

FINANCIAL INFORMATION REPORTING STANDARD

IMPLEMENTATION GUIDE

VERSION 13

This document provides guidelines for implementing the NCPDP Financial Information Reporting Standard Format.

Approval Date for ANSI: January 31, 2017

1. INTRODUCTION

The Financial Information Reporting is a process whereby a patient under one plan sponsor has changed from one benefit plan PBM to another benefit plan PBM and point-in-time financial information is moved from the previous PBM to the new PBM. This information is necessary for the new PBM to accurately process claims and attribute plan balances and status for reporting to the plan sponsor.

1.1 DOCUMENT SCOPE

This guide is by no means an exhaustive reference to the implementation of *Financial Information Reporting*. Users of the implementation guide must consult the NCPDP documents incorporated by reference listed below for further information.

DATA DICTIONARY

Full reference to all fields - used in NCPDP standards with examples.

EXTERNAL CODE LIST

Full reference to all values used in NCPDP standards.

STANDARDS MATRIX

This document contains charts that list the Standards and Implementation Guides versions approved or under consideration by NCPDP, with reference to the Data Dictionary and External Code List documents appropriate for use.

Access to NCPDP standards and reference materials is available to NCPDP members in the “Members” section of the website at www.ncdp.org. Non-members have limited access to reference materials and may obtain access to standard materials with NCPDP membership; please see www.ncdp.org or contact the NCPDP office at 480-477-1000, or via e-mail at ncdp@ncdp.org.

2. BACKGROUND

In December 2003, Congress passed the Medicare Prescription Drug Benefit, Improvement and Modernization Act (MMA), allowing Medicare payment to Medicare Advantage organizations, Prescription Drug Plan (PDP) sponsors, Programs for the All-Inclusive Care of the Elderly (PACE) plans, and Cost Plans (Part D plans) offering coverage beginning January 2006 of prescription drugs under the new Medicare Part D benefit.

A patient's enrollment and disenrollment entitlements are addressed in the Act. When a patient changes to a new Part D plan during a plan year, the previous Part D plan is no longer the plan of record that is responsible for maintaining the current overall True Out-Of-Pocket (TrOOP) and Gross Covered Drug Cost balance for the patient for that plan year. The new plan then becomes the current plan that is responsible for maintaining the overall TrOOP and Gross Covered Drug Cost balance for the patient. These accumulated financial balances for the plan year need to be sent from the previous Part D plan to the new Part D plan. Patients may move between multiple Part D plans including moving back to one of the prior Plans. This implementation guide addresses the industry need to standardize the exchange of this information between plans.

3. BUSINESS ENVIRONMENT

3.1 OBJECTIVE

This NCPDP *Financial Information Reporting Standard Implementation Guide* is intended to meet two needs within the pharmaceutical drug claim industry: to provide practical guidelines for software developers throughout the industry as they begin to implement the standard, and to ensure a consistent implementation of the standard throughout the industry.

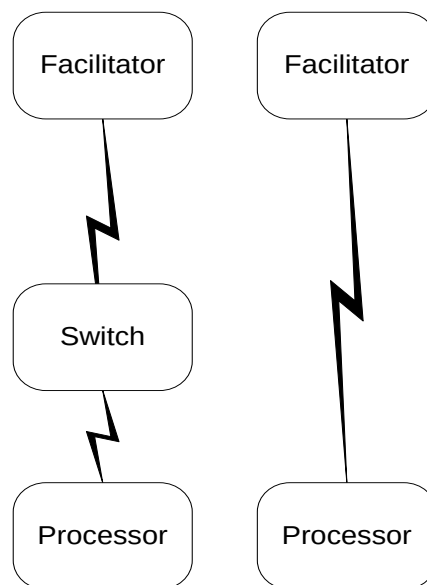

3.2 PARTICIPANTS

The diagram below illustrates the typical business environments in which the NCPDP *Financial Information Reporting Standard Implementation Guide* is employed.

A “FACILITATOR” (hereinafter referred to as the ‘Facilitator’ or ‘Sender’ or Submitter’) is an entity that routes Medicare Part D payment and disenrollment information from processor to processor. In this standard, the Facilitator provides a mechanism for updating patient financial information to Medicare Part D plans.

The ‘ADJUDICATOR’ (hereinafter referred to as the ‘Processor’ or ‘Plan’ or ‘Receiver’) is often a third-party administrator of prescription drug programs on behalf of insurers. The Adjudicator also may be an insurer, a governmental program or any other entity which receives prescription drug claims, makes a decision regarding the level of reimbursement to the provider, and transmits a response to the provider. In this standard, the Adjudicator provides patient financial information to Medicare Part D plans to the Facilitator.

The “SWITCH” also receives transmissions from Facilitators to pass transmissions to adjudicators. Switching companies accept transmissions, optionally perform format conversions, may perform pre-editing, and then pass the transmission to the appropriate processor. The reply from the processor also may pass through the switch on its return to the Facilitator.

In the sections that follow, please be sure to read carefully not only the sections that apply to your business, but also those that apply to your trading partners. Each section will contain practical information regarding commonly accepted practices in implementing the NCPDP standard.

Please carefully consider the following during any new implementation of the NCPDP *Financial Information Reporting Standard Implementation Guide*.

- Implementation practices which are generally accepted throughout the industry although they are not defined as part of the standard.

- Sample transmissions using the standard, including field numbers, identifiers and values.
- Data fields and other areas of the standard which are often misused or misunderstood.
- Updates and corrections to the document that define the standard.
- Answers to commonly asked questions regarding the standard.

4. FINANCIAL INFORMATION REPORTING

4.1 FINANCIAL INFORMATION REPORTING TRANSACTION TYPES

4.1.1 OVERVIEW

When a patient changes to a new Part D plan during a plan year, the old plan is no longer the plan of record that is responsible for maintaining the current overall TrOOP and Gross Covered Drug Cost balance for the patient for that plan year. When the patient changes to a new Part D plan during a plan year, the previous plan/plans are no longer the plan of record that are responsible for maintaining the current overall TROOP balance. In some infrequent cases, a patient may have multiple prior plans within a single year. Therefore, the new plan must receive the amount of the patient's TrOOP and total Gross Covered Drug Cost balance from the old plan's record, for the appropriate month(s). The new plan then becomes the current plan that is responsible for maintaining the overall TrOOP and Gross Covered Drug Cost balance for the patient.

When a patient's plan changes and reporting of TrOOP balance occurs, an old plan may still receive subsequent financial activity related to their coverage for the patient (e.g., after-the-fact Information Reporting transmissions for updating TrOOP, claims/reversals or adjustments can be processed causing TrOOP or the Gross Covered Drug Cost amounts to change). The old plan therefore continues to maintain an internal TrOOP and Gross Covered Drug Cost balance during the old plan's coverage period, adjusting the balance accordingly by month if applicable Information Reporting transmissions, Claim Reversals or adjustments are processed after the reporting of TrOOP and Gross Covered Drug Cost balances. The old plan can then refer to this internal TrOOP and Gross Covered Drug Cost balance by month to determine the proper compensation level for any claims received after the reporting of TrOOP balance information.

These transactions may be used to report any accumulation amounts, regardless of retroactive changes to eligibility that make it appear that the patient was never effective in the plan.

If a patient changes to a new Part D plan and the processor is the same for the new and old plan, the processor will receive transmissions from the Facilitator for the new and old plans for appropriate months. For example, if the patient moved from Plan A to Plan B, the Facilitator is aware of a change in Part D plans per eligibility information received by the Facilitator from CMS. The Facilitator submits a Financial Information Reporting Transaction Inquiry (F1) for Plan A, Plan A responds to the Facilitator with current Accumulated Patient True Out of Pocket Amount (652-S3) and Accumulated Gross Covered Drug Cost Amount (653-S4) for appropriate month(s) and provides these amounts to Plan B. The Facilitator when sending Financial Information Reporting Update or Exchange transmissions will always provide the total accumulated amounts for appropriate month(s) they have received as of that point in time.

The Transaction Codes are

- "F1" Financial Information Reporting Inquiry
- "F2" Financial Information Reporting Update
- "F3" Financial Information Reporting Exchange

A Financial Information Reporting request occurs once per transmission.

The Processor responds with either of the following:

Approved Response - The transaction was accepted and the transaction was processed in the receiving system.

Rejected Response - The transaction is in error.

Due to the nature of these transactions, if a duplicate transmission occurs, the response must contain the most updated information available. See section "[Duplicate Transmission](#)" for criteria.

4.1.2 FINANCIAL INFORMATION REPORTING INQUIRY PROCESS

The Facilitator initiates the real-time routing of data from the old plan to the new plan based on a change in Part D plans (per eligibility information received by the Facilitator from CMS). The Facilitator requests TrOOP and Gross Covered Drug Cost details from a patient's old plan.

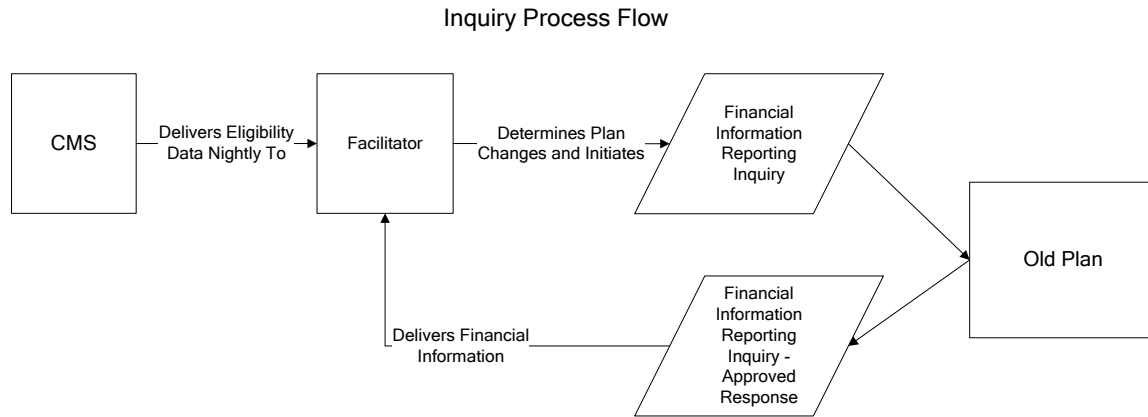

Figure 1 Financial Information Reporting Inquiry Process

1. Facilitator receives a nightly eligibility data feed from CMS that indicates a new Part D plan for a patient.
2. Facilitator determines if the new plan will become effective in the future or is already effective.
 - a. If the plan is already effective, the Facilitator creates the Financial Information Reporting Inquiry and delivers it to the Old Plan.
 - b. If the plan will become effective in the future, the Facilitator schedules the delivery of the Financial Information Reporting Inquiry to the Old Plan the day before the plan becomes effective.
3. The Old Plan returns a Financial Information Reporting Inquiry Response.
 - a. If the Old Plan accepts the Financial Information Reporting Inquiry request, the Old Plan returns the Financial Information to the Facilitator in the Financial Information Reporting Inquiry Response.
 - b. If the Old Plan rejects the Financial Information Reporting Inquiry Request, then the financial information is not returned in the Financial Information Reporting Inquiry Response.
4. On the Financial Information Reporting Inquiry Response from the Old Plan the Transaction Identifier (651-S2) is the same as the Transaction Identifier (651-S2) sent by the Facilitator in the Financial Information Reporting Inquiry Request.

NOTE: The process of Financial Information Reporting Inquiry may continue on a scheduled basis in order to capture adjustments to previously reported amounts. In this scenario, the Facilitator periodically makes inquiries of old plans for a patient for a specific accumulator year to request their internal TrOOP and Gross Covered Drug Cost balances. The process remains the same as shown in Figure 1 except that the Old Plan will send their most updated financial information in the Financial Information Reporting Response.

4.1.3 FINANCIAL INFORMATION REPORTING UPDATE PROCESS WITH SINGLE PLAN

For each Financial Information Reporting Inquiry, the response information is then transmitted in real-time to the new plan for that patient for the same accumulator year. This enables the new plan to make appropriate adjustments to their own internal TrOOP and Gross Covered Drug Cost balance information. The Facilitator is sending the financial information but the New Plan does not return any financial information. There is no reason to send a Financial Information Reporting Update transmission unless the Facilitator has received an approved response from a Financial Information Reporting Inquiry transmission.

