General Information

General Information

Overview

The Deductible Plan System (Deductible Plan) The Deductible Plan Maintenance System (Deduct) enables a user to establish a single deductible plan containing multiple plan limits (“buckets”). Each plan limits are based on deductibles, maximum out of pockets, maximums paid by plan and Lifetime maximums.

The primary function of the Deductible Plan System is to establish the amount owed by the member and the amount covered by the plan for processed claims. These limits may include:

- Deductible amounts for families and/or individuals (DED)
- Maximum out of pocket limits for families and/or individuals by annual, semi-annual, quarterly, or monthly periods (MOP)
- Maximum paid by plan limits for families and/or individuals by annual, semi-annual, quarterly, or monthly periods (MPP)
- Lifetime Maximum plan paid (individual only) limits and no benefit periods (LFE)

Additionally, the Deductible Plan System allows the user to create more specific limits for DED, MOP, MPP and LFE buckets. These limits may include:

- Medical/Rx – limits for medical claims, prescription claims, or both.
- Network – limits for In Network claims, Out of Network Claims, or both.
- Retail/Mail Order – limits for Retail drugs, Mail Order drugs, or both.
- Drug Specific – limits for drugs contained on a specific list.
- Brand/Generic – limits for Brand drugs, Generic drugs, or both.

The Deductible Plan System will also allow the user to view a member’s current deductible plan balances, number of scripts, and dates the member may have met a limit.

Accessing Deduct Plan

To use the Deduct Plan System, the user can select the Deductible Plan button from the IPNS tool bar.

2

Adding a Deductible Plan

Deductible Plan Main window

After selecting the Deductible Plan button from the IPNS toolbar, the above main menu will be displayed. This main menu will be used to Search, Add, and Update Deductible Plans, as well as view member deductible accumulations. This chapter will focus on adding a new deductible plan.

When adding a new deductible plan, the only required field is the Customer ID. After entering at least the customer ID, the user will press the “New” button and be directed to the Member Deductible Plan List screen in Edit Mode.

Add – Deductible “Bucket”

Under the new Deductible Plan System, each Deductible ID will need at least one “bucket”. After reaching the Multiple Deductible Plan List screen, the user will be able to add one or more bucket(s) to a Deductible ID.

When the user accesses the member deductible plan list screen, any information entered on the previous screen will be displayed. These values may be changed by the user.

The **Deductible Plan** field allows the user to input the deductible plan ID. The deductible plan ID is a 4 character, A/N user-defined field which identifies a specific deductible structure.

The **Plan Type** field specifies what type of plan bucket is created. In this field, the user can select Deductible (DED), Max Out of Pocket (MOP), Max Paid by Plan (MPP) or Lifetime Maximum (LFE). In this section, the user will create a Deductible bucket, therefore DED will be selected.

The **Medical Rx** field allows the user to create buckets for different claim types. In this field, the user can select All Claims (A), Pharmacy Claims Only (P), or Medical Claims Only (M).

The **Network** field allows the user to create buckets for different claim types. In this field, the user can select All Claims (A), In Network Claims Only (I), or Out of Network Claims Only (O).

The **Retail/Mail Order** field allows the user to create buckets for different claim types. In this field, the user can select All Claims (A), Retail Claims Only (R), or Mail Order Claims Only (M).

The **Drug Specific** field allows the user to enter a drug specific inclusion table name. Any drug contained on the table entered will be included in the bucket.

The **Brand Generic** field allows the user to create buckets for different claim types. In this field, the user can select All Claims (A), Brand Claims Only (B), or Generic Claims Only (G).

User will then select the “NEW” button on the bottom left portion of the screen and be directed to the Multiple Deductible Plan List screen. From this screen, the user will input the following values:

The **Individual Amount** field allows the user to enter the individual bucket limit amount. This field is a dollar amount and should be in a dollar amount format.

The **Family Amount** field allows the user to enter the family bucket limit amount. This field is a dollar amount and should be in a dollar amount format.

Order Process Code determines the order in which plan buckets will be filled. The default value for this field is “STND” (Standard), which means the order of processing will be Deductible, then Max Out of Pocket, then Max Paid by Plan.

The **Family Aggregate** field allows the user to determine the method by which claims are applied to the family limit for this specific bucket.

Frequency Number refers to the time period (in months) in which accumulation buckets will renew. For example, a value of 12 means the accumulation buckets will renew every 12 months.

The **Apply DED to MOP** option allows the user to apply any claim in the deductible bucket to the MOP bucket. This option can only be used for deductible buckets. If there are multiple deductible buckets in one plan, each bucket must contain the same value in the Apply DED to MOP field.

Rollover Frequency No indicates the number of times the MAB can rollover per month.

The **Rollover Limit Amount** is the member’s maximum MAB amount that can rollover next frequency.

Cost Applied allows the user to select which claim amount will be applied. Valid values for this field will be: A – Allowed, D – Deductible, S – Submitted, U – Usual and Customary.

Apply In/Out Indicator Identifies a pharmacy as being in or out of a plan’s pharmacy network and is stored on each claim record. This parameter allows a

member to have different limits (by plan type) for In Network versus Out of Network claims. Values are: **N** none, **A** All, **I** In, **O** Out

Mail Order Indicator allows the user to indicate how mail-order claims are applied toward a member's deductible, Maximum Out of Pocket (MOP), and Maximum Paid by Plan (MPP). Valid values for this field will be: A – Apply All, B – Apply Copay, D – Apply None.

Exclude Member Pay Difference (MPD) allows the user to indicate whether Member Pay Difference will apply to the MOP bucket. Valid values for this field will be: N – None, I – Include, E – Exclude.

Under Max Paid by Plan (MPP) option is not allowed for creating a DED bucket.

Individual/Family MPP Percent option is not allowed for creating a DED bucket.

 Brand Generic: A - All Family MPP pct:

Multiple Deductible Plan list window

After the data has been entered, the user will select the 'Add' button and the following message will be displayed:

Sample warning message

This message warns the user of several issues before the “bucket” is added to the database. First, all buckets under the same Deductible Plan ID must contain the same Order Process Code and Frequency Number. The values the user enters on this bucket will transfer to all buckets under the same Deductible Plan ID. Secondly, the Apply In/Out Indicator value will transfer to each identical plan and network type buckets under the Deductible Plan ID.

Add – Maximum Out of Pocket “Bucket”

Under the old system, deductible and max out of pocket limits were contained in one bucket. In the new system, the user can establish separate buckets for deductible and max out of pocket. With a few exceptions, the setup for a deductible and max out of pocket bucket is the same.

When the user accesses the member deductible plan list screen, any information entered on the previous screen will be displayed. These values may be changed by the user.

The **Plan Type** field specifies what type of plan bucket is created. In this field, the user can select Deductible (DED), Max Out of Pocket (MOP), Max Paid by Plan (MPP) or Lifetime Maximum (LFE). In this section, the user will create a Maximum Out of Pocket bucket, therefore MOP will be selected.

The **Medical Rx** field allows the user to create buckets for different claim types. In this field, the user can select All Claims (A), Prescription Claims Only (P), or Medical Claims Only (M).

The **Network** field allows the user to create buckets for different claim types. In this field, the user can select All Claims (A), In Network Claims Only (I), or Out of Network Claims Only (O).

The **Retail/Mail Order** field allows the user to create buckets for different claim types. In this field, the user can select All Claims (A), Retail Claims Only (R), or Mail Order Claims Only (M).

The **Drug Specific** field allows the user to enter a drug specific inclusion table name. Any drug contained on the table entered will be included in the bucket.

The **Brand Generic** field allows the user to create buckets for different claim types. In this field, the user can select All Claims (A), Brand Claims Only (B), or Generic Claims Only (G).

User will then select the “NEW” button on the bottom left portion of the screen and be directed to the Multiple Deductible Plan List screen. From this screen, the user will input the following values:

The **Individual Amount** field allows the user to enter the individual bucket limit amount. This field is a dollar amount and should be in a dollar amount format.

The **Family Amount** field allows the user to enter the family bucket limit amount. This field is a dollar amount and should be in a dollar amount format.

