Business

All of the information on this page constitutes a trade secret, privileged or confidential information,
as such terms are interpreted under the Freedom of Information Act and applicable case law.

Introduction/Project Information

The Deductible Project will move the Deductible application to a web interface. This project will also enhance the deductible system by creating additional features to help accommodate our customer needs.

Business Justification

Deductible is a major component that provides customers with the opportunity to establish and maintain limits for how much a member is required to pay and how much the benefit plan will pay over a defined period of time. Each plan limit is based on deductible, maximum out-of-pocket, maximum paid by plan, and lifetime maximums for commercial plans. Part D phases include deductible, initial coverage, and coverage gap limits. The Deductible application is accessed internally to set up the specific accumulators along with the various limits that may apply. It can be viewed both internally and externally to allow users to view a member's current deductible plan balances, number of scripts, and dates the member may have met a limit.

Current State—Business Process/Workflow

Deductible Overview

The Deductible System enables a user to establish a single deductible plan containing multiple plan limits for accumulation. Plan limits are based on deductible, maximum out-of-pocket, maximum paid by plan, lifetime maximum paid by plan, initial coverage, and coverage gap. The primary function of the Deductible System is to establish the amount owed by the member and the amount covered by the plan for processed claims.

- **Deductible Types:** Below are the deductible types.
 - Standard Deductible (DED): Member dollars (100% claim cost) accumulate toward Individual and/or Family Limits. When the limit is met, the plan will pay a portion of the claim.
 - Maximum Out-of-Pocket (MOP): Member dollars (copay/coinsurance) accumulate toward individual and/or family limits. When the limit is met, the plan will pay 100% of the claim.
 - Maximum Paid by Plan (MPP): Plan paid dollars accumulate toward individual and/or family limits. When the limit is met, the plan will NOT pay any portion of the claim.
 - Lifetime Maximum Paid by Plan (LFE): Plan paid dollars accumulate toward an individual limit for an unlimited time period. When the limit is met, the plan will NOT pay any portion of the claim.
 - Maximum Number of Scripts (SCR): Scripts accumulate toward individual and/or family limit. When the limit is met, the plan will NOT pay any portion of the claim.

All of the information on this page constitutes a trade secret, privileged or confidential information, as such terms are interpreted under the Freedom of Information Act and applicable case law.

- Deductible (Part D) (DD1): Total claim dollars accumulate toward an individual limit.
- Initial Coverage (Part D) (IC1): Total claim dollars accumulate toward an individual limit.
- Coverage Gap (Part D) (CG1): True Out-of-Pocket (TrOOP) and Other Qualified Payer dollars accumulate toward an individual limit.
- **Benefit Periods**: The time period assigned for dollars to accumulate to a specific deduct ID. The Benefit Period can cover any time period.
- **Frequency**: The frequency that an accumulation will start over within a Benefit Period (3 = 3). The accumulation will start from zero at the beginning of the fourth month.

Criteria

The Deductible System allows the user to select more detailed criteria to further define a specific type. The criteria may not be used in further defining the Medicare Part D phase types.

- Medical/Rx—Medical claims, prescriptions claims, or both
- In/Out Network—In-Network claims, Out-of-Network claims, or both
- Retail/Mail Order—Retail drugs, mail order drugs, or both
- Brand/Generic—Brand drugs, generic drugs, or both

Individual and/or Family Limits/Accumulations: Individual accumulations are summed to meet an individual or family limit. Individual family member's accumulations are summed, as a family, to be compared to the family limit.

Rules can be set to require a certain number of family members to meet the individual limits before considering the family limit met.

Group and Member Level

Deductible benefit periods and plan ID can be housed on the group record or the member record.

If on the group record, all members in the group will have the same benefit period and plan ID.

If on the member record, each member can have different benefit periods and plan IDs.

Clear and Build

A Clear and Build is the process of clearing member and plan accumulations and rebuilding the accumulations based on the current deductible plan ID. Claims history is used to rebuild. This will not change the way a claim pays. It only redistributes the amounts to the correct phase. It also does not take into consideration pricing or benefit plan structure.

Deductible Transfer

Deductible Transfer indicates whether a member's deductible information transfers as the member moves

- from group to group within a client
- from client to client within a customer
- from customer to customer within a group of related customers

- **Deductible Transfer Code**

The Deductible Transfer Code is a plan-defined code that works in conjunction with the Deductible Transfer indicator on the client record. Together, they indicate how to handle a member's deductible record if the member moves to another group, client, or related customer. This code is sent on the member record.

The Deductible Transfer Begin Date represents the first date the member's deductible record may be transferred. If the Deductible Transfer Code field is used, the Deductible Transfer Begin Date field is required to allow the deductible record to transfer.

The Deductible Transfer End Date represents the last date the member's deductible record may be transferred. If the Deductible Transfer Code field is used, the Deductible Transfer Begin Date field is required to allow the deductible record to transfer.