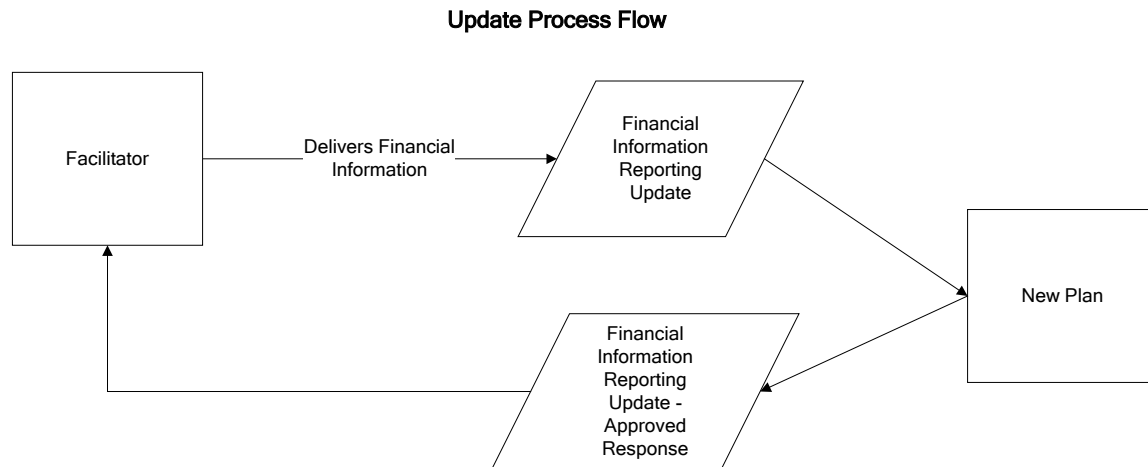

Figure 2 Financial Information Reporting Update Process Flow

1. Facilitator sends the Financial Information delivered by the Old Plan to New Plan in a Financial Information Reporting Update Request.
2. The New Plan returns a Financial Information Reporting Update Response.
 - a. If the New Plan accepts the Financial Information Reporting Update Request, the New Plan returns an approved Financial Information Reporting Update Response.
 - b. If the New Plan rejects the Financial Information Reporting Update Request, then the New Plan returns a rejected Financial Information Reporting Update Response.
3. The Transaction Identifier (651-S2) on the Financial Information Reporting Update Request is the same as the Transaction Identifier (651-S2) on the Financial Information Reporting Update Response from the New Plan. The Transaction Identifier (651-S2) is the same Transaction Identifier (651-S2) that was sent on the original Financial Information Reporting Inquiry Request by the Facilitator and returned by the Old Plan in the Financial Information Reporting Inquiry Response.

4.1.4 FINANCIAL INFORMATION REPORTING EXCHANGE PROCESS WITH MULTIPLE PLANS

In this scenario multiple old plans exist for the patient and a Financial Information Reporting Exchange transmission is required.

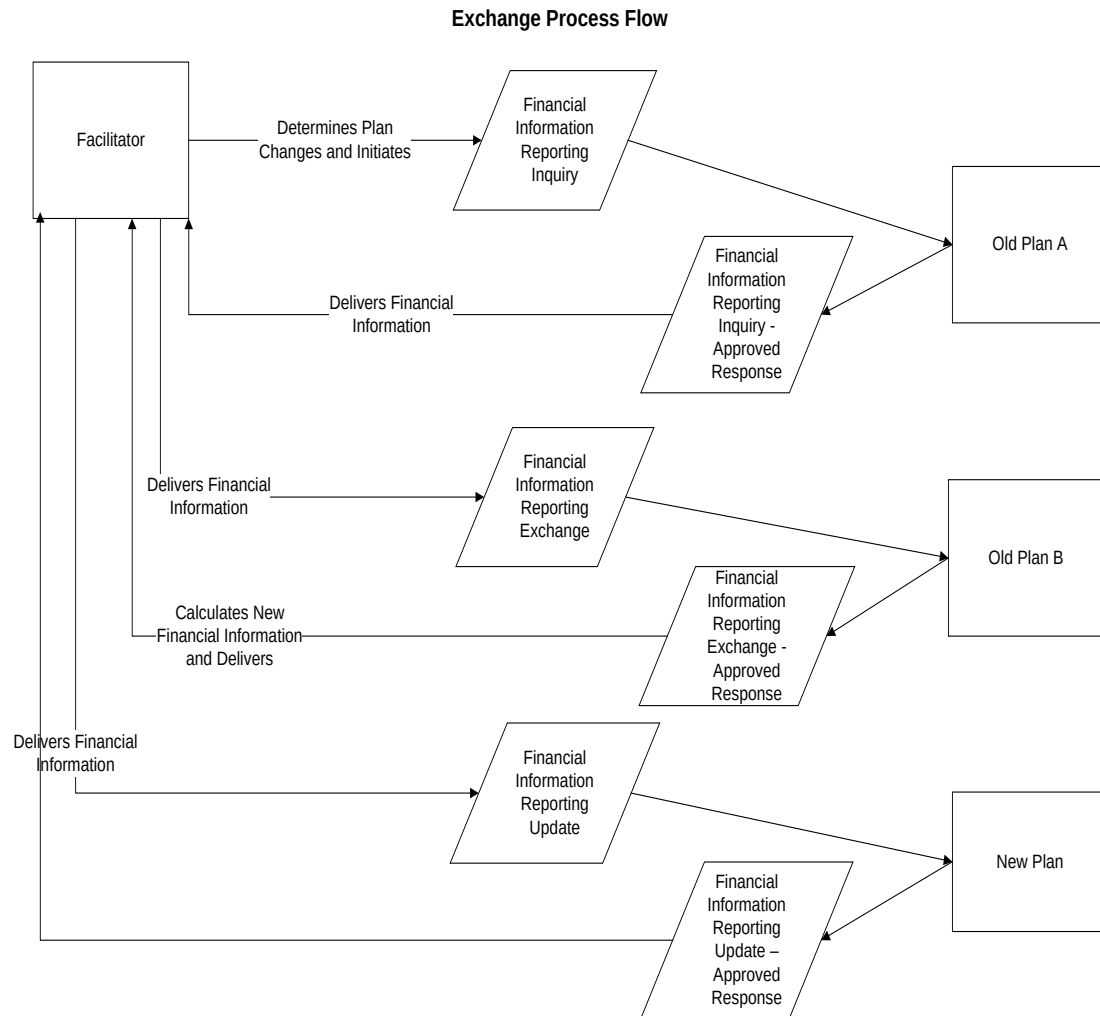

Figure 3 Financial Information Reporting Exchange Process Flow

1. The Facilitator delivers a Financial Information Reporting Inquiry Request to Old Plan A of a patient that has moved to a new plan.
2. The Old Plan A returns a Financial Information Reporting Inquiry Response.
 - a. If the Old Plan A accepts the Financial Information Reporting Inquiry Request, the Old Plan A returns the Financial Information to the Facilitator in the Financial Information Reporting Inquiry Response.
 - b. If the Old Plan A rejects the Financial Information Reporting Inquiry Request, then the financial information is not returned in the Financial Information Reporting Inquiry Response.
3. Using a Financial Information Reporting Exchange Request, Facilitator sends to the Old Plan B the Financial Information delivered by the Old Plan A.
4. Old Plan B calculates Financial Information for that patient, incorporating the Financial Information just received from the Facilitator.
5. The Old Plan B returns a Financial Information Reporting Exchange Response.

- a. If the Old Plan B accepts the Financial Information Reporting Exchange Request, the Old Plan B returns the Financial Information to the Facilitator in the Financial Information Reporting Exchange Response.
 - If the Old Plan B is able to recalculate new financial information, they will return that information in the Financial Information Reporting Exchange Response.
 - If the Old Plan B is unable to recalculate new financial information, they will add their existing financial information to the financial information they receive in the Financial Information Reporting Exchange Request and return the results in the Financial Information Reporting Exchange Response.
 - b. If the Old Plan B rejects the Financial Information Reporting Exchange Request, then the financial information is not returned.
6. Facilitator sends a Financial Information Reporting Update Request to the New Plan with the Financial Information just received in the Financial Information Reporting Exchange Response from Old Plan B.
7. The New Plan returns a Financial Information Reporting Update Response.
 - a. If the New Plan accepts the Financial Information Reporting Update Request, the New Plan returns an approved Financial Information Reporting Update Response.
 - b. If the New Plan rejects the Financial Information Reporting Update Request, then the New Plan returns a rejected Financial Information Reporting Update Response.
8. The Transaction Identifier (651-S2) sent by the Facilitator in the Financial Information Reporting Inquiry Request remains the same throughout this process flow from the Financial Information Reporting Inquiry Response, the Financial Information Reporting Exchange Request, the Financial Information Reporting Exchange Response, the Financial Information Reporting Update Request and finally on the Financial Information Reporting Update Response.

5. TERMINOLOGY USED THROUGHOUT

Standard –

In this document “standard” as in “Standard Rejected Response” is meant as a generic transaction response that does not need to be differentiated as emanating from a Receiver.

Required if –

Used in the Situation column and Notes sections, “Required if” designates the field is to be used only if the requirement is satisfied.

Not used –

Used in the Situation column and Notes sections, “Not used” designates the field is not available for usage. For example, “Not used” is indicated on the Reject Count (510-FA) and Reject Code (511-FB) for the Financial Information Reporting Response Status Segment on Financial Information Reporting transaction responses that are transmission accepted/transaction approved.

Sender and Receiver –

For this situational usage charts, the following definitions are used for these entities, depending on the role they are taking at a given moment in time.

Sender – initiates the request

Receiver – receives the request

Sender – initiates the response

Receiver – receives the response

For example, when a Facilitator submits a Financial Information Reporting Request to a plan, the Facilitator is the sender; the plan is the receiver.

When the plan returns a response to the Facilitator, the plan is the sender; the Facilitator is the receiver.

5.1 TABLE DESIGNATION – LEGEND

Designation		Value	Explanation
MANDATORY		M	The Segment is mandatory for the Transaction <i>or</i> The Field is mandatory for the Segment for the Transaction. Mandatory elements have structural requirements.
SITUATIONAL			The Segment has been further designated for usage for the Transaction <i>or</i> The Field has been further designated for usage for the Transaction.
	Required	R	The Field has been designated with the situation of "Required" for the Segment for the Transaction.
	Qualified Requirement	Q	The situations designated have qualifications for usage ("Required if x", "Not required if y").
NOT USED		N	The Segment is not used for the Transaction <i>or</i> The Field is not used for the Segment for the Transaction. <i>Not used are shaded for clarity.</i>
Repeating		***R***	The three asterisks, “R”, and three asterisks designates a field is repeating. Example “S***R***” means a situationally qualified field that repeats.

5.2 TRANSMISSION DISCUSSION

In each Transmission defined, there is general overview information, followed by the Segment Usage in table form.

Next follows the actual Segments, denoted as Mandatory or Situational, and each field within the Segment. Each field is designated as to its use.

Each section lists each segment, with all fields included in this segment. In some cases, fields within that segment are not used for the particular scenario. All fields are shown to illustrate that each field was reviewed with recommendations, whereas the absence of a field might lead a reader to wonder if the field was left off intentionally.

Note if the sender chooses to send in more fields than are required or situational by the receiver, but which the sender needs for their business, the receiver is to ignore these fields or segments.

After each Segment is a “Notes” section, that further explains any rules, situations, or notes on this Segment.

The Financial Information Reporting Transaction Header Segment and the Financial Information Reporting Response Header Segment are mandatory, fixed length segments. In the segment usage charts for the Financial Information Reporting Transaction Header Segment and the Financial Information Reporting Response Header Segment, the column denoted “Situation” is not applicable.

7. SCENARIOS AND SOLUTIONS

7.1 REPORTING THAT OCCURS WHEN PATIENT CHANGES PART D PLAN

7.1.1 RULES

7.1.1.1 TRANSACTION CODE (103-A3)

The types of transactions are Financial Information Reporting Inquiry, Financial Information Reporting Update and Financial Information Reporting Exchange based on the values in Transaction Code (103-A3). A Financial Information Reporting Inquiry Request must always be sent to the old plan for the requested Accumulator Year (650-S1) or when there are multiple plans, the oldest plan for the requested Accumulator Year (650-S1). A Financial Information Reporting Update Request must always be sent to the new plan. A Financial Information Reporting Exchange Request is used only when there is more than one old plan and must always be sent to all of the old plans except for the oldest plan since that plan receives a Financial Information Reporting Inquiry Request.

7.1.1.2 ACCUMULATOR MONTH COUNT (656-S7), ACCUMULATOR MONTH (655-S6)

The Financial Information Reporting Inquiry response from the oldest plan must contain the financial accumulator fields for every month for which the oldest plan has claim activity for the requested Accumulator Year (650-S1). **If there is no claim activity, the oldest plan must return one month (the Accumulator Month Count (656-S7) = 1), the beginning coverage month in Accumulator Month (655-S6), and the financial information accumulators must be zeroes.** See section [“Transmission Examples”](#) for an example of no claim activity.