Order Process Code determines the order in which plan buckets will be filled. The default value for this field is “STND” (Standard), which means the order of processing will be Deductible, then Max Out of Pocket, then Max Paid by Plan.

The **Family Aggregate** field allows the user to determine the method by which claims are applied to the family limit for this specific bucket.

Frequency Number refers to the time period (in months) in which accumulation buckets will renew. For example, a value of 12 means the accumulation buckets will renew every 12 months.

The **Apply DED to MOP** option is not allowed for creating a MOP bucket.

Rollover Frequency No indicates the number of times the MAB can rollover per month.

The **Rollover Limit Amount** is the member’s maximum MAB amount that can rollover next frequency.

Cost Applied allows the user to select which claim amount will be applied. Valid values for this field will be: A – Allowed, D – Deductible, S – Submitted, U – Usual and Customary.

Apply In/Out Indicator Identifies a pharmacy as being in or out of a plan’s pharmacy network and is stored on each claim record. This parameter allows a member to have different limits (by plan type) for In Network versus Out of Network claims. Values are: **N** none, **A** All, **I** In, **O** Out

Mail Order Indicator allows the user to indicate how mail-order claims are applied toward a member's deductible, Maximum Out of Pocket (MOP), and Maximum Paid by Plan (MPP). Valid values for this field will be: A – Apply All, B – Apply Copay, D – Apply None.

Exclude Member Pay Difference (MPD) allows the user to indicate whether Member Pay Difference will apply to the MOP bucket. Valid values for this field will be: N – None, I – Include, E – Exclude.

Under Max Paid by Plan (MPP) option is not allowed for creating a MOP bucket.

Individual/Family MPP Percent option is not allowed for creating a MOP bucket.

Buttons: Yes No

Sample warning message

This message warns the user of several issues before the "bucket" is added to the database. First, all buckets under the same Deductible Plan ID must contain the same Order Process Code and Frequency Number. The values the user enters on this bucket will transfer to all buckets under the same

Deductible Plan ID. Secondly, the Apply In/Out Indicator value will transfer to each identical plan and network type buckets under the Deductible Plan ID.

Add – Maximum Plan Paid “Bucket”

The new system allows the user to create a separate bucket for accumulating plan paid dollars.

When the user accesses the member deductible plan list screen, any information entered on the previous screen will be displayed. These values may be changed by the user.

The **Plan Type** field specifies what type of plan bucket is created. In this field, the user can select Deductible (DED), Max Out of Pocket (MOP), Max Paid by Plan (MPP) or Lifetime Maximum (LFE). In this section, the user will create a Maximum Plan Paid bucket, therefore MPP will be selected.

The **Medical Rx** field allows the user to create buckets for different claim types. In this field, the user can select All Claims (A), Prescription Claims Only (P), or Medical Claims Only (M).

The **Network** field allows the user to create buckets for different claim types. In this field, the user can select All Claims (A), In Network Claims Only (I), or Out of Network Claims Only (O).

The **Retail/Mail Order** field allows the user to create buckets for different claim types. In this field, the user can select All Claims (A), Retail Claims Only (R), or Mail Order Claims Only (M).

The **Drug Specific** field allows the user to enter a drug specific inclusion table name. Any drug contained on the table entered will be included in the bucket.

The **Brand Generic** field allows the user to create buckets for different claim types. In this field, the user can select All Claims (A), Brand Claims Only (B), or Generic Claims Only (G).

User will then select the “NEW” button on the bottom left portion of the screen and be directed to the Multiple Deductible Plan List screen. From this screen, the user will input the following values:

The **Individual Amount** field allows the user to enter the individual bucket limit amount. This field is a dollar amount and should be in a dollar amount format.

The **Family Amount** field allows the user to enter the family bucket limit amount. This field is a dollar amount and should be in a dollar amount format.

Order Process Code determines the order in which plan buckets will be filled. The default value for this field is “STND” (Standard), which means the order of processing will be Deductible, then Max Out of Pocket, then Max Paid by Plan.

The **Family Aggregate** field allows the user to determine the method by which claims are applied to the family limit for this specific bucket.

Frequency Number refers to the time period (in months) in which accumulation buckets will renew. For example, a value of 12 means the accumulation buckets will renew every 12 months.

The **Apply DED to MOP** option is not allowed for creating a MPP bucket.

Rollover Frequency No indicates the number of times the MAB can rollover per month.

The **Rollover Limit Amount** is the member's maximum MAB amount that can rollover next frequency.

Cost Applied allows the user to select which claim amount will be applied. Valid values for this field will be: A – Allowed, D – Deductible, S – Submitted, U – Usual and Customary.

Apply In/Out Indicator Identifies a pharmacy as being in or out of a plan's pharmacy network and is stored on each claim record. This parameter allows a member to have different limits (by plan type) for In Network versus Out of Network claims. Values are: **N** none **A** All, **I** In, **O** Out

Mail Order Indicator allows the user to indicate how mail-order claims are applied toward a member's deductible, Maximum Out of Pocket (MOP), and Maximum Paid by Plan (MPP). Valid values for this field will be: A – Apply All, B – Apply Copay, D – Apply None.

Exclude Member Pay Difference (MPD) allows the user to indicate whether Member Pay Difference will apply to the MOP bucket. Valid values for this field will be: N – None, I – Include, E – Exclude.

Under Max Paid by Plan (MPP) option allows the user to indicate which the claim amount will be applied to the plan bucket. Valid values for this field will be: N – None, A – Cost Less Coinsurance, B – Total Cost

Individual/Family MPP Percent allows the user to designate a percentage the plan will pay for any claim over the individual or family plan limit. Valid values for these fields are numeric percentages, 00.0 – 99.9. This field is optional.

Sample warning message

This message warns the user of several issues before the "bucket" is added to the database. First, all buckets under the same Deductible Plan ID must contain the same Order Process Code and Frequency Number. The values the user enters on this bucket will transfer to all buckets under the same Deductible Plan ID. Secondly, the Apply In/Out Indicator value will transfer to each identical plan and network type buckets under the Deductible Plan ID.

Add – Lifetime (Individual only) Maximum “Bucket”

The new system allows the user to create a separate bucket for accumulating Lifetime plan paid dollars.

When the user accesses the member deductible plan list screen, any information entered on the previous screen will be displayed. These values may be changed by the user.

The **Plan Type** field specifies what type of plan bucket is created. In this field, the user can select Deductible (DED), Max Out of Pocket (MOP), Max Paid by Plan (MPP) or Lifetime Maximum (LFE). In this section, the user will create a Lifetime Maximum bucket, therefore LFE will be selected.

The **Medical Rx** field allows the user to create buckets for different claim types. In this field, the user can select All Claims (A), Prescription Claims Only (P), or Medical Claims Only (M).

The **Network** field allows the user to create buckets for different claim types. In this field, the user can select All Claims (A), In Network Claims Only (I), or Out of Network Claims Only (O).

The **Retail/Mail Order** field allows the user to create buckets for different claim types. In this field, the user can select All Claims (A), Retail Claims Only (R), or Mail Order Claims Only (M).

The **Drug Specific** field allows the user to enter a drug specific inclusion table name. Any drug contained on the table entered will be included in the bucket.

The **Brand Generic** field allows the user to create buckets for different claim types. In this field, the user can select All Claims (A), Brand Claims Only (B), or Generic Claims Only (G).

User will then select the “NEW” button on the bottom left portion of the screen and be directed to the Multiple Deductible Plan List screen. From this screen, the user will input the following values:

The **Individual Amount** field allows the user to enter the individual bucket limit amount. This field is a dollar amount and should be in a dollar amount format.

The **Family Amount** field allows the user to enter the family bucket limit amount. This field is a dollar amount and should be in a dollar amount format.

Order Process Code determines the order in which plan buckets will be filled. The default value for this field is “STND” (Standard), which means the order of processing will be Deductible, then Max Out of Pocket, then Max Paid by Plan.

The **Family Aggregate** field allows the user to determine the method by which claims are applied to the family limit for this specific bucket. Not applicable for (LFE)

Frequency Number refers to the time period (in months) in which accumulation buckets will renew. For example, a value of 12 means the accumulation buckets will renew every 12 months. Not applicable for LFE.