In order for accumulations to transfer, the following must take place:

- The fill date of the claim falls within the Transfer Dates of the member record under which the claim is processed
- The case IDs must match
- The Deductible Transfer Codes must match
- The Benefit Period Begin Dates must match
- Only "like" accumulators will successfully transfer

Rollover moves accumulated amounts from one benefit period, or portion of the benefit period, into another benefit period. A Rollover can only be done by submitting a request to IT. Rollover uses the batch preload process to apply the accumulated dollars being rolled over.

Miscellaneous (items that interact with the Deductible System)

- SWRP: Supplemental Wrap. This program wraps a claim with both commercial and Part D benefits together.
- SPAP: State Pharmaceutical Assistance Programs (SPAP) are state-funded programs that provide financial assistance for prescription drugs to low income and medically needy senior citizens and individuals with disabilities.
- Safety Net: This program allows a certain set of pharmacies to pay the member's liability of a claim by being identified under a specific authorization code.

- IHS: Indian Health Services. This program is responsible for providing federal health services to American Indians and Alaska Natives. IHS is a type of pharmacy that is subsidized by the federal government to pay for services received by Native Americans. Payments made on behalf of IHS will not apply towards a member's TrOOP accumulation because they are federally subsidized.
- LIS: Low Income Subsidy. This program provides additional premium and cost-sharing assistance to beneficiaries with low income and limited resources.
- Catastrophic (Part D) (CAT): CAT is the final phase in Part D claims processing. After satisfying the Coverage Gap limit, all claims will process as Catastrophic.

Deductible Reporting

- TSO DEDLIST—This is a job that runs against the Legacy Deductible system and will show the accumulations that are currently in the member or plan accumulations for members based on specific criteria that is entered.
- TSO DEDRPT—This job can be run to show the accumulations in the various buckets for the enhanced deductible system.
- TSO IPDEDUCT—This job will run the expiring deductibles for a specific customer/client/group. This can be run at the group and/or member level.
- TSO PLANRPT—This job will show what deductible IDs exist for a specific customer or customer/client. This can also be done on a member-level basis.
- TSO DEDGRID—This report will pull all of the deductible IDs for a customer number in the enhanced deductible system. This report shows most, but not all, of the various parameters on a deductible ID. This is designed to be formatted into an Excel layout today.
- TSO GPCOVDED—This report resembles the group master list job but also contains the deductible benefit period begin date, end date, and deductible ID.

Deductible User Maintenance

- TSO DEDCLNT—This job is used to renew deductible IDs at the client level so that each group does not have to be done individually.
- TSO DEDRNEW—This is a job that renews deductible IDs at the group and/or member levels.

File Processing

- **Batch Preload**
 - PMIP3278—This is within the Legacy Deductible system. This process will load dollars to member or plan buckets as either add, subtract, or a full replacement.
 - PMIP9700—This is within the Enhanced Deductible system. This process loads dollars; however, it does not take into account being able to load dollars into certain categories such as generic/brand, retail/mail order, etc.
 - PMIP9710—This is within the enhanced system. This process loads dollars into any bucket type regardless of set up (i.e. generic/brand, retail/mail order).
- **MQ Series**—This process allows Argus and the customer an efficient way to synchronize the sharing of medical and pharmacy claims dollars. Within MQ, deductible system accumulator data is processed on a near real-time basis.

Constraints

- Coverage code level is not allowed.
- Currently utilizing two deductible systems.
- Order or processing is static and cannot be changed.
- Documentation of Transfer rules need to be simplified.
- Lack of flexibility in user requested reports. Must be requested from IT.
- Lack of flexibility in the definition of multiple accumulators of the same type.

Business Needs and Wants

Needs

This section outlines the needs that are the highest priority items to be included in the final project needs. Argus will make every effort to include all of the items below as the project timeline allows.

Feature Number	List of Features
N01	Ability to designate how many members must meet their individual deductible before the family deduct is applied.
N02	Ability to report a list of members who have met their deductible as well as when the deductible was met.
N03	Ability to report with all of the criteria currently available via CLISTS. CLISTS are reports used by internal Argus associates to review customer group and member information.
N04	All current online functionality will be present in the new application unless Business specifically asked to have it removed.
N05	Allow the ability to apply to or exclude from buckets based on criteria. Allow for multiple buckets of the same type while having the ability to include or exclude based on certain criteria.
N06	Allow the ability to assign dollars from one Deductible Benefit Period into another Deductible Benefit Period.
N07	Have the ability for all deductible types to work independently.
N08	Have the ability to combine deductible types (make sure to allow a Part D set up with a commercial type).
N09	Have the ability to determine if member dollars, plan dollars, or both should apply towards an accumulation.
N10	Have the ability to report who is attached to what Deduct ID.
N11	Have the ability to set copay assignments based on where the member's bucket is located.
N12	Have the flexibility to name deduct IDs (work like coverage code today).
N13	Need the ability to report what is within the deduct ID.

All of the information on this page constitutes a trade secret, privileged or confidential information, as such terms are interpreted under the Freedom of Information Act and applicable case law.