The Financial Information Reporting Update request to the new plan must contain the financial information accumulator fields for every month that the Facilitator received from the Financial Information Reporting Inquiry response(s) and/or Exchange response(s) from the old plan(s).

The Financial Information Reporting Exchange request from the Facilitator to all of the old plans (except for the oldest plan) must contain the financial information accumulator fields for every month that the Facilitator received from all plan responses (the Financial Information Reporting Inquiry and/or Exchange response(s)).

The Financial Information Reporting Exchange response from all of the old plans (except for the oldest plan) must contain the financial information accumulator fields for every month that the Facilitator requested and for every month for which the old plans have claim activity for the requested Accumulator Year (650-S1).

Accumulator Month (655-S6) – The request and response months do not have to be sequential but must be in calendar year order. A month must not appear more than once.

The following are excerpted examples to show how to use the Accumulator Month Count (656-S7) and Accumulator Month (655-S6).

7.1.1.2.1 Examples of Accumulator Year (650-S1) and Accumulator Month Count (656-S7) and Accumulator Month (655-S6)

The following are excerpted examples showing the use of the Accumulator Year (650-S1) and the Accumulator Month Count (656-S7) and Accumulator Month (655-S6). See section [“Transmission Examples”](#) for complete examples.

**7.1.1.2.1.1 Example 1 Accumulator Month Count (656-S7) = 1
and Accumulator Month (655-S6) = December**

650-S1	ACCUMULATOR YEAR	M	2008	2008
656-S7	ACCUMULATOR MONTH COUNT	M	1	1 occurrence
655-S6	ACCUMULATOR MONTH	M	12	December
652-S3	ACCUMULATED PATIENT TRUE OUT OF POCKET AMOUNT	M	1500 {	\$150.00
653-S4	ACCUMULATED GROSS COVERED DRUG COST AMOUNT	M	2250 {	\$225.00

**7.1.1.2.1.2 Example 2 Accumulator Month Count (656-S7) = 2
and Accumulator Month (655-S6) = May and June**

650-S1	ACCUMULATOR YEAR	M	2008	2008
656-S7	ACCUMULATOR MONTH COUNT	M	2	2 occurrences
655-S6	ACCUMULATOR MONTH	M	5	May
652-S3	ACCUMULATED PATIENT TRUE OUT OF POCKET AMOUNT	M	100 {	\$10.00
653-S4	ACCUMULATED GROSS COVERED DRUG COST AMOUNT	M	250 {	\$25.00
655-S6	ACCUMULATOR MONTH	M	6	June
652-S3	ACCUMULATED PATIENT TRUE OUT OF POCKET AMOUNT	M	1500 {	\$150.00
653-S4	ACCUMULATED GROSS COVERED DRUG COST AMOUNT	M	2250 {	\$225.00

**7.1.1.2.1.3 Example 3 Accumulator Month Count (656-S7) = 2
and Accumulator Month (655-S6) = May and August**

650-S1	ACCUMULATOR YEAR	M	2008	2008
656-S7	ACCUMULATOR MONTH COUNT	M	2	2 occurrences
655-S6	ACCUMULATOR MONTH	M	5	May
652-S3	ACCUMULATED PATIENT TRUE OUT OF POCKET AMOUNT	M	100 {	\$10.00
653-S4	ACCUMULATED GROSS COVERED DRUG COST AMOUNT	M	250 {	\$25.00
655-S6	ACCUMULATOR MONTH	M	8	August
652-S3	ACCUMULATED PATIENT TRUE OUT OF POCKET AMOUNT	M	1100 {	\$110.00
653-S4	ACCUMULATED GROSS COVERED DRUG COST AMOUNT	M	2150 {	\$215.00

**7.1.1.2.1.4 Example 4 Accumulator Month Count (656-S7) = 1
and Accumulator Month (655-S6) = December with no claim
activity**

If there is no claim activity, the oldest plan must return one month (the Accumulator Month Count (656-S7) = 1) and the financial information accumulators must be zeroes.

650-S1	ACCUMULATOR YEAR	M	2008	2008
--------	------------------	---	------	------

656-S7	ACCUMULATOR MONTH COUNT	M	1	1 occurrence
655-S6	ACCUMULATOR MONTH	M	12	December
652-S3	ACCUMULATED PATIENT TRUE OUT OF POCKET AMOUNT	M	{	\$0
653-S4	ACCUMULATED GROSS COVERED DRUG COST AMOUNT	M	{	\$0

7.1.1.3 DATETime (654-S5)

The DateTime (654-S5) is unique for each Transaction Code (103-A3) (Financial Information Reporting Update and Financial Information Reporting Exchange) that is initiated by the Facilitator to a given plan (BIN Number (101-A1), Processor Control Number (104-A4), if used) for a given patient (Cardholder ID (302-C2)) and Accumulator Year (650-S1). The DateTime is calculated based on Coordinated Universal Time (UTC), with the format of CCYYMMDDhhmmssmss (Format of date time where CC = Two-digit Century, YY = Two-digit Year, MM = Two-digit month (01 through 12), DD = Two-digit day of month (01 through 31), hh = Two-digit Hour (00 through 23), mm = Two-digit minutes (00 through 59), ss = Two-digit second (00 through 59), mss = Three-digit millisecond (000 through 999)).

7.1.1.3.1 Financial Information Reporting Inquiry

For a Financial Information Reporting Inquiry, the Request Reference Segment is not used. DateTime is a stamp of when the transmission was created and sent to the plan. It is calculated based on Coordinated Universal Time (UTC). The plan will respond with the patient financial information based on the patient and accumulator year. There is no need to interrogate the DateTime based on previous transmissions.

If the plan receives a Financial Information Reporting Inquiry with the same or prior to the last received date, the plan will still respond with the patient financial information known at the time. (If patient unknown or transaction processing errors, etc., the plan will respond with a reject as usual.)

7.1.1.3.2 Financial Information Reporting Update or Financial Information Reporting Exchange

For a Financial Information Reporting Update or Financial Information Reporting Exchange, the DateTime is a stamp of when the transmission was created and sent to the plan. The plan is responsible for interrogating the DateTime (654-S5) received from the Facilitator and comparing the DateTime to last received transmission of this type.

7.1.1.3.3 Example 1 Financial Information Reporting Update Transmissions

This is for the same plan, Cardholder ID (302-C2), Accumulator Year (650-S1), and Transaction Code (103-A3) for all of Example 1 (excerpt).

Financial Information Reporting Update transmission from Facilitator to New Plan

103-A3	TRANSACTION CODE	M	F2	Financial Information Reporting Update
654-S5	DATETime	M	20080108082845181	01/08/2008 at 08:28:45:181
650-S1	ACCUMULATOR YEAR	M	2008	

The plan interrogates the DateTime. There are no previous Financial Information Reporting Update transactions on file for this patient for this accumulator year. The plan finds the patient and processes the financial information appropriately.

Financial Information Reporting Update transmission from Facilitator to New Plan after some time interval. This is for the same plan, Cardholder ID (302-C2), Accumulator Year (650-S1), and Transaction Code (103-A3).

103-A3	TRANSACTION CODE	M	F2	Financial Information Reporting Update
--------	------------------	---	----	--

654-S5	DATE TIME	M	20080118182855584	01/18/2008 at 18:18:55:584
650-S1	ACCUMULATOR YEAR	M	2008	

The plan interrogates the DateTime. The previous Financial Information Reporting Update transaction on file for this patient for this accumulator year is dated 01/08/2008 at 08:28:45:181. The DateTime (654-S5) of this excerpted transaction is after the previous time. The plan finds the patient and processes the financial information appropriately.

Financial Information Reporting Update transmission from Facilitator to New Plan after some time interval. This is for the same plan, Cardholder ID (302-C2), Accumulator Year (650-S1), and Transaction Code (103-A3).

103-A3	TRANSACTION CODE	M	F2	Financial Information Reporting Update
654-S5	DATE TIME	M	20080123184825582	01/23/2008 at 18:48:25:582
650-S1	ACCUMULATOR YEAR	M	2008	

The plan interrogates the DateTime. The previous Financial Information Reporting Update transaction on file for this patient for this accumulator year is dated 01/18/2008 at 18:18:55:584. The DateTime (654-S5) of this transaction is after the previous time. The plan finds the patient and processes the financial information appropriately.

7.1.1.3.4 Example 2 Financial Information Reporting Inquiry and Financial Information Reporting Update transmissions

This is for the same plan, Cardholder ID (302-C2), Accumulator Year (650-S1), and Transaction Code (103-A3) for all of Example 2 (excerpt).

Financial Information Reporting Inquiry transmission from Facilitator to Old Plan. Financial Information Reporting Update transmission from Facilitator to New Plan.

103-A3	TRANSACTION CODE	M	F1	Financial Information Reporting Inquiry
650-S1	ACCUMULATOR YEAR	M	2008	

The plan finds the patient and responds with financial information.

Financial Information Reporting Update transmission from Facilitator to New Plan.

103-A3	TRANSACTION CODE	M	F2	Financial Information Reporting Update
654-S5	DATE TIME	M	20080123185115582	01/23/2008 at 18:51:15:582
650-S1	ACCUMULATOR YEAR	M	2008	

The plan interrogates the DateTime. There are no previous Financial Information Reporting Update transactions on file for this patient for this accumulator year. The plan finds the patient and processes the financial information appropriately.

Financial Information Reporting Inquiry transmission from Facilitator to Old Plan after some time interval.

103-A3	TRANSACTION CODE	M	F1	Financial Information Reporting Inquiry
650-S1	ACCUMULATOR YEAR	M	2008	

The plan finds the patient and responds with financial information.

Financial Information Reporting Update transmission from Facilitator to New Plan.

103-A3	TRANSACTION CODE	M	F2	Financial Information Reporting Update
654-S5	DATE TIME	M	20080129114932583	01/29/2008 at 11:49:32:583
650-S1	ACCUMULATOR YEAR	M	2008	

The plan interrogates the DateTime. The previous Financial Information Reporting Update transaction on file for this patient for this accumulator year is dated 01/23/2008 at 18:51:15:582. The DateTime (654-S5) of this transaction is after the previous time. The plan finds the patient and processes the financial information appropriately.

7.1.1.3.5 Out of Order DateTime (654-S5)

It is important to note that the DateTime (654-S5) is generated by the Facilitator. The receiver (the plan) should receive Datetimes which increase.

If the receiver (the plan) receives a transmission with a DateTime (654-S5) and then receives a transmission with a DateTime (654-S5) prior to the previously seen DateTime (654-S5) for the same plan, Cardholder ID (302-C2), Accumulator Year (650-S1), and Transaction Code (103-A3), the receiver must reject the transaction. Communication with the Facilitator may be necessary to determine the cause.

7.1.1.3.6 Duplicate DateTime (654-S5)

The format for DateTime (654-S5) has enough significant digits to ensure normal uniqueness. It may be possible, although unlikely, to receive a transmission for the same plan, Cardholder ID (302-C2), Accumulator Year (650-S1), and Transaction Code (103-A3) with a DateTime (654-S5) that has been seen on a previous transmission (a duplicate Datetime). With this level of granularity, it should be assumed the Facilitator had to resubmit the transmission due to a communication failure (timeout). Due to the nature of these transactions, if a duplicate transmission occurs, the response must contain the most updated information. See section [“Duplicate Transmission”](#) for criteria. It is believed this will be rare.

7.1.1.4 TRANSACTION IDENTIFIER (651-S2)

The Transaction Identifier (651-S2) is a unique identifier sent by the Facilitator initiated on the Financial Information Reporting Inquiry Request. When initiated with the Financial Information Reporting Inquiry Request, the Transaction Identifier (651-S2) remains the same throughout the process flow from the Financial Information Reporting Inquiry Response, the Financial Information Reporting Exchange Request (if sent), the Financial Information Reporting Exchange Response, the Financial Information Reporting Update Request and the Financial Information Reporting Update Response. See section [“Transmission Examples”](#) for examples that show the Transaction Identifier (651-S2) through the process flow.

7.2 USE OF TERM “RECALCULATE”

In section [“Financial Information Reporting”](#), the term “recalculate” is used, such as “If the Old Plan B is unable to recalculate new financial information, they will add their existing financial information to the financial information they receive in the Financial Information Reporting Exchange Request and return the results in the Financial Information Reporting Exchange Response.”

This term is used to refer to the ability of an Old Plan to take information from a Financial Information Reporting Exchange Request and use the information to update TrOOP and Gross Covered Drug Cost for a patient including any required recalculation of claims they have processed for the patient and the Old Plan is able to complete these recalculations prior to sending back the Financial Information Reporting Exchange Response. An Old Plan that does not have the ability to “recalculate” will determine what to send in the Financial Information Reporting Exchange Response depending on whether there are multiple Old Plans with coverages in different months or multiple Old Plans with coverage overlap (in the same month(s)). See below.

