claim Rebill: Maximum count of 9.
B45-8H	INTERMEDIARY ID TYPE CODE	M***R***	
B46-8J	INTERMEDIARY ID TYPE ENTITY	M***R***	
B47-8K	INTERMEDIARY ID QUALIFIER	M***R***	
B48-8M	INTERMEDIARY ID	M***R***	
B49-8N	INTERMEDIARY ID STATE/PROVINCE ADDRESS	Q***R***	Claim Rebill: Required when necessary to identify the State assigning the Intermediary ID.
B55-8U	INTERMEDIARY ID COUNTRY CODE	Q***R***	Claim Rebill: Required if country is not "US".

Notes on Intermediary Segment on a Claim Rebill Request:

The Intermediary Segment is situational for Claim Rebill request. It is used to support the authorization from an intermediary such as a Prescription Drug Monitoring Program (PDMP) or Risk Evaluation and Mitigation Strategy (REMS) program.

14.4 CLAIM REBILL RESPONSE DIAGRAMS AND SEGMENTS

14.4.1 TRANSMISSION ACCEPTED/TRANSACTION PAID

14.4.1.1 DIAGRAM FOR TRANSMISSION OF A CLAIM REBILL RESPONSE (TRANSMISSION ACCEPTED/TRANSACTION PAID)

Claim Rebill transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid)

The Paid response is not used in payer-to-payer transactions.

The duplicate response codes for the Claim Rebill transaction are not applicable.

See section "Transaction Response Status", "Duplicate Transactions" for the handling of a duplicate transaction.

14.4.1.2.2 RESPONSE MESSAGE SEGMENT (CLAIM REBILL) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE MESSAGE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Claim Rebill: Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Claim Rebill Response:

The Response Message Segment is situational for Claim Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid). It is used when additional text information needs to be sent.

14.4.1.2.3 RESPONSE INSURANCE SEGMENT (CLAIM REBILL) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
301-C1	GROUP ID	Q	Claim Rebill: Required if needed to identify the actual cardholder or employer group, to identify appropriate group number, when available. Required to identify the actual group that was used when multiple group coverages exist. Note: This field may contain the Group ID echoed from the request. May contain the actual Group ID if unknown to the receiver.
524-FO	PLAN ID	Q	Claim Rebill: Required if needed to identify the actual plan parameters, benefit, or coverage criteria, when available. Required to identify the actual plan ID that was used when multiple group coverages exist. Required if needed to contain the actual plan ID if unknown to the receiver.
545-2F	NETWORK REIMBURSEMENT ID	Q	Claim Rebill: Required if needed to identify the network for the covered member. Required if needed to identify the actual Network Reimbursement ID, when applicable and/or available. Required to identify the actual Network Reimbursement ID that was used when multiple Network Reimbursement IDs exist.
C96-KR	PAYER/HEALTH PLAN ID COUNT	Q	Claim Rebill: Maximum Count of 3. Required if Payer/Health Plan ID (569-J8) is used.
568-J7	PAYER/HEALTH PLAN ID QUALIFIER	Q***R***	Claim Rebill: Required if Payer/Health Plan ID (569-J8) is used. The value of 05 (Medicare Part D Contract Number) must be used when the claim was paid by a Medicare Part D Plan/Payer.
569-J8	PAYER/HEALTH PLAN ID	Q****R***	Claim Rebill: Required when identification of the Payer/Health Plan is necessary. Required when the claim was paid by a Medicare Part D Plan/Payer. The value of 05 (Medicare Part D Contract Number) must be sent in the Payer/Health Plan ID Qualifier

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			(568-J7) and the Medicare Part D Contract Number must be sent in this field.
115-N5	MEDICAID ID NUMBER	N	Claim Rebill: Not used.
116-N6	MEDICAID AGENCY NUMBER	N	Claim Rebill: Not used.
302-C2	CARDHOLDER ID	Q	Claim Rebill: Required if the identification to be used in future transactions is different than what was submitted on the request.

Notes on Response Insurance Segment on a Claim Rebill Response:

The Response Insurance Segment is situational for Claim Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid). It is used when coverage or reimbursement parameters or identifiers need to be sent.

14.4.1.2.3.1 Response Insurance Segment (Subrogation Standard Claim Rebill) (Transmission Accepted/Transaction Paid)

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
115-N5	MEDICAID ID NUMBER	QM	Subrogation - Claim Rebill: Required to identify the member as uniquely known to Medicaid. Not used for other types of subrogation.
116-N6	MEDICAID AGENCY NUMBER	QM	Subrogation - Claim Rebill: Required to identify the Medicaid agency. Not used for other types of subrogation.

Notes on Response Insurance Segment on a Subrogation Standard Claim Rebill Response:

The rules above for a "Response Insurance Segment (Claim Rebill)" are to be followed for Subrogation. Specific fields that are used differently in Subrogation are noted in the table above.

14.4.1.2.4 RESPONSE PATIENT SEGMENT (CLAIM REBILL) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
618-RR	PATIENT ID COUNT	Q	Claim Rebill: Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.
331-CX	PATIENT ID QUALIFIER	Q***R***	Claim Rebill: Required if Patient ID (332-CY) is used.
332-CY	PATIENT ID	Q***R***	Claim Rebill: Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.
310-CA	PATIENT FIRST NAME	Q	Claim Rebill: Required if known.
311-CB	PATIENT LAST NAME	Q	Claim Rebill: Required if known.
304-C4	DATE OF BIRTH	Q	Claim Rebill: Required if known.

Notes on Response Patient Segment on a Claim Rebill Response:

The Response Patient Segment is situational for Claim Rebill transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) when patient demographic information needs to be sent from the sender to the receiver.

RESPONSE PRICING SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
			Must respond to each occurrence submitted.
566-J5	OTHER PAYER AMOUNT RECOGNIZED	Q	Claim Rebill: Required if this value is used to arrive at the final reimbursement. Required if Other Payer Amount Paid (431-DV) is greater than zero (0) and Coordination of Benefits/Other Payments Segment is supported.
522-FM	BASIS OF REIMBURSEMENT DETERMINATION	Q	Claim Rebill: Required if Ingredient Cost Paid (506-F6) is greater than zero (0). Required if Basis of Cost Determination (423-DN) is submitted on billing.
C50-9W	BENEFIT STAGE INDICATOR COUNT	Q	Claim Rebill: Maximum count of 4 Required if Benefit Stage Indicator(s) (C51-9X) are returned
C51-9X	BENEFIT STAGE INDICATOR	Q***R***	Claim Rebill: Required when the plan is a participant in a Medicare Part D program that requires reporting of benefit stages. Can be used to identify the applicable benefit stages for benefits other than Medicare Part D.
573-4V	BASIS OF CALCULATION-COINSURANCE	Q	Claim Rebill: Required if Dispensing Status (343-HD) on submission is "P" (Partial Fill) or "C" (Completion of Partial Fill).
348-HK	BASIS OF CALCULATION—REGULATORY FEE	Q	Claim Rebill: Required if Dispensing Status (343-HD) on submission is "P" (Partial Fill) or "C" (Completion of Partial Fill) and Regulatory Fee Amount Paid (558-AW) is greater than zero (0).
349-HM	BASIS OF CALCULATION—PERCENTAGE TAX	Q	Claim Rebill: Required if Dispensing Status (343-HD) on submission is "P" (Partial Fill) or "C" (Completion of Partial Fill) and Percentage Tax Amount Paid (559-AX) is greater than zero (0).
512-FC	ACCUMULATED DEDUCTIBLE AMOUNT	I	Claim Rebill: Provided for informational purposes only.
513-FD	REMAINING DEDUCTIBLE AMOUNT	I	Claim Rebill: Provided for informational purposes only.
514-FE	REMAINING BENEFIT AMOUNT	I	Claim Rebill: The Remaining Benefit Amount must not be returned with zeroes unless there are no benefit dollars remaining. The default value of 999999999 from previous versions must not be used as a default in this field. Provided for informational purposes only.
128-UC	SPENDING ACCOUNT AMOUNT REMAINING	I	Claim Rebill: This dollar amount will be provided, if known, to the receiver when the transaction had spending account dollars reported as part of the patient pay amount. This field is informational only. It is reported back to the provider and the patient the amount remaining on the spending account after the current claim updated the spending account.
575-EQ	PATIENT PERCENTAGE TAX AMOUNT	Q	Claim Rebill: Required when Percentage Tax Amount Paid (559-AX) is populated and the benefit is set up to directly pass on a percentage tax obligation or portion thereof to the patient.
D65-RS	PATIENT REGULATORY FEE AMOUNT	Q	Claim Rebill: Required when the Regulatory Fee Amount Paid (558-AW) is populated and the benefit is set up to directly pass on a regulatory fee obligation or portion thereof to the patient.
577-G3	ESTIMATED GENERIC SAVINGS	I	Claim Rebill: This information should be provided when a patient selected the brand drug and a generic form of the drug was available. It will contain an estimate of the difference between the cost of the brand drug and the generic drug, when the brand drug is more expensive than the generic. It is information that the provider should provide to the patient.

OFFICIAL RELEASE

RESPONSE PRICING SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
148-U8	INGREDIENT COST CONTRACTED/REIMBURSABLE AMOUNT	I	Claim Rebill: Required when Basis of Reimbursement Determination (522-FM) is "14" (Patient Responsibility Amount) or "15" (Patient Pay Amount) unless prohibited by state/federal/regulatory agency. This field is informational only.
149-U9	DISPENSING FEE CONTRACTED/REIMBURSABLE AMOUNT	I	Claim Rebill: Required when Basis of Reimbursement Determination (522-FM) is "14" (Patient Responsibility Amount) or "15" (Patient Pay Amount) unless prohibited by state/federal/regulatory agency. This field is informational only.
B33-6G	PROFESSIONAL SERVICE FEE CONTRACTED/REIMBURSABLE AMOUNT	N	Claim Rebill: Not used.

Notes on Response Pricing Segment on a Claim Rebill Response:

The Response Pricing Segment is mandatory for a Claim Rebill Response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) is "P" (Paid).

It is highly recommended that whenever possible, the individual dollar fields are to be returned in the response. On the response, the sender should return the individual payment response fields to allow the receiver to reconcile against the requested payment fields.

See section "Pricing Guidelines".

14.4.1.2.8 RESPONSE DUR/PPS SEGMENT (CLAIM REBILL) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

Notes on Response Other Related Benefit Detail Segment on a Claim Rebill Response: The Response Other Related Benefit Detail Segment is situational for a Claim Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid). Information will be returned when the Date of Service (401-D1) is in an active period for any of the records above (ESRD, Hospice, Institutional, Disability, or LIS or when other benefit information is available).

14.4.1.2.12 RESPONSE INTERMEDIARY SEGMENT (CLAIM REBILL) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE INTERMEDIARY SEGMENT		SITUATIONAL SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

RESPONSE INTERMEDIARY SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
B52-8R	RESPONSE INTERMEDIARY AUTHORIZATION COUNT	Q	Claim Rebill: Required if Response Intermediary Authorization Type ID is used. Maximum count of 9.
B53-8S	RESPONSE INTERMEDIARY AUTHORIZATION TYPE ID	Q***R***	Claim Rebill: Required if Response Intermediary Authorization ID is used.
B54-8T	RESPONSE INTERMEDIARY AUTHORIZATION ID	Q***R***	Claim Rebill: Required if the Intermediary determines an authorization identifier needs to be communicated to the receiver.
B51-8Q	INTERMEDIARY MESSAGE	Q***R***	Claim Rebill: Required if text is needed for clarification or detail.
C86-KC	INTERMEDIARY HELP DESK SUPPORT TYPE COUNT	M	Claim Rebill: Maximum count of 5. Used to qualify the number of occurrences of Intermediary Help Desk Support Type (C85-KB) that is included in the Response Intermediary Segment.
C85-KB	INTERMEDIARY HELP DESK SUPPORT TYPE	M***R***	
C81-G9	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE COUNT	R	Claim Rebill: Maximum count of 5. Used to qualify the number of occurrences of the Intermediary Help Desk Business Unit Type, Intermediary Help Desk Contact Information Qualifier, Intermediary Help Desk Contact Information and Intermediary Help Desk Contact Information Extension that is included in the Response Intermediary Segment. Required if Help Desk Business Unit Type (C80-G8) is used
C80-G8	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE	Q***R***	Claim Rebill: Required if Intermediary Help Desk Contact Information Qualifier (C84-KA) is used.
C84-KA	INTERMEDIARY HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Claim Rebill: Required if Help Desk Contact Information (C84-KA) is used.
C82-JP	INTERMEDIARY HELP DESK CONTACT INFORMATION	Q***R***	Claim Rebill: Required if needed to provide help desk contact support information to the receiver.
C83-JR	INTERMEDIARY HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Claim Rebill: Required if needed to provide an extension to the Help Desk Contact Information (C82-JP).

Notes on Response Intermediary Segment on a Claim Rebill Response:

The Response Intermediary Segment is situational for a Claim Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). The segment is used to support the authorization from an intermediary such as a Prescription Drug Monitoring Program (PDMP) or Risk Evaluation and Mitigation Strategy (REMS) program.

14.4.1.2.13 RESPONSE PROVIDER SEGMENT (CLAIM REBILL) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Claim Rebill: Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Claim Rebill: Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Claim Rebill Response:

The Response Provider Segment is situational for a Claim Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

14.4.2 TRANSMISSION ACCEPTED/TRANSACTION CAPTURED

14.4.2.1 DIAGRAM FOR TRANSMISSION OF A CLAIM REBILL RESPONSE (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

Claim Rebill transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured)

The Response Pricing Segment and Response DUR/PPS Segments are not used in payer-to-payer transactions. The duplicate response codes for the Claim Rebill transaction are not applicable.

Claim Rebill transactions – The "C" (Captured) event occurs after the reversal portion of the claim rebill is processed successfully and the claim is captured for processing. If the claim rebill reversal is not processed successfully, a "R" (Rejected) response must be sent.

See section "Transaction Response Status", "Duplicate Transactions" for the handling of a duplicate transaction.

Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Claim Rebill: Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Claim Rebill Response:

The Response Message Segment is situational for Claim Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured). It is used when additional text information needs to be sent.

14.4.2.2.3 RESPONSE INSURANCE SEGMENT (CLAIM REBILL) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
301-C1	GROUP ID	Q	Claim Rebill: Required if needed to identify the actual cardholder or employer group, to identify appropriate group number, when available. Required to identify the actual group that was used when multiple group coverages exist. Note: This field may contain the Group ID echoed from the request. May contain the actual Group ID if unknown to the receiver.
524-FO	PLAN ID	Q	Claim Rebill: Required if needed to identify the actual plan parameters, benefit, or coverage criteria, when available. Required to identify the actual plan ID that was used when multiple group coverages exist. Required if needed to contain the actual plan ID if unknown to the receiver.
545-2F	NETWORK REIMBURSEMENT ID	N	Claim Rebill: Not used.
C96-KR	PAYER/HEALTH PLAN ID COUNT	N	Claim Rebill: Not used.
568-J7	PAYER/HEALTH PLAN ID QUALIFIER	N	Claim Rebill: Not used.
569-J8	PAYER/HEALTH PLAN ID	N	Claim Rebill: Not used.
115-N5	MEDICAID ID NUMBER	N	Claim Rebill: Not used.
116-N6	MEDICAID AGENCY NUMBER	N	Claim Rebill: Not used.
302-C2	CARDHOLDER ID	Q	Claim Rebill: Required if the identification to be used in future transactions is different than what was submitted on the request.

Notes on Response Insurance Segment on a Claim Rebill Response:

The Response Insurance Segment is situational for Claim Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured). It is used when coverage information may be sent.

14.4.2.2.3.1 Response Insurance Segment (Subrogation Standard Claim Rebill) (Transmission Accepted/Transaction Captured)

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

- 294 -

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
115-N5	MEDICAID ID NUMBER	QM	Subrogation - Claim Rebill: Required to identify the member as uniquely known to Medicaid. Not used for other types of subrogation
116-N6	MEDICAID AGENCY NUMBER	QM	Subrogation - Claim Rebill: Required to identify the Medicaid agency. Not used for other types of subrogation.

Notes on Response Insurance Segment on a Subrogation Standard Claim Rebill Response:

The rules above for a "Response Insurance Segment (Claim Rebill)" are to be followed for Subrogation. Specific fields that are used differently in Subrogation are noted in the table above.

14.4.2.2.4 RESPONSE PATIENT SEGMENT (CLAIM REBILL) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
618-RR	PATIENT ID COUNT	Q	Claim Rebill: Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.
331-CX	PATIENT ID QUALIFIER	Q***R***	Claim Rebill: Required if Patient ID (332-CY) is used.
332-CY	PATIENT ID	Q***R***	Claim Rebill: Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.
310-CA	PATIENT FIRST NAME	Q	Claim Rebill: Required if known.
311-CB	PATIENT LAST NAME	Q	Claim Rebill: Required if known.
304-C4	DATE OF BIRTH	Q	Claim Rebill: Required if known.

Notes on Response Patient Segment on a Claim Rebill Response:

The Response Patient Segment is situational for Claim Rebill transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) when patient demographic information needs to be sent from the sender to the receiver.

14.4.2.2.5 RESPONSE STATUS SEGMENT (CLAIM REBILL) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Claim Rebill: Required if needed to identify the transaction.
B98-34	RECONCILIATION ID	R	Claim Rebill: Required for a "C" Captured response. This is a unique processor assigned value that must be provided on a "C" response. This should be a new value since this is associated to payment provided based on newly submitted data. Should a subsequent reversal occur, the Reconciliation ID provides a link to the <u>specific</u> transaction in the processor system that is to be reversed. See section "RESPONSE STATUS SEGMENT / RECONCILIATION ID".
510-FA	REJECT COUNT	N	Claim Rebill: Not used.
511-FB	REJECT CODE	N***R***	Claim Rebill: Not used.
546-4F	REJECT FIELD OCCURRENCE INDICATOR	N***R***	Claim Rebill: Not used.

130-UF	ADDITIONAL MESSAGE INFORMATION COUNT	Q	Claim Rebill: Maximum count of 25. Required if Additional Message Information (526-FQ) is used. Used to qualify the number of occurrences of the Additional Message Information (526-FQ) that is included in the Response Status Segment.
132-UH	ADDITIONAL MESSAGE INFORMATION QUALIFIER	Q***R***	Claim Rebill: Required if Additional Message Information (526-FQ) is used.
526-FQ	ADDITIONAL MESSAGE INFORMATION	Q***R***	Claim Rebill: Required when additional text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.
131-UG	ADDITIONAL MESSAGE INFORMATION CONTINUITY	Q***R***	Claim Rebill: Required if and only if current repetition of Additional Message Information (526-FQ) is used, another populated repetition of Additional Message Information (526-FQ) follows it, and the text of the following message is a continuation of the current.
C72-BH	HELP DESK SUPPORT TYPE COUNT	M	Claim Rebill: Maximum count of 5. Used to qualify the number of occurrences of Help Desk Support Type (C71-BG) that is included in the Response Status Segment.
C71-BG	HELP DESK SUPPORT TYPE	M***R***	
C67-BB	HELP DESK BUSINESS UNIT TYPE COUNT	R	Claim Rebill: Maximum count of 5. Used to qualify the number of occurrences of the Help Desk Business Unit Type, Help Desk Contact Information Qualifier, Help Desk Contact Information and Help Desk Contact Information Extension that is included in the Response Status Segment. Required if Help Desk Business Unit Type (C66-BA) is used.
C66-BA	HELP DESK BUSINESS UNIT TYPE	Q***R***	Claim Rebill: Required if Help Desk Contact Information Qualifier (C70-BF) is used.
C70-BF	HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Claim Rebill: Required if Help Desk Contact Information (C68-BC) is used.
C68-BC	HELP DESK CONTACT INFORMATION	Q***R***	Claim Rebill: Required if needed to provide help desk contact support information to the receiver.
C69-BD	HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Claim Rebill: Required if needed to provide an extension to the Help Desk Contact Information (C68-BC).
880-K5	TRANSACTION REFERENCE NUMBER	N	Claim Rebill: Not used.
993-A7	INTERNAL CONTROL NUMBER	Q	Claim Rebill: Required when used for payer-to-payer coordination of benefits to track the claim without regard to the "Service Provider ID, Prescription Number, & Date of Service".
A28-ZR	ADJUDICATED PROGRAM TYPE	R	Claim Rebill: Required on all Captured responses.

Version F6

January 2020

OFFICIAL RELEASE

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
			The most descriptive program type value must be returned. "UNKNOWN" or "OTHER" must not be used for federal programs as defined in Section 1128B(B) of the Social Security Act. Also see section "Adjudicated Program Type (A28-ZR)" for appropriate use.
B04-BT	NEXT AVAILABLE FILL DATE	N	Claim Rebill: Not used.

Notes on Response Status Segment on a Claim Rebill Response:

The Response Status Segment is mandatory for a Claim Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured). The Response Status Segment is sent from the sender to the receiver to identify the outcome of the request.

Claim Rebill transactions – The "C" (Captured) event occurs after the reversal portion of the claim rebill is processed successfully and the claim is captured for processing. If the claim rebill reversal is not processed successfully, a "R" (Rejected) response must be sent.

14.4.2.2.6 RESPONSE CLAIM SEGMENT (CLAIM REBILL) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE CLAIM SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
455-EM	PRESCRIPTION/SERVICE REFERENCE NUMBER QUALIFIER	M	Claim Rebill: For Transaction Code of "B3", in the Response Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "1" (Rx Billing).
402-D2	PRESCRIPTION/SERVICE REFERENCE NUMBER	M	Claim Rebill: Significant digits on submission must be returned on response. See section "Standard Conventions", "Character Set Designation Truncation", "Numeric", "Numeric Truncation".
551-9F	FORMULARY ALTERNATIVE PRODUCT COUNT	Q	Claim Rebill: Maximum count of 6. Required if Formulary Alternative ID (553-AR) is used. Not used in payer-to-payer transactions.
E89-ZO	FORMULARY ALTERNATIVE EFFECTIVE DATE	Q***R***	Claim Rebill: Required when a future effective date applies to the formulary alternative product returned in Formulary Alternative ID (553-AR) or Formulary Alternative Description (556-AU) and can be communicated to the receiver. Not used in payer-to-payer transactions.
D42-PV	FORMULARY ALTERNATIVE PLAN BENEFIT TIER	Q***R***	Claim Rebill: Required if a product preference exists that needs to be communicated to the receiver. Not used in payer-to-payer transactions.
D43-PZ	FORMULARY ALTERNATIVE REASON CODE	Q***R***	Claim Rebill: Required if a product preference exists that needs to be communicated to the receiver. Not used in payer-to-payer transactions.

Version F6

January 2020

OFFICIAL RELEASE

Notes on Response Pricing Segment on a Claim Rebill Response:

The Response Pricing Segment is situational for a Claim Rebill Response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured).

The Response Pricing Segment is not used in payer-to-payer transactions.

All dollar fields except Patient Pay Amount (505-F5) are estimated amounts. If actual amounts are returned on fields other than Patient Pay Amount (505-F5), the "P" (Paid) response must be used.

If the Transaction Response Status (112-AN) = "C" (Captured) or "Q" (Duplicate of Captured), dollar fields should be supplied in the response.

- If the response is a "true" Capture (i.e., replacement of batch billing, with no edits or pricing), then corresponding response fields should be populated with values as submitted. *Ideally, processor should provide "real" patient financial responsibility values on a Capture. If this is not possible, provider must know (by trading partner agreement) the patient financial responsibility to charge and factor that into their system so collection occurs.*
- If the response is captured by an Intermediary who can provide better pricing criteria, the corresponding response fields should be populated with the *probable* values and those values used to determine estimated pricing as noted above. Since the claim has **not** been fully adjudicated, this should remain a capture response.

See section "Pricing Guidelines".

14.4.2.2.8 RESPONSE DUR/PPS SEGMENT (CLAIM REBILL) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE DUR/PPS SEGMENT		SITUATIONAL SEGMENT	
Field	Field Name	Mandatory or Situational	Situation

B51-8Q	INTERMEDIARY MESSAGE	Q***R***	Claim Rebill: Required if text is needed for clarification or detail.
C86-KC	INTERMEDIARY HELP DESK SUPPORT TYPE COUNT	M	Claim Rebill: Maximum count of 5. Used to qualify the number of occurrences of Intermediary Help Desk Support Type (C85-KB) that is included in the Response Intermediary Segment.
C85-KB	INTERMEDIARY HELP DESK SUPPORT TYPE	M***R***	
C81-G9	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE COUNT	R	Claim Rebill: Maximum count of 5. Used to qualify the number of occurrences of the Intermediary Help Desk Business Unit Type, Intermediary Help Desk Contact Information Qualifier, Intermediary Help Desk Contact Information and Intermediary Help Desk Contact Information Extension that is included in the Response Intermediary Segment.
C80-G8	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE	Q***R***	Required if Help Desk Business Unit Type (C80-G8) is used Claim Rebill: Required if Intermediary Help Desk Contact Information Qualifier (C84-KA) is used.
C84-KA	INTERMEDIARY HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Claim Rebill: Required if Help Desk Contact Information (C84-KA) is used.

Version F6

January 2020

OFFICIAL RELEASE

RESPONSE INTERMEDIARY SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
C82-JP	INTERMEDIARY HELP DESK CONTACT INFORMATION	Q***R***	Claim Rebill: Required if needed to provide help desk contact support information to the receiver.
C83-JR	INTERMEDIARY HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Claim Rebill: Required if needed to provide an extension to the Help Desk Contact Information (C82-JP).

Notes on Response Intermediary Segment on a Claim Rebill Response:

The Response Intermediary Segment is situational for a Claim Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). The segment is used to support the authorization from an intermediary such as a Prescription Drug Monitoring Program (PDMP) or Risk Evaluation and Mitigation Strategy (REMS) program.

14.4.2.2.11 RESPONSE PROVIDER SEGMENT (CLAIM REBILL) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Claim Rebill: Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Claim Rebill: Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Claim Rebill Response:

The Response Provider Segment is situational for a Claim Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

14.4.3 TRANSMISSION ACCEPTED/TRANSACTION REJECTED**14.4.3.1 DIAGRAM FOR TRANSMISSION OF A CLAIM REBILL RESPONSE (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)**

Claim Rebill transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected)

Claim Rebill transactions – If the claim rebill reversal is not processed successfully, a "R" (Rejected) response must be sent.

The Response DUR/PPS Segment and Response Prior Authorization Segments are not used in payer-to-payer transactions.

The duplicate response codes for the Claim Rebill transaction are not applicable. Therefore, in this case, there are no transaction-level situational segments.

See section "Transaction Response Status", "Duplicate Transactions" for the handling of a duplicate transaction.

14.4.3.2 CLAIM REBILL RESPONSE SEGMENTS (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)**14.4.3.2.1 RESPONSE HEADER SEGMENT (CLAIM REBILL) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)**

RESPONSE HEADER SEGMENT			MANDATORY SEGMENT
Field	Field Name	Mandatory or Situational	Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	For Transaction Code of "B3", in the Response Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "1" (Rx Billing).
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on a Claim Rebill Response:

The Response Header Segment is a mandatory, fixed length segment for Claim Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). The "Situation" column is not applicable.

14.4.3.2.2 RESPONSE MESSAGE SEGMENT (CLAIM REBILL) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE MESSAGE SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Claim Rebill: Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Claim Rebill Response:

The Response Message Segment is situational for Claim Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). It is used when additional text information needs to be sent.

14.4.3.2.3 RESPONSE INSURANCE SEGMENT (CLAIM REBILL) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE INSURANCE SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
301-C1	GROUP ID	Q	Claim Rebill: Required if needed to identify the actual cardholder or employer group, to identify appropriate group number, when available.

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Required to identify the actual group that was used when multiple group coverages exist. Note: This field may contain the Group ID echoed from the request. May contain the actual Group ID if unknown to the receiver.
524-FO	PLAN ID	Q	Claim Rebill: Required if needed to identify the actual plan parameters, benefit, or coverage criteria, when available. Required to identify the actual plan ID that was used when multiple group coverages exist. Required if needed to contain the actual plan ID if unknown to the receiver.
545-2F	NETWORK REIMBURSEMENT ID	Q	Claim Rebill: Required if needed to identify the network for the covered member. Required if needed to identify the actual Network Reimbursement ID, when applicable and/or available. Required to identify the actual Network Reimbursement ID that was used when multiple Network Reimbursement IDs exist.
C96-KR	PAYER/HEALTH PLAN ID COUNT	Q	Claim Rebill: Maximum Count of 3. Required if Payer/Health Plan ID (569-J8) is used.
568-J7	PAYER/HEALTH PLAN ID QUALIFIER	Q***R***	Claim Rebill: Required if Payer/Health Plan ID (569-J8) is used.
569-J8	PAYER/HEALTH PLAN ID	Q***R***	Claim Rebill: Required when identification of the Payer/Health Plan is necessary. Required when a Medicare Part D Contract ID applies to the response.
115-N5	MEDICAID ID NUMBER	N	Claim Rebill: Not used.
116-N6	MEDICAID AGENCY NUMBER	N	Claim Rebill: Not used.
302-C2	CARDHOLDER ID	Q	Claim Rebill: Required if the identification to be used in future transactions is different than what was submitted on the request.

Notes on Response Insurance Segment on a Claim Rebill Response:

The Response Insurance Segment is situational for Claim Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). It is used when coverage or reimbursement parameters or identifiers need to be sent.

14.4.3.2.3.1 Response Insurance Segment (Subrogation Standard Claim Rebill) (Transmission Accepted/Transaction Rejected)

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
115-N5	MEDICAID ID NUMBER	QM	Subrogation - Claim Rebill: Required to identify the member as uniquely known to Medicaid. Not used for other types of subrogation.
116-N6	MEDICAID AGENCY NUMBER	QM	Subrogation - Claim Rebill: Required to identify the Medicaid agency. Not used for other types of subrogation

Notes on Response Insurance Segment on a Subrogation Standard Claim Rebill Response:

The rules above for a "Response Insurance Segment (Claim Rebill)" are to be followed for Subrogation. Specific fields that are used differently in Subrogation are noted in the table above.

14.4.3.2.4 RESPONSE PATIENT SEGMENT (CLAIM REBILL) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
618-RR	PATIENT ID COUNT	Q	Claim Rebill: Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.
331-CX	PATIENT ID QUALIFIER	Q***R***	Claim Rebill: Required if Patient ID (332-CY) is used.
332-CY	PATIENT ID	Q***R***	Claim Rebill: Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.
310-CA	PATIENT FIRST NAME	Q	Claim Rebill: Required if known.
311-CB	PATIENT LAST NAME	Q	Claim Rebill: Required if known.
304-C4	DATE OF BIRTH	Q	Claim Rebill: Required if known.

Notes on Response Patient Segment on a Claim Rebill Response:

The Response Patient Segment is situational for Claim Rebill transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected) when patient demographic information needs to be sent from the sender to the receiver.

14.4.3.2.5 RESPONSE STATUS SEGMENT (CLAIM REBILL) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Claim Rebill: Required if needed to identify the transaction.
B98-34	RECONCILIATION ID	N	Claim Rebill: Not used.
510-FA	REJECT COUNT	R	Claim Rebill: Maximum count of 5. Required.
511-FB	REJECT CODE	R***R***	Claim Rebill: Required.
546-4F	REJECT FIELD OCCURRENCE INDICATOR	Q***R***	Claim Rebill: Required if a repeating field is in error, to identify repeating field occurrence. This field must be sent when relaying error information about a repeating field or set. Note, if the Reject Code is not denoting a repeating field or set, the Reject Field Occurrence Indicator must not be sent.
547-5F	APPROVED MESSAGE CODE COUNT	N	Claim Rebill: Not used.
548-6F	APPROVED MESSAGE CODE	N***R***	Claim Rebill: Not used.
130-UF	ADDITIONAL MESSAGE INFORMATION COUNT	Q	Claim Rebill: Maximum count of 25. Required if Additional Message Information (526-FQ) is used. Used to qualify the number of occurrences of the Additional Message Information (526-FQ) that is included in the Response Status Segment.
132-UH	ADDITIONAL MESSAGE INFORMATION QUALIFIER	Q***R***	Claim Rebill: Required if Additional Message Information (526-FQ) is used.
526-FQ	ADDITIONAL MESSAGE INFORMATION	Q***R***	Claim Rebill: Required when additional text is needed for clarification or detail.

OFFICIAL RELEASE

RESPONSE CLAIM SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
D25-M7	REMAINING AMOUNT QUALIFIER	Q	Claim Rebill: Required when a remaining amount to a plan benefit limitation based on amounts accumulated applies and can be communicated to the receiver.
D24-M6	REMAINING AMOUNT	Q	Claim Rebill: Required when a remaining amount to a plan benefit limitation based on amounts accumulated applies and can be communicated to the receiver.
C59-AF	BENEFIT TYPE OPPORTUNITY COUNT	Q	Claim Rebill: Maximum count of 9. Required if Benefit Type Opportunity(C58-AE) is used.
C58-AE	BENEFIT TYPE OPPORTUNITY	Q***R***	Claim Rebill: Provided for informational purposes only
D15-KY	SUBROGATION REQUESTORS RECONCILIATION ID	N	Claim Rebill: Not used.

Notes on Response Claim Segment on a Claim Rebill Response:

The Response Claim Segment is mandatory for a Claim Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). The Response Claim Segment is sent from the sender to the receiver to identify therapeutic or alternate product recommendations as well as benefit limitations or opportunities.

14.4.3.2.7 RESPONSE DUR/PPS SEGMENT (CLAIM REBILL) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE DUR/PPS SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
567-J6	DUR/PPS RESPONSE CODE COUNTER	Q***R***	Claim Rebill: Maximum 9 occurrences supported. Required if Reason For Service Code (439-E4) is used.
439-E4	REASON FOR SERVICE CODE	Q***R***	Claim Rebill: Required if utilization conflict is detected.
528-FS	CLINICAL SIGNIFICANCE CODE	Q***R***	Claim Rebill: Required if needed to supply additional information for the utilization conflict.
475-J9	DUR/DUE CO-AGENT ID QUALIFIER	Q***R***	Claim Rebill: Required when DUR/DUE Co-Agent ID (476-H6) is used.
476-H6	DUR/DUE CO-AGENT ID	Q***R***	Claim Rebill: Required when a co-existing agent contributes to the DUR event and the other product or co-agent information is available.
E93-ZC	DUR/DUE CO-AGENT DESCRIPTION	Q***R***	Claim Rebill: Required when a co-existing agent contributes to the DUR event and the other product or co-agent information is available.
529-FT	OTHER PHARMACY INDICATOR	Q***R***	Claim Rebill: Required if needed to supply additional information for the utilization conflict.
E95-Z9	OTHER PHARMACY ID QUALIFIER	Q***R***	Claim Rebill: Required when Other Pharmacy ID (E96-Z8) is used.
E96-Z8	OTHER PHARMACY ID	Q***R***	Claim Rebill: Required when an Other Pharmacy contributes to the DUR/DUE event and the other pharmacy information is available.
E97-Z7	OTHER PHARMACY NAME	Q***R***	Claim Rebill: Required when an Other Pharmacy contributes to the DUR/DUE event and the other pharmacy information is available.
E98-Z6	OTHER PHARMACY TELEPHONE	Q***R***	Claim Rebill: Required when an Other Pharmacy contributes to the DUR/DUE event and the other pharmacy information is available.
530-FU	PREVIOUS DATE OF SERVICE	Q***R***	Claim Rebill: Required if needed to supply additional information for the utilization conflict.

F06-YO	DUR/DUE MAXIMUM DAILY DOSE QUANTITY	Q***R***	Claim Rebill: Required when DUR/DUE conflict indicates a dosing threshold has been exceeded and maximum dose information is available.
F07-YL	DUR/DUE MAXIMUM DAILY DOSE UNIT OF MEASURE	Q***R***	Claim Rebill: Required when DUR/DUE conflict indicates a dosing threshold has been exceeded and maximum dose information is available.
F08-YJ	DUR/DUE MINIMUM DAILY DOSE QUANTITY	Q***R***	Claim Rebill: Required when DUR/DUE conflict indicates a dosing threshold has not been met and minimum dose information is available.
F09-YI	DUR/DUE MINIMUM DAILY DOSE UNIT OF MEASURE	Q***R***	Claim Rebill: Required when DUR/DUE conflict indicates a dosing threshold has not been met and minimum dose information is available.
544-FY	DUR/DUE FREE TEXT MESSAGE	Q***R***	Claim Rebill: Required if needed to supply additional information for the utilization conflict.

Notes on Response DUR/PPS Segment on a Claim Rebill Response:

The Response DUR/PPS Segment is situational for a Claim Rebill Response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). The segment is used to identify a drug utilization review or professional pharmacy service event, opportunity, or information.

The Response DUR/PPS Segment is not used on payer-to-payer transactions.

14.4.3.2.8 RESPONSE PRIOR AUTHORIZATION SEGMENT (CLAIM REBILL) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

- 314 -

RESPONSE PRIOR AUTHORIZATION SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
498-PR	PRIOR AUTHORIZATION PROCESSED DATE	N	Claim Rebill: Not used.
498-PS	PRIOR AUTHORIZATION EFFECTIVE DATE	N	Claim Rebill: Not used.
498-PT	PRIOR AUTHORIZATION EXPIRATION DATE	Q	Claim Rebill: Required when the prior authorization expiration date is known.
498-RA	PRIOR AUTHORIZATION QUANTITY	N	Claim Rebill: Not used.
498-RB	PRIOR AUTHORIZATION DOLLARS AUTHORIZED	N	Claim Rebill: Not used.
498-PW	PRIOR AUTHORIZATION NUMBER OF REFILLS AUTHORIZED	N	Claim Rebill: Not used.
498-PX	PRIOR AUTHORIZATION QUANTITY ACCUMULATED	N	Claim Rebill: Not used.
498-PY	PRIOR AUTHORIZATION ID ASSIGNED	Q	Claim Rebill: Required when the receiver must submit this Prior Authorization ID in order to receive payment for the claim. (An example of a situation may include a Benefit Transition Period that allows for payment of claims, for a period of time that would normally reject.)

Notes on Response Prior Authorization Segment on a Claim Rebill Response:

The Response Prior Authorization Segment is situational for a Claim Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). It is used to relay the Prior Authorization ID Assigned (498-PY) which is returned when a Reject Code (511-FB) denotes that a prior authorization code needs to be submitted on the subsequent billing or when the prior authorization expiration date (498-PT) is known.

The Response Prior Authorization Segment is not used on payer-to-payer transactions.

14.4.3.2.9 RESPONSE OTHER PAYERS SEGMENT (CLAIM REBILL) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE OTHER PAYERS SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
355-NT	OTHER PAYER ID COUNT	M	Claim Rebill: Maximum count of 4.
338-5C	OTHER PAYER COVERAGE TYPE	M***R***	
D41-PQ	OTHER PAYER RELATIONSHIP TYPE	M***R***	
D50-P6	OTHER PAYER BENEFIT CLASSIFICATION	M***R***	
C47-9T	OTHER PAYER ADJUDICATED PROGRAM TYPE	M***R***	
339-6C	OTHER PAYER ID QUALIFIER	Q***R***	Claim Rebill: Required if Other Payer ID (340-7C) is used.
340-7C	OTHER PAYER ID	Q***R***	Claim Rebill: Required if other insurance Payer ID information is available. Required if any of the following are sent: - Other Payer Processor Control Number (991-MH) - Other Payer Cardholder ID (356-NU) - Other Payer Group ID (992-MJ)
991-MH	OTHER PAYER PROCESSOR CONTROL NUMBER	Q***R***	Claim Rebill: Required if other insurance Processor Control Number information is available.
356-NU	OTHER PAYER CARDHOLDER ID	Q***R***	Claim Rebill: Required if other insurance Cardholder ID information is available.
992-MJ	OTHER PAYER GROUP ID	Q***R***	Claim Rebill: Required if other insurance Group ID information is available.
142-UV	OTHER PAYER PERSON CODE	Q***R***	Claim Rebill:

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

RESPONSE OTHER PAYERS SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
			Required if needed to uniquely identify the family members within the Cardholder ID, as assigned by the other payer.
127-UB	OTHER PAYER HELP DESK TELEPHONE NUMBER	Q***R***	Claim Rebill: Required if needed to provide a support telephone number of the other payer to the receiver.
B23-7Q	OTHER PAYER HELP DESK TELEPHONE NUMBER EXTENSION	Q***R***	Claim Rebill: Required if needed to provide a support telephone number extension of the other payer to the receiver.
143-UW	OTHER PAYER PATIENT RELATIONSHIP CODE	Q***R***	Claim Rebill: Required if needed to uniquely identify the relationship of the patient to the cardholder ID, as assigned by the other payer.
144-UX	OTHER PAYER BENEFIT EFFECTIVE DATE	Q***R***	Claim Rebill: Required when other coverage is known which will become effective after the Date of Service submitted. Other Payer Benefit Effective Date would not be returned for coverage that is current as of the claim date of service. This allows the receiver to identify other coverage that needs to be billed or stored for future use.
145-UY	OTHER PAYER BENEFIT TERMINATION DATE	Q***R***	Claim Rebill: Required when other coverage termination date is known which is after the Date of Service submitted. If the termination date is not known this field would not be returned.
D23-M5	OTHER PAYER NAME	Q***R***	Claim Rebill: Required if the data is available.

Notes on Response Other Payers Segment on a Claim Rebill Response:

The Response Other Payers Segment is situational for a Claim Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected) when other insurance information is available.

The following outlines different rejected claim scenarios and the use of the Response Other Payers Segment.

1. Non-Matched: If the identity of the patient cannot be validated and the Claim Billing or Encounter is rejected due to a non-match of field verification, then the Other Payer information is not sent.
2. COB Sequence: If the claim is rejected because it should be submitted to other payer(s) first, that Other Payer information must be sent, if available.
3. Change in 4RX (Change in Coverage): If the identity of the patient is verified and the Claim Billing or Encounter is rejected due to known alternate 4RX data required for claims processing, then the alternate 4RX data is returned as Other Payer information.
4. Plan Exclusion Alternate 4RX (Mutually Exclusive): If the claim is rejected due to plan benefit exclusions, then Other Payer information must be sent, if available.

14.4.3.2.10 RESPONSE OTHER RELATED BENEFIT DETAIL SEGMENT (CLAIM REBILL) (TRANSMISSION ACCEPTED/ TRANSACTION REJECTED)

Notes on Response Other Related Benefit Detail Segment on a Claim Rebill Response: The Response Other Related Benefit Detail Segment is situational for a Claim Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). Information will be returned when the Date of Service (401-D1) is in an active period for any of the records above (ESRD, Hospice, Institutional, Disability, or LIS or when other benefit information is available).

14.4.3.2.11 RESPONSE INTERMEDIARY SEGMENT (CLAIM REBILL) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE INTERMEDIARY SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
B52-8R	RESPONSE INTERMEDIARY AUTHORIZATION COUNT	Q	Claim Rebill: Required if Response Intermediary Authorization Type ID is used. Maximum count of 9.
B53-8S	RESPONSE INTERMEDIARY AUTHORIZATION TYPE ID	Q***R***	Claim Rebill: Required if Response Intermediary Authorization ID is used.
B54-8T	RESPONSE INTERMEDIARY AUTHORIZATION ID	Q***R***	Claim Rebill: Required if the Intermediary determines an authorization identifier needs to be communicated to the receiver.
B51-8Q	INTERMEDIARY MESSAGE	Q***R***	Claim Rebill: Required if text is needed for clarification or detail.
C86-KC	INTERMEDIARY HELP DESK SUPPORT TYPE COUNT	M	Claim Rebill: Maximum count of 5. Used to qualify the number of occurrences of Intermediary Help Desk Support Type (C85-KB) that is included in the Response Intermediary Segment.
C85-KB	INTERMEDIARY HELP DESK SUPPORT TYPE	M***R***	
C81-G9	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE COUNT	R	Claim Rebill: Maximum count of 5. Used to qualify the number of occurrences of the Intermediary Help Desk Business Unit Type, Intermediary Help Desk Contact Information Qualifier, Intermediary Help Desk Contact Information and Intermediary Help Desk Contact Information Extension that is included in the Response Intermediary Segment. Required if Help Desk Business Unit Type (C80-G8) is used
C80-G8	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE	Q***R***	Claim Rebill: Required if Intermediary Help Desk Contact Information Qualifier (C84-KA) is used.
C84-KA	INTERMEDIARY HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Claim Rebill: Required if Help Desk Contact Information (C84-KA) is used.
C82-JP	INTERMEDIARY HELP DESK CONTACT INFORMATION	Q***R***	Claim Rebill: Required if needed to provide help desk contact support information to the receiver.
C83-JR	INTERMEDIARY HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Claim Rebill: Required if needed to provide an extension to the Help Desk Contact Information (C82-JP).

Notes on Response Intermediary Segment on a Claim Rebill Response:

The Response Intermediary Segment is situational for a Claim Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). The segment is used to support the authorization from an intermediary such as a Prescription Drug Monitoring Program (PDMP) or Risk Evaluation and Mitigation Strategy (REMS) program.

14.4.3.2.12 RESPONSE PROVIDER SEGMENT (CLAIM REBILL) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE PROVIDER SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Claim Rebill:

OFFICIAL RELEASE

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Returned when a provider conflict has been identified from an available authoritative data source. Claim Rebill: Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Claim Rebill Response:

The Response Provider Segment is situational for a Claim Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

14.4.4 TRANSMISSION REJECTED/TRANSACTION REJECTED**14.4.4.1 DIAGRAM FOR TRANSMISSION OF A CLAIM REBILL RESPONSE (TRANSMISSION REJECTED/TRANSACTION REJECTED)**

Claim Rebill transmission response Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected)

See section "Transaction Response Status", "Duplicate Transactions" for the handling of a duplicate transaction.

14.4.4.2 CLAIM REBILL RESPONSE SEGMENTS (TRANSMISSION REJECTED/TRANSACTION REJECTED)**14.4.4.2.1 RESPONSE HEADER SEGMENT (CLAIM REBILL) (TRANSMISSION REJECTED/TRANSACTION REJECTED)**

RESPONSE HEADER SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on a Claim Rebill Response:

The Response Header Segment is a mandatory, fixed length segment for Claim Rebill response when the Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The "Situation" column is not applicable.

If either the entire transmission or the Header is in error, the Header Response Status (501-F1) = "R" (Rejected). The transaction within the transmission must be rejected with an "R".

If the transaction rejects for detail errors, the Header Response Status (501-F1) = "A" (Accepted) and the Transaction Response Status (112-AN) will be "R".

14.4.4.2.2 RESPONSE MESSAGE SEGMENT (CLAIM REBILL) (TRANSMISSION REJECTED/TRANSACTION REJECTED)

Used to qualify the number of occurrences of the Help Desk Business Unit Type, Help Desk Contact Information Qualifier, Help Desk Contact Information and Help Desk Contact Information Extension that is included in the Response Status Segment. Required if Help Desk Business Unit Type (C66-BA) is used.
C66-BA	HELP DESK BUSINESS UNIT TYPE	Q***R***	Claim Rebill: Required if Help Desk Contact Information Qualifier (C70-BF) is used.
C70-BF	HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Claim Rebill: Required if Help Desk Contact Information (C68-BC) is used.
C68-BC	HELP DESK CONTACT INFORMATION	Q***R***	Claim Rebill: Required if needed to provide help desk contact support information to the receiver.
C69-BD	HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Claim Rebill: Required if needed to provide an extension to the Help Desk Contact Information (C68-BC).
880-K5	TRANSACTION REFERENCE NUMBER	N	Claim Rebill: Not used.
993-A7	INTERNAL CONTROL NUMBER	N	Claim Rebill: Not used.
A28-ZR	ADJUDICATED PROGRAM TYPE	N	Claim Rebill: Not used.
B04-BT	NEXT AVAILABLE FILL DATE	N	Claim Rebill: Not used.

Notes on Response Status Segment on a Claim Rebill Response:

The Response Status Segment is mandatory for a Claim Rebill Response when the Header Response Status (501-F1) = "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The Response Status Segment is sent from the sender to the receiver to identify the outcome of the request. Refer to the NCPDP *External Code List* for guidance on the use of reject codes.

14.4.4.2.4 RESPONSE PROVIDER SEGMENT (CLAIM REBILL) (TRANSMISSION REJECTED/TRANSACTION REJECTED)

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Claim Rebill: Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Claim Rebill: Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Claim Rebill Response:

The Response Provider Segment is situational for a Claim Rebill response when the Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

14.5 SERVICE REBILL REQUEST DIAGRAMS

For Transaction Code of "S3", in the Claim Segment or Response Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "2" (Service Billing).

If the Product/Service ID Qualifier (436-E1) is "06" (DUR/PPS), the DUR/PPS Segment is required.

14.5.1.1 DIAGRAM FOR TRANSMISSION OF A SERVICE REBILL TRANSACTION

For a Service Rebill, the scenario defined includes a Service Rebill from a Sender to a Receiver.

Notes on Transaction Header Segment on a Service Rebill Request:

The Transaction Header Segment is a mandatory, fixed length segment for a Service Rebill request. The "Situation" column is not applicable.

14.6.2 INSURANCE SEGMENT (SERVICE REBILL)

INSURANCE SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
302-C2	CARDHOLDER ID	M	
312-CC	CARDHOLDER FIRST NAME	Q	Service Rebill: Required if necessary for state/federal/regulatory agency programs when the cardholder has a first name.
313-CD	CARDHOLDER LAST NAME	Q	Service Rebill: Required if necessary for state/federal/regulatory agency programs.
524-FO	PLAN ID	O	Service Rebill: Optional.
309-C9	ELIGIBILITY CLARIFICATION CODE	Q	Service Rebill: Required if needed for receiver inquiry validation and/or determination, when eligibility is not maintained at the dependent level. Required in special situations as defined by the code to clarify the eligibility of an individual, which may extend coverage.
301-C1	GROUP ID	Q	Service Rebill: Required if necessary for state/federal/regulatory agency programs. Required if needed for pharmacy claim processing and payment. Required if needed to match the reversal to the original billing transaction.
303-C3	PERSON CODE	Q	Service Rebill: Required if needed to uniquely identify the family members within the Cardholder ID.
306-C6	PATIENT RELATIONSHIP CODE	Q	Service Rebill: Required if needed to uniquely identify the relationship of the Patient to the Cardholder ID.
359-2A	MEDIGAP ID	Q	Service Rebill: Required, if known, when patient has Medigap coverage.
360-2B	MEDICAID INDICATOR	Q	Service Rebill: Required, if known, when patient has Medicaid coverage.
361-2D	PROVIDER ACCEPT ASSIGNMENT INDICATOR	Q	Service Rebill: Required if necessary for state/federal/regulatory agency programs.
115-N5	MEDICAID ID NUMBER	N	Service Rebill: Not used.
116-N6	MEDICAID AGENCY NUMBER	N	Service Rebill: Not used.

Notes on Insurance Segment on a Service Rebill Request:

The Insurance Segment is mandatory for a Service Rebill request.

14.6.3 PATIENT SEGMENT (SERVICE REBILL)

PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
618-RR	PATIENT ID COUNT	Q	Service Rebill: Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.
331-CX	PATIENT ID QUALIFIER	Q***R***	Service Rebill: Required if Patient ID (332-CY) is used.
332-CY	PATIENT ID	Q***R***	Service Rebill: Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.

B09-7B	PATIENT STREET ADDRESS LINE 2	O	Service Rebill: Optional. Use only when a second address line is needed and Patient Street Address Line 1 (B08-7A) has been used.
323-CN	PATIENT CITY ADDRESS	O	Service Rebill: Optional.
324-CO	PATIENT STATE/PROVINCE ADDRESS	O	Service Rebill: Optional.
325-CP	PATIENT ZIP/POSTAL CODE	O	Service Rebill: Optional.
A43-1K	PATIENT COUNTRY CODE	Q	Service Rebill: Required if country is not "US".
326-CQ	PATIENT TELEPHONE NUMBER	O	Service Rebill: Optional.
307-C7	PLACE OF SERVICE	Q	Service Rebill: Required if necessary for state/federal/regulatory agency programs. Otherwise, required when necessary to identify the Place of Service for non-self administered drugs...
333-CZ	EMPLOYER ID	Q	Service Rebill: Required if "required by law" as defined in the HIPAA final Privacy regulations section 164.501 definitions (45 CFR Parts 160 and 164 Standards for Privacy of Individually Identifiable Health Information; Final Rule – Thursday, December 28, 2000, page 82803 and following, and Wednesday, August 14, 2002, page 53267 and following.) Required if needed for Workers' Compensation billing.
334-1C	SMOKER/NON-SMOKER CODE	N	Service Rebill: Not used.
335-2C	PREGNANCY INDICATOR	Q	Service Rebill: Required if pregnancy could result in different coverage, pricing, or patient financial responsibility. Required if "required by law" as defined in the HIPAA final Privacy regulations section 164.501 definitions (45 CFR Parts 160 and 164 Standards for Privacy of Individually Identifiable Health Information; Final Rule – Thursday, December 28, 2000, page 82803 and following, and Wednesday, August 14, 2002, page 53267 and following.)
350-HN	PATIENT E-MAIL ADDRESS	I	Service Rebill: May be submitted for the receiver to relay patient health care communications via the Internet when provided by the patient. This field is informational only.
384-4X	PATIENT RESIDENCE	Q	Service Rebill: Required if this field could result in different coverage, pricing, or patient financial responsibility.
A22-YR	PATIENT ID ASSOCIATED STATE/PROVINCE ADDRESS	N	Service Rebill: Not used.
B38-1Y	PATIENT ID ASSOCIATED COUNTRY CODE	N	Service Rebill: Not used.

Version F6

January 2020

OFFICIAL RELEASE

PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
A45-1R	VETERINARY USE INDICATOR	N	Service Rebill: Not used.
E06-S8	SPECIES	Q	Service Rebill: Not used for humans.

Notes on Patient Segment on a Service Rebill Request:

The Patient Segment is situational for a Service Rebill request. It is used when a receiver needs some of the patient demographic information to perform eligibility and service billing determination. The Patient Segment must be submitted when needed to differentiate between the patient and the cardholder. If the cardholder and the patient are the same, then the Patient Segment is not submitted unless additional information about the patient is needed to clarify the Service Rebill determination. The Segment is mandatory if required under provider payer contract or mandatory on service billings where this information is necessary for adjudication of the service.

14.6.4 CLAIM SEGMENT (SERVICE REBILL)

CLAIM SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
455-EM	PRESCRIPTION/SERVICE REFERENCE NUMBER QUALIFIER	M	Service Rebill: For Transaction Code of "S3", in the Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "2" (Service Billing).
402-D2	PRESCRIPTION/SERVICE REFERENCE NUMBER	M	Service Rebill: See section "Standard Conventions", "Character Set Designation Truncation", "Numeric", "Numeric Truncation".
436-E1	PRODUCT/SERVICE ID QUALIFIER	M	Service Rebill: If the Product/Service ID Qualifier (436-E1) = "06" (DUR/PPS), the Product/Service ID (407-D7) is zero. (Zero means "0".)
407-D7	PRODUCT/SERVICE ID	M	Service Rebill: If the Product/Service ID Qualifier (436-E1) = "06" (DUR/PPS), the Product/Service ID (407-D7) is zero. (Zero means "0".) Populate the DUR/PPS segment as appropriate. If the Product/Service ID Qualifier (436-E1) = "07" (CPT-4), the Product Service ID (407-D7) is the actual CPT-4 value. If the Product/Service ID Qualifier (436-E1) = "09" (HCPCS), the Product Service ID (407-D7) is the actual HCPCS value. If the Product/Service ID Qualifier (436-E1) = "99" (Other), the Product Service ID (407-D7) is the business partner agreed value.
B98-34	RECONCILIATION ID	R	Service Rebill: Reconciliation ID allows an originator to indicate the exact transaction to be reversed so submitted data on transaction can be processed in place of previous transaction data. See Section "Reversal Guidelines – Criteria for Matching"
456-EN	ASSOCIATED PRESCRIPTION/SERVICE REFERENCE NUMBER	Q	Service Rebill: Required if needed to associate multiple prescriptions/services from the same sender to allow billing of the current prescription/service.
457-EP	ASSOCIATED PRESCRIPTION/SERVICE DATE	Q	Service Rebill: Required if Associated Prescription/Service Reference Number (456-EN) is used. Required if needed to associate multiple prescriptions/services from the same sender to allow billing of the current prescription/service.
458-SE	PROCEDURE MODIFIER CODE COUNT	Q	Service Rebill: Maximum count of 10. Required if Procedure Modifier Code (459-ER) is used.

D17-K8	SUBMISSION TYPE CODE	N***R***	Service Rebill: Not used.
460-ET	QUANTITY PRESCRIBED	Q	Service Rebill: Required if the prescriber orders a specific number of iterations of a service. Not required if value is equal to 1.
D21-M3	MULTIPLE PRESCRIPTION/SERVICE ORDER GROUP ID	Q	Service Rebill: Required when Multiple Prescription/Service Order Group Reason Code (D22-M4) is sent.
D22-M4	MULTIPLE PRESCRIPTION/SERVICE ORDER GROUP REASON CODE	Q	Service Rebill: Required if needed for pharmacy claim processing and payment.
D02-KW	TOTAL PRESCRIBED QUANTITY REMAINING	N	Service Rebill: Not used.
308-C8	OTHER COVERAGE CODE	Q	Service Rebill: Required if needed by receiver to match the claim that is being reversed. Required if needed by receiver, to communicate a summation of other coverage information that has been collected from other payers. Required for Coordination of Benefits. See section "Specific Segment Discussion", "Request Segments", "Claim Segment", "Other Coverage Code (308-C8)".
429-DT	SPECIAL PACKAGING INDICATOR	N	Service Rebill: Not used.
453-EJ	ORIGINALLY PRESCRIBED PRODUCT/SERVICE ID QUALIFIER	Q	Service Rebill: Required if Originally Prescribed Product/Service Code (445-EA) is used.
445-EA	ORIGINALLY PRESCRIBED PRODUCT/SERVICE CODE	Q	Service Rebill: Required if the receiver requests association to a therapeutic, or a preferred product substitution, or when a DUR alert has been resolved by changing medications, or an alternative service than what was originally prescribed.

CLAIM SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
446-EB	ORIGINALLY PRESCRIBED QUANTITY	Q	Service Rebill: Required if the receiver requests reporting for quantity changes due to a therapeutic substitution that has occurred or a preferred product/service substitution that has occurred, or when a DUR alert has been resolved by changing quantities.
330-CW	ALTERNATE ID	N	Service Rebill: Not used.
454-EK	SCHEDULED PRESCRIPTION ID NUMBER	Q	Service Rebill: Required if necessary for state/federal/regulatory agency programs.
600-28	UNIT OF MEASURE	N	Service Rebill: Not used.
418-DI	LEVEL OF SERVICE	Q	Service Rebill: Required if this field could result in different coverage, pricing, or patient financial responsibility.
461-EU	PRIOR AUTHORIZATION TYPE CODE	Q	Service Rebill: Required if this field could result in different coverage, pricing, or patient financial responsibility.
462-EV	PRIOR AUTHORIZATION ID SUBMITTED	Q	Service Rebill: Required if this field could result in different coverage, pricing, or patient financial responsibility.
343-HD	DISPENSING STATUS	N	Service Rebill: Not used.
344-HF	QUANTITY INTENDED TO BE DISPENSED	N	Service Rebill: Not used.
345-HG	DAYS SUPPLY INTENDED TO BE DISPENSED	N	Service Rebill: Not used.
357-NV	DELAY REASON CODE	Q	Service Rebill: Required when needed to specify the reason that submission of the transaction has been delayed.
391-MT	PATIENT ASSIGNMENT INDICATOR (DIRECT MEMBER REIMBURSEMENT INDICATOR)	Q	Service Rebill: Required when the claims adjudicator does not assume the patient assigned his/her benefits to the provider or when the claims adjudicator supports a patient determination of whether he/she wants to assign or retain his/her benefits.
995-E2	ROUTE OF ADMINISTRATION	N	Service Rebill: Not used.
996-G1	COMPOUND TYPE	N	Service Rebill: Not used.
C99-KU	PREPARATION ENVIRONMENT TYPE	N	Service Rebill: Not used.
C98-KT	PREPARATION ENVIRONMENT EVENT CODE	N	Service Rebill: Not used.
147-U7	PHARMACY SERVICE TYPE	Q	Service Rebill: Required when the submitter must clarify the type of services being performed as a condition for proper reimbursement by the payer.
579-XX	ASSOCIATED PRESCRIPTION/SERVICE PROVIDER ID QUALIFIER	Q	Service Billing: Required if the Associated Prescription/Service Provider ID (580-XY) is used. Required if needed to associate multiple prescriptions/services to allow billing of the current prescription/service.
580-XY	ASSOCIATED PRESCRIPTION/SERVICE PROVIDER ID	Q	Service Billing: Required if the service provider is not the same as the current service provider. Required if needed to associate multiple prescriptions/services to allow billing of the current prescription/service.
581-XZ	ASSOCIATED PRESCRIPTION/SERVICE REFERENCE NUMBER QUALIFIER	Q	Service Billing: Required if Associated Prescription/Service Reference Number (456-EN) is used. Required if needed to associate multiple prescriptions/services to allow billing of the current prescription/service.

CLAIM SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
582-X0	ASSOCIATED PRESCRIPTION/SERVICE REFERENCE FILL NUMBER	Q	Service Billing: Required if Associated Prescription/Service Reference Number (456-EN) is used. Required if needed to associate multiple prescriptions/services to allow billing of the current prescription/service.
678-Y6	TIME OF SERVICE	N	Service Rebill: Not used.
681-ZF	SALES TRANSACTION ID	N	Service Rebill: Not used.
A29-ZS	REPORTED ADJUDICATED PROGRAM TYPE	N	Service Rebill: Not used.

PRICING SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
D61-RL	REGULATORY FEE TYPE CODE	Q***R***	Service Rebill: Required if Regulatory Fee Amount Submitted (481-HA) is used.
481-HA	REGULATORY FEE AMOUNT SUBMITTED	Q***R***	Service Rebill: Required if its value has an effect on the Gross Amount Due (430-DU) calculation. Zero (0) is a valid value.
482-GE	PERCENTAGE TAX AMOUNT SUBMITTED	Q	Service Rebill: Required if its value has an effect on the Gross Amount Due (430-DU) calculation. Zero (0) is a valid value.
483-HE	PERCENTAGE TAX RATE SUBMITTED	Q	Service Rebill: Required if needed to calculate Percentage Tax Amount Paid (559-AX).
484-JE	PERCENTAGE TAX BASIS SUBMITTED	Q	Service Rebill: Required if Percentage Tax Amount Submitted (482-GE) and Percentage Tax Rate Submitted (483-HE) are used. Required if this field could result in different pricing. Required if needed to calculate Percentage Tax Amount Paid (559-AX).
426-DQ	USUAL AND CUSTOMARY CHARGE	Q	Service Rebill: Required if needed per trading partner agreement.
430-DU	GROSS AMOUNT DUE	R	Service Rebill: Required. See Pricing Formula for fields used in calculation.
423-DN	BASIS OF COST DETERMINATION	N	Service Rebill: Not used.
D14-KX	SUBROGATION AMOUNT REQUESTED	N	Service Rebill: Not used.

Notes on Pricing Segment on a Service Rebill Request:

The Pricing Segment is mandatory for a Service Rebill request. The Pricing Segment defines dollar amounts for a Service Rebill.

It is highly recommended that whenever possible, the individual dollar fields are to be requested of the sender by the receiver. On the response, the sender should return the individual payment response fields to allow the receiver to reconcile against the requested payment fields. It is recommended that for the dollar fields, if the field is not required or situational in the calculation, that the dollar fields are not sent.

See section "Pricing Guidelines".

14.6.6 PHARMACY PROVIDER SEGMENT (SERVICE REBILL)

PHARMACY PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
465-EY	PROVIDER ID QUALIFIER	Q	Service Rebill: Required if Provider ID (444-E9) is used.
444-E9	PROVIDER ID	Q	Service Rebill: Required if necessary for state/federal/regulatory agency programs. Required if necessary to determine if provider is credentialed to perform this service. Required if needed for reconciliation of encounter-reported data or encounter reporting.
B96-4A	PROVIDER FIRST NAME	Q	Service Rebill: For Workers' Compensation only. The provider responsible for the dispensing of the prescription as required by state regulations.
B97-4M	PROVIDER LAST NAME	Q	Service Rebill:

A26-ZP	PRESCRIBER ALTERNATE ID	N	Service Rebill: Not used.
A27-ZQ	PRESCRIBER ALTERNATE ID ASSOCIATED STATE/PROVINCE ADDRESS	N	Service Rebill: Not used.
B40-3A	PRESCRIBER ALTERNATE ID ASSOCIATED COUNTRY CODE	N	Service Rebill: Not used.
D01-KV	PRESCRIBER DEA NUMBER	N	Service Rebill: Not used.
D57-RG	PRESCRIBER PLACE OF SERVICE	Q	Service Rebill: Required when a valid prescriber place of service value is reported by the prescriber.
E12-0F	PRESCRIBER MIDDLE NAME	N	Service Rebill: Not used.

Notes on Prescriber Segment on a Service Rebill Request:

The Prescriber Segment is situational for a Service Rebill request. It is used when prescriber information is needed to perform Service Rebill determination. The Segment is mandatory if required under provider payer contract or mandatory on Service Rebills where this information is necessary for adjudication of the service.

14.6.8 COORDINATION OF BENEFITS/OTHER PAYMENTS SEGMENT (SERVICE REBILL)

COORDINATION OF BENEFITS/OTHER PAYMENTS SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
337-4C	COORDINATION OF BENEFITS/OTHER PAYMENTS COUNT	M	Maximum count of 3.
338-5C	OTHER PAYER COVERAGE TYPE	M***R***	Service Rebill: Occurs with Coordination of Benefits/Other Payments Count (337-4C). Grouped with Other Payer ID Qualifier (339-6C), Other Payer ID (340-7C), Other Payer Date (443-E8), Other Payer Adjudicated Program Type (C47-9T), Other Payer Reconciliation ID(C49-9V), and either Other Payer Amount Paid Count (341-HB) and its grouping, Other Payer-Patient Responsibility Amount Count (353-NR) and its grouping, or Other Payer Reject Count (471-5E) and its grouping. May be grouped with the Other Payer Percentage Tax Exempt Indicator (D51-P7), the Other Payer Regulatory Fee Type Count (D53-P9) and its grouping, and/or the Benefit Stage Indicator Count (C50-9W) and its grouping, when applicable for the Other Payer.

COORDINATION OF BENEFITS/OTHER PAYMENTS SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			See section "Repetition and Multiple Occurrences", "Repeating Data Elements", "Request Segments", "Coordination of Benefits/Other Payments Segment".
339-6C	OTHER PAYER ID QUALIFIER	Q***R***	Service Rebill: Required if Other Payer ID (340-7C) is used.
340-7C	OTHER PAYER ID	Q***R***	Service Rebill: Required if identification of the Other Payer is necessary for service billing adjudication.
C47-9T	OTHER PAYER ADJUDICATED PROGRAM TYPE	Q***R***	Service Rebill: Required if identification of the Other Payer Adjudication Program Type is known.
C49-9V	OTHER PAYER RECONCILIATION ID	Q***R***	Service Rebill: Required if the identification of the Other Payer Reconciliation ID is known.
443-E8	OTHER PAYER DATE	Q***R***	Service Rebill: Required if identification of the Other Payer Date is necessary for service billing adjudication.
993-A7	INTERNAL CONTROL NUMBER	Q***R***	Service Rebill: Required when used for payer-to-payer coordination of benefits to track the claim without regard to the "Service Provider ID, Prescription Number and Date of Service".
341-HB	OTHER PAYER AMOUNT PAID COUNT	Q	Service Rebill: Maximum count of 9. Required if Other Payer Amount Paid Qualifier (342-HC) is used.
342-HC	OTHER PAYER AMOUNT PAID QUALIFIER	Q***R***	Service Rebill: Required if Other Payer Amount Paid (431-DV) is used.
431-DV	OTHER PAYER AMOUNT PAID	Q***R***	Service Rebill: Required if other payer has approved payment for some/all of the billing. Zero (0) is a valid value. Not used for patient financial responsibility only billing. Not used for non-governmental agency programs if Other Payer-Patient Responsibility Amount (352-NQ) is submitted.
D51-P7	OTHER PAYER PERCENTAGE TAX EXEMPT INDICATOR	Q	Service Rebill: Required if the other payer has reported a valid value as Percentage Tax Exempt Indicator (557-AV).
D53-P9	OTHER PAYER REGULATORY FEE TYPE COUNT	Q	Service Rebill: Maximum count of 3. Required if Other Payer Regulatory Fee Type Code (D63-RN) is used.
D63-RN	OTHER PAYER REGULATORY FEE TYPE CODE	Q***R***	Service Rebill: Required if Other Payer Regulatory Fee Exempt Indicator (D52-P8) is used.
D52-P8	OTHER PAYER REGULATORY FEE EXEMPT INDICATOR	Q***R***	Service Rebill: Required if other payer has reported a valid value as Regulatory Fee Exempt Indicator (D62-RM).
471-5E	OTHER PAYER REJECT COUNT	Q	Service Rebill: Maximum count of 5. Required if Other Payer Reject Code (472-6E) is used.
472-6E	OTHER PAYER REJECT CODE	Q***R***	Service Rebill: Required when the other payer has denied the payment for the billing. Note: This field must only contain the NCPDP Reject Code (511-FB) values.
353-NR	OTHER PAYER-PATIENT RESPONSIBILITY AMOUNT COUNT	Q	Service Rebill: Maximum count of 25. Required if Other Payer-Patient Responsibility Amount Qualifier (351-NP) is used. Note: The occurrences are dependent upon the number of component parts returned from a previous payer.

Version F6

January 2020

OFFICIAL RELEASE

COORDINATION OF BENEFITS/OTHER PAYMENTS SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
351-NP	OTHER PAYER-PATIENT RESPONSIBILITY AMOUNT QUALIFIER	Q***R***	Service Rebill: Required if Other Payer-Patient Responsibility Amount (352-NQ) is used.
352-NQ	OTHER PAYER-PATIENT RESPONSIBILITY AMOUNT	Q***R***	Service Rebill: Required if necessary for patient financial responsibility only billing. Required if necessary for state/federal/regulatory agency programs. Not used for non-governmental agency programs if Other Payer Amount Paid (431-DV) is submitted.
C50-9W	BENEFIT STAGE INDICATOR COUNT	Q	Service Rebill: Maximum count of 4. Required if Benefit Stage Indicator(s) (C51-9X) are submitted.
C51-9X	BENEFIT STAGE INDICATOR	Q***R***	Service Rebill: As required by COB payer. Must only have one value per iteration - value must not be repeated.

Notes on Coordination of Benefits/Other Payments Segment on a Service Rebill Request:

The Coordination of Benefits/Other Payments Segment is not used for a Service Rebill request to a primary payer.

The Coordination of Benefits/Other Payments Segment is required for a Service Rebill request to a non-primary payer. It is used by downstream payers to access claim adjudication results (financial or reject code values) from all previous payers to determine their claim/encounter results.

The Coordination of Benefits/Other Payments Segment is also used by a payer to uniquely identify a claim or encounter in case of duplicate processing. For example, the same patient may have multiple prescription benefit plans from the same processor where the processor is the primary *and* secondary payer, or primary *and* tertiary, or secondary *and* tertiary payer, etc. The downstream payer uses the duplicate claim logic fields, including the Other Payer Coverage Type (338-5C) to differentiate which claim or encounter to process. See section “*Transaction Response Status*”, “*Duplicate Transactions*”.

Note, the Other Payer Coverage Type (338-5C) occurrences do not have to appear in sequential order (primary, secondary, tertiary).

The Other Payer Reconciliation ID (C49-9V) would not be reported when the COB occurrence is reporting a rejected response from that previous payer, represented by the values submitted in the Other Payer Reject Code (472-6E) field.

See section “[Other Coverage Code \(308-C8\)](#)”.

14.6.9 WORKERS' COMPENSATION SEGMENT (SERVICE REBILL)

WORKERS' COMPENSATION SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M

126-UA	GENERIC EQUIVALENT PRODUCT ID	Q	Service Rebill: Required if necessary for state/federal/regulatory agency programs.

Notes on Workers' Compensation Segment on a Service Rebill Request:

The Workers' Compensation Segment is situational for a Service Rebill request. It is used when processing a Service Rebill for a work-related injury or condition.

14.6.10 DUR/PPS SEGMENT (SERVICE REBILL)

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

- 334 -

DUR/PPS SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
473-7E	DUR/PPS CODE COUNTER	Q***R***	Service Rebill: Maximum 9 occurrences. Required if DUR/PPS Segment is used.
439-E4	REASON FOR SERVICE CODE	Q***R***	Service Rebill: Required if this field could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome. Required if this field affects payment for or documentation of professional pharmacy service.
440-E5	PROFESSIONAL SERVICE CODE	Q***R***	Service Rebill: Required if this field could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome. Required if this field affects payment for or documentation of professional pharmacy service.
441-E6	RESULT OF SERVICE CODE	Q***R***	Service Rebill: Required if this field could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome. Required if this field affects payment for or documentation of professional pharmacy service.
474-8E	DUR/PPS LEVEL OF EFFORT	Q***R***	Service Rebill: Required if this field could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome. Required if this field affects payment for or documentation of professional pharmacy service.
475-J9	DUR/DUE CO-AGENT ID QUALIFIER	Q***R***	Service Rebill: Required if DUR/DUE Co-Agent ID (476-H6) is used.
476-H6	DUR/DUE CO-AGENT ID	Q***R***	Service Rebill: Required if this field could result in different drug utilization review outcome. Required if this field affects payment for or documentation of professional pharmacy service.

Notes on DUR/PPS Segment on a Service Rebill Request:

The DUR/PPS Segment is situational for a Service Rebill request. It is used when a sender notifies the receiver of information on the appropriate selection to process the Service Rebill. The DUR/PPS information may be sent on the initial submission or alternatively sent after a DUR/PPS rejection from a receiver. The Segment is mandatory if required under provider payer contract or mandatory on Service Rebills where this information is necessary for adjudication of the service.

14.6.11 CLINICAL SEGMENT (SERVICE REBILL)

CLINICAL SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
491-VE	DIAGNOSIS CODE COUNT	Q	Service Rebill: Maximum count of 5. Required if Diagnosis Code Qualifier (492-WE) and Diagnosis Code (424-DO) are used.
492-WE	DIAGNOSIS CODE QUALIFIER	Q***R***	Service Rebill: Required if Diagnosis Code (424-DO) is used.
424-DO	DIAGNOSIS CODE	Q***R***	Service Rebill: The value for this field is obtained from the prescriber or authorized representative. Required if this field could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome.

January 2020

OFFICIAL RELEASE

ADDITIONAL DOCUMENTATION SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
375-2W	REQUEST PERIOD RECERT/REVISED DATE	Q	Service Rebill: Required if necessary for state/federal/regulatory agency programs. Required if the Request Status (373-2U) = "2" (Revision) or "3" (Recertification).
373-2U	REQUEST STATUS	Q	Service Rebill: Required if necessary for state/federal/regulatory agency programs.
371-2S	LENGTH OF NEED QUALIFIER	Q	Service Rebill: Required if Length of Need (370-2R) is used.
370-2R	LENGTH OF NEED	Q	Service Rebill: Required if necessary for state/federal/regulatory agency programs.
372-2T	PRESCRIBER/SUPPLIER DATE SIGNED	Q	Service Rebill: Required if necessary for state/federal/regulatory agency programs.
376-2X	SUPPORTING DOCUMENTATION	Q	Service Rebill: Required if necessary for state/federal/regulatory agency programs (using Section C of Medicare's CMN forms).
377-2Z	QUESTION NUMBER/LETTER COUNT	Q	Service Rebill: Maximum count of 50. Required if needed to provide response to narratives.
378-4B	QUESTION NUMBER/LETTER	Q***R***	Service Rebill: Required if necessary for state/federal/regulatory agency programs to respond to questions included on a Medicare form. Required if Question Number/Letter Count (377-2Z) is greater than 0.
379-4D	QUESTION PERCENT RESPONSE	Q***R***	Service Rebill: Required if necessary for state/federal/regulatory agency programs to respond to questions included on a Medicare form that requires a percent as the response. (At least one response is required per question.)
380-4G	QUESTION DATE RESPONSE	Q***R***	Service Rebill: Required if necessary for state/federal/regulatory agency programs to respond to questions included on a Medicare form that requires a date as the response. (At least one response is required per question.)
381-4H	QUESTION DOLLAR AMOUNT RESPONSE	Q***R***	Service Rebill: Required if necessary for state/federal/regulatory agency programs to respond to questions included on a Medicare form that requires a dollar amount as the response. (At least one response is required per question.)
382-4J	QUESTION NUMERIC RESPONSE	Q***R***	Service Rebill: Required if necessary for State/federal/regulatory agency programs to respond to questions included on a Medicare form that requires a numeric as the response. (At least one response is required per question.)
383-4K	QUESTION ALPHANUMERIC RESPONSE	Q***R***	Service Rebill: Required if necessary for state/federal/regulatory agency programs to respond to questions included on a Medicare form that requires an alphanumeric as the response. (At least one response is required per question.)

Notes on Additional Documentation Segment on a Service Rebill:

The Additional Documentation Segment is situational for Service Rebill request. It is used to provide additional information on Medicare forms.

14.6.13 FACILITY SEGMENT (SERVICE REBILL)

FACILITY SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
B95-3Z	FACILITY ID QUALIFIER	Q	Service Rebill: Required if Facility ID (336-8C) is used.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

- 337 -

FACILITY SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
336-8C	FACILITY ID	Q	Service Rebill: Required if necessary for state/federal/regulatory agency programs. Required if "required by law" as defined in the HIPAA final Privacy regulations section 164.501 definitions (45 CFR Parts 160 and 164 Standards for Privacy of Individually Identifiable Health Information; Final Rule – Thursday, December 28, 2000, page 82803 and following, and Wednesday, August 14, 2002, page 53267 and following.)
385-3Q	FACILITY NAME	Q	Service Rebill: Required if necessary for state/federal/regulatory agency programs.
B20-7M	FACILITY STREET ADDRESS LINE 1	Q	Service Rebill: Required if necessary for state/federal/regulatory agency programs.
B21-7N	FACILITY STREET ADDRESS LINE 2	Q	Service Rebill: Required if necessary for state/federal/regulatory agency programs. Use only when a second address line is needed and Facility Street Address Line 1 (B20-7M) has been used.
388-5J	FACILITY CITY ADDRESS	Q	Service Rebill: Required if necessary for state/federal/regulatory agency programs.
387-3V	FACILITY STATE/PROVINCE ADDRESS	Q	Service Rebill: Required if necessary for state/federal/regulatory agency programs.
389-6D	FACILITY ZIP/POSTAL ZONE	Q	Service Rebill: Required if necessary for state/federal/regulatory agency programs.
B37-1X	FACILITY COUNTRY CODE	Q	Service Rebill: Required if country is not "US".

Notes on Facility Segment on a Service Rebill Request:

The Facility Segment is situational for Service Rebill request. It is used when these fields could result in different coverage, pricing, and/or patient financial responsibility. The Facility identified in this section is not the dispensing pharmacy.

14.6.14 NARRATIVE SEGMENT (SERVICE REBILL)

NARRATIVE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
390-BM	NARRATIVE MESSAGE	Q	Service Rebill: Required if necessary only to support exception handling of pharmacy claims for Medicare Part B claim billing.

Notes on Narrative Segment on a Service Rebill Request:

The Narrative Segment is situational for Service Rebill request. It is used to support exception handling for Medicare service billing.

14.6.15 INTERMEDIARY SEGMENT (SERVICE REBILL)

INTERMEDIARY SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
B44-8G	INTERMEDIARY ID COUNT	M	Service Rebill: Maximum count of 9.
B45-8H	INTERMEDIARY ID TYPE CODE	M***R***	
B46-8J	INTERMEDIARY ID TYPE ENTITY	M***R***	
B47-8K	INTERMEDIARY ID QUALIFIER	M***R***	
B48-8M	INTERMEDIARY ID	M***R***	

Version F6

14.7.1.2 SERVICE REBILL RESPONSE SEGMENTS (TRANSMISSION ACCEPTED/TRANSACTION PAID)

14.7.1.2.1 RESPONSE HEADER SEGMENT (SERVICE REBILL) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

RESPONSE HEADER SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	For Transaction Code of "S3", in the Response Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "2" (Service Billing).
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on a Service Rebill Response:

The Response Header Segment is a mandatory, fixed length segment for Service Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid). The "Situation" column is not applicable.

14.7.1.2.2 RESPONSE MESSAGE SEGMENT (SERVICE REBILL) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE MESSAGE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Service Rebill: Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Service Rebill Response:

The Response Message Segment is situational for Service Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid). It is used when additional text information needs to be sent.

14.7.1.2.3 RESPONSE INSURANCE SEGMENT (SERVICE REBILL) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
301-C1	GROUP ID	Q	Service Rebill: Required if needed to identify the actual cardholder or employer group, to identify appropriate group number, when available. Required to identify the actual group that was used when multiple group coverages exist. Note: This field may contain the Group ID echoed from the request. May contain the actual Group ID if unknown to the receiver.
524-FO	PLAN ID	Q	Service Rebill: Required if needed to identify the actual plan parameters, benefit, or coverage criteria, when available. Required to identify the actual plan ID that was used when multiple group coverages exist. Required if needed to contain the actual plan ID if unknown to the receiver.
545-2F	NETWORK REIMBURSEMENT ID	Q	Service Rebill: Required if needed to identify the network for the covered member.

144-UX	OTHER PAYER BENEFIT EFFECTIVE DATE	Q***R***	Service Rebill: Required when other coverage is known which will become effective after the Date of Service submitted. Other Payer Benefit Effective Date would not be returned for coverage that is current as of the claim date of service. This allows the receiver to identify other coverage that needs to be billed or stored for future use.
145-UY	OTHER PAYER BENEFIT TERMINATION DATE	Q***R***	Service Rebill: Required when other coverage termination date is known which is after the Date of Service submitted. If the termination date is not known this field would not be returned.
D23-M5	OTHER PAYER NAME	Q***R***	Service Rebill: Required if the data is available.

Notes on Response Other Payers Segment on a Service Rebill Response:

The Response Other Payers Segment is situational for a Service Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) when other insurance information is available.

Notes on Response Other Related Benefit Detail Segment on a Service Rebill Response: The Response Other Related Benefit Detail Segment is situational for a Service Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid). Information will be returned when the Date of Service (401-D1) is in an active period for any of the records above (ESRD, Hospice, Institutional, Disability, or LIS or when other benefit information is available).

14.7.1.2.12 RESPONSE INTERMEDIARY SEGMENT (SERVICE REBILL) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE INTERMEDIARY SEGMENT		SITUATIONAL SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
B52-8R	RESPONSE INTERMEDIARY AUTHORIZATION COUNT	Q	Service Rebill: Required if Response Intermediary Authorization Type ID is used. Maximum count of 9.
B53-8S	RESPONSE INTERMEDIARY AUTHORIZATION TYPE ID	Q***R***	Service Rebill: Required if Response Intermediary Authorization ID is used.
B54-8T	RESPONSE INTERMEDIARY AUTHORIZATION ID	Q***R***	Service Rebill: Required if the intermediary determines an authorization identifier needs to be communicated to the receiver.
B51-8Q	INTERMEDIARY MESSAGE	Q***R***	Service Rebill: Required if text is needed for clarification or detail.
C86-KC	INTERMEDIARY HELP DESK SUPPORT TYPE COUNT	M	Service Rebill: Maximum count of 5. Used to qualify the number of occurrences of Intermediary Help Desk Support Type (C85-KB) that is included in the Response Intermediary Segment.
C85-KB	INTERMEDIARY HELP DESK SUPPORT TYPE	M***R***	
C81-G9	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE COUNT	R	Service Rebill: Maximum count of 5. Used to qualify the number of occurrences of the Intermediary Help Desk Business Unit Type, Intermediary Help Desk Contact Information Qualifier, Intermediary Help Desk Contact Information and Intermediary Help Desk Contact Information Extension that is included in the Response Intermediary Segment. Required if Help Desk Business Unit Type (C80-G8) is used
C80-G8	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE	Q***R***	Service Rebill: Required if Intermediary Help Desk Contact Information Qualifier (C84-KA) is used.
C84-KA	INTERMEDIARY HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Service Rebill: Required if Help Desk Contact Information (C84-KA) is used.
C82-JP	INTERMEDIARY HELP DESK CONTACT INFORMATION	Q***R***	Service Rebill: Required if needed to provide help desk contact support information to the receiver.
C83-JR	INTERMEDIARY HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Service Rebill: Required if needed to provide an extension to the Help Desk Contact Information (C82-JP).

Notes on Response Intermediary Segment on a Service Rebill Response:

The Response Intermediary Segment is situational for a Service Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). The segment is used to support the authorization from an intermediary such as a Prescription Drug Monitoring Program (PDMP) or Risk Evaluation and Mitigation Strategy (REMS) program.

14.7.1.2.13 RESPONSE PROVIDER SEGMENT (SERVICE REBILL) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE PROVIDER SEGMENT		SITUATIONAL SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Service Rebill: Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Service Rebill: Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Service Rebill Response:

The Response Provider Segment is situational for a Service Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

14.7.2 TRANSMISSION ACCEPTED/TRANSACTION CAPTURED**14.7.2.1 DIAGRAM FOR TRANSMISSION OF A SERVICE REBILL RESPONSE (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)**

Service Rebill transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured)

The Response Pricing Segment is not used in payer-to-payer transactions. Therefore, in this case, there are no situational transaction-level segments.

The duplicate response codes for the Service Rebill transaction are not applicable. See section "Transaction Response Status", "Duplicate Transactions" for the handling of a duplicate transaction.

Service Rebill transactions – The "C" (Captured) event occurs after the reversal portion of the service rebill is processed successfully and the service is captured for processing. If the service rebill reversal is not processed successfully, a "R" (Rejected) response must be sent.

RESPONSE HEADER SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	For Transaction Code of "S3", in the Response Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "2" (Service Billing).
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on a Service Rebill Response:

The Response Header Segment is a mandatory, fixed length segment for Service Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured). The "Situation" column is not applicable.

14.7.2.2.2 RESPONSE MESSAGE SEGMENT (SERVICE REBILL) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE MESSAGE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Service Rebill: Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Service Rebill Response:

The Response Message Segment is situational for Service Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured). It is used when additional text information needs to be sent.

14.7.2.2.3 RESPONSE INSURANCE SEGMENT (SERVICE REBILL) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
301-C1	GROUP ID	Q	Service Rebill: Required if needed to identify the actual cardholder or employer group, to identify appropriate group number, when available. Required to identify the actual group that was used when multiple group coverages exist. Note: This field may contain the Group ID echoed from the request. May contain the actual Group ID if unknown to the receiver.
524-FO	PLAN ID	Q	Service Rebill: Required if needed to identify the actual plan parameters, benefit, or coverage criteria, when available. Required to identify the actual plan ID that was used when multiple group coverages exist. Required if needed to contain the actual plan ID if unknown to the receiver.
545-2F	NETWORK REIMBURSEMENT ID	N	Service Rebill: Not used.
C96-KR	PAYER/HEALTH PLAN ID COUNT	N	Service Rebill: Not used.

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
568-J7	PAYER/HEALTH PLAN ID QUALIFIER	N	Service Rebill: Not used.
569-J8	PAYER/HEALTH PLAN ID	N	Service Rebill: Not used.
115-N5	MEDICAID ID NUMBER	N	Service Rebill: Not used.
116-N6	MEDICAID AGENCY NUMBER	N	Service Rebill: Not used.
302-C2	CARDHOLDER ID	Q	Service Rebill: Required if the identification to be used in future transactions is different than what was submitted on the request.

Notes on Response Insurance Segment on a Service Rebill Response:

The Response Insurance Segment is situational for Service Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured). It is used when coverage information may be provided from the sender to the receiver.

14.7.2.2.4 RESPONSE PATIENT SEGMENT (SERVICE REBILL) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
618-RR	PATIENT ID COUNT	Q	Service Rebill: Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.
331-CX	PATIENT ID QUALIFIER	Q***R***	Service Rebill: Required if Patient ID (332-CY) is used.
332-CY	PATIENT ID	Q***R***	Service Rebill: Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.
310-CA	PATIENT FIRST NAME	Q	Service Rebill: Required if known.
311-CB	PATIENT LAST NAME	Q	Service Rebill: Required if known.
304-C4	DATE OF BIRTH	Q	Service Rebill: Required if known.

Notes on Response Patient Segment on a Service Rebill Response:

The Response Patient Segment is situational for Service Rebill transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) when patient demographic information needs to be sent from the sender to the receiver.

14.7.2.2.5 RESPONSE STATUS SEGMENT (SERVICE REBILL) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Service Rebill: Required if needed to identify the transaction.
B98-34	RECONCILIATION ID	R	Service Rebill: Required for a "C" Captured response. This is a unique processor assigned value that must be provided on a "C" response. This should be a new value since this is associated to payment provided based upon newly submitted data from originator. Should a subsequent reversal occur, the Reconciliation ID provides a link to the specific transaction in the processor system that is to be reversed. See section "RESPONSE STATUS SEGMENT / RECONCILIATION ID".

F07-YL	DUR/DUE MAXIMUM DAILY DOSE UNIT OF MEASURE	Q***R***	Service Rebill: Required when DUR/DUE conflict indicates a dosing threshold has been exceeded and maximum dose information is available.
F08-YJ	DUR/DUE MINIMUM DAILY DOSE QUANTITY	Q***R***	Service Rebill: Required when DUR/DUE conflict indicates a dosing threshold has not been met and minimum dose information is available.
F09-YI	DUR/DUE MINIMUM DAILY DOSE UNIT OF MEASURE	Q***R***	Service Rebill: Required when DUR/DUE conflict indicates a dosing threshold has not been met and minimum dose information is available.
544-FY	DUR/DUE FREE TEXT MESSAGE	Q***R***	Service Rebill: Required if needed to supply additional information for the service.

Notes on Response DUR/PPS Segment on a Service Rebill Response:

The Response DUR/PPS Segment is situational for a Service Rebill Response when the Header Response Status (501-F1) is "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured). This would be used when a processor identifies an additional professional pharmacy service billing opportunity.

Notes on Response Pricing Segment on a Service Rebill Response:

The Response Pricing Segment is situational for a Service Rebill Response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) is "C" (Captured).

The Response Pricing Segment is not used in payer-to-payer transactions.

All dollar fields except Patient Pay Amount (505-F5) are estimated amounts. If actual amounts are returned on fields other than Patient Pay Amount (505-F5), the "P" (Paid) response must be used.

If the Transaction Response Status (112-AN) = C (Captured) or Q (Duplicate of Captured), dollar fields should be supplied in the response.

- If the response is a "true" Capture (i.e., replacement of batch billing, with no edits or pricing), then corresponding response fields should be populated with values as submitted. *Ideally, processor should provide "real" patient financial responsibility values on a Capture. If this is not possible, provider must **know** (by trading partner agreement) the patient financial responsibility to charge and factor that into their system so collection occurs.*
- If the response is captured by an Intermediary who can provide better pricing criteria, the corresponding response fields should be populated with the *probable* values and those values used to determine estimated pricing as noted above. Since the claim has **not** been fully adjudicated, this should remain a capture response.

See section "Pricing Guidelines".

Notes on Response Intermediary Segment on a Service Rebill Response:

The Response Intermediary Segment is situational for a Service Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). The segment is used to support the authorization from an intermediary such as a Prescription Drug Monitoring Program (PDMP) or Risk Evaluation and Mitigation Strategy (REMS) program.