Feature Number	List of Features
N14	Need the ability to set copay/coinsurance/allowance based on accumulator dollars.
N15	The ability to apply all current security functionality/restrictions.
N16	The ability to redistribute dollars from the claims into the accumulators (clear and build).
N17	Need the ability to exclude all claims from deductible.
N18	Ability to prioritize the order of payment processing (such as SPAP, SN, SWRP).
N19	Create clearer actions when loading a preload. Ex: Add, subtract, combination of both or replace.
N20	Deductible Query Function: Ability to input deductible amounts, accumulations, and indicators and query for the applicable deductible ID.
N21	Have the ability to assign what the dollars and copays should be in a split claim (applies to Part D today, but not commercial).

Wants and/or Future Enhancements

This section will outline all potential requested enhancements to the initial solution. The items in this section are not likely to be included in the final project needs. They are included only to give the Argus IT team a picture of potential future enhancements. The items listed in this section may or may not be deemed necessary upon complete analysis of the individual items. Change control requests will not be created for these items moving in and out of the project. Functionality to be delivered will be stated in the requirements document. Items moved out of this project may be scheduled in future, more appropriate projects.

Want Number	List of Wants
W01	Have the ability to associate deductible ID at any level: Customer, Client, Coverage Code, Group, and Member.
W02	Display accumulator dollars using currency formats.
W03	Develop the ability to prioritize buckets within a deductible ID-order of processing.
W04	Allow for unlimited effective dates for a deduct ID. Maintain the effective date standards.
W05	Allow parameters or values within a deduct ID to be updated instead of having to create a new deduct ID.
W06	Always perform a met check (will not be dependent upon alt. business flag).
W07	Allow for frequency to apply to any bucket.
W08	Update Processing Options application to include deductible parameters as well as the ability to report on parameters.
W09	Have the ability to load multiple preloads manually or via mass update.

All of the information on this page constitutes a trade secret, privileged or confidential information, as such terms are interpreted under the Freedom of Information Act and applicable case law.

Want Number	List of Wants
W10	The ability to mass add, update, and delete.
W11	Ability to make deductible conditional.
W12	Have the flexibility to share deduct IDs within a customer set.
W13	Have the ability to store Maintenance History.
W14	Require tracking ID when adding, updating, or deleting.
W15	Create security.
W16	Need the ability to view claims that calculated towards limits in the deductible system.
W17	Need the ability to view all the claims that applied to a bucket based on a combination of real claims and test claims.
W18	Have the ability to hyperlink to other areas of the system.
W19	Better search criteria: Less requirements to search.
W20	Have the ability to handle LIS 4 Members.
W21	Ability to count the number of fills for a drug, drug category, drug table for a specified time frame (e.g., number of fills of Drug X/Drugs on Table X/C2 drugs/etc. per month).
W22	Have the option to select what buckets to move over.
W23	Have the ability for a user to run a case level clear and build.
W24	Need the ability to have a discount regardless of the phase in part D and commercial.
W25	Create the ability to view the CAT Phase.
W26	Ability to identify what portion of the claim was picked up by other payer(s).
W27	Have the ability to differentiate SWRP MOP dollars for retail versus mail order.
W28	Ability to view and report the source of a preload as well as the user who performed the update.
W29	Ability to have the preload counts automatically feed into the HiAffinity billing system.
W30	Have the ability to run a prelim and final in all environments for all batch functions.
W31	Have the ability to report at any hierarchy level the dollars paid in deduct, MOP, etc. for members who have met specified types of buckets including the claims that filled the bucket.
W32	For reporting: have the ability to pull claim information by date range.
W33	Deductible file load output reports need to provide a summary of the number of records added, rejected, questioned, etc. and a detailed document detailing out the line on the input file that is in question or rejected.
W34	Make file output reports comprehensive, include all changes, reflect the original

All of the information on this page constitutes a trade secret, privileged or confidential information, as such terms are interpreted under the Freedom of Information Act and applicable case law.

Want Number	List of Wants
	value and date of its change, reflect the new value and the date of its change, export/importable to excel sortable (batch loads).
W35	Ability for users to be given the appropriate permission to see everything they have authority to see as well as see what their end client would see without being forced to log out of the system.
W36	Ability to maintain one login ID to have visibility in both standard and "limited" views.
W37	Display all deductible information within one screen on the claim.
W38	Create the ability to make an entry once and have it apply to multiple environments.
W39	Need enhancement to store claim test history.
W40	Have the ability to test split claims.
W41	Update Hybrid Desktop.
W42	Have the ability for frequency to be calculated based on the benefit period begin date.
W43	Ability to choose a family limit to be met before the individual limit.
W44	Ability to apply calculated member cost share to the deductible.
W45	Ability to apply the copay before the deductible and only the cost share after copay applies to the deductible.
W46	Have the ability for group to hold more than one deduct ID.
W47	Need the ability to view all of the family accumulation regardless if the family is in different groups
W48	Ability to view what the dollars are or will apply to the member/family accumulator.
W49	Ability to move a member's bucket with the member regardless of the bucket set up type.
W50	Be able to differentiate between member paid difference and network differential.
W51	Enhance the functionality for deductible buckets not to be reset when changes within the benefit period occur.
W52	Ability to add or update a previous- or future-dated benefit year.
W53	Ability for Part D business to choose whether preload dollars should be Part D dollars.
W54	Create an online option to run a rollover. Create a front-end application to allow a user to build a preload based on selected criteria that would assist with the rollover.
W55	Have the ability to know what the plan dollars and member's copay is before it gets to deductible and what it is as it processes through each section; this includes: • SWRP • SPAP • SN

All of the information on this page constitutes a trade secret, privileged or confidential information, as such terms are interpreted under the Freedom of Information Act and applicable case law.