The **Apply DED to MOP** option is not allowed for creating a LFE bucket.

Rollover Frequency No indicates the number of times the MAB can rollover per month.

The **Rollover Limit Amount** is the member's maximum MAB amounts that can rollover next frequency.

Cost Applied allows the user to select which claim amount will be applied. Valid values for this field will be: A – Allowed, D – Deductible, S – Submitted, U – Usual and Customary.

Apply In/Out Indicator Identifies a pharmacy as being in or out of a plan's pharmacy network and is stored on each claim record. This parameter allows a member to have different limits (by plan type) for In Network versus Out of Network claims. Values are: **N** none, **A** All, **I** In, **O** Out

Mail Order Indicator allows the user to indicate how mail-order claims are applied toward a member's deductible, Maximum Out of Pocket (MOP), and Maximum Paid by Plan (MPP). Valid values for this field will be: A – Apply All, B – Apply Copay, D – Apply None.

Exclude Member Pay Difference (MPD) allows the user to indicate whether Member Pay Difference will apply to the MOP bucket. Valid values for this field will be: N – None, I – Include, E – Exclude.

Under Max Paid by Plan (MPP) option allows the user to indicate which the claim amount will be applied to the plan bucket. Valid values for this field will be: N – None, A – Cost Less Coinsurance, B – Total Cost

Individual/Family MPP Percent allows the user to designate a percentage the plan will pay for any claim over the individual or family plan limit. Valid values for these fields are numeric percentages, 00.0 – 99.9. This field is optional.

Searching For a Deductible Plan

Inquire – Deductible Plan

Deductible Plan Main window

When the user searches for a deductible plan, the only required search field is Customer ID. Entering information in the other plan criteria fields will further specify the search. After the user has entered the desired information, the 'OK' button is selected and the search results are displayed on the Member Deductible Plan List screen.

Cust ID	Deductible Plan	Plan Type	Medcl RX	Ntwk Ind	Retail MO	Drug Specific	Brnd Grnc	Individual Amount	Family Amount

Multiple Deductible Plan list window

Each deductible plan “bucket” is displayed as one row in the window on the top portion of the screen. When the row is highlighted, the parameters for that bucket are displayed in the bottom half of the window.

If the user wants to make a change to the search criteria, the “Re-Search” button can be pressed, which will take the user back to the previous search screen.

Updating a Deductible Plan

Deductible Plan Main window

When updating a bucket, the user will enter search criteria into the Deductible Plan Main screen. Like the Inquiry mode, the customer ID field is the only required field. After entering the desired search criteria, the member will press the “OK” button.

Update – Deductible “Bucket”

After the user presses the “OK” button on the Deductible Plan Main screen, the Multiple Deductible Plan List will be displayed in Inquire mode.

In order to update the deductible bucket, the user will highlight the desired “DED” plan type bucket and then press the “Activate Edit Mode” button. Once the button is pressed each field on the screen will become editable.

Multiple Deductible Plan window

These values may be changed by the user:

The **Plan Type** field specifies what type of plan bucket is created. In this field, the user can select Deductible (DED), Max Out of Pocket (MOP), Max Paid by Plan (MPP) or Lifetime Maximum (LFE). In this section, the user will create a Deductible bucket, therefore DED will be selected.

The **Medical Rx** field allows the user to create buckets for different claim types. In this field, the user can select All Claims (A), Prescription Claims Only (P), or Medical Claims Only (M).

The **Network** field allows the user to create buckets for different claim types. In this field, the user can select All Claims (A), In Network Claims Only (I), or Out of Network Claims Only (O).

The **Retail/Mail Order** field allows the user to create buckets for different claim types. In this field, the user can select All Claims (A), Retail Claims Only (R), or Mail Order Claims Only (M).

The **Drug Specific** field allows the user to enter a drug specific inclusion table name. Any drug contained on the table entered will be included in the bucket.

The **Brand Generic** field allows the user to create buckets for different claim types. In this field, the user can select All Claims (A), Brand Claims Only (B), or Generic Claims Only (G).

The **Individual Amount** field allows the user to enter the individual bucket limit amount. This field is a dollar amount and should be in a dollar amount format.

The **Family Amount** field allows the user to enter the family bucket limit amount. This field is a dollar amount and should be in a dollar amount format.

CONFIDENTIAL AND PROPRIETARY – FOR INTERNAL USE ONLY – DO NOT DISCLOSE.
Do not distribute to outside parties without written approval of an Argus Health Systems, Inc. officer.

Order Process Code determines the order in which plan buckets will be filled. The default value for this field is “STND” (Standard), which means the order of processing will be Deductible, then Max Out of Pocket, then Max Paid by Plan.

The **Family Aggregate** field allows the user to determine the method by which claims are applied to the family limit for this specific bucket.

Frequency Number refers to the time period (in months) in which accumulation buckets will renew. For example, a value of 12 means the accumulation buckets will renew every 12 months.

The **Apply DED to MOP** option allows the user to apply any claim in the deductible bucket to the MOP bucket. This option can only be used for deductible buckets. If there are multiple deductible buckets in one plan, each bucket must contain the same value in the Apply DED to MOP field.

Rollover Frequency No indicates the number of times the MAB can rollover per month.

The **Rollover Limit Amount** is the member’s maximum MAB amounts that can rollover next frequency.

Cost Applied allows the user to select which claim amount will be applied. Valid values for this field will be: A – Allowed, D – Deductible, S – Submitted, U – Usual and Customary.

Apply In/Out Indicator Identifies a pharmacy as being in or out of a plan’s pharmacy network and is stored on each claim record. This parameter allows a member to have different limits (by plan type) for In Network versus Out of Network claims. Values are: **N** none, **A** All, **I** In, **O** Out

Mail Order Indicator allows the user to indicate how mail-order claims are applied toward a member's deductible, Maximum Out of Pocket (MOP), and Maximum Paid by Plan (MPP). Valid values for this field will be: A – Apply All, B – Apply Copay, D – Apply None.

Exclude Member Pay Difference (MPD) allows the user to indicate whether Member Pay Difference will apply to the MOP bucket. Valid values for this field will be: N – None, I – Include, E – Exclude.

Under Max Paid by Plan (MPP) option is not allowed for creating a DED bucket.

Individual/Family MPP Percent option is not allowed for creating a DED bucket.

When finished updating the bucket, the user can save the changes by pressing the “Update” button and then pressing the “Cancel Edit Mode” button.

After the user selects the “Update” button, the following message will be displayed indicating the record has been updated:

Update complete message

Update – Maximum Out of Pocket “Bucket”

After the user presses the “OK” button on the Deductible Plan Main screen, the Multiple Deductible Plan List will be displayed in Inquire mode.

In order to update the Max Out of Pocket bucket, the user will highlight the desired “MOP” plan type bucket and then press the “Activate Edit Mode” button. Once the button is pressed each field on the screen will become editable.

Member Deductible Search

The new Deductible Plan system will also allow the user to search for a member's deductible plan accumulation activity. The system will display the accumulations for each of the member's buckets, as well as the member's deductible plan information.

Note: The Member Search functionality will be Inquiry only. It will not be possible for the user to Add or Update member accumulations through Member Search

In order to access the member accumulations, the user will open the Deductible Plan application in the normal fashion. When viewing the Deductible Plan Main Menu, the user will select the "Member Search" radio button in the top portion of the screen. Upon selection of the member search, the member criteria fields will become active and allow data input.

The screenshot shows a software window titled "(QC Environment) Deductible Plan Main". At the top, there is a "Search Control" section with two radio buttons: "Plan Search" (unselected) and "Member Search" (selected). Below this, the window is divided into two main sections: "Plan Criteria" on the left and "Member Criteria" on the right. The "Plan Criteria" section includes fields for "Customer ID" (containing "ARGUS"), "Deductible Plan", "Plan Type" (a dropdown menu), "Medical RX" (a dropdown menu), "Network" (a dropdown menu), "Retail/MD" (a dropdown menu), "Drug Specific", and "Brand Generic" (a dropdown menu). The "Member Criteria" section includes fields for "Customer ID" (containing "ARGUS"), "Client ID", "Group ID", "Member ID", and "Benefit Begin Date" (with a date format mask "MM/DD/CCYY"). At the bottom of the window, there are four buttons: "OK", "New", "Cancel", and "Help".