7.2.1 MULTIPLE OLD PLANS HAVE COVERAGES IN DIFFERENT MONTH(S)

There is no coverage overlap of the same month(s) for a given patient in this situation. Claims activity for multiple Old Plans is for different months. In this scenario, Old Plan A has coverage for a patient in the month of June and July. Old Plan B has coverage for the same patient for the month of August through September. Old Plan A receives the Financial Information Reporting Inquiry request from the Facilitator

and responds with their accumulators. Old Plan B receives a Financial Information Reporting Exchange request with Old Plan A's accumulators.

Old Plan B has two options:

"Recalculate" – Old Plan B receives Old Plan A's accumulators for June and July, processes the accumulators from Old Plan A to determine how they affect Old Plan B's accumulators for August through September and returns Old Plan A's accumulators plus Old Plan B's calculated accumulators in the Financial Information Reporting Exchange response. The Financial Information Reporting Update to New Plan will contain the accumulators from Old Plan A and Old Plan B. See section ["Transmission Examples", "Inquiry to Old Plan A, Exchange to Old Plan B, Update to New Plan – Month Updates"](#).

"Passes On" - Old Plan B receives Old Plan A's accumulators for June and July. Old Plan B does not recalculate with the accumulators from Old Plan A at this time. Old Plan B includes their accumulators for August through September in the Financial Information Reporting Exchange response. The Financial Information Reporting Update to New Plan will contain the accumulators from Old Plan A and Old Plan B. See section ["Transmission Examples", "Inquiry to Old Plan A, Exchange to Old Plan B, Update to New Plan – Where First and Third Enrollment Periods are with the Same Plan"](#).

7.2.2 MULTIPLE OLD PLANS HAVE COVERAGES IN THE SAME MONTH(S)

If there is coverage overlap of the same month(s) for a given patient, it is possible that multiple Old Plans have claims activity which would update the accumulators. In this scenario, Old Plan A and Old Plan B both have coverage for a patient in the month of June. "Recalculation" or "Passes On" is used in the processing of the received accumulators. "Addition" is then performed to prepare the response as described below.

"Addition" - Old Plan A receives the Financial Information Reporting Inquiry request from the Facilitator and responds with their accumulators. Old Plan B receives a Financial Information Reporting Exchange request with Old Plan A's accumulators. **Old Plan B adds Old Plan A's accumulators for the month of June to their accumulators for the month of June** and returns these summation accumulators in the Financial Information Reporting Exchange response. The Financial Information Reporting Update to New Plan will contain the accumulators that Old Plan B sent. See section ["Transmission Examples", "Inquiry to Old Plan A, Exchange to Old Plan B, Update to New Plan – Overlap in Coverage"](#).

8. STRUCTURE QUICK REFERENCE

The following conventions appear in the charts below.

M = Mandatory field

S = Situational field

N = Not used

R = Repeating field

NOTE: Truncation within a Financial Information Reporting Transaction Header Segment or Financial Information Reporting Response Header Segment is not allowed.

NOTE: Special instructions for submitting repeating fields that are situational can be found in section [“Repetition and Multiple Occurrences”](#).

NOTE: See section [“General Syntax Outline”](#) for information about segment order.

8.1 REQUEST SEGMENTS

8.1.1 TRANSMISSION LEVEL

Financial Information Reporting Transaction Header Segment		
Field	Field Name	Mandatory or Situational
101-A1	BIN NUMBER	M
102-A2	VERSION/RELEASE NUMBER	M
103-A3	TRANSACTION CODE	M
104-A4	PROCESSOR CONTROL NUMBER	M
109-A9	TRANSACTION COUNT	M
650-S1	ACCUMULATOR YEAR	M
651-S2	TRANSACTION IDENTIFIER	M
110-AK	SOFTWARE VENDOR/CERTIFICATION ID	M

The Financial Information Reporting Transaction Header Segment is a fixed length segment. Truncation is not allowed in Financial Information Reporting Transaction Header Segment.

Financial Information Reporting Request Insurance Segment		
Field	Field Name	Mandatory or Situational
111-AM	SEGMENT IDENTIFICATION	M
302-C2	CARDHOLDER ID	M
A33-ZX	CMS PART D CONTRACT ID	M
A34-ZY	MEDICARE PART D PLAN BENEFIT PACKAGE (PBP)	M
301-C1	GROUP ID	S
303-C3	PERSON CODE	S

This segment is variable length.

Request Reference Segment		
Field	Field Name	Mandatory or Situational
111-AM	SEGMENT IDENTIFICATION	M
654-S5	DATETIME	M

This segment is variable length.

Patient Segment		
Field	Field Name	Mandatory or Situational
111-AM	SEGMENT IDENTIFICATION	M
331-CX	PATIENT ID QUALIFIER	N
332-CY	PATIENT ID	N
304-C4	DATE OF BIRTH	S
305-C5	PATIENT GENDER CODE	S
310-CA	PATIENT FIRST NAME	N
311-CB	PATIENT LAST NAME	N
322-CM	PATIENT STREET ADDRESS	N
323-CN	PATIENT CITY ADDRESS	N
324-CO	PATIENT STATE / PROVINCE ADDRESS	N
325-CP	PATIENT ZIP/POSTAL ZONE	N
326-CQ	PATIENT PHONE NUMBER	N
307-C7	PLACE OF SERVICE	N
333-CZ	EMPLOYER ID	N
334-1C	SMOKER / NON-SMOKER CODE	N
335-2C	PREGNANCY INDICATOR	N
350-HN	PATIENT E-MAIL ADDRESS	N
384-4X	PATIENT RESIDENCE	N

This segment is variable length.

Request Financial Segment		
Field	Field Name	Mandatory or Situational
111-AM	SEGMENT IDENTIFICATION	M
656-S7	ACCUMULATOR MONTH COUNT	M
655-S6	ACCUMULATOR MONTH	M***R***
652-S3	ACCUMULATED PATIENT TRUE OUT OF POCKET AMOUNT	M***R***
653-S4	ACCUMULATED GROSS COVERED DRUG COST AMOUNT	M***R***

8.2 RESPONSE SEGMENTS

8.2.1 TRANSMISSION LEVEL

Financial Information Reporting Response Header Segment		
Field	Field Name	Mandatory or Situational
102-A2	VERSION/RELEASE NUMBER	M
103-A3	TRANSACTION CODE	M
109-A9	TRANSACTION COUNT	M
501-F1	HEADER RESPONSE STATUS	M
650-S1	ACCUMULATOR YEAR	M
651-S2	TRANSACTION IDENTIFIER	M

The Financial Information Reporting Response Header Segment is a fixed length segment. Truncation is not allowed in Financial Information Reporting Response Header Segment.

Financial Information Reporting Response Message Segment		
Field	Field Name	Mandatory or Situational
111-AM	SEGMENT IDENTIFICATION	M
504-F4	MESSAGE	S

This segment is variable length.

Financial Information Reporting Response Status Segment		
Field	Field Name	Mandatory or Situational
111-AM	SEGMENT IDENTIFICATION	M
112-AN	TRANSACTION RESPONSE STATUS	M
503-F3	AUTHORIZATION NUMBER	S
510-FA	REJECT COUNT	S
511-FB	REJECT CODE	S***R***
546-4F	REJECT FIELD OCCURRENCE INDICATOR	S***R***
526-FQ	ADDITIONAL MESSAGE INFORMATION	S

This segment is variable length.

Response Financial Segment		
Field	Field Name	Mandatory or Situational
111-AM	SEGMENT IDENTIFICATION	M
656-S7	ACCUMULATOR MONTH COUNT	M
655-S6	ACCUMULATOR MONTH	M***R***
652-S3	ACCUMULATED PATIENT TRUE OUT OF POCKET AMOUNT	M***R***
653-S4	ACCUMULATED GROSS COVERED DRUG COST AMOUNT	M***R***

9. FINANCIAL INFORMATION REPORTING SITUATIONS

The following conventions appear in the charts below.

Designation	Value	Explanation
MANDATORY	M	The Segment is mandatory for the Transaction or The Field is mandatory for the Segment for the Transaction. Mandatory elements have structural requirements.
SITUATIONAL		The Segment has been further designated for usage for the Transaction or The Field has been further designated for usage for the Transaction.
Required	R	The Field has been designated with the situation of "Required" for the Segment for the Transaction.
Qualified Requirement	Q	The situations designated have qualifications for usage ("Required if x", "Not required if y").
NOT USED	N	The Segment is not used for the Transaction or The Field is not used for the Segment for the Transaction. Not used are shaded for clarity.
Repeating	***R***	The three asterisks, "R", and three asterisks designates a field is repeating. Example "S***R***" means a situationally qualified field that repeats.

NOTE: Truncation within a Financial Information Reporting Transaction Header Segment or Financial Information Reporting Response Header Segment is not allowed.

NOTE: Special instructions for submitting repeating fields that are situational can be found in section ["Repetition and Multiple Occurrences"](#).

NOTE: See section ["General Syntax Outline"](#) for information about segment order.

9.1 REQUEST SEGMENTS

9.1.1 FINANCIAL INFORMATION REPORTING TRANSACTION HEADER SEGMENT (INQUIRY, UPDATE, EXCHANGE)

Financial Information Reporting Transaction Header Segment		
Field	Field Name	Mandatory or Situational
101-A1	BIN NUMBER	M
102-A2	VERSION/RELEASE NUMBER	M
103-A3	TRANSACTION CODE	M
104-A4	PROCESSOR CONTROL NUMBER	M
109-A9	TRANSACTION COUNT	M
650-S1	ACCUMULATOR YEAR	M
651-S2	TRANSACTION IDENTIFIER	M
110-AK	SOFTWARE VENDOR/CERTIFICATION ID	M

Notes on Financial Information Reporting Transaction Header Segment on a Request:

The Financial Information Reporting Transaction Header Segment is a mandatory, fixed length segment for Financial Information Reporting Inquiry, Financial Information Reporting Update and Financial Information Reporting Exchange transactions. The "Situation" column is not applicable.

9.1.2 FINANCIAL INFORMATION REPORTING REQUEST INSURANCE SEGMENT (INQUIRY, UPDATE, EXCHANGE)

Financial Information Reporting Request Insurance Segment			
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
302-C2	CARDHOLDER ID	M	
A33-ZX	CMS PART D CONTRACT ID	M	Assigned by CMS Sent by the sender; informational for the receiver. The receiver may choose to use the field to clarify matching, or the receiver may choose to ignore the field if not needed to clarify matching.
A34-ZY	MEDICARE PART D PLAN BENEFIT PACKAGE (PBP)	M	Assigned by CMS Sent by the sender; informational for the receiver. The receiver may choose to use the field to clarify matching, or the receiver may choose to ignore the field if not needed to clarify matching.
301-C1	GROUP ID	Q	Financial Information Reporting (Inquiry/Update/Exchange): Required if known.
303-C3	PERSON CODE	Q	Financial Information Reporting (Inquiry/Update/Exchange): Required if known.

Notes on Financial Information Reporting Request Insurance Segment on a Request:

The Financial Information Reporting Request Insurance Segment is mandatory for Financial Information Reporting Inquiry, Financial Information Reporting Update and Financial Information Reporting Exchange transactions. Fields defined as Mandatory are required to be submitted when the segment is sent.

9.1.3 PATIENT SEGMENT (INQUIRY, UPDATE, EXCHANGE)

Patient Segment			
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
331-CX	PATIENT ID QUALIFIER	N	Financial Information Reporting (Inquiry/Update/Exchange): Not used.
332-CY	PATIENT ID	N	Financial Information Reporting (Inquiry/Update/Exchange): Not used.
304-C4	DATE OF BIRTH	Q	Financial Information Reporting (Inquiry/Update/Exchange): Required if known.
305-C5	PATIENT GENDER CODE	Q	Financial Information Reporting (Inquiry/Update/Exchange): Required if known.
310-CA	PATIENT FIRST NAME	N	Financial Information Reporting (Inquiry/Update/Exchange): Not used.
311-CB	PATIENT LAST NAME	N	Financial Information Reporting (Inquiry/Update/Exchange): Not used.
322-CM	PATIENT STREET ADDRESS	N	Financial Information Reporting (Inquiry/Update/Exchange): Not used.
323-CN	PATIENT CITY ADDRESS	N	Financial Information Reporting (Inquiry/Update/Exchange): Not used.