Want Number	List of Wants
	IHS
W56	Ability to know where a member is at in their bucket prior to processing a claim and where they will be at after the claim processes.
W57	Have the ability to know when a claim is about to split.

Business Assumptions

1. All current online functionality will be present in the new application unless Business specifically asked to have it removed.
2. If IT creates multiple projects to deliver the solution, the delivery dates will be close enough to allow for proper testing and implementation.
3. When making decisions, take into account a balance between operational processes and corporate stewardship, as well as representing all customers and corporate Argus.
4. Adhere to a process of customer involvement to obtain input.
5. Resolution for escalated issues will be timely.
6. The Business RxNova™ standards in the following areas will apply to this project:
 - i. Security
 - ii. Interface
 - iii. Hyperlinking
 - iv. Add, Update, Delete
 - v. Search
 - vi. Entity Information: IDs, Names, Notes, Tags, Tracking IDs
 - vii. Effective Date Logic
 - viii. Field Validation
 - ix. Error Handling
 - x. Help
 - xi. Import/ Export
 - xii. Mass Updates
 - xiii. File Processing
 - xiv. Reporting
 - xv. Lists
 - xvi. Maintenance History
 - xvii. Unsaved Data
 - xviii. Session Availability
 - xix. Multiple Sessions
 - xx. Active/ Inactive Status
 - xxi. Copy
 - xxii. Screen Print
 - xxiii. Date Logic
 - xxiv. Templates
 - xxv. Uniqueness

Business Project Risks

- Subject matter experts (SMEs) availability for interviews and spending time reviewing documentation when requested.

All of the information on this page constitutes a trade secret, privileged or confidential information, as such terms are interpreted under the Freedom of Information Act and applicable case law.

- Cooperation with various departments to obtain information about how the department uses the system.
- Enhancements/changes on systems not included in the initial redesign effort need to be evaluated and coordinated with the Redesign Project Team.
- This project is dependent on three things: resources, time, and cost. A change in any one of them affects the outcome of the project.
- Information may become outdated for the products and services listed as informational.

Business Project Dependencies

Vendor Needs

N/A

User Acceptance

Criteria

- The project is deemed complete when all components and programs created for this project have been installed to Production.
- There will be no negative impacts to current claims processing.
- All identified stakeholders will need to provide sign-off indicating each need and feature is working correctly.

Access Needs

- Specific customer users will need access to user acceptance testing (UAT).
- Specific customer users will need access to Production.
- Current 3270 and/or GUI access to complete testing for internal and external users.
- Web access for internal and external users to all other RxNova™ applications.
- Security to all customers within a Customer Set.

Customer Deliverables

TBD

Business Impact

Represents both internal and external impacts:

All of the information on this page constitutes a trade secret, privileged or confidential information, as such terms are interpreted under the Freedom of Information Act and applicable case law.

- Operational processes will need to be created to support the RxNova™ Deductible system.
 - Each option will necessitate a change in process. The extent of the changes will be evaluated with each option and will involve the groups affected.
- Conversions to the new system will require some data review and/or auditing to determine best method of implementation for the customer. A work group will need to be created containing representation from RxNova™, Eligibility, Benefits, Client Services, and the customer to make recommendations for implementation.
- Options set up in Deductible may necessitate training. The extent of training will be evaluated with each option and will involve the groups affected.

Billing

N/A

External

Notification Needs

Normal RxNova™ notification process will be used.

Business Needs Category Definitions

Category	Definition
Applications/Systems–Processing	IT/Web impacted applications not specifically identified with a category
Applications/Systems–User Interface	IT/Web impacted user interfaces not specifically identified with a category
Authentication	User and password security
Benefits	Benefits processes and/or procedures impact (e.g., design setup, etc.)
Billing	Billing needs or processes (e.g., billing feeds or reports)
Call Center	Call Center process impact (IPNS 3270 or IPNS GUI changes may also be an impact)
Clinical and DUR	New or modified therapy protocol, drug edits, messaging, clinical reporting, etc.
Connectivity	Building connectivity between Argus and an outside vendor/customer for transmission of files and/or data
Deductible Process	Deductible process impact (e.g., Deduct ID, Enhanced Deductible, TrOOP, etc.)
Eligibility	Eligibility process impact (e.g., file types, timing layouts, coordination of benefits, etc.)
Finance	Finance systems or process impact (e.g., PCT/WTX, funding, etc.)
Help Desk	Help Desk process impact
Macros	Build and/or modify macros for file/claim load activity, etc.
Operations	Operational procedures that need to be defined or modified and may require documentation, job-specific training, root cause analysis, etc.
Output	Changes to external interface files or physical output (e.g., letters, checks, etc.)
Permission	Business function or task (e.g., Add, Update)
Pharmacy Networks	Network types, ANAs Wrap, etc.
Pricing	Addition and/or modification of claims pricing logic/code
Procedural	Procedures that need to be defined or modified and may require changes to documentation, day-to-day support, turn times, etc.
Production	Production effort including if there is a support need identified
Rebate Administration	Rebate analysis and modeling, processing, reporting, etc.