Member Search on Deductible Plan Main window

Customer ID and Client ID are the only fields required for a member search. If the user wishes to further limit the search results, Group ID, Member ID, or Benefit Begin Date can be added as search criteria. However, if Member ID is used in a search, the Group ID must also be supplied.

After the user presses the "OK" button, the search results are displayed in the Multiple Deductible Accumulated Amounts screen.

Deductible plan list window

If the user presses the “Deductible Plan List” button on the bottom left corner of the screen, the member’s deductible plan information will be displayed in the Deductible Plan List screen. The Deductible Plan List screen will function in the same manner as if the user had searched for a deductible plan.

Family Type Examples

The following section contains examples of the various Family Type Options and how they work. Examples of Family Deductible Types and Family Maximum Out of Pocket Types are shown. For each type an example will be shown that satisfies the criteria and an example that does not satisfy the criteria. This section is not meant to be comprehensive, but rather to give an overview of the family types.

Note: In the examples, **Limited Individual Contribution** means that the maximum amount that an individual may contribute toward the family amount is the individual amount. **Unlimited Individual Contribution** means that there is no limitation on the amount that an individual may contribute toward the family amount.

Family Deductible Types

Family Deductible Types show the method by which the individual member claims are applied toward the family deductible.

Option 1 – 1 Plus Aggregate

One family member must meet the individual deductible, and remaining family members must combine to meet the balance of the family deductible.

- Limited Individual Contribution
- 1 Person Must Meet Individual Amount
- All Family Members Contribute Toward Family Deductible

Family consists of cardholder (01), spouse (02), dependent 1 (03), and dependent 2 (04). Deductible consists of \$50.00 individual and \$100.00 family. For this example, the submitted amount of the claim will be used in calculating the deductibles.

Example 1 - Criteria Satisfied

Claim #	Mem ID	Claim Amt	Copay Amt	Applied to Ind Ded	Ind. Accum.	Applied to Family Ded.	Family Accum
1	03	20.00		20.00	20.00	20.00	20.00
2	02	40.00		40.00	40.00	40.00	60.00 (20 + 40)
3	03	10.00		10.00	30.00 (20+10)	10.00	70.00 (10 + 60)
4	01	10.00		10.00	10.00	10.00	80.00 (10 + 70)
5	03	40.00	5.00	20.00	50.00 (30+20)	20.00	100.00 (20 + 80)

CONFIDENTIAL AND PROPRIETARY – FOR INTERNAL USE ONLY – DO NOT DISCLOSE.
Do not distribute to outside parties without written approval of an Argus Health Systems, Inc. officer.

In this example, member 03 had \$70.00 in claim activity. Of this amount, \$50.00 was applied toward their individual deductible amount and toward the family deductible amount. Two family members combined for the remaining \$50.00 of the family deductible.

Note: Once the member has met their individual deductible amount, a date is applied to their individual deductible information showing that the member has met their deductible on that date. However, when viewing on-line, it may appear that the member has contributed more than the necessary amount toward their deductible. Argus continues to add to their individual accumulations in case a maximum out of pocket also applies.

Example 2 – Criteria Not Satisfied

Claim #	Mem ID	Claim Amt	Copay Amt	Applied to Ind Ded	Ind. Accum.	Applied to Family Ded	Family Accum.
1	03	20.00		20.00	20.00	20.00	20.00
2	02	10.00		10.00	10.00	10.00	30.00 (10 + 20)
3	03	60.00		30.00	50.00 (20+30)	30.00	60.00 (30 + 30)
4	01	10.00		10.00	10.00	10.00	70.00 (10 + 60)
5	03	45.00	5.00	0	50.00	0	70.00

Although one family member did meet their individual deductible, that individual may not contribute more than the individual amount toward the family deductible. The remaining family members must contribute an aggregate amount of \$50.00 toward the family deductible. An additional \$30.00 in claim activity for family members other than 03 is needed to satisfy the family deductible.

Option 2 – 2 Per Family

Two family members must each meet the individual deductible, and remaining family members must combine to meet the balance of the family deductible.

- Limited Individual Contribution
- 2 Persons Must Meet Individual Amount
- All Family Members Contribute Toward Family Deductible

Family consists of cardholder (01), spouse (02), dependent 1 (03), and dependent 2 (04). Deductible consists of \$50.00 individual and \$150.00 family. For this example, the submitted amount of the claim will be used in calculating the deductibles.

Example 1 – Criteria Satisfied

Claim #	Mem ID	Claim Amt	Copay Amt	Applied to Ind Ded	Ind. Accum.	Applied to Family Ded	Family Accum
1	03	20.00		20.00	20.00	20.00	20.00
2	02	40.00		40.00	40.00	40.00	60.00 (20 + 40)
3	03	10.00		10.00	30.00 (10+20) 10.00	70.00 (10+60)	
4	01	10.00		10.00	10.00	10.00	80.00 (10+70)
5	03	40.00	5.00	20.00	50.00 (20+30) 20.00	100.00 (20+80)	
6	02	15.00	5.00	10.00	50.00 (10+40) 10.00	110.00 (10+100)	
7	04	40.00		40.00	40.00	40.00	150.00 (40+110)

In this case, member 03 had \$70.00 in claim activity. Of this amount, \$50.00 applied toward their individual deductible amount and toward the family deductible amount. Member 02 had \$55.00 in claim activity. Of this amount, \$50.00 applied toward their individual deductible amount and toward the family deductible amount.

Note: Once the member has met their individual deductible amount, a date is applied toward their individual deductible information showing that the member has met their deductible on that date. However, when viewing on-line, it may appear that the member has contributed more than the necessary amount toward their deductible. Argus continues to add to their individual accumulations in case a maximum out of pocket also applies.

Example 2 – Criteria Not Satisfied

Claim #	Mem ID	Claim Amt	Copay Amt	Applied to Ind Ded	Ind. Accum .	Applied to Family Ded	Family Accum
1	03	20.00		20.00	20.00	20.00	20.00
2	02	30.00		30.00	30.00	30.00	50.00 (30 + 20)
3	03	10.00		10.00	30.00 (10 + 20)	10.00	60.00 (10 + 50)
4	01	10.00		10.00	10.00	10.00	70.00 (10 + 60)
5	04	40.00		40.00	40.00	40.00	110.00 (40 + 70)
6	01	40.00		40.00	50.00 (40 + 10)	40.00	150.00 (40 + 110)

At least two family members must meet their individual deductible. In this case, it is \$50.00. Only one member has met their \$50.00 individual deductible. Therefore, the criteria have not been met to satisfy the family meeting their deductible.

Note: Once the member has met their individual deductible amount, a date is applied to their individual deductible information showing that the member has met their deductible on that date. However, when viewing on-line, it may appear that the member has contributed more than the necessary amount toward their deductible. Argus continues to add to their individual accumulations in case a maximum out of pocket also applies.

Option 3 – Family, Limited

All family members can contribute to meet the family deductible. No one family member contributes more than their individual deductible toward the family deductible.

- Limited Individual Contribution
- No One Must Meet Individual Amount
- All Family Members Contribute Toward Family Deductible

Family consists of cardholder (01), spouse (02), dependent 1 (03), and dependent 2 (04). Deductible consists of \$50.00 individual and \$100.00 family. For this example, the submitted amount of the claim will be used in calculating the deductibles.

Example 1 – Criteria Satisfied

Claim #	Mem ID	Claim Amt	Copay Amt	Applied to Ind Ded	Ind. Accum.	Applied to Family Ded	Family Accum
1	03	30.00		30.00	30.00	30.00	30.00
2	01	30.00		30.00	30.00	30.00	60.00 (30 + 30)
3	02	30.00		30.00	30.00	30.00	90.00 (30 + 60)
4	01	10.00		10.00	40.00 (10+30)	10.00	100.00 (10 + 90)

No one family member was required to meet their individual deductible to satisfy the criteria. In this example, several members contributed to meet the family deductible.