Patient Segment			
Field	Field Name	Mandatory or Situational	Situation
324-CO	PATIENT STATE / PROVINCE ADDRESS	N	Financial Information Reporting (Inquiry/Update/Exchange): Not used.
325-CP	PATIENT ZIP/POSTAL ZONE	N	Financial Information Reporting (Inquiry/Update/Exchange): Not used.
326-CQ	PATIENT PHONE NUMBER	N	Financial Information Reporting (Inquiry/Update/Exchange): Not used.
307-C7	PLACE OF SERVICE	N	Financial Information Reporting (Inquiry/Update/Exchange): Not used.
333-CZ	EMPLOYER ID	N	Financial Information Reporting (Inquiry/Update/Exchange): Not used.
334-1C	SMOKER / NON-SMOKER CODE	N	Financial Information Reporting (Inquiry/Update/Exchange): Not used.
335-2C	PREGNANCY INDICATOR	N	Financial Information Reporting (Inquiry/Update/Exchange): Not used.
350-HN	PATIENT E-MAIL ADDRESS	N	Financial Information Reporting (Inquiry/Update/Exchange): Not used.
384-4X	PATIENT RESIDENCE	N	Financial Information Reporting (Inquiry/Update/Exchange): Not used.

Notes on Patient Segment on a Request:

The Patient Segment is situational for Financial Information Reporting Inquiry, Financial Information Reporting Update and Financial Information Reporting Exchange transactions. It is used when a receiver needs patient demographic information to ascertain the patient. Fields defined as Mandatory are required to be submitted when the segment is sent.

9.1.4 REQUEST REFERENCE SEGMENT (INQUIRY, UPDATE, EXCHANGE)

Request Reference Segment		
Field	Field Name	Mandatory or Situational
111-AM	SEGMENT IDENTIFICATION	M
654-S5	DATETIME	M

Notes on Request Reference Segment on a Request:

The Request Reference Segment is mandatory for Financial Information Reporting Update and Financial Information Reporting Exchange transactions. Fields defined as Mandatory are required to be submitted when the segment is sent.

The Request Reference Segment is not used for Financial Information Reporting Inquiry transactions.

9.1.5 REQUEST FINANCIAL SEGMENT (INQUIRY, UPDATE, EXCHANGE)

Request Financial Segment		
Field	Field Name	Mandatory or Situational
111-AM	SEGMENT IDENTIFICATION	M

656-S7	ACCUMULATOR MONTH COUNT	M
655-S6	ACCUMULATOR MONTH	M***R***
652-S3	ACCUMULATED PATIENT TRUE OUT OF POCKET AMOUNT	M***R***
653-S4	ACCUMULATED GROSS COVERED DRUG COST AMOUNT	M***R***

Notes on Request Financial Segment on a Request:

The Request Financial Segment is mandatory for Financial Information Reporting Update and Financial Information Reporting Exchange transactions. Fields defined as Mandatory are required to be submitted when the segment is sent.

The Request Financial Segment is not used for Financial Information Reporting Inquiry transactions.

9.2 RESPONSE SEGMENTS**9.2.1 TRANSMISSION ACCEPTED/TRANSACTION APPROVED (INQUIRY, UPDATE, EXCHANGE)****9.2.1.1 FINANCIAL INFORMATION REPORTING RESPONSE HEADER SEGMENT (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)**

Financial Information Reporting Response Header Segment		
Field	Field Name	Mandatory or Situational
102-A2	VERSION/RELEASE NUMBER	M
103-A3	TRANSACTION CODE	M
109-A9	TRANSACTION COUNT	M
501-F1	HEADER RESPONSE STATUS	M
650-S1	ACCUMULATOR YEAR	M
651-S2	TRANSACTION IDENTIFIER	M

Notes on Financial Information Reporting Response Header Segment on an Accepted/Approved Response:

The Financial Information Reporting Response Header Segment is a mandatory, fixed length segment when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) for Financial Information Reporting Inquiry, Financial Information Reporting Update and Financial Information Reporting Exchange transactions.

9.2.1.2 FINANCIAL INFORMATION REPORTING RESPONSE MESSAGE SEGMENT (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

Financial Information Reporting Response Message Segment			
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Financial Information Reporting (Inquiry, Update, Exchange): Required if text is needed for clarification or detail.

Notes on Financial Information Reporting Response Message Segment on an Accepted/Approved Response:

The Financial Information Reporting Response Message Segment is situational when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) for Financial Information Reporting Inquiry, Financial Information Reporting Update and Financial Information Reporting Exchange transactions. It is used when additional text information needs to be sent. Fields defined as Mandatory are required to be submitted when the segment is sent.

9.2.1.3 FINANCIAL INFORMATION REPORTING RESPONSE STATUS SEGMENT (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

Financial Information Reporting Response Status Segment			
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Financial Information Reporting (Inquiry, Update, Exchange): Required if needed to identify the transaction.
510-FA	REJECT COUNT	N	Financial Information Reporting (Inquiry, Update, Exchange): Not used.
511-FB	REJECT CODE	N ***R***	Financial Information Reporting (Inquiry, Update, Exchange): Not used.
546-4F	REJECT FIELD OCCURRENCE INDICATOR	N***R***	Financial Information Reporting (Inquiry, Update, Exchange): Not used.
526-FQ	ADDITIONAL MESSAGE INFORMATION	Q	Financial Information Reporting (Inquiry, Update, Exchange): Required if additional text is needed for clarification or detail.

Notes on Financial Information Reporting Response Status Segment on an Accepted/Approved Response:

The Response Status Segment is mandatory for a response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) for Financial Information Reporting Inquiry, Financial Information Reporting Update and Financial Information Reporting Exchange transactions. The Response Status Segment is sent from the sender to the receiver to identify the outcome of the request. Fields defined as Mandatory are required to be submitted when the segment is sent.

9.2.1.4 RESPONSE FINANCIAL SEGMENT (TRANSMISSION ACCEPTED/TRANSACTION APPROVED)

Response Financial Segment		
Field	Field Name	Mandatory or Situational
111-AM	SEGMENT IDENTIFICATION	M
656-S7	ACCUMULATOR MONTH COUNT	M
655-S6	ACCUMULATOR MONTH	M***R**
652-S3	ACCUMULATED PATIENT TRUE OUT OF POCKET AMOUNT	M***R**
653-S4	ACCUMULATED GROSS COVERED DRUG COST AMOUNT	M***R***

Notes on Response Financial Segment on an Accepted/Approved Response:

The Response Financial Segment is mandatory for a response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "A" (Approved) for Financial Information Reporting Inquiry and Financial Information Reporting Exchange transactions. The Response Financial Segment is sent from the sender to the receiver to identify accumulated financial figures. Fields defined as Mandatory are required to be submitted when the segment is sent.

The Response Financial Segment is not used on a Financial Information Reporting Update transaction.

9.2.2 TRANSMISSION ACCEPTED/TRANSACTION REJECTED (INQUIRY, UPDATE, EXCHANGE)

9.2.2.1 FINANCIAL INFORMATION REPORTING RESPONSE HEADER SEGMENT (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

Financial Information Reporting Response Header Segment		
Field	Field Name	Mandatory or Situational
102-A2	VERSION/RELEASE NUMBER	M
103-A3	TRANSACTION CODE	M
109-A9	TRANSACTION COUNT	M
501-F1	HEADER RESPONSE STATUS	M
650-S1	ACCUMULATOR YEAR	M
651-S2	TRANSACTION IDENTIFIER	M

Notes on Financial Information Reporting Response Header Segment on an Accepted/Rejected Response:

The Financial Information Reporting Response Header Segment is a mandatory, fixed length segment when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected) for Financial Information Reporting Inquiry, Financial Information Reporting Update and Financial Information Reporting Exchange transactions..

9.2.2.2 FINANCIAL INFORMATION REPORTING RESPONSE MESSAGE SEGMENT (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

Financial Information Reporting Response Message Segment			
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Financial Information Reporting (Inquiry, Update, Exchange): Required if text is needed for clarification or detail.

Notes on Financial Information Reporting Response Message Segment on an Accepted/Rejected Response:

The Financial Information Reporting Response Message Segment is situational when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected) for Financial Information Reporting Inquiry, Financial Information Reporting Update and Financial Information Reporting Exchange transactions. It is used when additional text information needs to be sent. Fields defined as Mandatory are required to be submitted when the segment is sent.

9.2.2.3 FINANCIAL INFORMATION REPORTING RESPONSE STATUS SEGMENT (TRANSMISSION ACCEPTED/TRANSACTION REJECTED)

Financial Information Reporting Response Status Segment			
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Financial Information Reporting (Inquiry, Update, Exchange): Required if needed to identify the transaction.

510-FA	REJECT COUNT	R	Financial Information Reporting (Inquiry, Update, Exchange): Maximum count of 5. Required.
511-FB	REJECT CODE	R ***R***	Financial Information Reporting (Inquiry, Update, Exchange): Required.
546-4F	REJECT FIELD OCCURRENCE INDICATOR	Q***R***	Financial Information Reporting (Inquiry, Update, Exchange): Required if a repeating field is in error, to identify repeating field occurrence. This field must be sent when relaying error information about a repeating field or set. Note, if the Reject Code is not denoting a repeating field or set, the Reject Field Occurrence Indicator must not be sent.
526-FQ	ADDITIONAL MESSAGE INFORMATION	Q	Financial Information Reporting (Inquiry, Update, Exchange): Required if additional text is needed for clarification or detail.

Notes on Financial Information Reporting Response Status Segment on an Accepted/Rejected Response:

The Response Status Segment is mandatory for a response when the Header Response Status (501-F1) of "A" (Accepted) and Transaction Response Status (112-AN) of "R" (Rejected) for Financial Information Reporting Inquiry, Financial Information Reporting Update and Financial Information Reporting Exchange transactions. The Response Status Segment is sent from the sender to the receiver to identify the outcome of the request. Fields defined as Mandatory are required to be submitted when the segment is sent.

9.2.3 TRANSMISSION REJECTED/TRANSACTION REJECTED (INQUIRY, UPDATE, EXCHANGE)

9.2.3.1 FINANCIAL INFORMATION REPORTING RESPONSE HEADER SEGMENT (TRANSMISSION REJECTED/TRANSACTION REJECTED)

Financial Information Reporting Response Header Segment		
Field	Field Name	Mandatory or Situational
102-A2	VERSION/RELEASE NUMBER	M
103-A3	TRANSACTION CODE	M
109-A9	TRANSACTION COUNT	M
501-F1	HEADER RESPONSE STATUS	M
650-S1	ACCUMULATOR YEAR	M
651-S2	TRANSACTION IDENTIFIER	M

Notes on Financial Information Reporting Response Header Segment on a Rejected/Rejected Response:

The Financial Information Reporting Response Header Segment is a mandatory, fixed length segment when the Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected) for Financial Information Reporting Inquiry, Financial Information Reporting Update and Financial Information Reporting Exchange transactions.

9.2.3.2 FINANCIAL INFORMATION REPORTING RESPONSE MESSAGE SEGMENT (TRANSMISSION REJECTED/TRANSACTION REJECTED)

Financial Information Reporting Response Message Segment

Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
504-F4	MESSAGE	Q	Financial Information Reporting (Inquiry, Update, Exchange): Required if text is needed for clarification or detail.

Notes on Financial Information Reporting Response Message Segment on a Rejected/Rejected Response:

The Financial Information Reporting Response Message Segment is situational when the Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected) for Financial Information Reporting Inquiry, Financial Information Reporting Update and Financial Information Reporting Exchange transactions. It is used when additional text information needs to be sent. Fields defined as Mandatory are required to be submitted when the segment is sent.

9.2.3.3 FINANCIAL INFORMATION REPORTING RESPONSE STATUS SEGMENT (TRANSMISSION REJECTED/TRANSACTION REJECTED)

Financial Information Reporting Response Status Segment			
Field	Field Name	Mandatory or Situational	Situation
111-AM	SEGMENT IDENTIFICATION	M	
112-AN	TRANSACTION RESPONSE STATUS	M	
503-F3	AUTHORIZATION NUMBER	Q	Financial Information Reporting (Inquiry, Update, Exchange): Required if needed to identify the transaction.
510-FA	REJECT COUNT	R	Financial Information Reporting (Inquiry, Update, Exchange): Maximum count of 5. Required.
511-FB	REJECT CODE	R ***R***	Financial Information Reporting (Inquiry, Update, Exchange): Required.
546-4F	REJECT FIELD OCCURRENCE INDICATOR	Q***R***	Financial Information Reporting (Inquiry, Update, Exchange): Required if a repeating field is in error, to identify repeating field occurrence. This field must be sent when relaying error information about a repeating field or set. Note, if the Reject Code is not denoting a repeating field or set, the Reject Field Occurrence Indicator must not be sent.
526-FQ	ADDITIONAL MESSAGE INFORMATION	Q	Financial Information Reporting (Inquiry, Update, Exchange): Required if additional text is needed for clarification or detail.