14.7.2.2.11 RESPONSE PROVIDER SEGMENT (SERVICE REBILL) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Service Rebill: Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Service Rebill: Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Service Rebill Response:

The Response Provider Segment is situational for a Service Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

14.7.3 TRANSMISSION ACCEPTED/TRANSACTION REJECTED**14.7.3.1 DIAGRAM FOR TRANSMISSION OF A SERVICE REBILL RESPONSE (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)**

Service Rebill transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected)

Service Rebill transactions – If the service rebill reversal is not processed successfully, a "R" (Rejected) response must be sent.

The Response Prior Authorization Segment is not used in payer-to-payer transactions. Therefore, in this case, there are no situational transaction-level segments.

The duplicate response codes for the Service Rebill transaction are not applicable. See section "Transaction Response Status", "Duplicate Transactions" for the handling of a duplicate transaction.

14.7.3.2 SERVICE REBILL RESPONSE SEGMENTS (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)**14.7.3.2.1 RESPONSE HEADER SEGMENT (SERVICE REBILL) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)**

RESPONSE HEADER SEGMENT		MANDATORY SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	For Transaction Code of "S3", in the Response Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "2" (Service Billing).
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on a Service Rebill Response:

The Response Header Segment is a mandatory, fixed length segment for Service Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). The "Situation" column is not applicable.

14.7.3.2.2 RESPONSE MESSAGE SEGMENT (SERVICE REBILL) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE MESSAGE SEGMENT		SITUATIONAL SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Service Rebill: Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Service Rebill Response:

The Response Message Segment is situational for Service Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). It is used when additional text information needs to be sent.

14.7.3.2.3 RESPONSE INSURANCE SEGMENT (SERVICE REBILL) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE INSURANCE SEGMENT		SITUATIONAL SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
301-C1	GROUP ID	Q	Service Rebill: Required if needed to identify the actual cardholder or employer group, to identify appropriate group number, when available. Required to identify the actual group that was used when multiple group coverages exist. Note: This field may contain the Group ID echoed from the request. May contain the actual Group ID if unknown to the receiver.
524-FO	PLAN ID	Q	Service Rebill: Required if needed to identify the actual plan parameters, benefit, or coverage criteria, when available. Required to identify the actual plan ID that was used when multiple group coverages exist. Required if needed to contain the actual plan ID if unknown to the receiver.

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
545-2F	NETWORK REIMBURSEMENT ID	Q	Service Rebill: Required if needed to identify the network for the covered member. Required if needed to identify the actual Network Reimbursement ID, when applicable and/or available. Required to identify the actual Network Reimbursement ID that was used when multiple Network Reimbursement IDs exist.
C96-KR	PAYER/HEALTH PLAN ID COUNT	Q	Service Rebill: Maximum Count of 3. Required if Payer/Health Plan ID (569-J8) is used.
568-J7	PAYER/HEALTH PLAN ID QUALIFIER	Q***R***	Service Rebill: Required if Payer/Health Plan ID (569-J8) is used.
569-J8	PAYER/HEALTH PLAN ID	Q***R***	Service Rebill: Required when identification of the Payer/Health Plan is necessary. Required when a Medicare Part D Contract ID applies to the response.
115-N5	MEDICAID ID NUMBER	N	Service Rebill: Not used.
116-N6	MEDICAID AGENCY NUMBER	N	Service Rebill: Not used.
302-C2	CARDHOLDER ID	Q	Service Rebill: Required if the identification to be used in future transactions is different than what was submitted on the request.

Notes on Response Insurance Segment on a Service Rebill Response:

The Response Insurance Segment is situational for Service Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). It is used when coverage or reimbursement parameters or identifiers need to be sent from the sender to the receiver.

14.7.3.2.4 RESPONSE PATIENT SEGMENT (SERVICE REBILL) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
618-RR	PATIENT ID COUNT	Q	Service Rebill: Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.
331-CX	PATIENT ID QUALIFIER	Q***R***	Service Rebill: Required if Patient ID (332-CY) is used.
332-CY	PATIENT ID	Q***R***	Service Rebill: Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.
310-CA	PATIENT FIRST NAME	Q	Service Rebill: Required if known.
311-CB	PATIENT LAST NAME	Q	Service Rebill: Required if known.
304-C4	DATE OF BIRTH	Q	Service Rebill: Required if known.

Notes on Response Patient Segment on a Service Rebill Response:

The Response Patient Segment is situational for Service Rebill transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected) when patient demographic information needs to be sent from the sender to the receiver.

546-4F	REJECT FIELD OCCURRENCE INDICATOR	Q***R***	Service Rebill: Required if a repeating field is in error, to identify repeating field occurrence. This field must be sent when relaying error information about a repeating field or set. Note, if the Reject Code is not denoting a repeating field or set, the Reject Field Occurrence Indicator must not be sent.
547-5F	APPROVED MESSAGE CODE COUNT	N	Service Rebill: Not used.
548-6F	APPROVED MESSAGE CODE	N***R***	Service Rebill: Not used.
130-UF	ADDITIONAL MESSAGE INFORMATION COUNT	Q	Service Rebill: Maximum count of 25. Required if Additional Message Information (526-FQ) is used. Used to qualify the number of occurrences of the Additional Message Information (526-FQ) that is included in the Response Status Segment.
132-UH	ADDITIONAL MESSAGE INFORMATION QUALIFIER	Q***R***	Service Rebill: Required if Additional Message Information (526-FQ) is used.
526-FQ	ADDITIONAL MESSAGE INFORMATION	Q***R***	Service Rebill: Required when additional text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.
131-UG	ADDITIONAL MESSAGE INFORMATION CONTINUITY	Q***R***	Service Rebill: Required if and only if current repetition of Additional Message Information (526-FQ) is used, another populated repetition of Additional Message Information (526-FQ) follows it, and the text of the following message is a continuation of the current.
C72-BH	HELP DESK SUPPORT TYPE COUNT	M	Service Rebill: Maximum count of 5. Used to qualify the number of occurrences of Help Desk Support Type (C71-BG) that is included in the Response Status Segment.
C71-BG	HELP DESK SUPPORT TYPE	M***R***	
C67-BB	HELP DESK BUSINESS UNIT TYPE COUNT	R	Service Rebill: Maximum count of 5. Used to qualify the number of occurrences of the Help Desk Business Unit Type, Help Desk Contact Information Qualifier, Help Desk Contact Information and Help Desk Contact Information Extension that is included in the Response Status Segment. Required if Help Desk Business Unit Type (C66-BA) is used.

F08-YJ	DUR/DUE MINIMUM DAILY DOSE QUANTITY	Q***R***	Service Rebill: Required when DUR/DUE conflict indicates a dosing threshold has not been met and minimum dose information is available.
F09-YI	DUR/DUE MINIMUM DAILY DOSE UNIT OF MEASURE	Q***R***	Service Rebill: Required when DUR/DUE conflict indicates a dosing threshold has not been met and minimum dose information is available.
544-FY	DUR/DUE FREE TEXT MESSAGE	Q***R***	Service Rebill: Required if needed to supply additional information for the service.

Notes on Response DUR/PPS Segment on a Service Rebill Response:

The Response DUR/PPS Segment is situational for a Service Rebill Response when the Header Response Status (501-F1) is "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). This would be used when a processor identifies an additional professional pharmacy service billing opportunity.

14.7.3.2.8 RESPONSE PRIOR AUTHORIZATION SEGMENT (SERVICE REBILL) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE PRIOR AUTHORIZATION SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT

RESPONSE PRIOR AUTHORIZATION SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
498-RB	PRIOR AUTHORIZATION DOLLARS AUTHORIZED	N	Service Rebill: Not used.
498-PW	PRIOR AUTHORIZATION NUMBER OF REFILLS AUTHORIZED	N	Service Rebill: Not used.
498-PX	PRIOR AUTHORIZATION QUANTITY ACCUMULATED	N	Service Rebill: Not used.
498-PY	PRIOR AUTHORIZATION ID ASSIGNED	Q	Service Rebill: Required when the receiver must submit this Prior Authorization ID in order to receive payment for the claim. (An example of a situation may include a Benefit Transition Period that allows for payment of claims, for a period of time that would normally reject.)

Notes on Response Prior Authorization Segment on a Service Rebill Response:

The Response Prior Authorization Segment is situational for a Service Rebill response when the Header Response Status (501-F1) is "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). It is used to relay the Prior Authorization ID Assigned (498-PY) which is returned when a Reject Code (511-FB) denotes that a prior authorization code needs to be submitted on the subsequent billing or the Prior Authorization Expiration Date (498-PT) is known.

The Response Prior Authorization Segment is not used in payer-to-payer transactions.

14.7.3.2.9 RESPONSE OTHER PAYERS SEGMENT (SERVICE REBILL) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE OTHER PAYERS SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
355-NT	OTHER PAYER ID COUNT	M	Service Rebill: Maximum count of 4.

C47-9T	OTHER PAYER ADJUDICATED PROGRAM TYPE	M***R***	
339-6C	OTHER PAYER ID QUALIFIER	Q***R***	Service Rebill: Required if Other Payer ID (340-7C) is used.
340-7C	OTHER PAYER ID	Q***R***	Service Rebill: Required if other insurance Payer ID information is available. Required if any of the following are sent: - Other Payer Processor Control Number (991-MH) - Other Payer Cardholder ID (356-NU) - Other Payer Group ID (992-MJ)
991-MH	OTHER PAYER PROCESSOR CONTROL NUMBER	Q***R***	Service Rebill: Required if other insurance Processor Control Number information is available.
356-NU	OTHER PAYER CARDHOLDER ID	Q***R***	Service Rebill: Required if other insurance Cardholder ID information is available.
992-MJ	OTHER PAYER GROUP ID	Q***R***	Service Rebill: Required if other insurance Group ID information is available.
142-UV	OTHER PAYER PERSON CODE	Q***R***	Service Rebill: Required if needed to uniquely identify the family members within the Cardholder ID, as assigned by the other payer.
127-UB	OTHER PAYER HELP DESK TELEPHONE NUMBER	Q***R***	Service Rebill: Required if needed to provide a support telephone number of the other payer to the receiver.
B23-7Q	OTHER PAYER HELP DESK TELEPHONE NUMBER EXTENSION	Q***R***	Service Rebill: Required if needed to provide a support telephone number extension of the other payer to the receiver.
143-UW	OTHER PAYER PATIENT RELATIONSHIP CODE	Q***R***	Service Rebill:

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

RESPONSE OTHER PAYERS SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
			Required if needed to uniquely identify the relationship of the patient to the cardholder ID, as assigned by the other payer.
144-UX	OTHER PAYER BENEFIT EFFECTIVE DATE	Q***R***	Service Rebill: Required when other coverage is known which will become effective after the Date of Service submitted. Other Payer Benefit Effective Date would not be returned for coverage that is current as of the claim date of service. This allows the receiver to identify other coverage that needs to be billed or stored for future use.
145-UY	OTHER PAYER BENEFIT TERMINATION DATE	Q***R***	Service Rebill: Required when other coverage termination date is known which is after the Date of Service submitted. If the termination date is not known this field would not be returned.
D23-M5	OTHER PAYER NAME	Q***R***	Service Rebill: Required if the data is available.

Notes on Response Other Payers Segment on a Service Rebill Response:

The Response Other Payers Segment is situational for a Service Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected) when other insurance information is available.

The following outlines different rejected claim scenarios and the use of the Response Other Payers Segment.

1. Non-Matched: If the identity of the patient cannot be validated and the Claim Billing or Encounter is rejected due to a non-match of field verification, then the Other Payer information is not sent.
2. COB Sequence: If the claim is rejected because it should be submitted to other payer(s) first, that Other Payer information must be sent, if available.
3. Change in 4RX (Change in Coverage): If the identity of the patient is verified and the Claim Billing or Encounter is rejected due to known alternate 4RX data required for claims processing, then the alternate 4RX data is returned as Other Payer information.
4. Plan Exclusion Alternate 4RX (Mutually Exclusive): If the claim is rejected due to plan benefit exclusions, then Other Payer information must be sent, if available.

Notes on Response Provider Segment on a Service Rebill Response:

The Response Provider Segment is situational for a Service Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

14.7.4 TRANSMISSION REJECTED/TRANSACTION REJECTED

Service Rebill transmission response Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected)

See section "Transaction Response Status", "Duplicate Transactions" for the handling of a duplicate transaction.

14.7.4.2 SERVICE REBILL RESPONSE SEGMENTS (TRANSMISSION REJECTED/TRANSACTION REJECTED)**14.7.4.2.1 RESPONSE HEADER SEGMENT (SERVICE REBILL) (TRANSMISSION REJECTED/TRANSACTION REJECTED)**

RESPONSE HEADER SEGMENT		MANDATORY SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on a Service Rebill Response:

The Response Header Segment is a mandatory, fixed length segment for Service Rebill response when the Header Response Status (501-F1) is "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The "Situation" column is not applicable.

If either the entire transmission or the Header is in error, the Header Response Status (501-F1) = "R" (Rejected). The transaction within the transmission must be rejected with an "R".

If the transaction rejects for detail errors, the Header Response Status (501-F1) = "A" (Accepted) and the Transaction Response Status (112-AN) will be "R" (Rejected).

Notes on Response Status Segment on a Service Rebill Response:

The Response Status Segment is mandatory for a Service Rebill Response for Header Response Status (501-F1) = "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The Response Status Segment is sent from the sender to the receiver to identify the outcome of the request. Refer to the NCPDP *External Code List* for guidance on the use of reject codes.

14.7.4.2.4 RESPONSE PROVIDER SEGMENT (SERVICE REBILL) (TRANSMISSION REJECTED/TRANSACTION REJECTED)

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Service Rebill: Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Service Rebill: Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Service Rebill Response:

The Response Provider Segment is situational for a Service Rebill response when the Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

15 PRIOR AUTHORIZATION INFORMATION

The Prior Authorization transactions allow a Processor to authorize, authorize and immediately adjudicate the claim or service, defer, or pend the request for review.

The Prior Authorization transactions include:

- Prior Authorization Request And Billing
- Prior Authorization Reversal
- Prior Authorization Inquiry
- Prior Authorization Request Only

See the section “*Transmission Structure*” for required segments. Prior authorization transactions allow providers and payers to electronically communicate the need for and approval to dispense special situation medications.

Prior Authorization reversals are used to back out the request for authorization, but not any claims submitted against the prior authorization. To reverse a Prior Authorization Request And Billing, paid billings must be reversed before the prior authorization is reversed. The pharmacy must submit a Claim or Service Reversal request (Transaction Code = B2 or S2) before submitting a Prior Authorization Reversal request. If there are no Claims or Services paid for the Prior Authorization in question, the processor must accept the Prior Authorization Reversal for the prior authorization only.

For Risk Evaluation and Mitigation Strategies (REMS) and Prescription Drug Monitoring Program (PDMP) processing there is a need to:

- Ensure that all transactions (i.e., billing functions, prior authorization functions) are reported,
- Ensure that all Prior Authorization Reversal transactions are delivered through the same path as their corresponding Prior Authorization Request And Billing transactions to ensure accurate reporting,
- Validate whether the REMS or PDMP Administrator supports the Prior Authorization Request And Billing (P1) and Prior Authorization Reversal (P2) transactions before using, and
- Ensure an understanding of how reversals are handled when a Prior Authorization Reversal request is denied or there is a time-out consideration.

Please see the section “*Prior Authorization Transaction Discussion*”.

The transactions are described below.

16 PRIOR AUTHORIZATION REQUEST AND BILLING INFORMATION

This transaction allows the Originator to request simultaneous adjudication/capture of the transaction by the Processor upon approval of the prior authorization. This transaction allows the prior authorization function and the adjudication/capture function to happen within one request.

The Transaction Code is "P1".

The Processor must provide one of the following general types of responses:

Captured – The Processor acknowledges receipt of a prior authorization request and billing but is not making any judgment about the request at this time.

Duplicate of Captured – This occurs when the Processor has previously received the request and processed the transaction, but the response did not return to the Originator. The Duplicate response contains the same information as returned in the Captured original response.

Deferred – The Processor notifies the Originator of a deferment of a prior authorization request and billing. If a duplicate request is received, the original response must be returned.

Paid – The Processor approves the authorization and adjudicates the claim or service in the same request.

Duplicate of Paid – This occurs when the Processor has previously received the request and processed the transaction, but the response did not return to the Originator. The Duplicate response contains the same information as returned in the Paid original response.

Rejected – The Processor has encountered an error in the transaction or processing, or does not approve the prior authorization request.

If the billing doesn't require a prior authorization, the transaction must be rejected. Reject Code "3R"(Prior Authorization Not Required) and "85"(Claim Not Processed) as well as any other pertinent reject codes should be returned.

See section "Transaction Response Status", "Duplicate Transactions".

16.1 PRIOR AUTHORIZATION REQUEST AND BILLING REQUEST DIAGRAMS

16.1.1 DIAGRAM FOR TRANSMISSION OF A PRIOR AUTHORIZATION REQUEST AND BILLING TRANSACTION

For a Prior Authorization Request And Billing, the scenario defined includes a Prior Authorization Request And Billing from a Sender to a Receiver.

The Compound Segment is not used when the Prior Authorization Request And Billing is for a service (Prescription/Service Reference Number Qualifier (455-EM) = "2" (Service Billing)).

D14-KX	SUBROGATION AMOUNT REQUESTED	N	Prior Authorization Request And Billing (Claim/Service): Not used.

Notes on Pricing Segment on a Prior Authorization Request And Billing Request:

The Pricing Segment is mandatory for a Prior Authorization Request And Billing request. The Pricing Segment defines dollar amounts and basis of costs for a Prior Authorization Request And Billing.

It is highly recommended that whenever possible, the individual dollar fields are to be requested of the sender by the receiver. In the response, the receiver should return the individual payment response fields to allow the sender to reconcile against the requested payment fields. It is recommended that for the dollar fields, if the field is not required or situational in the calculation, that the dollar fields are not sent.

See section "Pricing Guidelines".

16.2.6 PRIOR AUTHORIZATION SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING)

PRIOR AUTHORIZATION SEGMENT		Mandatory or Situational	MANDATORY SEGMENT

WORKERS' COMPENSATION SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Required if transaction is submitted by a provider or agent, but paid to another party.
B39-1Z	PAY TO COUNTRY CODE	Q	Prior Authorization Request And Billing (Claim/Service): Required if country is not "US".
125-TZ	GENERIC EQUIVALENT PRODUCT ID QUALIFIER	Q	Prior Authorization Request And Billing (Claim/Service): Required if Generic Equivalent Product ID (126-UA) is used.
126-UA	GENERIC EQUIVALENT PRODUCT ID	Q	Prior Authorization Request And Billing (Claim/Service): Required if necessary for state/federal/regulatory agency programs.

Notes on Workers' Compensation Segment on a Prior Authorization Request And Billing Request:

The Workers' Compensation Segment is situational for a Prior Authorization Request And Billing request. It is used when processing a Prior Authorization Request And Billing for a work-related injury or condition.

16.2.11 DUR/PPS SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING)

DUR/PPS SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
473-7E	DUR/PPS CODE COUNTER	Q***R***	Prior Authorization Request And Billing (Claim/Service): Maximum of 9 occurrences. Required if DUR/PPS Segment is used.
439-E4	REASON FOR SERVICE CODE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if this field could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome. Required if this field affects payment for or documentation of professional pharmacy service.
440-E5	PROFESSIONAL SERVICE CODE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if this field could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome. Required if this field affects payment for or documentation of professional pharmacy service.
441-E6	RESULT OF SERVICE CODE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if this field could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome. Required if this field affects payment for or documentation of professional pharmacy service.
474-8E	DUR/PPS LEVEL OF EFFORT	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if this field could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome. Required if this field affects payment for or documentation of professional pharmacy service.
475-J9	DUR/DUE CO-AGENT ID QUALIFIER	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if DUR/DUE Co-Agent ID (476-H6) is used.
476-H6	DUR/DUE CO-AGENT ID	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if this field could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome. Required if this field affects payment for or documentation of professional pharmacy service.

Notes on DUR/PPS Segment on a Prior Authorization Request And Billing Request:

The DUR/PPS Segment is situational for a Prior Authorization Request And Billing request. It is used when a sender notifies the receiver of drug utilization, drug evaluations, or information on the appropriate selection to process a Prior Authorization Request And Billing.

If the Prescription/Service Reference Number Qualifier (455-EM) is "2" (Service Billing) and the Product/Service ID Qualifier (436-E1) is "06" (DUR/PPS), the DUR/PPS Segment is required. For the other Product/Service ID Qualifiers, the DUR/PPS segment may help further explain or define the service provided.

The Segment is mandatory if required under provider payer contract or mandatory on claims where this information is necessary for processing prior authorization and/or adjudication of the claim.

16.2.12 COMPOUND SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING)

COMPOUND SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
450-EF	COMPOUND DOSAGE FORM DESCRIPTION CODE	M	
451-EG	COMPOUND DISPENSING UNIT FORM INDICATOR	M	
C60-AG	COMPOUND LEVEL OF COMPLEXITY	Q	Required if specified in trading partner agreement.
447-EC	COMPOUND INGREDIENT COMPONENT COUNT	M	Maximum count of 25 ingredients.
488-RE	COMPOUND PRODUCT ID QUALIFIER	M***R***	
489-TE	COMPOUND PRODUCT ID	M***R***	
448-ED	COMPOUND INGREDIENT QUANTITY	M***R***	
449-EE	COMPOUND INGREDIENT DRUG COST	Q***R***	Prior Authorization Request And Billing (Claim): Required if needed when multiple products are reported for receiver claim/encounter or prior authorization determination.
490-UE	COMPOUND INGREDIENT BASIS OF COST DETERMINATION	Q***R***	Prior Authorization Request And Billing (Claim): Required if needed when multiple products are reported for receiver claim/encounter or prior authorization determination.
362-2G	COMPOUND INGREDIENT MODIFIER CODE COUNT	Q	Prior Authorization Request And Billing (Claim): Required when Compound Ingredient Modifier Code (363-2H) is sent. Maximum count of 10.
363-2H	COMPOUND INGREDIENT MODIFIER CODE	Q***R***	Prior Authorization Request And Billing (Claim): Required if necessary for state/federal/regulatory agency programs.

Notes on Compound Segment on a Prior Authorization Request And Billing Request:

The Compound Segment is situational for a Prior Authorization Request And Billing request. It is used for multi-ingredient prescriptions, when each ingredient is reported in a Prior Authorization Request And Billing. The Segment is mandatory if required under provider payer contract or mandatory on claims where this information is necessary for processing a prior authorization and/or adjudication of the claim.

The Compound Segment is not used when the Prior Authorization Request And Billing is for a service (Prescription/Service Reference Number Qualifier (455-EM) = "2" (Service Billing).

16.2.13 CLINICAL SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING)

CLINICAL SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
491-VE	DIAGNOSIS CODE COUNT	Q	Prior Authorization Request And Billing (Claim/Service): Maximum count of 5. Required if Diagnosis Code Qualifier (492-WE) and Diagnosis Code (424-DO) are used.
492-WE	DIAGNOSIS CODE QUALIFIER	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Diagnosis Code (424-DO) is used.
424-DO	DIAGNOSIS CODE	Q***R***	Prior Authorization Request And Billing (Claim/Service): The value for this field is obtained from the prescriber or authorized representative. Required if this field could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome.

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

CLINICAL SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Required if this field affects payment for professional pharmacy service. Required if this information can be used in place of prior authorization. Required if necessary for state/federal/regulatory agency programs.
493-XE	CLINICAL INFORMATION COUNTER	Q***R***	Prior Authorization Request And Billing (Claim/Service): Maximum 5 occurrences supported. Grouped with Measurement fields (Measurement Date (494-ZE), Measurement Time (495-H1), Measurement Dimension (496-H2), Measurement Unit (497-H3), Measurement Value (499-H4)).
494-ZE	MEASUREMENT DATE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if necessary when this field could result in different coverage and/or drug utilization review outcome.
495-H1	MEASUREMENT TIME	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Time is known or has impact on measurement. Required if necessary when this field could result in different coverage and/or drug utilization review outcome and is a requirement for payment or authorization.
496-H2	MEASUREMENT DIMENSION	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Measurement Unit (497-H3) and Measurement Value (499-H4) are used. Required if necessary when this field could result in different coverage and/or drug utilization review outcome and is a requirement for payment or authorization. Required if necessary for patient's weight and height when billing Medicare for a claim that includes a Certificate of Medical Necessity (CMN).
497-H3	MEASUREMENT UNIT	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Measurement Dimension (496-H2) and Measurement Value (499-H4) are used. Required if necessary for patient's weight and height when billing Medicare for a claim that includes a Certificate of Medical Necessity (CMN). Required if necessary when this field could result in different coverage and/or drug utilization review outcome and is a requirement for payment or authorization.
499-H4	MEASUREMENT VALUE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Measurement Dimension (496-H2) and Measurement Unit (497-H3) are used. Required if necessary for patient's weight and height when billing Medicare for a claim that includes a Certificate of Medical Necessity (CMN). Required if necessary when this field could result in different coverage and/or drug utilization review outcome.

Notes on Clinical Segment on a Prior Authorization Request And Billing Request:

The Clinical Segment is situational for a Prior Authorization Request And Billing request. It is used to specify clinical measurements and/or diagnosis information associated with the Claim Billing or Service Billing transaction. The Segment is mandatory if required under provider payer contract or mandatory on claims where this information is necessary for processing a prior authorization and/or adjudication of the claim.

16.2.14 ADDITIONAL DOCUMENTATION SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING)

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use
- 400 -

ADDITIONAL DOCUMENTATION SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
369-2Q	ADDITIONAL DOCUMENTATION TYPE ID	M	
374-2V	REQUEST PERIOD BEGIN DATE	Q	Prior Authorization Request And Billing (Claim/Service): Required if necessary for state/federal/regulatory agency programs.
375-2W	REQUEST PERIOD RECERT/REVISED DATE	Q	Prior Authorization Request And Billing (Claim/Service): Required if necessary for state/federal/regulatory agency programs. Required if the Request Status (373-2U) = "2" (Revision) or "3" (Recertification).
373-2U	REQUEST STATUS	Q	Prior Authorization Request And Billing (Claim/Service): Required if necessary for state/federal/regulatory agency programs.
371-2S	LENGTH OF NEED QUALIFIER	Q	Prior Authorization Request And Billing (Claim/Service): Required if Length of Need (370-2R) is used.
370-2R	LENGTH OF NEED	Q	Prior Authorization Request And Billing (Claim): Required if the physician orders an item for a specified length of time. Service: Required if the physician orders an item for a specified length of time.
372-2T	PRESCRIBER/SUPPLIER DATE SIGNED	Q	Prior Authorization Request And Billing (Claim/Service): Required if necessary for state/federal/regulatory agency programs.
376-2X	SUPPORTING DOCUMENTATION	Q	Prior Authorization Request And Billing (Claim/Service): Required if using Section C of Medicare's CMN forms or required if necessary for state/federal/regulatory agency programs.
377-2Z	QUESTION NUMBER/LETTER COUNT	Q	Prior Authorization Request And Billing (Claim/Service): Maximum count of 50. Required if needed to provide response to narratives.
378-4B	QUESTION NUMBER/LETTER	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if necessary for state/federal/regulatory agency programs to respond to questions included on a form. Required if Question Number/Letter Count (377-2Z) is greater than 0.
379-4D	QUESTION PERCENT RESPONSE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if necessary for state/federal/regulatory agency programs to respond to questions included on a form that requires a percent as the response. (At least one response is required per question.)
380-4G	QUESTION DATE RESPONSE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if necessary for state/federal/regulatory agency programs to respond to questions included on a form that requires a date as the response. (At least one response is required per question.)
381-4H	QUESTION DOLLAR AMOUNT RESPONSE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if necessary for state/federal/regulatory agency programs to respond to questions included on a form that requires a dollar amount as the response. (At least one response is required per question.)
382-4J	QUESTION NUMERIC RESPONSE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if necessary for State/federal/regulatory agency programs to respond to questions included on a form that requires a numeric as the response. (At least one response is required per question.)
383-4K	QUESTION ALPHANUMERIC RESPONSE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if necessary for state/federal/regulatory agency programs to respond to questions included on a form that requires an alphanumeric as the response. (At least one response is required per question.)

Notes on Additional Documentation Segment on a Prior Authorization Request And Billing Request:

It is used when using Section C of Medicare's CMN forms or a state/federal/regulatory agency program has a form that requires multiple answers to specific questions for the claim.

16.2.15 FACILITY SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING)

FACILITY SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
B95-3Z	FACILITY ID QUALIFIER	Q	Prior Authorization Request And Billing (Claim/Service): Required if Facility ID (336-8C) is used.
336-8C	FACILITY ID	Q	Prior Authorization Request And Billing (Claim/Service): Required if needed for receiver inquiry validation and/or determination. Required if necessary for state/federal/regulatory agency programs.
385-3Q	FACILITY NAME	Q	Prior Authorization Request And Billing (Claim/Service): Required if necessary for state/federal/regulatory agency programs.
B20-7M	FACILITY STREET ADDRESS LINE 1	Q	Prior Authorization Request And Billing (Claim/Service): Required if necessary for state/federal/regulatory agency programs.
B21-7N	FACILITY STREET ADDRESS LINE 2	Q	Prior Authorization Request And Billing (Claim/Service): Required if necessary for state/federal/regulatory agency programs. Use only when a second address line is needed and Facility Street Address Line 1 (B20-7M) has been used.
388-5J	FACILITY CITY ADDRESS	Q	Prior Authorization Request And Billing (Claim/Service): Required if necessary for state/federal/regulatory agency programs.
387-3V	FACILITY STATE/PROVINCE ADDRESS	Q	Prior Authorization Request And Billing (Claim/Service): Required if necessary for state/federal/regulatory agency programs.
389-6D	FACILITY ZIP/POSTAL ZONE	Q	Prior Authorization Request And Billing (Claim/Service): Required if necessary for state/federal/regulatory agency programs.
B37-1X	FACILITY COUNTRY CODE	Q	Prior Authorization Request And Billing (Claim/Service): Required if country is not "US".

Notes on Facility Segment on a Prior Authorization Request And Billing Request:

The Facility Segment is situational for Prior Authorization Request And Billing request. It is used when a state/federal/regulatory agency program requires the information on a claim. The Facility identified in this section is not the dispensing pharmacy.

16.2.16 NARRATIVE SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING)

NARRATIVE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
390-BM	NARRATIVE MESSAGE	Q	Prior Authorization Request And Billing (Claim/Service): Required if necessary for state/federal/regulatory agency programs to provide additional information. Required if necessary only to support exception handling of pharmacy claims for Medicare Part B claim billing.

Notes on Narrative Segment on a Prior Authorization Request And Billing Request:

The Narrative Segment is situational for Prior Authorization Request And Billing request. It is used when a state/federal/regulatory agency program requires the information contained in the segment on a claim.

16.2.17 INTERMEDIARY SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING)

INTERMEDIARY SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
B44-8G	INTERMEDIARY ID COUNT	M	Prior Authorization Request And Billing (Claim/Service): Maximum count of 9.
B45-8H	INTERMEDIARY ID TYPE CODE	M***R***	

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

16.3.1.2 PRIOR AUTHORIZATION REQUEST AND BILLING RESPONSE SEGMENTS (TRANSMISSION ACCEPTED/TRANSACTION PAID)

16.3.1.2.1 RESPONSE HEADER SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

RESPONSE HEADER SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on a Prior Authorization Request And Billing Response:

The Response Header Segment is a mandatory, fixed length segment for a Prior Authorization Request And Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). The "Situation" column is not applicable.

16.3.1.2.2 RESPONSE MESSAGE SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE MESSAGE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Prior Authorization Request And Billing (Claim/Service): Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Prior Authorization Request And Billing Response:

The Response Message Segment is situational for a Prior Authorization Request And Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). It is used when additional text information needs to be sent.

16.3.1.2.3 RESPONSE INSURANCE SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
301-C1	GROUP ID	Q	Prior Authorization Request And Billing (Claim/Service): Required if needed to identify the cardholder or employer group, to identify appropriate group number for billing.
524-FO	PLAN ID	Q	Prior Authorization Request And Billing (Claim/Service): Required if needed to identify the actual plan parameters, benefit, or coverage criteria, when available. Required to identify the actual plan ID that was used when multiple group coverages exist. Required if needed to contain the actual plan ID if unknown to the receiver.
545-2F	NETWORK REIMBURSEMENT ID	Q	Prior Authorization Request And Billing (Claim/Service): Required if needed to identify the network for the covered member. Required if needed to identify the actual Network Reimbursement ID, when applicable and/or available.

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Required to identify the actual Network Reimbursement ID that was used when multiple Network Reimbursement IDs exist.
C96-KR	PAYER/HEALTH PLAN ID COUNT	Q	Prior Authorization Request And Billing (Claim/Service): Maximum Count of 3. Required if Payer/Health Plan ID (569-J8) is used.
568-J7	PAYER/HEALTH PLAN ID QUALIFIER	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Payer/Health Plan ID (569-J8) is used. The value of 05 (Medicare Part D Contract Number) must be used when the claim was paid by a Medicare Part D Plan/Payer.
569-J8	PAYER/HEALTH PLAN ID	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required when identification of the Payer/Health Plan is necessary. Required when the claim was paid by a Medicare Part D Plan/Payer. The value of 05 (Medicare Part D Contract Number) must be sent in the Payer/Health Plan ID Qualifier (568-J7) and the Medicare Part D Contract Number must be sent in this field.
115-N5	MEDICAID ID NUMBER	N	Prior Authorization Request And Billing (Claim/Service): Not used.
116-N6	MEDICAID AGENCY NUMBER	N	Prior Authorization Request And Billing (Claim/Service): Not used.
302-C2	CARDHOLDER ID	Q	Prior Authorization Request And Billing (Claim/Service): Required if the identification to be used in future transactions is different than what was submitted on the request.

Notes on Response Insurance Segment on a Prior Authorization Request And Billing Response:

The Response Insurance Segment is situational for a Prior Authorization Request And Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). It is used when coverage or reimbursement parameters or identifiers need to be sent.

16.3.1.2.4 RESPONSE PATIENT SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
618-RR	PATIENT ID COUNT	Q	Prior Authorization Request And Billing (Claim/Service): Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.
331-CX	PATIENT ID QUALIFIER	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Patient ID (332-CY) is used.
332-CY	PATIENT ID	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.
310-CA	PATIENT FIRST NAME	Q	Prior Authorization Request And Billing (Claim/Service): Required if known.
311-CB	PATIENT LAST NAME	Q	Prior Authorization Request And Billing (Claim/Service): Required if known.
304-C4	DATE OF BIRTH	Q	Prior Authorization Request And Billing (Claim/Service): Required if known.

Notes on Response Patient Segment on a Prior Authorization Request And Billing Response:

The Response Patient Segment is situational for Prior Authorization Request And Billing transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid) when patient demographic information needs to be sent from the sender to the receiver.

16.3.1.2.5 RESPONSE STATUS SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

Version F6
January 2020
OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

- 405 -

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Prior Authorization Request And Billing (Claim/Service): Required if needed to identify the transaction.
B98-34	RECONCILIATION ID	R	Prior Authorization Request And Billing (Claim/Service): Paid "P" response: This is a unique processor assigned value that must be provided on a "P" response. See section "RESPONSE STATUS SEGMENT / RECONCILIATION ID". Duplicate of Paid "D" response: Required for a "D" Duplicate of Paid response. The Reconciliation ID returned on a "D" response must be that of the transaction found by processor that is resulting in the Duplicate response. See section "DUPLICATE TRANSACTIONS".
510-FA	REJECT COUNT	N	Prior Authorization Request And Billing (Claim/Service): Not used.
511-FB	REJECT CODE	N***R***	Prior Authorization Request And Billing (Claim/Service): Not used.
546-4F	REJECT FIELD OCCURRENCE INDICATOR	N***R***	Prior Authorization Request And Billing (Claim/Service): Not used.
547-5F	APPROVED MESSAGE CODE COUNT	Q	Prior Authorization Request And Billing (Claim/Service): Maximum count of 5. Required if Approved Message Code (548-6F) is used.
548-6F	APPROVED MESSAGE CODE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Approved Message Code Count is used and the sender needs to communicate additional follow up for a potential opportunity.
130-UF	ADDITIONAL MESSAGE INFORMATION COUNT	Q	Prior Authorization Request And Billing (Claim/Service): Maximum count of 25. Required if Additional Message Information (526-FQ) is used. Used to qualify the number of occurrences of the Additional Message Information (526-FQ) that is included in the Response Status Segment.
132-UH	ADDITIONAL MESSAGE INFORMATION QUALIFIER	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Additional Message Information (526-FQ) is used.
526-FQ	ADDITIONAL MESSAGE INFORMATION	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required when additional text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.
131-UG	ADDITIONAL MESSAGE INFORMATION CONTINUITY	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if and only if current repetition of Additional Message Information (526-FQ) is used, another populated repetition of Additional Message Information (526-FQ) follows it, and the text of the following message is a continuation of the current.
C72-BH	HELP DESK SUPPORT TYPE COUNT	M	Prior Authorization Request And Billing (Claim/Service): Maximum count of 5. Used to qualify the number of occurrences of Help Desk Support Type (C71-BG) that is included in the Response Status Segment.
C71-BG	HELP DESK SUPPORT TYPE	M***R***	
C67-BB	HELP DESK BUSINESS UNIT TYPE COUNT	R	Prior Authorization Request And Billing (Claim/Service): Maximum count of 5.

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
			Used to qualify the number of occurrences of the Help Desk Business Unit Type, Help Desk Contact Information Qualifier, Help Desk Contact Information and Help Desk Contact Information Extension that is included in the Response Status Segment. Required if Help Desk Business Unit Type (C66-BA) is used.
C66-BA	HELP DESK BUSINESS UNIT TYPE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Help Desk Contact Information Qualifier (C70-BF) is used.
C70-BF	HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Help Desk Contact Information (C68-BC) is used.
C68-BC	HELP DESK CONTACT INFORMATION	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if needed to provide help desk contact support information to the receiver.
C69-BD	HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if needed to provide an extension to the Help Desk Contact Information (C68-BC).
880-K5	TRANSACTION REFERENCE NUMBER	N	Prior Authorization Request And Billing (Claim/Service): Not used.
993-A7	INTERNAL CONTROL NUMBER	Q	Prior Authorization Request And Billing (Claim/Service): Required when used for payer-to-payer coordination of benefits to track the claim without regard to the "Service Provider ID, Prescription Number, & Date of Service".
A28-ZR	ADJUDICATED PROGRAM TYPE	R	Prior Authorization Request And Billing (Claim/Service): Required on all Paid and Duplicate Paid responses. The most descriptive program type value must be returned. "UNKNOWN" or "OTHER" must not be used for federal programs as defined in Section 1128B(B) of the Social Security Act. Also see section "Adjudicated Program Type (A28-ZR)" for appropriate use.
B04-BT	NEXT AVAILABLE FILL DATE	N	Prior Authorization Request And Billing (Claim/Service): Not used.

Notes on Response Status Segment on a Prior Authorization Request And Billing Response:

The Response Status Segment is mandatory for a Prior Authorization Request And Billing response for Header Response Status (501-F1) = "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). The Response Status Segment is sent from the sender to the receiver to identify the outcome of the request.

16.3.1.2.6 RESPONSE CLAIM SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE CLAIM SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
455-EM	PRESCRIPTION/SERVICE REFERENCE NUMBER QUALIFIER	M	Prior Authorization Request And Billing (Claim): For Transaction Code of "P1", in the Response Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "1" (Rx Billing). Prior Authorization Request And Billing (Service): For Transaction Code of "P1", in the Response Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "2" (Service Billing).
402-D2	PRESCRIPTION/SERVICE REFERENCE NUMBER	M	Prior Authorization Request And Billing (Claim): Significant digits on submission must be returned on response. See section "Standard Conventions", "Character Set Designation Truncation", "Numeric", "Numeric Truncation".
551-9F	FORMULARY ALTERNATIVE PRODUCT COUNT	Q	Prior Authorization Request And Billing (Claim): Maximum count of 6. Required if Formulary Alternative ID (553-AR) is used.

Notes on Response DUR/PPS Segment on a Prior Authorization Request And Billing Response:

The Response DUR/PPS Segment is situational for a Prior Authorization Request And Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid), to identify a drug utilization review or professional pharmacy service event, opportunity, or information. The Segment is mandatory if required under provider payer contract or mandatory on claims where this information is necessary for adjudication of the claim.

16.3.1.2.10 RESPONSE OTHER PAYERS SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE OTHER PAYERS SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
355-NT	OTHER PAYER ID COUNT	M	Prior Authorization Request And Billing (Claim/Service): Maximum count of 4.
338-5C	OTHER PAYER COVERAGE TYPE	M***R***	
D41-PQ	OTHER PAYER RELATIONSHIP TYPE	M***R***	
D50-P6	OTHER PAYER BENEFIT CLASSIFICATION	M***R***	
C47-9T	OTHER PAYER ADJUDICATED PROGRAM TYPE	M***R***	
339-6C	OTHER PAYER ID QUALIFIER	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Other Payer ID (340-7C) is used.
340-7C	OTHER PAYER ID	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if other insurance Payer ID information is available. Required if any of the following are sent: - Other Payer Processor Control Number (991-MH) - Other Payer Cardholder ID (356-NU) - Other Payer Group ID (992-MJ)
991-MH	OTHER PAYER PROCESSOR CONTROL NUMBER	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if other insurance Processor Control Number information is available.
356-NU	OTHER PAYER CARDHOLDER ID	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if other insurance Cardholder ID information is available.
992-MJ	OTHER PAYER GROUP ID	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if other insurance Group ID information is available.
142-UV	OTHER PAYER PERSON CODE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if needed to uniquely identify the family members within the Cardholder ID, as assigned by the other payer.

RESPONSE OTHER PAYERS SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
127-UB	OTHER PAYER HELP DESK TELEPHONE NUMBER	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if needed to provide a support telephone number of the other payer to the receiver.
B23-7Q	OTHER PAYER HELP DESK TELEPHONE NUMBER EXTENSION	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if needed to provide a support telephone number extension of the other payer to the receiver.
143-UW	OTHER PAYER PATIENT RELATIONSHIP CODE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if needed to uniquely identify the relationship of the patient to the cardholder ID, as assigned by the other payer.
144-UX	OTHER PAYER BENEFIT EFFECTIVE DATE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required when other coverage is known which will become effective after the Date of Service submitted. Other Payer Benefit Effective Date would not be returned for coverage that is current as of the claim date of service. This allows the receiver to identify other coverage that needs to be billed or stored for future use.
145-UY	OTHER PAYER BENEFIT TERMINATION DATE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required when other coverage termination date is known which is after the Date of Service submitted. If the termination date is not known this field would not be returned.
D23-M5	OTHER PAYER NAME	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if the data is available.

Notes on Response Other Payers Segment on a Prior Authorization Request And Billing Response:

The Response Other Payers Segment is situational for a Prior Authorization Request And Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid) when other insurance information is available.

Notes on Response Other Related Benefit Detail Segment on a Prior Authorization Request And Billing Response: The Response Other Related Benefit Detail Segment is situational for a Prior Authorization Request And Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). Information will be returned when the Date of Service (401-D1) is in an active period for any of the records above (ESRD, Hospice, Institutional, Disability, or LIS or when other benefit information is available).

16.3.1.2.12 RESPONSE INTERMEDIARY SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE INTERMEDIARY SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT	
Field	Field Name		Situation	
111-AM	SEGMENT IDENTIFICATION	M		
B52-8R	RESPONSE INTERMEDIARY AUTHORIZATION COUNT	Q	Prior Authorization Request And Billing (Claim/Service): Required if Response Intermediary Authorization Type ID is used. Maximum count of 9.	
B53-8S	RESPONSE INTERMEDIARY AUTHORIZATION TYPE ID	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Response Intermediary Authorization ID is used.	
B54-8T	RESPONSE INTERMEDIARY AUTHORIZATION ID	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if the intermediary determines an authorization identifier needs to be communicated to the receiver.	
B51-8Q	INTERMEDIARY MESSAGE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if text is needed for clarification or detail.	
C86-KC	INTERMEDIARY HELP DESK SUPPORT TYPE COUNT	M	Prior Authorization Request And Billing (Claim/Service): Maximum count of 5. Used to qualify the number of occurrences of Intermediary Help Desk Support Type (C85-KB) that is included in the Response Intermediary Segment.	
C85-KB	INTERMEDIARY HELP DESK SUPPORT TYPE	M***R***		
C81-G9	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE COUNT	R	Prior Authorization Request And Billing (Claim/Service): Maximum count of 5. Used to qualify the number of occurrences of the Intermediary Help Desk Business Unit Type, Intermediary Help Desk Contact Information Qualifier, Intermediary Help Desk Contact Information and Intermediary Help Desk Contact Information Extension that is included in the Response Intermediary Segment. Required if Help Desk Business Unit Type (C80-G8) is used	
C80-G8	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Intermediary Help Desk Contact Information Qualifier (C84-KA) is used.	
C84-KA	INTERMEDIARY HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Help Desk Contact Information (C84-KA) is used.	
C82-JP	INTERMEDIARY HELP DESK CONTACT INFORMATION	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if needed to provide help desk contact support information to the receiver.	
C83-JR	INTERMEDIARY HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if needed to provide an extension to the Help Desk Contact Information (C82-JP).	

Notes on Response Intermediary Segment on a Prior Authorization Request And Billing Response:

The Response Intermediary Segment is situational for a Prior Authorization Request and Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). The segment is used to support the authorization from an intermediary such as a Prescription Drug Monitoring Program (PDMP) or Risk Evaluation and Mitigation Strategy (REMS) program.

16.3.1.2.13 RESPONSE PROVIDER SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT	
Field	Field Name		Situation	
111-AM	SEGMENT IDENTIFICATION	M		
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Request And Billing (Claim/Service): Returned when a provider conflict has been identified from an available authoritative data source.	
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Request And Billing (Claim/Service): Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Prior Authorization Request And Billing Response:

The Response Provider Segment is situational for a Prior Authorization Request and Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

16.3.2 TRANSMISSION ACCEPTED/TRANSACTION CAPTURED

Prior Authorization Request And Billing transmission response Header Response Status (501-F1) of "A" (Accepted)
And Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured)

In a "C" (Captured) or "Q" (Duplicate of Captured) response, since the prior authorization has not been processed, the billing cannot proceed, and therefore the Response Pricing Segment must not be returned.

See section "Transaction Response Status", "Duplicate Transactions" for the handling of a duplicate transaction.

Notes on Response Other Related Benefit Detail Segment on a Prior Authorization Request And Billing Response: The Response Other Related Benefit Detail Segment is situational for a Prior Authorization Request And Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). Information will be returned when the Date of Service (401-D1) is in an active period for any of the records above (ESRD, Hospice, Institutional, Disability, or LIS or when other benefit information is available).

16.3.2.2.9 RESPONSE INTERMEDIARY SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE INTERMEDIARY SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
B52-8R	RESPONSE INTERMEDIARY AUTHORIZATION COUNT	Q	Prior Authorization Request And Billing (Claim/Service): Required if Response Intermediary Authorization Type ID is used. Maximum count of 9.
B53-8S	RESPONSE INTERMEDIARY AUTHORIZATION TYPE ID	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Response Intermediary Authorization ID is used.
B54-8T	RESPONSE INTERMEDIARY AUTHORIZATION ID	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if the Intermediary determines an authorization identifier needs to be communicated to the receiver.
B51-8Q	INTERMEDIARY MESSAGE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if text is needed for clarification or detail.
C86-KC	INTERMEDIARY HELP DESK SUPPORT TYPE COUNT	M	Prior Authorization Request And Billing (Claim/Service): Maximum count of 5. Used to qualify the number of occurrences of Intermediary Help Desk Support Type (C85-KB) that is included in the Response Intermediary Segment.
C85-KB	INTERMEDIARY HELP DESK SUPPORT TYPE	M***R***	
C81-G9	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE COUNT	R	Prior Authorization Request And Billing (Claim/Service): Maximum count of 5. Used to qualify the number of occurrences of the Intermediary Help Desk Business Unit Type, Intermediary Help Desk Contact Information Qualifier, Intermediary Help Desk Contact Information and Intermediary Help Desk Contact Information Extension that is included in the Response Intermediary Segment. Required if Help Desk Business Unit Type (C80-G8) is used
C80-G8	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Intermediary Help Desk Contact Information Qualifier (C84-KA) is used.
C84-KA	INTERMEDIARY HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Help Desk Contact Information (C84-KA) is used.
C82-JP	INTERMEDIARY HELP DESK CONTACT INFORMATION	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if needed to provide help desk contact support information to the receiver.

Version F6

January 2020

OFFICIAL RELEASE

RESPONSE INTERMEDIARY SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
C83-JR	INTERMEDIARY HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if needed to provide an extension to the Help Desk Contact Information (C82-JP).

Notes on Response Intermediary Segment on a Prior Authorization Request And Billing Response:

The Response Intermediary Segment is situational for a Prior Authorization Request and Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). The segment is used to support the authorization from an intermediary such as a Prescription Drug Monitoring Program (PDMP) or Risk Evaluation and Mitigation Strategy (REMS) program.

16.3.2.2.10 RESPONSE PROVIDER SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Request And Billing (Claim/Service): Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Request And Billing (Claim/Service): Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Prior Authorization Request And Billing Response:

The Response Provider Segment is situational for a Prior Authorization Request and Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

16.3.3 TRANSMISSION ACCEPTED/TRANSACTION DEFERRED

Response Header Response Status (501-F1) of "A" (Accepted) Prior Authorization Request And Billing transmission and Transaction Response Status (112-AN) of "F" (Deferred)

Final determination of the Prior Authorization request cannot be made until additional medical information is obtained. The message (504-F4) and/or Additional Message Information (526-FQ) will contain what additional information is needed. Each processor governs the submission of additional information and the pharmacy should consult the appropriate provider billing manual. Typically, if the additional information is not received within a specific timeframe, the prior authorization will be denied.

201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on a Prior Authorization Request And Billing Response:

The Response Header Segment is a mandatory, fixed length segment for a Prior Authorization Request And Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "F" (Deferred). The "Situation" column is not applicable.

16.3.3.2.2 RESPONSE MESSAGE SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING) (TRANSMISSION ACCEPTED/TRANSACTION DEFERRED)

RESPONSE MESSAGE SEGMENT		SITUATIONAL SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Prior Authorization Request And Billing (Claim/Service): Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Prior Authorization Request And Billing Response:

The Response Message Segment is situational for a Prior Authorization Request And Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "F" (Deferred). It is used when additional text information needs to be sent.

16.3.3.2.3 RESPONSE INSURANCE SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING) (TRANSMISSION ACCEPTED/TRANSACTION DEFERRED)

RESPONSE INSURANCE SEGMENT		SITUATIONAL SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
301-C1	GROUP ID	Q	Prior Authorization Request And Billing (Claim/Service): Required if needed to identify the actual cardholder or employer group, to identify appropriate group number, when available. Required to identify the actual group that was used when multiple group coverages exist.

B51-8Q	INTERMEDIARY MESSAGE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if text is needed for clarification or detail.
C86-KC	INTERMEDIARY HELP DESK SUPPORT TYPE COUNT	M	Prior Authorization Request And Billing (Claim/Service): Maximum count of 5. Used to qualify the number of occurrences of Intermediary Help Desk Support Type (C85-KB) that is included in the Response Intermediary Segment.
C85-KB	INTERMEDIARY HELP DESK SUPPORT TYPE	M***R***	
C81-G9	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE COUNT	R	Prior Authorization Request And Billing (Claim/Service): Maximum count of 5. Used to qualify the number of occurrences of the Intermediary Help Desk Business Unit Type, Intermediary Help Desk Contact Information Qualifier, Intermediary Help Desk Contact Information and Intermediary Help Desk Contact Information Extension that is included in the Response Intermediary Segment. Required if Help Desk Business Unit Type (C80-G8) is used.
C80-G8	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Intermediary Help Desk Contact Information Qualifier (C84-KA) is used.
C84-KA	INTERMEDIARY HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Help Desk Contact Information (C84-KA) is used.
C82-JP	INTERMEDIARY HELP DESK CONTACT INFORMATION	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if needed to provide help desk contact support information to the receiver.
C83-JR	INTERMEDIARY HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if needed to provide an extension to the Help Desk Contact Information (C82-JP).

Notes on Response Intermediary Segment on a Prior Authorization Request And Billing Response:

The Response Intermediary Segment is situational for a Prior Authorization Request and Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "F" (Deferred). The segment is used to support the authorization from an intermediary such as a Prescription Drug Monitoring Program (PDMP) or Risk Evaluation and Mitigation Strategy (REMS) program.

16.3.3.2.11 RESPONSE PROVIDER SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING) (TRANSMISSION ACCEPTED/TRANSACTION DEFERRED)

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Request And Billing (Claim/Service): Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Request And Billing (Claim/Service): Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Prior Authorization Request And Billing Response:

The Response Provider Segment is situational for a Prior Authorization Request and Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "F" (Deferred). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

16.3.4 TRANSMISSION ACCEPTED/TRANSACTION REJECTED RESPONSE

Prior Authorization Request And Billing transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected)

- 443 -

RESPONSE HEADER SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on a Prior Authorization Request And Billing Response:

The Response Header Segment is a mandatory, fixed length segment for a Prior Authorization Request And Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). The "Situation" column is not applicable.

If the transaction rejects for detail errors, the Header Response Status (501-F1) = "A" (Accepted) and the Transaction Response Status (112-AN) will be "R".

16.3.4.2.2 RESPONSE MESSAGE SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE MESSAGE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Prior Authorization Request And Billing (Claim/Service): Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Prior Authorization Request And Billing Response:

The Response Message Segment is situational segment for a Prior Authorization Request And Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). It is used when additional text information needs to be sent.

16.3.4.2.3 RESPONSE INSURANCE SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
301-C1	GROUP ID	Q	Prior Authorization Request And Billing (Claim/Service): Required if needed to identify the actual cardholder or employer group, to identify appropriate group number, when available. Required to identify the actual group that was used when multiple group coverages exist. Note: This field may contain the Group ID echoed from the request. May contain the actual Group ID if unknown to the receiver.
524-FO	PLAN ID	Q	Prior Authorization Request And Billing (Claim/Service): Required if needed to identify the actual plan parameters, benefit, or coverage criteria, when available. Required to identify the actual plan ID that was used when multiple group coverages exist. Required if needed to contain the actual plan ID if unknown to the receiver.
545-2F	NETWORK REIMBURSEMENT ID	Q	Prior Authorization Request And Billing (Claim/Service): Required if needed to identify the network for the covered member.

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Required if needed to identify the actual Network Reimbursement ID, when applicable and/or available. Required to identify the actual Network Reimbursement ID that was used when multiple Network Reimbursement IDs exist.
C96-KR	PAYER/HEALTH PLAN ID COUNT	N	Prior Authorization Request And Billing (Claim/Service): Not used.
568-J7	PAYER/HEALTH PLAN ID QUALIFIER	N	Prior Authorization Request And Billing (Claim/Service): Not used.
569-J8	PAYER/HEALTH PLAN ID	N	Prior Authorization Request And Billing (Claim/Service): Not used.
115-N5	MEDICAID ID NUMBER	N	Prior Authorization Request And Billing (Claim/Service): Not used.
116-N6	MEDICAID AGENCY NUMBER	N	Prior Authorization Request And Billing (Claim/Service): Not used.
302-C2	CARDHOLDER ID	Q	Prior Authorization Request And Billing (Claim/Service): Required if the identification to be used in future transactions is different than what was submitted on the request.

Notes on Response Insurance Segment on a Prior Authorization Request And Billing Response:

The Response Insurance Segment is situational segment for a Prior Authorization Request And Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). It is used when coverage or reimbursement parameters or identifiers need to be sent.

16.3.4.2.4 RESPONSE PATIENT SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
618-RR	PATIENT ID COUNT	Q	Prior Authorization Request And Billing (Claim/Service): Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.
331-CX	PATIENT ID QUALIFIER	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Patient ID (332-CY) is used.
332-CY	PATIENT ID	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.
310-CA	PATIENT FIRST NAME	Q	Prior Authorization Request And Billing (Claim/Service): Required if known.
311-CB	PATIENT LAST NAME	Q	Prior Authorization Request And Billing (Claim/Service): Required if known.
304-C4	DATE OF BIRTH	Q	Prior Authorization Request And Billing (Claim/Service): Required if known.

Notes on Response Patient Segment on a Prior Authorization Request And Billing Response:

The Response Patient Segment is situational for Prior Authorization Request And Billing transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected) when patient demographic information needs to be sent from the sender to the receiver.

16.3.4.2.5 RESPONSE STATUS SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

Field	Field Name		Situation
			Required when DUR/DUE conflict indicates a dosing threshold has been exceeded and maximum dose information is available.
F08-YJ	DUR/DUE MINIMUM DAILY DOSE QUANTITY	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required when DUR/DUE conflict indicates a dosing threshold has not been met and minimum dose information is available.
F09-YI	DUR/DUE MINIMUM DAILY DOSE UNIT OF MEASURE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required when DUR/DUE conflict indicates a dosing threshold has not been met and minimum dose information is available.
544-FY	DUR/DUE FREE TEXT MESSAGE	Q***R***	Prior Authorization Request And Billing (Claim): Required if needed to supply additional information for the utilization conflict. Service: Required if needed to supply additional information for the service.

Notes on Response DUR/PPS Segment on a Prior Authorization Request And Billing Response:

The Response DUR/PPS Segment is situational for a Prior Authorization Request And Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected), to identify a drug utilization review or professional pharmacy service event, opportunity, or information. The Segment is mandatory if required under provider payer contract or mandatory on claims where this information is necessary for adjudication of the claim.

16.3.4.2.8 RESPONSE OTHER PAYERS SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE OTHER PAYERS SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
355-NT	OTHER PAYER ID COUNT	M	Prior Authorization Request And Billing (Claim/Service): Maximum count of 4.
338-5C	OTHER PAYER COVERAGE TYPE	M***R***	
D41-PQ	OTHER PAYER RELATIONSHIP TYPE	M***R***	
D50-P6	OTHER PAYER BENEFIT CLASSIFICATION	M***R***	
C47-9T	OTHER PAYER ADJUDICATED PROGRAM TYPE	M***R***	
339-6C	OTHER PAYER ID QUALIFIER	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Other Payer ID (340-7C) is used.
340-7C	OTHER PAYER ID	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if other insurance Payer ID information is available. Required if any of the following are sent: - Other Payer Processor Control Number (991-MH) - Other Payer Cardholder ID (356-NU) - Other Payer Group ID (992-MJ)
991-MH	OTHER PAYER PROCESSOR CONTROL NUMBER	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if other insurance Processor Control Number information is available.
356-NU	OTHER PAYER CARDHOLDER ID	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if other insurance Cardholder ID information is available.
992-MJ	OTHER PAYER GROUP ID	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if other insurance Group ID information is available.
142-UV	OTHER PAYER PERSON CODE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if needed to uniquely identify the family members within the Cardholder ID, as assigned by the other payer.
127-UB	OTHER PAYER HELP DESK TELEPHONE NUMBER	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if needed to provide a support telephone number of the other payer to the receiver.
B23-7Q	OTHER PAYER HELP DESK TELEPHONE NUMBER EXTENSION	Q***R***	Prior Authorization Request And Billing (Claim/Service):

- 452 -

RESPONSE OTHER PAYERS SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
			Required if needed to provide a support telephone number extension of the other payer to the receiver.
143-UW	OTHER PAYER PATIENT RELATIONSHIP CODE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if needed to uniquely identify the relationship of the patient to the cardholder ID, as assigned by the other payer.
144-UX	OTHER PAYER BENEFIT EFFECTIVE DATE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required when other coverage is known which will become effective after the Date of Service submitted. Other Payer Benefit Effective Date would not be returned for coverage that is current as of the claim date of service. This allows the receiver to identify other coverage that needs to be billed or stored for future use.
145-UY	OTHER PAYER BENEFIT TERMINATION DATE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required when other coverage termination date is known which is after the Date of Service submitted. If the termination date is not known this field would not be returned.
D23-M5	OTHER PAYER NAME	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if the data is available.

Notes on Response Other Payers Segment on a Prior Authorization Request And Billing Response:

The Response Other Payers Segment is situational for a Prior Authorization Request And Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected) when other insurance information is available.

The following outlines different rejected claim scenarios and the use of the Response Other Payers Segment.

1. Non-Matched: If the identity of the patient cannot be validated and the Claim Billing or Encounter is rejected due to a non-match of field verification, then the Other Payer information is not sent.
2. COB Sequence: If the claim is rejected because it should be submitted to other payer(s) first, that Other Payer information must be sent, if available.
3. Change in 4RX (Change in Coverage): If the identity of the patient is verified and the Claim Billing or Encounter is rejected due to known alternate 4RX data required for claims processing, then the alternate 4RX data is returned as Other Payer information.
4. Plan Exclusion Alternate 4RX (Mutually Exclusive): If the claim is rejected due to plan benefit exclusions, then Other Payer information must be sent, if available.

16.3.4.2.9 RESPONSE OTHER RELATED BENEFIT DETAIL SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING) (TRANSMISSION ACCEPTED/ TRANSACTION REJECTED)

RESPONSE OTHER RELATED BENEFIT DETAIL SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation

Notes on Response Other Related Benefit Detail Segment on a Prior Authorization Request And Billing Response: The Response Other Related Benefit Detail Segment is situational for a Prior Authorization Request And Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). Information will be returned when the Date of Service (401-D1) is in an active period for any of the records above (ESRD, Hospice, Institutional, Disability, or LIS or when other benefit information is available).

16.3.4.2.10 RESPONSE INTERMEDIARY SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE INTERMEDIARY SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
B52-8R	RESPONSE INTERMEDIARY AUTHORIZATION COUNT	Q	Prior Authorization Request And Billing (Claim/Service): Required if Response Intermediary Authorization Type ID is used. Maximum count of 9.
B53-8S	RESPONSE INTERMEDIARY AUTHORIZATION TYPE ID	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Response Intermediary Authorization ID is used.
B54-8T	RESPONSE INTERMEDIARY AUTHORIZATION ID	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if the Intermediary determines an authorization identifier needs to be communicated to the receiver.
B51-8Q	INTERMEDIARY MESSAGE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if text is needed for clarification or detail.
C86-KC	INTERMEDIARY HELP DESK SUPPORT TYPE COUNT	M	Prior Authorization Request And Billing (Claim/Service): Maximum count of 5. Used to qualify the number of occurrences of Intermediary Help Desk Support Type (C85-KB) that is included in the Response Intermediary Segment.
C85-KB	INTERMEDIARY HELP DESK SUPPORT TYPE	M***R***	
C81-G9	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE COUNT	R	Prior Authorization Request And Billing (Claim/Service): Maximum count of 5. Used to qualify the number of occurrences of the Intermediary Help Desk Business Unit Type, Intermediary Help Desk Contact Information Qualifier, Intermediary Help Desk Contact Information and Intermediary Help Desk Contact Information Extension that is included in the Response Intermediary Segment.
C80-G8	INTERMEDIARY HELP DESK BUSINESS UNIT TYPE	Q***R***	Required if Help Desk Business Unit Type (C80-G8) is used. Prior Authorization Request And Billing (Claim/Service): Required if Intermediary Help Desk Contact Information Qualifier (C84-KA) is used.
C84-KA	INTERMEDIARY HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Help Desk Contact Information (C84-KA) is used.
C82-JP	INTERMEDIARY HELP DESK CONTACT INFORMATION	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if needed to provide help desk contact support information to the receiver.
C83-JR	INTERMEDIARY HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if needed to provide an extension to the Help Desk Contact Information (C82-JP).

Notes on Response Intermediary Segment on a Prior Authorization Request And Billing Response:

The Response Intermediary Segment is situational for a Prior Authorization Request and Billing response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). The segment is used to support the authorization from an intermediary such as a Prescription Drug Monitoring Program (PDMP) or Risk Evaluation and Mitigation Strategy (REMS) program.

16.3.4.2.11 RESPONSE PROVIDER SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE PROVIDER SEGMENT			SITUATIONAL SEGMENT

Used to qualify the number of occurrences of the Help Desk Business Unit Type, Help Desk Contact Information Qualifier, Help Desk Contact Information and Help Desk Contact Information Extension that is included in the Response Status Segment. Required if Help Desk Business Unit Type (C66-BA) is used.
C66-BA	HELP DESK BUSINESS UNIT TYPE	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Help Desk Contact Information Qualifier (C70-BF) is used.
C70-BF	HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if Help Desk Contact Information (C68-BC) is used.
C68-BC	HELP DESK CONTACT INFORMATION	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if needed to provide help desk contact support information to the receiver.
C69-BD	HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Prior Authorization Request And Billing (Claim/Service): Required if needed to provide an extension to the Help Desk Contact Information (C68-BC).
880-K5	TRANSACTION REFERENCE NUMBER	N	Prior Authorization Request And Billing (Claim/Service): Not used.
993-A7	INTERNAL CONTROL NUMBER	N	Prior Authorization Request And Billing (Claim/Service): Not used.
A28-ZR	ADJUDICATED PROGRAM TYPE	N	Prior Authorization Request And Billing (Claim/Service): Not used.
B04-BT	NEXT AVAILABLE FILL DATE	N	Prior Authorization Request And Billing (Claim/Service): Not used.

Notes on Response Status Segment on a Prior Authorization Request And Billing Response:

The Response Status Segment is mandatory for a Prior Authorization Request And Billing response for Header Response Status (501-F1) = "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The Response Status Segment is sent from the sender to the receiver to identify the outcome of the request. Refer to the NCPDP *External Code List* for guidance on the use of reject codes.

16.3.5.2.4 RESPONSE PROVIDER SEGMENT (PRIOR AUTHORIZATION REQUEST AND BILLING) (TRANSMISSION REJECTED/TRANSACTION REJECTED)

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Request And Billing (Claim/Service): Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Request And Billing (Claim/Service): Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Prior Authorization Request And Billing Response:

The Response Provider Segment is situational for a Prior Authorization Request And Billing response when the Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

17 PRIOR AUTHORIZATION REVERSAL INFORMATION

This transaction allows the Originator to request the Processor to cancel a previously approved prior authorization request.

Prior Authorization reversals are used to back out the request for authorization, but not any claims submitted against the prior authorization. To reverse a Prior Authorization Request and Billing, paid billings must be reversed before the prior authorization is reversed. The pharmacy must submit a Claim or Service Reversal request (Transaction Code = "B2" or "S2") before submitting a Prior Authorization Reversal request. If there are no Claims or Services paid for the Prior Authorization in question, the processor must accept the Prior Authorization Reversal for the prior authorization only. Since this reversal request is to be matched by Prior Authorization ID Assigned (498-PY) or Authorization ID (503-F3) (there is no Claim Segment in a "P2" transaction), Reconciliation ID (B98-34) is not used for the request or response of the "P2" Prior Authorization Reversal transaction

The Transaction Code is "P2".

Depending upon the particular prior authorization claim or service reversal request, the Processor must provide one of the following general types of responses:

Approved – This occurs when the Processor acknowledges receipt of the prior authorization claim or service reversal, and successfully processes the backing out of the prior authorization request.

Duplicate of Approved – This occurs when the Processor has previously received the request and processed the transaction, but the response did not return to the Originator. The Duplicate response contains the same information as returned in the Approved scenario.

Captured – This occurs when the Processor acknowledges receipt of the prior authorization claim or service reversal, but does not immediately process the reversal.

Duplicate of Captured – This occurs when the Processor has previously received the request and processed the transaction, but the response did not return to the Originator. The Duplicate response contains the same information as returned in the Captured scenario.

Rejected – This occurs when the Processor has encountered an error in the transaction or processing.

See section "Transaction Response Status", "Duplicate Transactions".

17.1 PRIOR AUTHORIZATION REVERSAL REQUEST DIAGRAMS

17.1.1 DIAGRAM FOR TRANSMISSION OF A PRIOR AUTHORIZATION REVERSAL TRANSACTION

For a Prior Authorization Reversal, the scenario defined includes a Prior Authorization Reversal from a Sender to a Receiver.

There are no mandatory transaction-level segments.

Field	Field Name		Situation
526-FQ	ADDITIONAL MESSAGE INFORMATION	Q***R***	Prior Authorization Reversal (Claim/Service): Required if additional text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.
131-UG	ADDITIONAL MESSAGE INFORMATION CONTINUITY	Q***R***	Prior Authorization Reversal (Claim/Service): Required if and only if current repetition of Additional Message Information (526-FQ) is used, another populated repetition of Additional Message Information (526-FQ) follows it, and the text of the following message is a continuation of the current.
C72-BH	HELP DESK SUPPORT TYPE COUNT	M	Prior Authorization Reversal (Claim/Service): Maximum count of 5. Used to qualify the number of occurrences of Help Desk Support Type (C71-BG) that is included in the Response Status Segment.
C71-BG	HELP DESK SUPPORT TYPE	M***R***	
C67-BB	HELP DESK BUSINESS UNIT TYPE COUNT	R	Prior Authorization Reversal (Claim/Service): Maximum count of 5. Used to qualify the number of occurrences of the Help Desk Business Unit Type, Help Desk Contact Information Qualifier, Help Desk Contact Information and Help Desk Contact Information Extension that is included in the Response Status Segment. Required if Help Desk Business Unit Type (C66-BA) is used.
C66-BA	HELP DESK BUSINESS UNIT TYPE	Q***R***	Prior Authorization Reversal (Claim/Service): Required if Help Desk Contact Information Qualifier (C70-BF) is used.
C70-BF	HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Prior Authorization Reversal (Claim/Service): Required if Help Desk Contact Information (C68-BC) is used.
C68-BC	HELP DESK CONTACT INFORMATION	Q***R***	Prior Authorization Reversal (Claim/Service): Required if needed to provide help desk contact support information to the receiver.
C69-BD	HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Prior Authorization Reversal (Claim/Service): Required if needed to provide an extension to the Help Desk Contact Information (C68-BC).
880-K5	TRANSACTION REFERENCE NUMBER	N	Prior Authorization Reversal (Claim/Service): Not used.
993-A7	INTERNAL CONTROL NUMBER	N	Prior Authorization Reversal (Claim/Service): Not used.
A28-ZR	ADJUDICATED PROGRAM TYPE	N	Prior Authorization Reversal (Claim/Service): Not used.
B04-BT	NEXT AVAILABLE FILL DATE	N	Prior Authorization Reversal (Claim/Service): Not used.

Notes on Response Status Segment on a Prior Authorization Reversal Response:

The Response Status Segment is mandatory for a Prior Authorization Reversal response for Header Response Status (501-F1) = "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The Response Status Segment is sent from the sender to the receiver to identify the outcome of the request. Refer to the NCPDP *External Code List* for guidance on the use of reject codes.

18 PRIOR AUTHORIZATION INQUIRY INFORMATION

This transaction allows the Originator to request from the Processor to provide the status of a previously transmitted prior authorization request that was pended by the Processor. The Originator is inquiring as to what, if anything has occurred.

The Transaction Code is "P3".

The Processor must provide one of the following general types of responses:

Approved – The Processor has approved the prior authorization. If a duplicate request is received, the original approved response must be returned.

Captured – The Processor returns the status of the prior authorization originally submitted. The prior authorization was captured, but no judgment has been made.

Duplicate of Captured – The Processor has previously received the request and processed the transaction, but the response did not return to the Originator. The Duplicate response contains the same information as returned in the Captured original response.

Deferred – The Processor notifies the Originator that the status of a prior authorization request is that the request has been deferred. If a duplicate request is received, the original response must be returned.

Paid – The Processor has approved the authorization and has adjudicated the claim or service.

Duplicate of Paid – The Processor has previously received the request and processed the transaction, but the response did not return to the Originator. The Duplicate response contains the same information as returned in the Paid original response.

Rejected – The Processor has encountered an error in the transaction or processing, or does not approve the prior authorization request.

See section "Transaction Response Status", "Duplicate Transactions".

18.1 PRIOR AUTHORIZATION INQUIRY REQUEST DIAGRAMS

18.1.1 DIAGRAM FOR TRANSMISSION OF A PRIOR AUTHORIZATION INQUIRY TRANSACTION

The sender submits a Prior Authorization Inquiry to receive a status on a *previously submitted Prior Authorization Request And Billing* or a *previously submitted Prior Authorization Request Only*.

This transaction is for use by a sender of a prior authorization request to determine the status of a previously submitted prior authorization request. For instance, the sender received a "capture" response on the original request and more time is needed by the receiver to make a determination for approval or rejection of a prior authorization request. The sender must submit the same Authorization Number (503-F3) on each Prior Authorization Inquiry for that captured transaction. The receiver must return the same Authorization Number (503-F3) on each Prior Authorization Inquiry for that captured transaction.

The Prior Authorization Inquiry does not support a Claim Segment, therefore Reconciliation ID (B98-34) is not used in this request transaction type.

The intent is to:

- Determine the status of the request and/or
- Communicate the actual assigned number

It is not to be used to find a prior authorization by any party other than the sender of the prior authorization request.

For a Prior Authorization Inquiry, the scenario defined includes a Prior Authorization Inquiry from a Sender to a Receiver.

There are no situational transaction-level segments.

The information contained in the Prior Authorization Inquiry segments must be the same as the information submitted on the original Prior Authorization Request Only or Prior Authorization Request And Billing.

18.2 PRIOR AUTHORIZATION INQUIRY REQUEST SEGMENTS

18.2.1 TRANSACTION HEADER SEGMENT (PRIOR AUTHORIZATION INQUIRY)

TRANSACTION HEADER SEGMENT			MANDATORY SEGMENT
Field	Field Name	Mandatory or Situational	Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	
101-A1	IIN NUMBER	M	
104-A4	PROCESSOR CONTROL NUMBER	M	
109-A9	TRANSACTION COUNT	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	
110-AK	SOFTWARE VENDOR/CERTIFICATION ID	M	

Notes on Transaction Header Segment on a Prior Authorization Inquiry Request:

The Transaction Header Segment is a mandatory, fixed length segment for a Prior Authorization Inquiry request. The "Situation" column is not applicable.

18.2.2 INSURANCE SEGMENT (PRIOR AUTHORIZATION INQUIRY)

INSURANCE SEGMENT			MANDATORY SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
302-C2	CARDHOLDER ID	M	
312-CC	CARDHOLDER FIRST NAME	N	Prior Authorization Inquiry (Claim/Service): Not used.
313-CD	CARDHOLDER LAST NAME	N	Prior Authorization Inquiry (Claim/Service): Not used.
524-FO	PLAN ID	N	Prior Authorization Inquiry (Claim/Service): Not used.
309-C9	ELIGIBILITY CLARIFICATION CODE	N	Prior Authorization Inquiry (Claim/Service): Not used.
301-C1	GROUP ID	N	Prior Authorization Inquiry (Claim/Service): Not used.
303-C3	PERSON CODE	N	Prior Authorization Inquiry (Claim/Service): Not used.
306-C6	PATIENT RELATIONSHIP CODE	N	Prior Authorization Inquiry (Claim/Service): Not used.
359-2A	MEDIGAP ID	N	Prior Authorization Inquiry (Claim/Service): Not used.
360-2B	MEDICAID INDICATOR	N	Prior Authorization Inquiry (Claim/Service): Not used.
361-2D	PROVIDER ACCEPT ASSIGNMENT INDICATOR	N	Prior Authorization Inquiry (Claim/Service): Not used.
115-N5	MEDICAID ID NUMBER	N	Prior Authorization Inquiry (Claim/Service): Not used.
116-N6	MEDICAID AGENCY NUMBER	N	Prior Authorization Inquiry (Claim/Service): Not used.

Notes on Insurance Segment on a Prior Authorization Inquiry Request:

The Insurance Segment is mandatory for a Prior Authorization Inquiry request. The Insurance Segment is submitted to identify the cardholder.

18.2.3 PATIENT SEGMENT (PRIOR AUTHORIZATION INQUIRY)

PATIENT SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M

333-CZ	EMPLOYER ID	N	Prior Authorization Inquiry: Not used.
334-1C	SMOKER/NON-SMOKER CODE	N	Prior Authorization Inquiry: Not used.
335-2C	PREGNANCY INDICATOR	N	Prior Authorization Inquiry: Not used.
350-HN	PATIENT E-MAIL ADDRESS	N	Prior Authorization Inquiry: Not used.
384-4X	PATIENT RESIDENCE	N	Prior Authorization Inquiry: Not used.
A22-YR	PATIENT ID ASSOCIATED STATE/PROVINCE ADDRESS	N	Prior Authorization Inquiry: Not used.
B38-1Y	PATIENT ID ASSOCIATED COUNTRY CODE	N	Prior Authorization Inquiry: Not used.
A45-1R	VETERINARY USE INDICATOR	N	Prior Authorization Inquiry: Not used.
E06-S8	SPECIES	N	Prior Authorization Inquiry: Not used.

Notes on Patient Segment on a Prior Authorization Inquiry:

The Patient Segment is situational for a Prior Authorization Inquiry. The Patient Segment must be submitted when needed to differentiate between the patient and the cardholder. If the cardholder and the patient are the same, then the Patient Segment is not submitted unless additional information about the patient is needed to clarify the Prior Authorization Inquiry. The Segment is mandatory if required under provider payer contract or mandatory on Prior Authorization Inquiry where this information is necessary for processing an inquiry.

498-PP	PRIOR AUTHORIZATION SUPPORTING DOCUMENTATION	N	Prior Authorization Inquiry (Claim/Service): Not used.

Notes on Prior Authorization Segment on a Prior Authorization Inquiry Request:

The Prior Authorization Segment is mandatory for a Prior Authorization Inquiry request. It is used when the sender submits a request for the status of a previously submitted prior authorization request.

18.3 PRIOR AUTHORIZATION INQUIRY RESPONSE DIAGRAMS AND SEGMENTS

18.3.1 TRANSMISSION ACCEPTED/TRANSACTION PAID

Prior Authorization Inquiry transmission response Header Response Status (501-F1) of "A" (Accepted)
And Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid)

A Prior Authorization Inquiry is submitted for a previously submitted Prior Authorization Request And Billing that was "C" (Captured). The Prior Authorization Inquiry transaction response is actually tied back to the originally requested transaction.

If the initial request was a Prior Authorization Request And Billing that was not "P" (Paid) or "R" (Rejected) initially (meaning follow up was required) or a time out situation occurred, the subsequent Prior Authorization Inquiry would receive a response that was acceptable for the initial Prior Authorization Request & Billing – "P" (Paid), "C" (Captured), "F" (Deferred), or "R" (Rejected). In this section, "P" (Paid) is shown.

See section "Transaction Response Status", "Duplicate Transactions" for the handling of a duplicate transaction.

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
301-C1	GROUP ID	Q	Prior Authorization Inquiry (Claim/Service): Required if needed to identify the actual cardholder or employer group, to identify appropriate group number, when available. Required to identify the actual group that was used when multiple group coverages exist. Note: This field may contain the Group ID echoed from the request. May contain the actual Group ID if unknown to the receiver.
524-FO	PLAN ID	Q	Prior Authorization Inquiry (Claim/Service): Required if needed to identify the actual plan parameters, benefit, or coverage criteria, when available. Required to identify the actual plan ID that was used when multiple group coverages exist. Required if needed to contain the actual plan ID if unknown to the receiver.
545-2F	NETWORK REIMBURSEMENT ID	Q	Prior Authorization Inquiry (Claim/Service): Required if needed to identify the network for the covered member. Required if needed to identify the actual Network Reimbursement ID, when applicable and/or available. Required to identify the actual Network Reimbursement ID that was used when multiple Network Reimbursement IDs exist.
C96-KR	PAYER/HEALTH PLAN ID COUNT	Q	Prior Authorization Inquiry (Claim/Service): Maximum Count of 3. Required if Payer/Health Plan ID (569-J8) is used.
568-J7	PAYER/HEALTH PLAN ID QUALIFIER	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if Payer/Health Plan ID (569-J8) is used. The value of 05 (Medicare Part D Contract Number) must be used when the claim was paid by a Medicare Part D Plan/Payer.
569-J8	PAYER/HEALTH PLAN ID	Q***R***	Prior Authorization Inquiry (Claim/Service): Required when identification of the Payer/Health Plan is necessary. Required when the claim was paid by a Medicare Part D Plan/Payer. The value of 05 (Medicare Part D Contract Number) must be sent in the Payer/Health Plan ID Qualifier (568-J7) and the Medicare Part D Contract Number must be sent in this field.
115-N5	MEDICAID ID NUMBER	N	Prior Authorization Inquiry (Claim/Service): Not used.
116-N6	MEDICAID AGENCY NUMBER	N	Prior Authorization Inquiry (Claim/Service): Not used.
302-C2	CARDHOLDER ID	Q	Prior Authorization Inquiry (Claim/Service): Required if the identification to be used in future transactions is different than what was submitted on the request.

Notes on Response Insurance Segment on a Prior Authorization Inquiry Response:

The Response Insurance Segment is situational for a Prior Authorization Inquiry response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). It is used when coverage or reimbursement parameters or identifiers need to be sent.

D31-MR	OTHER BENEFIT DETAIL INFORMATION PROVIDER NUMBER	Q***R***	Prior Authorization Inquiry (Claim/Service): Required as allowed by plan policy and is applicable to coordinating patient benefits.
D29-MN	OTHER BENEFIT DETAIL INFORMATION FACILITY NAME	Q***R***	Prior Authorization Inquiry (Claim/Service): Required as allowed by plan policy and is applicable to coordinating patient benefits.
D30-MP	OTHER BENEFIT DETAIL INFORMATION FACILITY TELEPHONE NUMBER	Q***R***	Prior Authorization Inquiry (Claim/Service): Required as allowed by plan policy and is applicable to coordinating patient benefits.

Notes on Response Other Related Benefit Detail Segment on a Prior Authorization Inquiry Response: The Response Other Related Benefit Detail Segment is situational for a Prior Authorization Inquiry response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). Information will be returned when the Date of Service (401-D1) is in an active period for any of the records above (ESRD, Hospice, Institutional, Disability, or LIS or when other benefit information is available).

18.3.1.2.12 RESPONSE PROVIDER SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION ACCEPTED/TRANSACTION PAID)

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT	
Field	Field Name		Situation	
111-AM	SEGMENT IDENTIFICATION	M		
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Inquiry (Claim/Service): Returned when a provider conflict has been identified from an available authoritative data source.	
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Inquiry (Claim/Service): Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.	

Notes on Response Provider Segment on a Prior Authorization Inquiry Response:

The Response Provider Segment is situational for a Prior Authorization Inquiry response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "P" (Paid) or "D" (Duplicate of Paid). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

18.3.2 TRANSMISSION ACCEPTED/TRANSACTION CAPTURED

Prior Authorization Inquiry transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured)

A Prior Authorization Inquiry is submitted for a previously submitted Prior Authorization Request And Billing or Prior Authorization Request Only that was "C" (Captured). It is possible the receiver has not completed processing of the Prior Authorization Request And Billing or Prior Authorization Request Only, and will respond that the request is still pending, using the "C" (Captured) or "Q" (Duplicate of Captured). A "captured" response indicates the Prior Authorization has not been processed and as such no further processing is pending.

There are no situational transaction-level segments in the Prior Authorization Inquiry transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured).

See section "Transaction Response Status", "Duplicate Transactions" for the handling of a duplicate transaction.

Response Other Related Benefit Detail Segment Segment Separator Response Provider Segment

18.3.2.2 PRIOR AUTHORIZATION INQUIRY RESPONSE SEGMENTS (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

18.3.2.2.1 RESPONSE HEADER SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE HEADER SEGMENT			MANDATORY SEGMENT
Field	Field Name	Mandatory or Situational	Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on a Prior Authorization Inquiry Response:

The Response Header Segment is a mandatory, fixed length segment for a Prior Authorization Inquiry response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). The "Situation" column is not applicable.

18.3.2.2.2 RESPONSE MESSAGE SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE MESSAGE SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Prior Authorization Inquiry (Claim/Service): Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Prior Authorization Inquiry Response:

The Response Message Segment is situational for a Prior Authorization Inquiry response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). It is used when additional text information needs to be sent.

18.3.2.2.3 RESPONSE PATIENT SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE PATIENT SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
618-RR	PATIENT ID COUNT	Q	Prior Authorization Inquiry(Claim/Service):: Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.
331-CX	PATIENT ID QUALIFIER	Q***R***	Prior Authorization Inquiry(Claim/Service):: Required if Patient ID (332-CY) is used.
332-CY	PATIENT ID	Q***R***	Prior Authorization Inquiry(Claim/Service)::

RESPONSE PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.
310-CA	PATIENT FIRST NAME	Q	Prior Authorization Inquiry (Claim/Service): Required if known.
311-CB	PATIENT LAST NAME	Q	Prior Authorization Inquiry (Claim/Service): Required if known.
304-C4	DATE OF BIRTH	Q	Prior Authorization Inquiry (Claim/Service): Required if known.

Notes on Response Patient Segment on a Prior Authorization Inquiry Response:

The Response Patient Segment is situational for Prior Authorization Inquiry transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured) when patient demographic information needs to be sent from the sender to the receiver.

18.3.2.2.4 RESPONSE STATUS SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Prior Authorization Inquiry (Claim/Service): Required if needed to identify the transaction.
B98-34	RECONCILIATION ID	N	Prior Authorization Inquiry (Claim/Service): Not used.
510-FA	REJECT COUNT	N	Prior Authorization Inquiry (Claim/Service): Not used.
511-FB	REJECT CODE	N***R***	Prior Authorization Inquiry (Claim/Service): Not used.
546-4F	REJECT FIELD OCCURRENCE INDICATOR	N***R***	Prior Authorization Inquiry (Claim/Service): Not used.
547-5F	APPROVED MESSAGE CODE COUNT	N	Prior Authorization Inquiry (Claim/Service): Not used.
548-6F	APPROVED MESSAGE CODE	N***R***	Prior Authorization Inquiry (Claim/Service): Not used.
130-UF	ADDITIONAL MESSAGE INFORMATION COUNT	Q	Prior Authorization Inquiry (Claim/Service): Maximum count of 25. Required if Additional Message Information (526-FQ) is used. Used to qualify the number of occurrences of the Additional Message Information (526-FQ) that is included in the Response Status Segment.
132-UH	ADDITIONAL MESSAGE INFORMATION QUALIFIER	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if Additional Message Information (526-FQ) is used.
526-FQ	ADDITIONAL MESSAGE INFORMATION	Q***R***	Prior Authorization Inquiry (Claim/Service): Required when additional text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.
131-UG	ADDITIONAL MESSAGE INFORMATION CONTINUITY	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if and only if current repetition of Additional Message Information (526-FQ) is used, another populated repetition of Additional Message Information (526-FQ) follows it, and the text of the following message is a continuation of the current.
C72-BH	HELP DESK SUPPORT TYPE COUNT	M	Prior Authorization Inquiry (Claim/Service): Maximum count of 5.

OFFICIAL RELEASE

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
			Used to qualify the number of occurrences of Help Desk Support Type (C71-BG) that is included in the Response Status Segment.
C71-BG	HELP DESK SUPPORT TYPE	M***R***	
C67-BB	HELP DESK BUSINESS UNIT TYPE COUNT	R	Prior Authorization Inquiry (Claim/Service): Maximum count of 5. Used to qualify the number of occurrences of the Help Desk Business Unit Type, Help Desk Contact Information Qualifier, Help Desk Contact Information and Help Desk Contact Information Extension that is included in the Response Status Segment. Required if Help Desk Business Unit Type (C66-BA) is used.
C66-BA	HELP DESK BUSINESS UNIT TYPE	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if Help Desk Contact Information Qualifier (C70-BF) is used.
C70-BF	HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if Help Desk Contact Information (C68-BC) is used.
C68-BC	HELP DESK CONTACT INFORMATION	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if needed to provide help desk contact support information to the receiver.
C69-BD	HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if needed to provide an extension to the Help Desk Contact Information (C68-BC).
880-K5	TRANSACTION REFERENCE NUMBER	N	Prior Authorization Inquiry (Claim/Service): Not used.
993-A7	INTERNAL CONTROL NUMBER	Q	Prior Authorization Inquiry (Claim/Service): Required when used for payer-to-payer coordination of benefits to track the claim without regard to the "Service Provider ID, Prescription Number, & Date of Service".
A28-ZR	ADJUDICATED PROGRAM TYPE	R	Prior Authorization Inquiry (Claim/Service): Required on all Captured responses. The most descriptive program type value must be returned. "UNKNOWN" or "OTHER" must not be used for federal programs as defined in Section 1128B(B) of the Social Security Act. Also see section "Adjudicated Program Type (A28-ZR)" for appropriate use.
B04-BT	NEXT AVAILABLE FILL DATE	N	Prior Authorization Inquiry (Claim/Service): Not used.

Notes on Response Status Segment on a Prior Authorization Inquiry Response:

The Response Status Segment is mandatory for a Prior Authorization Inquiry response for Header Response Status (501-F1) = "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). The Response Status Segment is sent from the sender to the receiver to identify the outcome of the request.

18.3.2.2.5 RESPONSE DUR/PPS SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE DUR/PPS SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
567-J6	DUR/PPS RESPONSE CODE COUNTER	Q***R***	Prior Authorization Inquiry (Claim/Service): Maximum 9 occurrences supported. Required if Reason For Service Code (439-E4) is used.
439-E4	REASON FOR SERVICE CODE	Q***R***	Prior Authorization Inquiry (Claim): Required if detecting utilization conflict. Service: Required if professional service opportunity reason is detected by the receiver that is different from the professional service submitted.

E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Inquiry (Claim/Service): Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Inquiry (Claim/Service): Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Prior Authorization Inquiry Response:

The Response Provider Segment is situational for a Prior Authorization Inquiry response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

18.3.3 TRANSMISSION ACCEPTED/TRANSACTION APPROVED

Prior Authorization Inquiry transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved)

If the initial request was a Prior Authorization Request Only that was not approved or rejected initially (meaning follow up was required) or a time out situation occurred, the subsequent Prior Authorization Inquiry would receive a response that was acceptable for the initial Prior Authorization Request Only - "A" (Approved), "C" (Captured), "F" (Deferred), or "R" (Rejected). In this section, "A" (Approved) is shown. Since an "A" Approved or "S" Duplicate of Approved is for the Prior Authorization 'assignment' only, Reconciliation ID (B98-34) is not applicable.

There are no situational transaction-level segments for Prior Authorization Inquiry transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved).

See section "Transaction Response Status", "Duplicate Transactions" for the handling of a duplicate transaction.

18.3.3.2 PRIOR AUTHORIZATION INQUIRY RESPONSE SEGMENTS (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)**18.3.3.2.1 RESPONSE HEADER SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)**

RESPONSE HEADER SEGMENT			MANDATORY SEGMENT
Field	Field Name	Mandatory or Situational	Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on a Prior Authorization Inquiry Response:

The Response Header Segment is a mandatory, fixed length segment for a Prior Authorization Inquiry response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved). The "Situation" column is not applicable.

18.3.3.2.2 RESPONSE MESSAGE SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

RESPONSE MESSAGE SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Prior Authorization Inquiry (Claim/Service): Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Prior Authorization Inquiry Response:

The Response Message Segment is situational for a Prior Authorization Inquiry response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved). It is used when additional text information needs to be sent.

18.3.3.2.3 RESPONSE PATIENT SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

RESPONSE PATIENT SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
618-RR	PATIENT ID COUNT	Q	Prior Authorization Inquiry(Claim/Service):: Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.
331-CX	PATIENT ID QUALIFIER	Q***R***	Prior Authorization Inquiry(Claim/Service):: Required if Patient ID (332-CY) is used.
332-CY	PATIENT ID	Q***R***	Prior Authorization Inquiry(Claim/Service):: Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.
310-CA	PATIENT FIRST NAME	Q	Prior Authorization Inquiry (Claim/Service): Required if known.