Example 2 – Criteria NOT Satisfied

Claim #	Mem ID	Claim Amt	Copay Amt	Applied to Ind Ded	Ind. Accum.	Applied to Family Ded	Family Accum
1	03	30.00		30.00	30.00	30.00	30.00
2	01	30.00		30.00	30.00	30.00	60.00 (30 + 30)
3	03	20.00		20.00	50.00 (20+30)	20.00	80.00 (20 + 60)
4	02	10.00		10.00	10.00	10.00	90.00 (10 + 80)

The family is still \$10.00 short of meeting the family deductible criteria. The additional \$10.00 may come from any of the family members except member 03. No individual may contribute more than their individual deductible toward the family deductible.

Note: Once the member has met their individual deductible amount, a date is applied to their individual deductible information showing that the member has met their deductible on that date. However, when viewing on-line, it may appear that the member has contributed more than the necessary amount toward their deductible. Argus continues to add to their individual accumulations in case a maximum out of pocket also applies.

Option 4 – 3 Per Family

Three family members must each meet their individual deductible and remaining family members must combine to meet the balance of the family deductible.

- Limited Individual Contribution
- 3 Persons Must Meet Individual Amount
- All Family Members Contribute Toward Family Deductible

Family consists of cardholder (01), spouse (02), dependent 1 (03), and dependent 2 (04). Deductible consists of \$50.00 individual and \$175.00 family. For this example, the submitted amount of the claim will be used in calculating the deductibles.

Example 1 – Criteria Satisfied

Claim #	Mem ID	Claim Amt	Copay Amt	Applied to Ind Ded	Ind Accum.	Applied to Family Ded	Family Accum
1	03	20.00		20.00	20.00	20.00	20.00
2	02	40.00		40.00	40.00	40.00	60.00 (40 + 20)
3	03	10.00		10.00	30.00 (10+20)	10.00	70.00 (10 + 60)
4	01	25.00		25.00	25.00	25.00	95.00 (25 + 70)
5	03	40.00	5.00	20.00	50.00 (20+30)	20.00	115.00 (20 + 95)
6	02	15.00	5.00	10.00	50.00 (10+40)	10.00	125.00 (10 +115)
7	04	60.00	5.00	50.00	50.00	50.00	175.00 (50 + 125)

Three members must meet their individual deductibles. Member 03 had \$70.00 in claim activity. Of this amount, \$50.00 applied toward their individual deductible amount and toward the family deductible amount. Member 02 had \$55.00 in claim activity. Of this amount, \$50.00 applied toward their individual deductible amount and toward the family deductible amount. Member 04 had \$60.00 in claim activity. Of this amount, \$50.00 applied toward their individual deductible amount and \$50.00 applied toward the family deductible amount. Three members had satisfied their individual deductible and the fourth member contributed the additional \$25.00 needed to meet the family deductible.

Note: Once the member has met their individual deductible amount, a date is applied to their individual deductible information showing that the member has met their deductible on that date. However, when viewing on-line, it may appear that the member has contributed more than the necessary amount toward their deductible. Argus continues to add to their individual accumulations in case a maximum out of pocket also applies.

Example 2 – Criteria NOT Satisfied

Claim #	Mem ID	Claim Amt	Copay Amt	Applied to Ind Ded	Ind. Accum.	Applied to Family Ded	Family Accum
1	03	20.00		20.00	20.00	20.00	20.00
2	02	40.00		40.00	40.00	40.00	60.00 (20 + 40)
3	03	10.00		10.00	30.00 (10+20)	10.00	70.00 (10 + 60)
4	01	40.00		40.00	40.00	40.00	110.00 (40 + 70)
5	03	40.00	5.00	20.00	50.00 (20+30)	20.00	130.00 (20 + 110)
6	02	15.00	5.00	10.00	50.00 (10+40)	10.00	140.00 (10 + 130)
7	04	35.00		35.00	35.00	35.00	175.00 (35 + 140)

Three members must meet their individual deductible. Even though the family has had \$175.00 in claim activity, the family deductible has not been satisfied because only two members met their \$50.00 individual deductible. Therefore, the criteria have not been met to satisfy the family meeting their deductible. If a third member of the family meets their individual deductible, the criteria to meet the family deductible would be satisfied.

Option 5 – Family, Unlimited

All family members can contribute to meet the family deductible. Out of pocket expense for each individual is applied toward the family deductible. Therefore, an individual may contribute more than their individual deductible amount toward the family deductible.

- Unlimited Individual Contribution
- No One Must Meet Individual Amount
- All Family Members Contribute Toward Family Deductible

Family consists of cardholder (01), spouse (02), dependent 1 (03), and dependent 2 (04). Deductible consists of \$50.00 individual and \$100.00

CONFIDENTIAL AND PROPRIETARY – FOR INTERNAL USE ONLY – DO NOT DISCLOSE.
Do not distribute to outside parties without written approval of an Argus Health Systems, Inc. officer.

family. For this example, the submitted amount of the claim will be used in calculating the deductibles.

Example 1 – Criteria Satisfied

Claim #	Mem ID	Claim Amt	Copay Amt	Applied to Ind Ded	Ind. Accum.	Applied to Family Ded	Family Accum
1	01	30.00		30.00	30.00	30.00	30.00
2	01	70.00	10.00	30.00 (20+10)	60.00 (30+30)	30.00	60.00 (30+30)
3	01	50.00	10.00	10.00	70.00 (10+60)	10.00	70.00 (10+60)
4	01	60.00	10.00	10.00	80.00 (10+70)	10.00	80.00 (10+70)
5	01	55.00	10.00	10.00	90.00 (10+80)	10.00	90.00 (10+80)
6	01	50.00	10.00	10.00	100.00 (10+90)	10.00	100.00 (10+90)

No one family member was required to meet their individual deductible to satisfy the criteria, nor is there a limit on how much one member may contribute. In this example, one member contributed to meet the family deductible. Member 01 contributed \$50.00 more than their individual deductible amount, by applying their \$10.00 copay from five claims.

A scenario could also be created where the family deductible is satisfied even though no one individual satisfied their individual deductible.

Example 2 – Criteria Satisfied

Claim #	Mem ID	Claim Amt	Copay Amt	Applied to Ind Ded	Ind. Accum.	Applied to Family Ded	Family Accum
1	04	30.00		30.00	30.00	30.00	30.00
2	01	40.00		40.00	40.00	40.00	70.00 (40 + 30)
3	02	30.00		30.00	30.00	30.00	100.00 (30 + 70)

Note: Once the member has met their individual deductible amount, a date is applied to their individual deductible information showing that the member has met their deductible on that date. However, when viewing on-line, it may appear that the member has contributed more than the necessary amount toward their deductible. Argus continues to add to their individual accumulations in case a maximum out of pocket also applies.

Example 3 – Criteria NOT Satisfied

Claim #	Mem ID	Claim Amt	Copay Amt	Applied to Ind Ded	Ind. Accum.	Applied to Family Ded	Family Accum
1	04	30.00		30.00	30.00	30.00	30.00
2	01	40.00		40.00	40.00	40.00	70.00 (40 + 30)
3	02	20.00		20.00	20.00	20.00	90.00 (20 + 70)

Only when the family deductible is not met is the criteria not satisfied. The aggregate total for the family is \$90.00. A \$10.00 claim by any member would satisfy the family deductible.

Family Maximum Out of Pocket Types

Family Maximum Out of Pocket (MOP) Types show the method by which the individual member claims are applied toward the family maximum out of pocket. In these examples, no attempt is made at defining how the out of pocket expenses have been calculated (i.e., copays included or excluded, mail order included or excluded, member pay difference, etc.).

Option 1 – 1 Plus Aggregate

One family member must meet the individual maximum out of pocket, and remaining family members must combine to meet the balance of the family maximum out of pocket.

- Limited Individual Contribution
- 1 Person Must Meet Individual MOP
- All Family Members Contribute Toward Family MOP

Family consists of cardholder (01), spouse (02), dependent 1 (03), and dependent 2 (04). Maximum out of pocket consists of \$500.00 individual and \$1000.00 family. For this example, only the actual out of pocket expenses will be considered.