All of the information on this page constitutes a trade secret, privileged or confidential information, as such terms are interpreted under the Freedom of Information Act and applicable case law.

Category	Definition
Regulatory	Compliance impact (e.g., state or federal mandated compliance, PDE, EOB, etc.)
Reporting	New reports are required or existing reports require modifications.
Security	Create and/or modify user access (e.g., IPNS GUI, IPNS 3270, MyArgus, RxNova™, etc.).
Single Sign on	The ability to jump from one application to another without the need to re enter username and password.
Testing (QC, UAT)	QC or UAT effort including if there is a support need identified for these teams
Training	Training groups need to develop materials to support the project (e.g., IPNS GUI, IPNS 3270, RxFocus II, Rebate Admin Tool, etc.).

All of the information on this page constitutes a trade secret, privileged or confidential information, as such terms are interpreted under the Freedom of Information Act and applicable case law.

IT Background and Objectives

The Argus RxNova™ Deductible project will provide a web-based application that provides the ability to establish and maintain information regarding accumulator limits and the values applied toward those limits. An accumulator component will allow the user to indicate the rules and limits that the system must apply to the specific accumulators within a component. Argus will modify Point of Sale (POS) to use the rules and limits within the accumulator component to process a claim and update the accumulators.

IT Requirements

Detailed Requirements

Need/Feature 1–Online Accumulation Facility

Provide an online facility to add, update, delete, and search accumulator information.
(*N01, N04, N05, N07, N08, N09, N12, N17, W01, W02, W03, W04, W05, W07, W11, W14, W18, W19, W21, W24, W44, W45, W52*)

Detailed Requirements

Requirement 1.1

Provide an online facility that requires a user to enter a tracking ID to add, update, and delete the following information for an accumulator component:

- Associated Benefit Customer Set
- Accumulator ID
- Accumulator Name
- Indicator to Accumulate Dollars
- Processing Order of the Accumulators
- Accumulators Associated to the Component
- Apply DED TO MOP Indicator
- Status

Requirement 1.2

Provide an online facility that requires a user to enter a tracking ID to add, update, and delete the following information for an accumulator:

- Associated Accumulator ID
- Accumulator Type
- Individual Limit
- Family Limit
- Number of Family Members

All of the information on this page constitutes a trade secret, privileged or confidential information, as such terms are interpreted under the Freedom of Information Act and applicable case law.

- Medical/RX Indicator
- Network Indicator
- Retail/Mail Order Indicator
- Brand/Generic Indicator
- Frequency
- Frequency based on Calendar/Benefit Period
- Rollover Frequency
- Rollover Limit
- Cost Applied
- Apply In/Out Indicator
- Mail Order Indicator
- Exclude MPD Indicator
- Under MPP
- Individual MPP Percent
- Family MPP Percent
- Apply MOP Copay/Coinsurance
- Dollars Types Applied
- Discounts Applied

Requirement 1.3

Provide the ability to search for an accumulator or accumulator component using the following criteria:

- Benefit Customer Set
- Customer Number
- Accumulator ID
- Accumulator Type
- Medical Rx Indicator
- Network Indicator
- Retail/Mail Order Indicator
- Brand/Generic Indicator

Requirement 1.4

Provide the ability to hyperlink to the following facilities:

- Maintenance History
- Report Requests
- Conditions

Requirement 1.5

Provide the ability to establish conditions at the accumulator level and to add accumulator types to the current conditions application.

Need/Feature 2–Deductible Processing within POS

Enhance POS to use the parameters established on the accumulator and accumulator component.

(N01, N05, N18, N21, W06, W08, W20, W55, W56, W57)

Detailed Requirements

Requirement 2.1

Modify POS processing to include all of the newly established options and conditions on the accumulator and accumulator component.

Requirement 2.2

Modify POS processing to always check to see what amounts the member has met for each accumulator.

Requirement 2.3

Modify POS processing to provide the ability to process reversals for Low-Income Cost-Sharing Subsidy (LICS) 4 Members and verify the member paid portion for subsequent transactions is correct. .

Requirement 2.4

Modify POS processing to have the ability to identify when a claim is going to split and assign the dollars and copays for a split claim.

Need/Feature 3–Preload

Modify the manual and batch preload process.

(N19, W09, W30, W53)

Detailed Requirements

Requirement 3.1

Provide an online facility that allows a user to process a manual preload. Argus will modify this process to allow the user to indicate if the transaction is adding, subtracting, or replacing the current accumulation amount. This facility will allow multiple transactions to be entered and processed simultaneously.