OFFICIAL RELEASE

Notes on Response Claim Segment on a Prior Authorization Inquiry Response:

The Response Claim Segment is mandatory for a Prior Authorization Inquiry response when the Header Response Status (501-F1) is "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved).

The Response Claim Segment (Prior Authorization Inquiry – Claim) is sent from the sender to the receiver to identify therapeutic or alternate product recommendations.

The Response Claim Segment (Prior Authorization Inquiry – Service) is sent from the sender to the receiver to mirror back the Prescription/Service Reference Number (402-D2).

18.3.3.2.6 RESPONSE PRIOR AUTHORIZATION SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

RESPONSE PRIOR AUTHORIZATION SEGMENT		MANDATORY SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
498-PR	PRIOR AUTHORIZATION PROCESSED DATE	R	Prior Authorization Inquiry (Claim/Service): Required.
498-PS	PRIOR AUTHORIZATION EFFECTIVE DATE	Q	Prior Authorization Inquiry: (Claim/Service): Required if the prior authorization has an effective date.
498-PT	PRIOR AUTHORIZATION EXPIRATION DATE	Q	Prior Authorization Inquiry: (Claim/Service): Required if the prior authorization has an expiration date.
498-RA	PRIOR AUTHORIZATION QUANTITY	Q	Prior Authorization Inquiry: (Claim/Service): Required if the total quantity authorized is greater than zero.
498-RB	PRIOR AUTHORIZATION DOLLARS AUTHORIZED	Q	Prior Authorization Inquiry: (Claim/Service): Required if the total dollars authorized is greater than zero.
498-PW	PRIOR AUTHORIZATION NUMBER OF REFILLS AUTHORIZED	Q	Prior Authorization Inquiry: (Claim/Service): Required if a specific number of refills is authorized.
498-PX	PRIOR AUTHORIZATION QUANTITY ACCUMULATED	Q	Prior Authorization Inquiry: (Claim/Service): Required if the Prior Authorization Quantity (498-RA) is greater than zero. The field must equal the total of the quantities from all claims processed.
498-PY	PRIOR AUTHORIZATION ID ASSIGNED	R	Prior Authorization Inquiry: (Claim/Service): Required.

Notes on Response Prior Authorization Segment on a Prior Authorization Inquiry Response:

The Response Prior Authorization Segment is mandatory for Prior Authorization Inquiry transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved). It is used to relay the prior authorization periods, limitations, contracted amounts, as well as a Prior Authorization ID Assigned (498-PY) which is to be used for subsequent Claim or Service Billings.

18.3.3.2.7 RESPONSE DUR/PPS SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

RESPONSE DUR/PPS SEGMENT		SITUATIONAL SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M

544-FY	DUR/DUE FREE TEXT MESSAGE	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if needed to supply additional information for the Reason for Service Code (439-E4).

Notes on Response DUR/PPS Segment on a Prior Authorization Inquiry Response:

The Response DUR/PPS Segment is situational for a Prior Authorization Inquiry response when for Header Response Status (501-F1) = "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved). The Response DUR/PPS Segment identifies a drug utilization review or professional pharmacy service event, opportunity, or information.

18.3.3.2.8 RESPONSE PROVIDER SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Inquiry (Claim/Service): Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Inquiry (Claim/Service): Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Prior Authorization Inquiry Response:

The Response Provider Segment is situational for a Prior Authorization Inquiry response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

RESPONSE MESSAGE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Prior Authorization Inquiry Response:

The Response Message Segment is situational for a Prior Authorization Inquiry response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "F" (Deferred). It is used when additional text information needs to be sent.

18.3.4.2.3 RESPONSE PATIENT SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION ACCEPTED/TRANSACTION DEFERRED)

RESPONSE PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
618-RR	PATIENT ID COUNT	Q	Prior Authorization Inquiry(Claim/Service):: Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.
331-CX	PATIENT ID QUALIFIER	Q***R***	Prior Authorization Inquiry(Claim/Service):: Required if Patient ID (332-CY) is used.
332-CY	PATIENT ID	Q***R***	Prior Authorization Inquiry(Claim/Service):: Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.
310-CA	PATIENT FIRST NAME	Q	Prior Authorization Inquiry (Claim/Service): Required if known.
311-CB	PATIENT LAST NAME	Q	Prior Authorization Inquiry (Claim/Service): Required if known.
304-C4	DATE OF BIRTH	Q	Prior Authorization Inquiry (Claim/Service): Required if known.

Notes on Response Patient Segment on a Prior Authorization Inquiry Response:

The Response Patient Segment is situational for Prior Authorization Inquiry transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "F" (Deferred) when patient demographic information needs to be sent from the sender to the receiver.

18.3.4.2.4 RESPONSE STATUS SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION ACCEPTED/TRANSACTION DEFERRED)

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Prior Authorization Inquiry (Claim/Service): Required if needed to identify the transaction.
B98-34	RECONCILIATION ID	N	Prior Authorization Inquiry (Claim/Service): Not used.
510-FA	REJECT COUNT	N	Prior Authorization Inquiry (Claim/Service): Not used.
511-FB	REJECT CODE	N***R***	Prior Authorization Inquiry (Claim/Service): Not used.
546-4F	REJECT FIELD OCCURRENCE INDICATOR	N***R***	Prior Authorization Inquiry (Claim/Service): Not used.
547-5F	APPROVED MESSAGE CODE COUNT	N	Prior Authorization Inquiry (Claim/Service): Not used.
548-6F	APPROVED MESSAGE CODE	N***R***	Prior Authorization Inquiry (Claim/Service): Not used.
130-UF	ADDITIONAL MESSAGE INFORMATION COUNT	Q	Prior Authorization Inquiry (Claim/Service): Maximum count of 25.

D32-MS	OTHER BENEFIT DETAIL INFORMATION INDICATOR	Q***R***	Prior Authorization Inquiry (Claim/Service): Required as allowed by plan policy and is applicable to coordinating patient benefits when other benefit detail information related to the Other Benefit Type Code (D40-PN) is known.
D28-MM	OTHER BENEFIT DETAIL INFORMATION EFFECTIVE DATE	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if the Other Benefit Detail Information Indicator (D32-MS) is used and the Date of Service (401-D1) is within an active period.
D33-MX	OTHER BENEFIT DETAIL INFORMATION TERMINATION DATE	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if the Other Benefit Detail Information Indicator (D32-MS) is used, Date of Service (401-D1) is within an active period and termination date is known.
D31-MR	OTHER BENEFIT DETAIL INFORMATION PROVIDER NUMBER	Q***R***	Prior Authorization Inquiry (Claim/Service): Required as allowed by plan policy and is applicable to coordinating patient benefits.
D29-MN	OTHER BENEFIT DETAIL INFORMATION FACILITY NAME	Q***R***	Prior Authorization Inquiry (Claim/Service): Required as allowed by plan policy and is applicable to coordinating patient benefits.
D30-MP	OTHER BENEFIT DETAIL INFORMATION FACILITY TELEPHONE NUMBER	Q***R***	Prior Authorization Inquiry (Claim/Service): Required as allowed by plan policy and is applicable to coordinating patient benefits.

Notes on Response Other Related Benefit Detail Segment on a Prior Authorization Inquiry Response: The Response Other Related Benefit Detail Segment is situational for a Prior Authorization Inquiry response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "F" (Deferred). Information will be returned when the Date of Service (401-D1) is in an active period for any of the records above (ESRD, Hospice, Institutional, Disability, or LIS or when other benefit information is available).

18.3.4.2.9 RESPONSE PROVIDER SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION ACCEPTED/TRANSACTION DEFERRED)

RESPONSE PROVIDER SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Inquiry (Claim/Service): Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Inquiry (Claim/Service): Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Prior Authorization Inquiry Response:

The Response Provider Segment is situational for a Prior Authorization Inquiry response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "F" (Deferred). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

18.3.5 TRANSMISSION ACCEPTED/TRANSACTION REJECTED

Prior Authorization Inquiry transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected)

If the initial request was a Prior Authorization Request And Billing or Prior Authorization Request Only that was not approved or rejected initially (meaning follow up was required) or a time out situation occurred, the subsequent Prior Authorization Inquiry would receive a response that was acceptable for the initial Prior Authorization Request And Billing or Prior Authorization Request Only – "A" (Approved), "C" (Captured), "F" (Deferred), or "R" (Rejected). In this section, "R" (Rejected) is shown.

18.3.5.2 PRIOR AUTHORIZATION INQUIRY RESPONSE SEGMENTS (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

18.3.5.2.1 RESPONSE HEADER SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE HEADER SEGMENT		MANDATORY SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on a Prior Authorization Inquiry Response:

The Response Header Segment is a mandatory, fixed length segment for a Prior Authorization Inquiry response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). The "Situation" column is not applicable.

If the transaction rejects for detail errors, the Header Response Status (501-F1) = "A" (Accepted) and the Transaction Response Status (112-AN) will be "R".

18.3.5.2.2 RESPONSE MESSAGE SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE MESSAGE SEGMENT		SITUATIONAL SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Prior Authorization Inquiry (Claim/Service): Required if text is needed for clarification or detail. , The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Prior Authorization Inquiry Response:

The Response Message Segment is situational for a Prior Authorization Inquiry response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). It is used when additional text information needs to be sent.

18.3.5.2.3 RESPONSE PATIENT SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

- 517 -

RESPONSE PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
618-RR	PATIENT ID COUNT	Q	Prior Authorization Inquiry(Claim/Service):: Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.
331-CX	PATIENT ID QUALIFIER	Q***R***	Prior Authorization Inquiry(Claim/Service):: Required if Patient ID (332-CY) is used.
332-CY	PATIENT ID	Q***R***	Prior Authorization Inquiry(Claim/Service):: Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.
310-CA	PATIENT FIRST NAME	Q	Prior Authorization Inquiry (Claim/Service): Required if known.
311-CB	PATIENT LAST NAME	Q	Prior Authorization Inquiry (Claim/Service): Required if known.
304-C4	DATE OF BIRTH	Q	Prior Authorization Inquiry (Claim/Service): Required if known.

Notes on Response Patient Segment on a Prior Authorization Inquiry Response:

The Response Patient Segment is situational for Prior Authorization Inquiry transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected) when patient demographic information needs to be sent from the sender to the receiver.

18.3.5.2.4 RESPONSE STATUS SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Prior Authorization Inquiry (Claim/Service): Required if needed to identify the transaction.
B98-34	RECONCILIATION ID	N	Prior Authorization Inquiry (Claim/Service): Not used.
510-FA	REJECT COUNT	R	Prior Authorization Inquiry (Claim/Service): Maximum count of 5. Required.
511-FB	REJECT CODE	R***R***	Prior Authorization Inquiry (Claim/Service): Required.
546-4F	REJECT FIELD OCCURRENCE INDICATOR	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if a repeating field is in error, to identify repeating field occurrence. This field must be sent when relaying error information about a repeating field or set. Note, if the Reject Code is not denoting a repeating field or set, the Reject Field Occurrence Indicator must not be sent.
547-5F	APPROVED MESSAGE CODE COUNT	N	Prior Authorization Inquiry (Claim/Service): Not used.
548-6F	APPROVED MESSAGE CODE	N***R***	Prior Authorization Inquiry (Claim/Service): Not used.
130-UF	ADDITIONAL MESSAGE INFORMATION COUNT	Q	Prior Authorization Inquiry (Claim/Service): Maximum count of 25. Required if Additional Message Information (526-FQ) is used. Used to qualify the number of occurrences of the Additional Message Information (526-FQ) that is included in the Response Status Segment.
132-UH	ADDITIONAL MESSAGE INFORMATION QUALIFIER	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if Additional Message Information (526-FQ) is used.
526-FQ	ADDITIONAL MESSAGE INFORMATION	Q***R***	Prior Authorization Inquiry (Claim/Service):

- 524 -

RESPONSE OTHER PAYERS SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
			Required when other coverage is known which will become effective after the Date of Service submitted. Other Payer Benefit Effective Date would not be returned for coverage that is current as of the claim date of service. This allows the receiver to identify other coverage that needs to be billed or stored for future use.
145-UY	OTHER PAYER BENEFIT TERMINATION DATE	Q***R***	Prior Authorization Inquiry (Claim/Service): Required when other coverage termination date is known which is after the Date of Service submitted. If the termination date is not known this field would not be returned.
D23-M5	OTHER PAYER NAME	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if the data is available.

Notes on Response Other Payers Segment on a Prior Authorization Inquiry Response:

The Response Other Payers Segment is situational for a Prior Authorization Inquiry response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status = "R" (Rejected) when other insurance information is available.

The following outlines different rejected claim scenarios and the use of the Response Other Payers Segment.

1. Non-Matched: If the identity of the patient cannot be validated and the Claim Billing or Encounter is rejected due to a non-match of field verification, then the Other Payer information is not sent.
2. COB Sequence: If the claim is rejected because it should be submitted to other payer(s) first, that Other Payer information must be sent, if available.
3. Change in 4RX (Change in Coverage): If the identity of the patient is verified and the Claim Billing or Encounter is rejected due to known alternate 4RX data required for claims processing, then the alternate 4RX data is returned as Other Payer information.
4. Plan Exclusion Alternate 4RX (Mutually Exclusive): If the claim is rejected due to plan benefit exclusions, then Other Payer information must be sent, if available.

18.3.5.2.8 RESPONSE OTHER RELATED BENEFIT DETAIL SEGMENT (A PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION ACCEPTED/ TRANSACTION REJECTED)

RESPONSE OTHER RELATED BENEFIT DETAIL SEGMENT			SITUATIONAL SEGMENT

			Required as allowed by plan policy and is applicable to coordinating patient benefits, Date of Service (401-D1) is within an active period and termination date is known.
C78-G6	HOSPICE PROVIDER NUMBER	Q	Prior Authorization Inquiry (Claim/Service): Required as allowed by plan policy and is applicable to coordinating patient benefits.
C77-G5	HOSPICE FACILITY NAME	Q	Prior Authorization Inquiry (Claim/Service): Required as allowed by plan policy and is applicable to coordinating patient benefits.
C65-A8	HOSPICE TELEPHONE NUMBER	Q	Prior Authorization Inquiry (Claim/Service): Required as allowed by plan policy and is applicable to coordinating patient benefits.
C73-BJ	INSTITUTIONAL INDICATOR	Q	Prior Authorization Inquiry (Claim/Service): Required as allowed by plan policy and is applicable to coordinating patient benefits.
C74-BK	INSTITUTIONAL EFFECTIVE DATE	Q	Prior Authorization Inquiry (Claim/Service): Required as allowed by plan policy and is applicable to coordinating patient benefits and Date of Service (401-D1) is within an active period.
C75-GD	INSTITUTIONAL TERMINATION DATE	Q	Prior Authorization Inquiry (Claim/Service): Required as allowed by plan policy and is applicable to coordinating patient benefits, Date of Service (401-D1) is within an active period and termination date is known.
D26-M8	OTHER BENEFIT COUNT	Q	Prior Authorization Inquiry (Claim/Service): Maximum count of 9. Required if Other Benefit Type Code (D40-PN) is used.
D40-PN	OTHER BENEFIT TYPE CODE	Q***R***	Prior Authorization Inquiry (Claim/Service): Required as allowed by plan policy and is applicable to coordinating patient benefits.
D34-MZ	OTHER BENEFIT EFFECTIVE DATE	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if the Other Benefit Type Code (D40-PN) is used and Date of Service (401-D1) is within an active period.
D39-NN	OTHER BENEFIT TERMINATION DATE	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if the Other Benefit Type Code (D40-PN) is used, Date of Service (401-D1) is within an active period and termination date is known.
729-TA	STATE/PROVINCE ADDRESS	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if the Other Benefit Type Code (D40-PN) is used and is applicable.
D38-N9	OTHER BENEFIT TYPE ID	Q***R***	Prior Authorization Inquiry (Claim/Service): Required as allowed by plan policy and is applicable to coordinating patient benefits.
D35-N1	OTHER BENEFIT FACILITY NAME	Q***R***	Prior Authorization Inquiry (Claim/Service): Required as allowed by plan policy and is applicable to coordinating patient benefits.
D36-N7	OTHER BENEFIT FACILITY TELEPHONE NUMBER	Q***R***	Prior Authorization Inquiry (Claim/Service): Required as allowed by plan policy and is applicable to coordinating patient benefits.
D37-N8	OTHER BENEFIT DETAIL INFORMATION COUNT	Q	Prior Authorization Inquiry (Claim/Service): Required as allowed by plan policy and is applicable to coordinating patient benefits.
D32-MS	OTHER BENEFIT DETAIL INFORMATION INDICATOR	Q***R***	Prior Authorization Inquiry (Claim/Service): Required as allowed by plan policy and is applicable to coordinating patient benefits when other benefit detail information related to the Other Benefit Type Code (D40-PN) is known.
D28-MM	OTHER BENEFIT DETAIL INFORMATION EFFECTIVE DATE	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if the Other Benefit Detail Information Indicator (D32-MS) is used and the Date of Service (401-D1) is within an active period.
D33-MX	OTHER BENEFIT DETAIL INFORMATION TERMINATION DATE	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if the Other Benefit Detail Information Indicator (D32-MS) is used, Date of Service (401-D1) is within an active period and termination date is known.
D31-MR	OTHER BENEFIT DETAIL INFORMATION PROVIDER NUMBER	Q***R***	Prior Authorization Inquiry (Claim/Service): Required as allowed by plan policy and is applicable to coordinating patient benefits.
D29-MN	OTHER BENEFIT DETAIL INFORMATION FACILITY NAME	Q***R***	Prior Authorization Inquiry (Claim/Service): Required as allowed by plan policy and is applicable to coordinating patient benefits.
D30-MP	OTHER BENEFIT DETAIL INFORMATION FACILITY TELEPHONE NUMBER	Q***R***	Prior Authorization Inquiry (Claim/Service): Required as allowed by plan policy and is applicable to coordinating patient benefits.

Notes on Response Other Related Benefit Detail Segment on a Prior Authorization Inquiry Response: The Response Other Related Benefit Detail Segment is situational for a Prior Authorization Inquiry response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). Information will be returned when the Date of Service (401-D1) is in an active period for any of the records above (ESRD, Hospice, Institutional, Disability, or LIS or when other benefit information is available).

18.3.5.2.9 RESPONSE PROVIDER SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

- 526 -

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Inquiry (Claim/Service): Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Inquiry (Claim/Service): Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Prior Authorization Inquiry Response:

The Response Provider Segment is situational for a Prior Authorization Inquiry response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

18.3.6 TRANSMISSION REJECTED/TRANSACTION REJECTED

Prior Authorization Inquiry transmission response Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected)

18.3.6.1 DIAGRAM FOR TRANSMISSION OF ONE PRIOR AUTHORIZATION INQUIRY RESPONSE (TRANSMISSION REJECTED/TRANSACTION REJECTED)

18.3.6.2 PRIOR AUTHORIZATION INQUIRY RESPONSE SEGMENTS (TRANSMISSION REJECTED/TRANSACTION REJECTED)**18.3.6.2.1 RESPONSE HEADER SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION REJECTED/TRANSACTION REJECTED)**

RESPONSE HEADER SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on a Prior Authorization Inquiry Response:

The Response Header Segment is a mandatory, fixed length segment for a Prior Authorization Inquiry response when the Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The "Situation" column is not applicable.

If either the entire transmission or the Header is in error, the Header Response Status (501-F1) = "R" (Rejected). The transaction within the transmission must be rejected with an "R".

18.3.6.2.2 RESPONSE MESSAGE SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION REJECTED/TRANSACTION REJECTED)

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

RESPONSE MESSAGE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Prior Authorization Inquiry (Claim/Service): Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Prior Authorization Inquiry Response:

The Response Message Segment is situational segment for a Prior Authorization Inquiry response when the Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). It is used when additional text information needs to be sent.

18.3.6.2.3 RESPONSE STATUS SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION REJECTED/TRANSACTION REJECTED)

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Prior Authorization Inquiry (Claim/Service): Required if needed to identify the transaction.
B98-34	RECONCILIATION ID	N	Prior Authorization Inquiry (Claim/Service): Not used.
510-FA	REJECT COUNT	R	Prior Authorization Inquiry (Claim/Service): Maximum count of 5. Required.
511-FB	REJECT CODE	R***R***	Prior Authorization Inquiry (Claim/Service): Required.
546-4F	REJECT FIELD OCCURRENCE INDICATOR	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if a repeating field is in error, to identify repeating field occurrence. This field must be sent when relaying error information about a repeating field or set. Note, if the Reject Code is not denoting a repeating field or set, the Reject Field Occurrence Indicator must not be sent.
547-5F	APPROVED MESSAGE CODE COUNT	N	Prior Authorization Inquiry (Claim/Service): Not used.
548-6F	APPROVED MESSAGE CODE	N***R***	Prior Authorization Inquiry (Claim/Service): Not used.
130-UF	ADDITIONAL MESSAGE INFORMATION COUNT	Q	Prior Authorization Inquiry (Claim/Service): Maximum count of 25. Required if Additional Message Information (526-FQ) is used. Used to qualify the number of occurrences of the Additional Message Information (526-FQ) that is included in the Response Status Segment.
132-UH	ADDITIONAL MESSAGE INFORMATION QUALIFIER	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if Additional Message Information (526-FQ) is used.
526-FQ	ADDITIONAL MESSAGE INFORMATION	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if additional text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.
131-UG	ADDITIONAL MESSAGE INFORMATION CONTINUITY	Q***R***	Prior Authorization Inquiry (Claim/Service):

- 528 -

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
			Required if and only if current repetition of Additional Message Information (526-FQ) is used, another populated repetition of Additional Message Information (526-FQ) follows it, and the text of the following message is a continuation of the current.
C72-BH	HELP DESK SUPPORT TYPE COUNT	M	Prior Authorization Inquiry (Claim/Service): Maximum count of 5. Used to qualify the number of occurrences of Help Desk Support Type (C71-BG) that is included in the Response Status Segment.
C71-BG	HELP DESK SUPPORT TYPE	M***R***	
C67-BB	HELP DESK BUSINESS UNIT TYPE COUNT	R	Prior Authorization Inquiry (Claim/Service): Maximum count of 5. Used to qualify the number of occurrences of the Help Desk Business Unit Type, Help Desk Contact Information Qualifier, Help Desk Contact Information and Help Desk Contact Information Extension that is included in the Response Status Segment. Required if Help Desk Business Unit Type (C66-BA) is used.
C66-BA	HELP DESK BUSINESS UNIT TYPE	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if Help Desk Contact Information Qualifier (C70-BF) is used.
C70-BF	HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if Help Desk Contact Information (C68-BC) is used.
C68-BC	HELP DESK CONTACT INFORMATION	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if needed to provide help desk contact support information to the receiver.
C69-BD	HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Prior Authorization Inquiry (Claim/Service): Required if needed to provide an extension to the Help Desk Contact Information (C68-BC).
880-K5	TRANSACTION REFERENCE NUMBER	N	Prior Authorization Inquiry (Claim/Service): Not used.
993-A7	INTERNAL CONTROL NUMBER	N	Prior Authorization Inquiry (Claim/Service): Not used.
A28-ZR	ADJUDICATED PROGRAM TYPE	N	Prior Authorization Inquiry (Claim/Service): Not used.
B04-BT	NEXT AVAILABLE FILL DATE	N	Prior Authorization Inquiry (Claim/Service): Not used.

Notes on Response Status Segment on a Prior Authorization Inquiry Response:

The Response Status Segment is mandatory for a Prior Authorization Inquiry response when the Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The Response Status Segment is sent from the sender to the receiver to identify the outcome of the request. Refer to the *NCPDP External Code List* for guidance on the use of reject codes.

18.3.6.2.4 RESPONSE PROVIDER SEGMENT (PRIOR AUTHORIZATION INQUIRY) (TRANSMISSION REJECTED/TRANSACTION REJECTED)

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Inquiry (Claim/Service): Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Inquiry (Claim/Service): Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Prior Authorization Inquiry Response:

The Response Provider Segment is situational for a Prior Authorization Inquiry response when the Header Response Status (501-F1) "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

19 PRIOR AUTHORIZATION REQUEST ONLY INFORMATION

This transaction allows the Originator to request of the Processor a prior authorization only and exclude the processing of the claim or service.

The Transaction Code is "P4".

The Processor must provide one of the following general types of responses:

Approved – The Processor has approved the prior authorization.

Duplicate of Approved – The Processor has previously received the request and processed the transaction, but the response did not return to the Originator. The Duplicate response contains the same information as returned in the Approved original response.

Captured – The Processor returns the status of the prior authorization originally submitted. The prior authorization was captured, but no judgment has been made.

Duplicate of Captured – The Processor has previously received the request and processed the transaction, but the response did not return to the Originator. The Duplicate response contains the same information as returned in the Captured original response.

Deferred – The Processor notifies the Originator that the status of a prior authorization request is that the request has been deferred. If a duplicate request is received, the original response must be returned.

Rejected – The Processor has encountered an error in the transaction or processing, or does not approve the prior authorization request.

See section "Transaction Response Status", "Duplicate Transactions".

PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Required if clinical determination is dependent upon patient's pregnancy condition. Submitted until it is known the patient is no longer pregnant. Required if pregnancy could result in different coverage, pricing, or patient financial responsibility.
350-HN	PATIENT E-MAIL ADDRESS	N	Prior Authorization Request Only (Claim/Service): Not used.
384-4X	PATIENT RESIDENCE	Q	Prior Authorization Request Only (Claim/Service): Required if this field could result in different coverage, pricing, or patient financial responsibility.
A22-YR	PATIENT ID ASSOCIATED STATE/PROVINCE ADDRESS	N	Prior Authorization Request Only (Claim/Service): Not used.
B38-1Y	PATIENT ID ASSOCIATED COUNTRY CODE	N	Prior Authorization Request Only (Claim/Service): Not used.
A45-1R	VETERINARY USE INDICATOR	N	Prior Authorization Request Only (Claim/Service): Not used.
E06-S8	SPECIES	N	Prior Authorization Request Only (Claim/Service): Not used.

Notes on Patient Segment on a Prior Authorization Request Only Request:

The Patient Segment is situational for a Prior Authorization Request Only request. The Patient Segment must be submitted when needed to differentiate between the patient and the cardholder. If the cardholder and the patient are the same, then the Patient Segment is not submitted unless additional information about the patient is needed to clarify the Prior Authorization Request Only. The Segment is mandatory if required under provider payer contract or mandatory on Prior Authorization Request Only where this information is necessary for processing a prior authorization.

19.2.4 CLAIM SEGMENT (PRIOR AUTHORIZATION REQUEST ONLY)

CLAIM SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
455-EM	PRESCRIPTION/SERVICE REFERENCE NUMBER QUALIFIER	M	Prior Authorization Request Only (Claim): For Transaction Code of "P4", in the Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "1" (Rx Billing). Prior Authorization Request Only (Service): For Transaction Code of "P4", in the Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "2" (Service Billing).
402-D2	PRESCRIPTION/SERVICE REFERENCE NUMBER	M	Prior Authorization Request Only (Claim/Service): If Prescription/Service Reference Number (402-D2) is unknown, default to zeroes. See section "Standard Conventions", "Character Set Designation Truncation", "Numeric", "Numeric Truncation".
436-E1	PRODUCT/SERVICE ID QUALIFIER	M	Prior Authorization Request Only (Claim/Service): If billing for a multi-ingredient prescription, Product/Service ID Qualifier (436-E1) is zero (Zero means "00"). If the Product/Service ID Qualifier (436-E1) = "06" (DUR/PPS), the Product/Service ID (407-D7) is zero. (Zero means "0".)
407-D7	PRODUCT/SERVICE ID	M	Prior Authorization Request Only (Claim/Service): If billing for a multi-ingredient prescription, Product/Service ID (407-D7) is zero. (Zero means "0".) If the Product/Service ID Qualifier (436-E1) = "06" (DUR/PPS), the Product/Service ID (407-D7) is zero. (Zero means "0".) Populate the DUR/PPS segment as appropriate. If the Product/Service ID Qualifier (436-E1) = "07" (CPT-4), the Product Service ID (407-D7) is the actual CPT-4 value.

DUR/PPS SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
441-E6	RESULT OF SERVICE CODE	Q***R***	Prior Authorization Request Only (Claim/Service): Required if needed to obtain prior authorization for clinical services or drug utilization review overrides.
474-8E	DUR/PPS LEVEL OF EFFORT	Q***R***	Prior Authorization Request Only (Claim/Service): Required if needed to obtain prior authorization for clinical services or drug utilization review overrides.
475-J9	DUR/DUE CO-AGENT ID QUALIFIER	Q***R***	Prior Authorization Request Only (Claim/Service): Required if DUR/DUE Co-Agent ID (476-H6) is used.
476-H6	DUR/DUE CO-AGENT ID	Q***R***	Prior Authorization Request Only (Claim/Service): Required if this field could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome. Required if this field affects payment for or documentation of professional pharmacy service.

Notes on DUR/PPS Segment on a Prior Authorization Request Only Request:

The DUR/PPS Segment is situational for a Prior Authorization Request Only request. It is used when a sender notifies the receiver of clinical services or drug utilization review overrides necessary to process a Prior Authorization Request Only.

19.2.9 COMPOUND SEGMENT (PRIOR AUTHORIZATION REQUEST ONLY)

COMPOUND SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
450-EF	COMPOUND DOSAGE FORM DESCRIPTION CODE	M	
451-EG	COMPOUND DISPENSING UNIT FORM INDICATOR	M	
C60-AG	COMPOUND LEVEL OF COMPLEXITY	Q	Required if specified in trading partner agreement.
447-EC	COMPOUND INGREDIENT COMPONENT COUNT	M	Maximum count of 25 ingredients.
488-RE	COMPOUND PRODUCT ID QUALIFIER	M***R***	
489-TE	COMPOUND PRODUCT ID	M***R***	
448-ED	COMPOUND INGREDIENT QUANTITY	M***R***	
449-EE	COMPOUND INGREDIENT DRUG COST	N***R***	Prior Authorization Request Only (Claim): Not used.
490-UE	COMPOUND INGREDIENT BASIS OF COST DETERMINATION	N***R***	Prior Authorization Request Only (Claim): Not used.
362-2G	COMPOUND INGREDIENT MODIFIER CODE COUNT	Q	Prior Authorization Request Only (Claim): Required when Compound Ingredient Modifier Code (363-2H) is sent. Maximum count of 10.
363-2H	COMPOUND INGREDIENT MODIFIER CODE	Q***R***	Prior Authorization Request Only (Claim): Required if necessary for state/federal/regulatory agency programs.

Notes on Compound Segment on a Prior Authorization Request Only Request:

The Compound Segment is situational for a Prior Authorization Request Only request. It is used for multi-ingredient prescriptions, when each ingredient is reported in a Prior Authorization Request Only.

The Compound Segment is not used in when the Prior Authorization Request is for a service (Prescription/Service Reference Number Qualifier (455-EM) = "2" (Service Billing)).

19.2.10 CLINICAL SEGMENT (PRIOR AUTHORIZATION REQUEST ONLY)

CLINICAL SEGMENT		SITUATIONAL SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
491-VE	DIAGNOSIS CODE COUNT	Q	Prior Authorization Request Only (Claim/Service): Maximum count of 5. Required if Diagnosis Code Qualifier (492-WE) and Diagnosis Code (424-DO) are used.
492-WE	DIAGNOSIS CODE QUALIFIER	Q***R***	Prior Authorization Request Only (Claim/Service): Required if Diagnosis Code (424-DO) is used.
424-DO	DIAGNOSIS CODE	Q***R***	Prior Authorization Request Only (Claim/Service): The value for this field is obtained from the prescriber or authorized representative. Required if this field could result in different coverage, pricing, patient financial responsibility, and/or drug utilization review outcome. Required if this field affects payment for professional pharmacy service. Required if this information can be used in place of prior authorization. Required if necessary for state/federal/regulatory agency programs.
493-XE	CLINICAL INFORMATION COUNTER	Q***R***	Prior Authorization Request Only (Claim/Service): Maximum of 5 occurrences supported. Grouped with Measurement fields (Measurement Date (494-ZE), Measurement Time (495-H1), Measurement Dimension (496-H2), Measurement Unit (497-H3), Measurement Value (499-H4)).
494-ZE	MEASUREMENT DATE	Q***R***	Prior Authorization Request Only (Claim/Service): Required if necessary when this field could result in different coverage and/or drug utilization review outcome.
495-H1	MEASUREMENT TIME	Q***R***	Prior Authorization Request Only (Claim/Service): Required if Time is known or has impact on measurement. Required if necessary when this field could result in different coverage and/or drug utilization review outcome and is a requirement for authorization.
496-H2	MEASUREMENT DIMENSION	Q***R***	Prior Authorization Request Only (Claim/Service): Required if Measurement Unit (497-H3) and Measurement Value (499-H4) are used. Required if necessary when this field could result in different coverage and/or drug utilization review outcome and is a requirement for authorization. Required if necessary for patient's weight and height when billing Medicare for a claim that includes a Certificate of Medical Necessity (CMN).
497-H3	MEASUREMENT UNIT	Q***R***	Prior Authorization Request Only (Claim/Service): Required if Measurement Dimension (496-H2) and Measurement Value (499-H4) are used. Required if necessary for patient's weight and height when billing Medicare for a claim that includes a Certificate of Medical Necessity (CMN). Required if necessary when this field could result in different coverage and/or drug utilization review outcome and is a requirement for authorization.
499-H4	MEASUREMENT VALUE	Q***R***	Prior Authorization Request Only (Claim/Service): Required if Measurement Dimension (496-H2) and Measurement Unit (497-H3) are used. Required if necessary for patient's weight and height when billing Medicare for a claim that includes a Certificate of Medical Necessity (CMN). Required if necessary when this field could result in different coverage and/or drug utilization review outcome and is a requirement for authorization.

19.3.1.2.2 RESPONSE MESSAGE SEGMENT (PRIOR AUTHORIZATION REQUEST ONLY) (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

RESPONSE MESSAGE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Prior Authorization Request Only (Claim/Service): Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Prior Authorization Request Only Response:

The Response Message Segment is situational for a Prior Authorization Request Only response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved). It is used when additional text information needs to be sent.

19.3.1.2.3 RESPONSE PATIENT SEGMENT (PRIOR AUTHORIZATION REQUEST ONLY) (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

RESPONSE PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
618-RR	PATIENT ID COUNT	Q	Prior Authorization Request Only (Claim/Service): Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.
331-CX	PATIENT ID QUALIFIER	Q***R***	Prior Authorization Request Only (Claim/Service):: Required if Patient ID (332-CY) is used.
332-CY	PATIENT ID	Q***R***	Prior Authorization Request Only (Claim/Service): Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.
310-CA	PATIENT FIRST NAME	Q	Prior Authorization Request Only (Claim/Service): Required if known.
311-CB	PATIENT LAST NAME	Q	Prior Authorization Request Only (Claim/Service): Required if known.
304-C4	DATE OF BIRTH	Q	Prior Authorization Request Only (Claim/Service): Required if known.

Notes on Response Patient Segment on a Prior Authorization Request Only Response:

The Response Patient Segment is situational for Prior Authorization Request Only transmission response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved) when patient demographic information needs to be sent from the sender to the receiver.

19.3.1.2.4 RESPONSE STATUS SEGMENT (PRIOR AUTHORIZATION REQUEST ONLY) (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	N	Prior Authorization Request Only (Claim/Service): Not used.
B98-34	RECONCILIATION ID	N	Prior Authorization Request Only (Claim/Service): Not used.
510-FA	REJECT COUNT	N	Prior Authorization Request Only (Claim/Service): Not used.

143-UW	OTHER PAYER PATIENT RELATIONSHIP CODE	Q***R***	Prior Authorization Request Only (Claim/Service): Required if needed to uniquely identify the relationship of the patient to the cardholder ID, as assigned by the other payer.
144-UX	OTHER PAYER BENEFIT EFFECTIVE DATE	Q***R***	Prior Authorization Request Only (Claim/Service): Required when other coverage is known which will become effective after the Date of Service submitted. Other Payer Benefit Effective Date would not be returned for coverage

Version F6

January 2020

OFFICIAL RELEASE

RESPONSE OTHER PAYERS SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			that is current as of the claim date of service. This allows the receiver to identify other coverage that needs to be billed or stored for future use.
145-UY	OTHER PAYER BENEFIT TERMINATION DATE	Q***R***	Prior Authorization Request Only (Claim/Service): Required when other coverage termination date is known which is after the Date of Service submitted. If the termination date is not known this field would not be returned.
D23-M5	OTHER PAYER NAME	Q***R***	Prior Authorization Request Only (Claim/Service): Required if the data is available.

Notes on Response Other Payers Segment on a Prior Authorization Request Only Response:

The Response Other Payers Segment is situational for a Prior Authorization Request Only response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved) when other insurance information is available.

19.3.1.2.9 RESPONSE PROVIDER SEGMENT (PRIOR AUTHORIZATION REQUEST ONLY) (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Request Only (Claim/Service): Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Request Only (Claim/Service): Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Prior Authorization Request Only Response:

The Response Provider Segment is situational for a Prior Authorization Request Only response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

19.3.2 TRANSMISSION ACCEPTED/TRANSACTION CAPTURED

Prior Authorization Request Only transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured)

It is possible that the receiver has not completed processing of the Prior Authorization Request Only, and will respond that the request is still pending, using the "C" (Captured) or "Q" (Duplicate of Captured).

See section "Transaction Response Status", "Duplicate Transactions" for the handling of a duplicate transaction.

RESPONSE DUR/PPS SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Required when DUR/DUE conflict indicates a dosing threshold has not been met and minimum dose information is available.
F09-YI	DUR/DUE MINIMUM DAILY DOSE UNIT OF MEASURE	Q***R***	Prior Authorization Request Only (Claim/Service): Required when DUR/DUE conflict indicates a dosing threshold has not been met and minimum dose information is available.
544-FY	DUR/DUE FREE TEXT MESSAGE	Q***R***	Prior Authorization Request Only (Claim/Service): Required if needed to supply additional information for the Reason for Service Code (439-E4).

Notes on Response DUR/PPS Segment on a Prior Authorization Request Only Response:

The Response DUR/PPS Segment is situational for a Prior Authorization Request Only response when for Header Response Status (501-F1) = "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). The Response DUR/PPS Segment identifies a drug utilization review or professional pharmacy service event, opportunity, or information.

19.3.2.2.7 RESPONSE PROVIDER SEGMENT (PRIOR AUTHORIZATION REQUEST ONLY) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Request Only (Claim/Service): Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Request Only (Claim/Service): Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Prior Authorization Request Only Response:

The Response Provider Segment is situational for a Prior Authorization Request Only response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

RESPONSE DUR/PPS SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Required when DUR/DUE conflict indicates a dosing threshold has not been met and minimum dose information is available.
544-FY	DUR/DUE FREE TEXT MESSAGE	Q***R***	Prior Authorization Request Only (Claim/Service): Required if needed to supply additional information for the Reason for Service Code (439-E4).

Notes on Response DUR/PPS Segment on a Prior Authorization Request Only Response:

The Response DUR/PPS Segment is situational for a Prior Authorization Request Only response when for Header Response Status (501-F1) = "A" (Accepted) and Transaction Response Status (112-AN) of "F" (Deferred). The Response DUR/PPS Segment identifies a drug utilization review or professional pharmacy service event, opportunity, or information.

19.3.3.2.7 RESPONSE PRIOR AUTHORIZATION SEGMENT (PRIOR AUTHORIZATION REQUEST ONLY) (TRANSMISSION ACCEPTED/TRANSACTION DEFERRED)

RESPONSE PRIOR AUTHORIZATION SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
498-PR	PRIOR AUTHORIZATION PROCESSED DATE	Q	Prior Authorization Request Only (Claim/Service): Required if the receiver's system assigns the number.
498-PS	PRIOR AUTHORIZATION EFFECTIVE DATE	N	Prior Authorization Request Only (Claim/Service): Not used.
498-PT	PRIOR AUTHORIZATION EXPIRATION DATE	N	Prior Authorization Request Only (Claim/Service): Not used.
498-RA	PRIOR AUTHORIZATION QUANTITY	N	Prior Authorization Request Only (Claim/Service): Not used.
498-RB	PRIOR AUTHORIZATION DOLLARS AUTHORIZED	N	Prior Authorization Request Only (Claim/Service): Not used.
498-PW	PRIOR AUTHORIZATION NUMBER OF REFILLS AUTHORIZED	N	Prior Authorization Request Only (Claim/Service): Not used.
498-PX	PRIOR AUTHORIZATION QUANTITY ACCUMULATED	N	Prior Authorization Request Only (Claim/Service): Not used.
498-PY	PRIOR AUTHORIZATION ID ASSIGNED	Q	Prior Authorization Request Only (Claim/Service): Required if the receiver's system assigns the ID

Notes on Response Prior Authorization Segment on a Prior Authorization Request Only Response:

The Response Prior Authorization Segment is situational on a Prior Authorization Request only response when the Header Response Status (501-F1) is "A" (Accepted) and the Transaction Response Status (112-AN) is "F" (Deferred).

19.3.3.2.8 RESPONSE PROVIDER SEGMENT (PRIOR AUTHORIZATION REQUEST ONLY) (TRANSMISSION ACCEPTED/TRANSACTION DEFERRED)

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Request Only (Claim/Service): Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Request Only (Claim/Service): Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Prior Authorization Request Only Response:

The Response Provider Segment is situational for a Prior Authorization Request Only response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "F" (Deferred). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

19.3.4 TRANSMISSION ACCEPTED/TRANSACTION REJECTED

19.3.4.2 PRIOR AUTHORIZATION REQUEST ONLY RESPONSE SEGMENTS (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

19.3.4.2.1 RESPONSE HEADER SEGMENT (PRIOR AUTHORIZATION REQUEST ONLY) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE HEADER SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on a Prior Authorization Request Only Response:

The Response Header Segment is a mandatory, fixed length segment for Prior Authorization Request Only when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). The "Situation" column is not applicable.

19.3.4.2.2 RESPONSE MESSAGE SEGMENT (PRIOR AUTHORIZATION REQUEST ONLY) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE MESSAGE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Prior Authorization Request Only (Claim/Service): Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on a Prior Authorization Request Only Response:

The Response Message Segment is situational for Prior Authorization Request Only when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). It is used when additional text information needs to be sent.

19.3.4.2.3 RESPONSE PATIENT SEGMENT (PRIOR AUTHORIZATION REQUEST ONLY) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT	
Field	Field Name		Situation	
111-AM	SEGMENT IDENTIFICATION	M		
618-RR	PATIENT ID COUNT	Q	Prior Authorization Request Only (Claim/Service): Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.	
331-CX	PATIENT ID QUALIFIER	Q***R***	Prior Authorization Request Only (Claim/Service):: Required if Patient ID (332-CY) is used.	
332-CY	PATIENT ID	Q***R***	Prior Authorization Request Only (Claim/Service): Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.	
310-CA	PATIENT FIRST NAME	Q	Prior Authorization Request Only (Claim/Service): Required if known.	
311-CB	PATIENT LAST NAME	Q	Prior Authorization Request Only (Claim/Service): Required if known.	
304-C4	DATE OF BIRTH	Q	Prior Authorization Request Only (Claim/Service):Required if known.	

Notes on Response Patient Segment on a Prior Authorization Request Only Response:

The Response Patient Segment is situational for Prior Authorization Request Only transmission response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected) when patient demographic information needs to be sent from the sender to the receiver.

19.3.4.2.4 RESPONSE STATUS SEGMENT (PRIOR AUTHORIZATION REQUEST ONLY) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT	
Field	Field Name		Situation	
111-AM	SEGMENT IDENTIFICATION	M		
112-AN	TRANSACTION RESPONSE STATUS	M		
503-F3	AUTHORIZATION NUMBER	Q	Prior Authorization Request Only (Claim/Service): Required if needed to identify the transaction.	
B98-34	RECONCILIATION ID	N	Prior Authorization Request Only (Claim/Service): Not used.	
510-FA	REJECT COUNT	R	Prior Authorization Request Only (Claim/Service): Maximum count of 5. Required.	
511-FB	REJECT CODE	R***R***	Prior Authorization Request Only (Claim/Service): Required.	
546-4F	REJECT FIELD OCCURRENCE INDICATOR	Q***R***	Prior Authorization Request Only (Claim/Service): Required if a repeating field is in error, to identify repeating field occurrence. This field must be sent when relaying error information about a repeating field or set. Note, if the Reject Code is not denoting a repeating field or set, the Reject Field Occurrence Indicator must not be sent.	
547-5F	APPROVED MESSAGE CODE COUNT	N	Prior Authorization Request Only (Claim/Service): Not used.	
548-6F	APPROVED MESSAGE CODE	N***R***	Prior Authorization Request Only (Claim/Service): Not used.	
130-UF	ADDITIONAL MESSAGE INFORMATION COUNT	Q	Prior Authorization Request Only (Claim/Service): Maximum count of 25. Required if Additional Message Information (526-FQ) is used.

142-UV	OTHER PAYER PERSON CODE	Q***R***	Prior Authorization Request Only (Claim/Service): Required if needed to uniquely identify the family members within the Cardholder ID, as assigned by the other payer.
127-UB	OTHER PAYER HELP DESK TELEPHONE NUMBER	Q***R***	Prior Authorization Request Only (Claim/Service): Required if needed to provide a support telephone number of the other payer to the receiver.
B23-7Q	OTHER PAYER HELP DESK TELEPHONE NUMBER EXTENSION	Q***R***	Prior Authorization Request Only (Claim/Service): Required if needed to provide a support telephone number extension of the other payer to the receiver.
143-UW	OTHER PAYER PATIENT RELATIONSHIP CODE	Q***R***	Prior Authorization Request Only (Claim/Service): Required if needed to uniquely identify the relationship of the patient to the cardholder ID, as assigned by the other payer.
144-UX	OTHER PAYER BENEFIT EFFECTIVE DATE	Q***R***	Prior Authorization Request Only (Claim/Service): Required when other coverage is known which will become effective after the Date of Service submitted. Other Payer Benefit Effective Date would not be returned for coverage that is current as of the claim date of service. This allows the receiver to identify other coverage that needs to be billed or stored for future use.
145-UY	OTHER PAYER BENEFIT TERMINATION DATE	Q***R***	Prior Authorization Request Only (Claim/Service): Required when other coverage termination date is known which is after the Date of Service submitted. If the termination date is not known this field would not be returned.
D23-M5	OTHER PAYER NAME	Q***R***	Prior Authorization Request Only (Claim/Service): Required if the data is available.

Notes on Response Other Payers Segment on a Prior Authorization Request Only Response:

The Response Other Payers Segment is situational for a Prior Authorization Request Only response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected) when other insurance information is available.

The following outlines different rejected claim scenarios and the use of the Response Other Payers Segment.

1. Non-Matched: If the identity of the patient cannot be validated and the Claim Billing or Encounter is rejected due to a non-match of field verification, then the Other Payer information is not sent.
2. COB Sequence: If the claim is rejected because it should be submitted to other payer(s) first, that Other Payer information must be sent, if available.
3. Change in 4RX (Change in Coverage): If the identity of the patient is verified and the Claim Billing or Encounter is rejected due to known alternate 4RX data required for claims processing, then the alternate 4RX data is returned as Other Payer information.
4. Plan Exclusion Alternate 4RX (Mutually Exclusive): If the claim is rejected due to plan benefit exclusions, then Other Payer information must be sent, if available.

19.3.4.2.8 RESPONSE PROVIDER SEGMENT (PRIOR AUTHORIZATION REQUEST ONLY) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE PROVIDER SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
E87-ZV	DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Request Only (Claim/Service): Returned when a provider conflict has been identified from an available authoritative data source.
E88-ZZ	STATE CODE FOR DATA SOURCE OF INVALID PROVIDER DETERMINATION	Q	Prior Authorization Request Only (Claim/Service): Required when the Data Source Of Invalid Provider Determination (E87-ZV) is state specific.

Notes on Response Provider Segment on a Prior Authorization Request Only Response:

The Response Provider Segment is situational for a Prior Authorization Request Only response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). The segment is used to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid.

19.3.5 TRANSMISSION REJECTED/TRANSACTION REJECTED RESPONSE

Prior Authorization Request Only transmission response Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected)

20 PRIOR AUTHORIZATION TRANSACTION DISCUSSION

The Prior Authorization transactions have been created to allow a Processor to authorize, authorize and immediately adjudicate the claim or service, defer, or pend the request for review.

Prior Authorization before dispensing prescriptions may be required for (but not limited to) medical exceptions, drug overrides or limitations, or dosage limitations.

20.1 TRANSACTION USAGE

20.1.1 PRIOR AUTHORIZATION REQUEST AND BILLING

The pharmacy submits a Prior Authorization Request And Billing to receive approval for the Prior Authorization and to receive payment information. If the processor responds that the Prior Authorization Request And Billing is "P" (Paid) or "D" (Duplicate of Paid), the response will include a Prior Authorization ID Assigned (498-PY), other pertinent information in the Response Prior Authorization Segment, and payment information in the Response Pricing Segment. As with the B1 transaction, the "P" or "D" response requires the processor to provide a Reconciliation ID (B98-34).

When a Prior Authorization Request And Billing receives a "C" (Captured) or "Q" (Duplicate of Capture) response the pharmacy system **will not** receive a Prior Authorization ID Assigned (498-PY). The pharmacy **must** receive an Authorization Number (503-F3) in the Response Status Segment to a "C" (Captured) or "Q" (Duplicate of Capture). As noted earlier in the discussion about a captured response to a P1 request, since the prior authorization has not been processed, the billing cannot proceed. For this reason, the Reconciliation ID (B98-34) is not used in this scenario.

The pharmacy system **may** receive a Prior Authorization ID Assigned (498-PY) with an "F" (Deferred) response, depending on the processor's requirements. The pharmacy **may** receive an Authorization Number (503-F3) with an "F" (Deferred) response, depending on the processor's requirements. On an "F" (Deferred), if the processor does not send a Prior Authorization ID Assigned (498-PY), the pharmacy will receive an Authorization Number (503-F3) in the response. Later, when the pharmacy inquires about the prior authorization by using a Prior Authorization Inquiry, the value from the original transaction (Response Status Segment Authorization Number (503-F3)) would be placed in the request field Authorization Number (503-F3) in the Prior Authorization Segment.

Chart 1

Prior Authorization Request And Billing					
Response	Prior Authorization ID Assigned (498-PY)	Authorization Number (503-F3)	Reconciliation ID (B98-34)	Response Prior Authorization Segment (Prior Authorization Information)	Response Pricing Segment (Payment Information)
P-Paid D- Duplicate Paid	Yes	Yes-if needed to identify the transaction	Yes – see B1 response guidance	Yes	Yes
C-Captured Q-Duplicate Captured	No	Yes	No	No	No
F-Deferred	Yes-if Authorization Number (503-F3) not sent	Yes-if Prior Authorization ID Assigned (498-PY) not sent	No	Yes-if the Prior Authorization ID Assigned (498-PY) is sent	No
R-Rejected	No	Processor Defined**	No	No	No

**Note: A processor may choose to return an Authorization Number (503-F3) on a Rejected response to track the transaction for troubleshooting, and customer service reasons. This use of the Authorization Number (503-F3) has no effect on the Prior Authorization, but is simply a way to track a transaction.

20.1.2 PRIOR AUTHORIZATION REQUEST ONLY

The pharmacy submits a Prior Authorization Request Only to receive approval for a prior authorization, without any payment information.

A pharmacy's Prior Authorization Request Only that is "A" (Approved) or "S" (Duplicate of Approved) must receive a response that includes a Prior Authorization ID Assigned (498-PY) and other information in the Response Prior Authorization Segment. The pharmacy will not receive any payment information. When/If the pharmacy submits a Claim or Service Billing, the value of the field Prior Authorization ID Assigned (498-PY) returned from the processor is placed in the Prior Authorization ID Submitted (462-EV) on the Claim or Service Billing transaction submission.

When a Prior Authorization Request Only receives a "C" (Captured) or "Q" (Duplicate of Capture) response, the pharmacy system **will not** receive a Prior Authorization ID Assigned (498-PY) as the Response Prior Authorization Segment is not used. The pharmacy **must** receive an Authorization Number (503-F3) in the Response Status Segment to a "C" (Captured) or "Q" (Duplicate of Capture).

The pharmacy system **may** receive a Prior Authorization ID Assigned (498-PY) with an "F" (Deferred) response, depending on the processor's requirements. On an "F" (Deferred) response, if the processor does not send a Prior Authorization ID Assigned (498-PY), the pharmacy **will** receive an Authorization Number (503-F3) in the response. Later, when the pharmacy inquires about the prior authorization by using a Prior Authorization Inquiry, the value from the original transaction (Response Status Segment, Authorization Number (503-F3)) would be placed in the request field Authorization Number (503-F3) in the Prior Authorization Segment.

Chart 2

Prior Authorization Request Only					
Response	PA ID Assigned (498-PY)	Authorization Number (503-F3)	Reconciliation ID (B98-34)	Response Prior Authorization Segment (Prior Authorization Information)	Response Pricing Segment (Payment Information)
A-Approved S-Duplicate Approved	Yes	No	No	Yes	No
C-Captured Q-Duplicate Captured	No	Yes	No	No	No
F-Deferred	Processor Defined	Yes-if Prior Authorization ID Assigned (498-PY) not sent	No	Yes	No
R-Rejected	No	Processor Defined**	No	No	No

**Note: A processor may choose to return an Authorization Number (503-F3) on a Rejected response to track the transaction for troubleshooting, customer service reasons. This use of the Authorization Number (503-F3) has no effect on the Prior Authorization, but is simply a way to track a transaction.

20.1.3 PRIOR AUTHORIZATION INQUIRY

The pharmacy submits a Prior Authorization Inquiry to receive a status on a *previously submitted Prior Authorization Request And Billing* or a *previously submitted Prior Authorization Request Only*. A Prior Authorization Inquiry is submitted for a previously submitted Prior Authorization Request And Billing or Prior Authorization Request Only that was "C" (Captured).

The Prior Authorization Inquiry transaction supports multiple responses, but the responses are actually tied back to the originally requested transaction. The originally requested transaction is either a Prior Authorization Request And Billing or a Prior Authorization Request Only. The valid responses are the values applicable to either of those transactions.

If the initial request was a Prior Authorization Request And Billing that was not "P" (Paid) or "R" (Rejected) initially (meaning follow up was required) or a time out situation occurred, the subsequent Prior Authorization Inquiry **must** receive a response that was acceptable for the initial Prior Authorization Request & Billing – "P" (Paid), "C" (Captured), "F" (Deferred), or "R" (Rejected).

Chart 3

Fields Sent By a Pharmacy in a Prior Authorization Inquiry Based on the Response to the original Prior Authorization Request And Billing		
Original Response on the Prior Authorization Request And Billing	Prior Authorization ID Assigned (498-PY) in Prior Authorization Segment	Authorization Number (503-F3) in Prior Authorization Segment
P-Paid	Yes	Yes-if sent by processor
C-Captured	No	Yes
F-Deferred	Yes-if sent by processor	Yes-if sent by processor
R-Rejected Not applicable. There is no inquiry on a rejected PA Request and Billing		

Chart 4

Response to Chart 3.

Fields Returned by the Processor in a Prior Authorization Inquiry Response Based on the original Prior Authorization Request And Billing			
Processor Response	Prior Authorization ID Assigned (498-PY)	Authorization Number (503-F3)	Reconciliation ID (B98-34)
P-Paid or D-Duplicate of Paid	Yes	Yes—if needed to identify the transaction	Yes per B1 guidance
C-Captured or Q-Duplicate of Capture	No-unless the status of the original request has changed. Please see response according to result of adjudication of original request	Yes	No
F-Deferred	Processor Defined	Yes-if Prior Authorization ID Assigned (498-PY) not sent	No
R- Reject	No	Processor Defined**	No

**Note: A processor may choose to return an Authorization Number (503-F3) on a Rejected response to track the transaction for troubleshooting, and customer service reasons. This use of the Authorization Number (503-F3) has no effect on the Prior Authorization, but is simply a way to track a transaction.

If the initial request was a Prior Authorization Request Only that was not approved or rejected initially (meaning follow up was required) or a time out situation occurred, the subsequent Prior Authorization Inquiry receives a response that was acceptable for the initial Prior Authorization Request Only – "A" (Approved), "C" (Captured), "F" (Deferred), or "R" (Rejected).

Chart 5

Fields Sent in by Pharmacy in a Prior Authorization Inquiry Based on the Response to an original Prior Authorization Request Only		
Original Response on the Prior Authorization Request Only	Prior Authorization ID Assigned (498-PY)	Authorization Number (503-F3)
A-Approved	Yes	No
C-Captured	No	Yes
F-Deferred	Yes-if sent by processor	Yes-if sent by processor
R-Rejected Not applicable. There is no inquiry on a rejected PA Request and Billing		

Chart 6

Response to Chart 5.

Fields Returned by the Processor in a Prior Authorization Inquiry Response Based on the original Prior Authorization Request Only			
Processor Response	Prior Authorization ID Assigned (498-PY)	Authorization Number (503-F3)	Reconciliation ID (B98-34)
A-Approved	Yes	No	No
C-Captured	No-unless the status of the original request has changed. Please see response according to result of adjudication of original request	Yes	No
F-Deferred	Processor Defined	Yes-if Prior Authorization ID Assigned (498-PY) not sent	No
R-Rejected	No	Processor defined**	No

**Note: A processor may choose to return an Authorization Number (503-F3) on a Rejected response to track the transaction for troubleshooting, customer service reasons. This use of the Authorization Number (503-F3) has no effect on the Prior Authorization, but is simply a way to track a transaction.

20.1.4 PRIOR AUTHORIZATION REVERSAL

The **Prior Authorization Reversal** is used to **back out the request for authorization, but not any claims submitted against the prior authorization**. To reverse a Prior Authorization Request And Billing, paid billings are to be reversed before the prior authorization is reversed. The pharmacy must submit a Claim or Service Reversal (Transaction Code = "B2" or "S2") before submitting a Prior Authorization Reversal request. If there are no Claims or Services paid for the Prior Authorization in question, the processor must accept the Prior Authorization Reversal for the prior authorization only.

The pharmacy would submit the Prior Authorization ID Assigned (498-PY) in the Prior Authorization Reversal for those transactions with original responses of "P" (Paid) or "A" (Approved) and the Authorization Number (503-F3) for those transactions with an original response of "C" (Captured). The Reconciliation ID (B98-34) is not used for either the Prior Authorization Reversal Request or Response.

20.2 FIELD CLARIFICATION

20.2.1 PRIOR AUTHORIZATION FIELDS

The Prior Authorization Type Code (461-EU) defines the type of authorization being requested.

The Prior Authorization ID Submitted (462-EV) contains the value assigned to the authorization. Note: When/If the pharmacy submits a **Claim or Service Billing**, the value of the field Prior Authorization ID Assigned (498-PY) **from the processor's response** is placed in the Prior Authorization ID Submitted (462-EV) on the **Claim or Service Billing** transaction submission.

The Prior Authorization ID Assigned (498-PY) is used to communicate to the provider the Prior Authorization ID assigned by the processor. This field is returned as part of the Prior Authorization Response Segment.

In addition, when performing a Prior Authorization Reversal (Transaction Code P2), this field contains the Prior Authorization ID the provider is reversing. This field would be populated when reversing transaction with original responses of "P" (Paid) or "A" (Approved).

20.2.2 PRIOR AUTHORIZATION ID ASSIGNED (498-PY) IN RESPONSE PRIOR AUTHORIZATION SEGMENT) AND AUTHORIZATION NUMBER (503-F3) IN RESPONSE STATUS SEGMENT

This section explains the usage of Prior Authorization ID Assigned (498-PY) in the response returned by the processor, in a prior authorization situation.

For a Prior Authorization Request And Billing

The processor must return a Prior Authorization ID Assigned (498-PY) in a "P" (Paid) or "D" (Duplicate of Paid) response.

For a Prior Authorization Request Only

The processor must return a Prior Authorization ID Assigned (498-PY) in an "A" (Approved) or "S" (Duplicate of Approved) response.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

- 585 -

For a Prior Authorization Request And Billing AND a Prior Authorization Request Only

The processor **must** return an Authorization Number (503-F3) in a “C” (Capture) or “Q” (Duplicate of Capture) response and **not** return a Prior Authorization ID Assigned (498-PY). (The Response Prior Authorization Segment is not used in a Prior Authorization Request Only transaction.) The Authorization Number (503-F3) is used in a Prior Authorization Inquiry transaction to ask for the status of the prior authorization.

Some processors may return a Prior Authorization ID Assigned (498-PY) in an “F” (Deferred) response. If Prior Authorization ID Assigned (498-PY) is not returned, then Authorization Number (503-F3) must be returned.

Note: When/If the pharmacy submits a subsequent claim or service billing, the value of the field Prior Authorization ID Assigned (498-PY) is placed in the Prior Authorization ID Submitted (462-EV) on the Claim or Service Billing transaction.

For a Prior Authorization Inquiry Only

Use the guidelines above depending on whether the initial transaction was a Prior Authorization Request And Billing, or a Prior Authorization Request Only.

A Prior Authorization Inquiry must be sent with a Prior Authorization ID Assigned (498-PY) or Authorization Number (503-F3).

20.2.3 AUTHORIZATION NUMBER (503-F3) IN PRIOR AUTHORIZATION SEGMENT

This section explains the usage of Authorization Number (503-F3) in the request submitted by the pharmacy, in a prior authorization situation.

For a Prior Authorization Request And Billing AND a Prior Authorization Request Only

The Authorization Number (503-F3) is not used for submission of a Prior Authorization Request And Billing OR a Prior Authorization Request Only.

For a Prior Authorization Inquiry Only

The Authorization Number (503-F3) would be submitted in a Prior Authorization Inquiry Only when the pharmacy was seeking a status for a previously sent Prior Authorization Request And Billing or Prior Authorization Request Only that received a “C” (Capture) or “Q” (Duplicate of Capture) response or a “F” (Deferred) response where the Prior Authorization ID Assigned (498-PY) was not returned.

For a Prior Authorization Reversal

The Authorization Number (503-F3) is supported in a submission of a Prior Authorization Reversal for “C” (Capture) responses only.

20.2.4 PRIOR AUTHORIZATION ID SUBMITTED (462-EV) IN CLAIM SEGMENT

This field is used only in transaction activities for claims and services associated with an approved Prior Authorization request. It is **NOT** used in a Prior Authorization Request And Billing or a Prior Authorization Request Only since the pharmacy is only seeking an approval.

When the pharmacy submits a Claim or Service Billing for which a Prior Authorization ID Assigned (498-PY) was returned, the Prior Authorization ID Submitted (462-EV) must be submitted with the transaction in the Claim Segment if the processor requires the Prior Authorization ID to be submitted.

The Prior Authorization ID Submitted (462-EV) on the claim or service billing must contain the value from the Prior Authorization ID Assigned (498-PY) in the Response Prior Authorization Segment that was returned from the processor in the Prior Authorization Request And Billing OR the Prior Authorization Request Only. The Prior Authorization ID Assigned (498-PY) would have been returned with a “P” (Paid) or “D” (Duplicate of Paid) response or with an “A” (Approved) or “S” (Duplicate of Approved) response.

20.3 SCENARIO EXAMPLES

The following illustrates a couple of the transaction scenarios discussed above, shown in tabular format. Treat each as a completely separate case.

20.3.1 PRIOR AUTHORIZATION REQUEST AND BILLING RESPONSES

The pharmacy requests a Prior Authorization Request And Billing (seeking approval and payment information). The following choice of responses would be sent by the processor.

- The processor responds with a “P” (Paid) or “D” (Duplicate of Paid) response. The payment information is included in the Response Pricing Segment. The Prior Authorization ID Assigned (498-PY) and pertinent prior authorization information is returned in the Response Prior Authorization Segment. Any time a “P” or “D” response status is provided, Reconciliation ID (B98-34) is required. See B1 transaction response for guidance.

Or

- The processor responds with a “C” (Captured) or “Q” (Duplicate of Capture) response. The processor is still evaluating the prior authorization. The processor includes an Authorization Number (503-F3) in the response. The pharmacy will later submit a Prior Authorization Inquiry with the Authorization Number (503-F3) in the Prior Authorization Segment. Reconciliation ID (B98-34) is not used.

Or

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

- 586 -

- The processor responds with a “F” (Deferred) response that includes a Prior Authorization ID Assigned (498-PY) or an Authorization Number (503-F3). The pharmacy should consult the processor’s provider manual for further information. Reconciliation ID (B98-34) is not used.
- Or
- The processor responds with a “R” (Rejected) response, the pharmacy must examine the reject codes and messages. The transaction may include missing/invalid information, or the processor may be denying the Prior Authorization Request And Billing.

20.3.1.1 SCENARIOS FOR PRIOR AUTHORIZATION REQUEST AND BILLING

1. The pharmacy requests a Prior Authorization Request And Billing (seeking approval and payment information).
The processor responds with a “C” (Captured) or “Q” (Duplicate of Capture) response that includes an Authorization Number (503-F3).
The pharmacy later submits a Prior Authorization Inquiry with the Authorization Number (503-F3) in the Prior Authorization Segment.
The processor has completed its evaluation of the original request and responds with a “P” (Paid) or “D” (Duplicate of Paid) response. The payment information is included in the Response Pricing Segment. The Prior Authorization ID Assigned (498-PY) and pertinent prior authorization information are returned in the Response Prior Authorization Segment.

Or

 - The processor responds with a “C” (Captured) or “Q” (Duplicate of Capture) response. The processor is still evaluating the prior authorization. The pharmacy will later submit another Prior Authorization Inquiry with the Authorization Number (503-F3) in the Prior Authorization Segment.
If the processor responds with another “C” (Captured) (or “Q” (Duplicate of Capture)) response, the same Authorization Number (503-F3) as the original would be returned to the pharmacy. The processor must not return a new Authorization Number (503-F3).

Or

 - The processor has completed its evaluation of the original request and responds with an “F” (Deferred) response that includes a Prior Authorization ID Assigned (498-PY) or an Authorization Number (503-F3). The pharmacy should consult the processor’s provider manual for further information.

Or

 - The processor has completed its evaluation of the original request and responds with an “R” (Rejected) response. The pharmacy must examine the reject codes and messages. The transaction may include missing/invalid information, or the processor may be denying the original Prior Authorization Request And Billing.
2. The pharmacy submits a Prior Authorization Request And Billing (seeking approval and payment information).
The processor responds with a “P” (Paid) or “D” (Duplicate of Paid). The payment information is included in the Response Pricing Segment. The Prior Authorization ID Assigned (498-PY) and pertinent prior authorization information is returned in the Response Prior Authorization Segment.
To reverse the claim or service billing, the pharmacy submits a Claim or Service Reversal.
The processor responds with an “A” (Approved) or “S” (Duplicate of Approved) and backs out the payment.
To reverse the prior authorization, the pharmacy submits a Prior Authorization Reversal with the Prior Authorization ID Submitted (462-EV) in the Claim Segment.
The processor responds with an “A” (Approved) or “S” (Duplicate of Approved) and backs out the authorization only.
***Note** if claim reversal has not been initiated by the pharmacy, the Prior Authorization Reversal request would receive an “R” (Rejected) response by the processor. The pharmacy must reverse the paid billings before requesting a prior authorization reversal.
3. The pharmacy submits a Prior Authorization Request And Billing (seeking approval and payment information).
The processor responds with a “P” (Paid). The payment information is included in the Response Pricing Segment. The Prior Authorization ID Assigned (498-PY) and pertinent prior authorization information is returned in the Response Prior Authorization Segment. However, a timeout occurs and the pharmacy does not receive the prior authorization/payment response.
The pharmacy must submit the same Prior Authorization Request And Billing transaction. (The pharmacy did not receive an Authorization Number (503-F3) since there was a timeout and therefore cannot send a Prior Authorization Inquiry to learn the status.)

20.3.2 PRIOR AUTHORIZATION REQUEST ONLY RESPONSES

The pharmacy requests a Prior Authorization Request Only (seeking approval, no payment information). The following choice of responses would be sent by the processor.

- The processor responds with an “A” (Approved) or “S” (Duplicate of Approved) response, with a Prior Authorization ID Assigned (498-PY) given.
Note: When/If the pharmacy submits a claim or service billing, the value of the field Prior Authorization ID Assigned (498-PY) returned from the processor is placed in the Prior Authorization ID Submitted (462-EV) on the claim or service billing transaction submission.
- Or
- The processor responds with a “C” (Captured) or “Q” (Duplicate of Capture) response. Note, the Prior Authorization ID Assigned (498-PY) is not returned (this field is not applicable in a capture). The Authorization Number (503-F3) is returned by the processor.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

- Or
- The processor responds with a “F” (Deferred) response that includes a Prior Authorization ID Assigned (498-PY) or an Authorization Number (503-F3). The pharmacy should consult the processor’s provider manual for further information.
- Or
- The processor responds with a “R” (Rejected) response, the pharmacy must examine the reject codes and messages. The transaction may include missing/invalid information, or the processor may be denying the Prior Authorization Request Only.

20.3.2.1 SCENARIOS FOR PRIOR AUTHORIZATION REQUEST ONLY

1. The pharmacy submits a Prior Authorization Request Only (only seeking approval, not payment information).
The processor responds with an “A” (Approved) or “S” (Duplicate of Approved) response, with a Prior Authorization ID Assigned (498-PY) given. However, a timeout occurs and the pharmacy does not receive the prior authorization response. The pharmacy must submit the same Prior Authorization Request Only transaction. (The pharmacy did not receive an Authorization Number (503-F3) since there was a timeout and therefore cannot send a Prior Authorization Inquiry to learn the status.)
2. The pharmacy submits a Prior Authorization Request Only (only seeking approval, not payment information).
The processor responds with a “C” (Captured) or “Q” (Duplicate of Capture) response. Note, the Prior Authorization ID Assigned (498-PY) is not returned (this field is not applicable in a capture). The Authorization Number (503-F3) is returned. The pharmacy later submits a Prior Authorization Inquiry with the Authorization Number (503-F3).
The processor has completed its evaluation of the original request and responds with an “A” (Approved) or “S” (Duplicate of Approved) response. The Prior Authorization ID Assigned (498-PY) along with other important information is returned.
Or
The processor responds with a “C” (Captured) or “Q” (Duplicate of Capture) response. The processor is still evaluating the prior authorization. The pharmacy will later submit another Prior Authorization Inquiry with the Authorization Number (503-F3). The same Authorization Number as the original would be returned to the pharmacy. The processor must not return a new Authorization Number (503-F3).
Or
The processor has completed its evaluation of the original request and responds with an “F” (Deferred) response that includes a Prior Authorization ID Assigned (498-PY) or an Authorization Number (503-F3). The pharmacy should consult the processor’s provider manual for further information.
Or
The processor has completed its evaluation of the original request and responds with an “R” (Rejected) response. The pharmacy must examine the reject codes and messages. The transaction may include missing/invalid information, or the processor may be denying the original Prior Authorization Request Only.
3. The pharmacy submits a Prior Authorization Request Only (only seeking approval, not payment information).
The processor responds with a “C” (Captured) or “Q” (Duplicate of Capture) response. Note, the Prior Authorization ID Assigned (498-PY) is not returned (this field is not applicable in a capture). The Authorization Number (503-F3) is returned. To reverse the prior authorization, the pharmacy submits a Prior Authorization Reversal with the Authorization Number (503-F3). This is to reverse the prior authorization only no paid billings have been made.
The processor responds with an “A” (Approved) or “S” (Duplicate of Approved) and backs out the Prior Authorization Request Only.

21 INFORMATION REPORTING INFORMATION

Information reporting transactions allow Processors or Reporting Entities to collect information about clinical and professional services unrelated to a dispensing event. Examples might include allergy status, or purchase of non-covered medications that have significance to the effectiveness of on-line prospective DUR (Drug Use Review), or a pharmacy reporting Section 340B status after providing service being required by trading partner agreement to alert the payer. For use of Information Reporting functionality for Medicare Part D Processing, see Appendix “Use Of Information Reporting (N1, N2, N3) Functionality For Medicare Part D Processing”. The Pricing Segment only supports the field Patient Pay Amount Reported (433-DX) that is used in Medicare Part D payer-to-payer facilitation. Otherwise, the Pricing Segment is not used. See “[Appendix E 340B Information Reporting Flow](#)”.

See section “[Appendix D. ORDUR \(Online Real-time Drug Utilization Review\)](#)” for DUR guidance.

These transactions include:

- Information Reporting
- Information Reporting Reversal
- Information Reporting Rebill

21.1 INFORMATION REPORTING

This transaction is used to report an event to the Processor or Reporting entity.

The Transaction Code is “N1”.

The Compound Segment is allowed to be used in retrospective 340B determination processing Information Reporting (Claim) only.

The Pricing Segment only supports the field Patient Pay Amount Reported (433-DX) that is used in Medicare Part D payer-to-payer facilitation. Otherwise, the Pricing Segment is not used.

Depending upon the particular claim or service reporting request, the Processor must provide one of the following general types of responses:

Approved – This occurs when the Processor acknowledges the receipt of the information only transaction and successfully processes the transaction. For Medicare Part D, this means that the PDP has updated the beneficiary’s TrOOP to reflect the transaction being reported.

Duplicate of Approved – This occurs when the Processor has previously received the request and processed the transaction, but the response did not return to the Originator. The Duplicate response contains the same information as returned in the original Approved scenario.

Captured – This occurs when the Processor acknowledges receipt of the information reporting transaction, but no judgment is made about the processing of the transaction. Captured responses are not allowed for Medicare Part D N1 transactions due to the real-time TrOOP update requirement.

Duplicate of Captured – This occurs when the Processor has previously received the request and processed the transaction, but the response did not return to the Originator. The Duplicate response contains the same information as returned in the original Captured scenario.

Rejected – This occurs when the Processor has encountered an error in the transaction or processing, or does not approve the information only transaction.

A captured response means the transaction was valid, but the downstream system makes no judgment about the processing of the transaction. An approved response means the system actually processed the data (stored the DUR, processed TrOOP, etc.).

An example of the difference can be found in Medicare Part D processing. An Information Reporting transaction would require the payer to receive a Claim/Service Billing transaction sometime before the Information Reporting transaction. While generally the processor would reject the Information Reporting Transaction without a matching claim, Medicare Part processors must maintain the Information Reporting transaction when the Claim/Service Billing transaction does not exist. A second example is when there is not enough other payer data on the Information Reporting transaction to determine if the dollars are TrOOP eligible, therefore the processor must crosswalk the other payer data on the Information Reporting transaction to the other payer data received from CMS via the Coordination of Benefits (COB) file. If CMS was not aware of the other payer, the processor cannot crosswalk. In that scenario, the processor must also capture the request.

Note: For purposes of receiving a response to an Information Reporting transaction for retrospective 340B determination, the receiving pharmacy may interpret either an Approved or Captured as an identical accepted response.

See section “*Transaction Response Status*”, “*Duplicate Transactions*”.

21.2 INFORMATION REPORTING REQUEST DIAGRAMS

21.2.1 DIAGRAM FOR TRANSMISSION OF AN INFORMATION REPORTING TRANSACTION

For Information Reporting, the scenario defined includes an Information Reporting from a Sender to a Receiver.

The following segment is only used for Medicare Part D payer-to-payer facilitation. Otherwise, the Pricing Segment is not used in an Information Reporting request transaction.

TRANSACTION HEADER SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
110-AK	SOFTWARE VENDOR/CERTIFICATION ID	M	

Notes on Transaction Header Segment on an Information Reporting Request:

The Transaction Header Segment is a mandatory, fixed length segment for an Information Reporting request. The "Situation" column is not applicable.

21.3.2 INSURANCE SEGMENT (INFORMATION REPORTING)

INSURANCE SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
302-C2	CARDHOLDER ID	M	
312-CC	CARDHOLDER FIRST NAME	Q	Information Reporting (Claim/Service): Required if necessary for state/federal/regulatory agency programs when the cardholder has a first name.
313-CD	CARDHOLDER LAST NAME	Q	Information Reporting (Claim/Service): Required if necessary for state/federal/regulatory agency programs.
524-FO	PLAN ID	Q	Information Reporting (Claim/Service): Required if needed to identify a set of parameters, benefit, or coverage criteria.
309-C9	ELIGIBILITY CLARIFICATION CODE	Q	Information Reporting (Claim/Service): Required if needed for receiver inquiry validation and/or determination, when eligibility is not maintained at the dependent level. Required in special situations as defined by the code to clarify the eligibility of an individual, which may extend coverage.
301-C1	GROUP ID	Q	Information Reporting (Claim/Service): Required if needed to identify the actual cardholder or employer group, to identify appropriate group number, when available.
303-C3	PERSON CODE	Q	Information Reporting (Claim/Service): Required if needed to uniquely identify the family members within the Cardholder ID.
306-C6	PATIENT RELATIONSHIP CODE	Q	Information Reporting (Claim/Service): Required if needed to uniquely identify the relationship of the Patient to the Cardholder ID.
359-2A	MEDIGAP ID	Q	Information Reporting (Claim/Service): Required, if known, when patient has Medigap coverage.
360-2B	MEDICAID INDICATOR	Q	Information Reporting (Claim/Service): Required, if known, when patient has Medicaid coverage.
361-2D	PROVIDER ACCEPT ASSIGNMENT INDICATOR	N	Information Reporting (Claim/Service): Not used.
115-N5	MEDICAID ID NUMBER	N	Information Reporting (Claim/Service): Not used.
116-N6	MEDICAID AGENCY NUMBER	N	Information Reporting (Claim/Service): Not used.

Notes on Insurance Segment on an Information Reporting Request:

The Insurance Segment is mandatory for an Information Reporting Request.

21.3.3 PATIENT SEGMENT (INFORMATION REPORTING)

PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
618-RR	PATIENT ID COUNT	Q	Information Reporting (Claim/Service): Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.

OFFICIAL RELEASE

PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT	
Field	Field Name		Situation	
335-2C	PREGNANCY INDICATOR	Q	Information Reporting (Claim/Service): Required if clinical determination is dependent upon patient's pregnancy condition. Submitted until it is known the patient is no longer pregnant.	
350-HN	PATIENT E-MAIL ADDRESS	I	Information Reporting (Claim/Service): May be submitted for the receiver to relay patient health care communications via the Internet when provided by the patient. This field is informational only.	
384-4X	PATIENT RESIDENCE	Q	Information Reporting (Claim/Service): Required if needed per trading partner agreement.	
A22-YR	PATIENT ID ASSOCIATED STATE/PROVINCE ADDRESS	N	Information Reporting (Claim/Service): Not used.	
B38-1Y	PATIENT ID ASSOCIATED COUNTRY CODE	N	Information Reporting (Claim/Service): Not used.	
A45-1R	VETERINARY USE INDICATOR	N	Information Reporting (Claim/Service): Not used.	
E06-S8	SPECIES	N	Information Reporting (Claim/Service): Not used.	

Notes on Patient Segment on an Information Reporting Request:

The Patient Segment is situational. It is used when a receiver needs some of the patient demographic information to perform Information Reporting requirements. The Patient Segment must be submitted when needed to differentiate between the patient and the cardholder. If the cardholder and the patient are the same, then the Patient Segment is not submitted unless additional information about the patient is needed to clarify the Information Reporting transaction. The Segment is mandatory if required under provider payer contract or mandatory on Information Reporting where this information is necessary for reporting.

21.3.4 N TRANSACTION PAYER IDENTIFICATION SEGMENT (INFORMATION REPORTING)

N TRANSACTION PAYER IDENTIFICATION SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT	
Field	Field Name		Situation	
111-AM	SEGMENT IDENTIFICATION	M		
C52-9Y	N PAYER IIN	Q	Information Reporting Request (Claim): - Required for Medicare Part D coordination of benefits for the Part D plan to match the N to OHI or apply information to TrOOP. - Required when necessary for information reporting for a payer other than the entity receiving the N. Information Reporting Request (Service): - Required when necessary for information reporting for a payer other than the entity receiving the N.	
C53-9Z	N PAYER PROCESSOR CONTROL NUMBER	Q	Information Reporting Request (Claim): - Required for Medicare Part D coordination of benefits for the Part D plan to match the N to OHI or apply information to TrOOP . - Required when necessary for information reporting for a payer other than the entity receiving the N. Information Reporting Request (Service): - Required when necessary for information reporting for a payer other than the entity receiving the N.

C51-9X	BENEFIT STAGE INDICATOR	Q***R***	Information Reporting (Claim/Service): Not Used

Notes on Coordination of Benefits/Other Payments Segment on an Information Reporting Transaction:

The Coordination of Benefits/Other Payments Segment is situational for an Information Reporting Transaction, when N transaction is generated or batch information reporting transaction is generated. This segment identifies payers associated to the reporting transaction, other than the payer for which the N is being generated. This information will allow the receiving entity to identify and coordinate post adjudication adjustments for specific claim transactions, determine the order of the other payers and identify the Adjudicated Program Type of the other payers.

21.3.9 WORKERS' COMPENSATION SEGMENT (INFORMATION REPORTING)

WORKERS' COMPENSATION SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
434-DY	DATE OF INJURY	M	
315-CF	EMPLOYER NAME	Q	Information Reporting (Claim/Service): Required if needed to process an information reporting transaction for a work related injury or condition.
B15-8D	EMPLOYER STREET ADDRESS LINE 1	Q	Information Reporting (Claim/Service): Required if needed to process an information reporting transaction for a work related injury or condition.
B16-7G	EMPLOYER STREET ADDRESS LINE 2	Q	Information Reporting (Claim/Service): Required if needed to process an information reporting transaction for a work related injury or condition. Use only when a second address line is needed and Employer Street Address Line 1 (B15-8D) has been used.
317-CH	EMPLOYER CITY ADDRESS	Q	Information Reporting (Claim/Service): Required if needed to process an information reporting transaction for a work related injury or condition.
318-CI	EMPLOYER STATE/PROVINCE ADDRESS	Q	Information Reporting (Claim/Service): Required if needed to process an information reporting transaction for a work related injury or condition.
319-CJ	EMPLOYER ZIP/POSTAL CODE	Q	Information Reporting (Claim/Service): Required if needed to process an information reporting transaction for a work related injury or condition.

Field	Field Name		Situation
			Required if this field could result in different drug utilization review outcome. Service: Required if this field affects documentation of professional pharmacy service.
441-E6	RESULT OF SERVICE CODE	Q***R***	Information Reporting (Claim): Required if this field could result in different drug utilization review outcome. Service: Required if this field affects documentation of professional pharmacy service.
474-8E	DUR/PPS LEVEL OF EFFORT	Q***R***	Information Reporting (Claim): Required if this field could result in different drug utilization review outcome. Service: Required if this field affects documentation of professional pharmacy service.
475-J9	DUR/DUE CO-AGENT ID QUALIFIER	Q***R***	Information Reporting (Claim/Service): Required when DUR/DUE Co-Agent ID (476-H6) is used
476-H6	DUR/DUE CO-AGENT ID	Q***R***	Information Reporting (Claim): Required if this field could result in different drug utilization review outcome. Service: Required if this field affects documentation of professional pharmacy service.

Notes on DUR/PPS Segment on an Information Reporting Request:

The DUR/PPS Segment is situational for an Information Reporting request. It is used when a sender notifies the receiver of drug utilization, drug evaluations, or information on the appropriate selection to process Information Reporting. The DUR/PPS information may be sent on the initial submission or alternatively sent after a DUR/PPS rejection from a receiver. The Segment is mandatory if required under provider payer contract or where this information is necessary for processing the reporting. For retrospective 340B determination, this segment is not used.

21.3.11 PRICING SEGMENT (INFORMATION REPORTING)

PRICING SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
409-D9	INGREDIENT COST SUBMITTED	N	Information Reporting (Claim/Service): Not used.
412-DC	DISPENSING FEE SUBMITTED	N	Information Reporting (Claim/Service): Not used.
477-BE	PROFESSIONAL SERVICE FEE SUBMITTED	N	Information Reporting (Claim/Service): Not used.
433-DX	PATIENT PAY AMOUNT REPORTED	Q	Information Reporting (Claim/Service): Required for Medicare Part D payer-to-payer facilitation.
438-E3	INCENTIVE AMOUNT SUBMITTED	N	Information Reporting (Claim/Service): Not used.
478-H7	OTHER AMOUNT CLAIMED SUBMITTED COUNT	N	Information Reporting (Claim/Service): Not used.

423-DN	BASIS OF COST DETERMINATION	N	Information Reporting (Claim/Service): Not used.
D14-KX	SUBROGATION AMOUNT REQUESTED	N	Information Reporting (Claim/Service): Not used.

Notes on Pricing Segment on an Information Reporting Request:

The Pricing Segment is situational for an Information Reporting Request. The Pricing Segment only supports the field Patient Pay Amount Reported (433-DX) that is used in Medicare Part D payer-to-payer facilitation. Otherwise, the Pricing Segment is not used. For retrospective 340B determination, this segment is not used.

21.3.12 COMPOUND SEGMENT (INFORMATION REPORTING)

COMPOUND SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
450-EF	COMPOUND DOSAGE FORM DESCRIPTION CODE	M	
451-EG	COMPOUND DISPENSING UNIT FORM INDICATOR	M	
C60-AG	COMPOUND LEVEL OF COMPLEXITY	Q	Required if specified in trading partner agreement.
447-EC	COMPOUND INGREDIENT COMPONENT COUNT	M	Maximum count of 25 ingredients.
488-RE	COMPOUND PRODUCT ID QUALIFIER	M***R***	
489-TE	COMPOUND PRODUCT ID	M***R***	
448-ED	COMPOUND INGREDIENT QUANTITY	M***R***	
449-EE	COMPOUND INGREDIENT DRUG COST	Q***R***	Information Reporting (Claim): Required if needed for receiver claim determination when multiple products are billed.
490-UE	COMPOUND INGREDIENT BASIS OF COST DETERMINATION	Q***R***	Information Reporting (Claim): Required if needed for receiver claim determination when multiple products are billed.
362-2G	COMPOUND INGREDIENT MODIFIER CODE COUNT	Q	Information Reporting (Claim): Required when Compound Ingredient Modifier Code (363-2H) is sent.
363-2H	COMPOUND INGREDIENT MODIFIER CODE	Q***R***	Information Reporting (Claim): Required if necessary for state/federal/regulatory agency programs.

Notes on Compound Segment on an Information Reporting (Claim) Request:

The Compound Segment is situational for an Information Reporting (Claim). It is used for multi-ingredient prescriptions, to report each compound ingredient. The Segment is mandatory if required under provider payer contract or where this information is necessary for processing the reporting. The Compound Segment is not used for an Information Reporting (Service).

21.3.13 CLINICAL SEGMENT (INFORMATION REPORTING)

CLINICAL SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
491-VE	DIAGNOSIS CODE COUNT	Q	Information Reporting (Claim/Service): Maximum count of 5. Required if Diagnosis Code Qualifier (492-WE) and Diagnosis Code (424-DO) are used.
492-WE	DIAGNOSIS CODE QUALIFIER	Q***R***	Information Reporting (Claim/Service): Required if Diagnosis Code (424-DO) is used.
424-DO	DIAGNOSIS CODE	Q***R***	Information Reporting (Claim/Service):

CLINICAL SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			The value for this field is obtained from the prescriber or authorized representative. Required if this field was reported on the original adjudicated transaction. Required if this field could result in different drug utilization review outcome. Required if this information can be used in place of prior authorization. Required if necessary for state/federal/regulatory agency programs.
493-XE	CLINICAL INFORMATION COUNTER	Q***R***	Information Reporting (Claim/Service): Maximum 5 occurrences supported. Grouped with Measurement fields (Measurement Date (494-ZE), Measurement Time (495-H1), Measurement Dimension (496-H2), Measurement Unit (497-H3), Measurement Value (499-H4)).
494-ZE	MEASUREMENT DATE	Q***R***	Information Reporting (Claim/Service): Required if necessary when this field could result in different drug utilization review outcome.
495-H1	MEASUREMENT TIME	Q***R***	Information Reporting (Claim/Service): Required if Time is known or has impact on measurement. Required if necessary when this field could result in drug utilization review outcome.
496-H2	MEASUREMENT DIMENSION	Q***R***	Information Reporting (Claim/Service): Required if Measurement Unit (497-H3) and Measurement Value (499-H4) are used. Required if necessary when this field could result in different drug utilization review outcome.
497-H3	MEASUREMENT UNIT	Q***R***	Information Reporting (Claim/Service): Required if Measurement Dimension (496-H2) and Measurement Value (499-H4) are used. Required if necessary when this field could result in different drug utilization review outcome.
499-H4	MEASUREMENT VALUE	Q***R***	Information Reporting (Claim/Service): Required if Measurement Dimension (496-H2) and Measurement Unit (497-H3) are used. Required if necessary when this field could result in different drug utilization review outcome.

Notes on Clinical Segment on an Information Reporting Request:

The Clinical Segment is situational on an Information Reporting request. It is used to specify clinical measurements and/or diagnosis information associated with the Information Reporting transaction. The Segment is mandatory if required under provider payer contract or where this information is necessary for reporting. For retrospective 340B determination, this segment is not used.

21.4 INFORMATION REPORTING RESPONSE DIAGRAMS AND SEGMENTS

21.4.1 TRANSMISSION ACCEPTED/TRANSACTION CAPTURED

Information Reporting transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured)

The captured response is applicable when the receiver acknowledges receipt, but does not fully process the Information Reporting transaction. A Captured transaction response is not allowed for Medicare Part D payer to payer facilitation, as it does not support real-time TrOOP updates.

See section "Transaction Response Status", "Duplicate Transactions" for the handling of a duplicate transaction.

For retrospective 340B determination, the Response DUR/PPS Segment is not used.

21.4.1.2.3 RESPONSE INSURANCE SEGMENT (INFORMATION REPORTING) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE INSURANCE SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
301-C1	GROUP ID	Q	Information Reporting (Claim/Service): Required if needed to identify the cardholder or employer group, to identify appropriate group number for reporting. Required to identify the actual group that was used when multiple group coverages exist. Note: This field may contain the Group ID echoed from the request. May contain the actual Group ID if unknown to the receiver.
524-FO	PLAN ID	Q	Information Reporting (Claim/Service): Required to identify the actual plan ID that was used when multiple group coverages exist. Required if needed to contain the actual plan ID if unknown to the receiver.
545-2F	NETWORK REIMBURSEMENT ID	N	Information Reporting (Claim/Service): Not used.
C96-KR	PAYER/HEALTH PLAN ID COUNT	N	Information Reporting (Claim/Service): Not used.
568-J7	PAYER/HEALTH PLAN ID QUALIFIER	N	Information Reporting (Claim/Service): Not used.
569-J8	PAYER/HEALTH PLAN ID	N	Information Reporting (Claim/Service): Not used.
115-N5	MEDICAID ID NUMBER	N	Information Reporting (Claim/Service): Not used.
116-N6	MEDICAID AGENCY NUMBER	N	Information Reporting (Claim/Service): Not used.
302-C2	CARDHOLDER ID	N	Information Reporting (Claim/Service): Not used.

Notes on Response Insurance Segment on an Information Reporting Response:

The Response Insurance Segment is situational for an Information Reporting response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). It is used when coverage information may be provided from the sender to the receiver.

21.4.1.2.4 RESPONSE PATIENT SEGMENT (INFORMATION REPORTING) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE PATIENT SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
618-RR	PATIENT ID COUNT	Q	Information Reporting (Claim/Service): Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.
331-CX	PATIENT ID QUALIFIER	Q***R***	Information Reporting (Claim/Service): Required if Patient ID (332-CY) is used.
332-CY	PATIENT ID	Q***R***	Information Reporting (Claim/Service): Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.
310-CA	PATIENT FIRST NAME	Q	Information Reporting (Claim/Service): Required if known.
311-CB	PATIENT LAST NAME	Q	Information Reporting (Claim/Service): Required if known.
304-C4	DATE OF BIRTH	Q	Information Reporting (Claim/Service): Required if known.