Maximum Out of Pocket (MOP) accumulation for this benefit period to date:

Member 01	\$460.00
Member 02	\$200.00
Member 03	\$150.00
Member 04	<u>\$150.00</u>
Family	\$960.00

Example 1 – Criteria Satisfied

Claim #	Mem ID	Claim Out of Pocket	Applied to Ind MOP	Ind. Accum .MOP	Applied to Family MOP	Family Accum .MOP
1	03	20.00	20.00	170.00 (20 + 150)	20.00	980.00 (20+960)
2	02	40.00	40.00	240.00 (40 + 200)	20.00	1000.00 (20 + 980)
3	01	40.00	40.00	500.00 (40 + 460)	0.00	1000.00

In this example, member 02 had a claim that put the aggregate family out of pocket at \$1000.00. However, the family MOP was not satisfied as no one individual had met their individual MOP. When member 01 had a claim with \$40.00 paid out of pocket, this satisfied member 01's individual MOP and allowed the family MOP criteria to become satisfied.

MOP Accumulation for this benefit period to date:

Member 01	\$500.00
Member 02	\$200.00
Member 03	\$100.00
Member 04	<u>\$160.00</u>
Family	\$960.00

Example 2 – Criteria NOT Satisfied

Claim #	Mem ID	Claim Out of Pocket	Applied to Ind MOP	Ind. Accum. MOP	Applied to Family MOP	Family Accum. MOP
1	03	20.00	20.00	120.00 (20 + 100)	20.00	980.00 (20 + 960)
2	01	40.00	40.00	540.00 (40 + 500)	0.00	980.00

Though member 01 did meet the individual MOP and the family has paid a total out of pocket of \$1020.00 the family MOP has not been satisfied. An individual may not contribute more than the individual amount toward meeting the family MOP. The remaining family members must contribute an aggregate amount of \$500.00 toward the balance of the family MOP.

Option 2 – 2 Per Family

Two family members must each meet the individual maximum out of pocket, and remaining family members must combine to meet the balance of the family maximum out of pocket.

- Limited Individual Contribution

- 2 Persons Must Meet Individual MOP
- All Family Members Contribute Toward Family MOP

Family consists of cardholder (01), spouse (02), dependent 1 (03), and dependent 2 (04). Maximum out of pocket consists of \$500.00 individual and \$1500.00 family. For this example, only the actual out of pocket expenses will be considered.

MOP accumulation for this benefit period to date:

Member 01	\$ 460.00
Member 02	\$ 400.00
Member 03	\$ 150.00
Member 04	<u>\$ 150.00</u>
Family	\$1160.00

Example 1 – Criteria Satisfied

Claim #	Mem ID	Claim Out of Pocket	Applied to Ind MOP	Ind. Accum .MOP	Applied to Family MOP	Family Accum.MOP
1	03	150.00	150.00	300.00 (150 + 150)	150.00	1310.00 (150 + 1160)
2	02	100.00	100.00	500.00 (100 + 400)	100.00	1410.00 (100 + 1310)
3	04	90.00	90.00	240.00 (90 + 150)	90.00	1500.00 (90 + 1410)
4	01	100.00*	40.00	500.00 (40 + 460)	0.00	1500.00

*Even though Member 01 has met the individual maximum out of pocket, they could still have out of pocket expenses (i.e. copays, member pay the difference, etc.).

In this example, member 04 had a claim that put the aggregate family out of pocket at \$1500.00. However, the family MOP was not satisfied as only one individual had met their individual MOP. When member 01 had a claim with \$100.00 paid out of pocket, this satisfied member 01's individual MOP and allowed the family MOP criteria to become satisfied. None of member 01's out of pocket applied toward the family MOP as the criteria was met for family with the previous claim.

MOP accumulation for this benefit period to date:

Member 01	\$ 500.00
Member 02	\$ 400.00
Member 03	\$ 100.00
Member 04	<u>\$ 350.00</u>
Family	\$1350.00

Example 2 – Criteria NOT Satisfied

Claim #	Mem ID	Claim Out of Pocket	Applied to Ind MOP	Ind. Accum. MOP	Applied to Family MOP	Family Accum. MOP
1	03	60.00	60.00	160.00 (60 + 100)	60.00	1410.00 (60 + 1350)
2	01	90.00*	0.00	500	00	1410.00

*Even though Member 01 has met the individual maximum out of pocket, they could still have out of pocket expenses (i.e. copays, member pay the difference, etc.).

Though member 01 did meet the individual maximum out of pocket and the family has paid a total out of pocket of \$1500.00, the family MOP has not been satisfied. An individual may not contribute more than the individual amount toward meeting the family maximum out of pocket. The remaining family members must contribute an aggregate amount of \$1000.00 toward the family maximum out of pocket. Also, two members must meet the individual maximum out of pocket for Family MOP Type 2.

Option 3 – Family, Limited

All family members can contribute to meet the family maximum out of pocket. No one family member contributes more than the individual maximum out of pocket toward the family maximum out of pocket.

- Limited Individual Contribution
- No One Must Meet Individual MOP
- All Family Members Contribute Toward Family MOP

Family consists of cardholder (01), spouse (02), dependent 1 (03), and dependent 2 (04). Maximum out of pocket consists of \$500.00 individual and \$1000.00 family. For this example, only the actual out of pocket expenses will be considered.

MOP accumulation for this benefit period to date:

Member 01	\$ 250.00
Member 02	\$ 300.00
Member 03	\$ 50.00
Member 04	<u>\$ 150.00</u>
Family	\$ 750.00

Example 1 - Criteria Satisfied

Claim #	Mem ID	Claim Out of Pocket	Applied to Ind MOP	Ind. Accum.MOP	Applied to Family MOP	Family Accum.MOP
1	03	100.00	100.00	150.00 (100 + 50)	100.00	850.00 (100 + 750)
2	02	50.00	50.00	350.00 (50 + 300)	50.00	900.00 (50 + 850)
3	04	60.00	60.00	210.00 (60 + 150)	60.00	960.00 (60 + 900)
4	01	100.00	100.00	350.00 (100 + 250)	40.00	1000.00 (40 + 960)

In this example, the family maximum out of pocket was satisfied, even though no individual satisfied the individual MOP criteria. For Family MOP Type 3, no one member must meet their maximum out of pocket for the family maximum out of pocket to be satisfied.

MOP accumulation for this benefit period to date:

Member 01	\$ 500.00
Member 02	\$ 100.00
Member 03	\$ 110.00
Member 04	\$ 150.00
Family	\$ 860.00

Example 2 - Criteria Not Satisfied

Claim#	Mem ID	Claim Out of Pocket	Applied to Ind MOP	Ind. Accum. MOP	Applied to Family MOP	Family Accum. MOP
1	03	60.00	60.00	170.00 (60 + 110)	60.00	920.00 (60 + 860)
2	01	90.00*	0.00	500.00	0.00	920.00

*Even though Member 01 has met the individual maximum out of pocket, he could still have out of pocket expenses (i.e. copays, member pay the difference, etc.).

Though member 01 did meet the individual maximum out of pocket and the family has paid a total out of pocket of \$1010.00 the family MOP has not been satisfied. An individual may not contribute more than the individual amount toward meeting the family maximum out of pocket. The remaining family members must contribute an aggregate amount of \$500.00 toward the family maximum out of pocket.

Option 4 – 3 Per Family

Three family members must each meet the individual maximum out of pocket and remaining family members must combine to meet the balance of the family maximum out of pocket.

- Limited Individual Contribution
- 3 Persons Must Meet Individual MOP
- All Family Members Contribute Toward Family MOP

Family consists of cardholder (01), spouse (02), dependent 1 (03), and dependent 2 (04). Maximum out of pocket consists of \$250.00 individual and \$1000.00 family. For this example, only the actual out of pocket expenses will be considered.