Requirement 3.2

Modify the current batch preload process to indicate if the transaction is a replacement. If it is not a replacement of what is currently accumulated for the accumulator, the batch preload process will be modified to add or subtract based on the sign received on the file.

Requirement 3.3

Provide the ability to identify if preload dollars are Part D dollars.

Requirement 3.4

Provide the ability to indicate if the preload batch process must be in test or update mode. Data will only be committed when the batch process indicator is update.

Need/Feature 4–Batch Rollover

Modify the batch rollover process.
(N06, W22, W54)

Detailed Requirements

Requirement 4.1

Provide an online facility to process batch rollovers. This process will allow the user to identify what accumulators to move over to a new benefit period.

Need/Feature 5–Clear and Build

Modify the clear and build process.
(N16, W23)

Detailed Requirements

Requirement 5.1

Provide an online facility that allows a user to initiate the clear and build process at the following levels:

- Customer
- Client
- Group
- Member
- Case ID

Need/Feature 6–Transfer

Modify the transfer process.
(N04)

Detailed Requirements

Requirement 6.1

Provide an online facility that allows a user to initiate the transfer of like accumulator for the following transfer types:

- Customer to Customer
- Client to Client
- Group to Group

Need/Feature 7–Benefits

Modify the current benefit applications.
(N11, N14, W27)

Detailed Requirements

Requirement 7.1

Modify the benefits application to allow copay assignments based on the value of the accumulator and other conditional criteria.

Requirement 7.2

Modify the benefits application to set copay and coinsurance based on accumulator dollars.

Requirement 7.3

Modify the benefits application to handle supplemental wrap (SWRP) functionality.

Requirement 7.4

Provide the ability for an accumulator ID to be associated to a coverage code.

Requirement 7.5

Modify the existing benefits application to remove the deductible processing component.

Requirement 7.6

Modify the existing benefits application to remove the maximum allowed fills that resides in the dispensing limits component.

Need/Feature 8–Group and Member

Modify the eligibility group and member applications.
(W16, W25)

Detailed Requirements

Requirement 8.1

Modify the group and member applications within the eligibility project to allow the system to associate an accumulator ID to either a group or a member.

Requirement 8.2

Provide the ability within the member application to view the following values associated to the catastrophic phase:

- Number of Claims
- True Out-of-Pocket (TrOOP)
- Total Drug Spend

Requirement 8.3

Provide the ability within the member application to view the following values associated to each accumulator:

- Number of Claims
- Member Dollars
- Plan Dollars
- Accumulator Limit
- Date Limit was Met
- Amount to Meet Limit
- Excluded Amount

Need/Feature 9–Processing Options

Add the ability to indicate if an accumulator bucket should be reset or continue to accumulate when a new accumulator is added to an existing benefit period.

(CC1958)

Detailed Requirements

Requirement 9.1

Add a processing option to indicate whether or not an existing accumulator bucket associated to the accumulator should reset or continue accumulating to that bucket when a new accumulator is added to an existing benefit period.

Need/Feature 10–Claim Inquiry

Modify claim test.

(W26)

Detailed Requirements

Requirement 10.1

Modify the claim inquiry application to display the portion of the claim that other payers picked up.

Need/Feature 11–Claim Test

Modify claim test.

(W17, W39, W40)

Detailed Requirements

Requirement 11.1

Modify the claim test application to store claim accumulator history for seven days.

Need/Feature 12–Mass Change

Provide mass change functionality within the accumulator application.

(W10)

All of the information on this page constitutes a trade secret, privileged or confidential information, as such terms are interpreted under the Freedom of Information Act and applicable case law.

Detailed Requirements

Requirement 12.1

Provide the ability to maintain multiple accumulators and accumulator IDs through mass change through change or import.

Requirement 12.2

Modify the current mass change functionality in benefits to include the accumulator component.

Need/Feature 13–Copy

Provide copy functionality within the accumulator application.

Detailed Requirements

Requirement 13.1

Provide the ability to copy accumulators and accumulator components.

Need/Feature 14–History

Modify maintenance history.
(W13, W28)

Detailed Requirements

Requirement 14.1

Modify maintenance history to capture all changes to the accumulator and accumulator component. Maintenance history will also capture the user and source of the initiation of the preload, batch rollover, clear and build, and transfer processes.

Need/Feature 15–Hybrid Desktop

Modify Hybrid Desktop.
(W41)

Detailed Requirements

Requirement 15.1

Modify Hybrid Desktop to include a link to the new accumulator application.

Use Cases

Establish an Accumulator (New)

Maintain an Accumulator (New)

Delete an Accumulator (New)

Establish an Accumulator ID (New)

Out-of-Scope Requirements

Requirement

Have the flexibility to share deduct IDs within a customer set.

Need(s): W12

All of the information on this page constitutes a trade secret, privileged or confidential information, as such terms are interpreted under the Freedom of Information Act and applicable case law.