Notes on Response Patient Segment on an Information Reporting Response:

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

The Response Patient Segment is situational for Information Reporting transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured) when patient demographic information needs to be sent from the sender to the receiver.

21.4.1.2.5 RESPONSE STATUS SEGMENT (INFORMATION REPORTING) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Information Reporting (Claim/Service): Required if needed to identify the transaction.
B98-34	RECONCILIATION ID	R	Information Reporting (Claim/Service): Captured "C" response: This is a unique processor assigned value that must be provided on a "C" response. See section "RESPONSE STATUS SEGMENT / RECONCILIATION ID". Duplicate of Captured "Q" response: The Reconciliation ID returned on a "Q" response must be that of the transaction found by processor that is resulting in the Duplicate response. See section "DUPLICATE TRANSACTIONS".
510-FA	REJECT COUNT	N	Information Reporting (Claim/Service): Not used.
511-FB	REJECT CODE	N***R***	Information Reporting (Claim/Service): Not used.
546-4F	REJECT FIELD OCCURRENCE INDICATOR	N***R***	Information Reporting (Claim/Service): Not used.
547-5F	APPROVED MESSAGE CODE COUNT	N	Information Reporting (Claim/Service): Not used.
548-6F	APPROVED MESSAGE CODE	N***R***	Information Reporting (Claim/Service): Not used.
130-UF	ADDITIONAL MESSAGE INFORMATION COUNT	Q	Information Reporting (Claim/Service): Maximum count of 25. Required if Additional Message Information (526-FQ) is used. Used to qualify the number of occurrences of the Additional Message Information (526-FQ) that is included in the Response Status Segment.
132-UH	ADDITIONAL MESSAGE INFORMATION QUALIFIER	Q***R***	Information Reporting (Claim/Service): Required if Additional Message Information (526-FQ) is used.
526-FQ	ADDITIONAL MESSAGE INFORMATION	Q***R***	Information Reporting (Claim/Service): Required when additional text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.
131-UG	ADDITIONAL MESSAGE INFORMATION CONTINUITY	Q***R***	Information Reporting (Claim/Service): Required if and only if current repetition of Additional Message Information (526-FQ) is used, another populated repetition of Additional Message Information (526-FQ) follows it, and the text of the following message is a continuation of the current.
C72-BH	HELP DESK SUPPORT TYPE COUNT	M	Information Reporting (Claim/Service): Maximum count of 5. Used to qualify the number of occurrences of Help Desk Support Type (C71-BG) that is included in the Response Status Segment.
C71-BG	HELP DESK SUPPORT TYPE	M***R***

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
C67-BB	HELP DESK BUSINESS UNIT TYPE COUNT	R	Information Reporting (Claim/Service): Maximum count of 5. Used to qualify the number of occurrences of the Help Desk Business Unit Type, Help Desk Contact Information Qualifier, Help Desk Contact Information and Help Desk Contact Information Extension that is included in the Response Status Segment. Required if Help Desk Business Unit Type (C66-BA) is used.
C66-BA	HELP DESK BUSINESS UNIT TYPE	Q***R***	Information Reporting (Claim/Service): Required if Help Desk Contact Information Qualifier (C70-BF) is used.
C70-BF	HELP DESK CONTACT INFORMATION QUALIFIER	Q***R***	Information Reporting (Claim/Service): Required if Help Desk Contact Information (C68-BC) is used.
C68-BC	HELP DESK CONTACT INFORMATION	Q***R***	Information Reporting (Claim/Service): Required if needed to provide help desk contact support information to the receiver.
C69-BD	HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Information Reporting (Claim/Service): Required if needed to provide an extension to the Help Desk Contact Information (C68-BC).
880-K5	TRANSACTION REFERENCE NUMBER	Q	Information Reporting (Claim/Service): Required if needed in addition to the Reconciliation ID to match the transaction response to the reporting transaction. Captured response does not apply to Medicare Part D payer to payer facilitation.
993-A7	INTERNAL CONTROL NUMBER	N	Information Reporting (Claim/Service): Not used.
A28-ZR	ADJUDICATED PROGRAM TYPE	N	Information Reporting (Claim/Service): Not used.
B04-BT	NEXT AVAILABLE FILL DATE	N	Information Reporting (Claim/Service): Not used.

Notes on Response Status Segment on an Information Reporting Response:

The Response Status Segment is mandatory for an Information Reporting response for Header Response Status (501-F1) = "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). The Response Status Segment is sent from the sender to the receiver to identify the outcome of the request. Captured response does not apply to Medicare Part D payer to payer facilitation.

21.4.1.2.6 RESPONSE CLAIM SEGMENT (INFORMATION REPORTING) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE CLAIM SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
455-EM	PRESCRIPTION/SERVICE REFERENCE NUMBER QUALIFIER	M	Information Reporting (Claim): For Transaction Code of "N1", in the Response Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "1" (Rx Billing). Information Reporting (Service): For Transaction Code of "N1", in the Response Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "2" (Service Billing).
402-D2	PRESCRIPTION/SERVICE REFERENCE NUMBER	M	Information Reporting (Claim/Service): Significant digits on submission must be returned on response. See section "Standard Conventions", "Character Set Designation Truncation", "Numeric", "Numeric Truncation".
551-9F	FORMULARY ALTERNATIVE PRODUCT COUNT	N	Information Reporting (Claim/Service): Not used.
E89-ZO	FORMULARY ALTERNATIVE EFFECTIVE DATE	N***R***	Information Reporting (Claim/Service): Not used.

OFFICIAL RELEASE

	RESPONSE DUR/PPS SEGMENT		SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
			Required if needed to supply additional information for the utilization conflict. Service: Required if needed to supply additional information for the service.

Notes on Response DUR/PPS Segment on an Information Reporting Response:

The Response DUR/PPS Segment is situational for an Information Reporting response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). The Response DUR/PPS Segment is used to identify a drug utilization review or professional pharmacy service event, opportunity, or information. For retrospective 340B determination, this segment is not used.

21.4.2 TRANSMISSION ACCEPTED/TRANSACTION APPROVED

Information Reporting transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved)

See section "Transaction Response Status", "Duplicate Transactions" for the handling of a duplicate transaction.

For retrospective 340B determination, the Response DUR/PPS Segment is not used.

Notes on Response Header Segment on an Information Reporting Response:

The Response Header Segment is a mandatory, fixed length segment for an Information Reporting response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved). The "Situation" column is not applicable.

21.4.2.2.2 RESPONSE MESSAGE SEGMENT (INFORMATION REPORTING) (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

RESPONSE MESSAGE SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Information Reporting (Claim/Service): Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on an Information Reporting Response:

The Response Message Segment is situational for an Information Reporting response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved). It is used when additional text information needs to be sent.

21.4.2.2.3 RESPONSE INSURANCE SEGMENT (INFORMATION REPORTING) (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

RESPONSE INSURANCE SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
301-C1	GROUP ID	Q	Information Reporting (Claim/Service): Required if needed to identify the cardholder or employer group, to identify appropriate group number for reporting. Required to identify the actual group that was used when multiple group coverages exist. Note: This field may contain the Group ID echoed from the request. May contain the actual Group ID if unknown to the receiver.
524-FO	PLAN ID	Q	Information Reporting (Claim/Service): Required to identify the actual plan ID that was used when multiple group coverages exist. Required if needed to contain the actual plan ID if unknown to the receiver.
545-2F	NETWORK REIMBURSEMENT ID	N	Information Reporting (Claim/Service): Not used.
C96-KR	PAYER/HEALTH PLAN ID COUNT	N	Information Reporting (Claim/Service): Not used.
568-J7	PAYER/HEALTH PLAN ID QUALIFIER	N	Information Reporting (Claim/Service): Not used.
569-J8	PAYER/HEALTH PLAN ID	N	Information Reporting (Claim/Service): Not used.
115-N5	MEDICAID ID NUMBER	N	Information Reporting (Claim/Service): Not used.
116-N6	MEDICAID AGENCY NUMBER	N	Information Reporting (Claim/Service): Not used.
302-C2	CARDHOLDER ID	Q	Information Reporting (Claim/Service): Required if the identification to be used in future transactions is different than what was submitted on the request.

Notes on Response Insurance Segment on an Information Reporting or Response:

The Response Insurance Segment is situational for an Information Reporting response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved). It is used when coverage information may be provided from the sender to the receiver.

F06-Y0	DUR/DUE MAXIMUM DAILY DOSE QUANTITY	Q***R***	Information Reporting (Claim/Service): Required when DUR/DUE conflict indicates a dosing threshold has been exceeded and maximum dose information is available.
F07-YL	DUR/DUE MAXIMUM DAILY DOSE UNIT OF MEASURE	Q***R***	Information Reporting (Claim/Service): Required when DUR/DUE conflict indicates a dosing threshold has been exceeded and maximum dose information is available.
F08-YJ	DUR/DUE MINIMUM DAILY DOSE QUANTITY	Q***R***	Information Reporting (Claim/Service): Required when DUR/DUE conflict indicates a dosing threshold has not been met and minimum dose information is available.
F09-YI	DUR/DUE MINIMUM DAILY DOSE UNIT OF MEASURE	Q***R***	Information Reporting (Claim/Service): Required when DUR/DUE conflict indicates a dosing threshold has not been met and minimum dose information is available.
544-FY	DUR/DUE FREE TEXT MESSAGE	Q***R***	Information Reporting (Claim): Required if needed to supply additional information for the utilization conflict. Service: Required if needed to supply additional information for the service.

Notes on Response DUR/PPS Segment on an Information Reporting Response:

The Response DUR/PPS Segment is situational for an Information Reporting response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved). The Response DUR/PPS Segment is used to identify a drug utilization review or professional pharmacy service event, opportunity, or information. For retrospective 340B determination, this segment is not used.

21.4.3 TRANSMISSION ACCEPTED/TRANSACTION REJECTED

- 622 -

REJECTED)**21.4.3.2.1 RESPONSE HEADER SEGMENT (INFORMATION REPORTING) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)**

RESPONSE HEADER SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on an Information Reporting Response:

The Response Header Segment is a mandatory, fixed length segment for an Information Reporting response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). The "Situation" column is not applicable.

21.4.3.2.2 RESPONSE MESSAGE SEGMENT (INFORMATION REPORTING) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE MESSAGE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Information Reporting (Claim/Service): Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on an Information Reporting Response:

The Response Message Segment is situational for an Information Reporting response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). It is used when additional text information needs to be sent.

21.4.3.2.3 RESPONSE INSURANCE SEGMENT (INFORMATION REPORTING) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
301-C1	GROUP ID	Q	Information Reporting (Claim/Service): Required if needed to identify the cardholder or employer group, to identify appropriate group number for reporting. Required to identify the actual group that was used when multiple group coverages exist. Note: This field may contain the Group ID echoed from the request. May contain the actual Group ID if unknown to the receiver.
524-FO	PLAN ID	Q	Information Reporting (Claim/Service): Required if needed to identify the actual plan parameters, benefit, or coverage criteria, when available. Required to identify the actual plan ID that was used when multiple group coverages exist. Required if needed to contain the actual plan ID if unknown to the receiver.

Response Status Segment

There are no situational transaction-level segments for Information Reporting transmission response Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected).

21.4.4.2 INFORMATION REPORTING RESPONSE SEGMENTS (TRANSMISSION REJECTED/TRANSACTION REJECTED)

21.4.4.2.1 IN RESPONSE HEADER SEGMENT (INFORMATION REPORTING) (TRANSMISSION REJECTED/TRANSACTION REJECTED)

	RESPONSE HEADER SEGMENT		MANDATORY SEGMENT
Field	Field Name	Mandatory or Situational	Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on an Information Reporting Response:

The Response Header Segment is a mandatory, fixed length segment for an Information Reporting response when the Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The "Situation" column is not applicable.

If either the entire transmission or the Header is in error, the Header Response Status (501-F1) = "R" (Rejected). The transaction within the transmission must be rejected with an "R".

If the transaction rejects for detail errors, the Header Response Status (501-F1) = "A" (Accepted) and the Transaction Response Status (112-AN) will be "R".

21.4.4.2.2 RESPONSE MESSAGE SEGMENT (INFORMATION REPORTING) (TRANSMISSION REJECTED/TRANSACTION REJECTED)

	RESPONSE MESSAGE SEGMENT		SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Information Reporting (Claim/Service): Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on an Information Reporting Response:

The Response Message Segment is situational for an Information Reporting or response when the Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). It is used when additional text information needs to be sent.

Notes on Response Status Segment on an Information Reporting Response:

The Response Status Segment is mandatory for an Information Reporting response when the Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The Response Status Segment is sent from the sender to the receiver to identify the outcome of the request. Refer to the NCPDP *External Code List* for guidance on the use of reject codes.

22 INFORMATION REPORTING REVERSAL INFORMATION

22.1 INFORMATION REPORTING REVERSAL

This transaction is used to reverse a previously submitted Information Reporting transaction. It is requesting the Processor or Reporting Entity to back out the previously reported information. For use of Information Reporting functionality for Medicare Part D Processing, see Appendix "Use Of Information Reporting (N1, N2, N3) Functionality For Medicare Part D Processing".

The Transaction Code is "N2".

Situational segments such as the Insurance Segment may be supported. If a processor/PBM needs this information to process a reversal, this segment can be used.

If a processor/PBM does not need the Insurance Segment, but the reporting entity wishes to send it, the processor/PBM must ignore the valid optional and/or situational information.

The Processor must provide one of the following general types of responses:

Approved – The Processor acknowledges receipt of the reversal and backs out the previously submitted reporting transaction. For Medicare Part D, this means that the PDP has updated the beneficiary's TrOOP to reflect the transaction being reported.

Duplicate of Approved – This occurs when the Processor has previously received the request and processed the transaction, but the response did not return to the Originator. The Duplicate response contains the same information as returned in the original Approved scenario.

Captured – This occurs when the Processor acknowledges receipt of the reversal for reporting, but is not making any judgment regarding the backing out of the reporting. Captured responses are not allowed for Medicare Part D N transactions due to the real-time TrOOP update requirement.

Duplicate of Captured – This occurs when the Processor has previously received the request and processed the transaction, but the response did not return to the Originator. The Duplicate response contains the same information as returned in the original Captured scenario.

Rejected – This occurs when the Processor has encountered an error in the transaction or processing, or is unable to process the reversal.

A captured response means that the transaction was valid, but the downstream system makes no judgment about the processing of the transaction. An approved response means the system actually processed the data (stored the DUR, processed TrOOP, etc.).

An example of the difference can be found in Medicare Part D processing. An Information Reporting transaction would require that the payer receives a Claim/Service Billing transaction sometime before the Information Reporting transaction. While generally the processor would reject the Information Reporting Transaction without a matching claim, Medicare Part processors must maintain the Information Reporting transaction when the Claim/Service Billing transaction does not exist. A second example is when there is not enough other payer data on the Information Reporting transaction to determine if the dollars are TrOOP eligible, therefore the processor must crosswalk the other payer data on the Information Reporting transaction to the other payer data received from CMS via the Coordination of Benefits (COB) file. If CMS was not aware of the other payer, the processor cannot crosswalk. In that scenario, the processor must also capture the request.

Note: For purposes of receiving a response to an Information Reporting transaction for retrospective 340B determination, the receiving pharmacy may interpret either an Approved or Captured as an identical accepted response.

See section "Transaction Response Status", "Duplicate Transactions".

22.2 INFORMATION REPORTING REVERSAL (CLAIM) REQUEST DIAGRAMS

22.2.1 DIAGRAM FOR TRANSMISSION OF AN INFORMATION REPORTING REVERSAL (CLAIM) TRANSACTION

For an Information Reporting Reversal (Claim), the scenario defined includes an Information Reporting Reversal (Claim) from a Sender to a Receiver.

There are no situational transaction-level segments in an Information Reporting Reversal (Claim).

401-D1	DATE OF SERVICE	M	
110-AK	SOFTWARE VENDOR/CERTIFICATION ID	M	

Notes on Transaction Header Segment on an Information Reporting Reversal Request:

The Transaction Header Segment is a mandatory, fixed length segment for an Information Reporting Reversal (Claim) request. The "Situation" column is not applicable.

22.3.2 INSURANCE SEGMENT (INFORMATION REPORTING REVERSAL (CLAIM))

INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
302-C2	CARDHOLDER ID	M	
312-CC	CARDHOLDER FIRST NAME	N	Information Reporting Reversal (Claim): Not used.
313-CD	CARDHOLDER LAST NAME	N	Information Reporting Reversal (Claim): Not used.
524-FO	PLAN ID	N	Information Reporting Reversal (Claim): Not used.
309-C9	ELIGIBILITY CLARIFICATION CODE	N	Information Reporting Reversal (Claim): Not used.
301-C1	GROUP ID	Q	Information Reporting Reversal (Claim): Required if needed to match the reversal to the original information reporting transaction.
303-C3	PERSON CODE	N	Information Reporting Reversal (Claim): Not used.
306-C6	PATIENT RELATIONSHIP CODE	N	Information Reporting Reversal (Claim): Not used.
359-2A	MEDIGAP ID	N	Information Reporting Reversal (Claim): Not used.
360-2B	MEDICAID INDICATOR	N	Information Reporting Reversal (Claim): Not used.
361-2D	PROVIDER ACCEPT ASSIGNMENT INDICATOR	N	Information Reporting Reversal (Claim): Not used.
115-N5	MEDICAID ID NUMBER	N	Information Reporting Reversal (Claim): Not used.
116-N6	MEDICAID AGENCY NUMBER	N	Information Reporting Reversal (Claim): Not used.

Notes on Insurance Segment on an Information Reporting Reversal Request:

The Insurance Segment is situational for an Information Reporting Reversal (Claim) request. If the Cardholder ID field is not submitted, the Insurance Segment is not used. The Segment is mandatory if required under provider payer contract or mandatory on claims where this information is necessary for reversal of the claim.

22.3.3 N TRANSACTION PAYER IDENTIFICATION SEGMENT (INFORMATION REPORTING REVERSAL CLAIM)

N TRANSACTION PAYER IDENTIFICATION SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
C52-9Y	N PAYER IIN	Q	Information Reporting Reversal (Claim): - Required for Medicare Part D coordination of benefits for the Part D plan to match the N2 to OHI or an N1 or apply information to TrOOP. - Required when necessary for information reporting for a payer other than the entity receiving the N.
C53-9Z	N PAYER PROCESSOR CONTROL NUMBER	Q	Information Reporting Reversal (Claim): - Required for Medicare Part D coordination of benefits for the Part D plan to match the N2 to OHI or an N1 or apply information to TrOOP. - Required when necessary for information reporting for a payer other than the entity receiving the N.
C54-AA	N PAYER CARDHOLDER ID	Q	Information Reporting Reversal (Claim): - Required for Medicare Part D coordination of benefits for the Part D plan to match the N2 to OHI or an N1 or apply information to TrOOP. - Required when necessary for information reporting for a payer other than the entity receiving the N.
C55-AB	N PAYER GROUP ID	Q	Information Reporting Reversal (Claim): - Required for Medicare Part D coordination of benefits for the Part D plan to match the N2 to OHI or an N1 or apply information to TrOOP. - Required when necessary for information reporting for a payer other than the entity receiving the N.
C48-9U	N PAYER ADJUDICATED PROGRAM TYPE	Q	Information Reporting Reversal (Claim): - Required for Medicare Part D coordination of benefits for the Part D plan to match the N2 to OHI or an N1 or apply information to TrOOP. - Required when necessary for information reporting for a payer other than the entity receiving the N.
C56-AC	N TRANSACTION SOURCE TYPE	Q	Information Reporting Reversal (Claim): - Required for Medicare Part D coordination of benefits to identify transmission method in which the Transaction Facilitator received the record of payment from the payer for which the N is being generated. - Required when method in which record of payment was transmitted from the payer to receiver is needed.
C57-AD	N TRANSACTION RECONCILIATION ID	Q	Information Reporting Reversal (Claim): - Required for Medicare Part D coordination of benefits. This number represents the reconciliation ID from the other Payer for which the N is being created. - Required when necessary for information reporting for a payer other than the entity receiving the N.
880-K5	TRANSACTION REFERENCE NUMBER	Q	Information Reporting Reversal (Claim): - Required for Medicare Part D coordination of benefits. This number is a unique number assigned by the Transaction Facilitator and is used by the Part D plans for matching an N2 to an N1. - Required when necessary for information reporting for a payer other than the entity receiving the N.

Notes on Claim Segment on an Information Reporting Reversal Request:

The Claim Segment is mandatory for an Information Reporting Reversal (Service) request. The Claim Segment defines the product dispensed, dispensing information, reference information for tieback to an original prescription in the case of partial fillings.

22.5 INFORMATION REPORTING REVERSAL (CLAIM/SERVICE) RESPONSE DIAGRAMS

Since there is very little difference in situations for an Information Reporting Reversal (Claim) versus an Information Reporting Reversal (Service), the response sections are listed together.

22.5.1 TRANSMISSION ACCEPTED/TRANSACTION APPROVED

Information Reporting Reversal (Claim/Service) transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved)

See section "Transaction Response Status", "Duplicate Transactions" for the handling of a duplicate transaction.

There are no situational transaction-level segments for Information Reporting Reversal (Claim/Service) transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved)

Notes on Response Header Segment on an Information Reporting Reversal Response:

The Response Header Segment is a mandatory, fixed length segment for an Information Reporting Reversal request when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved). The "Situation" column is not applicable.

22.5.1.2.2 RESPONSE MESSAGE SEGMENT (INFORMATION REPORTING REVERSAL (CLAIM/SERVICE)) (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

RESPONSE MESSAGE SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Information Reporting Reversal (Claim/Service): Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on an Information Reporting Reversal Response:

The Response Message Segment is situational for an Information Reporting Reversal request when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) or "S" (Duplicate of Approved). It is used when additional text information needs to be sent.

22.5.1.2.3 RESPONSE STATUS SEGMENT (INFORMATION REPORTING REVERSAL (CLAIM/SERVICE)) (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

RESPONSE STATUS SEGMENT			MANDATORY SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Information Reporting Reversal (Claim/Service): Required if needed to identify the transaction.
B98-34	RECONCILIATION ID	R	Information Reporting Reversal (Claim/Service): Approved "A" response: This is a unique processor assigned value that must be provided on an "A" response. See section "RESPONSE STATUS SEGMENT / RECONCILIATION ID". Duplicate of Approved "S" response: The Reconciliation ID returned on an "S" response must be that of the transaction found by processor that is resulting in the Duplicate response. See section "DUPLICATE TRANSACTIONS".

RESPONSE HEADER SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on an Information Reporting Reversal Response:

The Response Header Segment is a mandatory, fixed length segment for an Information Reporting Reversal request when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). The "Situation" column is not applicable.

22.5.2.2.2 RESPONSE MESSAGE SEGMENT (INFORMATION REPORTING REVERSAL (CLAIM/SERVICE)) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE MESSAGE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Information Reporting Reversal (Claim/Service): Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on an Information Reporting Reversal Response:

The Response Message Segment is situational for an Information Reporting Reversal request when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured) or "Q" (Duplicate of Captured). It is used when additional text information needs to be sent.

22.5.2.2.3 RESPONSE STATUS SEGMENT (INFORMATION REPORTING REVERSAL (CLAIM/SERVICE)) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Information Reporting Reversal (Claim/Service): Required if needed to identify the transaction.
B98-34	RECONCILIATION ID	R	Information Reporting Reversal (Claim/Service): Captured "C" response: This is a unique processor assigned value that must be provided on a "C" response. See section "RESPONSE STATUS SEGMENT / RECONCILIATION ID". Duplicate of Captured "Q" response: The Reconciliation ID returned on a "Q" response must be that of the transaction found by processor that is resulting in the Duplicate response. See section "DUPLICATE TRANSACTIONS".

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
B04-BT	NEXT AVAILABLE FILL DATE	N	Information Reporting Reversal (Claim/Service): Not used.

Notes on Response Status Segment on an Information Reporting Reversal Response:

The Response Status Segment is mandatory for an Information Reporting Reversal response for Header Response Status (501-F1) = "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). The Response Status Segment is sent from the sender to the receiver to identify the outcome of the request. Refer to the NCPDP *External Code List* for guidance on the use of reject codes.

RESPONSE HEADER SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on an Information Reporting Reversal Response:

The Response Header Segment is a mandatory, fixed length segment for an Information Reporting Reversal response when the Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The "Situation" column is not applicable.

If either the entire transmission or the Header is in error, the Header Response Status (501-F1) = "R" (Rejected). The transaction within the transmission must be rejected with an "R".

If the transaction rejects for detail errors, the Header Response Status (501-F1) = "A" (Accepted) and the Transaction Response Status (112-AN) will be "R".

22.5.4.2.2 RESPONSE MESSAGE SEGMENT (INFORMATION REPORTING REVERSAL (CLAIM/SERVICE)) (TRANSMISSION REJECTED/TRANSACTION REJECTED)

RESPONSE MESSAGE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Information Reporting Reversal (Claim/Service): Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on an Information Reporting Reversal Response:

The Response Message Segment is situational for an Information Reporting Reversal response when the Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). It is used when additional text information needs to be sent.

22.5.4.2.3 RESPONSE STATUS SEGMENT (INFORMATION REPORTING REVERSAL (CLAIM/SERVICE)) (TRANSMISSION REJECTED/TRANSACTION REJECTED)

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation

Notes on Response Status Segment on an Information Reporting Reversal Response:

The Response Status Segment is mandatory for an Information Reporting Reversal response for Header Response Status (501-F1) = "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The Response Status Segment is sent from the sender to the receiver to identify the outcome of the request. Refer to the NCPDP *External Code List* for guidance on the use of reject codes.

23 INFORMATION REPORTING REBILL INFORMATION

23.1 INFORMATION REPORTING REBILL

This transaction is an information reporting submission with an implied reversal. It is used by the Originator to cancel an information reporting submitted that had been processed previously, and submit a new information reporting in the same transaction. For use of Information Reporting functionality for Medicare Part D Processing, see Appendix “Use Of Information Reporting (N1, N2, N3) Functionality For Medicare Part D Processing”.

For information reporting reversal guidelines, see section “Information Reporting Reversal Information”. The Transaction Code is “N3”.

Depending upon the particular claim or service submission request, the Processor must provide one of the following general types of responses:

Approved – This occurs when the Processor acknowledges the receipt of the information only transaction and successfully processes the reversal and new information transaction. For Medicare Part D, this means that the PDP has updated the beneficiary’s TrOOP to reflect the transaction being reported.

Captured – This occurs when the Processor acknowledges receipt of the information reporting transaction, but no judgment is made about the processing of the transaction. Captured responses are not allowed for Medicare Part D N3 transactions due to the real-time TrOOP update requirement.

Rejected – This occurs when the Processor has encountered an error in the transaction or processing, or does not approve the information only rebill transaction.

Duplicate response logic must not be applied by the processor to Information Reporting Rebill transactions. There is no need for a duplicate response due to the nature of the rebill transaction and its implied reversal. Please see section “Transaction Response Status”, *Duplicate Transactions* and “Duplicate Processing For All Rebill Transactions” for more information about why duplicate responses are not supported in Information Reporting Rebill transactions.

Note: For purposes of receiving a response to an Information Reporting transaction for retrospective 340B determination, the receiving pharmacy may interpret either an Approved or Captured as an identical accepted response.

These transactions are described below.

23.2 INFORMATION REPORTING REBILL (CLAIM/SERVICE) REQUEST DIAGRAMS

23.2.1 DIAGRAM FOR TRANSMISSION OF AN INFORMATION REPORTING REBILL TRANSACTION

For an Information Reporting Rebill, the scenario defined includes an Information Reporting Rebill from a Sender to a Receiver.

The following segment is only used for Medicare Part D payer-to-payer facilitation. Otherwise, the Pricing Segment is not used in Information Reporting request transaction.

- Pricing Segment (Patient Pay Amount Reported 433-DX)
- For Medicare Part D, the supplemental payment amount is calculated by using the Medicare Part D patient paid amount minus the Information Reporting Patient Pay Amount.

The following segment is only used for retrospective 340B determination reporting:

- Compound Segment

The following segments are NOT used for 340B determination reporting:

- N Transaction Payer Identification Segment
- Pharmacy Provider Segment
- Prescriber Segment
- Workers' Compensation Segment
- DUR/PPS Segment
- Pricing Segment
- Clinical Segment
- Coordination of Benefits/Other Payments Segment

OFFICIAL RELEASE

Notes on Patient Segment on an Information Reporting Rebill Request:

The Patient Segment is situational. It is used when a receiver needs some of the patient demographic information to perform Information Reporting Rebill requirements. The Patient Segment must be submitted when needed to differentiate between the patient and the cardholder. If the cardholder and the patient are the same, then the Patient Segment is not submitted unless additional information about the patient is needed to clarify the Information Reporting Rebill transaction. The Segment is mandatory if required under provider payer contract or mandatory on Information Reporting Rebill where this information is necessary for reporting.

23.3.4 N TRANSACTION PAYER IDENTIFICATION SEGMENT (INFORMATION REPORTING REBILL)

880-K5	TRANSACTION REFERENCE NUMBER	Q	Information Reporting Rebill (Claim): - Required for Medicare Part D coordination of benefits. This number is a unique number assigned by the Transaction Facilitator and is used by the Part D plans for matching an N2 to an N1. - Required when necessary for information reporting for a payer other than the entity receiving the N Information Reporting Rebill (Service): - Required when necessary for information reporting

Notes on N Transaction Payer Identification Segment on an Information Reporting Rebill Transaction:

The N Transaction Payer Identification Segment is situational for an Information Rebill Transaction, when N transaction is generated or batch information reporting transaction is generated. This segment identifies the payer for which the N is being generated.

23.3.5 CLAIM SEGMENT (INFORMATION REPORTING REBILL)

CLAIM SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
455-EM	PRESCRIPTION/SERVICE REFERENCE NUMBER QUALIFIER	M	Information Reporting Rebill (Claim): For Transaction Code of "N3", in the Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "1" (Rx Billing). Information Reporting Rebill (Service): For Transaction Code of "N3", in the Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "2" (Service Billing).
402-D2	PRESCRIPTION/SERVICE REFERENCE NUMBER	M	Information Reporting Rebill (Claim/Service): See section "Standard Conventions", "Character Set Designation Truncation", "Numeric", "Numeric Truncation".
436-E1	PRODUCT/SERVICE ID QUALIFIER	M	Information Reporting Rebill (Claim/Service): If reporting for a multi-ingredient prescription, Product/Service ID Qualifier (436-E1) is zero (Zero means "00"). If the Product/Service ID Qualifier (436-E1) = "06" (DUR/PPS), the Product/Service ID (407-D7) is zero. (Zero means "0".)
407-D7	PRODUCT/SERVICE ID	M	Information Reporting Rebill (Claim/Service): If reporting for a multi-ingredient prescription, Product/Service ID (407-D7) is zero. (Zero means "0".) If the Product/Service ID Qualifier (436-E1) = "06" (DUR/PPS), the Product/Service ID (407-D7) is zero. (Zero means "0".) Populate the DUR/PPS segment as appropriate.

Notes on Coordination of Benefits/Other Payments Segment on an Information Reporting Rebill Transaction:

The Coordination of Benefits/Other Payments Segment is situational for an Information Reporting Rebill Transaction, when N transaction is generated or batch information reporting transaction is generated. This segment identifies payers associated to the reporting transaction, other than the payer for which the N is being generated. This information will allow the receiving entity to identify and coordinate post adjudication adjustments for specific claim transactions, determine the order of the other payers and identify the Adjudicated Program Type of the other payers.

DUR/PPS SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
474-8E	DUR/PPS LEVEL OF EFFORT	Q***R***	Information Reporting Rebill (Claim): Required if this field could result in different drug utilization review outcome. Service: Required if this field affects documentation of professional pharmacy service.
475-J9	DUR/DUE CO-AGENT ID QUALIFIER	Q***R***	Information Reporting Rebill (Claim/Service): Required when DUR/DUE Co-Agent ID (476-H6) is used
476-H6	DUR/DUE CO-AGENT ID	Q***R***	Information Reporting Rebill (Claim): Required if this field could result in different drug utilization review outcome. Service: Required if this field affects documentation of professional pharmacy service.

Notes on DUR/PPS Segment on an Information Reporting Rebill Request:

The DUR/PPS Segment is situational for an Information Reporting Rebill request. It is used when a sender notifies the receiver of drug utilization, drug evaluations, or information on the appropriate selection to process Information Reporting Rebill. The DUR/PPS information may be sent on the initial submission or alternatively sent after a DUR/PPS rejection from a receiver. The Segment is mandatory if required under provider payer contract or where this information is necessary for processing the reporting. For retrospective 340B determination, this segment is not used.

23.3.11 PRICING SEGMENT (INFORMATION REPORTING REBILL)

PRICING SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
409-D9	INGREDIENT COST SUBMITTED	N	Information Reporting Rebill (Claim/Service): Not used.
412-DC	DISPENSING FEE SUBMITTED	N	Information Reporting Rebill (Claim/Service): Not used.

Notes on Pricing Segment on an Information Reporting Rebill Request:

The Pricing Segment is situational for an Information Reporting Rebill Request. The Pricing Segment only supports the field Patient Pay Amount Reported (433-DX) that is used in Medicare Part D payer-to-payer facilitation. Otherwise, the Pricing Segment is not used. For retrospective 340B determination, this segment is not used.

23.3.12 COMPOUND SEGMENT (INFORMATION REPORTING REBILL)

COMPOUND SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
450-EF	COMPOUND DOSAGE FORM DESCRIPTION CODE	M	
451-EG	COMPOUND DISPENSING UNIT FORM INDICATOR	M	
C60-AG	COMPOUND LEVEL OF COMPLEXITY	Q	Required if specified in trading partner agreement.
447-EC	COMPOUND INGREDIENT COMPONENT COUNT	M	Maximum count of 25 ingredients.
488-RE	COMPOUND PRODUCT ID QUALIFIER	M***R***	
489-TE	COMPOUND PRODUCT ID	M***R***	
448-ED	COMPOUND INGREDIENT QUANTITY	M***R***	
449-EE	COMPOUND INGREDIENT DRUG COST	Q***R***	Information Reporting Rebill (Claim): Required if needed for receiver claim determination when multiple products are billed.
490-UE	COMPOUND INGREDIENT BASIS OF COST DETERMINATION	Q***R***	Information Reporting Rebill (Claim): Required if needed for receiver claim determination when multiple products are billed.
362-2G	COMPOUND INGREDIENT MODIFIER CODE COUNT	Q	Information Reporting Rebill (Claim): Required when Compound Ingredient Modifier Code (363-2H) is sent.
363-2H	COMPOUND INGREDIENT MODIFIER CODE	Q***R***	Information Reporting Rebill (Claim): Required if necessary for state/federal/regulatory agency programs.

Notes on Compound Segment on an Information Reporting Rebill (Claim) Request:

The Compound Segment is situational for an Information Reporting Rebill (Claim). It is used for multi-ingredient prescriptions to report each compound ingredient. The Segment is mandatory if required under provider payer contract or where this information is necessary for processing the reporting. The Compound Segment is not used for an Information Reporting (Service).

23.3.13 CLINICAL SEGMENT (INFORMATION REPORTING REBILL)

CLINICAL SEGMENT			SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
491-VE	DIAGNOSIS CODE COUNT	Q	Information Reporting Rebill (Claim/Service): Maximum count of 5. Required if Diagnosis Code Qualifier (492-WE) and Diagnosis Code (424-DO) are used.
492-WE	DIAGNOSIS CODE QUALIFIER	Q***R***	Information Reporting Rebill (Claim/Service): Required if Diagnosis Code (424-DO) is used.
424-DO	DIAGNOSIS CODE	Q***R***	Information Reporting Rebill (Claim/Service): The value for this field is obtained from the prescriber or authorized representative. Required if this field was reported on the original adjudicated transaction. Required if this field could result in different drug utilization review outcome. Required if this information can be used in place of prior authorization. Required if necessary for state/federal/regulatory agency programs.
493-XE	CLINICAL INFORMATION COUNTER	Q***R***	Information Reporting Rebill (Claim/Service): Maximum 5 occurrences supported.

CLINICAL SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Grouped with Measurement fields (Measurement Date (494-ZE), Measurement Time (495-H1), Measurement Dimension (496-H2), Measurement Unit (497-H3), Measurement Value (499-H4)).
494-ZE	MEASUREMENT DATE	Q***R***	Information Reporting Rebill (Claim/Service): Required if necessary when this field could result in different drug utilization review outcome.
495-H1	MEASUREMENT TIME	Q***R***	Information Reporting Rebill (Claim/Service): Required if Time is known or has impact on measurement. Required if necessary when this field could result in drug utilization review outcome.
496-H2	MEASUREMENT DIMENSION	Q***R***	Information Reporting Rebill (Claim/Service): Required if Measurement Unit (497-H3) and Measurement Value (499-H4) are used. Required if necessary when this field could result in different drug utilization review outcome.
497-H3	MEASUREMENT UNIT	Q***R***	Information Reporting Rebill (Claim/Service): Required if Measurement Dimension (496-H2) and Measurement Value (499-H4) are used. Required if necessary when this field could result in different drug utilization review outcome.
499-H4	MEASUREMENT VALUE	Q***R***	Information Reporting Rebill (Claim/Service): Required if Measurement Dimension (496-H2) and Measurement Unit (497-H3) are used. Required if necessary when this field could result in different drug utilization review outcome.

Notes on Clinical Segment on an Information Reporting Rebill Request:

The Clinical Segment is situational on an Reporting Rebill request. It is used to specify clinical measurements and/or diagnosis information associated with the Information Reporting Rebill transaction. The Segment is mandatory if required under provider payer contract or where this information is necessary for reporting. For retrospective 340B determination, this segment is not used.

23.4 INFORMATION REPORTING REBILL RESPONSE DIAGRAMS AND SEGMENTS

23.4.1 TRANSMISSION ACCEPTED/TRANSACTION CAPTURED

Information Reporting Rebill transmission response Header Response Status (501-F1) of "A" (Accepted)
and Transaction Response Status (112-AN) of "C" (Captured)

The captured response is applicable when the receiver acknowledges receipt, but does not fully process the Information Reporting transaction. A Captured transaction response is not allowed for Medicare Part D payer to payer facilitation, as it does not support real-time TrOOP updates. See section "Transaction Response Status", "Duplicate Transactions" for the handling of a duplicate transaction.

For retrospective 340B determination, the Response DUR/PPS Segment is not used.

23.4.1.2 INFORMATION REPORTING RESPONSE REBILL RESPONSE SEGMENTS (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

23.4.1.2.1 RESPONSE HEADER SEGMENT (INFORMATION REPORTING REBILL) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE HEADER SEGMENT		MANDATORY SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on an Information Reporting Rebill Response:

The Response Header Segment is a mandatory, fixed length segment for an Information Reporting Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured). The "Situation" column is not applicable.

23.4.1.2.2 RESPONSE MESSAGE SEGMENT (INFORMATION REPORTING REBILL) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE MESSAGE SEGMENT		SITUATIONAL SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Information Reporting Rebill (Claim/Service): Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on an Information Reporting Rebill Response:

The Response Message Segment is situational for an Information Reporting Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured). It is used when additional text information needs to be sent.

23.4.1.2.3 RESPONSE INSURANCE SEGMENT (INFORMATION REPORTING REBILL) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE INSURANCE SEGMENT		SITUATIONAL SEGMENT	
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
301-C1	GROUP ID	Q	Information Reporting Rebill (Claim/Service): Required if needed to identify the cardholder or employer group, to identify appropriate group number for reporting. Required to identify the actual group that was used when multiple group coverages exist. Note: This field may contain the Group ID echoed from the request. May contain the actual Group ID if unknown to the receiver.
524-FO	PLAN ID	Q	Information Reporting Rebill (Claim/Service):

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
			Required if Help Desk Contact Information (C68-BC) is used.
C68-BC	HELP DESK CONTACT INFORMATION	Q***R***	Information Reporting Rebill (Claim/Service): Required if needed to provide help desk contact support information to the receiver.
C69-BD	HELP DESK CONTACT INFORMATION EXTENSION	Q***R***	Information Reporting Rebill (Claim/Service): Required if needed to provide an extension to the Help Desk Contact Information (C68-BC).
880-K5	TRANSACTION REFERENCE NUMBER	Q	Information Reporting Rebill (Claim/Service): Required if needed in addition to the Reconciliation ID to match the transaction response to the reporting transaction. Captured response does not apply to Medicare Part D payer to payer facilitation.
993-A7	INTERNAL CONTROL NUMBER	N	Information Reporting Rebill (Claim/Service): Not used.
A28-ZR	ADJUDICATED PROGRAM TYPE	N	Information Reporting Rebill (Claim/Service): Not used.
B04-BT	NEXT AVAILABLE FILL DATE	N	Information Reporting Rebill (Claim/Service): Not used.

Notes on Response Status Segment on an Information Reporting Rebill Response:

The Response Status Segment is mandatory for an Information Reporting Rebill response for Header Response Status (501-F1) = "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured). The Response Status Segment is sent from the sender to the receiver to identify the outcome of the request.

Information Reporting Rebill transactions – The "C" (Captured) event occurs after the reversal portion of the information reporting rebill is processed successfully and the information reporting is captured for processing. If the information reporting rebill reversal is not processed successfully, a "R" (Rejected) response must be sent. Captured response does not apply to Medicare Part D payer to payer facilitation.

23.4.1.2.6 RESPONSE CLAIM SEGMENT (INFORMATION REPORTING REBILL) (TRANSMISSION ACCEPTED/TRANSACTION CAPTURED)

RESPONSE CLAIM SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
455-EM	PRESCRIPTION/SERVICE REFERENCE NUMBER QUALIFIER	M	Information Reporting Rebill (Claim): For Transaction Code of "N3", in the Response Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "1" (Rx Billing). Information Reporting Rebill (Service): For Transaction Code of "N3", in the Response Claim Segment, the Prescription/Service Reference Number Qualifier (455-EM) is "2" (Service Billing).
402-D2	PRESCRIPTION/SERVICE REFERENCE NUMBER	M	Information Reporting Rebill (Claim/Service): Significant digits on submission must be returned on response. See section "Standard Conventions", "Character Set Designation Truncation", "Numeric", "Numeric Truncation".
551-9F	FORMULARY ALTERNATIVE PRODUCT COUNT	N	Information Reporting Rebill (Claim/Service): Not used.
E89-ZO	FORMULARY ALTERNATIVE EFFECTIVE DATE	N***R***	Information Reporting Rebill (Claim/Service): Not used.

Notes on Response DUR/PPS Segment on an Information Reporting Rebill Response:

The Response DUR/PPS Segment is situational for an Information Reporting Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "C" (Captured). The Response DUR/PPS Segment is used to identify a drug utilization review or professional pharmacy service event, opportunity, or information. For retrospective 340B determination, this segment is not used.

RESPONSE HEADER SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on an Information Reporting Rebill Response:

The Response Header Segment is a mandatory, fixed length segment for an Information Reporting Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). The "Situation" column is not applicable.

**23.4.3.2.2 RESPONSE MESSAGE SEGMENT (INFORMATION REPORTING REBILL) (TRANSMISSION
ACCEPTED/TRANSACTION REJECTED)**

RESPONSE MESSAGE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Information Reporting Rebill (Claim/Service): Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on an Information Reporting Rebill Response:

The Response Message Segment is situational for an Information Reporting Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). It is used when additional text information needs to be sent.

**23.4.3.2.3 RESPONSE INSURANCE SEGMENT (INFORMATION REPORTING REBILL) (TRANSMISSION
ACCEPTED/TRANSACTION REJECTED)**

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
301-C1	GROUP ID	Q	Information Reporting Rebill (Claim/Service): Required if needed to identify the cardholder or employer group, to identify appropriate group number for reporting. Required to identify the actual group that was used when multiple group coverages exist. Note: This field may contain the Group ID echoed from the request. May contain the actual Group ID if unknown to the receiver.
524-FO	PLAN ID	Q	Information Reporting Rebill (Claim/Service): Required if needed to identify the actual plan parameters, benefit, or coverage criteria, when available. Required to identify the actual plan ID that was used when multiple group coverages exist. Required if needed to contain the actual plan ID if unknown to the receiver.
545-2F	NETWORK REIMBURSEMENT ID	N	Information Reporting Rebill (Claim/Service): Not used.
C96-KR	PAYER/HEALTH PLAN ID COUNT	Q	Information Reporting Rebill (Claim/Service): Maximum Count of 3.

- 690 -

RESPONSE INSURANCE SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
			Required if Payer/Health Plan ID (569-J8) is used.
568-J7	PAYER/HEALTH PLAN ID QUALIFIER	Q***R***	Information Reporting Rebill (Claim/Service): Required if Payer/Health Plan ID (569-J8) is used.
569-J8	PAYER/HEALTH PLAN ID	Q***R***	Information Reporting Rebill (Claim/Service): Required when identification of the Payer/Health Plan is necessary. Required when a Medicare Part D Contract ID applies to the response.
115-N5	MEDICAID ID NUMBER	N	Information Reporting Rebill (Claim/Service): Not used.
116-N6	MEDICAID AGENCY NUMBER	N	Information Reporting Rebill (Claim/Service): Not used.
302-C2	CARDHOLDER ID	Q	Information Reporting Rebill (Claim/Service): Required if the identification to be used in future transactions is different than what was submitted on the request.

Notes on Response Insurance Segment on an Information Reporting Rebill Response:

The Response Insurance Segment is situational for an Information Reporting Rebill response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected). It is used when coverage or reimbursement parameters or identifiers need to be sent.

23.4.3.2.4 RESPONSE PATIENT SEGMENT (INFORMATION REPORTING REBILL) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE PATIENT SEGMENT		Mandatory or Situational	SITUATIONAL SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
618-RR	PATIENT ID COUNT	Q	Information Reporting Rebill (Claim/Service): Maximum Count of: 9 Required if Patient ID Qualifier (331-CX) and Patient ID (332-CY) are used.
331-CX	PATIENT ID QUALIFIER	Q***R***	Information Reporting Rebill (Claim/Service): Required if Patient ID (332-CY) is used.
332-CY	PATIENT ID	Q***R***	Information Reporting Rebill (Claim/Service): Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination.
310-CA	PATIENT FIRST NAME	Q	Information Reporting Rebill (Claim/Service): Required if known.
311-CB	PATIENT LAST NAME	Q	Information Reporting Rebill (Claim/Service): Required if known.
304-C4	DATE OF BIRTH	Q	Information Reporting Rebill (Claim/Service): Required if known.

Notes on Response Patient Segment on an Information Reporting Rebill Response:

The Response Patient Segment is situational for Information Reporting Rebill transmission response Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected) when patient demographic information needs to be sent from the sender to the receiver.

23.4.3.2.5 RESPONSE STATUS SEGMENT (INFORMATION REPORTING REBILL) (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

RESPONSE STATUS SEGMENT		Mandatory or Situational	MANDATORY SEGMENT
Field	Field Name		Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Information Reporting Rebill (Claim/Service): Required if needed to identify the transaction.
B98-34	RECONCILIATION ID	N	Information Reporting Rebill (Claim/Service): Not used.

Response Message Segment
Mandatory
Segment Separator
Response Status Segment

There are no situational transaction-level segments for Information Reporting Rebill transmission response Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected).

23.4.4.2 INFORMATION REPORTING REBILL RESPONSES (TRANSMISSION REJECTED/TRANSACTION REJECTED)

23.4.4.2.1 IN RESPONSE HEADER SEGMENT (INFORMATION REPORTING REBILL) (TRANSMISSION REJECTED/TRANSACTION REJECTED)

	RESPONSE HEADER SEGMENT		MANDATORY SEGMENT
Field	Field Name	Mandatory or Situational	Situation
102-A2	VERSION/RELEASE NUMBER	M	
103-A3	TRANSACTION CODE	M	
109-A9	TRANSACTION COUNT	M	
501-F1	HEADER RESPONSE STATUS	M	
202-B2	SERVICE PROVIDER ID QUALIFIER	M	
201-B1	SERVICE PROVIDER ID	M	
401-D1	DATE OF SERVICE	M	

Notes on Response Header Segment on an Information Reporting Rebill Response:

The Response Header Segment is a mandatory, fixed length segment for an Information Reporting Rebill response when the Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). The "Situation" column is not applicable.

If either the entire transmission or the Header is in error, the Header Response Status (501-F1) = "R" (Rejected). The transaction within the transmission must be rejected with an "R".

If the transaction rejects for detail errors, the Header Response Status (501-F1) = "A" (Accepted) and the Transaction Response Status (112-AN) will be "R".

23.4.4.2.2 RESPONSE MESSAGE SEGMENT (INFORMATION REPORTING REBILL) (TRANSMISSION REJECTED/TRANSACTION REJECTED)

	RESPONSE MESSAGE SEGMENT		SITUATIONAL SEGMENT
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Information Reporting Rebill (Claim/Service): Required if text is needed for clarification or detail. The Additional Message Information (526-FQ) may contain an extension of the Message (504-F4), or The Message (504-F4) will contain transmission-level text and Additional Message Information (526-FQ) will contain transaction-level text.

Notes on Response Message Segment on an Information Reporting Rebill Response:

The Response Message Segment is situational for an Information Reporting Rebill response when the Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected). It is used when additional text information needs to be sent.

24.5 RESPONSE SEGMENT MATRICES BY FIELD WITHIN SEGMENT – LEGEND

DESIGNATION	VALUE	EXPLANATION
MANDATORY	M	The Segment is mandatory for the Transaction or The Field is mandatory for the Segment for the Transaction. Mandatory elements have structural requirements. Mandatory are bolded for clarity.
SITUATIONAL		The Segment has been further designated for usage for the Transaction or The Field has been further designated for usage for the Transaction.
Required	R	The Field has been designated with the situation of “Required” for the Segment for the Transaction. Required are bolded italicized for clarity.
Required for Subrogation only	RM	The Field has been designated with the situation of “Required” for the Segment for the Transaction for Subrogation usage only. Required are bolded italicized for clarity.
Qualified Requirement	Q	The situations designated have qualifications for usage (“Required if x”, “Not required if y”).
Qualified Requirement for Subrogation only	QM	The situations designated have qualifications for usage (“Required if x”, “Not required if y”) for Subrogation.
INFORMATIONAL ONLY	I	The field is not designated as mandatory, required, or situational but communicates information that should be included when applicable.
OPTIONAL	O	The Field has been designated as optional usage (situations were not defined).
NOT USED	N	The Segment is not used for the Transaction or The Field is not used for the Segment for the Transaction. Not used are shaded for clarity.

24.7 RESPONSE SEGMENT MATRICES BY SEGMENT – LEGEND

Submission and response requirements are shown for each segment as Mandatory (M), Situational (S), or Not Sent (N). Valid “values” are shown for each transaction type in the Header and Transaction Response Status Fields (501-F1 and 112-AN).

LEGEND:		
Categorization		Explanation
M	Mandatory	The Segment is Mandatory.
S	Situational	The segment situations defined have qualifications for usage (“Required if x”, “Not required if y”) in this Transaction.
N	Not used	The segment is not used in this Transaction.
Row/Column Shaded		The segment is not valid for this Transaction.

24.8 RESPONSE SEGMENT MATRICES BY SEGMENT

24.8.1 TRANSMISSION ACCEPTED; TRANSACTION PAID OR DUPLICATE OF PAID

Transmission

Header Response Header

Header Response Status (501-F1) = “A” Accepted

Transaction

Response Status

Transaction Response Status (112-AN) = “P” Paid or “D” Duplicate of Paid

The following transactions are supported in “P” Paid or “D” Duplicate of Paid Matrix:

TRANSMISSION ACCEPTED TRANSACTION PAID OR DUPLICATE OF PAID RESPONSE SEGMENT USAGE MATRIX						
SEGMENT	Billing (Claim) or Encounter	Rebill (Claim)	Billing (Service)	Rebill (Service)	Prior Authorization Request & Billing	Prior Authorization Inquiry
Response Header Segment	M	M	M	M	M	M
Header Response Status (501-F1)	A	A	A	A	A	A

Version F6

TRANSMISSION ACCEPTED TRANSACTION PAID OR DUPLICATE OF PAID RESPONSE SEGMENT USAGE MATRIX						
SEGMENT	Billing (Claim) or Encounter	Rebill (Claim)	Billing (Service)	Rebill (Service)	Prior Authorization Request & Billing	Prior Authorization Inquiry
Response Message Segment	S	S	S	S	S	S
Response Insurance Segment	S	S	S	S	S	S
Response Insurance Additional Information Segment	N	N	N	N	N	N
Response Patient Segment	S	S	S	S	S	S
Response Status Segment	M	M	M	M	M	M
Transaction Response Status (112-AN)	P, D	P	P, D	P	P, D	P, D
Response Claim Segment	M	M	M	M	M	M
Response Pricing Segment	M	M	M	M	M	M
Response DUR/PPS Segment	S	S	S	S	S	S
Response Prior Authorization Segment	S	S	S	S	M	M
Response Other Payers Segment	S	S	S	S	S	S
Response Intermediary Segment	S	S	S	S	S	N
Response Other Related Benefit Detail Segment	S	S	S	S	S	S
Response Provider Segment	S	S	S	S	S	S

The following transactions do not support the "D" Duplicate of Paid response:

Rebill
Information Reporting Rebill

***Special Note:**

Prior Authorization reversals are used to back out the request for authorization, but not any claims submitted against the prior authorization. To reverse a Prior Authorization Request And Billing, paid billings must be reversed before the prior authorization is reversed. The pharmacy must submit a Claim or Service Reversal (Transaction Code = B2 or S2) before submitting a Prior Authorization Reversal request. If there are no Claims or Services paid for the Prior Authorization in question, the processor must accept the Prior Authorization Reversal for the prior authorization only.

24.8.2 TRANSMISSION ACCEPTED; TRANSACTION BENEFIT MATRIX

Transmission
Header Response Header
Header Response Status (501-F1) = "A" Accepted
Transaction
Response Status
Transaction Response Status (112-AN) = "B" Benefit

The following transactions are supported in "B" Benefit Matrix:

TRANSMISSION ACCEPTED TRANSACTION BENEFIT RESPONSE SEGMENT USAGE MATRIX	
SEGMENT	Predetermination Of Benefits (Claim)
Response Header Segment	M
Header Response Status (501-F1)	A
Response Message Segment	S
Response Insurance Segment	S
Response Insurance Additional Information Segment	N

25 STRUCTURE QUICK REFERENCE

See section “*Transmission Structure*” for specific information on segment and field usage per transaction.

The following conventions appear in the charts below.

M = Mandatory field

S = Situational field – which may be defined as situational, optional, or not used, per the segment and field usage in section “*Transmission Structure*”.

R = Repeating field

Field Format:

x(##) = alphanumeric field size

9(##) = numeric field size

See **NCPDP Data Dictionary** for more information.

NOTE: Truncation within a Transaction Header Segment is not allowed.

NOTE: Special instructions for submitting repeating fields that are situational or optional can be found in section “*Standard Conventions*”, “*Repetition and Multiple Occurrences*”.

NOTE: See section “*General Syntax Outline*” for information about segment order.

26 RESPONSE OVERVIEW

26.1 RESPONSE STATUS BY TRANSACTION TYPE

An "Acceptable" transmission response may contain paid, captured, approved, and rejected status codes for the transaction.

A status code response must be transmitted for each submitted transaction whether approved, rejected for unacceptable header information, or rejected for unacceptable transaction information.

If the status code indicates the header data is unacceptable, all detail items submitted are in error and the reject codes that are applicable are present in the transaction reject code list in addition to any reject codes that are specific to the transaction.

The following is a high level summary. Please refer to section "Transmission Structure", "Response Segment Matrices By Segment".

Transaction Type	Response Status		Comment
	Response Header Segment – Header Response Status	Response Status Segment – Transaction Response Status	
Eligibility Verification	A	A	Transmission Accepted. Transaction Approved. Duplicate approved eligibility must be responded to with an "A".
	A	R	Transmission Accepted. Transaction Rejected.
	R	R	Transmission Rejected. Transaction Rejected.
Claim Billing or Encounter, Service Billing	A	C, Q	Transmission Accepted. Transaction Captured, or Duplicate of Captured.
	A	P, D	Transmission Accepted. Transaction Paid, or Duplicate of Paid.
	A	R	Transmission Accepted. Transaction Rejected.
	R	R	Transmission Rejected. Transaction Rejected.
Predetermination Of Benefits	A	B	Transmission Accepted. Transaction Benefit.
	A	R	Transmission Accepted. Transaction Rejected.
	R	R	Transmission Rejected. Transaction Rejected.
Claim or Service Reversal	A	A, S	Transmission Accepted. Transaction Approved, or Duplicate of Approved.
	A	C, Q	Transmission Accepted. Transaction Captured, or Duplicate of Captured.
	A	R	Transmission Accepted. Transaction Rejected.
	R	R	Transmission Rejected. Transaction Rejected.
Claim or Service Rebill	A	C	Transmission Accepted. Transaction Captured.
	A	P	Transmission Accepted. Transaction Paid.
	A	R	Transmission Accepted. Transaction Rejected.
	R	R	Transmission Rejected. Transaction Rejected.
Prior Authorization Request And Billing (Claim/Service)	A	C, Q	Transmission Accepted. Transaction Captured, or Duplicate of Captured.
	A	P, D	Transmission Accepted. Transaction Paid, or Duplicate of Paid.
	A	F	Transmission Accepted.

	A	R	Transmission Accepted. Transaction Rejected.
	R	R	Transmission Rejected. Transaction Rejected.

26.2 RESPONSE PROCESSING GUIDELINES

As of Version E7, a transmission contains only one request transaction. The processor/PBM must respond to each request. The Transaction Count in the response must match the Transaction Count in the request.

The Response Status Segment will have response information for each request transaction. Each transaction response will contain its own Transaction Response Status.

26.3 TRANSACTION RESPONSE STATUS (112-AN)

26.3.1 APPROVED

An Approved response is returned in Eligibility transactions when the patient or cardholder is eligible. In other transactions, the Approved response is returned when the processor or reporting entity acknowledges and processes the request.

26.3.2 REJECT

Note: For syntax errors, the Reject Code (511-FB) of "R8" must be used whenever a specific reject code is not designated. Specific reject codes must be returned whenever possible to assist in understanding the rejection. Refer to the NCPDP *External Code List* for guidance on the use of reject codes.

26.3.3 DEFERRED

Final determination of the Prior Authorization request cannot be made until additional medical information is obtained. The message (504-F4) and/or Additional Message Information (526-FQ) will contain what additional information is needed. Each processor governs the submission of additional information and the pharmacy should consult the appropriate provider billing manual. Typically, if the additional information is not received within a specific timeframe, the prior authorization will be denied.

26.3.4 BENEFIT

A Benefit response is returned to the provider when the Processor processes the claim, and returns a snapshot of the patient's responsibility at this point in time. See section "*Predetermination Of Benefits Information*".

The Predetermination Of Benefits transaction is used on claim submission only. It is not valid for a service submission.

The component fields of Patient Pay Amount (505-F5) are returned in the Response Pricing Segment and the Patient Pay Amount Formula must be adhered to. See section "*Pricing Guidelines*" "*Patient Financial Responsibility*". Of note, the Total Amount Paid (509-F9) is not used in this transaction response. There is no need for a duplicate response due to the nature of the predetermination of benefits transaction. Each submission of the transaction is processed with the response reflective of current information.

26.3.5 CAPTURED

A captured response is employed when the processor does not require on-line payment information. It is also used when information transactions are sent and require nothing more than acknowledgment of their receipt at the processor or endpoint. Medicare Part D Information Reporting however, does not allow for Captured response due to the real-time TROOP update requirements.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

If a transaction has already been captured, but the response was not received by the submitter, upon receipt of a resubmitted transaction the processor must return a duplicate response containing the original response information. See section *“Transmission Structure”* to determine where duplicate responses apply.

26.3.5.1 BUSINESS FUNCTION OF CAPTURE

26.3.5.1.1 VALID USES

In Claim/Service Billing, a “C” (Capture) response is supported. The business of capture is to be used for:

1. **Intermediary Services** Two valid Intermediary services are:
 1. Provider/Intermediary agreements to provide services such as additional editing, pricing, billing, and payment reconciliation.
 2. Payer/Intermediary agreements to provide some level of editing, pricing, and patient financial responsibility calculation, with the ultimate payer having the option to perform additional edits.

2. **Replacement of manual billing**

The usage of this type of Capture should be used with caution, due to issues of:

- Inability for provider to be able to accurately determine patient financial responsibility for reasons of:
 - Most plans today expect patient to pay some portion of product cost.
 - Many plans vary patient financial responsibility based on brand/generic, formulary/non-formulary, etc.
 - Drug Databases do not categorize drugs the same way.
 - Some drugs/patients are excluded from patient financial responsibility.
- Coordinated Pro-DUR

This business function must take place within a “P” (Paid) or “R” (Rejected) response, however it may be allowed on a “C” Capture used to replace manual billing when regulated for governmental agencies.

If the Transaction Response Status (112-AN) = C (Captured) or Q (Duplicate of Captured), dollar fields should be supplied in the response.

- If the response is a “true” Capture (i.e., replacement of batch billing, with no edits or pricing), then the processor should:
 - o Determine the patient financial responsibility and return it as a valid Patient Pay Amount (505-F5) with the corresponding Patient Pay Component value(s). Then calculate the Total Amount Paid (509-F9) using the submitted fields and the determined Patient Pay Amount (505-F5). The Transaction response Status Code of “C” (Captured) is an indication to the provider receiving the response that further editing and financial calculation may occur.

For example:

Ingredient Cost Submitted (409-D9)	35.00	Ingredient Cost Paid (506-F6)	35.00
Dispensing Fee Submitted (412-DC)	3.00	Dispensing Fee Paid (507-F7)	3.00
Incentive Amount Submitted (438-E3)	1.00	Incentive Amount Paid (521-FL)	1.00
Regulatory Fee Amount Submitted (481-HA)	.25	Regulatory Fee Amount Paid (558-AW)	.25
Percentage Tax Amount Submitted (482-GE)	.25	Percentage Tax Amount Paid (559-AX)	.25
Other Amount Claimed Submitted (480-H9)	1.00	Other Amount Paid (565-J4)	1.00
		Patient Pay Amount (505-F5)	10.50
		Patient Pay Component Count (C94-KP)	2
		Patient Pay Component Qualifier (C95-KQ)	03(tax)
		Patient Pay Component Amount (C93-KN)	.50
		Patient Pay Component Qualifier (C95-KQ)	05 (copay)
		Patient Pay Component Amount (C93-KN)	10.00
		Patient Percentage Tax Amount (575-EQ)	.50
Gross Amount Due (430-DU)	40.50	Total Amount Paid (509-F9)	30.00

In this example, Patient Pay Amount (505-F5) is “real” and Total Amount Paid (509-F9) is calculated using submitted fields and “real” patient financial responsibility. The other amount fields contain the submitted value.

- o If the processor is unable to determine the actual patient financial responsibility amount, the provider must know (by trading partner agreement) the copays or coinsurance to charge and factor that into their system so collection occurs.
- If the response is captured by an Intermediary who support the pricing criteria, the corresponding response fields are populated with the probable values and those values used to determine estimated pricing as noted above. Since the claim has not been fully adjudicated, this remains a capture response.
- A Captured response must not be returned when processor is performing maintenance. These claims must be rejected. The recommendation is to use Reject Code (511-FB)= “96” (Scheduled Downtime) however; other 9x codes could be used if the maintenance was not scheduled. The reject code lets the provider know to reprocess the claim at a later time.

To support replacement of manual billing, the processor should

- Determine the patient financial responsibility and return it as a valid Patient Pay Amount (505-F5).
- Then calculate Total Amount Paid (509-F9) using the submitted fields and the determined patient financial responsibility amount.
- Since this result comes with a “C” (captured) response indication, provider should recognize that further editing and re-calculation may occur which may result in different actual amounts reimbursed.

26.3.5.1.2 CAPTURE CONSISTENCY

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use
- 857 -

The use of a "C" (Capture) response should be *consistent* within a **IIN Number** (101-A1)/**Processor Control Number** (102-A2) combination. All claims at all times for this **IIN/PCN** combination should be handled the same way. If the processor would normally "P" (Paid) or "R" (Rejected) this claim were it submitted at a different time, a Capture Response must not be used. With this consistency, providers should be able to know by trading partner agreement when returned dollar amounts are parroted versus when they are estimated dollar amounts.

Rule of Thumb:

- Submitted dollar amounts = Response Captured dollar amounts
Assume parroted values from submission returned
- Submitted dollar amounts not = Response Captured dollar amounts
Assume estimated values returned

26.3.5.2 REVERSALS AND CAPTURE

If a processor routinely captures claims for products and/or services online, they must provide the Reconciliation ID (B98-34) since they must also support reversals of those claims online.

The response of an approved Reversal must be supported in order to adjust actual payment and/or utilization data via remittance processing.

It is noted that the captured response is not supported in some transactions that support reversals.

26.3.5.3 BUSINESS FUNCTIONS NOT SUPPORTED FOR CAPTURE

The following business functions for Capture are not supported:

- 100% patient financial responsibility – This is technically a payment and a "P" (Paid) response is to be returned.
- Maintenance Windows – this is a Reject. Suggest use of Reject Code (511-FB) = "96" (*Scheduled Downtime*); however any 9x error code would supply provider with information to reprocess claim later.
- Coordinated Pro-DUR – this business function should take place within a "P" (Paid) or "R" (Rejected) response. See note above.
- Product Ordering – this is not a function of a Claim or Service Billing. Coupon processing – this business function should take place within a "P" (Paid) response. Until the payment information is returned on the coupon, the sender is unable to determine the final charge for the product. Coordination of Benefits processing cannot proceed without final determination. Provider is unable to send appropriate claim to next payer. A Capture response does not contain rejection information. The Reject Code and Count fields, which are specifically for reject situations, are to be used when the Transaction Response Status = "R" (Rejected). These fields must not be returned for values other than "R".

26.3.6 PAID

A Paid response is returned to the provider when all telecommunication and plan requirements have been met. The transmission is accepted, the transaction is accepted and the billing is in compliance with plan parameters.

26.3.7 DUPLICATE TRANSACTIONS

There are situations where the Originator sends the transaction request and the Processor receives the request and processes the transaction. Then, due to communication problems or interruptions, the response is never received by the Originator.

- Because no response has been received, the Originator must resubmit the transaction request.
- The Receiver does not know why they are receiving this transaction again since they show it as having been approved (Paid, Captured, etc.) so they should assume the originator did not receive their original response. For this reason, they must respond with the same information (same dollars, same messaging, as applies to transaction type) as the first conversation, but the Transaction Response Status (112-AN) must contain the appropriate duplicate value.
- When a duplicate is determined, the Reconciliation ID (B98-34) returned must be the Reconciliation ID (B98-34) of the original transaction that is causing the duplicate response. This allows Reversal matching to occur should the transaction subsequently be reversed.
- If the transaction is not an exact match on Service Provider ID, Prescription/Service Reference Number, Date of Service and Fill Number, the processor should treat this as a separate and different claim and handle appropriately – which can mean rejecting this claim.
- If the 4 key fields noted above match, the processor is advised to look further to determine if this is a COB claim, same day Partial/Completion Fill, Vacation fill, etc. and handle as deemed appropriate per trading partner agreement.

If the originator receives a Duplicate response to what they feel is a unique transaction that has not been previously submitted, they need to contact the processor and determine why the submission has been found to be a duplicate. The Reconciliation ID (B98-34) received can be used by the Originator to identify the other transaction that processor is seeing as a duplicate and provide input to the conversation that should occur.

See section "*Response Overview*", "*Response Status By Transaction Type*" for more information. Any transaction that does not fit the "D" Duplicate criteria must result in "R" Reject.

A transmission request is considered a duplicate submission for these transaction types:

Transaction Type	Transaction Description	Response Status Codes related to Duplicate
B1/S1	Claim/Service Billing	"P" (Paid) or "D" (Duplicate of Paid) "C" (Captured) or "Q" (Duplicate of Captured)

Version F6

January 2020

OFFICIAL RELEASE

Transaction Type	Transaction Description	Response Status Codes related to Duplicate
B2/S2	Claim/Service Reversal	"A" (Approved) or "S" (Duplicate of Approved) "C" (Captured) or "Q" (Duplicate of Captured)
P1	Prior Authorization Request And Billing	"P" (Paid) or "D" (Duplicate of Paid) "C" (Captured) or "Q" (Duplicate of Captured)
P2	Prior Authorization Reversal	"A" (Approved) or "S" (Duplicate of Approved) "C" (Captured) or "Q" (Duplicate of Captured)
P3	Prior Authorization Request Only	"A" (Approved) or "S" (Duplicate of Approved) "C" (Captured) or "Q" (Duplicate of Captured)
P4	Prior Authorization Inquiry	"P" (Paid) or "D" (Duplicate of Paid) "C" (Captured) or "Q" (Duplicate of Captured) "A" (Approved) or "S" (Duplicate of Approved)
N1	Information Reporting	"A" (Approved) or "S" (Duplicate of Approved) "C" (Captured) or "Q" (Duplicate of Captured)
N2	Information Reporting Reversal	"A" (Approved) or "S" (Duplicate of Approved) "C" (Captured) or "Q" (Duplicate of Captured)

Since there is no 'duplicate' response code to an Eligibility request, if a duplicate eligibility transaction is encountered, the processor must return the original approved response again.

26.3.7.1 DUPLICATE TRANSMISSION FOR A DOWNSTREAM PAYER

A duplicate transmission for a downstream payer is based on the following criteria:

- Same Patient/Member
- Same Service Provider ID
- Same Date of Service
- Same Product/Service ID
- Same Prescription/Service Reference Number
- Same Fill Number (required if Claim Billing/Claim Rebill/Encounters; situational on Service Billing/Service Rebill)
- Same Other Coverage Code
- Same Other Payer Coverage Type (the highest coverage type value)

When a transaction is identified as a Duplicate, the Reconciliation ID (B98-34) of the transaction causing the "D" must be returned on the response. This will facilitate a reversal of the original transaction should that need to occur at a later time.

The same processor may be involved in coordination of benefits for a patient for multiple benefit plans (multiple coordination of benefits occurrences). Sometimes processors have difficulty determining a duplicate claim/service when they are involved for example as the primary and secondary payer, or primary and tertiary, or secondary and tertiary. Communication timeouts may occur that cause a pharmacy to resubmit a claim/service to obtain the response. To determine a duplicate claim/service involved in Coordination of Benefits, the Coordination of Benefits/Other Payments Segment must be interrogated when the same processor is involved in multiple coordination of benefit occurrences. The Coordination of Benefits/Other Payments Segment provides the pointer to clarify the duplicate.

The Other Payer Coverage Type (338-5C) is in the Coordination of Benefits/Other Payments Segment. A downstream payer must interrogate the Coordination of Benefits/Other Payments Segment, looking at the **highest value** of the Other Payer Coverage Type (338-5C) to determine if the claim/service is a duplicate.

Note, the Other Payer Coverage Type (338-5C) occurrences do not have to appear in sequential order (primary, secondary, tertiary), thus can appear in any order. Refer to the COB Processing Guidelines in this document for additional information.

26.3.7.2 IS THIS A DUPLICATE?

Scenario in all cases processor has a PAID claim on file.	Y/N	Explanation
Processor is now getting a claim for the <u>same</u> Pharmacy, Rx, Fill Date, Fill Number, Drug.	Yes	Appears that pharmacy did not get the earlier response. Return same info with "D" Transaction Status Code replacing "P" B98-34 - Reconciliation ID must be the original Reconciliation ID F3 – Authorization Number can be the same or a new value depending on processor use.
Processor is now getting a claim for the <u>same</u> Pharmacy, Rx, Fill Date, Fill Number, Drug but Other Coverage Code or Other Payer Coverage Type is NOT the same as previously paid.	No	This is not a duplicate. Processor should recognize this as a billing for other coverage for the member. It is a COB claim. • If member has additional coverage to what receiving processor has already paid, this should process as a COB claim. • If the member does NOT have further coverage to what receiving processor has already paid, the COB claim should be rejected.

Version F6

January 2020

OFFICIAL RELEASE

Scenario in all cases processor has a PAID claim on file.	Y/N	Explanation
Processor is now getting a claim for the <u>same</u> Pharmacy, Member, Fill Date, Drug. The Rx number is not the same.	No	This is NOT a duplicate. Processor can 'handle appropriately' which may mean the transaction is rejected. Perhaps pharmacy tried to unsuccessfully reverse the other Rx. Or they did not get the original PAID response back? Regardless, the change of the Rx number makes this a NEW claim. Processor should look at remaining field values to see if a PA, SCC codes, other override codes might explain why this 2 nd dispensing of the drug may be occurring and proceed to appropriately to pay or reject this submission.
Processor is now getting a claim for the <u>same</u> Pharmacy, Rx, Fill Date, Drug but different Fill Number.	No	As noted above, this should be viewed as a different claim. There may be SCC or other override codes that might explain the 2 nd fill on the same day. Processing should determine if there is adequate reason to pay the claim or if it should be rejected.
Processor is now getting a claim for the <u>same</u> Pharmacy, different Rx, same Fill Date, same Drug, same Cardholder ID.	No	Cardholder IDs can be the same across clients and can also be the same for family members where some combination of Person Code, Date of Birth, Patient name is used to isolate the specific member who is receiving the medications. Often within families, two children will have the same illness and require the same medication at the same time. In the pharmacy system each individual is a separate patient and different Rx numbers will be assigned for the prescription for person A and person B.
Processor is now getting a claim for the same Member and Drug, but it is from a different pharmacy. Rx number is probably different as well. Date of Service is the same or very close to the same date.	No	This appears to be a situation where perhaps the member has multiple prescriptions valid at more than one pharmacy – but this is this is not Duplicate per the standard. Processor can reject this as duplicate therapy where the DUR loop can indicate this or a similar med was filled at a different pharmacy and the date that took place. This should be viewed as a NEW claim and handled appropriately.

26.3.7.3 DUPLICATE TRANSMISSION FOR A REVERSAL FOR A PRIMARY PAYER

For Reversal transactions, the following criteria must be used to determine a duplicate request:

- Same Service Provider ID
- Same Date of Service
- Same Prescription/Service Reference Number
- Same Product/Service ID
- Same Fill Number (required if Claim Billing/Claim Rebill/Encounters; situational on Service Billing/Service Rebill)
- Same Other Coverage Code
- Same Other Payer Coverage Type (the highest coverage type value)

The same processor may be involved in coordination of benefits for a patient for multiple benefit plans (multiple coordination of benefits occurrences). Sometimes processors have difficulty determining a duplicate claim/service reversal when they are involved for example as the primary and secondary payer, or primary *and* tertiary, or secondary *and* tertiary. Communication timeouts may occur that cause a pharmacy to resubmit a claim/service reversal to obtain the response. On a reversal involved in Coordination of Benefits, to clarify which reversal the pharmacy is requesting to be processed, the Coordination of Benefits/Other Payments Segment is sent. The Coordination of Benefits/Other Payments Segment provides the pointer to specify which reversal to back out. This does not change the order of reversing claims/services; it clarifies which claim/service to reverse. The pharmacy must reverse the claim/service in the correct back out order (see section "Reversal Information").

26.3.7.4 EXCERPT EXAMPLE 1

In this example, the claim/service reversal is sent to the payer. The highest value of Other Payer Coverage Type (338-5C) is "02" (Secondary). This means the claim/service reversal is being sent to a tertiary payer. For this claim/service reversal to be a duplicate, the tertiary payer must interrogate the duplicate fields cited above, with the Other Payer Coverage Type (338-5C) of "02", since "02" is the highest value.

Coordination of Benefits/Other Payments Segment			
Field	Field Name		
111-AM	SEGMENT IDENTIFICATION		
337-4C	COORDINATION OF BENEFITS/OTHER PAYMENTS COUNT	2	
338-5C	OTHER PAYER COVERAGE TYPE	01	Primary
338-5C	OTHER PAYER COVERAGE TYPE	02	Secondary

26.3.7.5 EXCERPT EXAMPLE 2

In this example, the claim/service reversal is sent to the payer. The highest value of Other Payer Coverage Type (338-5C) is "01" (Primary). This means the claim/service reversal is being sent to a secondary payer. For this claim/service reversal to be a duplicate, the secondary payer must interrogate the duplicate fields cited above, with the Other Payer Coverage Type (338-5C) of "01", since "01" is the highest value.

Coordination of Benefits/Other Payments Segment			
Field	Field Name		
111-AM	SEGMENT IDENTIFICATION		
337-4C	COORDINATION OF BENEFITS/OTHER PAYMENTS COUNT	1	
338-5C	OTHER PAYER COVERAGE TYPE	01	Primary

26.3.7.6 DUPLICATE INFORMATION FOR OTHER TRANSACTIONS

Eligibility Verification approval, Prior Authorization Inquiry approval, and Prior Authorization deferred responses for duplicate scenarios have specific handling described in the appropriate transaction section. Transaction responses that do not fit the duplicate criteria will result in the "R" (Reject) Transaction Response Status (112-AN).

Duplicate response logic must not be applied by the processor to:

- Rebill
- Information Reporting Rebill
- Predetermination Of Benefits

There is no need for a duplicate response due to the nature of the predetermination of benefits transaction. Each submission of the transaction is processed with the response reflective of current information.

There is no need for a duplicate response due to the nature of the rebill transaction and its implied reversal. Because the implied reversal would reverse the paid claim, a duplicate transaction would not exist.

If a processor supported duplicate responses in rebills the submitter would not be able to modify a field that is not included in the duplicate field check. See section "Transaction Response Status", *Duplicate Processing For All Rebill Transactions* for more information.

26.3.7.7 DUPLICATE PROCESSING FOR ALL REBILL TRANSACTIONS

In previous versions of the standard, the rebill transactions supported the duplicate Transaction Response Status (112-AN) values, as appropriate. The rebill transactions are:

- Transaction Code (103-A3) of
- B3 – Claim Rebill
 - S3 – Service Rebill
 - N3 - Information Reporting Rebill

Upon further review, the following discussion took place.

Per this document, a duplicate check is based on same Patient, Service Provider ID, Date of Service, Product/Service Reference Number, Prescription/Service Reference Number, and Fill Number (see section "Transaction Response Status", *Duplicate Transactions*).

For a reversal, the duplicate check is based on the same Service Provider ID, Date of Service, Product/Service Reference Number, Prescription/Service Reference Number, and Fill Number.

All rebill transactions have an implied reversal.

See Rebill section for each transaction, for example "Rebill Information" (for Claim or Service Rebills), "Information Reporting Rebill Information"

Scenario:

Transaction 1 - A claim is submitted and paid by a processor.

Transaction 2 - The same claim is sent to the processor as a Rebill to correct the Prescriber ID. The processor receives the Rebill and processes the reversal and pays the claim with the different Prescriber ID.

There is a communication-level drop and the provider does not receive the response.

Transaction 3 - The provider sends the Rebill again. The processor applies the duplicate logic and returns a "D" (Duplicate of Paid) response. So far, the process works.

Transaction 4 - The same day the provider realizes that he had entered the wrong days supply and resubmits a Rebill of the same claim but with a corrected days supply.

The processor applies the duplicate logic and returns a "D" (Duplicate of Paid) response. The processor might not notice the days supply changed, since the duplicate field check was applied first. It appears the only way to correct the day's supply is by submitting two transactions.

Discussion:

The correction of fields not included in the duplicate check may be made using the rebill transaction. Because rebills have an implied reversal, it appears that the Transaction Response Status (112-AN) values for duplicates do not apply to rebill transactions. Since the same fields are used for a duplicate check and the implied reversal exists, the same problem occurs for Information Reporting Rebills as well.

Every transaction has the chance of a communications drop, but in this case, the duplicate response is not needed for the resubmission due to a communications drop.

Processing:

Therefore, based on discussions, the members determined that there is no business reason found for the duplicate responses for the rebill transactions. By having duplicate responses in rebills the submitter is not able to modify a field that is not included in the duplicate field check.

The duplicate Transaction Response Status (112-AN) of "D" (Duplicate of Paid) and "Q" (Duplicate of Captured) on Claim/Service Rebill transactions (B3) are not needed.

The Transaction Response Status (112-AN) of "S" (Duplicate of Approved), "Q" (Duplicate of Captured), and "D" (Duplicate of Paid) for Information Reporting Rebill transactions (N3) are not needed.

Therefore duplicate values have been removed for rebill transactions.

26.4 ADJUDICATED PROGRAM TYPE (A28-ZR)

The Adjudicated Program Type denotes the type of prescription benefit plan/program under which the claim or service was adjudicated.

This is a required field within the Response Status Segment for Paid, Duplicate Paid, Captured and Rejected claim or service billing responses. The most descriptive program type value must be returned.

"UNKNOWN" or "OTHER" must not be used for federal programs as defined in Section 1128b(B) of the Social Security Act or when a Percentage Tax Exempt Indicator (557-AV) and/or Regulatory Fee Exempt Indicator (D62-RM) value is associated to the claim response.

The value of "UNKNOWN" should be returned on rejected responses when the actual Adjudicated Program Type could not yet be determined.

The Adjudicated Program Type value returned in the response can be reported in the following downstream situations.

- Other Payer Adjudicated Program Type (C47-9T) field in the Coordination of Benefit/Other Payments Segment for claim or service billing requests
- Other Payer Adjudicated Program Type (C47-9T) field in the Response Other Payers Segment for the sender to report other payer information associated to a patient identified within the claim or service billing request.

27 SPECIFIC SEGMENT DISCUSSION

27.1 REQUEST SEGMENTS

27.1.1 TRANSACTION HEADER SEGMENT

The Header Segment is required and must be first in the transmission. All fields are required positionally. When a field is not used, the field must be filled with zeroes or spaces, as appropriate.

27.1.1.1 TRANSACTION COUNT

The Transaction Count (109-A9) is present on every transaction request and response. As of Version E7, the count is always one.

27.1.2 PATIENT SEGMENT

The Patient Segment must be submitted when needed to differentiate between the patient and the cardholder. If the cardholder and the patient are the same, then the Patient Segment is not submitted unless additional information about the patient is needed to clarify the transaction determination.

27.1.3 INSURANCE SEGMENT

If the cardholder and the patient are the same, then the Patient Segment need not be submitted unless additional information about the patient is needed to clarify the transaction.

27.1.3.1 MEDICARE PART D INFORMATION REPORTING USAGE

For Medicare Part D Information Reporting transactions, when the Unique IIN/PCN is not used and the Secondary/Tertiary/etc Payer needs to report updated patient pay information directly through the Facilitator to the PDP, the Secondary/Tertiary/etc Payer is required, in the N Transaction Payer Identification Segment:

- To put their Cardholder ID in Cardholder ID (302-C2) and in N Payer Cardholder ID (C54-AA),
- To put their IIN, PCN (if applicable), and Group ID (if applicable) in the N Payer IIN (C52-9Y), N Payer Processor Control Number (C53-9Z), and N Payer Group ID (C55-AB).

27.1.4 PHARMACY PROVIDER SEGMENT

The Pharmacy Provider Segment refers to the pharmacist dispensing the medication, not the prescriber writing the prescription. It provides information about the specific pharmacist involved in the transaction. The Provider First Name and Last Name are used for Workers' Compensation when the provider responsible for the dispensing of the prescription must be reported as required by state regulations.

27.1.5 PRESCRIBER SEGMENT

When checking eligibility for a recipient under various restricted programs, the ordering provider (Prescriber ID (411-DB)) and referring provider (Primary Care Provider ID (421-DL)) may be validated by the recipient eligibility check to verify that the recipient is eligible for services.

The Prescriber ID (411-DB) submitted must represent the practitioner who signed the prescription and correlate to the below additional prescriber data elements, when submitted.

- Prescriber Last Name (427-DR)
- Prescriber First Name (364-2J)
- Prescriber Phone Number (498-PM)
- Prescriber Street Address (365-2K)
- Prescriber City Address (366-2M)
- Prescriber State/Province Address (367-2N)
- Prescriber ZIP/Postal Zone (368-2P)

As a result of a POS denial for prescriber enrollment, a new prescription may be required from a covered prescriber. This would also apply to other prescriber types where a supervising physician or a Collaborative Practice Agreement applies per state law. The Prescriber ID (411-DB) would be represented as defined below.

- The practitioner with prescriptive authority per state regulations not requiring a supervising physician is prescribing and signing the prescription for the medication/service for which they are authorized.
 - Prescriber ID (411-DB) – contains the *practitioner with prescriptive authority* who is prescribing and signing the prescription for the medication/service
- The resident where state law may require a supervising physician is prescribing and signing the prescription for the medication/service for which they are authorized.
 - Prescriber ID (411-DB) – contains the *resident* who is prescribing and signing the prescription for the medication/service
- The nurse practitioner/physician assistant is prescribing and signing the prescription for the medication/service for which they are authorized.
 - Prescriber ID (411-DB) – contains the *nurse practitioner/physician assistant* who is prescribing and signing the prescription for the medication/service

- The physician and nurse practitioner/physician assistant have a Collaborative Practice Agreement. The nurse practitioner/physician assistant is prescribing and signing the prescription for the medication/service for which they are authorized. A physician is supervising the nurse practitioner/physician assistant (direct or indirect).
 - Prescriber ID (411-DB) – contains the *nurse practitioner/physician assistant* who is prescribing and signing the prescription for the medication/service
- The pharmacist is allowed to prescribe without a Collaborative Practice Agreement. The pharmacist is prescribing and signing the prescription for the medication/service for which they are authorized.
 - Prescriber ID (411-DB) – contains the *pharmacist* who is prescribing and signing the prescription for the medication/service
- The physician and pharmacist have a Collaborative Practice Agreement. The pharmacist is prescribing and signing the prescription for a medication/service for which they are authorized.
 - Prescriber ID (411-DB) – contains the *pharmacist* who is prescribing and signing the prescription for the medication/service
- When a pharmacist administers the medication/service which requires a prescription/prescription order/protocol per state law (such as vaccines)
 - Whoever signed the prescription/prescription order/protocol for the medication/service would be identified in Prescriber ID (411-DB).
 - Provider ID (444-E9) - could contain the pharmacist who is *administering* a vaccine/service.

When an intern/resident where state law requires a supervising physician is prescribing and signing the prescription for the medication/service for which they are authorized, the ID (i.e., Type 1 NPI) of the intern/resident who is prescribing and signing the prescription would be submitted as the Prescriber ID (411-DB).

The Prescriber Place of Service (D57-RG) identifies the place where professional services are rendered or a patient encounter occurred that resulted in a prescription order. The prescriber provides the information.

27.1.6 COORDINATION OF BENEFITS/OTHER PAYMENTS SEGMENT

Refer to the COB Claims Processing Guidelines in this document.

27.1.7 WORKERS' COMPENSATION SEGMENT

Billing Entity Type Indicator (117-TR) - Code that identifies the entity submitting the billing transaction.

- If the transaction is submitted by the provider and paid to the provider, then the Service Provider ID Qualifier (202-B2) and Service Provider ID (201-B1) govern communication and payment.
- If the transaction is submitted by an agent and paid to the agent, then the Service Provider ID Qualifier (202-B2) and Service Provider ID (201-B1), relative to agent, govern communication and payment and dispensing pharmacy information is placed in the Facility Segment.
- If the transaction is submitted by a provider or agent, but paid to another party, then the Service Provider ID Qualifier (202-B2) and Service Provider ID (201-B1), relative to submitting entity, govern communication, but the information for the party to be paid is placed in the "Pay To" fields of this segment. If submitting entity is different than dispensing pharmacy, the pharmacy information is placed in the Facility Segment.

Generic Equivalent Product ID Qualifier (125-TZ) and Generic Equivalent Product ID (126-UA) - In some jurisdictions, generics are mandated but an injured worker may pay the difference for a brand. In those cases information on the brand dispensed and its generic equivalent must be collected.

27.1.8 DUR/PPS SEGMENT

27.1.8.1 TERMINOLOGY

Drug Use Review (DUR)

Review of appropriate use of medications has undergone significant changes over the past ten or so years. The original evaluations called Drug Utilization Review, included retrospective review of patients' charts in the hospital or paid claims from a PBM or processor to determine the utilization patterns of drugs. Utilization meant how much, how many and at what cost, for the most part.

In the late 1970s and early 80s, Drug Utilization Review transitioned to Drug Use Review and focused increasingly on the appropriate selection of the medication. In 1990, with the passage of OBRA 90 (Omnibus Budget Reconciliation Act of 1990), the federal government separated the terms Drug Utilization Review and Drug Use Review to signify retrospective and prospective review of medication regimens, respectively.

Since that time, utilization review has matured into drug use evaluation, which encompasses much more than the volume or cost of the drug employed in treatment. Drug Use Evaluation (DUE) is the current terminology that takes into account not only costs but also appropriate selection based on specific patient parameters such as other drugs in the regimen, concomitant diseases, and competency of organ systems.

When DUR is indicated in this Guide, the implication is that DUE is occurring.

Professional Pharmacy Services (PPS)

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use
- 864 -

Professional Pharmacy Services (PPS) refers to a variety of cognitive services performed by pharmacists. These include, but are not limited to, the performance of administrative services, prospective DUR, disease management, and delivery of pharmaceutical care. It is oriented toward preventing and/or solving health care-related problems and achieving positive health outcomes. Some of the problems that justify PPS are listed in the Reason for Service Codes that describe professional activities that require pharmacists' attention.

PPS also includes the process of performing, documenting, and receiving reimbursement for cognitive services. PPS begins when a either a pharmacist or a processor identifies a patient-specific, health care-related problem and notifies the other party. After resolving the issue, the pharmacist submits the documentation needed to explain the steps planned and the measures taken to resolve the problem. Unlike DUR, which is always tied to a prescription drug claim, PPS may be completely unrelated to the dispensing of a prescription. Also unlike DUR, which is completed within the submission of one claim, PPS is a dynamic process that may require multiple claim submissions over time to document resolution of the patient-care issue.

27.1.8.2 SPECIFIC DISCUSSION – DUR

27.1.8.2.1 THE PROBLEM OF NOISE

The success of any DUR program depends on two factors, namely, the caliber of the criteria used to identify potential drug-related problems and programming computers to utilize all available information to avoid false positive alerts.

The following are guidelines that computerized review systems can use to reduce the amount of unnecessary traffic (sometimes referred to as DUR noise) but would still provide a high level of confidence to the client, administrator, processor and pharmacist.