Notes on Financial Information Reporting Response Status Segment on a Rejected/Rejected Response:

The Response Status Segment is mandatory for a response when the Header Response Status (501-F1) of "R" (Rejected) and Transaction Response Status (112-AN) of "R" (Rejected) for Financial Information Reporting Inquiry, Financial Information Reporting Update and Financial Information Reporting Exchange transactions. The Response Status Segment is sent from the sender to the receiver to identify the outcome of the request. Fields defined as Mandatory are required to be submitted when the segment is sent.

10. SPECIFIC SEGMENT DISCUSSION

10.1 REQUEST SEGMENTS

10.1.1 FINANCIAL INFORMATION REPORTING TRANSACTION HEADER SEGMENT

The Financial Information Reporting Transaction Header Segment is required and must be first in the transmission. All fields are required positionally. When a field is not used, the field must be filled with zeroes or spaces, as appropriate.

10.1.1.1 TRANSACTION COUNT (109-A9)

For the Financial Information Reporting Transaction only one transaction per transmission is allowed; therefore, the Transaction Count (109-A9) will always be 1. (See section [“Frequently Asked Questions”, “Rejecting For Invalid Header Fields”](#).)

10.1.1.2 TRANSACTION CODE (103-A3)

The Transaction Code (103-A3) field defines when the Facilitator is either inquiring or updating a patient’s Accumulated Patient True Out Of Pocket (652-S3) or Accumulated Gross Covered Drug Cost Amount (653-S4). The Transaction Code (103-A3) supports

- Financial Information Reporting Inquiry (F1),
- Financial Information Reporting Update (F2),
- Financial Information Reporting Exchange (F3).

The Request Financial Segment is mandatory for Financial Information Reporting Update and Financial Information Reporting Exchange transactions. The Request Financial Segment is not used for Financial Information Reporting Inquiry transactions. There is no reason to send a Financial Information Reporting Update transaction unless the Facilitator has received financial information from a Financial Information Reporting Inquiry transaction.

10.1.1.3 TRANSACTION IDENTIFIER (651-S2)

The Transaction Identifier (651-S2) field is used to uniquely identify a series of transmissions that begins with a Financial Information Reporting Inquiry and ends with a Financial Information Reporting Update. The Transaction Identifier (651-S2) is new for each initiated Inquiry and carried through for any corresponding Financial Information Reporting Exchange or Financial Information Reporting Update.

10.1.1.4 ACCUMULATOR YEAR (650-S1)

The Accumulator Year (650-S1) field is used by the Facilitator on the Financial Information Reporting Inquiry to request from the old plan the accumulated financial figures. On the Financial Information Reporting Update and Financial Information Reporting Exchange Requests, it is used by the Facilitator to indicate to the accumulator year on which the financial figures were supplied.

10.1.2 REQUEST REFERENCE SEGMENT

For a Financial Information Reporting Inquiry, the Request Reference Segment is not used. For a Financial Information Reporting Update or Financial Information Reporting Exchange, the DateTime is a stamp of when the transmission was created and sent to the plan. See section [“Scenarios and Solutions”, “Reporting That Occurs When Patient Changes Part D Plan”, “Rules”, “DateTime \(654-S5\)”](#).

10.1.3 REQUEST FINANCIAL SEGMENT

10.1.3.1 FINANCIAL FIELDS

The Accumulated Patient True Out Of Pocket Amount (652-S3) is used by the Facilitator to report, on a Financial Information Reporting Update, the old plan(s) reported amount for an accumulator year to the new plan for appropriate month(s). The Accumulated Patient True Out Of Pocket Amount (652-S3) represents costs for covered Part D drugs incurred by a patient that are applicable towards the annual out-of-pocket limit set by the Centers for Medicare and Medicaid Services (CMS) as per statute and regulation. An out-of-pocket limit may vary from coverage year to coverage year.

The Accumulated Gross Covered Drug Cost Amount (653-S4) is used by the Facilitator to report, on a Financial Information Reporting Update, the old plan(s) reported amount for an accumulator year to the new plan for appropriate month(s). The Accumulated Gross Covered Drug Cost Amount (653-S4) represents the cost incurred by the plan for covered Part D drugs including amounts paid by or on behalf of a patient and including certain dispensing fees, but not including administrative costs.

When a patient's plan changes and reporting of TrOOP balance occurs, an old plan may still receive subsequent financial activity related to their coverage for the patient (e.g., after-the-fact Information Reporting transactions for updating TrOOP, claims/reversals or adjustments can be processed causing TrOOP or the gross covered drug cost amounts to change).

10.2 RESPONSE SEGMENTS

10.2.1 FINANCIAL INFORMATION REPORTING RESPONSE HEADER SEGMENT

The Financial Information Reporting Response Header Segment is required and must be first in the transmission. All fields are required positionally, although not all fields might be populated, depending upon trading partner needs. When a field is not used, the field must be filled with zeroes or spaces, as appropriate. All fields sent on the request must be returned on the response.

Header Response Status (501-F1)

If either the entire transmission or the Header is in error, the Header Response Status in the Financial Information Reporting Response Header Segment is 'R'.

If the transaction rejects for detail errors, the Header Response Status in the Financial Information Reporting Response Header Segment is 'A' and the Transaction Response Status field in the Financial Information Reporting Response Header Segment is 'R'. The appropriate reject code(s) must be displayed when transactions reject for detail errors.

10.2.1.1 ACCUMULATOR YEAR (650-S1)

This field must contain the value that was submitted on the request.

10.2.1.2 TRANSACTION IDENTIFIER (651-S2)

The Transaction Identifier (651-S2) field is used to uniquely identify a series of transmissions that begins with a Financial Information Reporting Inquiry and ends with a Financial Information Reporting Update. This response field must contain the value that was submitted on the request.

10.2.2 RESPONSE FINANCIAL SEGMENT

10.2.2.1 FINANCIAL FIELDS

The Accumulated Patient True Out Of Pocket Amount (652-S3) is used by the plan to respond, on a Financial Information Reporting Inquiry or Financial Information Reporting Exchange, the old plan(s) reported amount for an accumulator year to the new plan for appropriate month(s). The Accumulated Patient True Out Of Pocket Amount (652-S3) represents costs for covered Part D drugs incurred by a patient that are applicable towards the annual out-of-pocket limit set by the Centers for Medicare and Medicaid Services (CMS) as per statute and regulation. An out-of-pocket limit may vary from coverage year to coverage year.

The Accumulated Gross Covered Drug Cost Amount (653-S4) is used by the plan to respond, on a Financial Information Reporting Inquiry or Financial Information Reporting Exchange, the old plan(s) reported amount for an accumulator year to the new plan for appropriate month(s). The Accumulated Gross Covered Drug Cost Amount (653-S4) represents the cost incurred by the plan for covered Part D drugs including amounts paid by or on behalf of an enrollee and including certain dispensing fees, but not including administrative costs.

When a patient's plan changes and reporting of TrOOP balance occurs, an old plan may still receive subsequent financial activity related to their coverage for the patient (e.g., after-the-fact Information Reporting transactions for updating TrOOP, claims/reversals or adjustments can be processed causing TrOOP or the gross covered drug cost amounts to change).

10.3 DUPLICATE TRANSMISSION

There are situations where the Originator sends the transaction request and the Receiver receives the request and processes the transaction. Then, due to communication problems or interruptions, the response is never received by the Originator. In these cases, the Originator must resubmit the transaction request. Due to the nature of these transactions, if a duplicate transmission occurs, the response must contain the most updated information available. In the case of a timeout, the same criteria are sent on the request, and the response contains the most updated information available.

10.3.1 DUPLICATE TRANSMISSION

A duplicate transmission is based on the following criteria:

- Same patient/member (Cardholder ID (302-C2))
- Same Accumulator Year (650-S1)
- Same Transaction Code (103-A3)
- Same Transaction Identifier (651-S2)
- Same DateTime (654-S5)

11. VERSION IDENTIFICATION SYSTEM

A Version/Release level reference scheme is in place for the NCPDP *Financial Information Reporting Standard Implementation Guide*. The reference scheme consists of a two-digit sequential enumerator.

The Version Identification changes may be: addition of new fields with or without values, addition/deletion/re-definition of values in an existing field, redefinition of fields, changes in field size or format, and updated documentation or clarification of existing or new data elements. Such changes must be accomplished through the ballot process.

Changes/addition/deletion of values that reside in the External Code List do not require the ballot process and do not have any impact on a Standards Version enumeration.

Editorial changes within an Implementation Guide, additions of Frequently Asked Questions, and all modifications made to provide clarity to the standard are considered publication changes. Publication changes do not impact a Standards Version enumeration. Publication changes are so noted on the publication page of the standard. Any additions, deletions, or modifications to the Implementation Guide that makes a substantive difference to the standard must be approved by process of a ballot.

NCPDP maintains and makes available the latest release from the last two (2) Master Versions of the NCPDP *Financial Information Reporting Standard Implementation Guide*.

12. FRAMEWORK

A communication standard is intended for use within a specific framework. There are two aspects to this framework:

- Business Framework - defines the nature of the business transaction for which this communication standard is an essential element.
- Technical Framework - describes the essential features of the technology that will be used to implement the standard, and how the standard affects the technology.

The Business Framework was described in a previous section. The Technical Framework for this standard is described below.

12.1 TECHNICAL FRAMEWORK

The International Standards Organization (ISO) has defined a framework for the definition of telecommunication standards. This standard, known as the "Open Systems Interface" standard, defines a seven-layer hierarchy of functions within a telecommunication network:

- Applications Layer - provides all services that are directly "comprehensible" to the users' applications -- in other words, this is the level that interfaces with the users' application. The Applications Layer identifies the users and sets an agreed upon level of security and makes one user responsible for error recovery.
- Presentation Layer - restructures data into the required format.
- Session Layer - establishes, synchronizes and coordinates the interaction between the end-application processes.
- Transport Layer - provides end-to-end data integrity and error correction.
- Network Layer - switches and routes information between the appropriate nodes.
- Data Link Layer - responsible for managing the physical transfer of data between the nodes.
- Physical Layer - responsible for accessing the physical media.

This version of the NCPDP *Financial Information Reporting Standard Implementation Guide* addresses the message formats that are used by a specific application; it is principally a Presentation Layer standard.

All data should be treated in a "transparent" mode throughout the OSI ISO hierarchy to avoid a session termination in an SNA LU2 environment.

12.2 SCOPE

As defined by the Business and Technical Framework described above, the scope of this version of the NCPDP *Financial Information Reporting Standard Implementation Guide* is limited as follows:

- Defines the communication of data and the corresponding responses with respect to communications at the Presentation Layer.
- Discusses and recommends specific implementation at the Application, Session, and Transport Layers.
- Recognizes the implications of specific implementations at the Network, Data Link, and Physical Layers.
- Does not define or preclude from use any additional data elements whose intent is to assist the processor or its telecommunication intermediary in fulfilling specific requirements of the Presentation, Session, Transport, Network, Data Link or Physical Layers of the ISO OSI Standard to

which this version of the standard adheres. Such information includes network logons, protocols and data fields that are added as prefixes to the start of the application record.

12.3 TECHNICAL DEFINITIONS

This document facilitates the submission of a transmission by a Sender, and accommodates a specific response to that transmission submission by a Receiver. This communication is performed in an on-line, real-time environment. The essential features of this environment are outlined below:

- **On-Line** - In the context of this version of this document, an "on-line environment" means a logically direct electronic connection between two active participants. An "active participant" is any device with the capability to accept and act upon a data stream, recognize the start and end of the data stream, and respond based upon the content of the data stream. This device can range from a simple data capture terminal to a full-function, general-purpose computer. The participants are assumed to be from two independent organizations. This standard is for use **between** organizations; not **within** an organization.

Within the Business Framework described above, the originator of the transmission is the Sender, and the "Receiver" is either the Processor.

- **Real-Time** - In the context of this document, a "real-time" transmission is one that is functionally instantaneous. The Sender of the transmission asks a question or makes a request of the Receiver, and the Sender does not proceed with its current task until it receives a response. This is a single request/single response type of communication.
- **Transmission** - The highest level of data transfer is the transmission. The transmission contains information, which is global to the entire data set. This includes routing information, identification, and information, which determine the parsing of the transactions within. A transmission must contain one transaction.
- **Transaction** - Transactions occur within transmissions. Transactions are comprised of data segments of related data elements. One transaction will occur within a transmission.