Requirement

Ability to have the preload counts automatically feed into the HiAffinity billing system.

Need(s): W29

Requirement

For reporting: have the ability to pull claim information by date range.

Need(s): W32

Requirement

Deductible file load output reports need to provide a summary of the number of records added, rejected, questioned, etc. and a detailed document detailing out the line on the input file that is in question or rejected.

Need(s): W33

Requirement

Make file output reports comprehensive, include all changes, reflect the original value and date of its change, reflect the new value and the date of its change, export/importable to Excel sortable (batch loads).

Need(s): W34

Requirement

Establish security so users can see what they have authority to view as well as what their end client can view.

Need(s): W35

Requirement

Establish security so users can see both standard and limited views.

Need(s): W36

Requirement

Display all deductible information within one screen on the claim.

Need(s): W37

Requirement

Create the ability to make an entry once and have it apply to multiple environments.

Need(s): W38

All of the information on this page constitutes a trade secret, privileged or confidential information, as such terms are interpreted under the Freedom of Information Act and applicable case law.

Requirement

Ability for the system to calculate frequency based on the benefit period begin date.

Need(s): W42

Requirement

Ability to choose a family limit to be met before the individual limit.

Need(s): W43

Requirement

Ability for a group to hold more than one deduct ID.

Need(s): W46

Requirement

Ability to view all of the family accumulation regardless if the family is in different groups.

Need(s): W47

Requirement

Ability to view what the dollars are or will apply to the member/family accumulator.

Need(s): W48

Requirement

Ability to move a member's bucket with the member regardless of the bucket set up type.

Need(s): W49

Requirement

Ability to differentiate between member paid difference and network differential.

Need(s): W50

Requirement

Enhance the functionality for the system so it does not reset the deductible buckets when changes within the Benefit period occur.

Need(s): W51

Front-End Business Scenarios

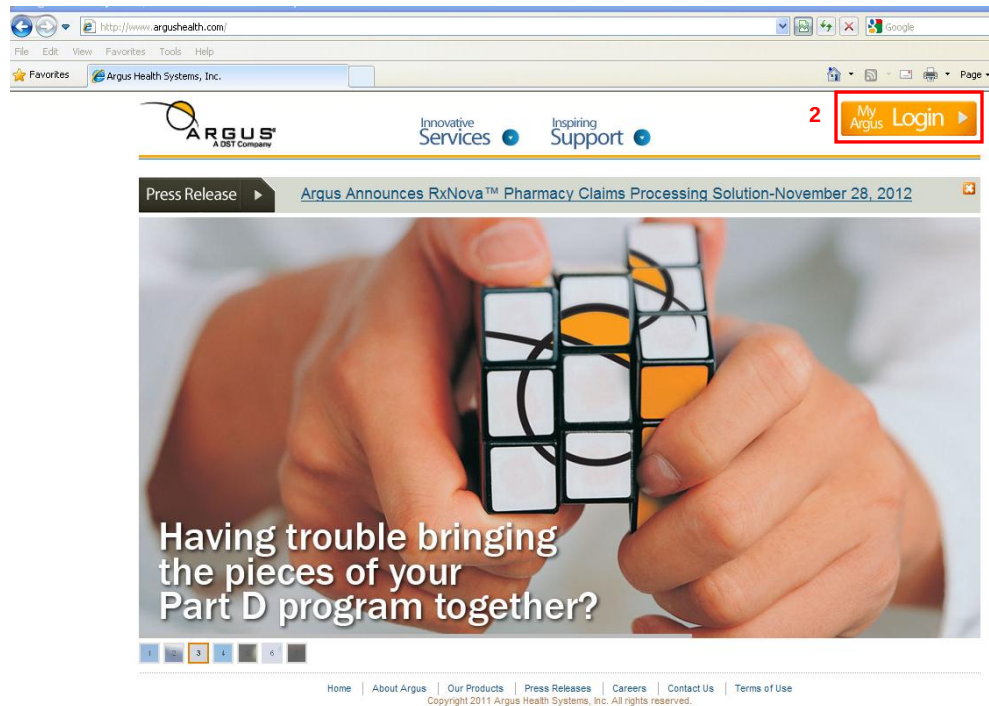

Scenario One: Search and View and Accumulator Component

Prerequisite

- The user has access to the [Argus Health Systems](http://www.argushealth.com/) website.
- The user has access to view the Accumulator Component for the identified benefit customer set.

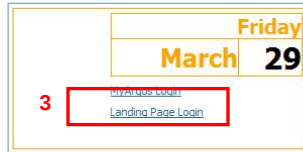

Course of Action

1. Go to the [Argus Health Systems](http://www.argushealth.com/) website.
2. Click the **MyArgus Login** button.

3. Click the **Landing Page Login** link.

All of the information on this page constitutes a trade secret, privileged or confidential information, as such terms are interpreted under the Freedom of Information Act and applicable case law.

4. Enter the **Username**.
5. Enter the **Password**.
6. Click **Login**.

Scenario Two: Manually Add an Accumulator Component

Prerequisite

- The user is logged into the [Argus Health Systems](#) website.
- The user has selected to Setup an Accumulator under the Plan Setup menu from the Landing Page.
- The user has add/update access to create a new Accumulator Component for the identified customer set.