1. Consideration should be given to making DUR alerts specific to the patient and they should be driven by the patient's individual diagnosis (reported or inferred), medication history, age, and gender.
2. Consideration should be given to establishing Gender and Age parameters, whenever appropriate.
3. Consideration should be given to the parameters that define a Drug-Pregnancy alert. At a minimum, gender edits should be applied. Taking into account the patient's age, reported diagnosis (ICD10), and other drugs the patient may be taking (e.g. oral contraceptive or prenatal vitamins) should be part of a second-level review.
4. Consideration should be given to the parameters for Lactation/Nursing alerts. At a minimum, gender and age edits should be applied.
5. Consideration should be given to the parameters that define High Dose. Allowance should be given for the inclusion of a percentage multiplier before displaying i.e., do not display High Dose alert unless the calculated dose is at least a predefined percentage greater than the benchmark high dose. Alternatively, if the dosing calculation results in a fraction of the days supply, round down to the nearest whole day.
6. Consideration should be given to the parameters that define Low Dose. Allowance should be given to incorporate a percentage multiplier before displaying i.e., do not display Low Dose alert unless the calculated dose is at least a predefined percentage lower than the benchmark low dose. Alternatively, do not alert on maintenance medications where the patient has a sustained refill history of a predefined number of months or number of prescriptions and an appropriate clinical response.
7. Consideration should be given to Therapeutic Duplication alerts. Prescriptions being reviewed should be active (i.e., have days supply remaining). Prescriptions should not represent a refill and consideration should be given to switching within a therapeutic category by allowing a predefined number of days supply overlap within a therapeutic category.
8. Consideration should be given to Therapeutic Duplication alerts when the new prescription is a drug taken for a few days or on an "as needed" basis (e.g., cough syrup containing codeine for 5 days or less and chronic pain medication containing a narcotic).
9. Consideration of the submission, by the pharmacist, of an appropriate Submission Clarification Code as override for Overuse/Early Refills should be considered.
10. Consideration should be given to accommodate the patient behavior (e.g. convenience, weather, and transportation) for Overuse/Early Refill edits. The calculation of days remaining should be rounded down. For example, 25% of 30 days = 7.5 days, round down to 7 days) so Early Refill alerts are not applied on partial days.
11. Consideration should be given to the clinical significance of Drug-Drug Interactions. Anything less significant than major interactions may increase DUR noise without benefit to the patient. Documentation should be provided. Use of the DUR Additional Text field to provide helpful clarification in a response is encouraged. Drug-drug interaction programming should allow for alerting on various severity levels depending on the interaction involved, rather than all major or no minor interactions.
12. Consideration should be given to documenting the type and number of drug-drug interactions and other alerts encountered and periodic reviews should be conducted to determine the validity of alerts. Follow up may be required to establish override mechanisms or improve the quality of the criteria.
13. Consideration should be given to timeframes when performing DUR checks. Is 365 days too long a time to look back through a profile for potential problems? It may be appropriate in some cases, but not in others. The same rule may not be appropriate for all types of checking. All prescriptions in history should have remaining days supply before participating in DUR alerts.
14. Consideration should be given to information provided by the pharmacy on the in-bound transaction. Submission Clarification Codes, DUR interventions and results, ICD9's, etc. that indicate a pharmacy has identified and responded to an alert should provide a mechanism to by-pass processor-generated alerts.
15. Consideration should be given when inferring patients' medical conditions. Is the inferred diagnosis verified by any other contributing data?
16. Consideration should be given to the response displayed to the pharmacist. Is all pertinent information provided on the response for the pharmacist to make a proper decision, e.g., Clinical Significance, Other Pharmacy, Previous Fill Date, Quantity of Previous Dispensing, Database Indicator, Other Prescriber, Free text, and DUR Additional Text, if applicable.
17. Consideration should be given to information on the patient's profile. Outdated or inaccurate data should be removed or excluded to prevent unwarranted and incorrect alerts from being generated. This could include information about allergies.
18. Consideration should be given to including the Help Desk number whenever an alert is given. At a minimum, it should be included whenever a specific Call Help Desk (CH) alert is given. Is there a special Clinical Help Desk phone number that applies, instead of the one used for general eligibility/plan coverage issues?

19. Consideration should be given to maximizing the inherent editing/parameter establishing capabilities that exist within your DUR system. Understanding them and utilizing them to the fullest will assist in providing as "quiet" a system as possible, while maintaining the highest level of professional and clinical awareness.
20. Consideration to DUR system maintenance is crucial. Application of clinical data supporting the DUR alert system should be updated continuously. Delay in the application of the information can lead to outdated alerts, medical and pharmaceutical information and documentation resulting in distrust of the alerts.
21. Suppress reversed transactions from DUR screening against new transactions. Assume that the claim was reversed because the patient never took possession of the prescription.
22. Consideration should be given to minimizing DUR alerts especially in creating Reject Code "88" (DUR Reject Error) in batch transactions as the patient most likely has already received the prescription and minimal pharmacist intervention would be possible.

The following chart illustrates alerts that contribute to DUR Noise

DUR/PPS Alert Category	Inappropriate DUR Message (False Positive)
General (Applies to all alerts)	- Repeat alerts on subsequent dispensings despite pharmacist override/reversal on previous fill of same medication to same patient by same prescriber - Alerting on retroactively billed claims when days supply has been exhausted at the time of billing - Alerting despite in-store disease contraindication overrides - Sending messages on rebills or resubmissions after reversals
Drug-Pregnancy (PG)	- Alerting on claims for males or for females outside childbearing age or with current prescription for oral contraceptives - Alerting when claims database contains ICD9 for termination of pregnancy or procedures such as tubal ligations or hysterectomies - Alerting on claims that contain estrogens used for menopause
Therapeutic Duplication (TD)	- Alerting on refills or if prescription number changes (alert is really ER) - Alerting on same ingredient/different strength (alert is really ID) - Alerting when both TD and ID apply (system may not differentiate identical ingredients within the therapeutic class) - Alerting even though the therapy is common medical practice (SSRI + trazodone; combinations of anticonvulsants, insulins) - Alerting when changing therapy within a therapeutic class (cimetidine to ranitidine; ibuprofen to naproxen)
Early/Late Refill (ER/LR)	- Alerting on titrated drugs (also impacts HD/LD)
High Dose (HD)	- Alerting when quantity divided by days supply results in a fraction - Alerting when literature value differs from standard medical practice (acetaminophen w/codeine based on acetaminophen content nte 6/d yet directions call for up to 12/day (1-2 q4-6h) - Alerting on pediatric claims using adult dosing parameters
Low Dose (LD)	- Alerting on titrated drugs or those not considered chronic medications
Drug-Disease (DC)	- Alerting when drugs infer multiple diseases
Drug Interactions (DD)	- Alerting when ICD9 or procedure would render the interaction null and void (e.g. digoxin + quinidine or verapamil with a pacemaker) - Alerting when interaction is dose specific (i.e. when drug interaction occurs only with high doses of either or both medications)
Drug Allergy (DA)	- Alerting even though ICD9s refer to "adverse reactions" not necessarily allergies. Pharmacist profiles represent a more accurate source of allergy information.
Drug-Gender (SX)	- Alerting when the prescription is actually for a female
Formulary Issues	- Alerting that drug is non-formulary without displaying preferred choice

27.1.8.2.2 DUR INPUTS

The information and support files for the DUR standard fall into four categories:

- Member information
- Prescription information; Medical information, if available
- Prescriber information
- Pharmacy information

Three primary files form the electronic claims management (ECM) system that supports ORDUR (On-line, Real-time Drug Use Review) processing. These files are pertinent regardless whether the electronic claim is submitted via batch mode or real-time.

- Patient profiles (drug use history file; medical claims history file)
- Complete drug master file (drug reference database)
- Drug information files (dosing/conflict/interaction database)

27.1.8.2.3 ORDUR SCREENING

On-line DUR categorizes therapeutic conflicts commonly noted in drug therapy according to their mechanism of action. Each category or "module" makes up a Drug Conflict Rules File or database. Standard codes identify the drug conflicts in each module. The pharmacy provider and electronic claim ORDUR processor use the codes when exchanging structured electronic messages and responses.

27.1.8.2.4 DOSING/LIMITS

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use
- 866 -

The following therapeutic problems fall into the Dosing/Limits Module:

- *Low Dose (LD)* detects drug doses that fall below the standard adult dosing range.
- *High Dose (HD)* detects drug doses that fall above the standard adult dosing range.
- *Overuse (ER)* detects prescription refills that occur before the days supply of the previous dispensing should have been exhausted.
- *Underuse (LR)* detects prescription refills that occur after the days supply of the previous dispensing should have been exhausted.
- *Excessive Duration (MX)* detects days supply that are longer than the maximal limit of therapy for the drug product based on the product's common uses.

27.1.8.2.5 DRUG INTERACTIONS

Two therapeutic problems fall into the drug interaction module.

- *Drug-Drug Interaction (DD)* detects drug combinations in which the net pharmacologic response may be different from the result expected when each drug is given separately.
- *Drug Incompatibility (DI)* identifies physical and chemical incompatibilities between two or more drugs.

27.1.8.2.6 DRUG CONFLICTS

Drug Conflicts consist of a number of drug therapy problems that arise as a result of a combination of the patient's characteristics and a particular drug. The following therapeutic problems are included in Drug Conflicts:

- *Drug-Allergy (DA)* indicates that an adverse event may occur due to the patient's previously demonstrated heightened response to the drug product in question. These responses are not necessary immunologically mediated; they can be idiosyncratic reactions unrelated to true allergies.
- *Prior Adverse Reaction (PR)* identifies those drugs to which the patient has previously reacted in an atypical manner.
- *Drug-Disease (Inferred) (DC)* indicates that the use of the drug may be inappropriate in light of a specific medical condition that the patient has. The existence of the specific medical condition is inferred from drugs in the patient's medication history.
- *Drug-Disease (Reported) (MC)* indicates that the use of the drug may be inappropriate in light of a specific medical condition that the patient has. Information about the specific medical condition is provided by ICD9s, CPT-4s or other specified coding schemes.
- *Drug-Age (PA)* detects drugs that are contraindicated for specific ages and apply to patient for whom the claim is submitted.
- *Drug-Gender (SX)* identifies contraindicated or inappropriate therapy in either males or females.
- *Additive Toxicity (AT)* detects drugs with similar side effects that could exhibit additive toxic potential.
- *Drug-Pregnancy (PG)* detects pregnancy-related drug problems. This information is intended to assist the healthcare professional in weighing the therapeutic value of a drug against possible adverse effects on the mother or fetus.
- *Iatrogenic Condition (IC)* detects possibly inappropriate use of drugs that are designed to ameliorate complications caused by another medication (e.g., polypharmacy).
- *Side Effect (SE)* reports possible major side effects of the prescribed drug.

27.1.8.2.7 DUPLICATE THERAPY

The following two therapeutic problems constitute duplicate therapy.

- *Therapeutic Duplication (TD)* detects simultaneous use of different chemical entities that have the same therapeutic or pharmacologic effect.
- *Ingredient Duplication (ID)* detects simultaneous use of drug products containing one or more identical chemical entities.

27.1.8.2.8 PRECAUTIONARY SCREENINGS

The following therapeutic problems constitute precautionary screenings.

- *Alcohol Conflict (OH)* detects prescribed drugs that are contraindicated or conflict with the consumption of alcoholic beverages.
- *Tobacco Use (DS)* conflict detects when a prescribed drug is contraindicated or conflicts with the use of tobacco products.
- *Drug-Lab Conflict (DL)* indicates that laboratory values may be altered due to the use of the drug, or that the patient's response to the drug may be altered due to a condition that is identified by a certain lab value.
- *Drug-Food Interaction (DF)* identifies interactions between a drug and certain foods.
- *Call Help Desk (CH)* informs the user to call the claims processor's help desk to obtain additional DUR information.

27.1.8.3 SPECIFIC DISCUSSION-PROFESSIONAL PHARMACY SERVICES

27.1.8.3.1 PPS PROCESSING

Like DUR, PPS screening depends upon information contained in many fields.

- Reason for Service Code
- Professional Service Code
- Result of Service Code
- DUR/PPS Level of Effort
- Measurement Date
- Measurement Time
- Measurement Dimension
- Measurement Unit
- Measurement Value

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use
- 867 -

Depending on the source of the transmission, a code transmitted in the Reason for Service Code (439-E4) describes a problem or a request for a professional pharmacy service identified or initiated by a processor (i.e., processor-to-pharmacist transmission), or the reason a professional service was performed by a pharmacist (i.e., pharmacist-to-processor transmission).

These codes have been grouped into five areas for better understanding of their uses. The administrative codes are used for claims processing or plan rules functions. Dosing limits, drug conflicts and disease management codes are used for clinical interventions. Precautionary codes are used primarily for informational messaging. See the NCPDP *External Code List* if additional values have been approved.

ADMINISTRATIVE	DOSING/LIMITS	DRUG CONFLICT	DISEASE MANAGEMENT	PRECAUTIONARY
AN - PRESCRIPTION AUTHENTICATION	ER - OVERUSE	AT - ADDITIVE TOXICITY	AD - ADDITIONAL DRUG NEEDED	DF - DRUG-FOOD INTERACTION
CH - CALL HELP DESK	EX - EXCESSIVE QUANTITY	DA - DRUG-ALLERGY	AR - ADVERSE DRUG REACTION	DL - DRUG-LAB CONFLICT
LK - LOCK IN RECIPIENT	HD - HIGH DOSE	DC - DRUG-DISEASE (INFERRED)	CD - CHRONIC DISEASE MANAGEMENT	DS - TOBACCO USE
MS - MISSING INFORMATION/ CLARIFICATION	LD - LOW DOSE	DD - DRUG-DRUG INTERACTION	CS - PATIENT COMPLAINT/ SYMPTOM	OH - ALCOHOL CONFLICT
NA - DRUG NOT AVAILABLE	LR - UNDERUSE	DI - DRUG INCOMPATIBILITY	DM - APPARENT DRUG MISUSE	RE - SUSPECTED ENVIRON-MENTAL RISK
NC - NON-COVERED DRUG PURCHASE	MN - INSUFFICIENT DURATION	IC - IATROGENIC CONDITION	ED -PATIENT EDUCATION/ INSTRUCTION	SE - SIDE EFFECT
NF - NON-FORMULARY DRUG	MX - EXCESSIVE DURATION	ID - INGREDIENT DUPLICATION	ND - NEW DISEASE/ DIAGNOSIS	
NP - NEW PATIENT PROCESSING	NS - INSUFFICIENT QUANTITY	MC - DRUG-DISEASE (REPORTED)	NN - UNNECESSARY DRUG	
PP - PLAN PROTOCOL	SF - SUBOPTIMAL DOSAGE FORM	NR - LACTATION/NURSING INTERACTION	PC - PATIENT QUESTION/CONCERN	
PS - PRODUCT SELECTION OPPORTUNITY	SR - SUBOPTIMAL REGIMEN	PA - DRUG-AGE	PH - PREVENTIVE HEALTH CARE	
TP - PAYER/PROCESSOR QUESTION		PG - DRUG-PREGNANCY	PN - PRESCRIBER CONSULTATION	
		PR - PRIOR ADVERSE REACTION	RF - HEALTH PROVIDER REFERRAL	
		SX - DRUG-GENDER	SC - SUBOPTIMAL COMPLIANCE	
		TD - THERAPEUTIC DUPLICATION	SD - SUBOPTIMAL DRUG/ INDICATION	
			TN - LABORATORY TEST NEEDED	

The Professional Service Code (440-E5) describes the professional service performed in responding to the problem identified or service requested. These codes have been grouped into two areas for better understanding of their uses. See the NCPDP *External Code List* if additional values have been approved.

ADMINISTRATIVE	PATIENT CARE
00 - NO INTERVENTION	AS - PATIENT ASSESSMENT
FE - FORMULARY ENFORCEMENT	CC - COORDINATION OF CARE
GP - GENERIC PRODUCT SELECTION	DE - DOSING EVALUATION/DETERMINATION
PH - PATIENT MEDICATION HISTORY	MØ - PRESCRIBER CONSULTED
SW - LITERATURE SEARCH/REVIEW	MA - MEDICATION ADMINISTRATION
TC - PAYOR/PROCESSOR CONSULTED	MR - MEDICATION REVIEW
TH - THERAPEUTIC PRODUCT INTERCHANGE	P0 - PATIENT CONSULTED
	PE - PATIENT EDUCATION/INSTRUCTION
	PM - PATIENT MONITORING
	R0 - PHARMACIST CONSULTED OTHER SOURCE
	RT - RECOMMENDED LABORATORY TEST
	SC - SELF-CARE CONSULTATION

The Result of Service Code (441-E6) consists primarily of *process* or *procedural* results of the professional service that was performed. Outcome codes that begin with "1" indicate that a drug was dispensed or a professional service provided, "2" indicate that the drug was not dispensed or the professional service was not provided, and "3" may or may not indicate that a drug was dispensed or a service was provided.

Separate from the Claim Segment Level of Service is the DUR/PPS Level of Effort (474-8E) field that is determined by the complexity of the decision-making process or resources utilized by a pharmacist to perform a professional service. See the NCPDP *External Code List* for values of this field.

Five repeating groupings of measurement fields provide clinical information about a patient and assist processors in determining if DUR/PPS messaging will offer additional advantages in providing optimal patient care. Self-explanatory fields include "Measurement Date" and "Measurement Time". Three other measurement fields, Dimension, Unit, and Value, describe the clinical information in specific detail. The "Measurement Dimension" refers to the clinical domain of the observed value; e.g., blood pressure, temperature, height or weight. The

"Measurement Unit" field contains the metric or English units used for the clinical information; e.g., mmHg, Fahrenheit, inches or kilograms. The "Measurement Value" field contains the actual value of the clinical information submitted; e.g., 120/80, 98.6, 67, or 70.

27.1.8.4 SPECIAL CONSIDERATIONS

When submitting a service billing for a DUR conflict resolution or professional service provided, the Product/Service ID Qualifier (436-E1) in the Claim Segment must contain "06" DUR/PPS, the Product/Service ID field (407-D7) in the Claim Segment must contain zero ("0"), and the appropriate DUR Reason for Service (439-E4) must be submitted in the DUR/PPS Segment, along with additional applicable fields related to the service claim (an NDC in the Originally Prescribed Product/Service Code; the DUR/DUE Co-Agent ID field, etc.)

Further clarification,

If the Product/Service ID Qualifier (436-E1) = "06" (DUR/PPS), the Product/Service ID (407-D7) is zero. (Zero means "0".) Populate the DUR/PPS segment as appropriate.

If the Product/Service ID Qualifier (436-E1) = "07" (CPT-4), the Product Service ID (407-D7) is the actual CPT-4 value.

If the Product/Service ID Qualifier (436-E1) = "09" (HCPCS), the Product Service ID (407-D7) is the actual HCPCS value.

If the Product/Service ID Qualifier (436-E1) = "99" (Other), the Product Service ID (407-D7) is the business partner agreed value.

If more than eight Reasons for Service occur, it is recommended the ninth repetition of DUR Reason for Service (439-E4) and all repeating fields that follow be used to notify the provider to Call Help Desk ("CH").

DUR Reason for Service (439-E4)

Professional Service Code (440-E5)

Result of Service (441-E6)

Drug Use Review codes and Professional Pharmacy Service codes have been combined to create Reason for Service, Professional Service, and Result of Service codes.

Professional Service Fee Submitted (477-BE)

For Services Billings (Transaction Code = "S1"), the Professional Service Fee Submitted field in the Pricing Segment must be submitted on a Prescription/Service Reference Number Qualifier of "2" (Service) and a Product/Service ID Qualifier of "06" (DUR/PPS) in the Claim Segment. The Professional Service Fee Submitted field in the Pricing Segment must not be submitted on a Billing (Transaction Code = "B1") with a Prescription/Service Reference Number Qualifier "1" for claims with a Product/Service ID Qualifier of "03" (NDC) in the Claim Segment.

DUR/DUE Co-Agent ID Qualifier (475-J9)

DUR/DUE Co-Agent ID (476-H6)

When the pharmacist detects and chooses to override a drug-drug interaction or contraindication of therapy involving the drug to be dispensed, the DUR/DUE Co-Agent ID Qualifier and DUR/DUE Co-Agent ID should be populated on the claim submission. These fields allow the processor to discern the drug or medical condition in conflict that the pharmacist is overriding and not return the same DUR conflict message. However, the processor could still send DUR alerts on other therapeutic conflicts.

The very nature of professional services demands that the fields within the DUR/PPS Segment are not mandatory on a submission. Professional services may or may not be a part of the reimbursable component of a patient's pharmacy benefit; the professional service may be separate and distinct from a product dispensing and, therefore, may or may not be recognized for reimbursement by the payer.

27.1.9 CLAIM SEGMENT

Prescription/Service Reference Number Qualifier (455-EM)

Product/Service ID Qualifier (436-E1)

Product/Service ID (407-D7)

For Service Billings with Product/Service ID Qualifier of DUR/PPS (06), the Product/Service ID **defaults to "0"** (zero) and the DUR/PPS Segment **is required**.

Associated Prescription/Service Reference Number (456-EN) and Associated Prescription/Service Reference Number Qualifier (581-XZ)

Associated Prescription/Service Date (457-EP)

Associated Prescription/Service Provider ID Qualifier (579-XX) and Associated Prescription/Service Provider ID (580-XY)

Associated Prescription/Service Reference Fill Number (581-X0)

A Service Billing may be associated with a prescription dispensed or professional service provided, either at the time of service provision or at some earlier time. If used, the Associated Prescription/Service Reference Number and Qualifier must contain the Prescription/Service Reference Number and Qualifier that prompted the service. The Associated Prescription/Service Reference Date must contain the service date of the prescription or service that prompted the current billing for service. The combination of the Associated Prescription/Service Reference Number and Qualifier and Associated Prescription/Service Date allows the processor's system to search for the original item. Associated Prescription/Service Reference Fill Number can also be used with the other fields for unique identification. When one entity dispenses the product and another entity administers the product, the Associated fields are used to link the product and the service; the Associated Prescription/Service Provider ID and Qualifier are used to identify the entity that dispensed the product.

If the Prescription/Service Reference Number Qualifier is "2" (Service) billing, and the Product/Service ID Qualifier is "06" DUR/PPS, the Claim Segment fields must include the default Product/Service ID ("0"), and, if applicable, the Associated Prescription/Service Reference Number and Qualifier, and the Associated Prescription/Service Date. Also, **for this transaction type, the DUR/PPS Segment is required**.

In Version D.0 and above, the Service Billings have their own Transaction Code (S1, S2, S3). The Transaction Code is at the transmission level. Claim and service billings are associated (using the Associated Prescription/Service Reference Number (456-EN), Associated Prescription/Service Reference Number Qualifier (581-XZ) and Associated Prescription/Service Date (457-EP), but they must appear in separate transmissions. Drug product billings are designated by Transaction Code = "B1" (Billing) and Prescription/Service Reference Number Qualifier = "1" (Rx Billing). Service billings are designated by Transaction Code = "S1" (Service Billing) and Prescription/Service Reference Number Qualifier = "2" (Service Billing).

Note that in other Transaction Codes (Prior Authorizations and Information Reporting), the differentiation of claim versus service remains at the transaction level. For example, drug product transactions are designated by Transaction Code = "P1" (Prior Authorization Request And Billing) and Prescription/Service Reference Number Qualifier = "1" (Rx Billing). Service billings are designated by Transaction Code = "P1" (Prior Authorization Request And Billing) and Prescription/Service Reference Number Qualifier = "2" (Service Billing).

CPT Use

CPT use wasn't specifically illustrated in this guide. But CPT-4 or 5 are valid values in the Product/Service ID Qualifier field (436-E1). Example: Transmit a CPT-based service claim not tied to a product by populating the Product/Service ID Qualifier with the value for CPT-4 ("07"), and the Product/Service ID field with the actual CPT-4 value. If the need exists to tie the service claim to an actual billed product, also populate the situational Associated Prescription/Service Reference Number (456-EN), Associated Prescription/Service Reference Number Qualifier (581-XZ), and Associated Prescription/Service Date (457-EP) fields.

Quantity Dispensed (442-E7)

Originally Prescribed Quantity (446-EB)

Quantity Prescribed (460-ET)

Total Prescribed Quantity Remaining (D02-KW)

Only dispensed quantities in the exact fractional amount including three decimal places are supported. Whole number quantities are submitted as 9999999.000

Fill Number(403-D3)

Number of Refills Authorized(415-DF)

Number of Refills Authorized is determined at the time of prescribing, where the total prescribed quantity for the prescription is derived from the quantity prescribed times the number of fills authorized (i.e., Number of Refills Authorized plus 1).

Fill Number is determined at the time of dispensing, where the Quantity Dispensed may be less than or equal to the total Quantity Prescribed. As a result, based on the Quantity Dispensed (442-E7) for each prescription fill, the Fill Number (403-D3) may not correlate to the Number of Refills Authorized (415-DF).

Based on the Number of LTPAC Dispensing Events (C92-KM), the Fill Number may represent one or more dispensings.

Procedure Modifier Code Count (458-SE)

Procedure Modifier Code (459-ER)

Professional services that are related to CPT-4 or CPT5 codes will be submitted in these fields. If the Product/Service ID Qualifier is "09" (HCPCS), the Procedure Modifier Count and Procedure Modifier Code may be used.

The standard does not prohibit the reporting of procedure code modifier(s) with national drug codes.

Originally Prescribed Product/Service Code (445-EA)

Originally Prescribed Quantity (446-EB)

The Originally Prescribed Product/Service Code and Originally Prescribed Quantity fields are used when therapeutic substitution has occurred or when a DUR alert has been resolved by changing medications or quantities. These fields allow tracking of pharmacists' interventions for payers who require this information. The Originally Prescribed Product/Service Code (445-EA) and the Originally Prescribed Quantity (446-EB) are used to provide necessary data to calculate the exact difference in cost between the prescribed product and the dispensed product. The Originally Prescribed Quantity (446-EB) is for use with therapeutic interchange only.

Pharmacy Service Type (147-U7)

A pharmacy has multiple reimbursement contracts with a payer. When the pharmacy submits a transaction to the payer, they would indicate what type of service they are performing so that the payer can apply the correct contract terms during the adjudication process. For example, "Joe's Pharmacy" normally fills prescriptions as an in-store retail provider under contract with "Acme PBM", but can also receive prescription orders via mail or Internet and would then fill and mail the prescription to the patient's home under a separate mail service contractual arrangement with same payer. "Joe's Pharmacy" would then submit the claim using a Pharmacy Service Type (147-U7) value of "06" (Mail Order). "Acme PBM" would then adjudicate the claim under the mail service contract terms.

For pharmacies which have only one contract with a payer, this field may not be sent.

LTPAC Dispense Frequency (C91-KK)

The dispensing frequency (or interval) refers to the *typical interval pattern* of dispensing or resupply by the pharmacy that occurred for the claim being submitted. This field represents the *Dispensing Frequency* instead of utilizing the Submission Clarification Code(SCC) field for this purpose and to eliminate the distortion of the SCC to meet the needs of short supply dispensing. The intent is to replace the Short Cycle SCC values which represent dispense frequency with the LTPAC Dispense Frequency field. The Submission Clarification Code field and the LTPAC Dispense Frequency fields are not to be used at the same time.

27.1.9.1 PARTIAL FILL

Partial Fill Fields (Dispensing Status (343-HD), Associated Prescription/Service Date (457-EP), Associated Prescription/Service Reference Number (456-EN), Associated Prescription/Service Reference Number Qualifier (581-XZ), Associated Prescription/Service Reference Fill Number (582-X0), Quantity Intended To Be Dispensed (344-HF), Days Supply Intended To Be Dispensed (345-HG), Basis Of Calculation – Dispensing Fee (346-HH), Basis of Calculation – Copay (347-HJ), Basis Of Calculation - Regulatory Fee (348-HK), Basis Of Calculation – Percentage Tax (349-HM), Basis of Calculation-Coinsurance (573-4V))

On occasion, inventory shortages at the pharmacy prevent a pharmacist from filling a total quantity of prescribed medication. When this occurs, the pharmacist has three choices:

1. Not fill the prescription that day and have the patient return at a later date to pick it up,
2. Send the patient to another pharmacy, or
3. Partially fill the prescription using the available quantity and have the patient return at a later date to pick up the balance of the medication (or, alternatively, deliver or mail the remaining medication to the patient).

For several reasons, both pharmacist and patient generally favor option #3. This scenario, however, creates a potential problem because most pharmacy practice management systems closely integrate the “dispensing” and “billing” functions.

In order to accommodate the need to fill a prescription partially on one day and complete the dispensing on a different date, the following fields have been are in the Claim Segment:

Dispensing Status (343-HD)

The code in this field indicates that the quantity dispensed is an initial partial fill (P) or the completion of a partial fill (C) and is used only in situations where inventory shortages do not allow the full quantity to be dispensed.

Associated Prescription/Service Date (457-EP)

Date of the initial transaction in a partial fill. Used when submitting the “completion” transaction.

Associated Prescription/Service Reference Number (456-EN) and Associated Prescription/Service Reference Number Qualifier (581-XZ)

The Prescription or Service Reference Number and Qualifier of the initial transaction in a partial fill. Used when submitting the “completion” transaction.

Quantity Intended to be Dispensed (344-HF)

The metric decimal quantity that would have been dispensed if adequate inventory were available. This field is used only in association with a “P” or “C” in the Dispensing Status field. Note: If populating this field, an assumption is made that the “Days Supply Intended to be Dispensed” is also sent.

Days Supply Intended to be Dispensed (345-HG)

Days supply for the metric decimal quantity that would have been dispensed on original dispensing if adequate inventory were available. This field is used only in association with a “P” or “C” in the Dispensing Status field.

27.1.9.1.1 PARTIAL FILL ASSUMPTIONS & RECOMMENDATIONS

Partial Fill transactions are limited to an initial “P” transaction indicating a “Partial” fill and a subsequent “C” transaction indicating the “Completion” of the initial partial fill. Implementation assumptions and recommendations include the following:

Assumptions:

- “Partial” and “Completion” transactions originate from the same provider.
- Completion transactions are submitted to the same processor as the initial Partial transaction.
 - In the event a change of coverage or plan processor between the initial and completion transactions, results and/or handling may differ depending upon arrangements between the processor and payer. It may be necessary to communicate with the processor’s Help Desk to resolve any outstanding issues.
 - Coordination of Benefits billing to the secondary (or downstream payer) should not occur until the pharmacy has determined the final resolution of the claim.
- Patient information (i.e., group and cardholder information) must be the same on a “Partial” and its companion “Completion” transaction.
- A “Partial” transaction can exist without a companion “Completion” transaction. As an example, a “Partial” transaction is submitted due to an inventory shortage. The patient never returns to pick up the quantity represented by the “Completion” transaction.
- If a pharmacy submits a claim with a value of “P” or “C” in the Dispensing Status field and the processor does not accept/utilize partial fill logic, the processor will reject the claim and indicate that “Partial Fill” logic is not recognized/supported.

Recommendations:

- Multiple “P” transactions for a single dispensing are not recommended. However, by trading partner agreement, multiple “P” transactions may be used.
- The Fill Number for both the “P” and “C” transactions are the same (i.e., the fill number is not incremented for the “C” transaction) unless the prescription number changes.
- On a “C” transaction, the following fields may contain, but are not limited to, data that is different from the data submitted on the initial “P” transaction: Date of Service, Prescription/Service Reference Number, Quantity Dispensed, Fill Number, Days Supply,

Product/Service ID (i.e., NDC), Ingredient Cost Submitted, Dispensing Fee Submitted, Percentage Tax Amount Submitted, and Usual & Customary Charge.

- “P” and “C” transactions must not be allowed with the same “Date of Service”. When it is necessary to submit a “Partial” and “Completion” transaction on the same date, the provider must reverse the “Partial” and resubmit the claim with the total quantity.
- The “Associated Prescription/Service Reference Number”, “Associated Prescription/Service Reference Number Qualifier” and “Associated Prescription/Service Date” fields are required on “C” transactions. These fields are not required on “P” transactions, unless there are multiple occurrences of partial fills (“P”) for this prescription.
- When a partial fill transaction is entered into the pharmacy practice management system, special care should be given to price the initial partial prescription at the Usual & Customary rate which would apply if the full quantity were being dispensed (i.e., per unit price of the full quantity). Likewise, the subsequent “Completion” transaction should be priced at the same per unit price used in the initial partial fill transaction.
- In cases where the provider has submitted both a “P” AND “C” transaction but later needs to reverse BOTH transactions, the transactions must be reversed in the following order:
 1. Reverse the “C” transaction.
 2. After the “C” transaction has been successfully reversed, reverse the “P” transaction.

27.1.9.2 MULTIPLE PRESCRIPTION/SERVICE ORDER GROUP REASON CODE AND MULTIPLE PRESCRIPTION/SERVICE ORDER GROUP ID

The Multiple Prescription/Service Order Group Reason Code (D22-M4) provides rationale for the quantity dispensed and/or days supply as a result of the prescriber issuing multiple grouped prescriptions. The Multiple Prescription/Service Order Group Reason Code (D22-M4) may be the same or may differ with each prescription within the order group as identified by the Multiple Prescription/Service Order Group ID (D21-M3), where the relationship between the values further clarifies the quantity dispensed and/or days supply on each prescription. The Multiple Prescription/Service Order Group Reason Code (D22-M4) in conjunction with the Multiple Prescription/Service Order Group ID (D21-M3) can be leveraged to apply specific claim adjudication rules that would eliminate specific plan benefit rejections (e.g., Days Supply Exceeds Plan Limitations, Fill Too Soon, DUR, etc.) or apply the applicable claim benefit rules (e.g., waiver or reduction of patient pay).

The Multiple Prescription/Service Order Group Reason Code and Multiple Prescription/Service Order Group ID values would be based on the information provided on the prescription order. Electronic prescriptions will leverage the OrderGroupReason and the OrderGroupNumber within the PrescriberOrderGroup to link multiple prescriptions and inform the pharmacy the reason for the grouping. Refer to the *NCPDP SCRIPT Implementation Guide* for current use of groupings. For non-electronic prescriptions based on the information presented in the multiple prescription orders, the pharmacy may apply the appropriate OrderGroupReason and generate the associated OrderGroupNumber for each prescription. The OrderGroupReason would be transmitted on the claim billing transaction in the Multiple Prescription/Service Order Group Reason field and the OrderGroupNumber must also be submitted in the Multiple Prescription/Service Order Group ID field.

The Multiple Prescription/Service Order Group ID identifies every prescription within an order group, and must be the same identifier for each prescription within the order group. The Multiple Prescription/Service Order Group ID must accompany the Multiple Prescription/Service Order Group Reason Code. The Multiple Prescription/Service Order Group ID can be leveraged to identify specific claims as grouped to apply adjudication rules that would eliminate specific plan benefit rejections (e.g., Days Supply Exceeds Plan Limitations, Fill Too Soon, DUR, etc.).

Examples of multiple electronic prescriptions and the associated Order Group Number and OrderGroupReason:

Example #	Description	OrderGroupNumber	OrderGroupReason
1	1 st NewRx in a group	222333	Multiple Admin Locations Unbreakable Packs
	2 nd NewRx in a group	222333	Maintenance Quantity
2	1 st NewRx in a group	333444	Non-Commercially Available Dose
	2 nd NewRx in a group	333444	Non-Commercially Available Dose

Example # 1:

Description	OrderGroupNumber	OrderGroupReason
1 st NewRx in a group	222333	Multiple Admin Locations Unbreakable Packs
2 nd NewRx in a group	222333	Maintenance Quantity

1. The prescriber submitted two grouped prescriptions, the first prescription in the group is identified with OrderGroupNumber "222333" and with OrderGroupReason of "Multiple Admin Locations Unbreakable Packs." This prescription is needed to ensure the patient receives the applicable number of packages for each administration location, e.g. : 1 inhaler for home use and another inhaler for school use.
2. Second prescription in the group is identified with the same OrderGroupNumber "222333" and with OrderGroupReason of "Maintenance Quantity." This prescription is needed for each subsequent dispensing as the product quantity for a single administration location is depleted.

As part of the claim billing process, the pharmacy would submit the applicable value within the Multiple Prescription/Service Order Group ID (D21-M3) and Multiple Prescription/Service Order Group Reason Code (D22-M4) fields.

1. The initial claim for the quantity needed for both administration locations (home and school) would include "222333" as the Multiple Prescription/Service Order Group ID and "Multiple Admin Locations Unbreakable Packs" as the Multiple Prescription/Service Order Group Reason Code. This would explain the increased quantity and days supply, allowing the processor to apply the applicable rules and eliminate unnecessary rejects and calls to the Provider Help Desk and provide a linking value to the subsequent prescription claim(s) associated with the group.

RX Written Date: 01/01/2017
Prescribed Drug: Inhaler
Prescribed Qty: 34gm (home, school)
Refills Allowed: 0
Days Supply Based on Sig and Prescribed Qty: 60 days
Order Group Number - 222333
Order Group Reason – Unbreakable package, multiple admin locations

OFFICIAL RELEASE

Claim Segment:

Field	Field Name	Value
111-AM	Segment Identification	07
455-EM	Prescription/Service Reference Number Qualifier	01
402-D2	Prescription/Service Reference Number	1234567
436-E1	Product/Service ID Qualifier	03
407-D7	Product/Service ID	11111-2222-33
442-E7	Quantity Dispensed	34
403-D3	Fill Number	00
405-D5	Days Supply	60
408-D8	Dispense as Written/Product Selection Code	0
414-DE	Date Prescription Written	01/01/2017
415-DF	Number of Refills Authorized	0
419-DJ	Prescription Origin Code	3
460-ET	Quantity Prescribed	34
D21-M3	Multiple Prescription/Service Order Group ID	222333
D22-M4	Multiple Prescription/Service RX Order Group Reason Code	4 – Unbreakable Package, Multiple Locations
600-28	Unit of Measure	GM

2. The claim for the second prescription that represents the quantity needed for each subsequent dispensing to replenish the quantity for a single administration location would include the same Multiple Prescription/Service Order Group ID “222333” and “Maintenance Quantity” as the Multiple Prescription/Service Order Group Reason Code . This would explain the date of service that may appear as a fill too soon based on the previous claim’s days supply or DUR determinations. The Multiple Prescription/Service Order Group ID would allow the processor to associate this claim to the previous claim’s with the same Multiple Prescription/Service Order Group ID and identify the associated Multiple Prescription/Service Order Group Reason code and apply the applicable rules to eliminate unnecessary rejects and calls to the Provider Help Desk.

RX Written Date: 01/01/2017
 Prescribed Drug: Inhaler
 Prescribed Qty: 17gm
 # Refills Allowed: 11
 Days Supply Based on Sig and Prescribed Qty: 30 days
 Order Group Number - 222333
 Order Group Reason – Maintenance Quantity

D22-M4	Multiple Prescription/Service Order Group Reason Code	3 – Maintenance Quantity
600-28	Unit of Measure	GM

Example # 2:

Description	OrderGroupNumber	OrderGroupReason
1 st NewRx in a group	NCD333444	Non-Commercially Available Dose
2 nd NewRx in a group	NCD333444	Non-Commercially Available Dose

1. The prescriber submitted two grouped prescriptions. The first prescription in the group is identified with OrderGroupNumber “NCD333444” and with OrderGroupReason of “Non-Commercially Available Dose.” This prescription is needed to be combined with the subsequent prescription to equate to the non-commercially available dose of the given medication required by the patient.
2. The second prescription in the group is identified with the same OrderGroupNumber “NCD333444” and with the same OrderGroupReason of “Non-Commercially Available Dose.” This prescription is needed to be combined with the previous prescription to equate to the non-commercially available dose of the given medication required by the patient.

As part of the claim billing process, the pharmacy would submit the applicable value within the Multiple Prescription/Service Order Group ID (D21-M3) and Multiple Prescription/Service Order Group Reason Code (D22-M4) fields.

1. The initial claim for the first specified drug strength would include “NCD333444” as the Multiple Prescription/Service Order Group ID and “Non-Commercially Available Dose” as the Multiple Prescription/Service Order Group Reason Code. This would explain the subsequent claim for the same drug product but a different strength, allowing the processor to link the prescription claims based on the Multiple Prescription/Service Order Group ID and apply the applicable rules that would eliminate unnecessary rejects and calls to the Provider Help Desk for subsequent claims with the same Multiple Prescription/Service Order Group ID and alternate product service identifier.

RX Written Date: 01/01/2017
Prescribed Drug: palivizumab 50mg/0.5mL
Prescribed Qty: 0.5mL
Refills Allowed: 3
Days Supply Based on Sig and Prescribed Qty: 30 days
Order Group Number - NCD333444
Order Group Reason – Non-Commercially Available Dose

27.1.10 PRICING SEGMENT

Refer to the Pricing Guidelines Section and the COB Processing Guidelines Section in this document.

27.1.11 COMPOUND SEGMENT

The compound segment is used for a claim of a customized medication prepared in a pharmacy by combining, mixing, or altering one or more ingredients (but not reconstituting) for an individual patient in response to a licensed practitioner's prescription.

This document supports compound prescription processing including up to 99 ingredients. It is recommended that not more than 25 ingredients be submitted at one time to prevent exceeding the normal buffer capacity and causing time-out situations between pharmacy and processor.

A Compound is submitted using the Compound Segment with multiple iterations of the Compound Product ID Qualifier, Compound Product ID and other repeating fields – one iteration for each ingredient in the compound. This transaction allows the pharmacy to submit any/all of the ingredients included in the preparation of the compound.

Each ingredient of a compound is contained within the iterations of the Compound Segment **within a transaction**. Each ingredient is **not allowed** to be sent in separate transactions of a transmission.

The order of the compound ingredients does not make any difference when submitting a claim.

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

Advantages:

1. Ability to perform DUR.
2. Ability to claim manufacturers rebates for all ingredients
3. Ability to minimize rebate disputes.
4. Ability to perform accurate pricing per ingredient.

27.1.11.1 CLAIM AND PRICING SEGMENT FIELDS

When billing for multiple ingredients, use the following Claim and Pricing Segment fields:

Product/Service ID (407-D7) – defaults to zero. (Zero means “0”.)

Product/Service ID Qualifier (436-E1) – defaults to “00”

The Product/Service ID must contain a value of “0” and Product/Service ID Qualifier must contain a value of “00” when used for multi-ingredient compounds.

Quantity Dispensed (442-E7) – quantity of entire multi-ingredient product

Ingredient Cost Submitted (409-D9) – sum of all individual ingredient costs

Compound Code (406-D6) – must be “2”

Route of Administration (995-E2) – When used in multiple ingredient processing, this field contains the route of administration of the complete compound mixture. The data in this field is used primarily for on-line real-time drug use review in order to avoid unnecessary processing time and screening by the claims processor. This field can be used to selectively apply DUR modules to compounds submitted on-line. For example, in general, topical preparations do not result in drug-drug interactions; thereby the claims processor can bypass this DUR module.

27.1.11.2 DEFINITIONS

Compound Dosage Form Description Code (450-EF)

Definition: Dosage form of the complete compound mixture.

Purpose: The data in this field is reported one time. When used in combination with Compound Dispensing Unit Form Indicator field 451-EG, a complete description of the compound prescription dispensed is provided.

Compound Dispensing Unit Form Indicator (451-EG)

Definition: NCPDP standard product billing codes.

Purpose: The total compound metric decimal quantity expressed as Each, Gram, or Milliliter. When used in combination with Compound Dosage Form Description Code field 450-EF, a complete description of the compound prescription dispensed is provided.

Example: Describes the units' form of the entire compound, such as 10 each, 30 grams, or 1000 milliliters.

Compound Level of Complexity (C60-AG)

Definition: Value used by the pharmacy to indicate the complexity involved in the preparation of the compounded prescription.

Purpose: Replaces the Level of Effort and will be more conducive to pharmacy workflow.

Compound Ingredient Component Count (447-EC)

Definition: Count of compound product IDs (both active and inactive) in the compound mixture submitted.

Purpose: Compound count number provides the total iterations of the ingredients submitted for reporting, billing, reimbursement and DUR.

Compound Product ID Qualifier (488-RE)

Definition: Code qualifying the type of product dispensed.

Purpose: Identifies what type of drug code is reported in the Compound Product ID. For example, is the product identifier an NDC or a UPC?

Compound Product ID (489-TE)

Definition: Product identification of an ingredient used in a compound.

Purpose: Identifies the code of the product being dispensed for which payment is being requested. For example, this could be the NDC or the UPC that is unique to the product.

Compound Ingredient Quantity (448-ED)

Definition: Amount expressed in metric decimal units of the product included in the compound mixture.

Purpose: Data in this field reports the metric decimal quantity of the product used in the compound mixture and facilitates the calculation of the reimbursement amount for this ingredient.

Compound Ingredient Drug Cost (449-EE)

Definition: Ingredient cost for the metric decimal quantity of the product included in the compound mixture indicated in “Compound Ingredient Quantity” (448-ED).

Purpose: Facilitates the calculation of reimbursement for this ingredient.

Compound Ingredient Basis of Cost Determination (490-UE)

Definition: Code indicating the method by which the drug cost of an ingredient used in a compound was calculated.

Purpose: Facilitates the calculation of reimbursement for the ingredient by specifying the method by which the drug cost was calculated.

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

- 877 -

Compound Ingredient Modifier Code Count (362-2G)

Definition: Code indicating the number of modifiers codes to follow.

Compound Ingredient Modifier Code (363-2H)

Definition: Identifies special circumstances related to the dispensing/payment of the product as identified in the Compound Product ID (498-TE).

Submission Clarification Code Count (354-NX)

Definition: Code indicating the number of clarification codes to follow.

Submission Clarification Code (420-DK)

Definition: Code indicating that the pharmacist is clarifying the submission.

Value: 8 Process Compound for Approved Ingredients.

Purpose: If one or more ingredients is not covered, and a value of 8 is not submitted, the claim must be rejected. However, the pharmacist may decide to accept payment excluding the non-covered ingredient(s). A value 8 is resubmitted on a rejected compound prescription when the pharmacist decides to accept payment for all other ingredients, except those not covered by the plan.

27.1.11.3 USE OF COMPOUND FIELDS

The following fields pertain to the entire compound. Each field is preceded by its field identifier and is followed by a field separator. The Compound Ingredient Component Count contains the total number of ingredient iterations that will be present.

<u>Field #</u>	<u>Field Name</u>
450-EF	Compound Dosage Form Description Code
451-EG	Compound Dispensing Unit Form Indicator
C60-AG	Compound Level of Complexity
447-EC	Compound Ingredient Component Count

The following fields pertain to each compound ingredient. These fields must be repeated as required, for each ingredient. Each field is preceded by its field identifier and followed by a field separator.

<u>Field #</u>	<u>Field Name</u>
488-RE	Compound Product ID Qualifier
489-TE	Compound Product ID
448-ED	Compound Ingredient Quantity
449-EE	Compound Ingredient Drug Cost
490-UE	Compound Ingredient Basis Of Cost Determination
362-2G	Compound Ingredient Modifier Code Count
363-2H	Compound Ingredient Modifier Code

There are situations where a modifier could be necessary for a payer to properly process a claim with an NDC code. For example, a KO modifier could be required on nebulizer drugs. The Compound Ingredient Modifier Code is used to identify the modifier that is applicable to a particular ingredient (NDC) within the compound.

A compound ingredient must be identified with a Compound Product ID Qualifier (488-RE). When a compound ingredient cannot be associated to industry standard values (i.e., NDC, UPC), trading partners must agree upon a qualifier value to use (e.g., 99 - Other) with the appropriate Compound Product ID.

Compound Ingredient Drug Cost (449-EE) and Compound Ingredient Basis of Cost Determination (490-UE) must be sent, even if the Compound Ingredient Drug Cost (449-EE) rounds to zero.

27.1.11.4 COMPOUND INGREDIENT CALCULATES TO BE LESS THAN \$0.005

If an ingredient in a compound calculates to be less than \$0.005 cent for the dosage being prescribed and is reported, the Compound Ingredient Drug Cost (449-EE) and Compound Ingredient Basis of Cost Determination (490-UE) must be sent for this drug in the compound segment.

For example a compound contains 4 ingredients:

NDC	Name	Strength	Pack Size	Cost	Qty in Compound	Extended Cost
00574-0421-25	Hydrocortisone Acetate		25	\$56.20	1.500	\$3.372
00395-1619-64	Menthol Crystals		120	\$17.56	.060	\$0.0087
00395-0467-92	Camphor Spirits Sol.		60	\$0.97	.060	\$0.00097
60432-0546-16	Lindane Lotion	1%	480	\$47.06	60.00	\$5.882

The Camphor Spirits has an extended cost of less than \$0.001. If reported, these fields must be sent, even if the Compound Ingredient Drug Cost (449-EE) rounds to zero.

- 878 -

27.1.11.5 SUPPORT OF A SINGLE INGREDIENT COMPOUND

The support of the Compound Segment must be used for one or more ingredients in a compound. The Count reflects the number of iterations of product sent, whether one or more than one.

27.1.11.6 MULTI-INGREDIENT COMPOUND AND REJECTS

How do you indicate on the initial rejected response for a multi-ingredient compound transaction which ingredients will not be paid, so the provider will understand which ingredients will be paid, if they decide to submit another transaction with a Submission Clarification Code of 8 (Process Compound For Approved Ingredients)?

In this compound question, the Missing/Invalid (M/I) Reject Code may not be specific enough and an appropriate drug-level Reject Code must be used. In other rejection situations, the M/I reject codes are specific enough.

In the NCPDP *External Code List*, the "Field Number Possibly In Error" is noted. This note can be used as guidance for identifying the field in error. For example, Reject Code "70" states that 407 (Product/Service ID) is possibly in error. Whether billing for a single ingredient or multiple ingredient, reject codes exist to further explain the rejection. Therefore reject codes that refer to similar fields in the Claim Segment or the Compound Segment can be used to explain the rejection.

Either of the structures below could be used. In this example, the provider submits 5 ingredients to the processor. The processor sends back 3 rejects. Two rejects are related to compound ingredients and one is not. The processor rejects ingredients three and four.

Reject Codes related to compound ingredients:

Reject Code "70" Product/Service Not Covered – Plan/Benefit Exclusion (ingredient 3)

Since this claim is a multi-ingredient compound claim, there is only one claim permitted in the transmission, and the Compound Segment is present. The Product/Service Not Covered by default has to reference the Compound Product ID, which by definition is a repeating field and eligible to use the Reject Field Occurrence Indicator field. In this situation, the "possible field in error" is the Compound Product ID (489-TE).

Reject Code "21" M/I Product/Service ID – using Compound Product ID (489-TE) (ingredient 4)

Reject Code "56" is not related to compound ingredient rejects, but to another error in the transaction:

Reject Code "56" Non-matched Prescriber ID

Example 1:

111-AM	SEGMENT IDENTIFICATION	21
112-AN	TRANSACTION RESPONSE STATUS	R
510-FA	REJECT COUNT	3
511-FB	REJECT CODE	70
546-4F	REJECT FIELD OCCURRENCE INDICATOR	3
511-FB	REJECT CODE	21
546-4F	REJECT FIELD OCCURRENCE INDICATOR	4
511-FB	REJECT CODE	56

Or Example 2:

111-AM	SEGMENT IDENTIFICATION	21
112-AN	TRANSACTION RESPONSE STATUS	R
510-FA	REJECT COUNT	3
511-FB	REJECT CODE	56
511-FB	REJECT CODE	70
546-4F	REJECT FIELD OCCURRENCE INDICATOR	3
511-FB	REJECT CODE	21
546-4F	REJECT FIELD OCCURRENCE INDICATOR	4

In Example 1, the Reject Codes related to occurrences appear first ("70" and "21") and the Reject Code at the transaction level ("56") occurs last. In Example 2, the Reject Code at the transaction level ("56") occurs first and then any Reject Codes related to occurrences follow ("70" and "21"). Either method is permitted because parsing routines must interrogate the Reject Code, then look for the next field. If the next field is the Reject Field Occurrence Indicator, the Reject Code is pointing to a field that has a relationship to an occurrence. If the next field is not the Reject Field Occurrence Indicator, the Reject Code stands on its own (transaction level).

27.1.11.7 SHARED REJECT CODES

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

- 879 -

The Telecommunication Reject Codes listed in the NCPDP *External Code List* (ECL), offers guidance on which fields to review for potential correction of rejections by providing "Field Numbers Possibly in Error" for individual reject codes. Within the NCPDP *Telecommunication Standard* there are like fields that are used within the processing of a compounded claim and a non-compound claim. Since a Claim Billing using the Compound Segment must contain only one (1) transaction within a transmission, there would be no occasion where like fields would be submitted within the same transmission. Therefore, reject codes, which apply to fields used in non-compounded claim transactions can in most cases also apply to like fields used in compounded claim transactions.

For example, there are many reject codes that refer to like fields, Product/Service ID (407-D7) and Compound Product ID (489-TE) in the "Field Numbers Possibly in Error". These fields qualify for shared usage of reject codes since the Product/Service ID (407-D7) field has no significance in a compounded claim transaction. This same logic holds true for other fields within the Compound Segment, Compound Ingredient Basis Of Cost Determination (490-UE) and Compound Product ID Qualifier (488-RE) specifically. Their counterpart non-compounded claim transaction fields, Basis Of Cost Determination (423-DN) and Product/Service ID Qualifier (436-E1) respectively are not used within a compounded claim transaction. The reject codes that must be used with these like fields will be those reject codes that pertain to the non-compounded claim fields. Guidance on compound prescription processing within this Guide provides the following information:

When billing for multiple ingredients, use the following Claim Segment fields:

Product/Service ID (407-D7) – defaults to zero. (Zero means "0".)

Product/Service ID Qualifier (436-E1) – defaults to "00"

Because default values have been provided, there is the possibility that bad data submitted for these fields could cause a claim rejection. It is important to note that such rejections would be readily distinguished from rejections on fields Compound Ingredient Basis Of Cost Determination (490-UE) and Compound Product ID Qualifier (488-RE) since the Reject Field Occurrence Indicator (546-4F) would not be sent as it would for rejections involving the repeating fields Compound Ingredient Basis Of Cost Determination (490-UE) and Compound Product ID Qualifier (488-RE).

The remaining fields within the Compound Segment do not follow this same logic and fall into two categories.

- The first category of fields also has like counterpart non-compounded claim fields but those like fields have significance within the processing of a compounded claim transaction and therefore cannot share reject codes. The counterpart fields for Compound Ingredient Quantity (448-ED) and Compound Ingredient Drug Cost (449-EE) are Quantity Dispensed (442-E7) and Ingredient Cost Submitted (409-D9) respectively. For compounded claim transactions, Quantity Dispensed is populated with the final quantity of the compounded drug and Ingredient Cost Submitted with the total ingredient cost of all component ingredients within the compound.
- The second category of fields do not have like non-compounded claim counterpart fields since the information is inherent in other fields submitted on Claim Billing transactions or are unique to compounded claim transactions. For example Compound Dosage Form Description Code (450-EF), and Compound Dispensing Unit Form Indicator (451-EG) do not have claim counterpart fields since the information they supply on a compounded claim is gleaned from the National Drug Code (NDC) as it resides on a Formulary Data Base for non-compounded claims. Compound Ingredient Component Count (447-EC) does not have a like non-compounded claim counterpart field because of its uniqueness to the processing of compounds and the need to know how many ingredients exist within the compound.

This will not create confusion for the claim provider because as the creator of that transaction, the software system is aware of whether or not the transaction is for a compound or a single ingredient. Additionally, processor/payer software systems will benefit from having a single set of reject codes that apply whether it is for a single ingredient billing transaction or a compound billing transaction.

27.1.12 PRIOR AUTHORIZATION SEGMENT

Prior Authorization Supporting Documentation (498-PP) is used to supply information not included in other data fields that may be required to process the prior authorization transaction.

When Request Type (498-PA) value of "2" (Reauthorization) is used, the Prior Authorization ID Assigned (498-PY) is populated with the prior authorization ID from the original request.

See the NCPDP *Data Dictionary* for comments under each field for further clarification.

27.1.13 CLINICAL SEGMENT

The Clinical Segment includes the fields necessary to identify unique patient demographics, such as diagnoses, height, weight, and laboratory measurements. The standard utilizes several new fields to accomplish the goal of describing patients' current health status.

Diagnosis Code (424-DO)

All diagnosis code fields must adhere to the owner's code set rules and formats.

Clinical Information Counter (493-XE) indicates the occurrence number of set/grouping of patient information that follows. The term "counter" as used in the clinical information and DUR/PPS segments is synonymous with occurrence number. For example, in a repetition of four, the first occurrence of the field or set/logical grouping would be preceded by a counter with a value of "1". The second occurrence of that field or set/logical grouping would be preceded by a counter with a value of "2", the third occurrence would be preceded by a counter with a value of "3" and so forth.

Measurement Date (494-ZE) is the date on which the submitted measurement was valid.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use
- 880 -

Measurement Time (495-H1) is the time at which the submitted measurement was valid entered as military time. For example, 2400 is midnight on the date indicated; 2359 is 11:59p.m. or one minute before midnight on the date indicated.

Measurement Dimension (496-H2) represents the domain of the clinical information e.g., Height, Weight, Theophylline Level, Blood Pressure (BP), and Serum Creatinine (Scr).

Measurement Unit (497-H3) indicates the measuring system used in the Measurement Value field that follows e.g., cm, lb, mg/dl, and mmHg.

Measurement Value (499-H4) is the numerical result of the clinical measurement e.g., 173, 154, 15, 120/70.

27.1.14 ADDITIONAL DOCUMENTATION SEGMENT

The Additional Documentation Segment includes the fields necessary to identify unique data required for special processing needs related to forms, i.e., Certificates of Medical Necessity.

Additional Documentation Type ID (369-2Q) is used to identify the name or number of a proprietary form. Data elements within the Additional Documentation Segment provide the responses to specific questions or data requests on a form. The payer/processor would indicate to the provider which forms are supported and provide the form number(s) and questions needed for additional information.

Question Number/Letter Count (377-2Z) indicates the number of iterations of Question Number/Letter and the **one** response field (Question Percent Response, Question Date Response, Question Dollar Amount Response, Question Numeric Response, Question Alphanumeric Response) that will follow. If the Question Number/Letter Count (377-2Z) were contained 3, the fields would logically appear as:

Field	Field Name
377-2Z	Question Number/Letter Count
378-4B	Question Number/Letter
380-4G	Question Date Response
378-4B	Question Number/Letter
372-4J	Question Numeric Response
378-4B	Question Number/Letter
379-4D	Question Percent Response

Each Number/Letter occurrence must be sequential and unique within the count. For example: 1, 2A, 2B, 3, 4, 5A, 5C must not be shown as 1, 2, 2, 3, 4, 5. Hence, the order of the Response fields would depend on the order and type of questions on the form. The form could include all date questions and would repeat the Question Date Response (380-4G) according to the number of questions responded to. For example, if the Question Number/Letter Count (377-2Z) contained 4, and the responses all dealt with date related questions, the fields would logically appear as:

Field	Field Name
377-2Z	Question Number/Letter Count
378-4B	Question Number/Letter
380-4G	Question Date Response
378-4B	Question Number/Letter
380-4G	Question Date Response
378-4B	Question Number/Letter
380-4G	Question Date Response
378-4B	Question Number/Letter
380-4G	Question Date Response

27.1.15 FACILITY SEGMENT

The Facility Segment includes the fields necessary to identify the name and address of the Facility ID (336-8C). If the Facility ID (336-8C) is submitted, then the Facility Segment may be used to provide the demographic information on the Facility. Facility information is used to identify where the service was performed since some payers base payment on place of service. There is no standard link established between this field and a patient, insurance, or prescriber. The Facility ID (336-8C) is typically used to identify long-term or rest home facility. The Facility identified in this segment is not the dispensing pharmacy.

27.1.16 NARRATIVE SEGMENT

The Narrative Segment includes two fields: Segment Identification and Narrative Message (390-BM). "Narrative Message" is used to document the medical necessity of a prescription claim. Narrative documentation, otherwise called free-text information, is used to support exception handling of pharmacy claims. The National Standard Format (NSF) and the X12N 837 standards both support the documentation of narrative information. The Narrative Message field duplicates this function in the NCPDP Telecommunication Standard for Medicare Claim billing. An example includes either of the following: (1.) When a nebulizer medication is billed at a quantity higher than typically allowed, supporting documentation must be provided to support a claim authorization. The physician's narrative information supporting the request is documented in this field. (2.) A payer will reject multiple claims for multiple drugs within

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

- 881 -

the same therapeutic category. To support exception handling of this type of condition, the physician's narrative information supporting the request is documented in this field.

27.1.17 INTERMEDIARY SEGMENT

The Intermediary Segment includes the fields necessary to support communications between a Provider and REMS Administrator, a Provider and PDMP Administrator, or a Provider and Switch. Providers should have access to the intermediary fields as applicable for trading partners. The provider transmits values in these fields to adhere to specific REMS, PDMP or Switch rule sets managed by the intermediary. The intermediary may also return a Response Intermediary Segment to confirm rule sets have been met or to provide additional REMS, PDMP or Switch messaging. The below scenarios provide example fields and values that may be transmitted.

27.1.17.1 PROVIDER TO REMS ADMINISTRATOR SCENARIO

INTERMEDIARY SEGMENT			
FIELD	FIELD NAME	VALUE	COMMENTS
111-AM	SEGMENT IDENTIFICATION	19	Intermediary Segment
B44-8G	INTERMEDIARY ID COUNT	1	One occurrence
B45-8H	INTERMEDIARY ID TYPE CODE	03	Risk Evaluation and Mitigation Strategy (REMS)
B46-8J	INTERMEDIARY ID TYPE ENTITY	02	Patient
B47-8K	INTERMEDIARY ID QUALIFIER	14	Risk Evaluation And Mitigation Strategy (REMS)
B48-8M	INTERMEDIARY ID	101485975	REMS Patient ID

In this scenario, the REMS Administrator requires their unique Risk Evaluation and Mitigation Strategy (REMS) ID to identify the patient.

27.1.17.2 PROVIDER TO PDMP ADMINISTRATOR SCENARIO

INTERMEDIARY SEGMENT			
FIELD	FIELD NAME	VALUE	COMMENTS
111-AM	SEGMENT IDENTIFICATION	19	Intermediary Segment
B44-8G	INTERMEDIARY ID COUNT	1	One occurrence
B45-8H	INTERMEDIARY ID TYPE CODE	02	Prescription Drug Monitoring Program (PDMP)
B46-8J	INTERMEDIARY ID TYPE ENTITY	02	Patient
B47-8K	INTERMEDIARY ID QUALIFIER	02	Driver's License Number
B48-8M	INTERMEDIARY ID	11223344556677889911	
B49-8N	INTERMEDIARY ID STATE/PROVINCE ADDRESS	GA	Georgia

In this scenario, the PDMP Administrator requires Driver's License Number, State, and Relationship Code as identification.

27.1.17.3 PROVIDER TO SWITCH SCENARIO

INTERMEDIARY SEGMENT			
FIELD	FIELD NAME	VALUE	COMMENTS
111-AM	SEGMENT IDENTIFICATION	19	Intermediary Segment
B44-8G	INTERMEDIARY ID COUNT	1	One occurrence
B45-8H	INTERMEDIARY ID TYPE CODE	01	Intermediary
B46-8J	INTERMEDIARY ID TYPE ENTITY	01	Intermediary
B47-8K	INTERMEDIARY ID QUALIFIER	06	Intermediary Authorization
B48-8M	INTERMEDIARY ID	XXYYZZ112233	Intermediary Authorization/Override

In this scenario, the Intermediary program requires an authorization identifier to override a pre or post edit alert.

27.1.18 LAST KNOWN 4Rx SEGMENT

The Last Known 4Rx Segment is situational for an Eligibility Verification request. It is sent by the pharmacy with last known claim information which is then used to locate the member/beneficiary. The use of this segment is for Transaction Facilitator Eligibility Verification only. Additional business cases should be brought forward for approval.

Possible business cases for the use of this segment is when the pharmacy

- has received a claim rejection from the Medicare Part D Plan
 - o For example,
 - coverage not in effect for this date of service
 - incorrect 4Rx information
- may not store the value required for the Cardholder ID in the Eligibility Verification transaction, therefore are unable to obtain current eligibility information for the date of service

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

- has stored the value required for the Cardholder ID in the Eligibility Verification transaction, but receives a reject from the Transaction Facilitator and seeks to obtain current information

The pharmacy sends an Eligibility Verification transaction to the Transaction Facilitator with the Cardholder ID (302-C2) containing the value "LASTKNOWN" with the Last Known 4Rx Segment. The Transaction Facilitator uses the last known information to attempt to find the beneficiary and returns the current 4Rx information for this beneficiary, as well as other health information, if known.

27.2 RESPONSE SEGMENTS

27.2.1 RESPONSE HEADER SEGMENT

The Header Segment is required and must be first in the transmission. All fields are required positionally. When a field is not used, depending upon trading partner needs, the field must be filled with zeroes or spaces, as appropriate.

The Response Header Segment contains the field Version/Release Number, Transaction Code, Transaction Count, Service Provider ID Qualifier, Service Provider ID, and Date of Service that are also used in the Transaction Header Segment. The intent of these fields within the Response Header Segment is to echo without change, the values submitted. These fields in the Response Header Segment are used by the software system to offer a level of verification at the transmission level where the response is paired to the request. (The Prescription/Service Reference Number in the Response Claim Segment, when applicable, may be used to match as well.)

Header Response Status (501-F1)

If either the entire transmission or the Header is in error, the Header Response Status in the Response Header will be "R". When possible, the transaction within the transmission should be rejected with an "R".

If the transaction rejects for detail errors, the Header Response Status in the Response Header will be "A" and the Transaction Response Status field in the Response Status Segment will be "R". The appropriate reject code(s) must be displayed when a transaction rejects for detail errors.

27.2.2 RESPONSE PATIENT SEGMENT

This segment is used in response transactions to return or confirm demographic information. (Refer to "Matrix" section for transactions used.) This information could assist in the verification that the patient information returned is indeed for the patient for whom the transaction request was intended.

An example would be multiple birth/same sex when the first name initial is the same. The entire first name would be returned to clarify.

27.2.3 RESPONSE INSURANCE ADDITIONAL INFORMATION SEGMENT

This segment is used solely for Medicare Part D Eligibility transactions to provide Medicare specific benefit information.

Next Medicare Part D Effective Date (140-US)

Next Medicare Part D Termination Date (141-UT)

These fields are populated only when, based upon the Date of Service (401-D1), future Medicare Part D coverage exists. The future date closest to the date of service requested will be returned should more than one future coverage exist.

Medicare Part D Coverage Code (139-UR) – will indicate if Medicare Part D is the primary insurer, secondary insurer, etc. for the patient.

Contract Number (240-U1) = will contain the unique identifier of the Prescription Drug Plan (PDP) in which the patient is enrolled.

Benefit ID (757-U6) = will contain the plan benefit package identifier within the Prescription Drug Plan (PDP).

Formulary ID (926-FF) = will identify the formulary of the covered patient.

27.2.4 RESPONSE STATUS SEGMENT

27.2.4.1 RECONCILIATION ID

This identifier is to be returned on every Approved transaction and must be unique for that processor, to facilitate Reversal submissions whereby originator is able to identify the specific transaction to be reversed. See sections noted for: **Reversal Information** and **Reversal Guidelines**

CLAIM and REVERSAL Transaction Flow

Claim

Pharmacy submits claim (B1)	→	Processor accepts and processes
Pharmacy receives payment result	←	When Result is an APPROVED claim (P,C) Processor assigns unique ID: B98-34 RECONCILIATION ID = 123456789

Note: If the response is a DUPLICATE PAID "D" or DUPLICATE OF CAPTURED "Q", the rules for populating RECONCILIATION ID are different. See applicable situations.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

- 883 -

To Reverse

Pharmacy submits Reversal (B2) In Claim Segment: B98-34 RECONCILIATION ID = 123456789	→	Processor uses 201-B2 SERVICE/PROVIDER ID and B98-34 RECONCILIATION ID to match to APPROVED claim on file.
Pharmacy receives notice that Reversal was ACCEPTED	←	RECONCILIATION ID on APPROVED Reversal response is ID of reversed transaction B98-34 RECONCILIATION ID = 123456789

CLAIM and REBILL Transaction Flow**Claim**

Pharmacy submits claim (B1)	→	Processor accepts and processes
Pharmacy receives payment result	←	When Result is an APPROVED claim (P,C) Processor assigns unique ID: B98-34 RECONCILIATION ID = 234567890

To Rebill

Pharmacy submits Rebill (B3) In Claim Segment: B98-34 RECONCILIATION ID = 234567890	→	Processor uses 201-B2 SERVICE/PROVIDER ID and B98-34 RECONCILIATION ID to match to APPROVED claim on file to: 1) Reverse 2) Re-processes B3 data as new
Pharmacy receives notice that Reversal was ACCEPTED	←	RECONCILIATION ID on APPROVED B3 response is a NEW value assigned to the Paid or Captured B3 claim B98-34 RECONCILIATION ID = 345678901

27.2.4.1.1 PROCESSOR CONSIDERATIONS FOR USING RECONCILIATION ID**27.2.4.1.1.1 Possible merger of Platforms/Processors with potential to have more than one approved transaction per Reconciliation ID**

Reconciliation IDs must be unique within a processor. If merging of processing platforms has the potential to result in non-unique Reconciliation IDs on approved transactions (which when separate processors/platforms were unique at time of creation), processor must have coding in place to address this possibility. If more than one APPROVED transaction is found, legacy matching criteria is used to isolate to specific claim.

27.2.4.1.1.2 Claims History from Prior Processor

Should claims history be moved to a new processor and that processor is expected to accept reversals, processor must accommodate the possibility that Reconciliation ID might be duplicated. The use of this with Service Provider ID (201-B1) should mitigate the issue but in the case there is more than one APPROVED transaction for that Reconciliation ID, legacy match criteria is used to isolate to specific claim.

27.2.4.1.1.3 Processor Adjustment Processes

Processors sometimes perform 'adjustments' to an APPROVED transaction to correct member accumulators or for other reasons. When this takes place the RECONCILIATION ID originally assigned must be maintained by the processor in some manner. In the event the provider needs to reverse the originally APPROVED transaction after the adjustment, the processor must still be able to locate the proper transaction to reverse using the Reconciliation ID from the original APPROVED transaction.

Processor may keep the original Reconciliation ID on their Adjustment record
or

Processor may choose to assign a new internal Reconciliation ID however they must be able to accept the original Reconciliation ID provided on the transaction response and link to the adjusted transaction for reversal.

27.2.4.2 REJECT FIELD OCCURRENCE INDICATOR (546-4F)

Due to the usage of repeating fields within segments, the Reject Field Occurrence Indicator is used to identify which repeating fields are in error. If a processor wishes to report a particular ingredient within a compound that is in error, the appropriate reject code is utilized, and the Reject Field Occurrence field indicates which repetition is in error. Likewise, if a particular repetition of a field is missing or invalid in syntax, the particular field is indicated using both the reject code and the occurrence.

For example, if a field on a transmission request repeats three times and the second occurrence has an error, the Reject Code (Field 511-FB) would contain the appropriate error code and the Reject Field Occurrence Indicator must contain the value "2" for the second occurrence in error. If a field is designated as not repeating and this field has an error, the Reject Field Occurrence Indicator field must be omitted. See sections "Standard Conventions", "Repetition And Multiple Occurrences", "Repeating Data Elements", "Reject Field Occurrence Indicator".

27.2.4.3 SHARED REJECT CODES

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

- 884 -

See section above “Shared Reject Codes”.

27.2.4.4 ADDITIONAL MESSAGE INFORMATION FIELDS

The usage of the Additional Message Information (526-FQ) field has changed notably from versions prior to D.0. The Additional Message Information (526-FQ) has been shortened to 40 bytes and it may repeat multiple times to relay free text messages and/or structured messages. If a free text message is longer than 40 bytes (the maximum length of this field), one or more subsequent occurrences are to be used for message completion (see section “Free Text Messages” below). This allows clearly sending multiple distinct free text messages.

Additional Message Information Qualifier (132-UH) values “01”-“09” are defined for free text messages and qualify the previously unqualified usage of Additional Message Information (526-FQ), (see section “Free Text Messages” below). Additional Message Information Qualifier (132-UH) values **must occur no more than once a transaction and the values must be ordered sequentially** (numeric characters precede alpha characters, i.e., 0-9, then A-Z); note gaps may occur.

Entities receiving the response transaction must allow for new values to be defined for Additional Message Information Qualifier (132-UH) in future updates to the ECL. A receiving entity should allow for the receipt of such a new/unrecognized value such that a system error or rejection of the response does not occur. The receiving entity can choose how to process (i.e., display or ignore) that qualifier and message.

27.2.4.4.1 FREE TEXT MESSAGES

Up to 9 free text messages can be included in the response for a transaction. The first message occurrence in a transaction will be qualified in Additional Message Information Qualifier (132-UH) with the first qualifier value (“01”) and each following occurrence will be assigned the next available qualifier value.

Instructions to the processor, sending the transaction response –

If a full message is longer than will fit in the 40 characters allowed in the Additional Message Information (526-FQ) field, the message should be divided into occurrences of the Additional Message Information field, not exceeding the field size limit. The Additional Message Information field should then be populated into the necessary number of occurrences and the continuation of the message is indicated by including the Additional Message Information Continuity (131-UG) field with each Additional Message Information field, except for the final occurrence.

Instructions to the provider, receiving the transaction response –

The Additional Message Information Continuity (131-UG) field following an Additional Message Information (526-FQ) is used to denote that the free text continues in the next Additional Message Information (526-FQ) occurrence, allowing for enhanced human viewing and/or facilitating a programmed system displaying the text for readability. A provider system can use this continuity indicator in any manner it determines suitable to cleanly format the text for its display purposes. If this free text message is not continued to the next Additional Message Information (526-FQ) occurrence, the Additional Message Information Continuity (131-UG) field is omitted. Additional free text messages may follow using the same approach, up to a maximum of 9 occurrences of the Additional Message Information (526-FQ) field.

27.2.4.4.2 STRUCTURED MESSAGES

There are no qualifiers defined for Structured Messages in the release of the NCPDP *Telecommunication Standard Implementation Guide Version F3*, however, the following defines the process for requesting and using qualifier values for Structured Messages.

If an entity wishes to implement and use a structured message, the structure should be brought forward to NCPDP to establish standardized industry usage of the structure. An Additional Message Information Qualifier (132-UH) value will be assigned and added to the ECL upon approval by the Maintenance & Control Work Group. Once the ECL is published, the new structured message may be implemented by trading partners that are utilizing a compatible version of the Telecommunication Standard.

An example of a theoretical need to implement a structured message and the process for doing so follows:

Genetically tuned variants of Gorillacillin are released to the market that require knowing a specific section of a patient's DNA sequence on chromosome 3 in order to properly dispense the appropriate version of the medication to the patient. If a payer believes the patient to have the relevant DNA sequence AGTACAGAGT, but the pharmacy has submitted the Gorillacillin variant appropriate for sequence ATGAGACATG, it would be beneficial for the processor to reply in a manner that supports the pharmacy's ability to use this information to resolve the discrepancy and either dispense the proper alternative therapy or update the information on record with the payer. The simple rejection with Reject Code “70” could be problematic without additional qualification and assisting information.

A request must be brought forward through a Data Element Request Form (DERF) for the new fields in a future Standard version and a structured message to support a processor reply in the current version of the Standard. The ECL component of the request could for example, take the form for these values to be returned by the processor as the one or two digit chromosome identifier, the 15 byte alphanumeric section identifier, and the relevant DNA sequence of up to 20 characters with a semicolon separating the three values. In this example, it could appear in the Additional Message Information (526-FQ) field as “3;A98XC-94; AGTACAGAGT”. The Maintenance & Control Work Group discusses the request and approves the request for the new structure. It is assigned (for example) Additional Message Information Qualifier (132-UH) value “DN”

Version F6

- 885 -

for this structured message. Once the new updated ECL document is approved by the Board of Trustees and published, trading partners may begin using the new structured message.

27.2.4.4.3 EXAMPLE 1: ONE FREE TEXT MESSAGE IS SENT, LESS THAN 40 BYTES

The free text message is

"HELP DESK TO ASSIST WITH QUESTIONS".

RESPONSE STATUS SEGMENT

27.2.4.4.8 EXAMPLE 6: TWO FREE TEXT MESSAGES

If a processor wanted to return two statements that were longer than the 40 characters provided by a single message field with the intended "readable" output to be displayed as:

MARY HAD A LITTLE LAMB, WHOSE FLEECE WAS WHITE AS SNOW. AND EVERYWHERE THAT MARY WENT, THE LAMB WAS SURE TO GO.

FOR ADDITIONAL INFORMATION PLEASE CALL THE HELPDESK AT 1-800-333-4444.

See also section "Standard Conventions", "Repetition And Multiple Occurrences", "Repeating Data Elements", "Response Status Segment".

27.2.4.5 TRANSACTION REFERENCE NUMBER (880-K5)

This field has been added for use in the Medicare Part D Information Reporting Process. The Transaction Reference Number is used to track all transactions related to a particular dispensing event. Whoever creates the Information Reporting Transaction is responsible for creating this number and reporting it in the N Payer Identification segment of the N1 request. The entity receiving the Information Reporting Transaction is expected to return that number within the Response Status Segment of the N1 response.

The Transaction Reference Number designated in the N1 is carried through in the N2.

27.2.5 RESPONSE PRICING SEGMENT

Refer to the "COB Processing Guidelines" in this document.

27.2.6 RESPONSE CLAIM SEGMENT

The Response Claim Segment includes Formulary Alternative fields (551-9F, 552-AP, 553-AR, 554-AS, 555-AT, 556-AU, D42-PV, D43-PZ, D44-PO, D45-P1, D46-P2, D47-P3, D48-P4, D49-P5, E89-ZO) that facilitate informing providers when therapeutic substitution is desired by the payer. In addition the segment includes identification of plan benefit parameters.

27.2.7 RESPONSE DUR/PPS SEGMENT

DUR/DUE Free Text Message (544-FY) was created for the processor/PBM to provide more information to the pharmacist about the DUR problem. For example, drug interaction Onset and Documentation support enhanced drug-interaction reporting and medical conditions that could justify a high dose alert may use this field to relay this information. Information that appears in the DUR/DUE Free Text Message (544-FY) is in addition to the current data contents.

Some examples of usage cited:

1. For a drug interaction "Lanoxin Tab 0.25mg – onset=DELAYED; documentation=ESTABLISHED."
2. For a therapeutic duplication "ANTIHYPERTENSIVES – 4 duplications detected, only 3 are permitted."
3. For a low dose "Min Dose = 2 per units/day – Liver Insufficiency may justify low dose."

27.2.7.1 DUR/PPS CLAIMS DATA AND RESPONSES IN BATCH TRANSACTIONS

The NCPDP *Batch Standard* supports the off-line file transmission of claims from the pharmacy to the processor and the relay of the results back in a file to the pharmacy. The recommendations and discussions contained in this Implementation Guide apply to batch transactions as well. The differences are that in a batch transaction:

- The user who establishes the rules of DUR responses needs to keep in mind that no real-time DUR responses are possible—the patient has already received the prescription and has left the pharmacy.
- Rejections for DUR and DUR message-only responses should be minimized, to avoid unnecessary and potentially noisy alerts that would not affect the immediate outcome of drug therapy at the point of dispensing.

However, the batch submission of Professional Pharmacy Services using the NCPDP *Batch Standard* appears to work quite well. The only difference in these types of transactions is that the dispensing pharmacist cannot know real-time if their professional pharmacy service claim is acceptable and reimbursable by and from the processor. Batch professional pharmacy service claims can still reference online-transmitted product claims for the purpose of linking a dispensing event to a professional service (see the use of the Associated Prescription/Service Reference Number (456-EN), Associated Prescription/Service Reference Number Qualifier (581-XZ) and Associated Prescription/Service Date (457-EP) in this document.

27.2.8 RESPONSE PRIOR AUTHORIZATION SEGMENT

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

- 889 -

Please see the section "Prior Authorization Transaction Discussion".

In some situations of a Claim Billing, a rejected response must be sent from the payer to the pharmacy that requires the pharmacy to submit a Prior Authorization ID in order to receive payment for the claim. An example of a situation may include a Benefit Transition Period that allows for payment of claims, for a period of time that would normally reject.

When a rejection of this nature is returned and a Reject Code (511-FB) of

- "N7 " Use Prior Authorization Code Provided During Transition Period,
- "N8 " Use Prior Authorization Code Provided For Emergency Fill
- "N9 " Use Prior Authorization Code Provided For Level of Care Change

is returned, the Prior Authorization ID Assigned (498-PY) field of the Response Prior Authorization Segment must also be returned. The pharmacy will take the value from the Prior Authorization ID Assigned (498-PY) of the response and place it in the field Prior Authorization ID Submitted (462-EV) of the Claim Segment. The pharmacy will then submit the claim.

27.2.9 RESPONSE OTHER PAYERS SEGMENT

Refer to the "COB Processing Guidelines" in this document.

27.2.10 RESPONSE INTERMEDIARY SEGMENT

27.2.10.1 REMS ADMINISTRATOR TO PROVIDER SCENARIO

27.2.11 RESPONSE OTHER RELATED BENEFIT DETAIL SEGMENT

This segment is used in a transaction response when the transmission is accepted and the transaction is approved. The segment supports CMS' enhancements to the eligibility data being provided to the Transaction Facilitator for Medicare Part D beneficiaries. The segment also supports commercial insurance benefits and has built in flexibility to support future benefit details. The Response Other Related Benefit Detail Segment is used in Eligibility, Claim Billing, Predetermination of Benefits, Service Billing, Prior Authorization Inquiry and Prior Authorization and Billing responses.

27.2.12 RESPONSE PROVIDER SEGMENT

This segment is used in response transactions to return the provider data source and when applicable the associated state code used to determine the submitted provider (e.g.: pharmacy, pharmacist, prescriber) is invalid. Refer to "Matrix" section for transactions used.

28 COB PROCESSING GUIDELINES

The following sections provide guidance in the use of the NCPDP Telecommunication Standard for purposes of processing coordination of benefit claims.

28.1 *RELATED TERMS AND DESCRIPTIONS*

28.1.1 COORDINATION OF BENEFITS

Coordination of benefits (COB) is the practice of coordinating coverage for an individual who is covered by two or more entities. This enables the entities to determine their respective payment responsibilities when an individual is covered by more than one entity.

28.1.2 THIRD PARTY LIABILITY (TPL)

If another insurer or program has the responsibility to pay for medical costs incurred by a Medicaid-eligible individual, that entity is generally required to pay all or part of the cost of the claim prior to Medicaid making any payment. This is known as "third party liability" or TPL. Third parties that may be liable to pay for services include private health insurance, Medicare, employer-sponsored health insurance, settlements from a liability insurer, workers' compensation, long-term care insurance, and other State and Federal programs (unless specifically excluded by Federal statute). Third party payers are not responsible for reimbursing Medicaid for any services that are not covered under the Medicaid State plan. (<https://www.cms.gov/regulations-and-guidance/legislation/deficitreductionact/downloads/tpl.pdf>)

28.1.3 SUBROGATION (PAY AND CHASE)

Subrogation occurs when a payer has paid a claim that is subsequently determined to be the responsibility of another payer. This is commonly referred to as "pay and chase". This situation occurs when:

- Enrollment information is updated retroactively
- Original payer is unaware of other coverage for the member at point of service (POS)
- Pharmacy is unaware of other coverage for the member at POS
- Member presents multiple insurance coverages, however the incorrect order of payers is billed at POS
- Complex rules/facts governing the payer order are unknown at POS

28.1.4 MUTUALLY EXCLUSIVE BENEFITS

Situation where the coverage from one benefit automatically excludes coverage from other alternative benefits. For example, an individual may have coverage under both Medicare Part B and Medicare Part D however a single claim cannot be coordinated between the two as the benefits are mutually exclusive.

28.1.5 CHANGE IN COVERAGE

Situation where the beneficiary's benefit plan changes carriers and coverage from the original carrier terminates prior to the effective date of the new carrier. Examples may include:

- Prescription benefits are transferred from Medicaid Fee for Service to Medicaid Managed Care
- Carrier/plan changes processors
- Beneficiary changes carrier/plan

28.1.6 SPLIT BILLING

Split billing is the division of a bill for service into two or more parts. Bills may be split to divide work between clients, payers or for reimbursement to different service providers for performing a shared service.

Refer to section "*Split Billing in Long Term Care*".

28.2 *COB METHODS AND OTHER COVERAGE CODE VALUES*

The Coordination of Benefits/Other Payments Segment is used for secondary, tertiary, etc. claims where the previous payer(s) have successfully adjudicated with a "P" Paid or "D" Duplicate of Paid or "R" Rejected response. Once a previous payer returns a Captured "C" response, real-time claims processing stops and non-real-time coordination of benefits occurs with any subsequent payers.

The Telecommunication Standard supports three distinct methods for COB claims processing.

- COB Method 1: Other Payer Amount Paid (OPAP)
- COB Method 2: Other Payer Patient Responsibility Amount (OPPRA)
- COB Method 3: Government COB (OPAP + OPPRA)

The payer's COB method must be at the claim routing identifier level (e.g., IIN (101-A1), PCN (102-A2)) to allow the provider to properly format the claim.

The standard supports coordination of benefit billing for up to 3 previous payers, where the Other Coverage Code (308-C8) value(s) defined for the specific COB method (Refer to section "*COB Methods and Other Coverage Code Values*") used by the payer is

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

- 892 -

determined by the accumulation of all previous payer responses. As a result, a COB payer cannot require the provider to change the COB method based on a previous payer's response.

28.2.1 COB Method 1: Other Payer Amount Paid (OPAP)

This COB method is used when the payer has a business need to know the amounts paid by the previous payers (shipping, delivery, incentive, cognitive service, drug benefit, et cetera) as reported in the Other Payer Amount Paid (431-DV) field, with the applicable Other Payer Amount Paid Qualifier (342-HC). At a minimum, the Other Payer Amount Paid (431-DV) should be associated with Other-Payer-Amount-Paid-Qualifier (342-HC) value of "07" (Drug Benefit) (Refer to section "*Drug Benefit and Other Amount Paid (565-J4) Values*"). Other Payer Patient Responsibility Amount (352-NQ) is not used with COB Method 1 - OPAP.

Other Coverage Code (308-C8) for OPAP COB:

- The value of 2 is submitted when at least one previous payer has returned a Paid response with a Total Amount Paid (509-F9) greater than \$0.
- The value of 4 is submitted when none of the previous payers have returned Total Amount Paid (509-F9) greater than zero, but at least one has returned Total Amount Paid less than or equal to zero.
- The value of 3 is submitted when all previous payers have returned a Rejected response.

When COB processing is based on "Other Payer Amount Paid" the processor determines what has been paid by prior payers. This is accomplished by summarizing 'like' Other Payer Amount Paid dollars across prior payers and then using these values against 'like' contractual amounts to reduce that liability for the current payer.

- This means drug benefit dollars paid should be used to reduce drug benefit dollars that would be paid if primary; delivery dollars paid would reduce allowed delivery dollars if such contractual agreement exists; percentage tax and/or regulatory fee dollars paid would reduce percentage tax and/or regulatory fees applicable to the COB claim as defined in the Prescription Pricing Formula, etc.
- Other Payer Amount Paid (431-DV) values reported identify contractual agreements and obligations of services between that previous payer and the billing provider. Any Other Payer Amount Paid (431-DV) values associated to an Other Payer Amount Paid Qualifier (342-HC) that is not within the contractual agreement between the COB payer and the provider cannot be used to calculate the Other Payer Amount Recognized (566-J5) value.

Once the applicable Other Payer Amount Paid dollars have been properly summarized, the net amount due is calculated based on the Prescription Pricing Formula and the response is formatted based on the Claim Response Pricing Formula (Refer to section "*Prescription Claim Pricing Request Formula*", section "*Claim Response Pricing Formula*", section "*Other Payer Amount Paid Repetitions Only*").

28.2.2 COB METHOD 2: OTHER PAYER PATIENT RESPONSIBILITY AMOUNT (OPPRA)

This COB method is used when the payer has a business need, or benefit design that is intended to reduce the patient responsibility amount(s) as reported by the last previous payer in the Other Payer Patient Responsibility Amount (352-NQ) field, with the applicable Other Payer Patient Responsibility Amount Qualifier(s) (351-NP). The COB payer defines whether the Other Payer Patient Responsibility Amount(s) should be reported as the Patient Pay Amount (505-F5) value or the components of Patient Pay as returned by the previous payer(s). The COB payer however, cannot restrict which components of Patient Pay are reported. Other Payer Amount Paid (431-DV) is NOT used with COB Method 2- OPPRA.

Other Coverage Code (308-C8) for OPPRA COB:

- The value of 8 is submitted when at least one previous payer has returned a Paid response.
- The value of 3 is submitted when all previous payers have returned a Rejected response.

When COB processing is based on "Other Payer-Patient Responsibility Amounts", the net amount due is the *sum of* the Other Payer-Patient Responsibility values from the last payer as determined by Other Payer Coverage Type (338-5C) (i.e., Primary, Secondary, etc.) that returned a paid response. The sum of the Other Payer Patient Responsibility Amounts (352-NQ) submitted would be reported as Ingredient Cost Paid (506-F6) and any other amounts paid would be reflected in the applicable response pricing field (e.g., Dispensing Fee Paid (507-F7), Incentive Amount Paid (521-FL), Percentage Tax Amount Paid (559-AX), Basis of Reimbursement Determination (522-FM) value 14 (Other Payer-Patient Responsibility Amount) to indicate the Ingredient Cost Paid (506-F6) was based on the Other Payer-Patient Responsibility Amounts (352-NQ).

Once the Other Payer Patient Responsibility Amounts have been properly summarized and other amounts to be paid have been determined, the response is formatted based on the Prescription Claim Response Pricing Formula (Refer to section "*Prescription Claim Response Pricing Formula*", section "*Other Payer Amount Paid Repetitions Only*"). If the COB benefit does not cover all components of the submitted Patient Responsibility amounts, the COB payer may pay or reject the claim. If the claim is paid, any submitted components that are not paid must be returned in the Patient Responsibility amount fields with its corresponding qualifier.

28.2.3 COB METHOD 3: Government COB

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

- 893 -

This COB method is used when the payer has the necessary legislative or regulatory policy language that requires full disclosure of both the Other Payer Amount Paid (431-DV) and the Other Payer Patient Responsibility Amount (352-NQ) associated to the previous payer claim(s). At a minimum, the Other Payer Amount Paid (431-DV) should be associated with Other-Payer-Amount-Paid-Qualifier (342-HC) value of "07" (Drug Benefit) (Refer to section "*Drug Benefit and Other Amount Paid (565-J4) Values*"). Additionally, the COB payer defines whether the Other Payer Patient Responsibility Amount(s) should be reported as the Patient Pay Amount (505-F5) value or the components of Patient Pay as returned by the previous payer(s). The COB payer however, cannot restrict which components of Patient Pay are reported.

The request for legislative or regulatory policy documentation outlining full disclosure COB is for the protection of the provider's obligation to not disclose contractual rates to others. The determination of whether the legislative or regulatory policy language allows the payer to require full disclosure COB, is based on trading partner agreement.

Other Coverage Code (308-C8) for Government COB:

- The value of 2 is submitted when at least one previous payer has returned a Paid response with a Total Amount Paid (509-F9) greater than \$0.
- The value of 4 is submitted when none of the previous payers have returned Total Amount Paid (509-F9) greater than zero, but at least one has returned Total Amount Paid less than or equal to zero.
- The value of 3 is submitted when all previous payers have returned a Rejected response.

When COB processing is based on "Government COB" the net amount due is based on either the Other Payer Amount Paid or the Other Payer Patient Responsibility Amount calculation as outlined above under COB Method 1 and COB Method 2. (Also refer to section "*Prescription Claim Response Pricing Formula*", section "*Other Amount Paid, Patient Pay Component*", and "*Benefit Stage Only*").

28.3 Request COB Segment Field Discussion

This request segment is situational and is used to identify the previous payer information in the COB claim to the non-primary payer. The COB Method noted in the Payer Sheet will determine if Other Payer Amount Paid (OPAP) fields and/or Other Payer Patient Responsibility Amount (OPRA) fields will be reported in the Coordination of Benefits/Other Payments Segment.

The following fields are mandatory:

- Coordination of Benefits/Other Payments Count (337-4C) - Count of other payment occurrences. Max count 3.
- Other Payer Coverage Type (338-5C) – will identify the other payer level of coverage for the patient, such as primary, secondary, tertiary, etc.