MOP accumulation for this benefit period to date:

Member 01	\$ 200.00
Member 02	\$ 175.00
Member 03	\$ 225.00
Member 04	<u>\$ 50.00</u>
Family	\$ 750.00

Example 1 - Criteria Satisfied

Claim #	Mem ID	Claim Out of Pocket	Applied to Ind MOP	Ind. Accum. MOP	Applied to Family MOP	Family Accum. MOP
1	03	125.00*	25.00	250.00 (25 + 225)	25.00	775.00 (25 + 750)
2	02	75.00	75.00	250.00 (75 + 175)	75.00	850.00 (75 + 775)
3	04	150.00	150.00	200.00 (150 + 50)	150.00	1000.00 (150 + 850)
4	01	100.00*	50.00	250.00 (50 + 200)	0.00	1000.00

*Even though a member has met the individual maximum out of pocket, they could still have out of pocket expenses (i.e. copays, member pay the difference, etc.).

In this example, member 04 had a claim that put the aggregate family out of pocket at \$1000.00. However, the family MOP was not satisfied as only two individuals had met their individual MOP. When member 01 had a claim with \$100.00 paid out of pocket, this satisfied member 01's individual MOP and allowed the family MOP criteria to become satisfied. None of member 01's out of pocket applied toward the family MOP as the criteria was met for family.

MOP accumulation for this benefit period to date:

Member 01	\$ 250.00
Member 02	\$ 200.00
Member 03	\$ 100.00
Member 04	<u>\$ 225.00</u>
Family	\$ 775.00

Example 2 - Criteria Not Satisfied

Claim #	Mem ID	Claim Out of Pocket	Applied to Ind MOP	Ind. Accum. MOP	Applied to Family MOP	Family Accum. MOP
1	03	75.00	75.00	175.00 (75 + 100)	75.00	850.00 (75 + 775)
2	01*	100.00	0.00	250.00	0.00	850.00
3	02*	150.00	50.00	250.00 (50 + 200)	50.00	950.00

*Even though a member has met the individual maximum out of pocket, they could still have out of pocket expenses (i.e. copays, member pay the difference, etc.).

Though members 01 and 02 did meet their individual maximum out of pockets and the family has paid an actual total out of pocket of over \$1000.00, the family MOP has not been satisfied. An individual may not contribute more than the individual amount toward meeting the family maximum out of pocket. Also, three individuals must meet their individual maximum out of pocket before the family maximum out of pocket criteria is satisfied. A third family member must satisfy the individual maximum out of pocket and the remaining family member must contribute an aggregate amount of \$250.00 toward the family maximum out of pocket.

Option 5 – Family, Unlimited

All family members can contribute to meet the family maximum out of pocket. Out of pocket expense for each individual is applied toward the family maximum out of pocket; therefore, an individual may contribute more than the individual maximum out of pocket amount toward the family maximum out of pocket.

- Unlimited Individual Contribution
- No One Must Meet Individual MOP
- All Family Members Contribute Toward Family MOP

Family consists of cardholder (01), spouse (02), dependent 1 (03), and dependent 2 (04). Maximum out of pocket consists of \$250.00 individual and \$500.00 family. For this example, only the actual out of pocket expenses will be considered.

MOP accumulation for this benefit period to date:

Member 01	\$ 200.00
Member 02	\$ 100.00
Member 03	\$ 100.00
Member 04	<u>\$ 25.00</u>
Family	\$ 425.00

Example 1 - Criteria Satisfied

Claim #	Mem ID	Claim Out of Pocket	Applied to Ind MOP	Ind. Accum. MOP	Applied to Family MOP	Family Accum. MOP
1	03	25.00	25.00	125.00 (25 + 100)	25.00	450.00 (25 + 425)
2	01	25.00	25.00	225.00 (25 + 200)	25.00	475.00 (25 + 450)
3	02	50.00	50.00	150.00 (50 + 100)	25.00	500.00 (25 + 475)

In this example the family maximum out of pocket criteria is satisfied because the aggregate family out of pocket has been met and there is no requirement that any member must meet their individual maximum out of pocket. It would also be possible under Family Type 5 to have one member meet the entire family maximum out of pocket, as this Type has no limit in regard to how much an individual can contribute to the family maximum out of pocket.

Family consists of cardholder (01), spouse (02), dependent 1 (03), and dependent 2 (04). Maximum out of pocket consists of \$250.00 individual and \$1000.00 family. For this example, only the actual out of pocket expenses will be considered.

MOP Accumulation for this benefit period to date:

Member 01	\$ 350.00
Member 02	\$ 200.00
Member 03	\$ 100.00
Member 04	<u>\$ 175.00</u>
Family	\$ 825.00

Example 2 - Criteria Not Satisfied

Claim #	Mem ID	Claim Out of Pocket	Applied to Ind MOP	Ind. Accum. MOP	Applied to Family MOP	Family Accum. MOP
1	03	75.00	75.00	175.00 (75 + 100)	75.00	900.00 (75 + 825)
2	01*	25.00	0.00	350.00	25.00	925.00 (25 + 900)
3	02	50.00	50.00	250.00 (50 + 200)	50.00	975.00 (50 + 925)

*Even though a member has met the individual maximum out of pocket, they could still have out of pocket expenses (i.e. copays, member pay the difference, etc.).

Though member 01 has met the individual maximum out of pocket, the family maximum out of pocket is still \$25.00 short of meeting the MOP criteria for family. The family members may combine for \$25.00 in any combination to meet the maximum out of pocket limits and then the family maximum out of pocket will be satisfied.

Accumulation Options

Accumulation Options

The following section provides an overview of the different options available for deductible, maximum out of pocket, and/or maximum plan paid accumulation “buckets”. The focus of these examples is to show how the various Options affect deductible claims processing. Family Accumulation Options are not dealt with in this section. For the sake of illustration, a Standard Deductible Plan will be used with 3 accumulation buckets: Deductible, Max Out of Pocket (MOP), and Max Plan Paid (MPP). Each accumulation bucket will have individual and family limits. In those examples that use a Member Pay Difference Amount, no accounting is made as to how that amount was calculated. Only the calculated amount is given. Options to be discussed are as follows:

- Copay Options
- Member Pay Difference Options
- Mailorder Options
- Cost Applied

For the sake of illustration the Standard Deductible Plan is set up as follows (leaving the Options under discussion blank for now):

	Deductible	Max Out of Pocket	Max Paid by Plan
Individual	\$100.00	\$200.00	\$500.00
Family	\$200.00	\$400.00	\$1000.00

	Deductible Type	MOP Type	Max Paid by Plan Type
Individual	5	5	5
Family	5	5	5

Note: In the following examples the information on the left-hand table will not necessarily be displayed on the claim record, rather it shows the numbers used to calculate the right-hand table. The right-hand table reflects information which will be displayed on the claim record.

Copay Options

Include Copay: In this example, the member Deductible limit is met, the Maximum Out of Pocket limit is NOT met, and there is no Member Pay Difference. There is a \$3.00 copay and no co-insurance. Options are set as follows:

- No reduce copay
- Include Mail Order
- **Include Copay**

- Include Member Pay Difference
- Cost Applied is Submitted
- MOP Override Copay is blank

Claim Total	15.00
Member-Pay-Difference	0.00
Copay/Co-insurance	3.00
Balance	12.00

Member Applied	3.00
Plan-Applied	12.00
Excluded from Accum Amt	0.00

Exclude Copay: In this example, the member Deductible limit is met, the Maximum Out of Pocket limit is met, the Maximum Paid by Plan limit is NOT met, and there is no Member Pay Difference. There is a \$3.00 copay and no co-insurance. Options are set as follows:

- No reduce copay
- Include Mail Order
- **Exclude Copay**
- Include Member Pay Difference
- Cost Applied is Submitted
- MOP Override Copay is blank

Claim Total	15.00
Member-Pay-Difference	0.00
Copay/Co-insurance	3.00
Balance	12.00

Member Applied	0.00
Plan-Applied	12.00
Excluded from Accum Amt	0.00

Note: When a member has not met the Max Out of Pocket limit, Exclude Copay is not in effect, or else the Max Out of Pocket limit would never be met.