Course of Action

1. Click the **New** button.

The screenshot shows the Argus Health Systems website interface. At the top, there is a navigation bar with the Argus logo and a menu with options: Claim, Customer Setup, Plan Setup, Lists, History, Pharmacy, Security, and Help. Below the menu, it says "Welcome, Keri McCall" and "Jump to:" with a "Go" button. On the right, there are links for "Browse Requests" and "Close Window".

The main content area is titled "Accumulator Home" and has tabs for "Mass Change" and "Reporting". In the top right corner of this area, there is a red box around a "New" button, with a red number "1" next to it.

On the left side of the main content area, there is a form for "Benefit customer set:" with the following fields:

- Benefit customer set: (dropdown menu)
- ID: (text input field)
- AM: (text input field)
- Name: (text input field)
- External ID: (text input field)
- Status: (dropdown menu)

Below these fields, there is a section for "Advanced Search Fields" with "Search" and "Reset" buttons.

2. Click the drop-down box in the pop-up and select a **Benefit customer set**.
3. Click **Next**.

The screenshot displays the ARGUS AOST HealthCare Company web application. At the top, a navigation bar includes links for Claim, Customer Setup, Plan Setup, Lists, History, Pharmacy, Security, and Help. Below this, a welcome message for Keri McCall is shown alongside a 'Jump to:' field and a 'Go' button. The main content area features a sidebar with 'Accumulator Home', 'Mass Change', and 'Reporting' tabs. The 'Accumulator Home' tab is active, showing a 'Benefit customer set:' dropdown, 'ID:', 'Name:', 'External ID:', and 'Status:' fields, along with 'Advanced Search Fields' and 'Search'/'Reset' buttons. A 'New' button is also present. A pop-up window is overlaid on the main content, titled 'Benefit customer set:', with a dropdown menu (labeled '2') and 'Next' (labeled '3') and 'Cancel' buttons.

All of the information on this page constitutes a trade secret, privileged or confidential information, as such terms are interpreted under the Freedom of Information Act and applicable case law.

4. Enter the **Tracking ID**.
5. Enter the **Reason** (optional).
6. Enter **Notes** (optional).
7. Enter the component **ID**.
8. Enter the component **Name**.
9. Enter the **External ID** (optional).
10. Select if the component will **Exclude from accumulation**.
11. Select the appropriate **Status**.
12. Click **Next**.

Below the navigation bar, a welcome message 'Welcome, Keri McCall' is visible on the left, and a 'Jump to:' field with a 'Go' button is on the right. A horizontal line separates the header from the main content area. In the main content area, there are two links: 'Browse Requests' and 'Close Window'. Below these links, there is a breadcrumb trail: 'Home > Accumulator Home > Accumulator Component'. The main content area is divided into two sections. The top section is a header for the 'Benefit customer set: ABC'. It contains fields for 'ID: AM11111111', 'Name: Accumulator Component Name', and 'Status: Ready for Use'. Below this header is a tabbed interface with five tabs: 'Header', 'Details', 'Priority', 'Notes', and 'Associations'. The 'Notes' tab is currently selected and highlighted in blue. To the right of the 'Notes' tab, the number '45' is displayed in red. Below the tabs, there is a large text area for entering notes, which is outlined with a red border. To the right of this text area, the number '44' is displayed in red. At the bottom right of the notes section, there are three buttons: 'Previous', 'Save', and 'Cancel'. The 'Save' button is highlighted with a red border.

The screenshot displays the ARGUS ADST HealthCare Company web application. At the top, a navigation bar includes links for Claim, Customer Setup, Plan Setup, Lists, History, Pharmacy, Security, and Help. Below this, a welcome message for Keri McCall is shown alongside a 'Jump to:' search field and a 'Go' button. The main content area features a breadcrumb trail: Home > Accumulator Home > Accumulator Component. A red box highlights a green message bar stating 'The information entered was successfully saved. (APRC0036)'. Below this, a table displays the details of an accumulator component. The table has columns for Benefit customer set, ID, Name, and Status. The data row shows 'ABC' for the customer set, 'AM11111111' for the ID, 'Accumulator Component Name' for the name, and 'Ready for Use' for the status. Below the table, there are tabs for Header, Details, Priority, Notes, and Associations. The 'Details' tab is active, showing a form with fields for Benefit customer set, ID, Name, External ID, Exclude from accumulation, and Status. To the right of these fields are buttons for Report, Copy, and Delete. At the top right of the details section, there are links for Copy Info, History, and a Make Updates button.

Scenario Three: Associate an Accumulator Component to a Coverage Code

Prerequisite

- The user has access to the [Argus Health Systems](#) website.
- The user has add/update access to modify an existing Coverage Code for the identified benefit customer set.

Course of Action

1. Click **Plan Setup**.
2. Click **Coverage Code**.

3. Enter the **Benefit Customer Set**.
4. Click **Search**.