The following fields are situational (situations are described in the Coordination of Benefits/Other Payments Segment detail for the appropriate transaction type):

- Other Payer ID Qualifier (339-6C) - Code qualifying the Other Payer ID (340-7C).
- Other Payer ID (340-7C) – will report the identifier of the other payer or responding payer. For Medicare Part D Eligibility Transactions this field must contain the IIN (with appropriate Other Payer ID Qualifier (339-6C)).
- Other Payer Date (443-E8) - Payment or denial date of the claim submitted to the other payer.

The following fields are situational dependent upon the previous payers' information (i.e., paid vs rejected response and program type).

- Other Payer Adjudicated Program Type (C47-9T) – will identify the program type of the other payer. This value is what was returned by the previous payer in the Adjudicated Program Type (A28-ZR) in the Response Claim Segment. For example, Commercial, Medicare D, Medicaid Title XIX, ADAP/Ryan White. Refer to the *External Code List* for a complete list of values.
- Other Payer Reconciliation ID (C49-9V) – will identify the reconciliation id reported by the previous payer. The Other Payer Reconciliation ID would not be reported when the COB occurrence is reporting a rejected response from that previous payer.
- Other Payer Reject Count (471-5E) - Count of Other Payer Reject Code (472-6E) occurrences.
- Other Payer Reject Code (472-6E) – The error encountered by the previous Other Payer in Reject Code (511-FB).
- Benefit Stage Indicator Count (C50-9W) - Count of Benefit Stage Indicator (C51-9X) occurrences.
- Benefit Stage Indicator (C51-9X) – will identify the Benefit Stage(s) which applied to the claim at the time of adjudication. For example: 01: Deductible, 02: Initial Benefit, 03: Coverage Gap, 04: Catastrophic, etc. Refer to the *External Code List* for a complete list of values.
- Other Payer Amount Paid Count (341-HB) - Count of the payer amount paid occurrences.
- Other Payer Amount Paid Qualifier (342-HC) - Code qualifying the Other Payer Amount Paid (431-DV).
- Other Payer Amount Paid (431-DV) - Amount of any payment known by the pharmacy from other sources.
- Other Payer Patient Responsibility Amount Count (353-NR) - Count of Other Payer-Patient Responsibility Amount (352-NQ) and Other Payer-Patient Responsibility Amount Qualifier (351-NP) occurrences.
- Other Payer Patient Responsibility Amount Qualifier (351-NP) - Code qualifying the Other Payer-Patient Responsibility Amount (352-NQ). For example: 01: Amount Applied to Periodic Deductible Amount, 07: Amount of Coinsurance, 05: Amount of Copay, etc. Refer to the *External Code List* for a complete list of values.
- Other Payer Patient Responsibility Amount (352-NQ) – The patient's cost share from a previous payer.

Version F6

January 2020

OFFICIAL RELEASE

- Other Payer Percentage Tax Exempt Indicator (D51-P7) – Code indicating the source of the percentage tax exempt status of the other payer's claim.
- Other Payer Regulatory Fee Type Count (D53-P9) – Count of Other Payer Regulatory Fee Type Code.
- Other Payer Regulatory Fee Type Code (D63-RN) – Code identifying the type of regulatory fee reported by the other payer.
- Other Payer Regulatory Fee Exempt Indicator (D52-P8) – Code Indicating the source of the regulatory fee exempt status of the other payer's claim.
- Internal Control Number (993-A7) - Number assigned by the processor to identify an adjudicated claim when supplied in payer-to-payer coordination of benefits only.

Note: COB real-time processing is limited to three previous payers for a total of 4 payers. Each payer loop within the segment shows the payment or rejection from the previous payers. In the situation where the patient has more than 4 coverage's, after the 4th payer any additional coordination of benefits must be handled manually.

28.3.1 Other Coverage Code (308-C8)

28.3.1.1 COB METHODS AND OTHER COVERAGE CODE VALUES

Other Coverage Code (308-C8)

Code indicating whether or not the patient has other insurance coverage.

- Other Coverage Code (308-C8) is a Request Claim Segment field used to represent a summation of the claim adjudication results from all previous payers involved in the coordination of benefits for the prescription fill. The Other Coverage Code value does not represent the adjudication results of a specific payer.
- The specific Other Coverage Code value submitted is based on the COB Method required by the COB payer and the previous payer's response.
- The COB Method cannot be switched based on payment values from a prior payer.

The following chart provides an outline of the use of Other Coverage Code (308-C8) values per COB method. The "Usage/Segment/Clarification" column provides rules for which values to use in summation. The COB method columns indicate which field in the COB segment and associated value(s) correlate to the specific Other Coverage Code value submitted.

OFFICIAL RELEASE

28.3.1.2 OTHER COVERAGE CODE PER COB METHOD WHEN PREVIOUS PAYER RETURNS \$0 DOLLAR VALUES

OPAP and Government COB Methods (1 & 3):

When the previous payer's response contains a \$0 value as Total Amount Paid (509-F9), the \$0 value must be reported in the Other Payer Amount Paid (431-DV) field when submitting to subsequent payers. At a minimum, the Other Payer Amount Paid (431-DV) should be associated with Other Payer Amount Paid Qualifier (342-HC) value of "07" (Drug Benefit). (Refer to section "*Drug Benefit and Other Amount Paid (565-J4) Values*"). Other Coverage Code 4 would be submitted when none of the previous payers have returned Total Amount Paid (509-F9) greater than zero, but at least one has returned Total Amount Paid less than or equal to zero. Otherwise, Other Coverage Code 2 would be submitted when the Total Amount Paid value from any previous payer is greater than \$0 (zero). Similarly, zero must be sent in Other Payer Amount Paid (431-DV) when the previous payer reported \$0 as Total Amount Paid; the processor must not assume the Other Payer Amount Paid is \$0 if the field is not sent.

OPRA and Government COB Methods (2 & 3):

When the response from the previous payer contains a \$0 value for Patient Pay Amount (505-F5), and a COB claim is submitted to an additional payer, the \$0 value must be reported in the Other Payer-Patient Responsibility Amount (352-NQ) field with the corresponding Other Payer-Patient Responsibility Qualifier (351-NP). The plan's payer sheet defines whether the components of Patient Pay or Patient Pay Amount (505-F5) as reported by the previous payer are to be submitted. If not otherwise specified, the Other Payer-Patient Responsibility Qualifier (342-HC) value of "06" (Patient Pay Amount (505-F5) as reported by previous payer) should be sent. If COB Method 2 - OPRA is required, Other Coverage Code 8 would be submitted regardless of the Other Payer Patient Responsibility Amount value(s). If COB Method 3 – Government COB is required, as outlined above Other Coverage Code 2 or 4 would be submitted based on the Total Amount Paid (509-F9) value(s) of all previous payers.

The transmission of the two data elements (Other Payer-Patient Responsibility Amount (352-NQ) and Other Payer Amount Paid (431-DV)) is the only way to identify the claim is intended for processing as a Government COB claim. If the processor is expecting Government COB and Other Payer-Patient Responsibility Amount (352-NQ) is not present, the processor must not assume the Other Payer Patient Responsibility Amount is \$0, therefore must reject the claim with Reject Code (511-FB) value of "NQ" (M/I Other Payer-Patient Responsibility Amount).

28.3.1.3 OTHER COVERAGE CODE WHEN DRUG BENEFIT AMOUNT IS ZERO

The Other Coverage Code (308-C8) value submitted on claims using the OPAP or Government COB methods (1 & 3), is based on the accumulation of the Total Amount Paid (509-F9) values from all previous payers, and is not based on the specific component value (e.g., Drug Benefit) from any single payer. If multiple payers have been billed and at least one has paid with Total Amount Paid (509-F9) greater than 0, Other Coverage Code will be 2 regardless of additional payer responses. This means the sum of all Other Payer Amount Paid (431-DV) values for at least one previous payer will be greater than 0, regardless of which Other Payer Amount Paid values the COB payer may leverage for reimbursement determination. (Refer to section "*COB Methods and Other Coverage Code Values*")

28.3.2 OTHER PAYER PATIENT RESPONSIBILITY AMOUNT QUALIFIER (351-NP)

28.3.2.1 PATIENT PAY AMOUNT AS REPORTED IN 505-F5 VS PATIENT PAY COMPONENT AMOUNTS

When OPRA or Government COB methods (2 & 3) are required, the COB payer must define whether the Other Payer Patient Responsibility Amount(s) (352-NQ) are submitted as the total Patient Pay Amount (505-F5) or the components of Patient Pay Amount as reported by the previous payer. This information determines which Other Payer Patient Responsibility Amount Qualifier(s) (351-NP) are submitted on the COB claim.

When the total Patient Pay Amount as reported in 505-F5 is requested, the COB claim request would contain:

- Other Payer Patient Responsibility Amount Qualifier (351-NP) = "6" (Patient Pay Amount (505-F5) as reported by previous payer)
- Other Payer Patient Responsibility Amount Count (353-NR) = 1

When the Patient Pay Component Amounts as reported in C93-KN are requested, the COB claim request would contain:

- The Other Payer Patient Responsibility Amount Qualifier (351-NP) value(s) that are the companion to the Patient Pay Component Amount Qualifier(s) (C95-KQ) as reported by the previous payer.
- Other Payer Patient Responsibility Amount Count (353-NR) would represent the total number of Other Payer Patient Responsibility Amount Qualifier values submitted
- Other Payer Patient Responsibility Amount Qualifier (351-NP) value of "6" would NOT be submitted

28.3.2.1.1 OTHER PAYER PATIENT RESPONSIBILITY AMOUNT QUALIFIER FOR UNBALANCED PATIENT PAY AMOUNT (505-F5) TECHNICAL ERROR

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

- 898 -

When COB processing is based on "Other Payer-Patient Responsibility Amounts", the net amount due is the sum of all Other Payer-Patient Responsibility Amounts (352-NQ) from the last payer as determined by Other Payer Coverage Type (338-5C) (i.e., Primary, Secondary, etc.) that returned a paid response.

A COB processor/payer indicating on their Payer Sheet that they use OPPRA COB must also identify if they allow submission of the total Patient Pay OPPRA qualifier (351-NP = 06) or if they require submission of the individual components. A payer that requires submission of the individual components must accept all OPPRA qualifiers but may only pay for specific components based on their benefit design. Any submitted components that are determined to be non-payable must be returned in the response transaction as patient responsibility.

One of the requirements for building a balanced claim billing response is that the Patient Pay Amount (505-F5) must equal the sum of the Patient Pay Component Amounts. The Patient Pay Component Qualifier values have been defined to accommodate reporting of any type of patient responsibility, however, there may still be situations where a payer due to unforeseen technical issues returns an unbalanced response with regards to Patient Pay.

When a pharmacy receives a response claim with unbalanced Patient Pay financials and needs to submit a COB claim to a Payer that uses OPPRA COB, they have two options:

1. If the downstream payer accepts submission of Other Payer Patient Responsibility Amount Qualifier (351-NP) value of "06 – Patient Pay Amount (505-F5) as Reported by Previous Payer" the pharmacy should use this qualifier and send only the total Patient Pay Amount from the previous processor.
2. If the downstream payer does not accept the "06" value for 351-NP, the pharmacy must calculate the difference between the sum of the reported components and the total Patient Pay Amount as reported by the previous payer and send that in the "**Amount Attributed to Unbalanced Patient Pay Response Received from Previous Payer**" along with all other reported Patient Pay Component amounts in their respective OPPRA (352-NQ) fields.

The downstream payer will use the submitted Other Payer Patient Responsibility Amounts to determine how/if they will pay the COB claim. The downstream payer must always return a balanced response, therefore when paying based on OPPRA COB they must either:

1. Pay the sum of the component pieces
2. Pay only those components they support and return the unpayable component amounts back as patient responsibility
3. Reject the claim if there are no payable components of Other Payer-Patient Responsibility Amount
4. Reject the claim if the COB payer (e.g., Medicaid) is unable to charge the patient for the unpayable components

28.3.3 OTHER PAYER AMOUNT PAID (431-DV)

28.3.3.1 REPORTING DRUG BENEFIT AND OTHER AMOUNT PAID (565-J4) VALUES

Pricing information returned in the Response Pricing Segment is determined by the specific benefit and contractual agreement and must adhere to the NCPDP Pricing Formula. To accurately report the amounts paid in the Other Payer Amount Paid field (431-DV) in a COB Other Payer Coverage Type occurrence, a specific order of Other Payer Amount Paid Qualifiers (342-HC) must be followed.

- Order is based on the payment being associated to provider versus state revenue, and the dispensing of a product versus value added services.
- Drug Benefit is the end result, after all Other Payer Amount Paid values are subtracted from Total Amount Paid (509-F9)

The following table outlines the order in which the Other Amount Paid (565-J4) and Incentive Fee Paid (521-FL) amounts as reported by the previous payer are deducted from the Total Amount Paid (509-F9) value to determine the amount reported as Other Payer Amount Paid Qualifier (342-HC) Drug Benefit. Refer to the *External Code List* and *Editorial Document* for updates to this order as new Other Amounts Claimed (480-H9), Other Amounts Paid (565-J4) and Other Payer Amount Paid Qualifiers (342-HC) are implemented.

COB CLAIM OTHER PAYER AMOUNT PAID QUALIFIER (342- HC) REPORTING ORDER	OTHER PAYER AMOUNT PAID QUALIFIER (342-HC) VALUE	DESCRIPTION	NOTES
1	10	Percentage Tax - An Indicator which signifies the dollar amount paid by the other payer which is related to Percentage Tax.	Neither Product nor Service, not part of Sales. Any tax amount paid by the previous plan(s) should be the 1st amount reported to downstream payer.

COB CLAIM OTHER PAYER AMOUNT PAID QUALIFIER (342- HC) REPORTING ORDER	OTHER PAYER AMOUNT PAID QUALIFIER (342-HC) VALUE	DESCRIPTION	NOTES
			If COB claim is tax exempt, then the COB payer cannot use taxes paid by prior payer(s) to reduce payment obligations or used towards other payer amount recognized amount reported.
2	12	Regulatory Fee - An Indicator which signifies the dollar amount paid by the other payer which is related to a Regulatory Fee	Any regulatory fees paid by the previous payer should be second only to Percentage Tax amounts reported to downstream payers. If COB claim is regulatory fee exempt, then the COB payer cannot use regulatory fees paid by prior payer(s) to reduce payment obligations or used towards other payer amount recognized amount reported.
3	11	Medication Administration - An indicator which signifies the dollar amount paid by the other payer which is related to the administration of the medication.	Claim cost includes the dispensing and medication administration events.
4	09	Compound Preparation Cost - An indicator which signifies the dollar amount paid by the other payer which is related to the preparation of the compound.	The product cannot be dispensed without the compound prep.
5	01	Delivery - An indicator which signifies the dollar amount paid by the other payer which is related to the delivery of a product or service.	Value Added Service
6	02	Shipping - An indicator which signifies the dollar amount paid by the other payer which is related to the transportation of a product.	Value Added Service
7	03	Postage - An indicator which signifies the dollar amount paid by the other payer which is related to the mailing of a product.	Value Added Service
8	04	Administrative - An indicator which signifies the dollar amount paid by the other payer which is related to administrative activities such as utilization review, premium collection, claims processing, quality assurance, and risk management for purposes of insurance.	Value Added Service
9	05	Incentive - An indicator which signifies the dollar amount paid by the other payer which is related to additional fees or compensations paid as an inducement for an action taken by the provider (e.g., collection of survey data, counseling plan enrollees).	Value Added Service
10	07	Drug Benefit - An indicator which signifies the dollar amount paid by the other payer which is related to the plan's drug benefit.	END RESULT of subtracting all Other Payer Amount Paid values from Total Amount Paid (509-F9)

The following example demonstrates the steps a pharmacy and payer must follow to populate Other Payer Amount Paid (431-DB) COB claim transactions. The Response Pricing and Request COB segments below are followed by two charts, the first one contains the pharmacy calculations and the second one contains the payer calculations.

The following chart contains the steps a **pharmacy** would take to calculate the Other Payer Amount Paid (431-DV) values for Percentage Tax and Drug Benefit.

STEP	Action	509-F9 Total Amount Paid	559-AX Percentage Tax Paid	559-AW Regulatory Fee Amount Paid	565-J4 Medication Admin (11)	565-J4 Compound Prep (09)	565-J4 Delivery (01)	565-J4 Shipping (02)	565-J4 Postage (03)	565-J4 Administrative (04)	521-FL Incentive	431-DV Drug Benefit (07)	Note: Columns are displayed in "Back-out" order
1	Response pricing from Primary Payer	\$52.60	\$5.00	\$0.10		\$10.00							Primary Response: 506-F6 Ingredient Cost Paid = \$95.00 507-F7 Dispensing Fee Paid = \$5.00 509-F9 Total Amount Paid = \$52.60 505-F5 Patient Pay Amount = \$62.50 C93-KN Patient Pay Component Amt = \$60.00 (C95-KQ = 05 Copay) C93-KN Patient Pay Component Amt = \$2.50 (C95-KQ = 03 Percent Tax)
2	Pharmacy Builds COB/Other Payments Segment based on Primary Payers Response												
2a	OPAP values (431-DV) to report in the COB segment for Other Payer Coverage Type = 01 are mapped from the Primary Payer Response Pricing except for Percentage Tax which is calculated. These amounts are subtracted from Total Amount Paid to calculate the Drug Benefit Amount Paid		\$2.50	\$0.10		\$10.00						\$40.00	OPAP Percentage Tax calculation: Percentage Tax Paid (559-AX) minus Patient Pay Component Amount (C93-KN) for Amount Attributed to Percentage Tax (Patient Pay Component Qualifier C95-KQ = 03) \$5.00 - \$2.50 = \$2.50
2b	Running totals following the backout order results in the Drug Benefit Amount Paid.	\$52.60	\$50.10	\$50.00	\$50.00	\$40.00	\$40.00	\$40.00	\$40.00	\$40.00	\$40.00	\$40.00	Values in this row are a demonstration of how the calculations are performed to compute drug benefit. They are NOT part of the claim submission.
3	Response pricing segment values from Secondary Payer (these values are populated as if Primary)	\$53.95	\$4.45	\$0.10		\$12.00	\$8.00						Secondary Response: 506-F6 Ingredient Cost Paid = \$89.00 507-F7 Dispensing Fee Paid = \$3.50 565-J5 Other Payer Amount Recognized = \$52.60 509-F9 Total Amount Paid = \$53.95 505-F5 Patient Pay Amount = \$10.50 C93-KN Patient Pay Component Amt = \$10.00 (C95-KQ = 05 Copay) C93-KN Patient Pay Component Amt = \$0.50 (C95-KQ = 03 Percent Tax)
4	Pharmacy Builds COB/Other Payments Segment based on Primary and Secondary Payers Responses, including loops for Other Payer Coverage Type 01 (Primary) and 02 (Secondary)												
4a	OPAP values (431-DV) to be reported in the COB segment for Other Payer Coverage Type = 02 . These are calculated based on the secondary Response response pricing (step 3) less the primary "Like" OPAP values (step 2a)		\$1.45	\$0.00		\$2.00	\$8.00					\$42.50	OPAP Percentage Tax calculation: (If result is negative, move zero.) Secondary Payer Calculated % Tax Paid [(559-AX - C93-KN (% Tax)) minus Primary Payer OPAP (431-DV) for % Tax Paid (\$4.45 - \$0.50) - \$2.50 = \$1.45
4b	Running totals following the backout order results in the Drug Benefit Amount Paid.	\$53.95	\$52.50	\$52.50	\$52.50	\$50.50	\$42.50	\$42.50	\$42.50	\$42.50	\$42.50	\$42.50	Values in this row are a demonstration of how the calculations are performed to compute drug benefit. They are NOT part of the claim submission.

The following chart contains the steps a **payer** would take to calculate the Other Payer Amount Recognized (566-J5) when using Other Payer Amount Paid (OPAP) COB processing.

Step #	Action (From Payer Perspective)	559-AX Percentage Tax Paid	558-AW Regulatory Fee Amount Paid	565-J4 Medication Admin (11)	565-J4 Compound Prep (09)	565-J4 Delivery (01)	565-J4 Shipping (02)	565-J4 Postage (03)	565-J4 Administrative (04)	521-FL Incentive (05)	506-F6 Ingredient Cost Paid	507-F7 Dispensing Fee Paid	505-F5 Patient Pay Amount
1	Tertiary Payer calculates Response Amount Paid values "as if primary"												
	Response Pricing Segment Amounts	\$0.00	\$0.10		\$10.00	\$8.00					\$98.50	\$3.50	\$3.00
		431-DV Percentage Tax (10)	431-DV Regulatory Fee (12)	431-DV Medication Admin (11)	431-DV Compound Prep (09)	431-DV Delivery (01)	431-DV Shipping (02)	431-DV Postage (03)	431-DV Administrative Fee (04)	431-DV Incentive (05)	431-DV Drug Benefit (07)		
2	Determine like "OPAP Values from ALL Prior Payers"												
	OPAP from Primary	\$2.50	\$0.10		\$10.00	\$0.00					\$40.00		
	OPAP from Secondary	\$1.45			\$2.00	\$8.00					\$42.50		
	Sum of OPAP	\$3.95	\$0.10		\$12.00	\$8.00					\$82.50		
3	Determine Other Payer Amount Recognized (566-J5)											566-J5 Other Payer Amount Recognized	
3a	Lesser of Step 1 Amt or Step 2 Amt	\$0.00	\$0.10		\$10.00	\$8.00					\$82.50		
3b	Sum of Amounts in 3a											\$100.60	
4	Tertiary Payer calculates Total Amount Paid (509-F9)												509-F9 Total Amount Paid
	Sum of All Payments [506-F6 + 507-F7 + 559-AX + 558-AW + sum(564-J4)] - Other Payer Amount Recognized - Patient Pay Amount												\$16.50
	**Note: If calculated Total Amount Paid above is less than zero, set Total Amount Paid to zero and adjust Other Payer Amount Recognized to balance the pricing formula.												

28.3.3.2 TOTAL AMOUNT PAID NEGATIVE

Currently there are two known business cases where Total Amount Paid (509-F9) may be returned as a negative value. These business cases include cash discount card programs and transaction click fees.

Cash Discount Card Programs

The program administrator may charge the patient a per claim administration fee or a program enrollment fee. These fees are to be returned in the Amount Attributed to Processor Fee field (571-NZ). Since the program administrator is collecting these fees, the amount would also be reflected as a negative Total Amount Paid (509-F9) value.

- o Cash Discount programs are not insurance and may not be properly coordinated by payers as other insurance. CMS does not consider discount plans as other coverage.
- o In order to clearly identify a cash discount claim so coordination does not occur with other insurance, the processor must return the appropriate Adjudicated Program Type (A28-ZR) value.
- o Claims submitted with the Medicare D IIN/PCN and paid under the cash discount/negotiated price program will be further identified with one of the following Benefit Stage Qualifiers
 - 70 = Part D drug not paid by Part D plan benefit, paid by the beneficiary under plan sponsored negotiated pricing
 - 80 = Non-Part D drug not paid by Part D plan benefit, paid by the beneficiary under plan-sponsored negotiated pricing.
- o Claim responses returned with a negative Total Amount Paid (509-F9) value and not clearly identified as a cash discount program, will result in COB claims processing risks.

Transaction Click Fees

Transaction click fees would apply when the processor is charging a fee per transaction. The transaction fee would appear as a negative Total Amount Paid (509-F9) value only in the situation where the fee is passed onto the patient and patient liability is 100%.

- o In this situation, the processor would return the fee in the Amount Attributed to Processor Fee field (571-NZ) and balance Total Amount Paid (509-F9) accordingly.
- o If the transaction fee is passed onto the provider, and returned on the B1 claim response, the response must balance and financials identified appropriately.

To promote consistency and mitigate COB claims processing issues, it is recommended that processors not return the click fee as part of the Total Amount Paid (509-F9) but to use the PLB segment in the X12 835 transaction to report click fees. If trading partner agreement allows for click fee to be returned on the response, a negative Other Payer Amount Paid value may result in the member not being able to have coordinated benefits. Supplemental payers should accept a negative Other Payer Amount Paid and process accordingly. Please recognize the COB claim may be processed using the primary claim processing logic which may result in the pharmacy not being reimbursed for the click fee.

Note: Contractual agreements may also result in a negative Total Amount Paid where this amount would not be represented as Amount Attributed to Processor Fee

28.3.3.3 OTHER PAYER REJECT CODE (472-6E)

When a previous payer rejects the claim/service billing response, the reject codes returned by this payer are submitted in the Other Payer Reject Code (472-6E) field within the Coordination of Benefits/Other Payments Segment.

- o Up to 5 Other Payer Reject Codes can be submitted per Other Payer Coverage Type occurrence
- o When a previous payer is reported with Other Payer Reject Codes, regardless of the COB method required by the COB payer, neither the Other Payer Paid Amount (431-DV) or Other Payer Patient Responsibility Amount (352-NQ) fields are submitted.
- o If the Coordination of Benefits Other Payments Count (337-4C) is 1, and this previous payer is reported with Other Payer Reject Codes, then the Other Coverage Code (308-C8) would be 3.
- o If the Coordination of Benefits Other Payments Count (337-4C) is greater than 1, and all previous payers are reported with Other Payer Reject Codes, then the Other Coverage Code (308-C8) would be 3.
- o If the Coordination of Benefits Other Payments Count (337-4C) is greater than 1, and any previous payer(s) are reported with Other Payer Reject Codes and at least 1 previous payer is reported with Other Payer Amount (431-DV) values, then the Other Coverage Code (308-C8) would be 2 or 4 based on the dollar value.
- o If the Coordination of Benefits Other Payments Count (337-4C) is greater than 1, and any previous payer(s) are reported with Other Payer Reject Codes and at least 1 previous payer is reported with Other Payer Patient Responsibility Amount (352-NQ) values, then the Other Coverage Code (308-C8) would be 8.

28.4 RESPONSE SEGMENTS FIELD DISCUSSION

28.4.1 RESPONSE PRICING SEGMENT

28.4.1.1 OTHER PAYER AMOUNT RECOGNIZED (566-J5)

Other Payer Amount Recognized (566-J5) is defined as 'the total amount recognized by the processor of any payment from another source. This field must be returned when the COB claim is processed based on the OPAP COB Method (1), or Government COB Method (3) that results in using the Other Payer Amount Paid fields for reimbursement.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

- 904 -

Other Payer Amount Recognized is included in Response Pricing Formula, where the COB payer must:

1. Identify the allowed amounts for the "like" Other Payer Amount Paid (431-DV) values based on the plan benefit and contractual agreement with the provider.
2. Other Payer Amount Recognized is reported as the sum of the COB payer's allowed amount for the "like" values. Note, Other Payer Amount Recognized is NOT the sum of the Other Payer Amount Paid values submitted.

28.4.2 RESPONSE OTHER PAYERS SEGMENT

28.4.2.1 RESPONSE OTHER PAYERS SEGMENT

The Response Other Payers Segment is Situational. When returned, the following fields are Mandatory:

- Other Payer Coverage Type (338-5C) – will identify the other payer or responding payer level of coverage for the patient, such as primary, secondary, tertiary, etc.
- Other Payer Relationship Type (D41-PQ) – will identify the relationship of the other payer being reported to the responding payer or entity. For example, Coordination of Benefits Prior to responding payer, coordination of benefits subsequent to responding payer, mutually exclusive to responding payer, change in coverage from responding payer. Refer to the *External Code List* for a complete list of values.
- Other Payer Benefit Classification (D50-P6) – will identify the benefit classification of the other payer or responding payer. For example, RX Benefits, Medical Benefits, Dental Benefits, DME benefits. Refer to the *External Code List* for a complete list of values.
- Other Payer Adjudicated Program Type (C47-9T) – will identify the Program Type of the other payer or responding payer. For example, Commercial, Medicare D, Medicaid Title XIX, ADAP/Ryan White. Refer to the *External Code List* for a complete list of values.

The combination of the following fields provides the appropriate information to the pharmacy provider to manage the other payer information appropriately. Since these fields are designated as mandatory fields, in the event a specific value is unknown for any of the fields, the value of "unknown" may be used.

- Other Payer Coverage Type (338-5C),
- Other Payer Relationship Type (D41-PQ),
- Other Payer Benefit Classification (D50-P6) and
- Other Payer Adjudicate Program Type (C47-9T)

The following fields are Situational:

- Other Payer ID (340-7C) - will report the identifier of the other payer or responding payer. For Medicare Part D Eligibility Transaction this field must contain the IIN (with appropriate Other Payer ID Qualifier (339-6C)).
- Other Payer Processor Control Number (991-MH) - will identify the Processor Control Number (if used) of other payer or responding payer.
- Other Payer Group ID (992-MJ) - will identify the Group ID (if used) of the other payer or responding payer.
- Other Payer Cardholder ID (356-NU) – will identify the Cardholder ID used by the other payer or responding payer.
- Other Payer Person Code (142-UV) - will identify the other payer or responding payer code (if used) that specifies the person within a family.
- Other Payer Patient Relationship Code (143-UW) – will identify the patient relationship code of the other payer or responding payer.
- Other Payer Help Desk Telephone Number (127-UB) – will identify the Help Desk phone number of the other payer or responding payer
- Other Payer Help Desk Telephone Number Extension (B23-7Q) – will identify the phone extension for the other payer or responding payer
- Other Payer Benefit Effective Date (144-UX) - will identify the effective date of the enrollment. Note, the situations defined for the Eligibility Verification transactions are different than other transactions.
- Other Payer Benefit Termination Date (145-UY) - will identify the last date of coverage. Note, the situations defined for the Eligibility Verification transactions are different than other transactions.
- Other Payer Name (D23-M5) – will identify the name of the other payer.

28.4.2.2 OTHER PAYER ID COUNT AND OTHER PAYER ID

28.4.2.2.1 Other Payer ID Fields

In coordination of benefits or other payments situations, the Other Payer ID fields may be used by one payer to reject the claim or service billing and show that other coverage exists. Other Payer ID Count (355-NT) designates the number of occurrences of other coverage the payer is aware of.

Claim/Service Billing Transactions:

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

- 905 -

A claim billing or service transaction response can return up to 4 payers, including the responding payer's information to identify the payers that should be associated to the claim. For example:

- Claim Response is rejected due to two other payer's identified that should be billed primary to the responding payer. The responding payer is also aware of additional coverage that should be billed after the responding payer. In this situation, the responding payer would reject the claim and identify the 4 known payers in the Response Other Payers Segment. This would include their payer information that would be identified as Other Payer Coverage Type 03 and Other Payer Relationship Type of "Responding Payer."
- Claim response is Paid and identifies 1 other payer that should be billed supplemental to the responding payer. The responding payer is also aware of other coverage that is mutually exclusive to their benefits. In this situation, the responding payer would only return the other payer information for the supplemental payer to which benefits should be coordinated.

Eligibility Transactions:

A payer's eligibility transaction response may return up to 9 other payers, including the responding payer's information to identify the payers that are known to be associated to the patient and the relationship to the responding payer. For Example:

- Medicare Part D Eligibility response identifies a commercial payer as the primary payer, the Medicare Part D plan as the secondary payer (responding payer) and the SPAP as the tertiary payer.

Eligibility transactions may also be supported by a non-payer specific entity, where eligibility information is at the patient level versus a payer level. For example, the eligibility vendor may have knowledge of all coverages associated to the patient, including prescription benefits, medical benefits, dental benefits, etc. Since the information returned is not related to a specific payer, identification of the Other Payer Relationship Type (D41-PQ) to a responding payer is not applicable and the mandatory field would be returned with the appropriate ECL value to indicate this is a centralized eligibility response. In order to support the multiple coverages that may be associated to a patient, the Other Payer ID Count maximum count is set to 9 for Eligibility transaction responses.

Information Reporting:

For Medicare Part D payment transactions, when the Pharmacy submits the secondary/tertiary claim for payment, the Facilitator then submits an Information Reporting transaction to the PDP to update patient pay information from the secondary/tertiary/etc claim. The Facilitator populates N Payer Processor Control Number (C53-9Z), N Payer Cardholder ID (C54-AA), and N Payer Group ID (C55-AB) in the N Transaction Payer Identification Segment on the Information Reporting request transaction. The data found in Other Payer ID (340-7C) from the Response Other Payers Segment is placed in the N Payer IIN (C52-9Y). Likewise the N Payer Processor Control Number (C53-9Z), N Payer Cardholder ID (C54-AA), and N Payer Group ID (C55-AB), etc are populated.

28.4.2.3 OTHER PAYER COVERAGE TYPE (338-5C) AND OTHER PAYER RELATIONSHIP TYPE (D41-PQ)

28.4.2.3.1 OTHER PAYER COVERAGE TYPE (338-5C) = UNKNOWN

In the situation where the processor or eligibility vendor has multiple other payer coverage information on file for a patient and the specific order in which these plans should be billed is not known, the Other Payer Coverage Type (338-5C) would be returned as "UNKNOWN". The value of 'UNKNOWN' can only be returned if multiple OHI is returned and order is unknown, otherwise the known order must be returned.

The Other Payer Relationship Type (D41-PQ) must also be returned. While the order of the other payers may not be known (e.g., primary, secondary, tertiary, etc.), the appropriate value must be returned as the Other Payer Relationship Type:

- For a claim or service billing response or payer specific eligibility response, the relationship of the other payers to the responding payer must be known (e.g., coverage primary, coverage subsequent, mutually exclusive, change in coverage, etc).
- For a non-payer specific eligibility response (patient centric eligibility), the relationship of the other payers to the responding entity would be returned as "Consolidated Eligibility".

28.4.2.3.2 OTHER PAYER COVERAGE TYPE (338-5C) = NOT APPLICABLE:

In the situation where the processor or eligibility vendor for a specific payer has other payer coverage information on file for a patient that is not to be coordinated with but rather mutually exclusive to or a change in coverage from this responding payer, the Other Payer Coverage Type (338-5C) would be returned as "NOT APPLICABLE." The value of 'NOT APPLICABLE' can only be returned in these non-coordination of benefit other payer scenarios.

The Other Payer Relationship Type (D41-PQ) must also be returned. While the Other Payer Coverage Type is returned as NOT APPLICABLE indicating there is no order between the responding payer or eligibility vendor and the other payer, the appropriate value must be returned as the Other Payer Relationship Type:

- For a claim or service billing response or payer specific eligibility response, the non-COB relationship of the other payer to the responding payer must be returned as such (e.g., mutually exclusive, change in coverage, Refer to ECL). This situation would not apply to Paid claim/service billing response, as non-coordination of benefits other payer information does not apply to the claim.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use
- 906 -

- For a non-payer specific eligibility response (patient centric eligibility), the relationship of the other payers to the responding entity would be returned as “Consolidated Eligibility”.

28.5 COB CLAIMS PROCESSING GUIDELINES

28.5.1 IDENTIFYING THE REMAINING OTHER PAYER PATIENT RESPONSIBILITY AMOUNT

COB methods may differ between payers where the secondary payer may require Other Payer Amount Paid (OPAP) and the tertiary payer requires Other Payer-Patient Responsibility Amount (OPPRA). Each plan's benefits will apply where the patient responsibility amount may not be zero and may actually be higher than the previous payer's patient responsibility amount.

- For COB processing based on Other Payer-Patient Responsibility Amounts (352-NQ) the net amount due is the sum of the payable components of the Other Payer-Patient Responsibility values from – the LAST payer – as determined by the Other Coverage Type (338-5C) (i.e., Primary, Secondary, etc.) – that is reported with Other Payer Patient Responsibility Amounts (zero is a valid value) versus Other Payer Reject Code (572-6E) values.
- When reimbursement is based on the Other Payer-Patient Responsibility Amount
 - The COB payer must always return a balanced response
 - Basis of Reimbursement Code (522-FM) “14” is to be returned
- When the Patient has a responsibility amount from the prior payer that may not be included in the benefit structure of the COB plan, the COB payer must process via one of the following methods:
 - Pay the Patient Responsibility claim as submitted including all components of Other Payer Patient Responsibility Amounts.
 - Pay the Patient Responsibility claim, reimburse for appropriate components of Patient Pay Amount and those NOT paid by the plan are passed back to the Patient as part of the Patient Pay Amount (505-F5) as reported with the appropriate Patient Pay Component Qualifier (C95-KQ).
 - Reject the claim with the appropriate reject code.
 - Support the use of the Other Payer-Patient Responsibility Amount Qualifier (351-NP) value of ‘06’ (Patient Pay Amount (505-F5) as reported by previous payer).

28.5.2 HEALTH SAVINGS ACCOUNT

HRA accounts are funded by the Plan Sponsor and not the employee. HSA accounts can be funded by the employee and/or employer, and FSA accounts are funded by the employee.

28.5.2.1 HEALTHCARE REIMBURSEMENT ACCOUNT (HRA), HEALTH SAVINGS ACCOUNTS (HSAs), AND HEALTHCARE FLEXIBLE SPENDING ACCOUNT (FSA)

These plan designs link a **plan-sponsored** spending account to the healthcare benefit. The spending account contains funds that can be used by the member to offset out of pocket costs. An HRA is typically offered in combination with a high-deductible benefit, creating a “3-stage” benefit design.

The HRA can typically be used to fund 100% of employee and dependents' healthcare expenses until the HRA is depleted. If the HRA funds are depleted, the employee is typically responsible for a specified amount (similar to a deductible) until traditional health plan coverage takes effect. If the HRA funds are not depleted by end of year, a plan may allow remaining dollars to roll over to the following year's account balance.

An HRA-based benefit can be offered:

- With medical and pharmacy integrated across high deductible plan
- For medical only, with “traditional” pharmacy benefit
- As a pharmacy-only HRA plan, with a “traditional” medical offering

28.5.2.2 HEALTHCARE REIMBURSEMENT ACCOUNT (HRA) – BASED PLAN DESIGNS

These plan designs link a **plan-sponsored** spending account to the healthcare benefit. The spending account contains funds that can be used by the member to offset out of pocket costs. An HRA is typically offered in combination with a high-deductible benefit, creating a “3-stage” benefit design.

The HRA can typically be used to fund 100% of employee and dependents' healthcare expenses until the HRA is depleted. If the HRA funds are depleted, the employee is typically responsible for a specified amount (similar to a deductible) until traditional health plan coverage takes effect. If the HRA funds are not depleted by end of year, a plan may allow remaining dollars to roll over to the following year's account balance.

An HRA-based benefit can be offered:

- With medical and pharmacy integrated across high deductible plan
- For medical only, with “traditional” pharmacy benefit
- As a pharmacy-only HRA plan, with a “traditional” medical offering

28.5.2.3 HEALTH SAVINGS ACCOUNTS (HSAs) AND QUALIFYING HEALTH PLANS

The HSA provision of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 allows eligible individuals to establish an HSA to pay for medical expenses.

What is an HSA?

- An income tax-exempt, interest-earning trust account that can be used by eligible individuals to pay for qualified healthcare expenses
- Unused dollars rollover from year to year and are portable
- Who can contribute to an HSA?
 - Any eligible individual or a family member
 - Eligible individual's employer
 - Annual contribution limits apply

28.5.2.4 HEALTHCARE FLEXIBLE SPENDING ACCOUNT (FSA)

Flexible spending accounts offer another option for employees to pay for eligible medical expenses on a pre-tax basis. When offered by an employer, a Health Care FSA program allows employees to set aside their own money on a pre-tax basis to pay for healthcare expenses incurred by the employee and his/her eligible dependents. When an employee incurs an eligible medical expense (e.g., a co-payment for a prescription) the amount incurred by the employee is reimbursed by the FSA. Any funds set aside by the employee that are unused by the end of year are forfeited.

Negative dollar amounts must be supported by payers involved in coordination of benefits.

28.5.3 MEDICARE PART D

28.5.3.1 MEDICARE PART D

The Medicare Part D and supplemental payer programs introduced the business need to identify and communicate within the Telecommunication claim billing transactions the benefit stage(s) in which the claim fell under. The Medicare Part D Paid/Duplicate paid claim response would return the benefit stage information within the Response Pricing Segment. The provider could then submit this information in the Claim Request within the COB Segment to the applicable downstream payer(s).

When initially introduced, the benefit stage information included the Benefit Stage Count, Benefit Stage Qualifier and Benefit Stage Amount. The use of the benefit stage information within the COB segment was restricted due to the disclosure of financial information. This restriction prevented other downstream payers from accessing the benefit stage qualifier information necessary for point of service adjudication rules. To address this business need, the Benefit Stage Amount field, which was informational only and not part of a financial calculation, was eliminated and the grouping replaced with the Benefit Stage Indicator Count (C50-9W) and Benefit Stage Indicator (C51-9X) fields. Distinct Benefit Stage Indicator values are used for the Medicare Part D program.

Response Pricing Segment:

- Benefit Stage Indicator Count (C50-9W): Count of Benefit Stage Indicator (C51-9X)
 - o Required if Benefit Stage Indicator(s) are returned
 - o Maximum count = 4
- Benefit Stage Indicator (C51-9X): Code identifying the benefit stage(s) which applied to the claim at the time of adjudication
 - o Required when the plan is a participant in a Medicare Part D program that requires the reporting of the Benefit Stages. This field may also be used to identify the applicable benefit stages for benefits other than Medicare Part D.
 - o The same value must not repeat

Claim Billing Request Coordination of Benefits Other Payments Segment:

- Benefit Stage Indicator Count (C50-9W): Count of Benefit Stage Indicator (C51-9X)
 - o Required if Benefit Stage Indicator(s) are returned
 - o Maximum count = 4
- Benefit Stage Indicator (C51-9X): Code identifying the benefit stage(s) which applied to the claim at the time of adjudication
 - o As required by coordination of benefit payer.
 - o The same value must not repeat

- 908 -

28.5.4 MEDICARE PART B

28.5.4.1 MEDICARE PART B SECONDARY PAYER AND NCPDP ECL QUALIFIERS

Prior to the implementation of the NCPDP *Telecommunication Standard vD.0*, Medicare Part B secondary payer claims required the Other Payer Amount Paid field to repeat with the qualifier of 99 to support reporting the deductible and coinsurance components of the primary payer's patient pay amount.

For Example:

1. The Allowed amount was submitted using qualifier 08
2. The Paid amount was submitted using qualifier 07
3. The Coinsurance amount was submitted using qualifier 99
4. The Deductible (when applicable) was submitted using qualifier 99

These above data elements, provided full disclosure of the previous payer's payment response. As of NCPDP *Telecommunication Standard vD.0*, the Other Payer Amount Paid qualifiers of 99 were sunset and full disclosure COB for eligible entities was supported using both the Other Payer Amount Paid and Other Payer Patient Responsibility Amount fields.

NCPDP understands that Medicare as the secondary payer is required by regulation to receive the amount that the other payer has paid, the amount allowed from the other payer and the amount the provider is obligated to accept as payment in full. Since NCPDP transactions are real-time, the following should be used to determine the needed amounts:

- Submitted amount is equal to Gross Amount Due (430-DU) on the NCPDP *Telecommunication Standard Version D.0* Billing claim
- Other Payer Amount Paid (431-DV) is used in conjunction with Other Payer Amount Paid Qualifier (342-HC) to determine the amount paid by the other payer.
- Other Payer-Patient Responsibility Amount (352-NQ) is used in conjunction with Other Payer-Patient Responsibility Amount Qualifier (351-NP) to determine the financial obligation of the beneficiary from the other payer.
- Add the sum of the Other Payer Amount Paid (431-DV) and Other Payer-Patient Responsibility Amount (352-NQ) to determine the allowed amount and the amount the provider is obligated to accept.
- The financial amount returned in Total Amount Paid (509-F9) of the POS response is the contracted amount between the provider and the payer and will match what is returned on the X12 835 remittance file. Since NCPDP the *Telecommunication Standard v5.1 and D.0* claims processing is real-time, Obligated to Accept as Full (OTAF) payment variance does not apply.

Example: A pharmacy submits a claim to primary payer with Gross Amount Due value of \$100. The primary payer's allowed amount is calculated as \$80. The beneficiary has \$10 deductible amount remaining and \$10 coinsurance amount.

Primary Payer Response:

FIELD	FIELD NAME	VALUE	COMMENT
505-F5	PATIENT PAY AMOUNT	200{	\$20.00
509-F9	TOTAL AMOUNT PAID	600{	\$60.00
C94-KP	PATIENT PAY COMPONENT COUNT	2	
C95-KQ	PATIENT PAY COMPONENT QUALIFIER	07	Amount of Coinsurance
C93-KN	PATIENT PAY COMPONENT AMOUNT	100{	\$10.00
C95-KQ	PATIENT PAY COMPONENT QUALIFIER	01	Amount Applied to Periodic Deductible
C93-KN	PATIENT PAY COMPONENT AMOUNT	100{	\$10.00

The following fields would be submitted in the COB claim to Medicare as the secondary payer.

FIELD	FIELD NAME	VALUE	COMMENT
430-DU	GROSS AMOUNT DUE	1000{	\$100.00
342-HC	OTHER PAYER AMOUNT PAID QUALIFIER	07	DRUG BENEFIT
431-DV	OTHER PAYER AMOUNT PAID	600{	\$60.00
351-NP	OTHER PAYER-PATIENT RESPONSIBILITY AMOUNT QUALIFIER	01	AMOUNT APPLIED TO PERIODIC DEDUCTIBLE AS REPORTED BY PREVIOUS PAYER
352-NQ	OTHER PAYER-PATIENT RESPONSIBILITY AMOUNT	100{	\$10.00
351-NP	OTHER PAYER-PATIENT RESPONSIBILITY AMOUNT QUALIFIER	07	AMOUNT OF COINSURANCE AS REPORTED BY PREVIOUS PAYER
352-NQ	OTHER PAYER-PATIENT RESPONSIBILITY AMOUNT	100{	\$10.00

For Medicare Part B Secondary Payer Calculations:

Version F6

- 909 -

1. The Allowed amount = sum of Other Payer Amount Paid (431-DV) amounts (qualifiers applicable to MSP benefit) + sum of Other Payer-Patient Responsibility Amount (352-NQ) amounts
2. The Paid amount = sum of the Other Payer Amount Paid (431-DV) amounts (qualifiers applicable to the MSP benefit, e.g., 07 Drug Benefit)
3. The Co-insurance amount = Other Payer-Patient Responsibility Amount (352-NQ) amount where Other Payer-Patient Responsibility Amount Qualifier (351-NP) = "07" (Amount of Coinsurance as reported by previous payer)
4. The Deductible amount = Other Payer-Patient Responsibility Amount (352-NQ) amount where Other Payer-Patient Responsibility Amount Qualifier (351-NP) = "01" (Amount Applied to Periodic Deductible as reported by previous payer)

28.6 OTHER COB RELATED GUIDELINES

28.6.1 COORDINATION OF BENEFITS AND PARTIAL FILLS

Question: How Should Partial Fills Be Handled for A Coordination Of Benefits (Coordination of Benefits) Billing? How does the reject of "Partial Fill Transaction Not Supported" affect this processing?

Response: The intent of "Partial Fill" functionality is to allow pharmacies to dispense and bill a portion of the prescription quantity (Partial Fill) when they lack sufficient inventory to dispense the full amount and on another day dispense the remaining portion (Completion Fill) once the product is back in stock. Acceptance of Partial Fill transactions by payers/processors is optional and is specified within their Payer Sheets when following the NCPDP Payer Sheet Template Implementation Guide.

Real-time Coordination of Benefits (COB) processing is also optional and may or may not be supported by all payers. Because of the many potential combinations of payer/processor acceptance of COB and Partial Fill transactions, it is recommended that Coordination of Benefits claim billing occurs once the final dispensing status of the claim can be determined.

28.6.2 PAYER-TO-PAYER USAGE OF INTERNAL CONTROL NUMBER (993-A7)

The Internal Control Number (993-A7) is only used in payer-to-payer situations for payers to relay their internal numbers to other downstream payers. When there are multiple payers, the Internal Control Number occurs with the other payer information, inside the specific coordination of benefits loop.

For example : Medicare generates a transaction to Medicaid (next downstream payer). Medicare attaches their Internal Control Number to the transaction

- 911 -

A skilled nursing facility is reimbursed for Medicare Part A based on the MDS and RUGS score which is a per-diem reimbursement system that focuses on time-and-motion of a nurse's attention to the resident. The medications that a patient receives during that stay are also paid for using the same Medicare Part A funds. Part A reimbursement ceases as of the Part A benefit expiration date for the resident. When applicable, the next covering business entity (insurance, PDP, family, estate) is billed for the rest of the medication days supply.

Scenario: A Medicare Part A resident is dispensed a 30 day supply of medications on September 6th. Eleven days into that 30-day supply, the resident's Part A benefit no longer applies. Rather than return the unused medications to the pharmacy, and then redispense a fresh supply to the resident, the resident keeps the medication. The 11 days supply is billed to the Part A stay. The 19 days supply are then billed to the next payer using a Date of Service (401-D1) of September 17th for a 19 days supply of ingredient cost and no dispensing fee.

Field ID	Field	Value	Comment
401-D1	Date of Service	20170917	September 17, 2017
D17-K8	Submission Type Code	AB	Split Billing - Indicates the Quantity Dispensed (442-E7) is the remaining quantity billed to a subsequent payer when Medicare Part A no longer applies. Used only in long term care settings.
405-D5	Days Supply	19	
442-E7	Quantity Dispensed	19000	19.000

29 PRICING GUIDELINES (CLAIM/SERVICE)

The information in the following sections provides an overview of how request and response pricing fields are used within claim and service billing transactions. Refer to specific changes associated to each section.

29.1 *How PRICING FIELDS ARE USED*

If a dollar field is not sent, it must not be assumed to be zero since there is no default value for any dollar field. Refer to “Dollar Truncation” section for additional information.

The use of pricing fields within the associated Request and Response segments are outlined below:

REQUEST

- Pricing Segment
 - Required dollar fields must be sent
 - Situational dollar fields notes as required by the payer must be sent
 - Zero is a valid value
 - Negative values may be appropriate for certain fields
- Coordination Of Benefits/Other Payments Segment
 - Payers requiring OPPRA values must specify whether component qualifiers or composite patient pay qualifier must be sent
 - Situational dollar fields must be sent when their value can be derived from the response(s) of the previous payer(s).
 - Payers cannot require other specific qualified dollar fields, as the pharmacy can only submit values as derived from the response(s) of the previous payer(s)
 - Zero is a valid value
 - Negative values may be appropriate for certain fields
- Compound Segment
 - Situational dollar fields noted as required by the payer must be sent
 - Zero is a valid value
 - Negative values may be appropriate for certain fields

RESPONSE

- Pricing Segment
 - Required dollar fields must be returned
 - If a dollar field is sent on the request, the corresponding response pricing fields must be returned even if zero.
 - Situational dollar fields must be returned when the distinct pricing element is a component of the prescription benefit which is applicable to this claim.
 - Zero is a valid value
 - Negative values may be appropriate for certain fields

29.2 *PRESCRIPTION REQUEST PRICING FORMULA*

To calculate the net amount due, apply one of these formulae.

The purpose of the formulae is to provide clarification on how providers should balance the claim submission and how processor/payers should determine the ‘net’ value that is being billed. This is critical in coordination of benefits (COB) scenarios since the Pricing Segment contains values ‘as if’ the claim was primary and the Other Payer values are contained in the Coordination of Benefits/Other Payments Segment.

29.2.1 **PRESCRIPTION CLAIM PRICING REQUEST FORMULA**

Ingredient Cost Submitted (409-D9)
+ Dispensing Fee Submitted (412-DC)
+ Incentive Amount Submitted (438-E3)
+ Other Amount Claimed Submitted (480-H9)
+ Regulatory Fee Amount Submitted (481-HA)
+ Percentage Tax Amount Submitted (482-GE)

= Gross Amount Due (430-DU)
- Patient Pay Amount Reported (433-DX)
- Other Payer Amount Paid (431-DV)
(Result is net amount due)

Note: Net amount due as defined above is applicable to primary and/or COB claims in which Other Payer Amount Paid (431-DV) is submitted except in Subrogation. In Subrogation transactions, the net amount due is represented in the Subrogation Amount Requested (D14-KX). Determination of the sum Other Payer Amount Paid (431-DV) value and net amount due for Other Payer Patient Responsibility claims is outlined below.

For Coordination of Benefit (COB) claims net amount due must be derived using the “Other Payer” fields within the Coordination of Benefits/Other Payments Segment.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

- 913 -

- If COB processing is based on "Other Payer Amount Paid" the processor should determine what **has been paid** by prior payers. This is accomplished by summarizing 'like' Other Payer Amount Paid dollars across prior payers and then using these values against 'like' contractual amounts to reduce that liability for the current payer.
 - o This means drug benefit dollars paid should be used to reduce drug benefit dollars that would be paid if primary; delivery dollars paid would reduce delivery dollars if such contractual agreement exists, etc.
 - o If delivery is not part of the agreement with the COB payer, the dollars paid for delivery cannot be used to reduce drug benefit costs since provider has the obligation to provide the service.

Once the applicable Other Payer Amount Paid dollars have been properly summarized, net amount due is the result of the calculation noted above.
- If COB processing is based on "Other Payer Patient Responsibility Amounts", the net amount due is the **sum of** the Other Payer Patient Responsibility values from the **last** payer as determined by Other Payer Coverage Type (338-5C) (i.e., Primary, Secondary, etc.) that returned a **paid** response. When reimbursement is based on the Other Payer Patient Responsibility Amount, Basis of Reimbursement Determination (522-FM) value 14 would be returned on the response.

14	Other Payer-Patient Responsibility Amount - Indicates reimbursement was based on the Other Payer-Patient Responsibility Amount (352-NQ).
----	--

If the COB payer is not paying all components of the prior Patient Responsibility Amounts, the unpaid components must be sent back for the patient to pay or the claim must be rejected.

29.2.2 SERVICE CLAIM REQUEST PRICING FORMULA

Professional Service Fee Submitted (477-BE)

- + Regulatory Fee Amount Submitted (481-HA)
- + Percentage Tax Amount Submitted (482-GE)
- + Other Amount Claimed Submitted (480-H9)

= Gross Amount Due (430-DU)

- Patient Pay Amount Reported (433-DX)
 - Other Payer Amount Paid (431-DV)
- (Result is net amount due)

Net amount due as defined above is applicable to primary and/or COB claims in which Other Payer Amount Paid (431-DV) is submitted.

For Coordination of Benefit (COB) claims net amount due must be derived using the "Other Payer" fields within the Coordination of Benefits/Other Payments Segment. Determination of the sum Other Payer Amount Paid (431-DV) value and net amount due for Other Payer Patient Responsibility claims is outlined below.

When COB processing is based on "Other Payer Amount Paid" the processor determines what has been paid by prior payers. This is accomplished by summarizing 'like' Other Payer Amount Paid dollars across prior payers and then using these values against 'like' contractual amounts to reduce that liability for the current payer.

- This means drug benefit dollars paid should be used to reduce drug benefit dollars that would be paid if primary; delivery dollars paid would reduce delivery dollars if such contractual agreement exists, etc.
- Other Payer Amount Paid (431-DV) values reported identify contractual agreements and obligations of services between that previous payer and the billing provider. Any Other Payer Amount Paid (431-DV) values associated to an Other Payer Amount Paid Qualifier (342-HC) that is not within the contractual agreement between the COB payer and the provider cannot be used to calculate the Other Payer Amount Recognized (566-J5) value.
- Once the applicable Other Payer Amount Paid dollars have been properly summarized, the net amount due is calculated based on the Prescription Pricing Formula and the response is formatted based on the Claim Response Pricing Formula.

When COB processing is based on "Other Payer-Patient Responsibility Amounts", the net amount due is the **sum of** the Other Payer-Patient Responsibility values from the last payer as determined by Other Payer Coverage Type (338-5C) (i.e., Primary, Secondary, etc.) that returned a paid response. The sum of the Other Payer Patient Responsibility Amounts (352-NQ) submitted would be reported as Ingredient Cost Paid (506-F6) and any other amounts paid would be reflected in the applicable response pricing field (e.g., Dispensing Fee Paid (507-F7, Incentive Amount Paid (521-FL), Percentage Tax Amount Paid (559-AX), etc.). Basis of Reimbursement Determination (522-FM) value 14 (Other Payer-Patient Responsibility Amount) to indicate the Ingredient Cost Paid (506-F6) was based on the Other Payer-Patient Responsibility Amounts (352-NQ). If the COB payer is not paying all components of the prior Patient Responsibility Amounts, the unpaid components must be sent back for the patient to pay or the claim must be rejected.

29.3 USUAL AND CUSTOMARY CHARGE

Usual and Customary Charge (426-DQ) represents the value the billing provider is willing to accept as the total reimbursement for dispensing the product/service to a cash-paying customer. It does not include Other Amount Claimed Submitted (480-H9), Dispensing Fee Submitted (412-DC), Regulatory Fee Amount Submitted (481-HA), Percentage Tax Amount Submitted (482-GE), Professional Service Fee Submitted (477-BE),

Version F6

January 2020

OFFICIAL RELEASE

- 914 -

or Incentive Amount Submitted (438-E3). Usual and Customary Charge (426-DQ) is independent of contracted Dispensing Fee Submitted (412-DC) and Ingredient Cost Submitted (409-D9).

29.4 ***PRESCRIPTION RESPONSE PRICING FORMULA***

29.4.1 **PRESCRIPTION CLAIM RESPONSE PRICING FORMULA**

Ingredient Cost Paid (506-F6)
 + Dispensing Fee Paid (507-F7)
 + Incentive Amount Paid (521-FL)
 + Other Amount Paid (565-J4)
 + Regulatory Fee Amount Paid (558-AW)
 + Percentage Tax Amount Paid (559-AX)
 - Patient Pay Amount (505-F5)
 - Other Payer Amount Recognized (566-J5)

 = Total Amount Paid (509-F9)

29.4.2 **SERVICE RESPONSE PRICING FORMULA**

Professional Service Fee Paid (562-J1)
 + Regulatory Fee Amount Paid (558-AW)
 + Percentage Tax Amount Paid (559-AX)
 + Other Amount Paid (565-J4)
 - Patient Pay Amount (505-F5)
 - Other Payer Amount Recognized (566-J5)

 = Total Amount Paid (509-F9)

29.5 ***CORRESPONDING PRICING FIELDS***

29.5.1 **CORRESPONDING PRICING FIELDS (CLAIM)**

This includes Claim Billing, Claim Rebill, and Prior Authorization Request And Billing (Claim).

Request Pricing Fields			Corresponding Response Pricing Fields	
409-D9	INGREDIENT COST SUBMITTED		506-F6	INGREDIENT COST PAID
423-DN	BASIS OF COST DETERMINATION		522-FM	BASIS OF REIMBURSEMENT DETERMINATION
412-DC	DISPENSING FEE SUBMITTED		507-F7	DISPENSING FEE PAID
433-DX	PATIENT PAY AMOUNT REPORTED			<i>Not applicable</i>
438-E3	INCENTIVE AMOUNT SUBMITTED		521-FL	INCENTIVE AMOUNT PAID
478-H7	OTHER AMOUNT CLAIMED SUBMITTED COUNT		563-J2	OTHER AMOUNT PAID COUNT
479-H8	OTHER AMOUNT CLAIMED SUBMITTED QUALIFIER		564-J3	OTHER AMOUNT PAID QUALIFIER
480-H9	OTHER AMOUNT CLAIMED SUBMITTED		565-J4	OTHER AMOUNT PAID
481-HA	REGULATORY FEE AMOUNT SUBMITTED		558-AW	REGULATORY FEE AMOUNT PAID
482-GE	PERCENTAGE TAX AMOUNT SUBMITTED		559-AX	PERCENTAGE TAX AMOUNT PAID
426-DQ	USUAL AND CUSTOMARY CHARGE			<i>Not applicable</i>
431-DV	OTHER PAYER AMOUNT PAID		566-J5	OTHER PAYER AMOUNT RECOGNIZED
430-DU	GROSS AMOUNT DUE		509-F9	TOTAL AMOUNT PAID
			505-F5	PATIENT PAY AMOUNT
				Fields that are part of Patient Pay Amount:
			C94-KP	PATIENT PAY COMPONENT COUNT
			C95-KQ	PATIENT PAY COMPONENT QUALIFIER
			C93-KN	PATIENT PAY COMPONENT AMOUNT

29.5.2 **CORRESPONDING PRICING FIELDS OTHER PAYER PATIENT RESPONSIBILITY AMOUNT (OPPra) CLAIM**

The table below reflects corresponding pricing fields for an OPPRA claim that are different than above. This includes Claim Billing, Claim Rebill, and Prior Authorization Request And Billing (Claim).

Request Pricing Fields			Corresponding Response Pricing Fields	
409-D9	INGREDIENT COST SUBMITTED		148-U8	INGREDIENT COST CONTRACTED/REIMBURSABLE AMOUNT

Version F6

412-DC	DISPENSING FEE SUBMITTED		149-U9	DISPENSING FEE CONTRACTED/REIMBURSABLE AMOUNT
352-NQ	OTHER PAYER PATIENT RESPONSIBILITY AMOUNT		506-F6	INGREDIENT COST PAID

29.5.3 CORRESPONDING PRICING FIELDS (SERVICE)

This includes Service Billing, Service Rebill, and Prior Authorization Request And Billing (Service).

Request Pricing Fields			Corresponding Response Pricing Fields	
433-DX	PATIENT PAY AMOUNT REPORTED			<i>Not applicable</i>
477-BE	PROFESSIONAL SERVICE FEE SUBMITTED		562-J2	PROFESSIONAL SERVICE FEE PAID
478-H7	OTHER AMOUNT CLAIMED SUBMITTED COUNT		563-J2	OTHER AMOUNT PAID COUNT
479-H8	OTHER AMOUNT CLAIMED SUBMITTED QUALIFIER		564-J3	OTHER AMOUNT PAID QUALIFIER
480-H9	OTHER AMOUNT CLAIMED SUBMITTED		565-J4	OTHER AMOUNT PAID
481-HA	REGULATORY FEE AMOUNT SUBMITTED		558-AW	REGULATORY FEE AMOUNT PAID
482-GE	PERCENTAGE TAX AMOUNT SUBMITTED		559-AX	PERCENTAGE TAX AMOUNT PAID
426-DQ	USUAL AND CUSTOMARY CHARGE			<i>Not applicable</i>
430-DU	GROSS AMOUNT DUE		509-F9	TOTAL AMOUNT PAID
			505-F5	PATIENT PAY AMOUNT
				Fields that are part of Patient Pay Amount:
			C94-KP	PATIENT PAY COMPONENT COUNT
			C95-KQ	PATIENT PAY COMPONENT QUALIFIER
			C93-KN	PATIENT PAY COMPONENT AMOUNT

29.5.4 CORRESPONDING PRICING FIELDS OTHER PAYER PATIENT RESPONSIBILITY AMOUNT (OPPRA) SERVICE

The table below reflects corresponding pricing fields for an OPPRA service that are different than above. This includes Service Billing and Service Rebill.

Request Pricing Fields			Corresponding Response Pricing Fields	
477-BE	PROFESSIONAL SERVICE FEE SUBMITTED		B33-6G	PROFESSIONAL SERVICE FEE CONTRACTED/REIMBURSABLE AMOUNT
352-NQ	OTHER PAYER PATIENT RESPONSIBILITY AMOUNT		562-J1	PROFESSIONAL SERVICE FEE PAID

29.6 PATIENT FINANCIAL RESPONSIBILITY

- Patient Pay Amount (505-F5) is Required
 - Zero is a valid value
 - Value cannot be negative
- Patient Pay Component Count (C94-KP), Patient Pay Component Qualifier (C95-KQ) are Required
- Patient Pay Component Amount (C93-KN) is Required
 - Zero is a valid value
 - Negative values may be associated to Specific Patient Pay Component Qualifiers (C95-KQ) (e.g., Health Plan Savings Amount). See ECL.
- The sum of the Patient Pay Component Amounts (C95-KQ) must equal the Patient Pay Amount (505-F5)
- All Patient Pay Component amounts, applicable to the patient's benefit for this claim, that impact the Patient Pay Amount (505-F5) must be returned, even when the impacted Patient Pay Component Amount or Patient Pay Amount is \$0. Refer to the following examples:
 - Example 1: Plan Benefit Patient Liability = \$0 Copay, No HSA, No Deductible

505-F5	PATIENT PAY AMOUNT	\$0.00
C94-KP	PATIENT PAY COMPONENT AMOUNT COUNT	1
C95-KQ	PATIENT PAY COMPONENT QUALIFIER (AMOUNT OF COPAY - 5)	05
C93-KN	PATIENT PAY COMPONENT AMOUNT	\$0.00

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

- 916 -

o Example 2: Plan Benefit Patient Liability = 0% Co-Insurance for Generics

505-F5	PATIENT PAY AMOUNT	\$0.00
C94-KP	PATIENT PAY COMPONENT AMOUNT COUNT	1
C95-KQ	PATIENT PAY COMPONENT QUALIFIER (AMOUNT OF CO-INSURANCE - 7)	07
C93-KN	PATIENT PAY COMPONENT AMOUNT	\$0.00

o Example 3: Plan Benefit Patient Liability = 20% Co-Insurance, covered under available HSA Fund

505-F5	PATIENT PAY AMOUNT	\$0.00
C94-KP	PATIENT PAY COMPONENT AMOUNT COUNT	2
C95-KQ	PATIENT PAY COMPONENT QUALIFIER (AMOUNT OF CO-INSURANCE - 7)	07
C93-KN	PATIENT PAY COMPONENT AMOUNT	\$65.50
C95-KQ	PATIENT PAY COMPONENT QUALIFIER (HEALTH PLAN-FUNDED ASSISTANCE AMOUNT - 9)	09
C93-KN	PATIENT PAY COMPONENT AMOUNT	- \$65.50

- If the Patient Pay Amount (505-F5) reflects 100% patient financial responsibility that is greater than the pharmacy net amount (505-F5 + 509-F9, and as reflected in the remittance), the Total Amount Paid (509-F9) value must be negative to comply with price balancing rules (see section "Prescription And Service Pricing Formulae"). For Example:

509-F9	TOTAL AMOUNT PAID	- \$3.50
505-F5	PATIENT PAY AMOUNT	\$65.00
C94-KP	PATIENT PAY COMPONENT AMOUNT COUNT	2
C95-KQ	PATIENT PAY COMPONENT QUALIFIER (AMOUNT OF COPAY - 5)	05
C93-KN	PATIENT PAY COMPONENT AMOUNT	\$61.50
C95-KQ	PATIENT PAY COMPONENT QUALIFIER (AMOUNT ATTRIBUTED TO PROCESSOR FEE - 13)	13
C93-KN	PATIENT PAY COMPONENT AMOUNT	\$3.50
506-F6	INGREDIENT COST PAID	\$56.50
507-F7	DISPENSING FEE PAID	\$5.00

29.7 OTHER PRICING FIELD GUIDANCE

Remaining Benefit Amount (514-FE)

The Remaining Benefit Amount must not be returned with zeroes unless there are no benefit dollars remaining. This field must not be defaulted (zero filled), as it would lead the pharmacy to an incorrect conclusion of no benefit dollars remaining. The value of 999999999 must not be used as a default in this field.)

Spending Account Amount Remaining (128-UC)

This field will be returned on an approved transaction with a payable response, if known. This field is **informational only**. It is being requested to report back to the provider and the patient the amount remaining on the spending account after the current claim updated the spending account.

29.8 PERCENTAGE TAX AND REGULATORY FEE GUIDANCE

The pharmacy has the agency relationship with the tax jurisdiction and collect the monies in trust. Therefore, the pharmacy should be considered the source of truth for the tax rate. The submitted rate should be utilized during adjudication calculations and be reflected in the values in the response. The rate can be subject to contractual audit arrangements with payer, or a reasonability edit. (e.g., 50% tax rate submitted can be reduced to a reasonable value).

- 917 -

30 REVERSAL GUIDELINES

30.1.1 FIELD USAGE IN A REVERSAL REQUEST AND RESPONSE

Detail of transaction Reversal fields are noted in the following sections

Claim Transactions	B2 – “Claim Reversal Request Segments”
Service Transactions	S2 – “Service Reversal Request Segments”
Information Reporting Transactions	N2 – “Information Reporting Reversal (<i>Claim</i>) Request Segments” N2 – “Information Reporting Reversal (<i>Service</i>) Request Diagrams”
Prior Authorization Transactions	P2 – “Prior Authorization Reversal Request Segments” - This reverses Prior Authorization request only. This does not reverse any claim associated to the Prior Authorization. - If “P1” – “Prior Authorization Request and Billing” or “Prior Authorization Inquiry” result in a paid claim, a “B2/S2” – “Claim/Service Reversal Request” must be used to reverse that transaction.

Many of the fields allowed on the original transaction are not allowed on a Reversal request. For this reason, other than the Transaction Code (“B1 to B2”, “S1 to S2”, etc.) the fields allowed to be sent on the reversal request should mimic the values as submitted on the original transaction.

An exception to this may occur when a processor change takes place and a different IIN and/or PCN is needed for routing the reversal. Reconciliation ID (B98-34) as received on Approved transaction is required on the Reversal Request to facilitate matching to the approved transaction.

When a Paid/Duplicate of Paid, Captured/Duplicate of Captured or Approved/Duplicate of Approved transaction response does not include a Reconciliation ID (B98-34), and the provider subsequently submits a reversal request transaction, the value of “NOTAVAILABLE” should be submitted as the Reconciliation ID (B98-34) on the reversal transaction.

30.1.2 RECOMMENDED TIME FRAME FOR REVERSAL PROCESSING

NCPDP recommends that processors allow a minimum of 30 days from the date the claim processed for a reversal to occur where timeframes are not specified by state or federal law. This minimum interval allows time for pharmacy to reverse transactions that have not been picked up by members.

Consideration should also be made to allow a longer reversal window to support the timing of processor post adjudication adjustment requests and alignment of processing windows when claims are coordinated across multiple payers.

30.1.3 CRITERIA FOR MATCHING A REVERSAL TO ITS ASSOCIATED APPROVED TRANSACTION

It is recommended when searching for an original approved transaction in order to process a reversal request, the **initial match criteria** includes the following:

- Service Provider ID (201-B1) (Provider identifier)
- Reconciliation ID (B98-34) – ID assigned by processor to Approved transaction.

NOTE: Reconciliation ID should not be used WITHOUT the Service/Provider ID (201-B1) as a means to uniquely identify the specific transaction requested for reversal.

The Reconciliation ID (B98-34) is intended to remove the processor's need to 'drill down' when more than one Approved transaction exists for a dispensing 'event' (second fill on same day, multiple COB claims at single processor (e.g., Secondary and Tertiary), partial fill, etc.).

Consideration should be given to those transactions paid or approved prior to the processor's implementation of the Reconciliation ID (B98-34) for reversal matching purposes. For these situations, it is recommended the processor maintain and use the matching criteria in effect during the prior version of the Telecommunication Standard for the period of time allowed for reversal processing.

It is recommended when the processor is unable to locate the original approved transaction using the Reconciliation ID (B98-34) and Service Provider ID (201-B1) the secondary match criteria include the following legacy fields

- Service Provider ID (201-B1)
- Prescription/Service Reference Number (402-D2)
- Date of Service (401-D1)

If multiple approved transactions are found, addition of the following as needed may isolate the specific transaction for reversal.

- Fill Number (403-D3)
- Other Payer Coverage Type (338-5C)

For matching criteria unique to Medicare Part D N transactions instead of Service Provider ID (201-B1) and Reconciliation ID (B98-34) use the Transaction Reference Number (880-K5) and Reconciliation ID (B98-34) to perform matching.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

- 918 -

The following fields are mandatory or may be required for the Reversal Request but are not recommended for use in the Reversal match criteria:

- Product/Service ID (407-D7)
- Cardholder ID (302-C2) if Insurance Segment is required as is often the case.

30.1.4 POPULATING THE RECONCILIATION ID IN THE REVERSAL RESPONSE WHEN AN APPROVED TRANSACTION IS FOUND AND REVERSED

When a reversal request has 'found' an Approved transaction to reverse, the Reconciliation ID (B98-34) of the used transaction must be populated in the Reversal Response to the requestor. Most of the time this is expected to be the Reconciliation ID (B98-34) sent on the request.

If the Reconciliation ID (B98-34) did not match to an approved transaction or if alternative match criteria was used and a different transaction was found and reversed, the Reconciliation ID (B98-34) returned allows the sender to know that alternate matching took place. If the transaction that was reversed should not have been, the Reconciliation ID can provide a 'talking point' between the originator and processor to clarify what should have taken place.

31 VERSION IDENTIFICATION SYSTEM

A Version level reference scheme is in place for the NCPDP *Telecommunication Standard Implementation Guide*. The reference scheme consists of a two-character sequential enumerator, incrementing the characters from 0 through 9, then A through Z. Generally, the right character should be incremented through the full cycle of values before incrementing the left character and restarting the right character at 0. Large-scale changes or intentional designation of a new version for HIPAA implementation may be indicated by advancing the enumerator to the next combination ending with a 0.

As of Version E5, the prior use of a sub-version or release identification with a separation between the characters with a period (.) is discontinued.

The incrementing of Version occurs with each publication of the *Telecommunication Standard Implementation Guide* that includes such things as addition of new fields with or without values, redefinition of fields, changes in field size or format, and updated documentation or clarification of existing or new data elements. Such changes must be accomplished through the ballot process.

32 FRAMEWORK

A communication standard is intended for use within a specific framework. There are two aspects to this framework:

- Business Framework - defines the nature of the business transaction for which this communication standard is an essential element.
- Technical Framework - describes the essential features of the technology that will be used to implement the standard, and how the standard affects the technology.

The Business Framework was described in a previous section. The Technical Framework for this standard is described below.

32.1 TECHNICAL FRAMEWORK

The International Standards Organization (ISO) has defined a framework for the definition of telecommunication standards. This standard, known as the "Open Systems Interface" standard, defines a seven-layer hierarchy of functions within a telecommunication network:

- Applications Layer - provides all services that are directly "comprehensible" to the users' applications -- in other words, this is the level that interfaces with the users' application. The Applications Layer identifies the users and sets an agreed upon level of security and makes one user responsible for error recovery.
- Presentation Layer - restructures data into the required format.
- Session Layer - establishes, synchronizes and coordinates the interaction between the end-application processes.
- Transport Layer - provides end-to-end data integrity and error correction.
- Network Layer - switches and routes information between the appropriate nodes.
- Data Link Layer - responsible for managing the physical transfer of data between the nodes.
- Physical Layer - responsible for accessing the physical media.

This version of the NCPDP *Telecommunication Standard Implementation Guide* addresses the message formats that are used by a specific application; it is principally a Presentation Layer standard.

All data should be treated in a "transparent" mode throughout the OSI ISO hierarchy to avoid a session termination in an SNA LU2 environment.

32.2 SCOPE

As defined by the Business and Technical Framework described above, the scope of this version of the NCPDP *Telecommunication Standard Implementation Guide* is limited as follows:

- Defines the communication of data and the corresponding responses with respect to communications at the Presentation Layer.
- Discusses and recommends specific implementation at the Application, Session, and Transport Layers.
- Recognizes the implications of specific implementations at the Network, Data Link, and Physical Layers.
- Does not define or preclude from use any additional data elements whose intent is to assist the processor or its telecommunication intermediary in fulfilling specific requirements of the Presentation, Session, Transport, Network, Data Link or Physical Layers of the ISO OSI Standard to which this version of the standard adheres. Such information includes network logons, protocols and data fields that are added as prefixes to the start of the application record.

32.3 TECHNICAL DEFINITIONS

This document facilitates the submission of a transaction by a Sender, and accommodates a specific response to that transaction submission by a Processor or Reporting Entity. This communication is performed in an on-line, real-time environment. The essential features of this environment are outlined below:

- **On-Line** - In the context of this version of this document, an "on-line environment" means a logically direct electronic connection between two active participants. An "active participant" is any device with the capability to accept and act upon a data stream, recognize the start and end of the data stream, and respond based upon the content of the data stream. This device can range from a simple data capture terminal to a full-function, general-purpose computer. The participants are assumed to be from two independent organizations. This standard is for use **between** organizations, not **within** an organization.

Within the Business Framework described above, the originator of the transaction is the Sender, and the "Receiver" is either the Processor or Reporting Entity.

- **Real-Time** - In the context of this document, a "real-time" transaction is one that is functionally instantaneous. The Sender of the transaction asks a question or makes a request of the Receiver, and the Sender does not proceed with its current task until it receives a response. This is a single request/single response type of communication.
- **Transmission** - The highest level of data transfer is the transmission. The transmission contains information, which is global to the entire data set. This includes routing information, identification, and information, which determine the parsing of the transactions within. As of Version E7, a transmission contains one transaction.
- **Transaction** - A transaction occurs within transmissions. Transactions are comprised of data segments of related data elements. As of Version E7, one transaction occurs within a transmission.

32.4 CONNECTIVITY BETWEEN PARTICIPANTS

There are different connections that might exist between the Originator and the Receiver including:

- Dial-up directly from Originator to Receiver
- Leased-line directly from Originator to Receiver

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

- 921 -

- Dial-up from Originator to Switch, Leased-line from Switch to Receiver
- Leased-line from Originator to Switch, Leased-line from Switch to Receiver
- Dial-up from Originator to Switch, Leased-line from Switch to Intermediary, Leased-line from Switch to Receiver
- Leased-line from Originator to Switch, Leased-line from Switch to Intermediary, Leased-line from Switch to Receiver

These types of connections are illustrated in the following diagram.

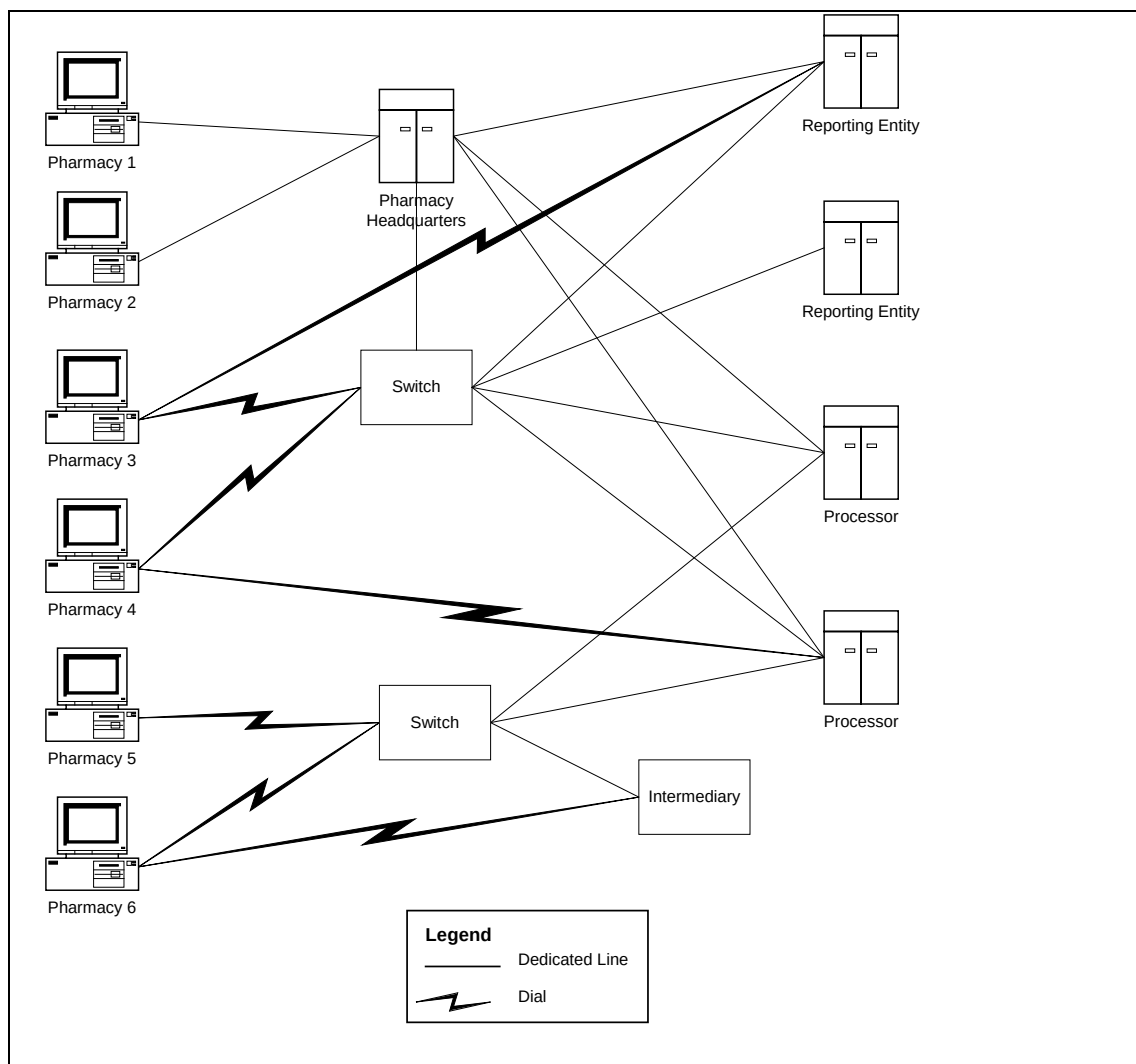

Figure 6. Connectivity between participants.

The type of connection will dictate the specific considerations applicable to a particular telecommunication implementation. The following conventions should be followed whenever appropriate:

- The asynchronous communications protocol certified by VISA, USA, Inc. is recommended for any dial-up connection. This protocol is recommended due to its wide usage and internal error detection features. The question/answer nature of the conversation precludes any benefit from a multi-block protocol such as VISA-II.
- The ANSI IIN number is widely used as a network destination designator. The message formats described in this document are consistent with this mechanism. **All Processors should contact ANSI and obtain an IIN number to uniquely identify them. The contact information for ANSI can be found in the Data Dictionary. If an IIN number cannot be obtained from ANSI, then contact NCPDP for a unique processor number that will be assigned by the Council.**
- The default field values are the same in all cases. This process should maximize the opportunity for data compression through the elimination of redundant characters. This data compression typically occurs at either the Physical Layer or the Data Link Layer, and depends on the specific connection.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

- 922 -

- Modem and transmission speed should be identified and should be appropriate to the specific connection. In a dial-up environment, a modem that supports a commonly used format and line speed should be used. In a leased-line environment, the arrangements are determined by the parties involved.

32.5 SOFTWARE/SYSTEM DEVELOPMENT

- Trading partners must be capable of transmitting and receiving transactions in full variable format.
- Trading partners must determine which transaction types are used.
- Trading partners must determine which fields in the Version F and above record are required, in accordance with the Version F and above standard, to properly process a transaction.
- Trading partners must determine whether the processor or switch requires a certification procedure before transmitting transactions.
- Processor software must be capable of generating, and Provider software must be capable of receiving, a response with the same "Version/Release Number", "Transaction Code", and "Transaction Count" as the transaction transmitted.

32.6 RESPONSIBILITIES OF THE PARTICIPANTS

When using this standard, the Originator, Switch, and the Receiver are expected to perform specific technical functions, as outlined below:

32.6.1 RESPONSIBILITIES OF THE ORIGINATOR

At a high-level, the Originator is responsible for:

- Populating all mandatory fields for this request transmission.
- Populating all situational or optional fields for this request transmission, as determined by the rule of this guide and the trading partner(s).
- Establishing the connection with the Switch or Processor, and initiating the telecommunication session.
- Formatting the request and sending it in the message envelope that is appropriate to the protocol being used.
- Interpreting and acting upon **any** response provided by the Processor. This will vary from Processor to Processor, plan to plan, and from time to time, (i.e., during an equipment problem). This will also include the situation where no response is received (a timeout).
- Terminating the session and disconnecting the transmission.

32.6.2 RESPONSIBILITIES OF THE SWITCH

At a high-level, the Switch is responsible for:

- Establishing the connection with the Processor and delivering the request from the Originator.
- Interpreting the request submitted by the Originator and responding as needed to provide the maximum amount of information for error correction and resolution when required.
- Providing the ability to convert versions of the standard as feasibly possible and needed based on trading partner agreements.
- Returning the response from the Processor to the Originator.
- Providing a high level of system availability and providing a viable fallback mechanism in the event of equipment failure.

32.6.3 RESPONSIBILITIES OF THE RECEIVER

At a high-level, the Receiver is responsible for:

- Interpreting requests submitted by the Originator and responding as needed to provide the maximum amount of information for error correction and resolution when required.
- Populating all mandatory fields for this response transmission.
- Populating all situational or optional fields for this response transmission, as determined by the rule of this guide and the trading partner(s).
- Formatting the response and sending it in the message envelope that is appropriate to the protocol being used.
- Ignoring irrelevant data that may be supplied by the Originator (i.e., the request may have data in fields not required for a particular plan. This situation must not create an error).
- Recognizing and supporting multiple versions of the standard for a long enough period of time to allow the users to convert their processing as new versions of the standard are developed and released.
- Providing a high level of system availability and providing a viable fallback mechanism in the event of equipment failure.

32.6.4 RESPONSIBILITIES OF THE FACILITATOR

At a high-level, the Facilitator in the Medicare Part D claims environment is responsible for:

- Processing Eligibility Inquiries
- Reporting supplemental claims to the Prescription Drug Plan (PDP) for True Out-Of-Pocket (TrOOP) calculation.

Facilitators utilize existing network connectivity to capture secondary, tertiary, etc. claims activities originating from the Pharmacy providers to a Switch. The Facilitator receives a transmission from the Switch. Routing is accomplished through unique combination of

- IIN and PCN, or
- IIN and PCN and Group ID, or
- IIN and Group ID assignments.

32.6.5 RESPONSIBILITIES IN REMS PROCESSING

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

- 923 -

When using this standard, the Provider, Switch, Intermediary, and the REMS Administrator are expected to perform specific functions, as outlined below. As a reminder the term "billing function" is used to encompass the following transactions for REMS:

- Claim Billing (B1)
- Claim Reversal (B2)
- Claim Rebill (B3)
- Service Billing (S1)
- Service Reversal (S2)
- Service Rebill (S3)
- Prior Authorization Request And Billing (P1)
- Prior Authorization Reversal (P2)

32.6.5.1 RESPONSIBILITIES OF THE REMS ADMINISTRATOR

At a high-level, the REMS Administrator process includes some or all of the following:

- Interpreting requests and responding as needed to provide the maximum amount of information for error correction and resolution when required.
- Performing pharmacy registration verification edits before the billing function request is delivered to the adjudicator.
- Performing prescriber registration verification edits before the billing function request is delivered to the adjudicator.
- Performing patient registration verification edits before the billing function request is delivered to the adjudicator.
- Performing pharmacist registration verification edits before the billing function request is delivered to the adjudicator.
- Performing clinical appropriateness edits before the billing function request is delivered to the adjudicator.
- Optionally capturing billing function request activity subsequent to the adjudicator processing the request (such as reversals).
- Optionally matching service billing function requests to their associated registration verification requests.
- Optionally performing data capture and reporting activities on behalf of the REMS sponsor.

32.6.5.2 RESPONSIBILITIES OF THE PROVIDER

At a high-level, the Provider (dispenser) is responsible for the following when using a billing function request transaction and simultaneously requesting registration verification:

- Populating all mandatory fields for the request transmissions
- Populating all fields required by the adjudicator (payer sheet)
- Submitting all situational or optional segments required by the REMS Administrator (REMS program sheet)
- Populating all situational or optional fields required by the REMS Administrator (REMS program sheet)
- Using the same routing paths for associated transactions (billing and reversal).

32.6.5.3 RESPONSIBILITIES OF THE SWITCH

At a high-level, the Switch is responsible for the following:

- Routing qualified billing function transactions for REMS registration verification and approval, when appropriate.
- Interpreting REMS Administration response as a data capture only, denial or approval.
- Optionally, delivering the submitted billing function request to the adjudicator when the registration verification response is a data capture only or an approval.
- Optionally, formatting and delivering registration verification denial information to the provider.
- Establishing how the request and response transactions will be formatted and business rules for interpretation (i.e., must be a subset of the NCPDP Telecommunication Standard) with the REMS Administrator
- Establishing how the request and response transactions will be exchanged between switches.
- Determining if the request transaction requires the spawning of a request transaction to the REMS Administrator, formatting the transaction to be a subset of the provider request, and delivering the request transaction.
- Interpreting the response transaction from the REMS Administrator to determine if the originating request transaction is delivered to the intended recipient or the REMS Administrator response delivered to the pharmacy.
- Ensure the Intermediary Segment is removed before sending to the adjudicator.

32.6.6 RESPONSIBILITIES IN PDMP PROCESSING

32.6.6.1 RESPONSIBILITIES OF THE PDMP ADMINISTRATOR

At a high-level, the PDMP Administrator process includes some or all of the following:

- Interpreting requests and responding as needed to provide the maximum amount of information for error correction and resolution when required.
- Performing data capture and reporting activities on behalf of the PDMP program.

32.6.6.2 RESPONSIBILITIES OF THE PROVIDER

At a high-level, the Provider (dispenser) is responsible for the following when using a billing function request transaction and simultaneously requesting registration verification:

- Populating all mandatory fields for the request transmissions
- Populating all fields required by the adjudicator (payer sheet)
- Submitting all situational or optional segments required by the PDMP Administrator (PDMP program sheet)
- Populating all situational or optional fields required by the PDMP Administrator (PDMP program sheet)
- Using the same routing paths for associated transactions (billing and reversal).

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

- 924 -

32.6.6.3 RESPONSIBILITIES OF THE SWITCH

- Establishing how the request and response transactions will be formatted and business rules for interpretation (i.e., must be a subset of the NCPDP Telecommunication Standard) with the PDMP Administrator.
- Establishing how the request and response transactions will be exchanged between switches.
- Determining if the request transaction requires the spawning of a request transaction to the PDMP Administrator, formatting the transaction to be a subset of the provider request, and delivering the request transaction.
- Interpreting the response transaction from the PDMP Administrator to determine if the originating request transaction is delivered to the receiver or the PDMP Administrator response delivered to the pharmacy.

32.7 PROCESSOR IMPLEMENTATION

Processors accepting Version F and above transactions from providers may encounter the following special concerns.

32.7.1 TRANSMITTING A RESPONSE

Systems must relay complete information regarding the disposition of a transaction, including status, reason(s) for reject, and basis of determination for payment, as applicable. If the claim or service is paid, payment amount determination must be returned. The following fields will be utilized to accommodate this requirement.

- The "Basis of Reimbursement Determination" (522-FM) provides a code indicating the method of calculating the claim payment amount.
- The component parts of the amount paid for the claim must be returned in the applicable fields. See section "*Pricing Guidelines*".
- Refer to the section "*Prescription And Service Pricing Formulae*".
- See section "*Response Pricing Segment*" for an in-depth discussion of pricing fields.
- The preferred product fields in the Response Claim Segment may be used to provide information regarding therapeutic substitution opportunities. The fields repeat to accommodate multiple preferences of products to be dispensed.

32.7.2 OTHER CONSIDERATIONS

- The message fields are to be used to provide supplemental information regarding the payment of the claim or the reason for rejection.
- The "Approved Message Code" (548-6F) may be used to indicate that an additional follow-up action is warranted; e.g., "Generic Available," "Non-formulary Drug," "Maintenance Drug."
- If a claim rejects at the claim header level, it is not necessary to return claim detail.
- Claim level reject detail must be provided if claim level detail caused the rejection.

32.8 SWITCH IMPLEMENTATION

A "Switch" may support the reception and transmission of all NCPDP format variations. Switches may offer to reformat (convert) transactions from one format or version to another if trading partners require this feature for compatibility reasons.

33 FREQUENTLY ASKED QUESTIONS

Technical support for this document is available through the Council office.

33.1 ***NOTABLE CHANGES FROM VERSION D.0 TO VERSION F3***

Question: What Are My Sources For Finding Notable Changes From Version D.0 to Version F3?

Response: See sections *Notable Changes From Previous Telecommunication Versions* and *Appendix A. History of Document Changes*.