12.4 CONNECTIVITY BETWEEN PARTICIPANTS

There are different connections that might exist between the Originator and the Receiver including:

- Dial-up directly from Originator to Receiver
- Leased-line/high speed connection directly from Originator to Receiver
- Dial-up from Originator to Switch, Leased-line/high speed connection from Switch to Receiver
- Leased-line/high speed connection from Originator to Switch, Leased-line/high speed connection from Switch to Receiver

12.5 SOFTWARE/SYSTEM DEVELOPMENT

Determine if the trading partners to whom you will transmit transactions can accommodate the *Financial Information Reporting Standard* format.

In general, the only default values for fields should be spaces or zeroes, depending on the format of the field. Incorrect implementation of default values can result in improper reimbursement to the adjudicator (processor).

Software must be capable of generating and receiving a response with the same 'Version/Release Number', 'Transaction Code', and 'Transaction Count' as the transaction transmitted. There is one exception - when the transmission is rejected at the header level due to errors in invalid Version/Release Number (102-A2) or Transaction Count (109-A9) - only one response must be returned. For the Financial Information Reporting Transaction only one transaction per transmission is allowed; therefore, the

Transaction Count (109-A9) will always be 1. (See section [“Frequently Asked Questions”](#), [“Rejecting For Invalid Header Fields”](#).)

12.6 RESPONSIBILITIES OF THE PARTICIPANTS

When using this standard, the Originator, Switch, and the Receiver are expected to perform specific technical functions, as outlined below:

12.6.1 RESPONSIBILITIES OF THE ORIGINATOR

At a high-level, the Originator is responsible for:

- Populating all mandatory fields for this request transmission.
- Establishing the connection with the Switch or Processor, and initiating the telecommunication session.
- Interpreting and acting upon **any** response provided by the Processor. This could also include the situation where no response is received.
- Terminating the session and disconnecting the transmission.

12.6.2 RESPONSIBILITIES OF THE SWITCH

At a high-level, the Switch is responsible for:

- Establishing the connection with the Processor and delivering the request from the Originator.
- Interpreting the request submitted by the Originator and responding as needed to provide the maximum amount of information for error correction and resolution when required.
- Providing the ability to convert versions of the standard as feasibly possible and needed based on trading partner agreements.
- Returning the response from the Processor to the Originator.
- Providing a high level of system availability and providing a viable fallback mechanism in the event of equipment failure.

12.6.3 RESPONSIBILITIES OF THE RECEIVER

At a high-level, the Receiver is responsible for:

- Interpreting requests submitted by the Originator and responding as needed to provide the maximum amount of information for error correction and resolution when required.
- Populating all mandatory fields for this response transmission.
- Ignoring irrelevant data that may be supplied by the Originator (i.e., the request may have data in fields not required for a particular plan. This should not create an error).
- Recognizing and supporting multiple versions of the standard for a long enough period of time to allow the users to convert their processing as new versions of the standard are developed and released.
- Providing a high level of system availability and providing a viable fallback mechanism in the event of equipment failure.

13. GENERAL STRUCTURAL OVERVIEW

13.1 OVERVIEW

Transmission - The highest level of data transfer is the transmission. The transmission contains information, which is global to the entire data set. This includes routing information, identification, and information, which determine the parsing of the transactions within. A transmission must contain one transaction.

The Financial Information Reporting Transaction Header and Financial Information Reporting Response Header segments contain fixed length data elements. These segments do not use field separators to separate data elements. In these segments, each data element is transmitted at its **maximum length positionally**. The Financial Information Reporting Transaction Header Segment is required and must be first in the transmission. When a field is not used, depending upon trading partner needs, the field must be filled with zeroes or spaces, as appropriate.

At the Transmission request level, the Financial Information Reporting Transaction Header Segment must appear first. The Financial Information Reporting Request Insurance Segment, Request Reference Segment, and Request Financial Segment can be submitted in any order, if they appear, regardless of whether they are mandatory or situational segments. Note the Segments must occur only once and according to the rules for that transaction.

At the Transmission response level, the Financial Information Reporting Response Header Segment must appear first. The Financial Information Reporting Response Message Segment, Financial Information Reporting Response Status Segment and Response Financial Segment may occur in any order after the Header Segment. Note the Segments must occur only once and according to the rules for that transaction.

13.2 TRANSMISSION LEVEL FOR A REQUEST

The following segments occur at the transmission level in a request. Refer to section [“Financial Information Reporting Situations”](#) to determine which segments are appropriate for each transaction code.

- Financial Information Reporting Transaction Header Segment
- Financial Information Reporting Request Insurance Segment
- Request Reference Segment
- Request Financial Segment
- Patient Segment

For every request, the following rules apply:

- The Financial Information Reporting Transaction Header is mandatory and must appear first in the request.
- The transmission level segments follow (Financial Information Reporting Request Insurance Segment, Request Reference Segment, Request Financial Segment).
 - These request segments are mandatory, situational, or not sent according to the diagrams published in this document.
- The Transaction Count on the request should match the number of transactions sent within the transmission. There is one exception - when the transmission is rejected at the header level due to errors in invalid Version/Release Number (102-A2) or Transaction Count (109-A9) – a forced Transaction Count (109-A9) must be returned. For the Financial Information Reporting Transaction only one transaction per transmission is allowed; therefore, the Transaction Count

(109-A9) will always be 1. (See section [“Frequently Asked Questions”](#), [“Rejecting For Invalid Header Fields”](#).)

13.3 TRANSACTION LEVEL FOR A REQUEST

There are no transaction level segments for Financial Information Reporting transactions.

13.4 TRANSMISSION LEVEL FOR A RESPONSE

The following segments occur at the transmission level in a response. Refer to section [“Financial Information Reporting Situations”](#) to determine which segments are appropriate for each transaction code.

- Financial Information Reporting Response Header Segment
- Financial Information Reporting Response Message Segment

Financial Information Reporting Response Header, field Header Response Status (501-F1) is limited to:

'A ' for transmission *"accepted"*

'R ' for transmission *"rejected"*

For every response, the following rules apply:

- The Financial Information Reporting Response Header Segment is mandatory and must appear first in the response.
- The Financial Information Reporting Response Message Segment follows, and is situational.
- The Financial Information Reporting Response Status Segment is mandatory.
- The Response Financial Segment is situational.
- The Transaction Count on the response should match the Transaction Count sent in the request, and should match the number of responses returned in the transmission. There is one exception - when the transmission is rejected at the header level due to errors in invalid Version/Release Number (102-A2) or Transaction Count (109-A9) - a forced Transaction Count (109-A9) must be returned. For the Financial Information Reporting Transaction only one transaction per transmission is allowed; therefore, the Transaction Count (109-A9) will always be 1. (See section [“Frequently Asked Questions”](#), [“Rejecting For Invalid Header Fields”](#).)

13.5 TRANSACTION LEVEL FOR A RESPONSE

The following segments occur at the transaction level in a response. Refer to Segment Usage Matrices in this document to determine which segments are appropriate for each transaction code.

- Financial Information Reporting Response Status Segment
- Response Financial Segment

Response Status Segment, field Transaction Response Status (112-AN) is limited to:

'A' for *"approved"*

'R ' for *"rejected"*

14. STANDARD CONVENTIONS

This section discusses the generally accepted practices used by the industry and provides guidelines for determining which variant(s) of the standard to use.

14.1 VARIABLE USAGE GUIDELINES

The NCPDP *Financial Information Reporting Standard Implementation Guide* allows variable length transmissions only.

- Sending only necessary data elements and truncating whenever possible assures minimal transmission time.
- Situational fields and segments may be added to or deleted from the transmission as necessary to accommodate changing needs.
- Leading zeros and trailing blanks may be omitted from some data fields.
- Fields in the record are defined as alphanumeric, numeric, or dollar fields.
- Dollar fields default to zeroes; however, dollar fields are always signed. The least significant digit of a dollar field must always be an Overpunch Sign, not a digit.
- Every field should be capable of receiving its full range of values as defined in the Data Dictionary.
- Alphanumeric fields default to spaces, not null characters, when empty.
- Numeric fields default to zeroes.

14.2 GENERAL SYNTAX OUTLINE

Data elements have been grouped into segments to assist in usage of similar information.

14.2.1 HEADER SEGMENTS

The first segment of every transmission (request or response) is the Header Segment (Financial Information Reporting Transaction Header Segment or Financial Information Reporting Response Header Segment). This is the only segment that does not have a Segment Identifier since it is a fixed field and length segment. After the Header Segment, other segments are included. Every other segment has an identifier to denote the particular segment for parsing. Segments may appear in any order after the Header Segment. Segments are not allowed to repeat within a transaction.

In the Header Segment, all fields are required positionally and filled to their maximum designation. This is a fixed segment. If a required field is not used, it must be filled with spaces or zeroes, as appropriate. The fields within the Header Segment do not use field separators.

14.2.2 OTHER SEGMENTS

Other segments may have both required and situational fields. Situational fields in a segment are submitted after the required fields. Both types of fields must be preceded by a field separator and the field's identifier. Situational fields may appear in any order except for those designated with a qualifier or in a repeating group. The required and situational fields may be truncated to the actual size used. Refer to the "[Repetition And Maximum Occurrences](#)" sections that follow.

It is recommended that the Segment ID field not be submitted if no ensuing fields will be sent. If the Segment is situational for that transaction and there are no Mandatory fields within that Segment, the Segment Identification (111-AM) can be sent without an error generated. This is not recommended, but is possible.

The key is that the Segment must be situational for that transaction **and** there must not be any Mandatory fields within that Segment. If the Segment contains Mandatory fields, failure to send the mandatory fields is an error.

If the Segment is not used for that transaction, it is an error to send a Segment that is not defined for that transaction.

Parsing is accomplished with the use of two separators.

- Segment separator Hex 1E (Dec 30)
- Field separator Hex 1C (Dec 28)

14.2.3 A TRANSMISSION

A transmission includes the total request or response being sent. A transmission consists of the Financial Information Reporting Transaction Header Segment followed by situational Segments relating to the entire transmission.

14.2.4 A TRANSACTION

Within a transaction, appropriate segments are included. Segments are delineated with the usage of Segment separators. Segments are also identified with the usage of a Segment Identifier in the first position of each segment. One-to-many segments may be included in each transaction. Field separators are used to delineate fields in the segments.

14.3 SEPARATOR CHARACTERS

Level of Separator	Decimal Representation	Hex Representation	Comment
Segment	030	1E	Separates segments from each other.
Field	028	1C	Separates fields from each other.

For example, in a sample transmission, shown with very simplified syntax below, the following data stream might appear. Please note this uses the hex values represented above as <1E>, <1C>.

NOTE: The presence of a string of *b's* (*bbbb*) in the Content column designates a field that must be padded out to spaces. Please refer to the NCPDP *Data Dictionary* for field and segment cross-reference.

14.3.3 SEPARATOR CHARACTER RULES

The software that creates transmissions according to the rules of this document must ensure that the segment and field separator characters do not appear as data in any field.

14.4 FIELD DEFINITIONS AND VALUES

A definition of each data element and appropriate values is provided in the NCPDP *Data Dictionary* and NCPDP *External Code List*. These documents identify and define the information that is specified in the NCPDP Standard Formats. Each data element that is presented in a transaction data set is identified in the NCPDP *Data Dictionary*.

Every effort has been made to keep references to the names of data elements in the standard consistent with the NCPDP *Data Dictionary*. Please refer to the *Data Dictionary* for the complete names and definitions of the data elements. The NCPDP *External Code List* defines the valid values for the data elements.

14.5 CHARACTER SETS DESIGNATION

N	Unsigned Numeric, always right justified, zero filled. Example: 9(7)v999 is represented as 9999999999
D	Signed Numeric, sign is internal and trailing. Zeroes are always positive, always right justified. Dollar-cents amount with 2 positions to the right of the implied decimal point. All other positions to the left of the implied decimal point. Example: D field of length 8 is represented \$\$\$\$\$\$cc
A/N	Alpha/Numeric, always left justified, space filled. A-Z, 0-9, and printable characters.

14.6 CHARACTER SET DESIGNATION TRUNCATION

The following field format values are supported and are subject to truncation described in previous sections.

14.6.1 OVERVIEW

"Variable" implementation allows the sender and receiver the option of compressing or eliminating "situational" data elements to reduce message length where these data elements are not required by Processor.

The request and response contain "Mandatory" segments. The Transaction Header and Response Header segments contain fixed length data elements. These segments do not use field separators to separate data elements. In these segments, each data element is transmitted at its maximum length positionally. Data elements not needed for a particular transmission should be zero or space filled as appropriate.

For other segments, situational fields which are identified by field separators and field identifiers are utilized. "Situational" data elements may be present for both the header and transaction sections of a request or response. See ["General Syntax Outline"](#) section above for more information.