Member Pay Difference

Include Member Pay Difference: In this example the member Deductible limit is met, the Maximum Out of Pocket limit is NOT met, and there is a Copay. . The claim is for a retail Brand drug with a cost of \$15.00. A Generic drug with a cost of \$11.00 was available but the member chose the Brand drug instead. There is a \$3.00 copay and no co-insurance. Options are set as follows:

- No reduce copay
- Include Mail Order
- Exclude Copay
- **Include Member Pay Difference**

- Cost Applied is Submitted
- Override Copay is blank

Claim Total	15.00
Member Pay Difference	4.00
Copay/Co-insurance	3.00
Balance	11.00

Member Applied	7.00
Plan Applied	11.00
Excluded from Accum Amts	0.00

Note: When a member has not met the Max Out of Pocket limit, Exclude Copay is not in effect, or else the Max Out of Pocket limit would never be met.

Exclude Member Pay Difference: In this example, the member Deductible limit is met, the Maximum Out of Pocket limit is NOT met, and there is no Copay. The claim is for a retail Brand drug with a cost of \$15.00. A Generic drug with a cost of \$11.00 was available but the member chose the Brand drug instead. There is a \$3.00 copay and no co-insurance. Options are set as follows:

- No reduce copay
- Include Mail Order
- Exclude Copay
- **Exclude Member Pay Difference**
- Cost Applied is Submitted
- Override Copay is blank

Claim Total	15.00
Member-Pay-Difference	4.00
Copay/Co-insurance	3.00
Balance	11.00

Member Applied	3.00
Plan-Applied	11.00
Excluded from Accum Amt	4.00

Copay & Member Pay Difference

Include Copay/Include Member Pay Difference: In this example, the Deductible limit is met and the Maximum Out of Pocket limit is NOT met. The claim is for a retail Brand drug with a cost of \$15.00. A Generic drug with a cost of \$11.00 was available but the member chose the Brand drug instead. There is a \$3.00 copay and no co-insurance. Options are set as follows:

- No reduce copay
- Include Mail Order
- **Include Copay**
- **Include Member Pay Difference**

CONFIDENTIAL AND PROPRIETARY – FOR INTERNAL USE ONLY – DO NOT DISCLOSE.
Do not distribute to outside parties without written approval of an Argus Health Systems, Inc. officer.

- Cost Applied is Submitted
- Override Copay is blank

Claim Total	15.00
Member-Pay-Difference	4.00
Copay/Co-insurance	3.00
Balance	8.00

Member Applied	7.00
Plan-Applied	8.00
Excluded from Accum Amt	0.00

Include Copay/Exclude Member Pay Difference: In this example, the Deductible limit is met and the Maximum Out of Pocket limit is NOT met. The claim is for a retail Brand drug with a cost of \$15.00. A Generic drug with a cost of \$11.00 was available but the member chose the Brand drug instead. There is a \$3.00 copay and no co-insurance. Options are set as follows:

- No reduce copay
- Include Mail Order
- **Include Copay**
- **Exclude Member Pay Difference**
- Cost Applied is Submitted
- Override Copay is blank

Claim Total	15.00
Member-Pay-Difference	4.00
Copay/Co-insurance	3.00
Balance	8.00

Member Applied	3.00
Plan-Applied	8.00
Excluded from Accum Amt	4.00

Include Copay/Override Copay is Blank/Exclude Member Pay Difference: In this example, the Deductible and Maximum Out of Pocket limits are met. The claim is for a retail Brand drug with a cost of \$15.00. A Generic drug with a cost of \$11.00 was available but the member chose the Brand drug instead. The Override Copay Indicator is set to **Blank** so that the copay will be set to **0** for all claims after the maximum out of pocket is met. There is a \$3.00 copay and no co-insurance. Options are set as follows:

- No reduce copay
- Include Mail Order
- **Include Copay**
- **Exclude Member Pay Difference**
- Cost Applied Prior to and After Deductible is Submitted
- **Override Copay is Blank**

Claim Total	15.00
Member-Pay-Difference	4.00
Copay/Co-insurance	3.00
Override Copay – New Copay Amt	0.00
Balance	11.00

Member Applied	0.00
Plan-Applied	11.00
Excluded from Accum Amt	4.00

Include Copay/Override Copay is G/Exclude Member Pay Difference: In this example, the member is over Deductible and over Maximum Out of Pocket. The claim is for a retail Brand drug with a cost of \$15.00. A Generic drug with a cost of \$11.00 was available but the member chose the Brand drug instead. The Override Copay Indicator is set to **G** so that the copay will be set to **0** for all Generic drug claims after the maximum out of pocket is met. There is a \$3.00 copay and no co-insurance. Options are set as follows:

- No reduce copay
- Include Mail Order
- **Include Copay**
- **Exclude Member Pay Difference**
- Cost Applied Prior to and After Deductible is Submitted
- **Override Copay is G**

Claim Total	15.00
Member-Pay-Difference	4.00
Copay/Co-insurance	3.00
Override Copay – New Copay Amt	3.00
Balance	8.00

Member Applied	3.00
Plan-Applied	8.00
Excluded from Accum Amt	4.00

Mail-Order Options

For the purpose of illustrating the mail-order options, Copays will be included but no consideration will be made of the Member Pay Difference Option. A claim for a mail order drug with a cost of \$15.00 was processed. The plan is a Standard Deductible with a Deductible, Maximum Out of Pocket and Maximum Paid by Plan. All Family Types are set to 5, Family Unlimited. There is a \$3.00 copay and no co-insurance. The Deductible Status is the deductible status prior to this claim, e.g., over or under deductible. Options are set as follows:

- No reduce copay
- Include Mail Order
- Include Copay

- Exclude Member Pay Difference
- Cost Applied Prior to and After Deductible is Submitted
- Override Copay is G

Mail order Options are as follows:

- A** All of the cost may be applied toward member's deductible and maximums
- B** Only the copay of a mail-order claim may be applied toward the member's deductible and maximums
- C** Any mail-order claim incurred while the member is under deductible will be denied
- D** None of the cost of a mail-order claim may be applied toward member's deductible and maximums

Additional Plan %

Additional Plan % applies when a member exceeds the Maximum Paid By Plan amount. When an Additional Plan % applies, a percentage of the remainder of the prescription after the copay will be paid by the plan. The individual has met the individual deductible and the maximum out of pocket. There is a \$3.00 copay and no co-insurance. Options are set as follows:

- No reduce copay
- Include Mail Order
- Include Copay
- Include Member Pay Difference
- Cost Applied After Deductible is Submitted
- Override Copay is blank

Example 1 - Individual Over Maximum Paid by Plan, Family Under Max Paid By Plan but has met Family Deductible.

Claim Total	15.00
Copay/Co-insurance	3.00
Balance	12.00
Additional Plan % of 50%	6.00

Member Applied	0.00
Plan-Applied	12.00
Excluded from Accum Amt	0.00

Example 2 - Individual is over the individual Max Paid by Plan and Family is under Maximum Paid by Plan and over Max Out of Pocket.

Claim Total	15.00	Member Applied	12.60
Copay/Co-insurance	3.00	Plan-Applied	2.40
Balance	12.00	Excluded from Accum Amt	0.00
Additional Plan % of 50%	2.40		

*The system will continue to accumulate the Member amounts, even though Deductible and MOP have been satisfied.

Cost Applied Prior to Deduct & Cost Applied After Deductible

The Cost Applied Indicators are used to determine which claim amount to apply towards plan deductibles and maximums. These Options allow a deductible plan to use one basis of claim calculation before a deductible is met and another after the deductible is met.

Valid values for both Prior and After are as follows:

- A Allowed** claim amount calculated by the pricing module based on plan specifications.
- D Deductible Applied** amount determined and calculated by parameters in the pricing module.
- S Submitted** claim amount
- U Usual and Customary** amount

For the purposes of illustration, a claim is made on a drug with the following pricing characteristics:

Plan Allowed Amount \$12.00

Deductible Applied Price \$11.00

Submitted Claim Amount \$15.00

Usual & Customary Price \$14.00

An example with all of the combinations is not the purpose of the following chart. The examples are used to illustrate how the Cost Applied options work.

Prior to Option/After Option	Price Before Deduct Is Met	Price After Deduct Is Met
A / S	\$12.00	\$15.00
U / D	\$14.00	\$11.00
S / U	\$15.00	\$14.00
D / S	\$11.00	\$15.00