- 926 -

34 UPDATES AND CORRECTIONS TO STANDARDS

The Data Element Request Form (DERF) provides the mechanism for changing NCPDP standards and using or requesting new data elements and new code set values in business functions. To request a change in NCPDP standards, complete an NCPDP Data Element Request Form, available at www.ncdp.org (under Request Changes). Appropriate NCPDP Work Groups consider information submitted on the DERF. The Data Element Request Form process makes it possible for NCPDP working groups to adequately address these concerns before accepting or approving new information requests into a standard. The final acceptance of new requests into the standard is made by NCPDP at the suggestion or recommendation of the Work Group and must be approved by consensus or consensus ballot of the membership.

- 927 -

35 APPENDIX A HISTORY OF DOCUMENT CHANGES

It is recognized that section references might no longer be valid, as the document has been updated past the reference.

35.1 VERSION D.0

35.1.1 AUGUST 2006 DERF APPROVALS

Definitions for "Copay/Amount of Copay", "Coinsurance/Amount of Coinsurance", and "Patient Financial Responsibility" were added to section "Response Processing Guidelines", "Pricing Guidelines", "Definitions". The term "100% Copay" was modified to "Patient Financial Responsibility" throughout the document. Where appropriate, the term "copay" added "coinsurance" to offer clarification. Sections included "Response Processing Guidelines", "Pricing Guidelines", "Business Function of Capture", and "Business Functions Not Supported For Capture". Also modified for copay/coinsurance clarification was sections "Specific Segment Discussion", "Response Segments", "Response Pricing Segment". The new field Amount Attributed to Provider Network Selection (133-UJ) was added to the section "Patient Pay Amount (505-F5) Formula". The section of "Example #2" was modified and the section "Partial Fill Fields" was modified.

The section "Transmission Examples" was modified from references of copay to patient financial responsibility.

- "Billing – Transaction Code B1 – Coordination of Benefits – Scenario 2: Pharmacy Bills Secondary Insurance"
- "Scenario 2 Response: Secondary Insurance Pays The Claim Submitted With Total Patient Pay Amount"
- "Scenario 3: Pharmacy Bills Secondary Insurance"
- "Scenario 3 Response: Secondary Insurance Pays The Claim Submitted With The "Pieces" Of Patient Pay Amount"

The following "Frequently Asked Questions" were modified from references of copay to patient financial responsibility.

- "How Is The Pregnancy Indicator (335-2C) Used In The Processor's System?"
- "Why Would The Response Pricing Segment Be Used (Situational) In A Billing Transaction (Or Other Transaction) When A Processor Returns A "C"aptured Response?"
- "Patient Financial Responsibility And Negative Amounts"
- "Other Coverage Code (308-C8) And Coordination Of Benefits"
- "Transaction Fee Charge"
- "Truncation Of Dollar Fields"
- "Should Other Payer Amount Recognized (556-J5) Be Included In The Response From A Secondary (Or Downstream) Payer?"

The field Patient Pay Amount (505-F5) definition was modified to include coinsurance - "Amount that is calculated by the processor and returned to the pharmacy as the TOTAL amount to be paid by the patient to the pharmacy; the patient's total cost share, including copayment, coinsurance, amounts applied to deductible, over maximum amounts, penalties, etc."

The value of Prior Authorization Type Code (461-EU) "4" was modified to "Exemption from copay and/or coinsurance".

Section "Structure Quick Reference", the following field was modified:

Preferred Product Copay Incentive (555-AT) field name was modified to Preferred Product Cost Share Incentive.

Response Claim Segment		
Field	Field Name	Mandatory or Situational
555-AT	PREFERRED PRODUCT COST SHARE INCENTIVE	S***R***

Section "Structure Quick Reference", the following fields were added:

Response Pricing Segment		
Field	Field Name	Mandatory or Situational
128-UC	SPENDING ACCOUNT AMOUNT REMAINING	S
129-UD	HEALTH PLAN-FUNDED ASSISTANCE AMOUNT	S

Section "Specific Segment Discussion", "Response Segments", "Response Pricing Segment" added guidance for Spending Account Amount Remaining (128-UC) and Health Plan-Funded Assistance Amount (129-UD).

Basis of Cost Determination (423-DN) and Basis of Reimbursement Determination (522-FM) support the situation of "Not used in reporting patient financial responsibility billing."

Note: After the November 2006 pricing and qualifier modifications were made, it was determined that Basis of Cost Determination (423-DN) and Basis of Reimbursement Determination (522-FM) needed to be available in patient financial responsibility billing so the situation of "Not used in reporting patient financial responsibility billing" was removed.

Other Payer-Patient Responsibility Amount Qualifier (351-NP) added a value for "Amount attributed to Health Plan Assistance Amount (129-UD) as reported by previous payer".

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

- 928 -

A section has been added to section *Specific Segment Discussion*, *Response Segments*, *Response Pricing Segment* for *Healthcare Reimbursement Account (HRA)*, *Health Savings Accounts (HSAs)*, and *Healthcare Flexible Spending Account (FSA)*. *Patient Pay Amount (505-F5) Formula* has been updated to include Health Plan-Funded Assistance Amount (129-UD).

Section *Structure Quick Reference*, the following fields were added:

Response Pricing Segment		
Field	Field Name	Mandatory or Situational
133-UJ	AMOUNT ATTRIBUTED TO PROVIDER NETWORK SELECTION	S
134-UK	AMOUNT ATTRIBUTED TO PRODUCT SELECTION/BRAND DRUG	S
135-UM	AMOUNT ATTRIBUTED TO PRODUCT SELECTION/NON-PREFERRED FORMULARY SELECTION	S
136-UN	AMOUNT ATTRIBUTED TO PRODUCT SELECTION/BRAND NON-PREFERRED FORMULARY SELECTION	S

These fields were added to the section *Patient Pay Amount (505-F5) Formula* found under *Specific Segment Discussion*, *Response Segments*, *Response Pricing Segment*.

Other Payer-Patient Responsibility Amount Count (353-NR) has been increased in size from 1 to 2 numeric. The max count has been increased from 5 to 25 to allow for more occurrences of the detailed patient responsibility fields from a previous payer. Other Payer-Patient Responsibility Amount Qualifier (351-NP) added additional values, which caused the field size to be increased from A/N 1 to A/N 2. Values 1-9 added a preceding 0 (e.g., 01, 02, 03). The qualifier supports new values for "10" (Amount Attributed to Provider Network Selection (133-UJ)) and "11" (Amount Attributed to Product Selection/Brand Non-Preferred Formulary Selection (136-UN)). The existing values of "02" and "07" were changed. "02" (Amount Attributed to Product Selection/Brand Drug (134-UK)), "07" (Amount Attributed to Product Selection/Non-Preferred Formulary Selection (135-UM)).

Section *Structure Quick Reference*, the following fields were deleted due to the specific fields added above:

Response Pricing Segment		
Field	Field Name	Mandatory or Situational
576-MQ	AMOUNT ATTRIBUTED TO PRODUCT SELECTION QUALIFIER	S
519-FJ	AMOUNT ATTRIBUTED TO PRODUCT SELECTION	S

All references to these two fields have been removed, with the specific new field added.

The section *Long Term Care Transition, Emergency Fill and Change in level of Care Messaging for Rejected and Paid Claims* was added to *Appendix G. Two-Way Communication to Increase the Value of On-Line Messaging*. New Reject Codes (511-FB) and new Approved Message Codes (548-6F) were added to support this transition processing. The Response Prior Authorization Segment is optional for rejected Billing and Rebill transactions (see section *Response Segment Usage Matrix*, *Transaction Rejected*).

In section *Specific Segment Discussion*, *Response Segments*, *Response Prior Authorization Segment* guidance was added about the need for a prior authorization in transition processing.

Compound Processing – the two alternatives (Scenario A (Most expensive legend drug) and Scenario B (Billing codes)) are no longer supported. When Telecom Version 5.0 was created, the intent for processing compounds was to use one method – Option 1 (preferred) - the use of the Compound Segment with the Claim Segment. Two alternatives (Scenario A (Most expensive legend drug) and Scenario B (Billing codes)) were inadvertently left in the implementation guide in a Frequently Asked Question. The support of multiple methods was never the intention. Multiple methods of billing compounds create problems in the coordination of benefits process when one payer requires the compound claim submitted using one method and downstream payers use another method. The preferred method will be the only method allowed. The following sections have been modified.

- *Specific Segment Discussion*, *Request Segments*, *Compound Segment*
- Also in this section *Two Options To Designate A Compound* has been removed
- *Frequently Asked Questions*, *Quantity Dispensed (442-E7) And Compounds* – this question has been removed since it dealt with alternate options for compounds
- *APPENDIX E. ORDUR (Online Real-time Drug Utilization Review)*, *Information Categories*, *Prescription Information* – removed reference to legend drug
- A new example *Compounded Rx Billing - Transaction Code B1 (01) – Coordination of Benefits Scenario* was added

A new value was added to Patient ID Qualifier (331-CX) – "06" (Medicaid ID).

The definition of Other Payer Amount Paid (431-DV) was modified to "Amount of any payment known by the pharmacy from other sources" (removed coupon reference).

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use
- 929 -

The definition of Other Payer Amount Recognized (566-J5) was modified to "Total amount recognized by the processor of any payment from another source" (removed coupon reference).

Section "Structure Quick Reference", the following fields were deleted because the National Provider ID (NPR) rule did not name a location field and these fields were specifically added in anticipation of the NPI location:

Prescriber Segment		
Field	Field Name	Mandatory or Situational
467-1E	PRESCRIBER LOCATION CODE	S
469-H5	PRIMARY CARE PROVIDER LOCATION CODE	S

Section "Business Environments", "Participants" has added verbiage about payer-to-payer usage of this document. *Figure 1* has been renamed "Provider/Adjudicator Participants". "Figure 2. Between Adjudicator Participants" has been added. Original Figure 2 has been renamed "Figure 3. Connectivity between participants".

Other Coverage Code (308-C8) had the following changes:

- Delete value of 5 (Managed care plan denial)
- Delete value of 6 (Other coverage denied-not participating provider),
- Delete value of 7 (Other coverage exists-not in effect on Date of Service)

as they are duplicates to value 3 (Other coverage billed – claim not covered).

- Change description of value 3 from (Other coverage billed – claim rejected) to (Other coverage billed – claim not covered)
- Change description of value 8 from (Claim is billing for copay) to (Claim is billing for patient financial responsibility only)
- Change description of value 0 from (Not specified) to (Not specified by patient)
- Guidance was added to section "Specific Segment Discussion", "Request Segments", "Claim Segment", with section added "Other Coverage Code (308-C8).
- "Transmission Examples" have been modified.
- "Frequently Asked Question", "Other Coverage Code (308-C8) And Coordination Of Benefits" was removed. Applicable information was moved into "Specific Segment Discussion", "Request Segments", "Claim Segment", "Other Coverage Code (308-C8).

Dispense As Written/Product Selection Code (408-D8) modified value "9" (Other – Reserved and not in use) to (Substitution Allowed By Prescriber but Plan Requests Brand - Patient's Plan Requested Brand Product To Be Dispensed - This value is used when the prescriber has indicated, in a manner specified by prevailing law, that generic substitution is permitted, but the plan's formulary requests the brand product. This situation can occur when the prescriber writes the prescription using either the brand or generic name and the product is available from multiple sources).

The following fields added a qualifier for the HCIdesa Number:

- Prescriber ID Qualifier (466-EZ)
- Primary Care Provider ID Qualifier (468-2E)
- Service Provider ID Qualifier (202-B2)

The Date of Service (401-D1) definition was modified to "Identifies date the prescription (was filled) or (professional service rendered) or (subsequent payer began coverage following Part A expiration in a long-term care setting only)."

The Submission Clarification Code (420-DK) added a value of "19" (Split Billing – indicates the quantity dispensed is the remainder billed to a subsequent payer when Medicare Part A expires. Used only in long-term care settings.) Guidance for "Split Billing in Long Term Care" was added to "Specific Segment Discussion", "Request Segments", "Claim Segment".

Also in this section, Originally Prescribed Product/Service Code (445-EA) and Originally Prescribed Quantity (446-EB) added verbiage removed from the Data Dictionary ("The Originally Prescribed Product/Service Code (445-EA) and the Originally Prescribed Quantity (446-EB) are used to provide necessary data to calculate the exact difference in cost between the prescribed product and the dispensed product. The Originally Prescribed Quantity (446-EB) is for use with therapeutic interchange only.")

Section "Document Scope" modified the reference to the Billing Unit Standard to remove the specific version. Like the Data Dictionary and the External Code List, the most recent version is to be used.

35.1.2 NOVEMBER 2006 APPROVALS

The business transaction of Predetermination Of Benefits has been added to all appropriate sections, with an explanation section "Predetermination Of Benefits Information". An example has been added. A frequently asked question has been added.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

- 930 -

In preparation for the use of the National Provider ID (NPI), some examples within “*Transmission Examples*” have been modified.

The length of fields Prescription/Service Reference Number (402-D2) and Associated Prescription/Service Reference Number (456-EN) has been increased to 12 bytes. These fields are numeric with a length of 12.

Claim Billing, Claim Rebill, Reversal, Information Reporting, Information Reporting Reversal, and Information Reporting Rebill transactions for Medicare Part D are limited to one transaction per transmission.

Additional logic has been added to duplicate processing. See section “*Response Processing Guidelines*”, “*Duplicate Transactions*.” The Coordination of Benefits/Other Payments Segment has been added to the Claim Reversal and Service Reversal transactions. Additional guidance has been added to the Coordination of Benefits/Other Payments Segment sections in Claim Billing or Encounter, Claim Rebill, Service Billing, and Service Rebill transactions.

Additional Message Information (526-FQ) size has been modified and the field repeats with a count, a qualifier, and the ability to use a continuation character. See section “*Specific Segment Discussion*”, “*Response Segments*”, “*Response Status Segment*”, “*Additional Message Information Fields*”.

In Version EB and above, the Service Billings have their own Transaction Code (S1, S2, S3). The Transaction Code is at the transmission level. Claim and service billings are associated (using the Associated Prescription/Service Reference Number (456-EN) and Associated Prescription/Service Date (457-EP), but they must appear in separate transmissions. Drug product billings are designated by Transaction Code = B1 (Billing) and Prescription/Service Reference Number Qualifier = 1 (Rx Billing). Service billings are designated by Transaction Code = S1 (Service Billing) and Prescription/Service Reference Number Qualifier = 2 (Service Billing).

Note that in other Transaction Codes (Prior Authorizations, Information Reporting, and Controlled Substance Reporting), the differentiation of claim versus service remains at the transaction level. For example, drug product transactions are designated by Transaction Code = “P1” (Prior Authorization Request And Billing) and Prescription/Service Reference Number Qualifier = 1 (Rx Billing). Service billings are designated by Transaction Code = P1 (Prior Authorization Request And Billing) and Prescription/Service Reference Number Qualifier = 2 (Service Billing). Clarification has been added to the document to support these changes.

Dispense As Written/Product Selection Code (408-D8) clarified value “1” (Substitution Not Allowed by Prescriber).

Prior Authorization Type Code (461-EU) changed value 4 (Exemption from Copay) to (Exemption from Copay and/or Coinsurance) and added value 9 (Emergency Preparedness - Code used to override claim edits during an emergency situation.)

Other Payer-Patient Responsibility Amount Qualifier (351-NP) supports new values for “12” (Amount Attributed to Coverage Gap (137-UP) that was collected from the patient due to a coverage gap). A new value of “13” (Amount Attributed to Processor Fee (571-NZ)) has been added.

Basis of Reimbursement Determination (522-FM) supports new values for 14 (Other Payer-Patient Responsibility Amount - Indicates reimbursement was based on the Other Payer Patient Responsibility Amount (352-NQ)), 15 (Patient Pay Amount - Indicates reimbursement was based on the Patient Pay Amount (505-F5)), 16 (Coupon Payment – Indicates reimbursement was based on the Coupon Value Amount (487-NE) submitted or the coupon amount determined by the processor).

Percentage Sales Tax Basis Submitted (484-JE) and Percentage Sales Tax Basis Paid (561-AZ) no longer support value “01” (Gross Amount Due).

Tax Exempt Indicator (557-AV)

- no longer supports value “2” (Not Tax Exempt)
- value “1” was modified to “Payer/Plan is Tax Exempt (The Payer/Plan is not responsible for tax. The patient may be charged tax.)”
- value “3” was added “Patient is Tax Exempt (The patient cannot be charged tax.)”
- value “4” was added “Payer/Plan and Patient are Tax Exempt (Neither the payer/plan nor the patient can be charged tax.)”

Certain fields with 0 or blank values or value of 99 or values signifying “Not Specified” were modified in the NCPDP “*External Code List*”, especially for Telecommunication Standard Implementation Guide usage. Please see the NCPDP “*External Code List*” document. Examples were modified to correspond with these changes.

The NCPDP *Data Dictionary* and *External Code List* were updated to provide definitions to values as more clarification for their usage. See these documents for more information.

Section “*Structure Quick Reference*”, the following fields were added:

Insurance Segment		
Field	Field Name	Mandatory or Situational
115-N5	MEDICAID ID NUMBER	S

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

124-TY	PAY TO ZIP/POSTAL CODE	S
125-TZ	GENERIC EQUIVALENT PRODUCT ID QUALIFIER	S
126-UA	GENERIC EQUIVALENT PRODUCT ID	S

Section "Specific Segment Discussion" added a subsection for the Workers' Compensation Segment.

Response Insurance Segment

Field	Field Name	Mandatory or Situational
115-N5	MEDICAID ID NUMBER	S
116-N6	MEDICAID AGENCY NUMBER	S
302-C2	CARDHOLDER ID	S

The definition for Cardholder ID (302-C2) was modified. See the NCPDP "Data Dictionary".

Response Patient Segment

Field	Field Name	Mandatory or Situational
111-AM	SEGMENT IDENTIFICATION	M
310-CA	PATIENT FIRST NAME	S
311-CB	PATIENT LAST NAME	S
304-C4	DATE OF BIRTH	S

This segment is variable length.

To support enhancements for eligibility checking, specifically for Medicare Part D usage, the following segment and fields have been added. Guidance has been added to the section "Eligibility Verification Information". In addition subsections have been added for the segment in the section "Specific Segment Discussion".

Response Insurance Additional Information Segment		
Field	Field Name	Mandatory or Situational
111-AM	SEGMENT IDENTIFICATION	M
139-UR	MEDICARE PART D COVERAGE CODE	M
138-UQ	CMS LOW INCOME COST SHARING (LICS) LEVEL	S
240-U1	CONTRACT NUMBER	S
926-FF	FORMULARY ID	S
757-U6	BENEFIT ID	S
140-US	NEXT MEDICARE PART D EFFECTIVE DATE	S
141-UT	NEXT MEDICARE PART D TERMINATION DATE	S

This segment is variable length.

Additional Message Information (526-FQ) size has been modified and the field repeats with a count, a qualifier, and the ability to use a continuation character. Additional guidance can be found in section “*Specific Segment Discussion*”, “*Response Segments*”, “*Response Status Segment*”.

Response Status Segment		
Field	Field Name	Mandatory or Situational
130-UF	ADDITIONAL MESSAGE INFORMATION COUNT	S
132-UH	ADDITIONAL MESSAGE INFORMATION QUALIFIER	S***R***
526-FQ	ADDITIONAL MESSAGE INFORMATION (existing field)	S***R***
131-UG	ADDITIONAL MESSAGE INFORMATION CONTINUITY	S***R***

Response Claim Segment		
Field	Field Name	Mandatory or Situational
114-N4	MEDICAID SUBROGATION INTERNAL CONTROL NUMBER/TRANSACTION CONTROL NUMBER (ICN/TCN)	S

Response Pricing Segment		
Field	Field Name	Mandatory or Situational
137-UP	AMOUNT ATTRIBUTED TO COVERAGE GAP	S
148-U8	INGREDIENT COST CONTRACTED/REIMBURSABLE AMOUNT	S
149-U9	DISPENSING FEE CONTRACTED/REIMBURSABLE AMOUNT	S

The following fields have been moved **from the Response Status Segment to a new Response Coordination of Benefits/Other Payers Segment**. Subsections have been added for each segment in the section “*Specific Segment Discussion*”.

Response Status Segment		
Field	Field Name	Mandatory or Situational
355-NT	OTHER PAYER ID COUNT	S
339-6C	OTHER PAYER ID QUALIFIER	S***R***
340-7C	OTHER PAYER ID	S***R***
991-MH	OTHER PAYER PROCESSOR CONTROL NUMBER	S***R***
356-NU	OTHER PAYER CARDHOLDER ID	S***R***
992-MJ	OTHER PAYER GROUP ID	S***R***

Response Coordination of Benefits/Other Payers Segment		
Field	Field Name	Mandatory or Situational
111-AM	SEGMENT IDENTIFICATION	M
355-NT	OTHER PAYER ID COUNT	M
338-5C	OTHER PAYER COVERAGE TYPE	M***R***
339-6C	OTHER PAYER ID QUALIFIER	S***R***
340-7C	OTHER PAYER ID	S***R***
991-MH	OTHER PAYER PROCESSOR CONTROL NUMBER	S***R***
356-NU	OTHER PAYER CARDHOLDER ID	S***R***
992-MJ	OTHER PAYER GROUP ID	S***R***
142-UV	OTHER PAYER PERSON CODE	S***R***
127-UB	OTHER PAYER HELP DESK PHONE NUMBER	S***R***
143-UW	OTHER PAYER PATIENT RELATIONSHIP CODE	S***R***
144-UX	OTHER PAYER BENEFIT EFFECTIVE DATE	S***R***
145-UY	OTHER PAYER BENEFIT TERMINATION DATE	S***R***

This segment is variable length.

Clarifications to Coupon processing were added to section “*Specific Segment Discussion*”, “*Request Segments*”, “*Coupon Segment*”. Additional coupon questions were added to section “*Frequently Asked Questions*”. Example “*Billing w/Coupon - Transaction Code B1—Primary Billing to Coupon Processor*” was deleted. The remaining coupon examples in section “*Transmission Examples*” were clarified and a new example added for reducing copay.

In Version C.4, Internal Control Number was added. Upon review, it was determined the field was in an incorrect position in the segment. It is a repeating field. This has been corrected. Clarification has been added to section “*Specific Segment Discussion*”, “*Request Segments*”, “*Coordination of Benefits/Other Payments Segment*”.

Coordination of Benefits/Other Payments Segment		
Field	Field Name	Mandatory or Situational
993-A7	INTERNAL CONTROL NUMBER	S***R***

Other Payer Coverage Type (338-5C) no longer supports value “98” (Coupon) and “99” (Composite).

Other Payer ID Qualifier (339-6C) no longer supports value “09” (Coupon).

Other Payer Amount Paid Qualifier (342-HC) no longer supports values “08” (Sum of all reimbursements), “98” (Coupon), and “99” (Other).

Errant references to section “*Segment Quick Reference*” were modified to correctly state section “*Structure Quick Reference*”.

Protocol Document Related Changes:

The work of the past years on the Protocol Document, to define the Segments and the Field Situations for use has been incorporated into this version.

- The document has been reviewed for verbiage of “may” “might”, “could”, and other less specific language. Where appropriate, the verbiage has been modified to “must”, “will”, etc.
- In each of the transaction sections “*Eligibility Information*”, “*Reversal Information*”, “*Rebill Information*”, etc, the diagrams have been reviewed according to Protocol Document decisions. Segments have been added or removed as applicable to the specific transaction. Where appropriate, the “claim” versus the “service” has been split out into separate diagrams for clarity.
- The section “*Claim and Service Billing Information*” has been modified to “*Claim, Encounter, and Service Billing Information*”. Encounter information has been added to this section.
- In each of the transaction information sections (e.g. “*Claim or Service Billing Information (Professional Pharmacy Service)*”), response diagrams have been added as appropriate.
- Information Reporting and Information Reporting Rebill transactions no longer support a “P” (Paid) or “D” (Duplicate of Paid) response since no business need was brought forward.
- In section “*Business Functions*”, the last paragraph has been added (some sentences brought from the Protocol Document).
- In section “*Business Functions*”, a business function was added to the list of Medicaid Subrogation. A subsection was added “*Medicaid Subrogation*” to explain the situational charts for this function brought from the Protocol Document.
- In section “*Prior Authorization Transaction Discussion*”, the charts were updated to match the situations on the fields.
- In section “*Controlled Substance Reporting Information*”, “*Controlled Substance Reporting Reversal Information*”, and “*Controlled Substance Reporting Rebill Information*” a paragraph has been added that at this time, the business cases for this transaction are not fully defined.

- 934 -

- The section “Appendix E. ORDUR (Online Real-time Drug Utilization Review)” guidance on Information Reporting transactions has been aligned with sections “Information Reporting Information”, for current known business usages.
- In sections “Controlled Substance Reporting Information”, “Controlled Substance Reporting Reversal Information”, and “Controlled Substance Reporting Rebill Information” a paragraph has been added that at this time, the business cases for this transaction are not fully defined.
- The section “Terminology Used Throughout” has been added from the Protocol Document.
- In section “Specific Segment Discussion”, “Request Segments”, “Claim Segment”, “Partial Fill” the section “Recommendations” was clarified further.
- The section “Repeating Fields – Maximum Occurrences”, subsection “Usage” has been updated with the maximum occurrences of count and counter fields to match the situations described in the fields.
- In section “Response Processing Guidelines”, the subsections of “Pricing Guidelines” and “Captured”, “Business Function of Capture” additional guidance has been added. The subsections of “Captured” and “Deferred” have been split.
- In section “Standard Conventions”, the subsection “Explanation of Segment And Field Designations” has been added.
- In section “Transmission Examples”, the subsection “Example Conventions” has been added. Examples were reviewed and aligned with situations defined in each transaction.

Modifications to section “Frequently Asked Questions” due for version D.0 applicability

All questions have been given a topic title.

Deleted FAQs:

- “When Using Version 5 And Above, Which Segments Are Used?”
- “When Using Version 5 And Above, Which Fields Are Used?”
- “How Do I Handle Sets Of Repeating Fields?”
- “How Do I Use The ‘Software Vendor/Certification ID’ Field?”
- “How Do I Format The PA/MC Fields?”
- “How Do I Return Additional Information?”
- “How Do I Indicate That A Patient Is Pregnant?”
- “How Is The Pregnancy Indicator (335-2C) Used In The Processor’s System?”
- “What Are The Recommended Guidelines For Supporting Multiple Claim Or Service Reversal (B2) Transactions Within A Transmission?”
- “What Are The Recommended Guidelines For Supporting Multiple Rebill (B3, N3, C3) Transactions Within A Transmission?”
- “The Initial Transaction Is A Prior Authorization Request Only. The Pharmacy Submits A Prior Authorization Inquiry For A Status. What Is The Difference Between A Prior Authorization Inquiry Response Of “C” (Capture) And “A” (Approved)?”
- “Once The Prior Authorization ID Is Assigned, On Subsequent Refills, Can You Just Submit The Prior Authorization In The Prior Authorization ID Submitted (462-EV) Field In The Claim Segment, Or Do You Need To Keep Sending The Prior Authorization Segment With The Prior Authorization Value In The Prior Authorization ID Assigned Field?”
- “Now That The Qualifier Is Available, Should The UPC And HRI Values Be Sent In Their Native Format Instead Of Being Reformatted To An 11-Digit Value?”
- “Fill Number (403-D3) – Default?”
- “Product/Service ID Field (407-D7) And Compounds In Reversals”
- “Can A Cardholder ID Contain Symbols Such As Hyphens And Apostrophes?”
- “100% Patient Financial Responsibility And Negative Amounts”
- “Reject Code For Incorrect Other Payer Amount Paid Count (341-HB)”
- “Reject Code For Incorrect Submission Clarification Code Count (354-NX)?”

- “How Are Compounded Pills Submitted?”
- “Must The Mandatory Data Elements Be Sent In The Order That They Are Listed In The Implementation Guide?”
- “Is There An Order To The Way Segments Must Appear In A Transmission?”
- “DUR Additional Text (570-NS) Field”
- “Prior Authorization Request And Billing – Deferred”
- “Should Other Payer Amount Recognized (556-J5) Be Included In The Response From A Secondary (Or Downstream) Payer?”
- “When The Value 99=Composite Is Used In The Other Payer Coverage Type, What Is Placed In The Other Payer ID? Is It Not Sent?”

Modified Questions:

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

- 935 -

- *"When Using Version 5 And Above, Which Segments Are Used?" to "What Are My Sources For Finding Notable Changes From Version 5.1 to Version D.0?"*
- *"Invalid Prescription/Service Reference Number Qualifier (455-EM)"*

Clarified Response:

- *"How Do I Reverse Prior Authorization Requests And Billings?"*
- *"How Do I Handle Syntax Errors?"*
- *"Can A Response Transaction Contain Accepted And Rejected Information?"*
- *"On Compounded Claims, Does DUR "Hit" Each Drug Within The Compound?"*

Modified Response:

- *"Prescription And Service Billings In One Transaction"*
 - o Due to the creation of a separate Transaction Code (103-A3) for Service Billing transactions, a claim and a service cannot appear in the same transmission structurally. They still can be associated, but must be within separate transmissions.
- *"Identifier Of An Ingredient"*
 - o The response originally noted the use of value 00 could be used when an ingredient does not have an identifier. Due to the changes of the default values in the Data Dictionary and External Code List, this response has been modified for the possible use of the value "99" (Other).

Moved Verbiage into sections of the Implementation Guide proper:

- *"Facility ID Usage"*
- *"Compound Ingredient Calculates To Be Less Than \$0.005"*
- *"Default Date Format"*
- *"Is A Person Code (303-C3) Of "060" The Same As "60"?"*
- *"Can A Segment Identification (111-AM) Be Sent Without Any Fields In That Segment And Not Be In Error?"*
- *"Multi-Ingredient Compound And Rejects"*
- *"Multi-Ingredient Compounds and DUR Rejects"*
- *"Alphanumeric Field and Leading Spaces"*

35.1.5 AUGUST 2007 APPROVALS

In section "Transmission Examples", section "Service Billing – Transaction Code S1 With CPT Codes" has been added.

35.1.6 EDITORIAL CORRECTIONS

Field DUR Additional Text (570-NS) was inadvertently left off the Response DUR/PPS Segment in sections

- "Response DUR/PPS Segment (Claim Billing or Encounter) (Transmission Accepted/Transaction Paid)"
- "Response DUR/PPS Segment (Claim Rebill) (Transmission Accepted/Transaction Paid)"

In the matrix section, Facility Segment - field Facility ID (336-BC) was corrected to (336-8C). Preferred Product Description (551-9F) was corrected to (556-AU), Amount of Copay (518-F1) was corrected to (518-FI).

Inadvertent editorial errors were corrected (fields designated as not used, but "Mandatory/Situation" column had an "S" or "Q" instead of "N", or fields with "S" designation should have been "Q".)

Prescription/Service Reference Number Qualifier (455-EM) – a mandatory field has a guidance note in some of the transactions, but not all. The guidance note has been added to all.

Date Prescription Written (414-DE) in Information Reporting Rebill – the situation was inadvertently not consistent with Information Reporting.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

In the Response Message Segment and Response Status Segment, when a transmission does not support more than one transaction, the reference to >1 has been removed in the Transaction Count (109-A9) and Additional Message Information (526-FQ) – Eligibility Verification and Prior Authorization transactions. Response Prior Authorization Segment inadvertently was listed in the table heading as Mandatory even though all other references were for a situational segment. The table heading has been changed in

- *Response Prior Authorization Segment (Claim Billing or Encounter) (Transmission Accepted/Transaction Rejected)*
- *Response Prior Authorization Segment (Service Billing) (Transmission Accepted/Transaction Rejected)*
- *Response Prior Authorization Segment (Claim Rebill) (Transmission Accepted/Transaction Rejected)*
- *Response Prior Authorization Segment (Service Rebill) (Transmission Accepted/Transaction Rejected)*

Inadvertent editorial errors were corrected in Preferred Product Description (556-AU) for Prior Authorization Inquiry (Claim) situation, and Response Status Segment note on Prior Authorization Inquiry Response (Deferred).

In section “Transmission Examples”, section “Billing – Transaction Code B1 – Coordination of Benefits Scenarios Pharmacy Bills to Insurance Designated By Patient”, subsection “Scenario 2 Response: Secondary Insurance Pays The Claim Submitted With Net Other Payer Patient Responsibility Amount” and “Scenario 3 Response: Secondary Insurance Pays The Claim Submitted With The “Pieces” Of Other Payer-Patient Responsibility Amount” the Response Pricing Segment was corrected. In *Billing – Transaction Code B1 – Coordination of Benefits – Reimbursement Based on the Other Payer Patient Responsibility Amount (352-NQ) and Patient Request of Brand*”, the Response Pricing Segment was corrected.

In section “Transmission Examples”, section “[Compounded Rx Billing - Transaction Code B1 \(01\) – Coordination of Benefits Scenario](#)”, subsection “[Secondary Insurance Pays The Claim Submitted With Amount Paid By Other Payer](#)”, the Basis of Reimbursement Determination incorrectly showed a value of “1”. It was changed to “3” to match the comment.

July 2009 - Scheduled Prescription ID Number (454-EK) has been changed from “Not used” to “Required if necessary for state/federal/regulatory agency programs” in Claims and Service Billings, Information Reporting, Controlled Substance Reporting, and their Rebills, Prior Authorization Request And Billing (Claim, Service), and Predetermination of Benefits transactions. The previous versions of Telecommunication Implementation Guide supported the use of the field. This was brought to NCPDP’s attention by NYS Medicaid. NCPDP provided background to the Office of e-Health Standards and Services with the request to correct the implementation guide named in HIPAA in 2009. The request was granted. See http://www.ncdp.org/news_hipaa_trans_current.aspx#ImpGuiCorr

August 2010 – New CMS requirements for Part D multi-ingredient compound claims (which represent a very small percentage of pharmacy claims) introduce a possible scenario where the standard Benefit Stage formula no longer balances. This scenario would occur if multi-ingredient compound prescription claims submitted by a pharmacy to a primary Medicare Part D payer contained some ingredients that cannot be covered by Part D due to regulation – and the plan chooses to offer enhanced benefits to cover some/all of the remaining ingredients. This imbalance was found as part of the industry building examples for multi-ingredient compounds to comply with Medicare Part D regulations. The formula was modified to include Other Payer Amount Recognized (566-J5) and clarifying guidance was added in section “*Medicare Part D*”.

In addition, section “*Denote Individual Amounts of Patient Financial Responsibility as Reported from a Previous Payer*” had an invalid reference to sales tax, and Amount Attributed to Product Selection/Brand Drug (134-UK), which should not apply to Service Billings. The paragraph was modified to

For example, in an original claim or service billing, the primary payer returns amounts in the Amount Attributed to Product Selection/Brand Drug (134-UK) and AMOUNT APPLIED TO PERIODIC DEDUCTIBLE (~~523-FN~~) Amount of Copay (518-FI). The pharmacy submits the claim or service billing to the secondary payer. The amounts in these two fields are then reflected in two occurrences of the Other Payer-Patient Responsibility Amount, with the Qualifier reflecting one occurrence with a value of “02” (Amount Attributed to Product Selection/Brand Drug (134-UK) as reported by a previous payer) and a second occurrence with a value of “05” (Amount of Copay (518-FI) as reported by previous payer).

NCPDP provided background to the Office of e-Health Standards and Services with the request to correct the implementation guide named in HIPAA in 2009. The request was granted. See http://www.ncdp.org/news_hipaa_trans_current.aspx#ImpGuiCorr

35.1.7 NOVEMBER 2012 ENHANCEMENT

Quantity Prescribed (460-ET) for claim billings was changed from “not used” to “situational” for Schedule II dispensing under the following situational circumstance “Required for all Medicare Part D claims for drugs dispensed as Schedule II. May be used by trading partner agreement for claims for drugs dispensed as Schedule II only.” (This modification was made to Claim Billing/Encounter, Claim Rebill, Prior Authorization Request And Billing (Claim)).

35.2 VERSION D.1

Service and Partial Fill Updates

The following fields have been added to the Claim Segment in section “*Structure Quick Reference*”.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Copyrighted Materials - See Copyright Statement for Allowed Use

- 947 -

Claim Segment		
Field	Field Name	Mandatory or Situational
579-XX	ASSOCIATED PRESCRIPTION/SERVICE PROVIDER ID QUALIFIER	S
580-XY	ASSOCIATED PRESCRIPTION/SERVICE PROVIDER ID	S
581-XZ	ASSOCIATED PRESCRIPTION/SERVICE REFERENCE NUMBER QUALIFIER	S
582-X0	ASSOCIATED PRESCRIPTION/SERVICE REFERENCE FILL NUMBER	S

In section “*Specific Segment Discussion*”, section “*Request Segments*”, “*Claim Segment*” includes these new fields – used in partial fill claim billing or service billing processing. In section “*Transmission Examples*”, section “*Service Billing – Transaction Code S1 With Associated Fields*” has been added. The example “*Billing, Partial Fill – Completion – Transaction Code B1*” has been updated to include the Associated Prescription/Service Reference Number Qualifier (581-XZ) field.

Regulated Non-Prescription Product Reporting

In section “*Business Environment*”, the definitions of “Provider” and “Adjudicator” have been expanded to support the roles in regulated non-prescription product reporting. Section “*Controlled Substance Reporting Information*” has been enhanced to support reporting regulated non-prescription products.

The following segments have been added for use only in Controlled Substance Reporting (Regulated Non-Prescription Product) transactions.

Purchaser Segment		
Field	Field Name	Mandatory or Situational
111-AM	SEGMENT IDENTIFICATION	M
591-YU	PURCHASER ID QUALIFIER	S
592-YV	PURCHASER ID	S
593-YW	PURCHASER ID ASSOCIATED STATE/PROVINCE ADDRESS	S
594-YX	PURCHASER DATE OF BIRTH	S
595-YY	PURCHASER GENDER CODE	S
596-YZ	PURCHASER FIRST NAME	S
597-Y0	PURCHASER LAST NAME	S
598-Y1	PURCHASER STREET ADDRESS	S
599-Y2	PURCHASER CITY ADDRESS	S
675-Y3	PURCHASER STATE/PROVINCE ADDRESS	S

680-ZB	SELLER ID QUALIFIER	S
679-Y9	SELLER ID	S
590-YT	SELLER INITIALS	S

This segment is variable length.

The following fields have been added for use only in Controlled Substance Reporting (Regulated Non-Prescription Product) transactions.

Claim Segment		
Field	Field Name	Mandatory or Situational
678-Y6	TIME OF SERVICE	S
681-ZF	SALES TRANSACTION ID	S

Section "Duplicate Transmission For Controlled Substance Reporting (Regulated Non-Prescription Product or General) Transactions" has been added to section "Response Processing Guidelines", "Duplicate Transactions".

Section "Transmission Examples" now includes "Controlled Substance Reporting (Regulated Non-Prescription Product) from Pharmacy - Transaction Code C1".

Section "Transmission Examples", "Excerpt Example – Other Payer-Patient Responsibility Amount Fields in Coordination of Benefits Setting of Multiple Payers" provides an example of tertiary billing in coordination of benefits. Section "Specific Segment Discussion", "Request Segments", "Coordination of Benefits/Other Payments Segment" added guidance for the highest loop instructions.

35.3 VERSION D.2

Controlled Substance Reporting (General)

Section "Controlled Substance Reporting Information" has been enhanced to support situations for (General) transaction reporting.

The following fields have been added for use only in Controlled Substance Reporting (General) transactions.

Patient Segment		
Field	Field Name	Mandatory or Situational
A22-YR	PATIENT ID ASSOCIATED STATE/PROVINCE ADDRESS	S

Prescriber Segment		
Field	Field Name	Mandatory or Situational
A24-ZK	PRESCRIBER ID ASSOCIATED STATE/PROVINCE ADDRESS	S

A27-ZQ	PRESCRIBER ALTERNATE ID ASSOCIATED STATE/PROVINCE ADDRESS	S
--------	---	---

Purchaser Segment		
Field	Field Name	Mandatory or Situational
A23-YS	PURCHASER RELATIONSHIP CODE	S

Section "Transmission Examples", "Controlled Substance Reporting – Transaction Code C1", "C2" and "C3" were modified to specify they are for the "General" transaction. Section "Frequently Asked Questions", "Future Dated Response Cardholder ID" was added.

35.3.1 OCTOBER 2009 CORRECTIONS

The Patient Segment is mandatory in a Controlled Substance Reporting Reversal (General) request. The Patient Segment was not included in the section "Controlled Substance Reporting Reversal Request Segments". It was in the Diagram section and in the "Request Segment Matrices by Segment." It has been added to this section and the "Request Segment Matrices By Field Within Segment".

35.4 VERSION D.3

The following field has been added for Claim Billing, Claim Rebill, Prior Authorization Request And Billing, and Prior Authorization Inquiry transactions when the response is Paid (or Duplicate of Paid) only. For other transaction responses the field is marked not used. The value returned in this field on a response is then reported in Controlled Substance Reporting (General) transactions in Reported Payment Type (A29-ZS). Where this field is cited in transactions, guidance is given in section "Controlled Substance Reporting Information", subsection "Use of Adjudicated Payment Type (A28-ZR) and Reported Payment Type (A29-ZS)".

Response Status Segment		
Field	Field Name	Mandatory or Situational
A28-ZR	ADJUDICATED PAYMENT TYPE	S

The following field has been added for use only in Controlled Substance Reporting (General) transactions, for the reporting of the value returned in Adjudicated Payment Type (A28-ZR). Where this field is cited in Controlled Substance Reporting (General) transactions, guidance is given in section "Controlled Substance Reporting Information", subsection "Use of Adjudicated Payment Type (A28-ZR) and Reported Payment Type (A29-ZS)". Otherwise the field is marked not used.

Claim Segment		
Field	Field Name	Mandatory or Situational
A29-ZS	REPORTED PAYMENT TYPE	S

The following fields have been added for Controlled Substance Reporting (General) transactions.

Purchaser Segment		
Field	Field Name	Mandatory or Situational
A30-ZT	RELEASED DATE	S
A31-ZU	RELEASED TIME	S

- 950 -

In the examples, the old values (two digit codes) were inadvertently left. This has been corrected to SNOMED codes which are the correct value set to be used. For example,

995-E2	ROUTE OF ADMINISTRATION	Q	11	Oral
Should be				
995-E2	ROUTE OF ADMINISTRATION	Q	26643006	Oral

New Reject Codes (511-FB) were added to the External Code List for prescriber sanctioned and prescriber deceased. A new Reject Code (511-FB) was added for “ “ with guidance added in section “*Appendix G Two Way Communication to Increase the Value of On-Line Messaging*”, subsection “*Reject Code “07” (M/I Cardholder ID)*”, and subsection “*Reject Code “52” (Non-Matched Cardholder ID)*”.

Compound Modifications

Compound Dosage Form Description Code (450-EF) has been modified from a size of A/N 2 to a size of A/N 15 to point to a consistent code set with more robust values as other NCPDP standards use – the NCI values of Diagnostic, Therapeutic, and Research Equipment – Pharmaceutical Dosage Form. Links are provided in the External Code List. Examples in section “*Transmission Examples*” were modified.

Additional values were added in the External Code List for Other Amount Claimed Submitted Qualifier (479-H8) and Other Amount Paid Qualifier (564-J3) for compound preparation costs, and the COB field, Other Payer Amount Paid Qualifier (342-HC).

A new field Compound Preparation Time (A32-ZW) was added, and the DUR/PPS Level of Effort (474-8E) is no longer supported for compound preparation time. In section “*Transmission Examples*”, subsection “*Compounded Rx Billing -Transaction Code B1 (01) – Coordination of Benefits Scenario*” the Compound Preparation Time (A32-ZW) and values for Compound Preparation Cost for Other Amount Claimed Submitted Qualifier (479-H8) and Other Amount Paid Qualifier (564-J3) were added. Example “*Billing with Compound Preparation Time and Other Amount Claimed*”, the Compound Preparation Time (A32-ZW) and values for Compound Preparation Cost for Other Amount Claimed Submitted Qualifier (479-H8), Other Amount Paid Qualifier (564-J3), and Other Payer Amount Paid Qualifier (342-HC) were added to this section.

Section “*Transmission Examples*”, “*Eligibility Medicare Part D to Facilitator - Request*”, “*Scenario 6 – Adjusted Request to Scenario 5*” the Date of Service (401-D1) was August 1, 2006. It was supposed to be November 1, 2006 per the text. It has been corrected.

In the Controlled Substance Reporting transaction, a “Note” on the Purchaser Segment inadvertently referenced the Patient Segment. It has been corrected to Purchaser Segment. In the matrices, Help Desk Phone Number Qualifier was inadvertently identified as (550-7F). It has been corrected to (549-7F). In various places the designation “N***R***” or “Q***R***” were missing an asterisk. It has been corrected.

Reject Code (511-FB) value “70” was modified from “Product Service ID Not Covered” to “Product/Service Not Covered – Plan/Benefit Exclusion” and value “MR” was modified from “Drug Not On Formulary” to “Product Not on Formulary”. Section “*Appendix G Two Way Communication to Increase the Value of On-Line Messaging*” and “*Transmission Examples*” were updated with the modified description. Value “MR “ was also added to Appendix G.

In section “*Request Segment Matrices by Field within Segment*” shading was inadvertently missing from not used cells in the Coordination of Benefits/Other Payments Segment for Eligibility Verification and Predetermination of Benefits. Shading was also corrected in the Prescriber Segment and the DUR/PPS Segment in the Prior Authorization Reversal (Claim/Service) and Prior Authorization Inquiry. Shading was also corrected in the Response Claim Segment in a Controlled Substance Reporting Reversal for Rejected/Rejected cells.

In section “*Response Insurance Segment (Information Reporting) (Transmission Accepted/Transaction Approved)*” rows marked “N” (Not used) were inadvertently designated with “S” (Situational) instead of “N”.

In this appendix in subsection Version C.4 changes, Submission Clarification Code (420-DK) was noted with new values. The list was incorrect. The External Code List is correct; just this list in the appendix was incorrect. The corrected statement is:

- 14 = Long Term Care Leave of Absence - The pharmacist is indicating that the cardholder requires a short-fill of a prescription due to a leave of absence from the Long Term Care (LTC) facility.
- 15 = Long Term Care Replacement Medication - Medication has been contaminated during administration in a Long Term Care setting.
- 16 = Long Term Care Emergency box (kit) or automated dispensing machine – Indicates that the transaction is a replacement supply for doses previously dispensed to the patient after hours.
- 17 = Long Term Care Emergency supply remainder - Indicates that the transaction is for the remainder of the drug originally begun from an Emergency Kit.
- 18 = Long Term Care Patient Admit/Readmit Indicator - Indicates that the transaction is for a new dispensing of medication due to the patient's admission or readmission status.

- 951 -

In the Information Reporting Reversal diagrams, the Patient Segment was inadvertently included. The Patient Segment is not used in this transaction. In the matrices, Prior Authorization Reversal response matrix, the Response Coordination of Benefits/Other Payers Segment was inadvertently cited. This segment is not used and has been modified to shaded.

35.5 VERSION D.4

References to "Net Amount Due" were modified to "net amount due" as this is a calculation, not an actual field exchanged. Sections that discuss "net amount due" have added clarification for coordination of benefits processing:

"Pricing Segment", "Prescription Claim Request Formula" and "Service Claim Request Formula"

"Prescription and Service Pricing Formulae"

"Frequently Asked Questions", "Calculate Net Amount Due" – the response now points back to the above sections.

"Prescription and Service Pricing Formulae" was modified as noted below. "Pricing Segment", "Prescription Claim Request Formula" and "Service Claim Request Formula" was modified in similar sections.

FROM:

Question: What Are The Prescription And Service Pricing Formulae?

Response:

Prescription Formula Claim Request:

Ingredient Cost Submitted (409-D9)
+ Dispensing Fee Submitted (412-DC)
+ Incentive Amount Submitted (438-E3)
+ Other Amount Claimed Submitted (480-H9)
+ Flat Sales Tax Amount Submitted (481-HA)
+ Percentage Sales Tax Amount Submitted (482-GE)

= Gross Amount Due (430-DU)
- Patient Paid Amount Submitted (433-DX)
- Other Payer Amount Paid (431-DV)
(Result is net amount due)

Note: Net amount due as defined above is applicable to primary and COB claims in which Other Payer Amount Paid (431-DV) is submitted. Net amount due for COB claim billings for Other Payer-Patient Responsibility Amount equals sum of the parts of other payer-patient responsibility amount(s).

Net amount due for Coordination of Benefit (COB) Claims:

For COB claims net amount due must be calculated using the "Other Payer" fields within the Coordination of Benefits/Other Payments Segment.

- If the COB processing is based on "Other Payer Amount Paid", then net amount due is calculated as noted above and all applicable Other Payer Amount Paid values are summarized to determine the amount the provider has already been (or will be) paid for the claim.
- If the COB processing is based on "Other Payer Patient Responsibility Amounts", the net amount due is the *sum of* the 'payable components of the Other Payer Patient Responsibility values provided from the LAST payer.

As noted in section *"Specific Segment Discussion", "Response Segments", "Response Pricing Segment", "Healthcare Reimbursement Account (HRA), Health Savings Accounts (HSAs), and Healthcare Flexible Spending Account (FSA)", Scenario 2B-2:Secondary Insurance Pays the Detailed Patient Responsibility Claim Resulting in Reduced Patient Responsibility* – if the COB payer is not paying all components of the prior Patient Responsibility Amounts, the unpaid components must be sent back for the patient to pay or the claim must be rejected.

Prescription Formula Response:

Ingredient Cost Paid (506-F6)
+ Dispensing Fee Paid (507-F7)
+ Incentive Amount Paid (521-FL)
+ Other Amount Paid (565-J4)
+ Flat Sales Tax Amount Paid (558-AW)
+ Percentage Sales Tax Amount Paid (559-AX)

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

- Patient Pay Amount (505-F5)
- Other Payer Amount Recognized (566-J5)

= Total Amount Paid (509-F9)

Service Claim Request Formula:

Professional Service Fee Submitted (477-BE)
+ Flat Sales Tax Amount Submitted (481-HA)
+ Percentage Sales Tax Amount Submitted (482-GE)
+ Other Amount Claimed Submitted (480-H9)

= Gross Amount Due (430-DU)
- Patient Paid Amount Submitted (433-DX)
- Other Payer Amount Paid (431-DV)
(Result is net amount due)

Note: Net amount due as defined above is applicable to primary and COB services in which Other Payer Amount Paid (431-DV) is submitted. Net amount due for COB service billings for Other Payer-Patient Responsibility Amount equals sum of the parts of other payer-patient responsibility amount(s).

Net amount due for Coordination of Benefit (COB) Claims:

For COB claims net amount due must be calculated using the "Other Payer" fields within the Coordination of Benefits/Other Payments Segment.

- If the COB processing is based on "Other Payer Amount Paid", then net amount due is calculated as noted above and all applicable Other Payer Amount Paid values are summarized to determine the amount the provider has already been (or will be) paid for the claim.
- If the COB processing is based on "Other Payer Patient Responsibility Amounts", the net amount due is the *sum* of the 'payable components of the Other Payer Patient Responsibility values provided from the LAST payer.

As noted in section "*Specific Segment Discussion*", "*Response Segments*", "*Response Pricing Segment*", "*Healthcare Reimbursement Account (HRA)*", "*Health Savings Accounts (HSAs)*", and "*Healthcare Flexible Spending Account (FSA)*", *Scenario 2B-2: Secondary Insurance Pays the Detailed Patient Responsibility Claim Resulting in Reduced Patient Responsibility*— if the COB payer is not paying all components of the prior Patient Responsibility Amounts, the unpaid components must be sent back for the patient to pay or the claim must be rejected.

Service Response Formula:

Professional Service Fee Paid (562-J1)
+ Flat Sales Tax Amount Paid (558-AW)
+ Percentage Sales Tax Amount Paid (559-AX)
+ Other Amount Paid (565-J4)
- Patient Pay Amount (505-F5)
- Other Payer Amount Recognized (566-J5)

= Total Amount Paid (509-F9)

TO

Prescription And Service Pricing Formulae

Question: What Are The Prescription And Service Pricing Formulae?

Response:

The purpose of the formulae is to provide clarification on how providers should balance the claim submission and how processor/payers should determine the 'net' value that is being billed. This is critical in coordination of benefits (COB) scenarios since the Pricing Segment contains values 'as if' the claim was primary and the Other Payer values are contained in the Coordination of Benefits/Other Payments Segment.

Prescription Formula Claim Request:

Ingredient Cost Submitted (409-D9)
+ Dispensing Fee Submitted (412-DC)
+ Incentive Amount Submitted (438-E3)
+ Other Amount Claimed Submitted (480-H9)

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

+ Flat Sales Tax Amount Submitted (481-HA)
+ Percentage Sales Tax Amount Submitted (482-GE)

= Gross Amount Due (430-DU)
- Patient Paid Amount Submitted (433-DX)
- Other Payer Amount Paid (431-DV)

(Result is net amount due)

Net amount due as defined above is applicable to primary and/or COB claims in which Other Payer Amount Paid (431-DV) is submitted (further clarification below for COB).

For Coordination of Benefit (COB) claims net amount due must be derived using the "Other Payer" fields within the Coordination of Benefits/Other Payments Segment.

- If COB processing is based on "Other Payer Amount Paid" the processor should determine what **has been paid** by prior payers. This is accomplished by summarizing 'like' Other Payer Amount Paid dollars across prior payers and then using these values against 'like' contractual amounts to reduce that liability for the current payer.
 - o This means drug benefit dollars paid should be used to reduce drug benefit dollars that would be paid if primary; delivery dollars paid would reduce delivery dollars if such contractual agreement exists, etc.
 - o If delivery is not part of the agreement with the COB payer, the dollars paid for delivery cannot be used to reduce drug benefit costs since provider has the obligation to provide the service.

Once the applicable Other Payer Amount Paid dollars have been properly summarized, net amount due is the result of the calculation noted above.

- If COB processing is based on "Other Payer Patient Responsibility Amounts", the net amount due is the **sum of** the payable components of the Other Payer Patient Responsibility values from the **last** payer as determined by Other Payer Coverage Type (338-5C) (i.e., Primary, Secondary, etc.) that returned a **paid** response. When reimbursement is based on the Other Payer Patient Responsibility Amount, Basis of Reimbursement Determination (522-FM) value 14 would be returned on the response.

14	Other Payer-Patient Responsibility Amount - Indicates reimbursement was based on the Other Payer-Patient Responsibility Amount (352-NQ).
----	--

As noted in section "Specific Segment Discussion", "Response Segments", "Response Pricing Segment", "Healthcare Reimbursement Account (HRA), Health Savings Accounts (HSAs), and Healthcare Flexible Spending Account (FSA)", Scenario 2B-2: Secondary Insurance Pays the Detailed Patient Responsibility Claim Resulting in Reduced Patient Responsibility" – if the COB payer is not paying all components of the prior Patient Responsibility Amounts, the unpaid components must be sent back for the patient to pay or the claim must be rejected.

Prescription Formula Response:

Ingredient Cost Paid (506-F6)
+ Dispensing Fee Paid (507-F7)
+ Incentive Amount Paid (521-FL)
+ Other Amount Paid (565-J4)
+ Flat Sales Tax Amount Paid (558-AW)
+ Percentage Sales Tax Amount Paid (559-AX)
- Patient Pay Amount (505-F5)
- Other Payer Amount Recognized (566-J5)

= Total Amount Paid (509-F9)

Service Claim Request Formula:

Professional Service Fee Submitted (477-BE)
+ Flat Sales Tax Amount Submitted (481-HA)
+ Percentage Sales Tax Amount Submitted (482-GE)
+ Other Amount Claimed Submitted (480-H9)

= Gross Amount Due (430-DU)
- Patient Paid Amount Submitted (433-DX)
- Other Payer Amount Paid (431-DV)
(Result is net amount due)

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

Net amount due as defined above is applicable to primary and/or COB claims in which Other Payer Amount Paid (431-DV) is submitted (further clarification below for COB).

For Coordination of Benefit (COB) claims net amount due must be derived using the "Other Payer" fields within the Coordination of Benefits/Other Payments Segment.

- If COB processing is based on "Other Payer Amount Paid" the processor should determine what **has been paid** by prior payers. This is accomplished by summarizing 'like' Other Payer Amount Paid dollars across prior payers and then using these values against 'like' contractual amounts to reduce that liability for the current payer. Once the applicable Other Payer Amount Paid dollars have been properly summarized, net amount due is the result of the calculation noted above.
- If COB processing is based on "Other Payer Patient Responsibility Amounts", the net amount due is the **sum of** the payable components of the Other Payer Patient Responsibility values from the **last** payer as determined by Other Payer Coverage Type (338-5C) (i.e., Primary, Secondary, etc.) that returned a **paid** response. When reimbursement is based on the Other Payer Patient Responsibility Amount, Basis of Reimbursement Determination (522-FM) value 14 would be returned on the response.

14	Other Payer-Patient Responsibility Amount - Indicates reimbursement was based on the Other Payer-Patient Responsibility Amount (352-NQ).
----	--

As noted in section "Specific Segment Discussion", "Response Segments", "Response Pricing Segment", "Healthcare Reimbursement Account (HRA), Health Savings Accounts (HSAs), and Healthcare Flexible Spending Account (FSA)", Scenario 2B-2:Secondary Insurance Pays the Detailed Patient Responsibility Claim Resulting in Reduced Patient Responsibility" – if the COB payer is not paying all components of the prior Patient Responsibility Amounts, the unpaid components must be sent back for the patient to pay or the claim must be rejected.

Service Response Formula:

Professional Service Fee Paid (562-J1)
+ Flat Sales Tax Amount Paid (558-AW)
+ Percentage Sales Tax Amount Paid (559-AX)
+ Other Amount Paid (565-J4)
- Patient Pay Amount (505-F5)
- Other Payer Amount Recognized (566-J5)

= Total Amount Paid (509-F9)

Section "Response Processing Guidelines", "Pricing Guidelines (Claim/Service)", "Patient Financial Responsibility (Claim)" and "Patient Financial Responsibility (Service)" clarification has been added that Patient Pay Amount (505-F5) must always be returned as well as any non-zero component fields. Return of zero value component fields is situational as defined in the implementation guide. For example:

26.2.4 Patient Financial Responsibility (Claim)

When the patient is expected to pay 100% of processor determined amount as total claim reimbursement, the response must contain:
Patient Pay Amount (505-F5) plus any of the applicable Patient Responsibility fields included in this amount:

Change to:

Patient Pay Amount (505-F5) must always be returned as well as any non-zero component fields. Return of zero value component fields is situational as defined in the implementation guide.

In the examples, zero suppression has been applied. In other examples, the zero value fields may be included when necessary for clarification of the calculation.

Section "Response Pricing Segment", "Patient Pay Amount (505-F5) Formula" has also been clarified.

The above formula must be followed and the component fields returned on a response if the Patient Pay Amount (505-F5) is other than zero.

Change to

Patient Pay Amount (505-F5) must always be returned as well as any non-zero component fields. When the patient pay amount is 100%, the response must contain Patient Pay Amount (505-F5) plus any of the ~~applicable~~ non-zero component Patient Responsibility fields included in this amount. Otherwise, return of zero value component fields is situational as defined in the implementation guide.

And

(Note, the fields are not shown in the actual signed format.)

Change to

(Note, the fields are not shown in the actual signed format. Total Amount Paid (509-F9) and Patient Pay Amount (505-F5) are required. Other component fields containing zero amounts are situational as defined in the implementation guide)

Version F6

- 955 -

And in Example #2, Patient Pay Amount should be 20.00 instead of 49.88.

Where appropriate for rejections, the following guidance was noted - See “Appendix A – Reject Codes for 511-FB” in the NCPDP *External Code List* for guidance on the use of reject codes.

In the chart for Coordination of Benefits/Other Payments Segment (Claim Rebill), the Internal Control Number (993-A7) row was switched with Other Payer Date (443-E8). It has been corrected.

35.6 VERSION D.5 SEPTEMBER 2010

Patient Country Code (A43-1K) was added.

In some of the transaction charts, Help Desk Phone Number Qualifier (549-7F) situation had a typo that referred to the Number as (550-F8) instead of (550-8F) – “Required if Help Desk Phone Number (550-8F) is used.” This has been corrected.

Section “*Transmission Examples*”, some examples were corrected to remove Quantity Prescribed (460-ET) which was incorrectly included. Controlled Substance Reporting transactions show “Q” fields rather than “O” fields.

The offset of the Clinical Information Counter subfields were indented for more visual note to the reader.

The following verbiage inadvertently appeared in Notes on Response Claim Segment on a Prior Authorization Request And Billing Response (Rejected). The information appears correctly in Notes on Response Coordination of Benefits/Other Payers Segment on a Prior Authorization Request And Billing Response (Rejected).

1. If the identity of the patient is partially verified and the Prior Authorization Request And Billing is rejected due to a non-match of field verification, then the Other Payer information is not sent.
2. If the Prior Authorization Request And Billing is rejected because it should be submitted to other payer(s) first, that Other Payer information should be sent, if known.
3. If the Prior Authorization Request And Billing is rejected due to benefit design limitations, then subsequent Other Payer information should be sent, if known.

If the Prior Authorization Request And Billing rejects for other reasons than above, Other Payer information is not sent.

If additional payer(s) for this patient is not known, the Other Payer information is not sent.

If additional payer(s) for this patient is known, the following may be sent:

- Other Payer ID (340-7C) and Other Payer ID Qualifier (339-6C),
- Other Payer Group ID (992-MJ),
- Other Payer Processor Control Number (991-MH),
- Other Payer Cardholder ID (356-NU).

In addition, if any of the following three fields are sent:

- Other Payer Processor Control Number (991-MH),
- Other Payer Cardholder ID (356-NU),
- Other Payer Group ID (992-MJ),

then the Other Payer ID (340-7C) and Other Payer ID Qualifier (339-6C) must be sent.

An editorial correction was made to Product/Service ID (407-D7) that had the exact same note as Product/Service ID Qualifier (436-E1). “Mandatory. Must contain the Product/Service ID (436-E1) value from original Billing.” This was corrected to “Mandatory. Must contain the Product/Service ID (407-D7) value from original Billing.”

35.7 VERSION D.6 DECEMBER 2010

Benefit Stage fields were added to Medicare Part D examples in section “*Transmission Examples*”.

Veterinary Use Indicator (A45-1R) was added to Controlled Substance Reporting (General) transaction – Patient Segment only.

A new function of the Information Reporting transactions was added when the pharmacy identifies Section 340B status after providing service and is required by trading partner agreement to alert the payer. Fields and segments affected with specific 340B instructions have the nomenclature of “Not allowed to be used for 340B determination processing” or “When reported for 340B determination.” or search on “340B”. See section “*Information Reporting Information*” and “*Appendix F 340B Information Reporting Flow*”.

A typo was corrected. Response Claim Segment (Medicaid Subrogation Claim Billing or Encounter) (Transmission Accepted/Transaction Paid) table had “Response Insurance Segment” in the table heading. It has been changed to “Response Claim Segment”.

Version F6

- 956 -

Typos were corrected in section "Transmission Examples", "Billing – Transaction Code B1 – Coordination of Benefits Scenario Pharmacy Bills To Secondary Which Meets Designation As Government Payer , Patient Requests Brand".

351-NP	OTHER PAYER-PATIENT RESPONSIBILITY AMOUNT QUALIFIER	R	01-05	Amount Applied to Periodic Deductible (517-FH) as reported by previous payer Amount of Copay (518-FI) as reported by previous payer.
351-NP	OTHER PAYER-PATIENT RESPONSIBILITY AMOUNT QUALIFIER	R	0711	Amount of Coinsurance (572-4U) as reported by previous payer. Amount Attributed to Product Selection/Brand Non-Preferred Formulary Selection (136-UN) as reported by previous payer

And the Note was added:

136-UN	AMOUNT ATTRIBUTED TO PRODUCT SELECTION/BRAND NON-PREFERRED FORMULARY SELECTION	Q	250{	\$25.00 Note: Product selection cost is NOT being paid by the secondary payer, but they are returning this for patient to pay.
--------	--	---	------	---

In section "Additional Message Information Fields":

The raw data free text message for Example 2

"HELP DESK TO ASSIST WITH QUESTIONS. ASK FOR SHELLY SMITH." was changed to

"HELP DESK TO ASSIST WITH QUESTIONS."

"ASK FOR SHELLY SMITH."

And the readable was modified to two lines.

HELP DESK TO ASSIST WITH QUESTIONS.

ASK FOR SHELLY SMITH.

The raw data free text message for Example 3

"PRIOR AUTHORIZATION EXPIRATION 12/31/200+7. FOR CONTINUATION OF SERVICE, CONTACT+ PRESCRIBER." was changed to

"PRIOR AUTHORIZATION EXPIRATION 12/31/200" + "7. FOR CONTINUATION OF SERVICE, CONTACT " + "PRESCRIBER."

The raw data free text message for Example 5

"NEXT AVAILABLE FILL DATE = 12/31/2007 WIT+H PRIOR AUTHORIZATION EXPIRING" was changed to

"NEXT AVAILABLE FILL DATE = 12/31/2007 WI" + "TH PRIOR AUTHORIZATION EXPIRING"

A new "Example 6: Two Free Text Messages" was added.

35.8 VERSION D.7

The Coupon Segment was inadvertently omitted from the Prior Authorization Request And Billing transaction. It has been added.

Patient Phone Number (326-CQ) has been changed from "Not used" to "Required if necessary for state/federal/regulatory agency programs" in the Controlled Substance Reporting (General), Controlled Substance Reporting Reversal (General), and Controlled Substance Reporting Rebill (General) transactions.

Question "Other Amount Paid (565-J4) and COB" was added to section "Response Pricing Segment".

Section "Other Payer Coverage Type (338-5C) is Unknown" has been added to section "Response Coordination of Benefits/Other Payers Segment".

Section "Response Patient Segment" has been modified from

28.2.2 RESPONSE PATIENT SEGMENT

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

- 957 -

This segment is used for Medicare Part D Eligibility transactions to provide patient name and date of birth in order to provide additional patient information. This information could assist in the verification that the eligibility information returned is indeed the patient for which the eligibility request was intended.

This segment is returned only when the patient has had Medicare Part D eligibility at some point within the Facilitator's files and within the search parameters established. The data returned is based on information within the Facilitator's files and not on information sent on the Eligibility Request.

Patient First Name (310-CA) – will contain the first name of the patient as known on the Facilitator's files.

Patient Last Name (311-CB) - will contain the last name of the patient as known on the Facilitator's files.

Date of Birth (304-C4) - will contain the birth date of the patient as known on the Facilitator's files.

to

28.2.2 RESPONSE PATIENT SEGMENT

This segment is used in response transactions to return or confirm demographic information. (Refer to Matrix section for transactions used.) This information could assist in the verification that the patient information returned is indeed for the patient for whom the transaction request was intended.

An example would be multiple birth/same sex when the first name initial is the same. The entire first name would be returned to clarify.

For Medicare Part D eligibility transactions:

This segment is used for Medicare Part D Eligibility transactions to provide patient name and date of birth in order to provide additional patient information. This information could assist in the verification that the eligibility information returned is indeed the patient for which the eligibility request was intended.

This segment is returned only when the patient has had Medicare Part D eligibility at some point within the Facilitator's files and within the search parameters established. The data returned is based on information within the Facilitator's files and not on information sent on the Eligibility Request.

Patient First Name (310-CA) – will contain the first name of the patient as known on the Facilitator's files.

Patient Last Name (311-CB) - will contain the last name of the patient as known on the Facilitator's files.

Date of Birth (304-C4) - will contain the birth date of the patient as known on the Facilitator's files.

In Medicaid ID Number (115-N5), the first situation has been clarified from "Required, if known, for Claim Billing/Encounter Request Transactions when a patient has Medicaid coverage" to "Required, if known, when patient has Medicaid coverage and Medicaid ID has not been provided in Cardholder ID (302-C2)." (*The second situation did not change.*)

Section "Long Term Care Transition, Emergency Fill and Change in level of Care Messaging for Rejected and Paid Claims" has been updated to include new guidance of August 27, 2010 from CMS ("Background"). Also removed the Reject Codes table from "CMS Transition Guidance in Summary", updated section "When Prior Authorization ID (498-PY) Required" and "Transition and Safety-Related Rejects" to use the Approved Message Code instead of Reject Codes.

For Special Packaging Indicator (429-DT), Submission Clarification Code (420-DK), Approved Message Code(548-6F), and Reject Code (511-FB) - new values were added to the NCPDP **External Code List**.

Appendix B "Revision Information" – the chart for the different versions was removed and guidance included to the *Standards Matrix*.

Section "Transmission Examples", some Medicare examples were corrected. The value "TXMEDICAID" in Medigap ID (359-2A) should have been removed and the state added with the use of the Medicaid Indicator (360-2B). Provider Accept Assignment Indicator (361-2D) was added.

- "Billing – Transaction Code B1 with Additional Documentation Segment"
- "Billing – Transaction Code B1 with Facility Information"
- "Billing – Transaction Code B1 with Additional Documentation and Facility Information"
- "Billing – Transaction Code B1 with Narrative Information"
- "Billing – Transaction Code B1 with Facility Information and Narrative Information"
- "Billing – Transaction Code B1 with Additional Documentation and Narrative Information"

35.9 VERSION D.8

For Information Reporting (Claim) and Information Reporting Rebill (Claim), the statement "Not allowed to be used for 340B determination processing" was removed from Dispensing Status (343-HD). The Compound Segment has been added to Information Reporting (Claim) and Information Reporting Rebill (Claim) as appropriate, but restricted for 340B program reporting only.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

- 958 -

Example “Billing – Transaction Code B1 – Coordination of Benefits Scenarios Pharmacy Bills To Insurance Designated By Patient” inadvertently listed Quantity Dispensed (442-E7) twice and in one subsection was missing Dispense As Written (408-D8).

Example “Billing - Transaction Code B1 - COB Scenario - Pharmacy Bills Reporting Amount Paid by Previous Payer Only”, “Secondary Response – Paid”, Basis of Reimbursement Determination (522-FM) was listed twice. The row with value 14 has been deleted.

35.10 VERSION D.9

The situation on Other Payer Reject Code (472-6E) has been clarified from “Required when the payer in this occurrence has denied the payment for the billing, designated with Other Coverage Code (308-C8) = 3 (Other Coverage Billed – claim not covered)” to “Required when the payer in this occurrence has denied the payment for the billing.” The reference to Other Coverage Code value of 3 caused an assumption that Other Coverage Code must be 3.

In each section “Notes on Coordination of Benefits/Other Payments Segment on a...”, a reference was made to see section “Other Coverage Code (308-C8)”.

In the Other Coverage Code section, the Description for value 4 and 8 were modified slightly to match the External Code List. The table was also updated to add the OPAP, OPPRA, and Reject Codes columns.

The field Next Available Fill Date (B04-BT) was added to the Response Status Segment. The field is allowed to be used in Claim Billing, Claim Rebill, Predetermination of Benefits, and Prior Authorization Request And Billing transaction rejected responses. The Version D Editorial document has guidance for the relaying of Next Available Fill Date in versions prior to D.9 by using the Additional Message Information area.

Response Status Segment		
Field	Field Name	Mandatory or Situational
B04-BT	NEXT AVAILABLE FILL DATE	S

This sentence was removed from section “Additional Message Information Fields”.

While the Additional Message Information Qualifier (132-UH) is defined to allow a maximum of 25 occurrences per transaction, there are only 9 qualifier values initially defined and each qualifier may only occur one time per transaction, this results in a maximum count of 9 occurrences until more values are defined in the NCPDP *External Code List* (ECL).

A 10/2011 SNOMED ROUTE OF ADMINISTRATION UPDATE has been added to Appendix H Route of Administration Transition in the Telecommunication Standard Implementation Guide.

35.11 VERSION E.0 JANUARY 2013

The situation on Other Payer Coverage Type (338-5C) has been clarified to include all three of the groupings clearly identified. From
Grouped with Other Payer ID Qualifier (339-6C), Other Payer ID (340-7C), Other Payer Date (443-E8), and either Other Payer Amount Paid Count (341-HB) and its grouping, or Other Payer Reject Count (471-5E) and its grouping.
to
Grouped with Other Payer ID Qualifier (339-6C), Other Payer ID (340-7C), Other Payer Date (443-E8), and either Other Payer Amount Paid Count (341-HB) and its grouping, **Other Payer-Patient Responsibility Amount Count (353-NR) and its grouping**, or Other Payer Reject Count (471-5E) and its grouping. **See section “Repetition and Multiple Occurrences”, “Repeating Data Elements”, “Request Segments”, “Coordination of Benefits/Other Payments Segment”.**

Example “Billing w/DUR Conflicts –Transaction Code B1”, response “Billing w/Information DUR Accepted Response- Paid” was corrected from “Provider has opted” to “Processor/payer has opted...”

The values for Additional Documentation Type ID (369-2Q) were updated in the External Code List, with some values sunsetted. This affected examples using the Additional Documentation Segment. The following examples have been updated:

- "Billing – Transaction Code B1 with Additional Documentation Segment"
- "Billing – Transaction Code B1 with Facility Information"
- "Billing – Transaction Code B1 with Additional Documentation and Facility Information"
- "Billing – Transaction Code B1 with Narrative Information"
- "Billing – Transaction Code B1 with Facility Information and Narrative Information"
- "Billing – Transaction Code B1 with Additional Documentation and Narrative Information"

Typographical errors were found on the chart headings for Medicaid Subrogation (such as "Response Claim Segment (Medicaid Subrogation Claim Billing or Encounter) (Transmission Accepted/Transaction Rejected)" table heading "Response Insurance Segment" should be "Response Claim Segment", or "Response Claim Segment (Medicaid Subrogation Claim Reversal) (Transmission Accepted/Transaction Approved)" table heading should be "Response Claim Segment"). These have been corrected.

In section "Structured Messages" there were typographical errors in some Additional Message Information Qualifier (132-UH) comments when the value was greater than 1 - "Used for first line of free form text with no pre-defined structure." The comment should have been "second" "third" "fourth" etc. These have been corrected.

Section "Specific Segment Discussion", subsection "Request Segments" subsection "Coordination of Benefits/Other Payments Segment" added subsection "Other Coverage Code (308-C8) to Submit When One Other Payer Has Paid \$0?" and "Government Payer Assumption on \$0 as Allowed Amount?". Subsection "Other Coverage Code (308-C8) to Submit When One Other Payer Has Paid \$0?" is also referenced in section "Character Set Designation Truncation", subsection "Dollar Truncation".

In section "Healthcare Flexible Spending Account (FSA)", subsection "Scenario 2A" Pharmacy Bills Secondary Insurance – HRA used in Primary Payment", the statement "When Other Coverage Code > 8" has been corrected to "When Other Coverage Code = 8".

Section "Structure Quick Reference", enhancements were made to include the Segment Identification, and the maximum field size for each data element on the charts.

"Appendix G Two Way Communication to Increase the Value of On-Line Messaging" added Reject Code "608" (Step Therapy, alternate drug therapy required prior to use of submitted product service ID) additional guidance.

To support standardization, the following modifications were made:

- Authorized Representative First Name (498-PE) size changed from x(12) to x(35).
- Authorized Representative Last Name (498-PF) size changed from x(15) to x(35).
- Authorized Representative Street Address (498-PG) was sunsetted.
 - o Authorized Representative Street Address Line 1 (B13-7D) was added.
 - o Authorized Representative Street Address Line 2 (B14-8B) was added.
- Employer Street Address (316-CG) was sunsetted.
 - o Employer Street Address Line 1 (B15-8D) was added.
 - o Employer Street Address Line 2 (B16-7G) was added.
- Employer Contact Name (321-CL) was sunsetted.
 - o Employer Contact First Name (B17-7H) was added.
 - o Employer Contact Last Name (B18-7J) was added.
- Employer Telephone Number Extension (B19-7K) was added.
- Patient Phone Number (326-CQ) was renamed to Patient Telephone Number (326-CQ).
- Prescriber Phone Number (498-PM) was renamed to Prescriber Telephone Number (498-PM).
- Prescriber First Name (364-2J) size was changed from x(12) to x(35).
- Prescriber Last Name (427-DR) size was changed from x(15) to x(35).
- Prescriber Street Address (365-2K) was sunsetted.
 - o Prescriber Street Address Line 1 (B27-7U) was added.
 - o Prescriber Street Address Line 2 (B28-7V) was added.
- Prescriber Telephone Number Extension (B26-7T) was added.
- Primary Care Provider Last Name (470-4E) size was changed from x(15) to x(35).
- Help Desk Phone Number Qualifier (549-7F) was renamed to Help Desk Telephone Number Qualifier (549-7F).
- Help Desk Phone Number (550-8F) was renamed to Help Desk Telephone Number (550-8F). The size was modified from x(18) to x(10).

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

- Help Desk Telephone Number Extension (B22-7P) was added.
- Other Payer Help Desk Phone Number (127-UB) was renamed to Other Payer Help Desk Telephone Number (127-UB).
- Other Payer Help Desk Telephone Number Extension (B23-7Q) was added.
- Facility Name (385-3Q) size changed from x(30) to x(70).
- Facility Street Address (386-3U) was sunsetted.
 - o Facility Street Address Line 1 (B20-7M) was added.
 - o Facility Street Address Line 2 (B21-7N) was added.
- Patient Street Address (322-CM) was sunsetted.
 - o Patient Street Address Line 1 (B08-7A) was added.
 - o Patient Street Address Line 2 (B09-7B) was added.
- Pay to Name (120-TU) size changed from x(20) to x(70).
- Pay To Street Address (121-TV) was sunsetted.
 - o Pay To Street Address Line 1 (B24-7R) was added.
 - o Pay To Street Address Line 2 (B25-7S) was added.
- Purchaser First Name (596-YZ) size was changed from x(12) to x(35).
- Purchaser Last Name (597-Y0) size was changed from x(15) to x(35).
- Purchaser Street Address (598-Y1) was sunsetted.
 - o Purchaser Street Address Line 1 (B29-7W) was added.
 - o Purchaser Street Address Line 2 (B30-7X) was added.
- Service Provider Street Address (584-YM) was sunsetted.
 - o Service Provider Street Address Line 1 (B31-7Y) was added.
 - o Service Provider Street Address Line 2 (B32-7Z) was added.
- Service Provider Name (583-YK) size was changed from x(30) to x(70).

For all Address Line 2 fields that are used, the following situational note was added.

Use only when a second address line is needed and [specific] Street Address Line 1 (xxx-xx) has been used.

“Appendix H. Route of Administration Transition” is no longer needed and has been marked “Appendix H. Intentionally Left Blank”.

Diagnosis Code Qualifier (492-WE) – constrained value “00” (Not Specified), sunsetted values “06” (Medi-Span Product Line Diagnosis Code), “08” (First DataBank Disease Code (FDBDX)), “09” (First DataBank FML Disease Identifier (FDB DxID)) and “99” (Other) in the NCPDP **External Code List**.

DUR Co-Agent ID Qualifier (475-J9) – sunsetted value “22” (Medi-Span Product Line Diagnosis Code) in the NCPDP **External Code List**.

In the NCPDP **External Code List**, Prescription Origin Code (419-DJ) modified value 5 description to “Pharmacy - This value is used to cover any situation where a new Rx number needs to be created from an existing valid prescription such as traditional transfers, intrachain transfers, file buys, software upgrades/migrations, and any reason necessary to “give it a new number.” This value is also the appropriate value for “Pharmacy dispensing” when applicable such as BTC (behind the counter), Plan B, **established protocols, pharmacists authority to prescribe**, etc”.

35.12 **VERSION E.1 JANUARY 2013**

Any Examples containing Diagnosis Code (424-DO) of ICD with decimal have removed the decimal. Per the ICD owner - for transaction/submission of the codes the decimal is **not** included in the code.

Compound Ingredient Quantity (448-ED) was increased from 9(7)v999 (10 digits) to 9(7)v9999999 (14 digits).

New qualifier code values to represent Medication Administration Fee were added to the following fields:

Other Amount Claimed Submitted Qualifier (479-H8) in Pricing Segment on claim from the provider

Other Amount Paid Qualifier (564-J3) in the Response Pricing Segment on the payment to the provider

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

Other Payer Amount Paid Qualifier (342-HC) in the Coordination of Benefits/Other Payments Segment on a subsequent claim to a further payer
Example “COB Billing Excerpt with Other Amount Claimed Submitted (480-H9) for Medication Administration” was added.

The value description for Other Payer Amount Paid Qualifier (342-HC) “05” (Incentive) to remove the reference to vaccine administration.

Added link to NCPDP *Emergency Preparedness* document in section “Document Scope”.

35.13 **VERSION E.2 APRIL 2013**

Consistency was made in field names to be “ZIP/Postal Code”, “State/Province Address”.

The following fields were added:

- Service Provider Country Code (A93-1T)
- Prescriber Country Code (B42-3C)
- Authorized Representative Country Code (B34-1U)
- Employer Country Code (B35-1V)
- Facility Country Code (B37-1X)
- Patient ID Associated Country Code (B38-1Y)
- Pay To Country Code (B39-1Z)
- Prescriber Alternate ID Associated Country Code (B40-3A)
- Prescriber ID Associated Country Code (B41-3B)
- Purchaser ID Associated Country Code (B43-3D)

Section “PPS Processing” removed the table of DUR/PPS Level of Effort (474-8E) and pointed to the NCPDP *External Code List*.

The situation “Not used for multi-ingredient compounds” was added to Unit of Measure (600-28) for Claim Billing, Rebill, PA Request And Billing, Controlled Substance Reporting, Information Reporting (Claim and Rebill).

Percentage Sales Tax Basis Submitted (484-JE) and Percentage Sales Tax Basis Paid (561-AZ) situations changed in service billing from “Not used” to the same as claim billings.
Professional Service Fee Contracted/Reimbursable Amount (B33-6G) was added.

35.14 **VERSION E.3 OCTOBER 2013**

Support for REMS (Risk Evaluation & Mitigation Strategies) and PDMP (Prescription Drug Monitoring Program) processing was added. Modifications include:

- Additions to section “Participants” in section “Business Environments”.
- Additions to section “Introduction” in section “Business Functions”.
- Additions to sections
 - o “Claim Billing or Encounter Information”
 - o “Service Billing Information”
 - o “Prior Authorization Information”
 - o “Controlled Substance Reporting Information”
- The addition of the Intermediary Segment in the request of the following transactions.
 - o Claim Billing or Encounter
 - o Service Billing
 - o Claim Rebill
 - o Service Rebill
 - o Prior Authorization Request And Billing
 - o Controlled Substance Reporting (Regulated Non-Prescription Product)
 - o Controlled Substance Reporting (General)
 - o Controlled Substance Reporting Rebill (Regulated Non-Prescription Product)
 - o Controlled Substance Reporting Rebill (General)

B54-8T	RESPONSE INTERMEDIARY AUTHORIZATION ID	S***R***	x(20)
B51-8Q	INTERMEDIARY MESSAGE	S***R***	x(200)

This segment is variable length.

- The sunseting of fields.
 - o Intermediary Authorization Type ID (463-EW)
 - o Intermediary Authorization ID (464-EX)

In section "Appendix C. What is the 11 digit format for an NDC, UPC, or HRI?" the link in section "National Health Related Item Codes (NHRIC or HRI)" was updated to <http://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/Databases/ucm161456.htm>

35.15 **VERSION E.3 FEBRUARY 2014**

Response Intermediary Segment (Segment Identification value 30) was changed to value 36 due to an editorial correction.

35.16 **VERSION E.4 JANUARY 2014**

Section “*Reversal Information*” was clarified for the correct back out order with the addition of “*Coordination of Benefit Reversals*”.

For Medicare Part D Eligibility Verification transactions, sections were updated to include general information, to allow specifics to the program that may change to be cited in other documentation than in this standard. In section “*Eligibility Verification Information*”, subsection “*Medicare Part D Eligibility*”, the section on “*Business Rules...*” added subsections “*Date of Service*”, “*Other Health Insurance Information*” and removed “*Matching Logic*”. Sections “*Response Patient Segment (Eligibility Verification)....*” removed the specific Date of Service logic statements. Sections “*Response Coordination of Benefits/Other Payers Segment (Eligibility Verification)....*” removed the **For Medicare Part D Eligibility Transactions returned by a CMS certified Eligibility Facilitator** paragraph. Section “*Response Segments*”, subsection “*Response Patient Segment*” removed the **For Medicare Part D eligibility transactions** paragraph. Since in the above sections, references to a CMS phone number were deleted, the CMS phone number situations noted in Help Desk Telephone Number (550-8F) and Help Desk Telephone Number Extension (B22-7P) were removed.

For Medicare Part D Eligibility Transactions returned by a CMS certified Eligibility Facilitator, the Help Desk Telephone Number (550-8F) will always reflect the CMS phone number.

For Medicare Part D Eligibility Transactions returned by a CMS certified Eligibility Facilitator, the Help Desk Telephone Number Extension (B22-7P) will always reflect the CMS phone number extension.

In section “*Transmission Examples*” Eligibility Verification examples that were specific to Medicare Part D have been moved to the Version D Editorial document to allow the examples to change as the Part D program changes. “*Eligibility Medicare Part D to Facilitator – Request*” (and Response) for Scenarios 1-4 and 6 have been updated and moved to the Version D Editorial document. Scenario 5 was deleted.

35.17 **VERSION E5 APRIL 2014**

Section “*Version Identification System*” was clarified. The legacy method of maintaining two character version/release or version/subversion identifiers and separation of the two characters with a decimal point in publications for the Telecommunication and related Standards no longer holds the meaning that it once did before the implementation of the External Code List. This version reflects the removal of the decimal point.

Section “*Appendix C What is the 11 digit Format for an NDC, UPC, or HRI?*” subsection “*National Health Related Item Codes (NHRIC or HRI)*” was updated to include the five digit labeler code information and an example.

Section “*Appendix G Two Way Communication to Increase the Value of On-Line Messaging*” was moved to the Editorial Document.

Support for the Last Known 4Rx Segment was added. It is used in the Eligibility Verification transaction.

Last Known 4Rx Segment (Segment Identification value 37)			
Field	Field Name	Mandatory or Situational	Field Format (Variable Length)
111-AM	SEGMENT IDENTIFICATION	M	x(2)
B56-3E	LAST KNOWN BIN NUMBER	M	9(6)
B57-3F	LAST KNOWN PROCESSOR CONTROL NUMBER	M	x(10)
B58-3G	LAST KNOWN GROUP ID	S	x(15)
B59-3H	LAST KNOWN CARDHOLDER ID	M	x(20)
B60-3J	YEAR OF LAST PAID CLAIM	M	9(4)
B61-3K	MONTH OF LAST PAID CLAIM	M	9(2)

This segment is variable length.

Home Plan (314-CE) is no longer supported due to lack of use.

35.18 VERSION E6 OCTOBER 2014

The verbiage before the chart and the chart in section "[Other Coverage Code \(308-C8\)](#)" has been modified.

From:

This table lists the situations stated for the Claim Billing/Encounter environment. These rules also apply to other transactions that use the Other Coverage Code (308-C8) in similarly defined situations.

	This is a code representing a summation of other coverage information that has been collected from other payers. The claim subsequent columns provide rules for which values to use in summation.		Claim Billing/Encounter: - Required if other payer has approved payment for some/all of the billing. - Zero (0) is a valid value. - Not used for patient financial responsibility only billing. - Not used for non-governmental agency programs if Other Payer-Patient Responsibility Amount (352-NQ) is submitted.	Claim Billing/Encounter: - Required if necessary for patient financial responsibility only billing. - Required if necessary for state/federal /regulatory agency programs. - Not used for non-governmental agency programs if Other Payer Amount Paid (431-DV) is submitted.	Claim Billing/Encounter: - Required when the other payer has denied the payment for the billing. - Note: This field must only contain the NCPDP Reject Code (511-FB) values.
Value	Description	COB Segment	OPAP	OPPRA	Reject Codes
0	Not specified by patient	No	n/a	n/a	n/a
1	No other coverage	No	n/a	n/a	n/a
2	Other coverage exists/billed-payment collected	Yes	Governmental / Non-Governmental Receiver of Claim Required from at least one payer and at least one payer value must be other than zero. In the case of multiple payers, OPAP (even if zero) must be submitted for all payers who paid.	Non-Governmental Receiver of Claim No Governmental Receiver of Claim Required for all payers who paid	For OCC 2 one payer had to pay the claim with a receivable to pharmacy. OTHER payers may have rejected so Reject Codes are required for those billed who did reject.
3	Other Coverage Billed – claim not covered	Yes	No	No	ALL payers must have rejected so <u>each</u> payer should be represented by individual payer loops containing Reject codes
4	Other coverage exists-payment not collected	Yes	Governmental / Non-Governmental Receiver of Claim Required from at least one payer however anyone who paid should have done so with OPAP of zero (100% copay). When submitted with OCC 4, OPAP (as zero) must be submitted.	Non-Governmental Receiver of Claim No Governmental Receiver of Claim Required for all payers who paid	For OCC 4 one payer had to pay the claim with a pharmacy receivable of zero. OTHER payers may have rejected so Reject Codes are required for those billed who did reject.
8	Claim is billing for patient financial responsibility only	Yes	No Not used for patient financial responsibility only billing.	Required for all payers who paid	For OCC 8 one payer had to pay the claim. OTHER payers may have rejected so Reject Codes are required for those billed who did reject.

To:

Code indicating whether or not the patient has other insurance coverage.

- This is a code representing a summation of the claim adjudication results from other coverage/other payers.
- The specific Other Coverage Code value submitted is based on the COB Method required by the COB payer and the previous payer's response.
- The COB Method cannot be switched based on payment values from prior payers.
- The "Usage/Segment/Clarification" column provides rules for which values to use in summation.
- The COB method columns indicate which field in the COB segment and associated value(s) correlate to the specific Other Coverage Code value submitted.

Value	Description	Usage and Segment/Clarification	COB/Other Payments Segment	COB Method 1-OPAP: Other Payer Amount Paid (431-DV)	COB Method 2-OPPRA: Other Payer Patient Responsibility Amount (352-NQ)	COB Method 3-Government COB: Other Payer Amount Paid (431-DV) and	All COB Methods - Previous Payer Returned a Rejected Response: Other Payer Reject Code (472-6E)
-------	-------------	---------------------------------	----------------------------	---	--	---	---

Version F6

January 2020

OFFICIAL RELEASE

Copyrighted Materials - See Copyright Statement for Allowed Use

						Other Payer Patient Responsibility Amount (352-NQ)	
0	Not specified by patient		No	N/A	N/A	N/A	N/A
1	No other coverage	Used when the provider has exhausted all means of determining pharmacy benefit coverage and no other coverage was identified. This value must not be used as a default.	No	N/A	N/A	N/A	N/A
2	Other coverage exists/billed-payment collected	Used when Total Amount Paid (509-F9) from a prior payer is greater than zero. If multiple payers have been billed and at least one has paid with Total Amount Paid (509-F9) greater than zero, Other Coverage Code will be 2 regardless of additional payer responses.	Yes	431-DV value for at least one previous payer must be greater than zero. 431-DV value(s) must be submitted for all payers who returned a paid response, even if payment is less than or equal to zero.	N/A	431-DV value from at least one previous payer must be greater than zero. 431-DV value(s) must be submitted for all payers who returned a paid response, even if payment is less than or equal to zero. 352-NQ value(s) must be submitted for all payers who returned a paid response.	OCC 2: At least one previous payer returned a paid response with a Total Amount Paid (509-F9) value greater than zero. 472-6E value(s) must be submitted for all other payers who returned a rejected response.
3	Other Coverage Billed – claim not covered	Used when all previous payers have returned a rejected response. Other Payer Reject Codes (472-6E) would reflect the reject code returned by the previous payer(s).	Yes	N/A	N/A	N/A	OCC 3: All previous payers must have returned a rejected response. Reject codes returned by each previous payer would be represented in the Other Payer Reject Code fields of the applicable COB occurrence in the COB Segment.
4	Other coverage exists/billed-payment not collected	Used when multiple payers have been billed and none have returned Total Amount Paid (509-F9) greater than zero, but at least one has returned Total Amount Paid less than or equal to zero. Other Coverage Code will be 4 regardless of any additional payer rejections.	Yes	431-DV value(s) for at least one previous payer must be equal to or less than zero and no other 431-DV value can be greater than zero. 431-DV value(s) must be submitted for all payers who returned a paid response, even if payment is less than or equal to zero.	N/A	431-DV value(s) for at least one previous payer must be equal to or less than zero and no other 431-DV value can be greater than zero. 431-DV value(s) must be submitted for all payers who returned a paid response, even if payment is less than or equal to zero. 352-NQ value(s) must be submitted for all payers who returned a paid response.	OCC 4: At least one previous payer returned a paid response with a Total Amount Paid (509-F9) value equal to or less than zero and no other 509-F9 value(s) can be greater than zero. 472-6E value(s) must be submitted for all other payers who returned a rejected response.
8	Claim is billing for patient financial responsibility only	Used when the claim is billing for other payer patient responsibility amount(s), defined as COB Method 2 within the plan's payer sheet. Other Payer Patient Responsibility Amount(s)	Yes	N/A	352-NQ value(s) must be submitted for all payers who returned a paid response. The components of patient pay or the Patient Pay Amount (505-F5) returned by the previous payer(s) are represented in the Other	N/A	OCC 8: At least one previous payer returned a paid response. 472-6E value(s) must be submitted for all other payers who returned a rejected response.

