

Summary: Self-motivated individual well-experienced in automation testing (UFT, Selenium with Java) using Cucumber, Serenity BDD with Junit framework and experienced in API Testing using Rest Assured Library with Agile methodology mainly across Pharmacy benefit management domain.

Employment History:

Lead Software QA Engineer (SS&C Fintech)

May - 2011 to Present

Roles & Responsibilities:

- Over all 14+ years of professional experience in testing/quality assurance with experience in developing test scripts for web-based application and API's. Implementation of Automation Framework using **UFT** (7 years) and **Selenium** (7 years).
- Worked on identification of the test cases best candidates for automation.
- Development and maintenance of automated test scripts using **UFT & Selenium Web Driver, Java, Junit, Cucumber, Serenity BDD framework**.
- Performed **Functional Testing, Regression testing, end-to-end testing, Integration Testing, smoke testing** to ensure stability of the build. Well-versed with bug life cycle and tools like ALM(QC), **JIRA** and defect analysis and categorizing based on severity and priority. Ability to coordinate with developers and participate in defect triage calls to replicate the issue, thus facilitating in bug fixing.
- **Rest API** testing manually with **Postman** and automation using **Rest Assured Library**.
- Monitor daily executions of automated scripts in Jenkins for all QA environments and sharing the test results and raising defects if any and coordinating the same with developers for triaging.
- Involved in **designing** and **developing** the **framework** when **migrated** from UFT to Selenium, Cucumber, Serenity BDD.
- Involved in Code reviews to maintain the stable code in the **GIT** Repository.
- Highly skilled and experienced in **Agile** test methodology(scrum). Involved in **sprint planning** meetings to do requirement analysis, **Sprint grooming, daily scrum, Sprint Review** and **retrospective** meetings.
- Flexible to understand the existing framework and customize it as per client requirements and Ready to work under minimal guidance for the allotted automation to be accomplished.
- Delivered both functional and automation KT to new joiners whenever required. Ability to work in a fast-paced, deadline-driven environment. Self-motivated, energetic and highly ethical in all work-related assignments. Good written, communication and interpersonal skills.
- Assisting the team when failures happen in application while testing.
- Learned the new automation tool Playwright with Java script.

Skill Set

- VB Script, Java, Java script basics, SQL
- UFT, Selenium, Junit, Cucumber, Serenity BDD, Playwright
- ALM, JIRA, GIT HUB, Jenkin, Maven
- SDLC, STLC, Agile and Scrum

Achievements/Recognition:

- Appreciation for migrating UFT framework to selenium cucumber and Serenity BDD framework.
- Appreciation for solving data-setup/data inconsistency in between end2end regression test execution.

Education

- M.sc computers from Andhra university, Vizag.