		(352-NQ) are submitted with OCC 8. Other Payer Amount Paid (431-DV) values are not submitted with OCC 8 When the payer sheet designates COB Methods 1 or 3, the payer cannot conditionally request OCC 8 be submitted with the Other Payer Patient Responsibility Amount (352-NQ) based on the previous payer's Total Amount Paid (509-F9) value (e.g.: 509-F9 < \$0). COB methods 1 and 3 use OCC 2 or 4 based on the previous payers' Total Amount Paid (509-F9) values.			Payer Patient Responsibility Amount fields.		
--	--	--	--	--	---	--	--

Benefit Stage Amount (394-MW) definition was modified to "The amount of claim allocated to the Medicare Part D benefit stage, allocated to other Medicare benefit, or paid by an alternative benefit coordinated with or by the responding Medicare Part D payer as identified by the 'Benefit Stage Qualifier' (393-MV)."

DUR/PPS Level Of Effort (474-8E) values were clarified in the NCPDP *External Code List*.

Section "Explicit Hyphens" was removed. It stated:

In the Version D and above standards, only the Employer ID (333-CZ) field will contain an explicit hyphen. All other hyphens are implied.

This guide supports printable characters as shown in section "[Alphanumeric](#)". Any new fields specify explicit format limitations/requirements in the Data Dictionary. Employer ID (333-CZ) currently has explicit format requirements provided in the dictionary.

35.19 **VERSION E7 JULY 2015**

Multiple transactions within a transmission has been removed. Only one transaction per transmission is supported.

Corrected the Section 25.1 chart by removing the support of a "P" (Paid) or a "D" (Duplicate of Paid) from the Information Reporting and Information Reporting Rebill transactions as it was no longer supported as of Version D0.

The following fields were added to the Response Claim Segment. The fields are provided for informational purposes only on an accepted/paid or duplicate of paid.

FIELD	NAME OF FIELD	DEFINITION OF FIELD	FIELD FORMAT
B87-3P	Quantity Limit Per Specific Time Period Count	Count of quantity limit per specific time period.	9(1)
B88-3R	Quantity Limit Per Specific Time Period	Maximum quantity allowed over the designated time period.	9(7)v999
B89-3S	Quantity Limit Time Period	Number of days to which the maximum quantity is allowed.	9(5)
B90-3T	Days Supply Limit Per Specific Time Period Count	Count of days supply limit per specific time period.	9(1)
B91-3W	Days Supply Limit Per Specific Time Period	Maximum days supply allowed over the designated time period.	9(3)

FIELD	NAME OF FIELD	DEFINITION OF FIELD	FIELD FORMAT
B92-3X	Days Supply Limit Time Period	This is an informational field to convey the maximum days supply over a set number of days for this medication.	9(5)

The Response Prior Authorization Segment is now available on the B1, S1, B3, and S3 transactions. The Prior Authorization Expiration Date (498-PT) is allowed to be returned when the date is known.

35.20 **VERSION E8 JANUARY 2016**

Addition of Reconciliation ID to the Response Status Segment. Value is required to be assigned by the processor on 'APPROVED' transactions (Paid, Captures, Duplicate of Paid, Duplicate fo Capture, Approved, Duplicate of Approved). Value must be unique within a processor.

Addition of Reconciliation ID to the Claim Segment for use on Reversal submissions so the Originator can identify the specific transaction to be reversed.

FIELD	NAME OF FIELD	DEFINITION OF FIELD	FIELD FORMAT
B98-34	Reconciliation ID	A Unique Identifier Assigned By The Processor For Captured/Paid/Duplicate/Accepted Transactions, That Provides A Means To Identify That Transaction Should Any Subsequent Transaction Or Other Associated Activity Occur.	X(30)

- 968 -

The Provider First Name (B96-4A) and Provider Last Name (B97-4M) data elements were added to the Pharmacy Provider Segment. These new fields are used for Workers' Compensation to report the provider responsible for the dispensing as required by state regulation.

A Facility ID Qualifier (B95-3Z) was added to the Facility Segment. The qualifier will be used to identify the type of id used in the Facility ID.

The Submission Clarification Code (420-DK) was increased to 3 bytes and the limitation on the Submission Clarification Code Count (354-NX) was removed. Sections [Submission Clarification Code Count](#) and [Transaction Level](#) were modified as well as the impacted transaction message segments.

The length of the field Formulary ID (926-FF) was increased to 40 characters.

The Original Manufacturer Product ID (C01-4N) and Original Manufacturer Product ID Qualifier (C02-4P) data elements were added to the Claim Segment. These new fields are used by jurisdictions or payers that require the original manufacturer product ID of the drug that was repackaged be submitted.

35.22 *VERSION E9 JULY 2018 REPUBLICATION*

Corrected the field length and data type of Prior Authorization ID Submitted (462-EV) and Prior Authorization ID Assigned (498-PY)

35.23 *VERSION EB APRIL 2017*

The Transmission Examples section was removed from the guide and placed in a separate document called *Telecommunication Standard VEB Transmission Examples*.

The Coupon Segment has been eliminated. For additional details, refer to [Notable Changes From Previous Telecommunication Versions](#).

As of Version E8 and higher the Telecommunication Standard will only support a single transaction per transmission. With that change, there is no value in continuing to use the Group Separator field as its sole purpose was to separate data sets that applied to multiple transactions. As of this version (EB), the Group Separator field has been eliminated. The Group Separator field is used for Version E9 and lower.

Added a situation to Compound Type (996-G1) to support Workers' Compensation/Property and Casualty statute/regulation.

The Special Packaging Indicator (429-DT) was increased by 1 byte.

The Adjudicated Payment Type (A28-ZR) field name was changed to Adjudicated Program Type and the definition was changed. The field format was changed from numeric to alphanumeric, the length increased from 2 characters to 3 characters and the field limitation was also changed. The situational rule was modified and the field is now allowed on a rejected response. The field can also be used in additional transaction response types - D1, S1, S3 accepted responses and B1, B3, D1, P1, P3, S1, S3 rejected responses.

The name of the Response Coordination of Benefits/Other Payers Segment was changed to Response Other Payers Segment.

The Other Payer ID Count was changed from 3 to 9 to align with the count of other payers for a claim billing request.

The references to Coordination of Benefits was removed from the situations in the Response Other Payers segment. The removal allows the segment to be used to report other payers which may be mutually exclusive to the plan/benefit returning the response.

Other Payer Adjudicated Program Type (C47-9T) was added to the Coordination of Benefits/Other Payments and Response Other Payers segments.

The situations for the Other Payer Benefit Effective Date and the Other Payer Benefit Termination Date were modified and the Response Other Payers Segment guidance was also updated for rejected transactions for all transactions except the Eligibility transaction.

Other Payer Reconciliation ID (C49-9V) was added to the Coordination of Benefits/Other Payments Segment.

Due to the business need for other payers besides Medicare Part D to use Benefit Stages and to address supplemental payers unable to require Medicare Part D benefit stage information, the following actions were taken: Sunset the Benefit Stage Fields (Request and Response) – Benefit Stage Count (392-MU), Benefit Stage Qualifier (393-MV), and Benefit

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

- 969 -

Stage Amount (394-MW) and the associated reject codes. Two new fields were created, Benefit Stage Indicator Count (C50-9W) and Benefit Stage Indicator (C51-9X). The Benefit Stage Indicator (C51-9X) ECL values were modified to distinguish Medicare Part D values.

The name of the Reported Payment Type (A29-ZS) was changed to Reported Adjudicated Program Type. The field format was changed from numeric to alphanumeric, the length increased from 2 characters to 3 characters.

The Coordination of Benefits/Other Payments Segment is now allowed to be submitted on an Information Reporting claim, service, claim rebill and service rebill transaction.

The Other Payer BIN Number (990-MG), Other Payer Processor Control Number (991-MH), Other Payer Cardholder ID (356-NU), and Other Payer Group ID (992-MJ) were deleted from the Insurance Segment. These fields were only used in Information Reporting transactions. New fields were created to accommodate the information and added to the N Transaction Payer Identification Segment.

The Transaction Reference Number (880-K5) was removed from the claim segment and added to the N Transaction Payer Identification Segment.

A new segment, N Transaction Payer Identification, was created. The segment is used in the Information Reporting Claim/Service/Rebill (Claim/Service)/Reversal (Claim/Service) transactions. The segment contains the N Payer BIN (C52-9Y), N Payer Processor Control Number (C53-9Z), N Payer Cardholder ID (C54-AA), N Payer Group ID (C55-AB), N Payer Adjudicated Program Type (C48-9U), N Transaction Source Type (C56-AC) and N Transaction Reconciliation ID (C57-AD). The intent of the new segment is to place information relevant to the payer for which the Information Reporting transaction is being generated into one segment.

The Appendix "What is the 11 digit Format for an NDC, UPC, or HRI?" has been removed. The information is available in the *Product Identifiers Standard Implementation Guide*.

The Controlled Substance Reporting, Reversal, and Rebill transactions (C1, C2, and C3) were removed. A separate NCPDP Controlled Substance Standard and Implementation Guide based on the Telecommunication syntax will be developed. This change was needed to keep pace with the yearly changes in state and/or federal controlled substance reporting requirements.

The Compound Product ID (489-TE), DUR Co-Agent ID (476-H6), Generic Equivalent Product ID (126-UA), Originally Prescribed Product/Service Code (445-EA), Preferred Product ID (553-AR), and Product/Service ID (407-D7) field lengths were increased to 40 characters.

The Intermediary ID Relationship Code (B50-8P) was removed from the Intermediary Segment.

The Percentage Tax Rate Paid (560-AY) and Percentage Sales Tax Rate Submitted (483-HE) field formats were changed to unsigned numeric.

Clarification was added on the use of zeros and dollar fields.

The situation of use for the Quantity Prescribed (460-ET) was updated for Claim Billing, Claim Rebill, and PA Request and Billing (Claim) transactions.

Clarification was added on the use of Fill Number (403-D3) and Number of Refills Authorized (415-DF). Refer to the *Data Dictionary* and *External Code List* for changes to the definition and value descriptions for Fill Number (403-D3).

Information from the *Version D.0 Editorial Document* was added to the Prescriber Segment Specific Segment Discussion.

Frequently Asked Questions from this document were incorporated into the main body of this document. Partial Fill Assumptions and Recommendations, Use of Compound Fields, Diagram for Transmission of a Prior Authorization Inquiry Transaction, Response Header Segment and Prior Authorization Request and Billing Information sections were updated.

The Response Pricing Segment was reorganized. Three additional fields were added – Patient Pay Component Count, Patient Pay Component Qualifier and Patient Pay Component Amount. The following fields were sunset from the segment: 523-FN Amount Attributed To Sales Tax, 517-FH Amount Applied To Periodic Deductible, 518-FI Amount Of Copay, 520-FK Amount Exceeding Periodic Benefit Maximum, 571-NZ Amount Attributed To Processor Fee, 572-4U Amount Of Coinsurance, 129-UD Health Plan-Funded Assistance Amount, 133-UJ Amount Attributed To Provider Network Selection, 134-UK Amount Attributed To Product Selection/Brand Drug, 135-UM Amount Attributed To Product Selection/Non-Preferred Formulary Selection, 136-UN Amount Attributed To Product Selection/Brand Non-Preferred Formulary Selection, and 137-UP Amount Attributed To Coverage Gap.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.

- 970 -

A Pricing Guidelines Section was added. This change will provide a single location within the Telecommunication Implementation Guide where comprehensive response processing and pricing guidelines will reside. This documentation is intended to support streamlined research, standardization of implementation and mitigate duplication of information or potential conflicts in guidance. Existing Response Processing and Pricing Guidelines were moved to this section. Version D.0 Editorial Document FAQs related to Response Processing or Pricing were transcribed and added to this section.

The Compound Preparation Time (A32-ZW) was removed from the Compound Segment.

Three new fields were added to support compounds – Compound Level of Complexity (C60-AG), Preparation Environment Type (C99-KU), and Preparation Environment Event Code (C98-KT).

Three new fields were added to address the claim requirements in the LTPAC qualified Environment – LTPAC Dispense Frequency (C91-KK), LTPAC Billing Methodology (C90-KH), and Number of LTPAC Dispensing Events (C92-KM). The use of the LTPAC Dispense Frequency replaces the short cycle Submission Clarification Code values.

A new field, Prescriber DEA Number(D01-KV), was added to the Prescriber Request Segment to support the submission of the Prescriber's DEA Number for controlled substance claims.

The Submission Clarification Code Count (354-NX) has been modified to support 5 codes per transaction.

Clarification was added for the processing of Medicare Part D Information Reporting (N3) transactions to the Rebill section and Appendix C.

A new segment, Response Other Benefit Detail, was added to the Eligibility (E1) transaction. The segment was added to support CMS' enhancements to the eligibility data being provided to the Transaction Facilitator for Medicare Part D beneficiaries. As a result of this new segment, the CMS Low Income Cost Sharing (LICS) Level (138-UQ) was deleted from the standard and the Medicaid ID Number and the Medicaid Agency Number are situational used in an E1 response when the transmission is accepted and the transaction is approved.

Removed the reference to the Prior Authorization Number Submitted External Code List values from the Emergency Preparedness Information in the Document Scope.

Added two fields, Benefit Type Opportunity Count (C59-AF) and Benefit Type Opportunity(C58-AE), to the Response Claim Segment to provide additional information on the patient's benefit. This was done to promote transparency of plan benefit information allowing the patient to take advantage of areas of their plan benefit they may been unaware of.

Four fields used to provide contact information to the entity receiving the response, (549-7F) Help Desk Telephone Number Qualifier, (550-8F) Help Desk Telephone Number, (B22-7P) Help Desk Telephone Number Extension and (987-MA) URL were removed from Status Segment. A new grouping of fields was added to the Response Status segment to allow comprehensive communication of Help Desk Contact information that can be directed to the pharmacy or other receiving entity for coordination of applicable actions, Help Desk Support Type Count, Help Desk Support Type, Help Desk Business Unit Type Count, Help Desk Business Unit Type, Help Desk Contact Information Qualifier, Help Desk Contact Information, and Help Desk Contact Information Extension.

A new grouping of Intermediary Help Desk Contact fields were added to the Response Intermediary segment to allow comprehensive communication of help desk contact information that can be directed to the pharmacy or other receiving entity for coordination of applicable actions.

The Payer ID Qualifier (568-J7) and Payer ID (569-J8) fields were restructured to allow multiple identifiers to be returned on a single transaction response; and the field names were changed to accommodate the identification of an entity that may not be the payer. These changes will support the identification of the health plan's contract ID (e.g., Medicare Part D Contract ID) as well as any other existing payer ID values.

A new field, Total Prescribed Quantity Remaining (D02-KW) was added to the Request Claim Segment. The field is only used for controlled substances. The field will allow processors to identify the accumulated prescribed quantity remaining.

35.24 **VERSION EB JULY 2018 REPUBLICATION**

Corrected the field length and data type of Prior Authorization ID Submitted (462-EV) and Prior Authorization ID Assigned (498-PY)

35.25 **VERSION EB AUGUST 2018 REPUBLICATION**

Section 14.4.1.2.7 – Added the notation of repeating fields to Patient Pay Component Qualifier (C95-KQ) and Patient Pay Component Amount (C93-KN)

Section 25.2.2 - Added the notation of repeating fields to Patient Pay Component Qualifier (C95-KQ) and Patient Pay Component Amount (C93-KN)

35.26 **VERSION F2 OCTOBER 2017**

The Medicaid Subrogation Standard was developed to accommodate the transmission of claims data between Medicaid agencies and suspected other payers to facilitate recovery of funds that Medicaid should not have paid. The Medicaid Subrogation Standard was developed using the Batch and Telecommunication Standard as its basis and added a few fields to accommodate some additional information required for this process. Due to the growing number of situations where a payer/processor has paid a claim and subsequently determined that another payer was actually responsible for payment, stakeholders asked for a standardized solution to facilitate pharmacy claims subrogation for all payers. The Medicaid Subrogation Standard was modified to support all payer types and as a result of those changes, the following changes were made to this guide.

- A new field, Subrogation Amount Requested (D14-KX), was added to the Pricing Segment.
- Medicaid Paid Amount (113-N3) was deleted from the standard
- A new field, Subrogation Requestors Reconciliation ID (D15-KY), was added to the Response Claim Segment.
- Medicaid Subrogation Internal Control Number/Transaction Control Number (ICN/TCN) (114-N4) was deleted from the standard.
- Situations were modified in the Insurance, Patient, Claim, Pricing, Response Insurance, and Response Claim Segments to support standardized subrogation.
- Table Designations were modified to remove Medicaid from the Subrogation explanation.

Revised the Place of Service (307-C7) situation on the B1/B3, S1/S3, P1/P4, D1 and E1 transactions.

Added Section 7.2.6 Syntax Errors. The information contained in this section was transferred from the *Telecommunication Version D and Above Questions, Answers, and Editorial Updates* Document.

The situational rules were modified in the paid response for the B1, B3, P1, and P3 transactions for the Payer/Health Plan ID Qualifier (568-J7) and Payer/Health Plan ID (569-J8) fields.

Added two fields, Submission Type Code Count (D16-KZ) and Submission Type Code (D17-K8) to the Claim Segment. The purpose of the fields are to identify the type of submission as needed for appropriate transaction processing. The Submission Type Code (D17-K8) is originally populated with the three values that were removed from the Submission Clarification Code (420-DK).

A new field, Do Not Dispense Before Date (D18-K9), was added to the Claim Segment to support providers writing multiple, one month prescriptions for C-11s as well as state requirements on the number of days a patient has to fill a controlled substance from the date written.

Days Supply Limit Per Specific Time Period Count (B90-3T), Days Supply Limit Per Specific Time Period (B91-3W), Days Supply Limit Time Period (B92-3X), Quantity Limit Per Specific Time Period Count (B87-3P), Quantity Limit Per Specific Time Period (B88-3R) and Quantity Limit Time Period (B89-3S) were deleted from the standard. The functionality was replaced with the Maximum and Remaining Amount field groupings in the Claim Response Segment.

In order to support the identification of plan benefit parameters, the following fields were added to the Response Claim Segment for the B1, B3, S1, S3, D1, P1, P3 and P4 transactions.

931-F8	Maximum Age Qualifier

936-GG	Maximum Amount Time Period Start Date
938-GJ	Maximum Amount Time Period Units
D25-M7	Remaining Amount Qualifier
D24-M6	Remaining Amount

The fields Multiple Prescription/Service Order Group ID(D21-M3) and Multiple Prescription/Service Order Group Reason Code (D22-M4) were added to the Claim Segment to indicate the reason why multiple prescriptions for the same patient are being grouped together. This enhancement allows the pharmacy to initiate specific actions based on the order group reason associated to the grouped prescriptions. Section 27.1.9.2 was added to provide examples and guidance on implementation.

Existing data element, Plan Name (600-96), was added to the Response Insurance Additional Information Segment and a new field, Other Payer Name (D23-M5), was added to the Response Other Payers Segment in order to accommodate the addition of Plan information that was added to the E1 transaction Response Other Benefit Detail Segment.

A new COB Processing Guidelines section was added. COB information which was included in other sections was moved to this new section. In addition, information from the Version D,0 Editorial Document was incorporated.

Field 101-A1 was changed from BIN Number to IIN Number and was increased by 2 bytes. The Header Segment was reorganized and the new order is Version/Release Number (102-A2), Transaction Code (103-A3) and then IIN Number (101-A1). All other fields remain in their same order. With the increase in size of the IIN Number, the Header Segment is now a fixed length segment of 58 bytes. Fields N Payer BIN(C52-9Y) and Last Known BIN Number (B56-3E) will also have their name changed by replace BIN with IIN and the field length will increase to 8 bytes. All references have been changed from BIN to IIN.

A definition of a compound prescription claim was added to Section 27.1.11 – Request Compound Segment.

Clarification on the Facility identified in the Facility Segment was added. This segment does not identify the dispensing pharmacy.

The explanation of Informational Only in the Table Designations was modified.

Changed the names of the following fields from Preferred Product.... To Formulary Alternative

551-9F	Formulary Alternative Product Count
552-AP	Formulary Alternative ID Qualifier
553-AR	Formulary Alternative ID
554-AS	Formulary Alternative Incentive
555-AT	Formulary Alternative Cost Share Incentive
556-AU	Formulary Alternative Description

Added eight new fields to the Response Claim Segment to support the identification of the reason for formulary alternatives and the identification of required treatment.

D42-PV	Formulary Alternative Plan Benefit Tier
D43-PZ	Formulary Alternative Reason Code
D44-PO	Formulary Alternative Required Therapy Indicator Count
D45-P1	Formulary Alternative Required Therapy Indicator
D46-P2	Formulary Alternative Required Therapy Time Period Qualifier
D47-P3	Formulary Alternative Required Therapy Time Period Duration

D48-P4	Formulary Alternative Required Therapy Time Period Start Date
D49-P5	Formulary Alternative Required Therapy Time Period End Date

Three new fields, Plan Benefit Override Indicator (D54-RC), Plan Benefit Override Value Count (D55-RD), and Plan Benefit Override Value (D56-RF) were added to the Response Claim Segment. These new fields were added to communicate plan benefit restrictions that can be overridden based on professional judgement and the use of specific request fields and associated values. This plan benefit detail must be associated to the claim response and returned in designated fields so that pharmacy systems can trigger the appropriate workflow actions for expected outcomes. Electronic communication of these plan benefit parameters will reduce calls to provider help desks, where this same information is verbally provided today. Leveraging the standard to communicate this detail will expedite patient access to care, lower administrative costs and facilitate compliance with plan policies.

The Prescriber Place of Service (D57-RG) was added to the Prescriber Segment. The code identifies where the patient encounter occurred as reported by the prescriber.

The Other Payer Benefit Classification (D50-P6) was added to the Response Other Payers Segment. As ACO's and health care interoperability expand to improve patient outcomes, payers and intermediaries supporting patient eligibility information may have access to all patient benefit classifications e.g. prescription, medical, behavioral, dme, dental, etc. While the other payer adjudicated program type identifies the specific program e.g.: Medicaid, Medicare, commercial, etc., these same program types often apply to the different benefit classifications. Access to the other payer benefit classification will allow the pharmacy provider to determine what actions to take.

The Other Payer ID (340-7C) field length was changed from 10 to 30 characters. The length was increased to accommodate a payer/carrier name.

The Coordination of Benefits/Other Payments Count (337-4C) was reduced to a maximum count of 3. Reducing the count to align with actual business cases will support industry compliance, allow for efficiency in claims processing and patient eligibility verification, reduce calls to provider help desks, as well as mitigate unnecessary claim rejections that would occur due to attempts to submit claims to inappropriate other payer information returned on a response.

The Other Payer ID Count (355-NT) was reduced to a maximum count of 4 for claim, service and prior authorization response transactions. The maximum count of 9 for eligibility response transactions is unchanged.

The field name of Patient Paid Amount Submitted (433-DX) changed to Patient Pay Amount Reported. Refer to the *Data Dictionary* for the change in definition. The field usage situations were modified for Subrogation and B1/B3/D1/P1 and Nx Reporting transactions. S1/S3 transactions no longer support this field.

A new datatype of ECS (Email Character Set) was added to the standard. The Patient E-Mail Address (350-HN) character designation was modified to this new datatype.

The Response Other Benefit Detail Segment was renamed to Response Other Related Benefit Detail Segment. The segment was also modified by adding 16 fields to support commercial insurance benefits and to build in flexibility to support future benefit details.

D26-M8	Other Benefit Count
D40-PN	Other Benefit Type Code
D34-MZ	Other Benefit Effective Date
D39-NN	Other Benefit Termination Date
729-TA	State/Province Address
D38-N9	Other Benefit Type ID
D35-N1	Other Benefit Facility Name
D36-N7	Other Benefit Facility Telephone Number
D37-N8	Other Benefit Detail Information Count
D32-MS	Other Benefit Detail Information Qualifier
D27-MK	Other Benefit Detail Information
D28-MM	Other Benefit Detail Information Effective Date
D33-MX	Other Benefit Detail Information Termination Date
D31-MR	Other Benefit Detail Information Provider Number

D29-MN	Other Benefit Detail Information Facility Name
D30-MP	Other Benefit Detail Information Facility Telephone Number

A new field, Other Payer Relationship Type (D41-PQ), was added to the Response Other Payers Segment. The field was designated as mandatory. In addition the Other Payer Benefit Classification (D50-P6) and Other Payer Adjudicated Program Type (C47-9T) were also changed to mandatory data elements in the Response Other Payers Segment. The combination of these fields along with the Other Payer Coverage Type (338-5C) provides the appropriate information to the pharmacy provider to manage the other payer information.

The name of the Tax Exempt Indicator (557-AV) field was changed to Percentage Tax Exempt Indicator.

The name of the Percentage Sales Tax Amount Submitted (482-GE) field was changed to Percentage Tax Amount Submitted.

The name of the Percentage Sales Tax Rate Submitted (483-HE) field was changed to Percentage Tax Rate Submitted.

The name of the Percentage Sales Tax Basis Submitted (484-JE) field was changed to Percentage Tax Basis Submitted.

The name of the Percentage Sales Tax Amount Paid (559-AX) field was changed to Percentage Tax Amount Paid.

The name of the Percentage Sales Tax Basis Paid (561-AZ) field was changed to Percentage Tax Basis Paid.

The name of the Percentage Sales Tax Rate Paid (560-AY) field was changed to Percentage Tax Rate Paid.

The name of the Flat Sales Tax Amount Submitted (481-HA) field was changed to Regulatory Fee Amount Submitted.

The name of Flat Sales Tax Amount Paid (558-AW) field was changed to Regulatory Fee Amount Paid.

The name of Basis Of Calculation – Flat Sales Tax (348-HK) was changed to Basis Of Calculation-Regulatory Fee.

The name of Patient Sales Tax Amount (575-EQ) was changed to Patient Percentage Tax Amount.

The name of Basis of Calculation-Percentage Sales Tax (349-HM) was changed to Basis of Calculation-Percentage Tax.

Plan Sales Tax Amount (574-2Y) was removed from the standard.

Regulatory Fee Count (D60-RK) and Regulatory Fee Type Code (D61-RL) were added to the Request Pricing Segment to allow for multiple fees that can apply to a claim. The Regulatory Fee Amount Submitted (481-HA) was made a repeating field to support multiple fees.

Four new fields were added to the Coordination of Benefits/Other Payments Request Segment: Other Payer Percentage Tax Exempt Indicator(D51-P7), Other Payer Regulatory Fee Type Count (D53-P9), Other Payer Regulatory Fee Type Code (D63-RN) and Other Payer Regulatory Fee Exempt Indicator (D52-P8).

The Percentage Tax Exempt Indicator (557-AV) situation in the Response Pricing Segment was modified.

Three new fields were added to the Response Pricing Segment: Regulatory Fee Count (D60-RK), Regulatory Fee Type Code (D61-RL) and Regulatory Fee Exempt Indicator (D62-RM)

The Regulatory Fee Amount Paid (558-AW) in the Response Pricing Segment was changed to a repeating field.

The Patient Percentage Tax Amount (575-EQ) situation and designation in the Response Pricing Segment was modified.

A new field, Patient Regulatory Fee Amount (D65-RS), was added to the Response Pricing Segment.

All references to percent tax were changed to percentage tax.

The following language was added to Section Document Scope:

The NCPDP External Code List (ECL) values and descriptions are applicable to each specified ECL publication date. Since the NCPDP ECL may be updated on a quarterly basis, more current ECL publications may reflect additions, deletions and/or modifications to those values and descriptions in this document.

35.40 **VERSION F3 JANUARY 2020 REPUBLICATION**

Editorial Corrections:

- Section 10.5.1.2.9 – Table Header from Mandatory to Situational Segment
- Section 24.8.7 – Shading for “S” and “N”
- Corrected name of 389-6D Facility ZIP/Postal Code and 368-2P Prescriber ZIP/Postal Code from “Code” to “Zone”
- Section 7.13.1.2 – Corrected field identifier of Clinical Information Counter from 493-X3 to 493-XE

35.41 **VERSION F4 JANUARY 2019**

Increased all dollar fields by 3 digits except the Other Payer Patient Responsibility Amount (352-NQ) which was increased by 1 digit.

The Request Patient Segment and the Response Patient Segment were updated to include the Patient ID Count (618-RR) and the Patient ID Qualifier (331-CX) and Patient ID (332-CY) were changed to repeating data elements to support the communication and sharing of multiple universal patient identifiers from different enumerating entities on a single transaction.

Request Patient Segment

- Add Patient ID Count (618-RR) to and update Patient ID Qualifier (331-CX) and Patient ID (332-CY) from “not used” to Situational repeating fields in the Patient Segment of Eligibility Transaction; add situation of *“Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination”* to Patient ID.
- Add new situation (*“Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination”*) to Patient ID (332-CY) in Patient Segment to transactions listed below.
- Remove existing situation of use *“Required if necessary for state/federal/regulatory agency programs to validate dual eligibility”* from Patient ID (332-CY) in Patient Segment in transactions listed below.
- Update Patient ID Qualifier (331-CX) and Patient ID (332-CY) to be repeating fields for the transactions listed below.
- Add Patient ID Count (618-RR) with a maximum count of 9 to transactions listed below
Claim Billing or Encounter; Service Billing; Claim Rebill; Service Rebill; Prior Authorization Request and Billing; Prior Authorization Request Only; Information Reporting; Information Reporting Rebill
- Add Patient Segment to Prior Authorization Inquiry (including new data elements)

Response Patient Segment

- Add Patient ID Count (618-RR), Patient ID Qualifier (331-CX), Patient ID (332-CY) as situational fields to Response Patient Segment of transactions listed below. Indicate Patient ID Qualifier and Patient ID as repeating fields.
- Add situation to Patient ID (332-CY) in Response Patient Segment of transactions listed below. . *“Required when agreed upon between trading partners in order to enhance the accuracy of patient data exchange and/or to improve care or benefit coordination”*
Eligibility; Claim Billing or Encounter; Service Billing; Claim Rebill; Service Rebill; Prior Authorization Request and Billing; Prior Authorization Inquiry; Information Reporting; Information Reporting Rebill
- For Prior Authorization Request Only transaction, add Response Patient Segment (including new data elements).
- For Prior Authorization Inquiry transaction, add Response Patient Segment (including new data elements) to those transaction types (captured, approved, deferred) that currently do not use it.

All examples which contained the Patient Pay Component Qualifier (C95-KQ) values of 1 – 5 or 7 – 9 were modified by adding a preceding zero to the value.

The Prescriber DEA Number (D01-KV) situation was modified.

A new field, Species(E06-S8), was added to the Request Patient Segment to support billing for non-human species.

Patient Middle Name (E09-OC), Patient Name Suffix (E11-OE) and Patient Name Prefix (E10-OD) were added to the Request Patient Segment to keep the segment in-sync with the Prescription Drug Monitoring Programs (PDMP) Reporting Standard. These fields are not used for any transaction codes contained in this guide.

Prescriber Middle Name (E12-0F) was added to the Request Prescriber Segment to keep the segment in-sync with the Prescription Drug Monitoring Programs (PDMP) Reporting Standard. This field is not used for any transaction codes contained in this guide.

35.42 *VERSION F4 APRIL 2019 REPUBLICATION*

Section 25.2.2 – Corrected the length of the Minimum Amount Qualifier (D20-M2) from X(2) to X(3).

35.43 *VERSION F4 JULY 2019 REPUBLICATION*

530-FU name was corrected to Previous Date of Service from Previous Date of Fill

531-FV name was corrected to Quantity of Previous Dispensing from Quantity of Previous Fill

Section 7.13.1.5.8.1 - Response Intermediary Authorization Count (B52-8R) was corrected to maximum count of 9 from maximum count of 5

Section 23.3.3, 24.2.1, 24.2.2 and 24.2.3 - 323-CN name was corrected to Patient City Address from Patient City and 324-CO name was corrected to Patient State/Province Address from Patient State or Province

Section 10.4.3, 12.3.3, 14.3.3, 14.6.3, 16.2.3, 24.2.1, 24.2.2 and 24.2.3 – the designation for transmission structure was corrected from Optional ('O') to Situational ('Q' Qualified Requirement) for A43-1K Patient Country Code.

35.44 *VERSION F4 JANUARY 2020 REPUBLICATION*

Editorial Corrections:

- Section 10.5.1.2.9 – Table Header from Mandatory to Situational Segment
- Section 24.8.7 – Shading for "S" and "N"
- Corrected name of 389-6D Facility ZIP/Postal Code and 368-2P Prescriber ZIP/Postal Code from "Code" to "Zone"
- Section 7.13.1.2 – Corrected field identifier of Clinical Information Counter from 493-X3 to 493-XE

35.45 *VERSION F5 JULY 2019*

Section 5.3 – removed purchaser and service provider segment references.

Section 24.2.1, 24.2.2, 24.2.3, 24.4.1, 24.4.2, 24.4.3 – removed purchaser and service provider segments.

Section 25.1.2 - removed the purchaser and service provider segments.

The Scheduled Prescription ID Number (454-EK) was increased from 12 bytes to 30 bytes.

Editorial Corrections throughout guide:

530-FU name was corrected to Previous Date of Service from Previous Date of Fill

531-FV name was corrected to Quantity of Previous Dispensing from Quantity of Previous Fill

Section 7.13.1.5.8.1 - Response Intermediary Authorization Count (B52-8R) was corrected to maximum count of 9 from maximum count of 5

Section 23.3.3, 24.2.1, 24.2.2 and 24.2.3 - 323-CN name was corrected to Patient City Address from Patient City and 324-CO name was corrected to Patient State/Province Address from Patient State or Province

Section 10.4.3, 12.3.3, 14.3.3, 14.6.3, 16.2.3, 24.2.1, 24.2.2 and 24.2.3 – the designation for transmission structure was corrected from Optional ('O') to Situational ('Q' Qualified Requirement) for A43-1K Patient Country Code.

- Section 7.13.1.2 – Corrected field identifier of Clinical Information Counter from 493-X3 to 493-XE

35.47 **VERSION F6 JANUARY 2020**

CMS Part D Defined Qualified Facility (997-G2) was removed.

Field Name Change: From Formulary Alternative Cost Share Incentive (555-AT) to Formulary Alternative Estimated Patient Cost Share (555-AT).

Section 28.3.3 Other Payer Amount Paid (431-DV) was modified: Updated examples to include additional fields and removed some fields to improve readability and replaced Other Payer Amount Paid (431-DV) Reporting Order Chart with two new charts.

Added new field - Formulary Alternative Effective Date (E89-ZO) to the Response Claim Segment. The purpose of this new field is to aid in the proactive communication of upcoming formulary change information with both patients and prescribers, mitigating access to care and adherence risks.

Added a new segment – Response Provider Segment with two new fields: Data Source of Invalid Provider Determination (E87-ZV) and State Code For Data Source Of Invalid Provider Determination (E88-ZZ). The purpose of this new segment is to expedite the resolution and provide appropriate access to care, by providing the specific federal/state file source and the associated state code (if applicable) used to determine the point of service reject. The name of the specific data source will allow the pharmacy provider to clearly communicate to the prescriber or provider business units the conflict details and determine next steps. This may include operational and workflow actions to service the patient and/or corrective action plans.

Increased the field length from 15 characters to 35 characters for the following fields: Prescriber ID (411-DB), Primary Care Provider ID (421-DL), Associated Prescription/Service Provider ID (580-XY), Prescriber Alternate ID (A26-ZP) and Provider ID (444-E9).

Added the following new fields to the DUR/PPS RESPONSE Segment:

- DUR/DUE Co-Agent Description (E93-ZC)
- Unit Of Measure For Previous Dispensed Quantity (E94-ZA)
- Other Pharmacy ID Qualifier (E95-Z9)
- Other Pharmacy ID (E96-Z8)
- Other Pharmacy Name (E97-Z7)
- Other Pharmacy Telephone (E98-Z6)
- Other Prescriber Last Name (E99-Z5)
- Other Prescriber ID Qualifier (F01-Z4)
- Other Prescriber ID (F02-Z3)
- Other Prescriber Telephone (F03-Z2)
- DUR/DUE Compound Product ID (F04-Z1)
- DUR/DUE Compound Product ID Qualifier (F05-Z0)
- DUR/DUE Maximum Daily Dose Quantity (F06-YO)
- DUR/DUE Maximum Daily Dose Unit of Measure (F07-YL)
- DUR/DUE Minimum Daily Dose Quantity (F08-YJ)
- DUR/DUE Minimum Daily Dose Unit of Measure (F09-YI)

Modified the field name of DUR Co-Agent ID (476-H6) to DUR/DUE Co-Agent ID and DUR Co-Agent ID Qualifier (475-J9) to DUR/DUE Co-Agent ID Qualifier and added the fields to the DUR/PPS RESPONSE segment.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use

Modified the field name of DUR Free Text Message (544-FY) to DUR/DUE Free Text Message and increased the length from 30 characters to 360 characters. DUR Additional Text (570-NS) was removed.

Section 27.1.11.7 Multi-Ingredient Compounds and DUR Rejects and Section 27.2.8.1 DUR/PPS and Multi-Ingredient Compounds were deleted. Guidance will be included in the Editorial Document.

Section 27.2.8 and 38.3 were updated to address the new fields.

Section 27.2.3 Response Insurance Segment was deleted. The guidance was erroneously carried over from older versions of the standard (5.1 or earlier) and beginning with Version D.0 the Response COB/Other Payers Segment should be used to report known other payer information.

Increased the field length of Original Manufacturer Product ID (C01-4N) to 40 characters to align the length with the other Product ID fields.

The Other Payer Percentage Tax Exempt Indicator (D51-P7), Other Payer Regulatory Fee Type Count (D53-P9), Other Payer Regulatory Fee Type Code (D63-RN), and Other Payer Regulatory Fee Exempt Indicator (D52-P8) grouping was incorporated into the "Coordination Of Benefits/Other Payments Segment," "In Payment Scenarios" details (Section 7.13.1.4.1.1). Language was added within the Coordination of Benefits/Other Payments Segment section, Other Payer Coverage Type (338-5C) field, "May be grouped with the Other Payer Percentage Tax Exempt Indicator (D51-P7), the Other Payer Regulatory Fee Type Count (D53-P9) and its grouping, and/or the Benefit Stage Indicator Count (C50-9W) and its grouping, when applicable for the Other Payer."

Changed the field name of D32-MS from Other Benefit Detail Information Qualifier to Other Benefit Detail Information Indicator allowing additional business cases to be added as an Indicator within the ECL.

Deleted Other Benefit Detail Information (D27-MK). The field was initially created to prepare for future business cases where other benefit information was available. The structure of this 5 character field with the associated Other Benefit Detail Information Qualifier (D32-MS) was not beneficial as it is unknown as to what information would be returned without some type of ECL reference.

The Response Other Related Benefit Detail Segment and all associated fields was added to the Claim Billing (B1, B3), Service Billing (S1, S3), Prior Authorization Request and Billing (P1), Prior Authorization Inquiry (P3) and Pre-Determination of Benefit (D1) responses.

37 APPENDIX C USE OF INFORMATION REPORTING (N1, N2, N3) FUNCTIONALITY FOR MEDICARE PART D PROCESSING

37.1 BACKGROUND

In December 2003, Congress passed the Medicare Prescription Drug Benefit, Improvement and Modernization Act (MMA), allowing Medicare payment to Medicare Advantage organizations, Prescription Drug Plan (PDP) sponsors, Programs for the All-Inclusive Care of the Elderly (PACE) plans, and Cost Plans (Part D plans) offering coverage beginning January 2006 of prescription drugs under the new Medicare Part D benefit.

Section 1860D-2(b)(4)(D) of the Act authorizes CMS to establish procedures for the exchange of information for determining whether costs reimbursed by third parties for Part D enrollees may be included in their TrOOP and for alerting Part D sponsors about such reimbursements. The TrOOP facilitation process developed by CMS and the industry in collaboration with NCPDP allows the majority of pharmacy claims processing and benefit coordination to take place in real-time at the pharmacy point of sale. CMS' Transaction Facilitator contractor, in conjunction with CMS, is responsible for establishing procedures for facilitating eligibility queries, identifying costs being reimbursed by other payers and reporting such transactions to Part D sponsors, and facilitating the transfer of TrOOP-related data when a beneficiary changes plans during the coverage year.

37.2 INFORMATION REPORTING

The establishment of a new entity, Facilitator, to route payment information from payer-to-payer was identified and its functions defined. The Facilitator process is documented within this implementation guide and is triggered by the submission of a transaction by a pharmacy to a secondary payer. Payment information routing from the Facilitator to the PDP utilizes the Information Reporting transactions, N1, N2, and N3.

The Part D Transaction Facilitator transmits record of supplemental claims coverage information to a Part D Plan. The Transaction Facilitator process is triggered when a claim is submitted by a pharmacy and accepted by a payer supplemental to Part D. The Information Reporting transactions Information Reporting (N1), Information Reporting Reversal (N2), and Information Reporting Rebill (N3) are used in this process.

Process:

- This process begins after a Pharmacy has submitted a claim for a Part D Medicare Beneficiary to a Prescription Drug Plan (PDP). The response from the PDP provides other payer information to the Pharmacy, when available.
- Pharmacy submits prescription claim to Secondary Payer based upon the information received from the Primary Payer via a Switch and is routed to a Facilitator.
- Secondary Payer adjudicates claim.
- Secondary Payer responds to the Pharmacy via the Facilitator and Switch.

Then

- Facilitator transmits Information Reporting transaction containing secondary patient pay amount information to PDP to update TrOOP calculations, etc.
- PDP transmits response to Facilitator.

A similar process would occur for Reversals from the Pharmacy to the Secondary/Tertiary Payer, which would result in Information Reporting Reversals from the Facilitator to the PDP.

For correct Facilitator routing environment, a unique IIN/PCN will be assigned to a Secondary, Tertiary, etc. Payer's health plan. This will allow the Switch to determine the appropriate routing for a Medicare patient's transactions. This will also trigger the Facilitator to create the N1/N2/N3 transaction to the PDP. The unique IIN/PCN will be sent to the PDP so they may identify the correct Secondary/Tertiary Payer's health plan.

If a unique IIN/PCN is not assigned to the Secondary/Tertiary Payer's health plan, then the Switch will not know to route the transaction to the Facilitator. It is then the responsibility of the Secondary/Tertiary Payer to send the appropriate Information Reporting transaction to the Facilitator. The Information Reporting transaction is created according to the following rules –

- If the Secondary/Tertiary Payer's health plan is identified by a unique IIN/PCN and it is not sent by the Pharmacy, the Information Reporting transaction must be formatted with the unique IIN/PCN and sent to the Facilitator.
- If the Secondary/Tertiary Payer's health plan does not have a unique IIN/PCN, it must be able to be uniquely identified by a combination of IIN/Group or IIN/PCN/Group. The Information Reporting transaction must be formatted with the unique combination and sent to the Facilitator.

In order to better facilitate this reporting and the effective update of TrOOP calculations, OHI fields within the Insurance Segment of the Information Reporting Transaction were sunsetted and a new N Transaction Payer Identification Segment was created with new fields. The new segment is required for Service transactions in addition to Billing transactions. Existing fields from the Claim Segment were moved to the new N Transaction Payer Identification Segment.

The **new fields within the N Transaction Payer Identification Segment:**

N Payer IIN (C52-9Y) –the IIN number of the payer for which the N is being generated.

N Payer Cardholder ID (C54-AA) - Cardholder number for the beneficiary of the payer for which the N is being generated.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use
- 983 -

N Payer Processor Control Number (C53-9Z)- the Processor Control Number (if used) of the payer which the N is being generated.

N Payer Group ID (C55-AB) - the Group ID of the secondary, tertiary, etc. payer for the payer which the N is being generated.

N Payer Adjudicated Program Type (C48-9U) - The type of prescription benefit plan/program under which the claim was adjudicated.

N Transaction Source Type (C56-AC) – Method in which record of payment was transmitted from the N payer to receiver.

N Transaction Reconciliation ID (C57-AD) - The Reconciliation ID (B98-34) returned by the supplemental payer for which the N is being generated.

Field moved from the Claim Segment to the N Transaction Payer Identification segment:

Transaction Reference Number (880-K5) – The transaction reference number is being used to track all transactions related to a particular dispensing event and is assigned to each of the data records in the batch or real-time transaction. Whoever creates the Information Reporting Transaction is responsible for creating this number. The entity receiving the Information Reporting Transaction is expected to include that number in their response. For the purposes of the N transaction, this number remains the same between the N1 and associated N2 transaction.

Fields sunsetted from the Insurance Segment

Other Payer BIN Number (990-MG) – replaced with the N Payer IIN (C52-9Y)

Other Payer Cardholder ID (356-NU) – replaced with N Payer Cardholder ID (C54-AA).

Other Payer Processor Control Number (991-MH) replaced with N Payer Processor Control Number (C53-9Z).

Other Payer Group ID (992-MJ) replaced with N Payer Group ID (C55-AB).

Additionally, the COB segment will now be supported in Information Reporting Transactions. Inclusion of the COB segment in the Information Reporting transaction is designed to provide full view into other payers involved with the claim for which the N transaction is being generated. This will allow the Part D plan to determine payer order. By including all other payers involved in the claim, the Part D plan can confirm which payer they were as well as the order of the payer for which the N transaction is being generated. This helps address concerns about the receipt of N transactions that occur out of payer order due to one supplemental payer not participating in real-time transactions. For example, if one supplemental payer submits batch N transactions and a subsequent supplemental payer processes real-time, the last payer N transaction will be received prior to the supplemental payer that submits batch N transactions. By having the order visible, the Part D plan can determine where the N transaction needs to be placed when re-adjudicating claims.

The following COB fields will be **REQUIRED** on the Information Reporting Transaction if the COB segment exists on the supplemental claim in an Information Reporting transaction

- 337-4C COORDINATION OF BENEFITS/OTHER PAYMENTS COUNT
- 338-5C OTHER PAYER COVERAGE TYPE
- C47-9T OTHER PAYER ADJUDICATED PROGRAM TYPE
- C49-9V OTHER PAYER RECONCILIATION ID

In order to maintain visibility to the payer order from the COB segment information, the Transaction Facilitator will populate the Other Payer Reconciliation ID field with the value "Rejected" when the other payer has rejected the claim.

Depending upon the particular submission request, the PDP must provide one of the following general types of responses to the Facilitator:

Approved - This occurs when the PDP acknowledges the receipt of the information only transaction and successfully processes the transaction. For Medicare Part D, this means that the PDP has updated the beneficiary's TrOOP to reflect the transaction being reported.

Duplicate of Approved - This occurs when the PDP has previously received the request and processed the transaction, but the response did not return to the Originator. The Duplicate response contains the same information as returned in the original Approved scenario.

Duplicate of Captured - This occurs when the PDP has previously received the request and processed the transaction, but the response did not return to the Originator. The Duplicate response contains the same information as returned in the original Captured scenario.

Paid - This response type must not be used for Medicare Part D Information Reporting (N1) or Information Reporting Rebill (N3) transactions.

Duplicate of Paid - This response type must not be used for Medicare Part D Information Reporting (N1) or Information Reporting Rebill (N3) transactions.

Rejected - This occurs when the PDP has encountered an error in the transaction or processing, or does not approve the information only transaction.

- 984 -

37.3 REBILL INFORMATION REPORTING – MEDICARE PART D N3 TRANSACTION

A N3 Rebill transaction is an information reporting submission with an implied reversal of the same Service Reference Number. A previously adjudicated information reporting transaction is reversed and then the new information reporting transaction is processed, using a two-step procedure. Each part of the process works independently of the other. For the Rebill request, the Reconciliation ID of the transaction to be reversed must be sent.

Medicare Part D payers and processors need the ability to process the “new” transaction in order to update the beneficiary's accumulators appropriately.

First, the previously adjudicated N1/N3 transaction is reversed. If the reversal cannot be processed, do not reject the reversal.

Second, apply the “new” transaction to appropriately apply the beneficiary's accumulators. If the “New” transaction processes successfully, an “Approved” response must be returned. If the “New” transaction is rejected, the most specific reject code(s) must be returned.

38 APPENDIX D ORDUR (ONLINE REAL-TIME DRUG UTILIZATION REVIEW)

38.1 INTRODUCTION

Inappropriate drug therapy can cause patient injury leading to the provision of additional health care services resulting in increased total health care expenditures. Research indicates that an estimated three to five percent of hospital admissions result from medication toxicities.

In an attempt to solve this problem, the U.S. Congress enacted federal legislation in 1990 that requires pharmacy providers that participate in state Medicaid programs to perform prospective drug utilization review (DUR) and to provide patient counseling before each Medicaid prescription is dispensed. Presumably, prospective DUR can identify and prevent drug therapy problems, using various drug, patient and provider databases that make up the DUR system. The Omnibus Budget Reconciliation Act (OBRA '90) required that outpatient prospective DUR be performed for all Medicaid patients by January 1, 1993. Under OBRA '90 and Centers for Medicare and Medicaid Services (CMS) guidelines, prospective DUR can be performed manually by the dispensing pharmacist or physician, as a component of his store's computerized drug delivery and screening software, or through an online, real-time drug utilization review (ORDUR) programs administered via a data modem by a third party claims processor.

The National Council for Prescription Drug Programs (NCPDP) responded to this legal mandate by developing an ORDUR component in its existing NCPDP *Telecommunications Standard Version 3.2*. Subsequent adoption by CMS of NCPDP *Telecommunication Standard Version 5.1* continues to accommodate ORDUR messaging.

In 1991 the NCPDP established the DUR Work Group as a task force of the organization's Standardization Committee. This 65-member, industry-wide task force was convened to develop a standard format for the transmission of DUR conflict messages and responses in an online real-time environment. This task force had representation from chain, independent, and mail-service pharmacy providers; software vendors; Electronic Claim Management (ECM) processor organizations; software database companies; national pharmacy trade associations, and plan sponsors. In 1992 NCPDP's membership ratified NCPDP *Telecommunication Standard Version 3.2*, adding capability for ORDUR to the claims administration process.

The NCPDP standard for ORDUR processing will also help assure that implementation of DUR messages from multiple ECM processors will be administratively uniform from the pharmacist's perspective. This will help pharmacy computer system vendors in developing optimum system support for pharmacist DUR activity. This means that the resulting DUR activity will help the pharmacist identify and prevent improper drug therapy, but will not excessively impact the pharmacist's operational capacity, cost, or efficiency.

NCPDP standards are widely used by private sector ECM processors. (An ECM system connects the community pharmacy provider with a third party payer's drug benefit sponsor's ECM processing representative.) The purpose of this manual is to facilitate the performance of ORDUR as a component of an ECM system.

In addition, NCPDP has established a process that will allow changes in its ORDUR processing and telecommunication standards that involves consensus-based evaluation of requested changes. A Data Element Request form (DERF) is the method to use in requesting consideration of changes in any NCPDP standard. Users of this appendix or any NCPDP standard are encouraged to become involved in the NCPDP Work Group process.

38.2 CHAPTER 1. ORDUR PROCESSING DESIGN AND IMPLEMENTATION

NCPDP has identified the information and support files necessary for DUR processing on an ECM system. This chapter describes these data elements and support files and discusses their practical and effective use.

Fundamental system design, implementation and ongoing operational issues are considered. This information will assist management and users in understanding the challenges of conducting ORDUR within their drug programs. Data processing professionals will obtain an understanding for the use and interaction of various input, reference, and output information resources needed by the system.

38.2.1 INFORMATION CATEGORIES

The information and support files for the ORDUR standard fall into four categories:

- Member information
- Prescription information
- Prescriber identification
- Pharmacy identification

ORDUR system managers and designers can draw the information that is to be used in the design of the ORDUR component of the ECM system from the ECM system itself, the pharmacist's prescription filling system, and the commercial drug reference files.

They must evaluate the level of detail necessary, the accuracy of various sources, and the most efficient alternatives for obtaining the required elements (that is, commercial drug databases, the pharmacy, or the ECM processor).

38.2.1.1 MEMBER INFORMATION

During any form of DUR processing, accurate patient identification is imperative to ensure that the system draws information from the correct patient drug history profile.

Version F6

- 986 -

In an ORDUR system, where the volume of information exchange and interaction with the pharmacist is limited, a unique patient identifier/other unique number is the preferred method for identifying a patient. Such a unique identifier for each individual prevents any ambiguity that might occur with other methods of member identification occasionally used in claims processing systems.

Total reliance on patient first name, birth date, or sex in selecting among family members will cause obvious ambiguities in certain common instances of child naming and multiple sibling births. However, the use of a unique identifying number in combination with multiple items such as patient's birth date, unique person code number, first name, and relationship code, can provide another way to identify a patient accurately.

38.2.1.2 PRESCRIPTION INFORMATION

Prescription information is necessary input to the DUR system, and only the dispensing pharmacy can provide this information. Data items that identify and describe a particular dispensing event that might be considered for inclusion in a DUR standard for ORDUR systems are available immediately in an online real-time processing system. Most of these common data items that describe a dispensing event are also used for benefit claims processing. You can easily obtain items such as the prescription number, National Drug Code (NDC), dispensed quantity, and pharmacist estimated days supply for DUR or claims processing, if you follow industry standards. The NCPDP *Telecommunication Standard* supports transfer of all these common data items from the pharmacy to the ECM system.

Diagnosis information availability to pharmacists and ORDUR processors improves DUR processing. The NCPDP *Telecommunication* format accommodates diagnosis information in the form of International Classification of Diseases (ICD-9) codes. But, this information generally is not available to the pharmacist at the time of dispensing. The patient's medical record is one source of diagnosis or indication information. Yet this can be difficult for the pharmacist to obtain.

Implied diagnosis created by proxy from prescription drug claims history can be used in DUR, although problems with accuracy in this method exist. The importance of accurate and timely diagnostic information cannot be overstated. ORDUR systems currently use a combination of various means to capture diagnostic information. As additional diagnostic information is available, the processor can update the patient's diagnostic file.

Conducting DUR on every drug that the patient encounters is important. This applies to compounded prescriptions as well. Since one NDC is assigned to these combination drug products, or in the case of compounded prescriptions, each ingredient can be identified. DUR processors can interrogate the drug conflict potential of each individual drug component. Commercial drug reference databases make this activity possible.

The collection of information on drug products not covered by the particular benefit plan is also important in effective ORDUR. Over the counter drugs often fall into this category, as do other legend prescription drugs under certain circumstances. The transmission of non-covered drug product information for ORDUR purposes is possible through "information only" transactions in the NCPDP *Telecommunication Standard*. Although *technically* possible, the transmission of non-covered drug activity may be *impractical* until appropriate compensation for such services are resolved.

38.2.1.3 PRESCRIBER IDENTIFICATION

Effective and appropriate DUR also depends upon accurate identification of prescribers. Without this information, DUR efforts and educational intervention is impossible. Many drug claim processors use the prescribers' National Provider ID (NPI), Drug Enforcement Administration (DEA) number, Universal Physician Identification Number (UPIN), state medical license number, or a processor-assigned identification scheme to identify prescribers.

38.2.1.4 PHARMACY IDENTIFICATION

NCPDP and the National Association of Boards of Pharmacy (NABP) have defined a unique pharmacy identification numbering system for use in prescription processing systems. The NCPDP number is an efficient way for ECM processors to identify pharmacy providers and dispensing locations throughout the nation. In 2006 the National Provider ID (NPI) will be used for covered entities under HIPAA.

The DUR Work Group considered more finite levels of pharmacy provider identification that might be considered when designing an ORDUR system. Pharmacy setting is one of the many important factors when applying DUR conflict parameters. The NCPDP pharmacy file contains the pharmacy setting as part of the profile for pharmacy setting (that is, retail, hospital, mail service, nursing home).

38.2.2 DUR SYSTEM SUPPORT FILES

Three primary files form the ECM system support ORDUR processing.

- Patient profiles (drug use history file)
- Complete drug master file (drug reference database)
- Drug conflict (conflict/interaction database)

You can design the DUR support files in numerous formats. The first file is the continually changing longitudinal view of a patient's drug use. The next two files or databases are related to the drug product itself, independent of patient utilization. The Master File contains the information that describes the drug and its characteristics that may have an effect on DUR processing. The Drug Conflict Database describes clinical use variables and relationships with other drug products at varying degrees of detail. The following descriptions provide the conceptual purpose and contrast the functionality that is required for each file type. Together all these files contain the information needed for benefit claims processing, reporting, and drug utilization review.

Patient Profiles

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use
- 987 -

Some DUR modules, such as therapeutic duplication and drug interaction, depend upon the availability of historical patient prescription use information. Prior use history may be necessary for various time periods depending on the system's design and DUR module's purpose. We do not make a definitive recommendation for how much drug use history is necessary for ORDUR processing in this manual. Each ECM processor and clinician associated with ORDUR design and implementation must carefully consider the appropriate volume and time frames of history required.

Drug Data Files

Drug Reference and Drug Conflict Rules databases are the keystones to performing interactive monitoring and screening functions of a DUR program. Along with actual drug use contained in the patient profiles, appropriately maintained reference and conflict rules drug databases are the most critical elements in a successful ORDUR processing system. Careful attention to the detailed characteristics of these files and the design of interfaces and applications that use them is essential in ORDUR system design.

Complete Drug Master Files

Complete drug master files are available from several commercial vendors. These sources supply automated reference file implementation and maintenance subscriptions to ECM processors interested in prescription benefit processing. Information is accessed through the National Drug Code (NDC) number key associated with the detail items for each drug package. Examples of the types of information available from a complete drug master file include:

- Drug name and strength
- Dosage form
- Therapeutic classification
- Generic name

With this type of information maintained in these files, the pharmacist does not need to transfer detailed drug information with each claim. For example, pharmacist transmission of drug name and NDC would be redundant and would add unnecessary overhead to the claims transmissions. Similarly, ECM processors conducting ORDUR processing could gather information, such as therapeutic classification, from their internal reference files rather than incoming claims transmissions.

Drug Conflict Rules Files

Drug conflict rules files provide specific clinical use information items and rule sets used to identify problem drug therapy. These rules files provide the data element drivers and general processing logic needed to identify drug conflicts.

ECM processors implementing ORDUR systems must recognize that most pharmacy management computer systems operating in the provider pharmacy already conduct some level of drug interaction screening. This is often accomplished using the same commercial vendor drug conflict rules database products that vendors supply to the processing industry.

It is possible that ORDUR processing systems can enhance the pharmacy-based drug interaction systems, as the ECM processor may have a more complete description of a patient's drug use profile than an individual pharmacy. However, plan administrators must carefully consider the level of clinical significance that address online messages transmitted from the ORDUR system. Excessive identification of insignificant clinical events may desensitize pharmacy providers to other, more significant DUR messages and events.

The NCPDP DUR Work Group categorizes therapeutic conflicts commonly noted in drug therapy according to their mechanism of action. Each category or "module" makes up a Drug Conflict Rules File or database. Standard codes identify the drug conflicts in each module. The pharmacy provider and ECM ORDUR processor use the codes when exchanging structured electronic messages and responses. See chapter two for detailed descriptions and information on using these codes.

Dosing/Limits Module

The following therapeutic problems fall into the Dosing/Limits Module.

Low Dose (LD) detects drug doses that fall below the standard dosing range.

High Dose (HD) detects drug doses that fall above the standard dosing range.

Overuse (ER) detects prescription refills that occur before the days supply of the previous filling should have been exhausted.

Underuse (LR) detects prescription refills that occur after the days supply of the previous filling should have been exhausted.

Insufficient Duration (MN) detects regimens that are shorter than the minimal limit of therapy for the drug product based on the product's common uses.

Excessive Duration (MX) detects regimens that are longer than the maximal limit of therapy for the drug product based on the product's common uses.

Incorrect drug dosing can significantly impact the quality of patient care. Many adverse drug reactions and therapy failures can be traced to low and high-dose problems in drug therapy. The complexity of proper drug dosing creates the need for thorough professional evaluation of drug therapy. The dose and use information that either can be calculated or that is readily available in claims data lends itself to automated detection of potential therapy problems. Indeed, intervention in potential dose-related problems in drug therapy through real-time processing systems is considered a key area for ORDUR system focus.

ORDUR processing systems hold great hope for the prevention of many dose-related problems. Certain areas of drug use where patients are prone to non-compliance could be favorably affected by appropriately designed ORDUR processing systems. In addition, simple errors in dispensing and prescribing may be detected more often if ECM administrators provide pharmacists with information about possible dose-related problems. Payers may also need to consider or weigh claims rejections versus information only. In either case, the ORDUR system should still permit the pharmacist to override the rejection or warning to account for extenuating circumstances associated with a dispensing event.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use
- 988 -

We must recognize professionals in contact with the patient as potential sources of additional *relevant* information surrounding the prescription dispensing event that are not detectable in standardized automated information exchanges. DUR system designers must design the ORDUR processing system to permit the pharmacist to use this "professional prerogative" when determining the significance of ECM administrator-detected potential dosing problems. We have designed the NCPDP *Telecommunication Standard* specifically to permit pharmacist communication of interventions that might require override of dose limit alerts and rejections.

Therapy duration non-compliance is another significant drug use problem. When a patient discontinues use of hypertensive therapy or antibiotics too soon or uses oral anti-diabetic agents erratically, serious health care problems can result.

Therapy that extends needlessly beyond effective recommended time periods or at doses exceeding recommended maintenance levels can also impact desired outcomes. Recognizing when a product is beyond the acute treatment phase and the clinical measurements that should dictate a reduction in dose for longer-term use is an area where ORDUR programs might be useful. The ORDUR processing system can remind clinicians delivering therapy at higher doses beyond the usual acute phase to re-evaluate the need for acute dose levels.

Drug Interaction Module

Two therapeutic problems fall into the drug interaction module.

Drug-Drug Interaction (DD) detects drug combinations in which the net pharmacologic response may be different from the result expected when each drug is given separately.

Drug Incompatibility (DI) identifies physical and chemical incompatibilities between two or more drugs.

Adverse effects of drug interactions are usually preventable. ORDUR systems can assist the pharmacy provider in identifying these conflicts. Although many professionals find the frequency and severity of interactions to be relatively small, drug interactions can impede optimum health care. Preventing adverse effects in even a few cases can improve quality of care and save health care dollars.

Drug Conflict Module

The Drug Conflict Module consists of a number of drug therapy problems that arise as a result of an interaction between the individual patient's characteristics and a particular drug. The following therapeutic problems are in this module.

Drug-Allergy (DA) indicates that an adverse immune event may occur due to the patient's previously demonstrated heightened allergic response to the drug product in question.

Prior Adverse Reaction (PR) identifies those drugs that the patient has previously reacted in an atypical manner.

Drug-Disease (Inferred) (DC) indicates that the use of the drug may be inappropriate in light of a specific medical condition that the patient has. The existence of the specific medical condition is inferred from drugs in the patient's medication history.

Drug-Disease (Reported) (MC) indicates that the use of the drug may be inappropriate in light of a specific medical condition that the patient has. Information about the specific medical condition was provided by the prescriber, patient, or pharmacist.

Drug-Age (PA) detects age-dependent drug problems.

Drug-Gender (SX) identifies contraindicated or inappropriate therapy in either males or females.

Additive Toxicity (AT) detects drugs with similar side effects that could exhibit additive toxic potential.

Drug-Pregnancy (PG) detects pregnancy-related drug problems. This information is intended to assist the healthcare professional in weighing the therapeutic value of a drug against possible adverse effects on the fetus.

Iatrogenic Condition (IC) detects possibly inappropriate use of drugs that are designed to ameliorate complications caused by another medication.

Side Effect (SE) reports possible major side effects of the prescribed drug.

Adverse effects of drugs include both side effects and allergic reactions. Adverse reactions are not always predictable; however, once a patient has experienced an adverse reaction, it is highly likely that a similar reaction will occur if the same drug or similar drug product is again prescribed for that patient. Reactions of this nature are preventable through ORDUR system messages and alerts.

Prior adverse reaction monitoring requires a complete patient profile assembled from all pharmacies and physicians the patient has used. The transmission of information regarding a patient's allergies could be conveyed to the pharmacist using the NCPDP DUR/DUE Free Text Message. However, no method currently exists to transmit allergic information from the pharmacist to the ECM. Pharmacists may be in the best position to detect drug-allergy and prior adverse reaction alerts. Common types or groupings of adverse reactions include:

- skin rash-hives
- shock
- unconsciousness
- asthma
- shortness of breath
- nausea-vomiting
- anemia and other blood disorders

To be effective and meaningful, prior adverse reaction information transferred through the ORDUR system should identify the severity of the interaction, the "onset profile" and duration of the reaction. Similarly, the level of documentation, frequency and scope of individual encounters with the reaction should be described. These items all assist the ECM ORDUR processor in determining how to weigh the significance of various interaction messages that might be sent to the pharmacy provider.

Drug-disease analysis and warnings might be useful additions to an ECM ORDUR processing system. A drug can affect disease conditions. It might improve the disease, make it worse, or create a second disease. Existing patient conditions might contraindicate the use of a newly prescribed drug. A newly identified disease or medical condition might contraindicate the use of drugs the patient is currently taking. Drug-disease screening should detect these situations.

Version F6

January 2020

OFFICIAL RELEASE

National Council for Prescription Drug Programs, Inc.
Copyrighted Materials - See Copyright Statement for Allowed Use
- 989 -

Even single drug therapies can cause other disease states. These drug-produced disease states are called iatrogenic disease conditions. Drug-disease monitoring can also be used to detect iatrogenic disease states. For example, the additional use of a cough suppressant in a patient taking an ACE-inhibitor may indicate a side effect to the ACE-inhibitor. By monitoring the sequence of drug use and diagnosis proxies created by comparing expected reasons for a particular drug's use, links can be made to the prescribing of certain drugs used to combat side effects caused by previously administered therapy.

The NCPDP Work Group also identified the need to distinguish between drug-disease interactions based on inferred diseases from drug proxy and those diseases that might have been available because of their report and capture in a medical claims system.

Drug-disease screening can be conducted in a concurrent time frame, that is, while the patient is still receiving the therapy under review. In this way, alterations in drug therapy can be made while the patient is actively being treated for a disease condition. Early notification enables prescriber and pharmacist to confer before the pharmacist fills the patient's prescription. ORDUR processing of drug-disease DUR messages enables the pharmacist to evaluate a patient's complete profile, including prescriptions from multiple pharmacies and physicians.

Other drug conflicts in this module include precautions about drug use in certain patient demographic situations. For example, common age and sex restrictions for some drug products can be compared to proposed drug use to identify possible errors in dispensing or prescribing. We added major side effects warnings as a valid Reason for Service Code for the standard DUR message as part of this module.

Duplicate Therapy Module

The following two therapeutic problems fall into the duplicate therapy module.

Therapeutic Duplication (TD) detects simultaneous use of different primary generic chemical entities that have the same therapeutic effect.

Ingredient Duplication (ID) detects simultaneous use of drug products containing one or more identical generic chemical entities.

Both therapeutic and ingredient duplication can lead to excessive drug therapy cost, therapeutic failures, adverse drug reactions, and serious health consequences. ORDUR processing systems can alert pharmacy providers of this duplication to assure that it is not unintentional. It might not be necessary to report the difference between these two types of duplication, but it certainly is important to detect both types.

Precautionary Module

The following therapeutic problems fall into the precautionary module.

Alcohol Conflict (OH) detects when a prescribed drug is contraindicated or might conflict with the use of alcoholic beverages.

Tobacco Use (DS) conflict detects when a prescribed drug is contraindicated or might conflict with the use of tobacco products.

Drug-Lab Conflict (DL) indicates that laboratory values may be altered due to the use of the drug, or that the patient's response to the drug may be altered due to a condition that is identified by a certain lab value.

Drug-Food Interaction (DF) informs the user of interactions between a drug and certain foods.

Call Help Desk (CH) informs the user to call the claims processor's help desk to obtain additional DUR information.

The pharmacy's dispensing review at the store level delivers the DUR conflicts contained in the precautionary module. Many local pharmacy management systems make use of data available on commercial drug conflict rule databases related to these precautions. The pharmacist's knowledge of the particular relevance of any of these potential conflicts for a particular patient is very important. These precautions are currently best handled in the local store system. However, in the future, when medical claims systems are fully integrated with ORDUR processing, some ECM processors might be able to effectively include standard DUR precautionary messages. The NCPDP has established DUR Reason for Service Codes for these precautions so that the pharmacist can document the DUR activities of local pharmacy systems by submitting these Reason for Service Codes on original claims.

38.2.3 DESIGN DISCUSSION SUMMARY

The extent to which any of the DUR modules can be effectively implemented depends on the availability and reliability of patient-specific information. Therefore, we urge system designers and implementers to assure that utilization history and other patient demographic information is accurate. The design must also take into account the pharmacy provider's operating environment so that the appropriateness of various warning or rejection design decisions can be carefully evaluated. Finally, ECM processors must be aware of the cost issues that must be considered when designing, implementing, and operating the ORDUR system.

The NCPDP *Telecommunication Standard* provides a framework to support the implementation of ORDUR programs. It supports the interactive communication of standard DUR Response Data and standard DUR Action Codes between ECM processors and pharmacy providers. The design of the NCPDP *Telecommunication Standard* provides for standard format outgoing messages from ECM ORDUR processing systems in the various paid, captured, and denied response formats, and for standard-format pharmacist action codes on incoming claim, reversal, and information only transactions.

The standard layout of the NCPDP *Telecommunication Standard* DUR segment permits pharmacy management system vendors to design interfaces to handle the required pharmacist intervention and record-keeping associated with the receipt of standard DUR messages. Without standard formats, ECM processors would have to use free form areas of the response formats which would be impossible for computer vendors to leverage into smooth operating warning and record keeping systems. Disruptions to pharmacy operating flow in the dispensing process can be costly and lead to decreases in access to needed drug therapy. ECM processors are encouraged to create ORDUR processing within the NCPDP standards functionality. Processors that wish to develop new processing capabilities or functionalities are encouraged to make use of the NCPDP standard development and maintenance process using the consensus method and due process for all requests via an array of volunteer Work Groups. For more information on NCPDP Work Group activities and maintenance procedures contact the NCPDP office.

38.3 CHAPTER 2. ORDUR MESSAGE FORMATS

38.3.1 STANDARD DUR MESSAGE

When an ECM system processes a claim and an ORDUR component of the system identifies conflicts, the system can return standard DUR messages to the pharmacist. The payer and processor must decide whether the DUR conflict will result in a claim rejection for DUR purposes or whether the claim will be accepted with the issuance of DUR conflict advisory warnings.

Reason for Service Code - (439-E4) identifies the conflict module into which the detected conflict falls. This code should be generated and sent back to the pharmacy when ORDUR processing detects this type of conflict. Valid values are listed in the External Code List (ECL).

Clinical Significance Code - (528-FS) indicates the significance of the detected conflict. The system pulls the clinical significance code from the originating drug reference database. We recommend that processors developing unique databases use the following clinical significance codes.

blank = Not specified

1 = Major

2 = Moderate

3 = Minor

ECM processors must prioritize ORDUR message transmissions to the pharmacies in order of severity. In other words, processors must transmit standard DUR messages that are considered major before those considered less important. In addition, the processors must develop a hierarchy of concern that ranks each Reason for Service Code module. In this way, messages from one module would have a higher or lower priority than messages from a different module, but with the same clinical significance code.

For example, if drug allergies are determined to be more significant than drug-drug interactions, then allergy messages with clinical significance level of "one" would be transmitted before drug-drug interactions with clinical significance level of "one". ECM processor implementation specifications must define the hierarchy plan.

DUR/DUE Co-Agent ID Qualifier - (475-J9) - Code qualifying the value in 'DUR/DUE Co-Agent ID' (476-H6).

DUR/DUE Co-Agent ID - (476-H6) - Identifies the co-existing agent contributing to the DUR event (drug or disease conflicting with the prescribed drug or prompting pharmacist professional service).

DUR/DUE Co-Agent Description - (E93-ZC) - Description of the co-existing agent contributing to the DUR/DUE event (drug or disease conflicting with the prescribed drug or prompting pharmacist professional service).

Other Pharmacy Indicator - (529-FT) indicates the dispensing location or source of the previous prescription or condition that is in conflict with the prescription being submitted. This information might be useful to the pharmacist as he evaluates how to proceed with investigating or intervening in the potential conflict noted.

Other Pharmacy ID Qualifier (E95-Z9) - Code qualifying the value in 'Other Pharmacy ID' (E96-Z8).

Other Pharmacy ID (E96-Z8) - ID assigned to the pharmacy associated to the prescription or previous event contributing to the DUR/DUE conflict.

Other Pharmacy Name (E97-Z7) - Name of the pharmacy associated to the prescription or previous event contributing to the DUR/DUE conflict.

Other Pharmacy Telephone (E98-Z6) - Telephone number of the pharmacy associated to the prescription or previous event contributing to the DUR/DUE conflict.

Previous Date of Service - (530-FU) identifies the date (YYYYMMDD) of the previous prescription that triggered the conflict with the submitted prescription. It might help the pharmacist, physician, and patient evaluate the relevance of potential conflicts.

Quantity of Previous Dispensing - (531-FV) indicates the quantity of the conflicting agent that was previously dispensed.

Unit Of Measure For Previous Dispensed Quantity (E94-ZA) - Code indicating the Unit of Measure associated to the 'Quantity of Previous Dispensing' (531-FV)

Database Indicator - (532-FW) identifies the source of drug reference file used to detect the potential DUR conflict. The valid drug reference database codes are found in the NCPDP *External Code List* (ECL).

Other Prescriber Indicator - (533-FX) indicates whether the same or a different prescriber was responsible for the previously filled conflicting prescription.

Other Prescriber ID Qualifier (F01-Z4) - Code qualifying the value in 'Other Prescriber ID' (F02-Z3).

Other Prescriber ID (F02-Z3) - ID assigned to the prescriber associated to the prescription or previous event contributing to the DUR/DUE conflict.

- 991 -

Other Prescriber Last Name (E99-Z5) - Last name of the prescriber associated to the prescription or previous event contributing to the DUR/DUE conflict.

Other Prescriber Telephone Number (F03-Z2) - The 10-digit telephone number of the prescriber of the prescription causing the DUR/DUE conflict.

DUR/DUE Compound Product ID Qualifier (F05-Z0) - Code qualifying the value in 'DUR/DUE Compound Product ID' (F04-Z1).

DUR/DUE Compound Product ID (F04-Z1) - Identifies the specific compound ingredient within the submitted compound claim, contributing to the DUR/DUE event.

DUR/DUE Maximum Daily Dose Quantity (F06-YO) - Maximum quantity associated to the DUR/DUE daily dose limitation.

DUR/DUE Maximum Daily Dose Unit of Measure (F07-YL) - Code indicating the Unit of Measure associated to the 'DUR/DUE Maximum Daily Dose Quantity' (F06-YO).

DUR/DUE Minimum Daily Dose Quantity (F08-YJ) - Minimum quantity associated to the DUR/DUE daily dose limitation.

DUR/DUE Minimum Daily Dose Unit of Measure (F09-YI) - Code indicating the Unit of Measure associated to the 'DUR/DUE Minimum Daily Dose Quantity' (F08-YJ).

DUR/DUE Free Text Message- (544-FY) transmits additional information that highlights the detected DUR conflict situation, along with some detail when the DUR alert code or other codified field(s) do not include enough information.

Free Text Message Formatting Considerations

When entering this information, ECM processors should recognize certain style issues that may help the pharmacy evaluate and act on these free form messages more consistently across all third party plans. We recommend that processors use the following guidelines to create consistent, easily interpreted standard DUR message free text.

Write the message clearly and concisely. Enough information must be in the text to convey the problem, but excessive information will be ignored.

Abbreviate only when necessary and use standard medical abbreviations.

When examples of content are included in the ORDUR Standard DUR Message, use those messages when possible.

Use NCPDP Standards to report product quantities in the message. Designate quantities in metric units not apothecary equivalents. For example, use 325 MG, not 5 Grains.

Identify the date in a format of YYYYMMDD. For example, 20190929 for September 29, 2019.

When returning drug name for interactions, use the trade drug name.

When returning the drug name for such things as Additive Toxicity and Duplicate Therapy, include the dosage strength.

For age limitations, list the age for which incompatibility occurs. For example "CONTRAIND. UNDER 12 YEARS"

For laboratory test incompatibilities, specify the laboratory test the alert refers to.

Reason for Service Code	CODE	MESSAGE (FREE TEXT)
Low Dose	LD	"Processor Free Text"
High Dose	HD	"Processor Free Text"
Overuse	ER	"Processor Free Text"
Underuse	LR	"Processor Free Text"
Insufficient Duration	MN	"Processor Free Text"
Excessive Duration	MX	"Processor Free Text"

DRUG INTERACTION MODULE

Reason for Service Code	CODE	MESSAGE (FREE TEXT)
Drug-Drug Interaction	DD	Drug Trade Name
Drug Incompatibility	DI	Incompatible Agent

- 992 -

DRUG CONFLICT MODULE

Reason for Service Code	CODE	MESSAGE (FREE TEXT)
Drug-Allergy	DA	Name of Allergen
Prior Adverse Drug Reaction	PR	Drug Name
Drug-Disease (Inferred)	DC	Name of Drug or Inferred Condition
Drug-Disease (Reported)	MC	Name of Drug or Reported Condition
Drug-Age	PA	"Processor Free Text"
Drug-Gender	SX	"Processor Free Text"
Additive Toxicity	AT	Drug Trade Name
Drug-Pregnancy	PG	Pregnancy Contraindication
Iatrogenic Condition	IC	Drug Trade Name of previous drug
Side Effect	SE	"Processor Free Text"

DUPLICATE THERAPY MODULE

Reason for Service Code	CODE	MESSAGE (FREE TEXT)
Therapeutic Duplication	TD	Drug Name
Ingredient Duplication	ID	Drug Name

PRECAUTIONARY MODULE

Reason for Service Code	CODE	MESSAGE (FREE TEXT)
Alcohol	OH	Alcohol Precaution
Tobacco Use	DS	Tobacco Precaution
Drug-Lab Conflict	DL	Deferred
Drug-Food Interaction	DF	Food Name, "Food" or "Processor Free Text"
Call Help Desk	CH	Help Desk Phone Number

Notes on use of CH (Call Help Desk Reason for Service Code): Use this code with caution. Overuse can cause serious problems for both the pharmacy and the processor. (For example, not enough phone lines to the processor or not enough processor agents to answer "Call Help Desk" calls from the pharmacy.) If at all possible, assign the problem another standard DUR Reason for Service Code and include additional information in the claim's free text field to further explain the DUR conflict.

38.3.2 DUR ACTION CODE MESSAGES

DUR Action Code

When a processor sends a pharmacy a standard DUR message alert in the online claim response, the pharmacist must act upon the message. That pharmacist's action can be an intervention or the decision to ignore the message. If the DUR conflict message received by the pharmacist is considered relevant, the pharmacist's resulting actions are called "interventions" in the NCPDP ORDUR standard model. The pharmacist translates his or her actions that result from a DUR conflict alert received from the ECM processor or from the pharmacy system's independent capabilities into DUR action codes that define the conflict, intervention, and outcome. The pharmacist can transmit these standard action codes to the ECM processor in all pharmacist-to-processor claim transaction formats.

The NCPDP *Telecommunication Standard* defines standard codes for the pharmacist to use in documenting these interventions. The pharmacist can document the intervention whether it occurred as a result of an ECM ORDUR processor's DUR alert message or as a result of the pharmacist's independent determination that DUR conflict has occurred. Under either circumstance, the pharmacist can tie the intervention type to one standard Reason for Service Code. For example, a code exists to let the pharmacist indicate he has contacted the physician regarding a drug interaction conflict noted.

- 993 -

In addition to documenting interventions associated with various conflicts, the NCPDP standard lets the pharmacist tie the conflict and intervention to an "outcome" of the dispensing process. For example, the outcome of the dispensing process might be changing the prescription that generated the conflict, filling the prescription unchanged, or not filling the prescription at all.

NCPDP developed relatively simple, standard intervention codes to encourage their use. In producing the standard, an overly complex coding scheme could result in limited use or misuse of codes. Similarly, the outcome code list is currently limited to the consensus agreement reached between processors and providers who were members of the NCPDP DUR Work Group.

By receiving transactions from the pharmacist that contain the intervention action taken and the outcome result of the intervention, ECM ORDUR processors and payer can evaluate the relevance of their standard DUR messages to improved health status and direct cost savings. Over time, if a large number of DUR conflict and intervention/outcome response events are studied in relationship to other healthcare data, it may be possible to measure the indirect value of ORDUR processing on patient health and cost and quality of medical care.

38.3.3 DUR INFORMATION ENTRY

The NCPDP *Telecommunication Standard* provides for:

- Claim transmission
- Claim reversal
- DUR informational response from store (with DUR action & outcome codes)
- Reversal response (with DUR action & outcome codes)

The following sections discuss the various stages of the dispensing and claims billing processes where DUR information can be entered. We also discuss the functional capabilities of the NCPDP *Telecommunication Standard* transactions as they relate to DUR information transfer at each stage of the process.

Transactions

Drug Utilization Review information may be entered at various stages of the drug benefit delivery and claims billing process. Stage 1 DUR information entered on transmission of claims from the pharmacy provider to the ECM processor or claims "transactions" is the first point where information related to DUR may be entered.

Original Claim

Most pharmacy systems can perform many of the DUR checks that are available to processors. When the pharmacist enters a prescription into the pharmacy system, a DUR conflict might be detected by that system before the pharmacist sends a claim transaction to the processor. This type of DUR screening, before claims are transmitted to the ECM processor, must be considered as it might affect and interact with the ORDUR processing goals of the processor.

The pharmacist should submit these messages on the original claim so that the processor can record any DUR conflicts that the pharmacist has already overridden.

Claim Reversal

The pharmacist uses claim reversal transaction formats primarily to adjust, or reverse out, successfully adjudicated paid claim responses that were received for a prescription that for some reason the patient never obtained.

With DUR functionality in the NCPDP *Telecommunication Standard*, reversals might occur as a result of standard DUR messages the ECM processor sent and DUR interventions the pharmacist made. In the following two examples, the pharmacist transmits a DUR action code message with a reversal to document an action taken resulting from the standard DUR message the processor sent.

In the case of a prescription reversed as a result of DUR, even though the pharmacist will no longer be paid for dispensing the original prescription, the pharmacist might be eligible for reimbursement for delivering the cognitive services that resulted in the reversal decision. The NCPDP *Telecommunication Standard* supports the functionality of the pharmacist to reverse originally approved prescriptions, provide DUR action code messages, and request reimbursement in the reversal transaction.

In another case, the pharmacist might note a conflict, intervene in some way, and as a result fill the prescription with a different drug. The pharmacist would then submit a reversal for the original claim, indicating that a new claim was imminent using Result of Service code IE "Filled with different drug."

Information Reporting Transaction

The pharmacist can send transactions with DUR *relevant* information to the processor for informational purposes only. The submission can include therapy for drugs not normally covered or submitted to the processor. The transaction does not have to include DUR action codes; its purpose is only to update the processor about over-the-counter or other drug therapy that has potential relevance to future ORDUR processing for the patient.

Various situations create the need for an information-only transaction.

First, uncaptured prescription claims data at the point-of-sale can create situations where a patient is vulnerable to therapeutic conflicts without detection. This lost data can compromise even the best ORDUR processing programs. Data can be lost for various reasons.

- Most claims processors and sponsors do not currently suggest that the pharmacist submit a claim for non-covered medication.

- 994 -

- The trend toward higher cost sharing prevents the pharmacist from transmitting many claims (for example, where the copayment exceeds the cost of the drug product).
- Patients sometimes switch the prescription to an over-the-counter drug (some of which cause significant drug interactions) for which the pharmacist sends no transaction.

Second, claims that a processor denies are usually not subject to DUR processing. However, although dispensed to a member for cash payment, the drug might still be relevant to future ORDUR processing. When a processor denies an original claim, the pharmacist can submit an information-only transaction with or without DUR action code messages. Then, any relevant information will be available to the processor for future ORDUR processing.

The pharmacist submits an Information Reporting claim and DUR messaging to document the cognitive service performed and outcome results on the subject prescription. These transactions are significantly flexible and powerful tools that help the payer and ECM processor to determine which types of ORDUR processing are most cost effective and which modes of administrative processing result in cost effective capture of relevant DUR information.

We offer in summary the following guidelines as to when a pharmacy provider should use them to transmit DUR information.

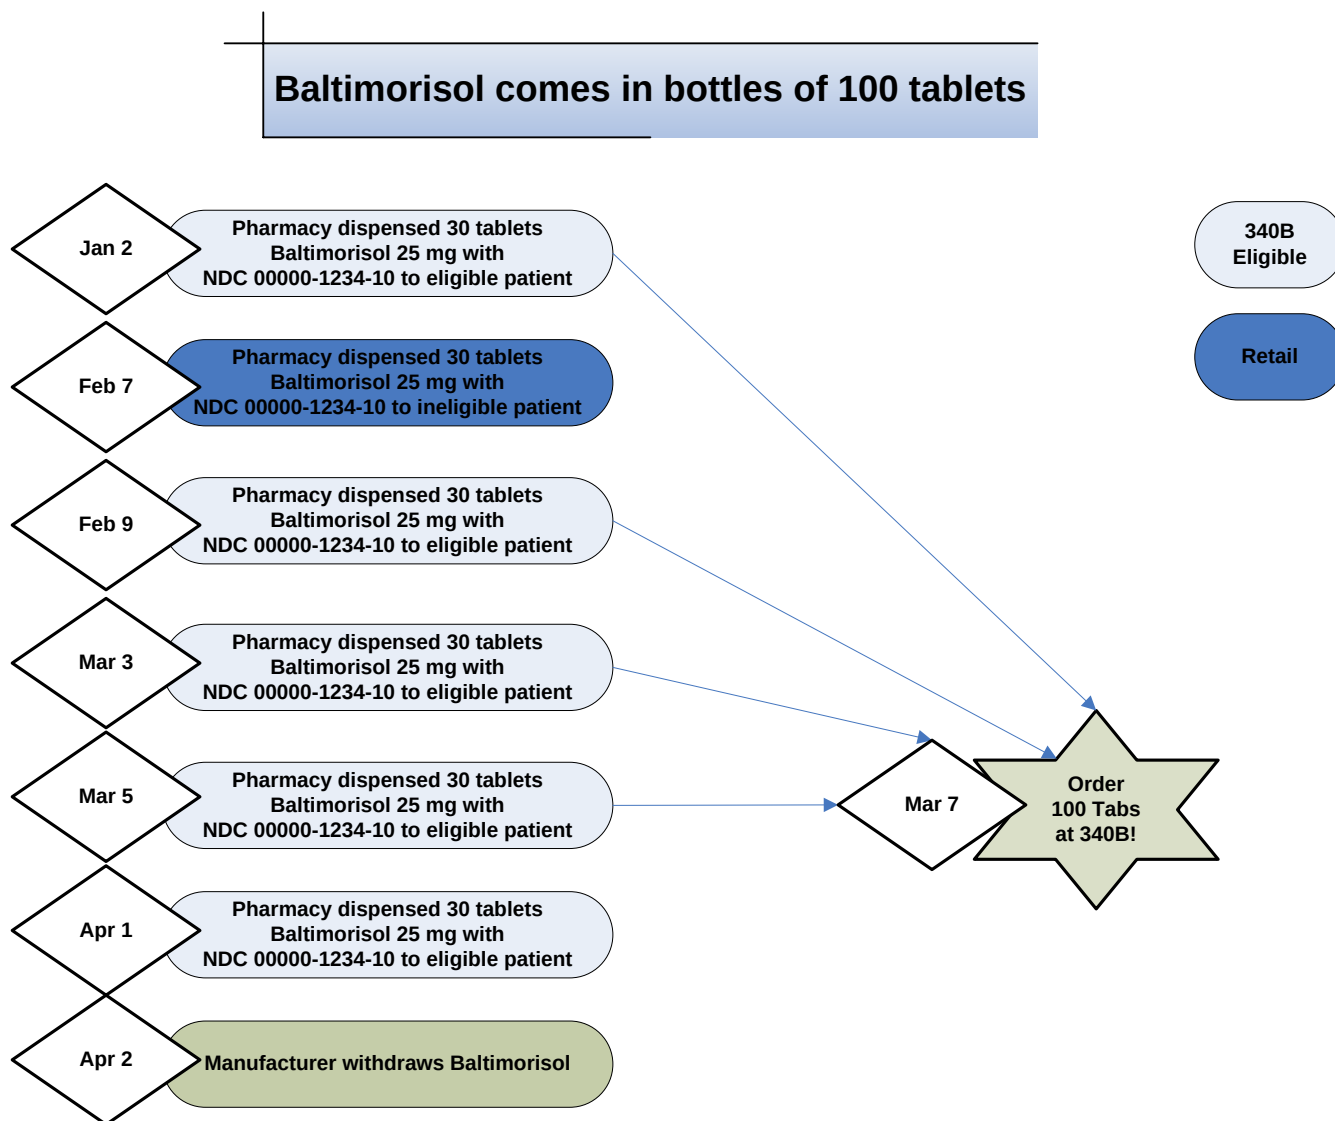

The original prescription claim is denied or not covered and submitting the information will assist in future ORDUR processing accuracy.

The original prescription is denied with a DUR conflict reported and the pharmacist wants to document DUR intervention and outcome actions associated with the message on the denied claim by submitting a DUR action code message.

39 APPENDIX E 340B INFORMATION REPORTING FLOW

This diagram flow shows a way for a pharmacy to submit to a processor an indication of section 340B status subsequent to providing a service. Pharmacies or their contracted intermediaries will perform the steps to determine whether a transaction is a) eligible for section 340B drugs and b) whether section 340B purchasing rights should be used and are available. Once this determination is made and the claim has conclusively been filled with section 340B drugs, an Information Reporting transaction is sent to the processor, if required, indicating such. The processor or their rebate aggregator, will be able to conclusively determine the section 340B status of all claims to aid in the inclusion/exclusion of such claims from various portions of their rebate files in accordance with contractual agreement.

The following shows an example flow. This example shows different scenarios of dispensing and status of a medication. It then shows the Information Reporting transaction being sent.