Situational data elements that are not mandatory may be eliminated or truncated. In the truncated method, data compression of leading zeros in numeric ("N" & "D") fields and trailing spaces in the alpha numeric ("A/N") fields may be suppressed to decrease transmission time. Processors must indicate the extent of their ability to accept variable transactions in their user documentation if this capability is desired. **NOTE:** Processors must be prepared to ignore situational fields submitted by Facilitators that are **not required**. These fields may not be of importance to the processor, but may be required of the Facilitator.

When transmitting a record, truncating trailing blanks and leading zeroes within fields in the variable portions of the record is recommended. If a field in one of the variable portions is empty, omit the field entirely (including the Field Separator and Field Identifier). Do not truncate or eliminate any fields in the required Financial Information Reporting Transaction Header Segment or Financial Information Reporting Response Header Segment.

14.6.2 NUMERIC

"N" = Unsigned Numeric, always right justified, zero filled.

Example: 9(7)v999 represents 999999999

Truncation: 0000000400 becomes 400

Remove leading zeros

Numeric fields default to zeroes.

14.6.2.1 NUMERIC TRUNCATION

When numeric fields are in a **mandatory fixed length segment**, such as the Financial Information Reporting Transaction Header Segment or Response Header Segment, the numeric fields must be padded with zeroes to the maximum length of the numeric field.

For **all other numeric fields**, sending the leading zero(es) is permissible (but not recommended), or truncating the leading zero(es) is permissible (and recommended). For a situational numeric field, a value of 01 is the same as 1 and either is permitted. A value of 0015 is the same as 15 and either is permitted.

14.6.3 DOLLAR

"D" = Signed Numeric, sign is internal and trailing (see section ["Internal Representation of Overpunch Signs"](#)), zero always positive, always right justified, zero filled dollar-cents amount with 2 positions to the right of the implied decimal point, all other positions to the left of the implied decimal point.

Example: "D" fields of length 8 represent \$\$\$\$\$\$cc

Truncation: 00000210{ becomes 210{

Remove leading zeros

If there is no claim activity, the oldest plan must return one month (the Accumulator Month Count (656-S7) = 1), the beginning coverage month in Accumulator Month (655-S6), and the financial information accumulators must be zeroes.

Due to the nature of this standard, the CMS instructions require plans to send balances only; therefore the smallest dollar amount that could be transmitted is zero. The dollar fields are signed, but negative dollar amounts must not be transmitted. If they are, the appropriate Missing/Invalid Reject Codes (511-FB) should be used.

14.6.3.1 DOLLAR TRUNCATION

When a dollar field is supported, a value must always be returned, whether zero or higher.

14.6.4 ALPHANUMERIC

"A/N" = Alpha/Numeric, upper case when alpha, always left justified, space filled, upper case, printable characters.

Truncation: "1234ABC44bbbb" becomes "1234ABC44"
Remove trailing spaces

The NCPDP *Telecommunication Standard Implementation Guide* allows the use of

<space>
0123456789
ABCDEFGHIJKLMNOPQRSTUVWXYZ
~`!@#%&*()_-+=\|{}|};<.>/?;"

Alphanumeric fields default to spaces, not null characters, when empty.

The use of lower case letters ASCII 97 - 122 (61 - 7A hex) is not allowed in the NCPDP *Telecommunication Standard Implementation Guide*.

14.6.4.1 ALPHANUMERIC TRUNCATION

For situational alphanumeric fields, sending the trailing space(s) is permissible (but not recommended), or truncating the trailing space(s) is permissible (and recommended). For a situational alphanumeric field, a value of "1 " is the same as "1" and either are permitted. A value of "001 " is the same as "001" and either is permitted.

When alphanumeric fields are in a mandatory fixed length segment, such as the Financial Information Reporting Transaction Header Segment or Response Header Segment, the alphanumeric fields must be padded with spaces to the maximum length of the alphanumeric field.

An alphanumeric field may contain a space or spaces anywhere within the field. For example (where *b* is a space)

"ABC*b*DE" or
"*bb*ABC*b*DE"

are valid uses of a field with spaces. They are **technically different values**.

Trailing spaces may be truncated. For example,

"ABC" and
"ABC*bbb*"

are the same value when the trailing spaces are truncated.

Spaces at the beginning of the field must not be truncated. For example,

"ABC" and
"bbABC"

represent **technically different values** for the same field.

However, while leading spaces are *technically* valid, leading spaces are **not** recommended as one must consider the individual who will enter or view the data in question. For example, spaces at the beginning of a Cardholder ID or Group ID appear to be "white" space on the ID card so it is unlikely that it will be known that a leading space exists.

For example, Person Code (303-C3) is defined as a format of alphanumeric 3. In an alphanumeric field, every digit has significance, with trailing spaces allowed to be truncated. The value "60" in a three-byte alphanumeric field is actually "60 " (six-zero-blank) and is not the same value as "060" (zero-six-zero).

14.7 DEFAULT VALUES

The NCPDP *Data Dictionary* defines values and default values for the fields contained in this document. In general, unless otherwise specified by the *Data Dictionary*,

- Alpha-Numeric ("A/N") fields have default values of *spaces*
- Numeric ("N") and Signed Numeric ("D"), used for dollar fields, have default values of *zeros*.

14.8 INTERNAL REPRESENTATION OF OVERPUNCH SIGNS

The purpose of using Overpunch signs in dollar fields is to allow the representation of positive and negative dollar amounts without expanding the size of the field (i.e., to hold the plus or minus character).

The Overpunch sign replaces the right most character in a dollar field. The signed value designates the positive or negative status of the numeric value. The dollar field of \$99.95 would be represented as 999E with truncation. A negative dollar amount of \$2.50 would be represented as 25} with truncation.

UNITS			SIGNED POSITIVE				SIGNED NEGATIVE				
Digit	Graphics		Oct	Dec	Hex		Graphics		Oct	Dec	Hex
0	{		173	123	7B		}		175	125	7D
1	A		101	65	41		J		112	74	4A
2	B		102	66	42		K		113	75	4B

Table shows ASCII values

14.9 DATE FORMAT

Fields defined as Date format (CCYYMMDD) must not be defaulted to 00000000.

A date field must not default to zeroes, as this is an invalid date. If a Facilitator submits a date of zeroes, the processor must reject it as an invalid date, even if the processor ignores/does not use this field in their processing, but must store this field as part of the original transaction data. In databases that store this field as "date", write routines would fail with a write exception for the invalid date.

A processor that returns a date field is held to the same valid date rule.

14.9.1 COORDINATED UNIVERSAL TIME (UTC)

UTC is derived from International Atomic Time (TAI), which is a time scale tracking proper time on the surface of the Earth with no reference to the rotation of the Earth. UTC was previously referred to as Greenwich Mean Time (GMT).

The use of the DateTime field is used for tracking the order of transmissions. The Facilitator, as generator of the transmissions, calculates the UTC from its local time and sends it in the DateTime field on the transmissions. The receiving system does not need to calculate local time from UTC, unless desired.

14.10 IMPLIED DECIMAL POINTS

Decimal points in dollar fields are implied.

14.11 EXPLICIT HYPHENS

All hyphens are implied.

14.11.1 QUALIFIERS

Some data elements are further defined with the use of qualifiers. Qualifier fields must be submitted first, followed by the field qualified. If the field is not needed in the transaction type, both the qualifier and the field qualified are eliminated.

14.12 REPETITION AND MULTIPLE OCCURRENCES

This standard includes the ability to repeat certain fields and groups of fields. This document has detailed information and examples.

14.12.1 REPEATING DATA ELEMENTS

Data elements are allowed to be repeated according to rules described in this document. Repeating fields are always preceded with a count field.

Repeating fields may also be part of a set of common or similar fields, which means fields have a natural occurrence within a group that repeats. These sets/logical groupings are outlined in this document.

When multiple repeating fields are part of a set, the fields are situational. If the field is not needed for this set, the field identification and data must be eliminated.

14.12.1.1 COUNT FIELDS

Certain fields are used as count field. A count field indicates the number of repetitions that follow. It is the **total** number of repetitions that follow.

For example, a count field containing 4 means that four occurrences of the field will follow.

A count is the total number of repetitions that follow. In the Response Status Segment, the Reject Count (510-FA) would contain the value 4, with Reject Code (511-FB) following 4 times with each reject code value. The following is for illustration only.

For illustration only.

Field #	ID	Field Name	Value	Comment
---------	----	------------	-------	---------

Version 13

OFFICIAL RELEASE

January 2017

©National Council for Prescription Drug Programs, Inc.- Scottsdale, Arizona

Copyrighted Materials - See Copyright Statement for Allowed Use

111	AM	Segment Identification	34	Financial Information Reporting Response Status Segment
112	AN	Transaction Response Status	R	
510	FA	Reject Count	4	Total number of occurrences = Four
511	FB	Reject Code	01	M/I BIN
511	FB	Reject Code	04	M/I Processor Control Number
511	FB	Reject Code		M/I Group ID
511	FB	Reject Code		M/I Cardholder ID

14.12.1.2 USAGE

The following **count** field is contained in the request by the Facilitator (Financial Information Reporting Update or Financial Information Reporting Exchange transactions):

- Accumulator Month Count (656-S7) - maximum count of 12

The following **count** fields are returned by the processor:

- Reject Count (510-FA) – maximum count of 99; recommend support of count of ≤ 5
- Accumulator Month Count (656-S7) - maximum count of 12

14.12.1.3 REJECT FIELD OCCURRENCE INDICATOR

When an error condition arises on fields that are repeatable, the Reject Field Occurrence Indicator (546-4F) is used to denote which occurrence of the field or set in question has been rejected.

When a repeating field or set is in error, a Reject Code (511-FB) must denote the missing/invalid field or set, and the Reject Field Occurrence Indicator (546-4F) denote which occurrence is in error. For example, if an occurrence of the Accumulator Month Count (656-S7) is in error, one Reject Code (511-FB) is “S6” to denote “Missing/Invalid Accumulator Month”, and the Reject Field Occurrence Indicator (546-4F) must specify which iteration is in error (for example, “1” or “2”). By denoting the missing/invalid field in error, and which occurrence, the transaction may be interrogated to determine which field is in error. A partial view of the Response Status Segment follows:

Field #	ID	Field Name	Value	Comment
111	AM	Segment Identification	21	
112	AN	Transaction Response Status	R	
510	FA	Reject Count	1	One occurrence
511	FB	Reject Code	S6	M/I Accumulator Month
546	4F	Reject Field Occurrence Indicator	1	First iteration of Accumulator Month is in error

This is a partial view of the Response Status Segment when a submitted Accumulated Patient True Out of Pocket Amount (652-S3) is in error. This is illustrative only for a reject of a repeating field, as CMS may set up guidelines where this situation may not occur from the Facilitator.

Field #	ID	Field Name	Value	Comment
111	AM	Segment Identification	21	
112	AN	Transaction Response Status	R	
510	FA	Reject Count	2	Two occurrences
511	FB	Reject Code	S3	M/I Accumulated Patient True Out Of Pocket Amount
511	FB	Reject Code	X1	Accumulated Patient True Out of Pocket exceeds maximum
546	4F	Reject Field Occurrence Indicator	3	The third iteration of Accumulated Patient True Out of Pocket Amount is in error

The Reject Field Occurrence Indicator (546-4F) must directly follow the Reject Code (511-FB) when signifying a repeating field or set is in error. The Reject Code must denote the repeating field that is in error.

Note, the Reject Field Occurrence Indicator is a situational field, and therefore, if the Reject Code is not denoting a repeating field, the Reject Field Occurrence Indicator must not be sent. It must only be sent when relaying error information about a repeating field.

15. TRANSMISSION EXAMPLES

This section contains examples of transmission requests and responses. All fields are shown with only the significant example data in them. Each example is to be taken in its context. For example, based on the particular business example, pricing fields may be required or situational or not used.

This standard allows only variable length transmissions. Variable implementation offers the option of truncating or eliminating situational data elements and reducing overall message length.

The format contains two Mandatory fixed segments, the "Financial Information Reporting Transaction Header" and "Financial Information Reporting Response Header" segments. These two segments do not use field separators or field identifiers. All other segments use a Field Separator (hex character 1C) to separate each field. Each field has a unique identifier code that, when used in conjunction with the Field Separator, shows the start of a new field in the record (for example, FB refers to Field 511-FB, Reject Code).

All examples show field truncation and also omit situational fields when no values are given or required. It is recommended that trading partners be able to send and receive truncated fields and be capable of recognizing when situational fields have been eliminated.

15.1 EXAMPLE CONVENTIONS

The examples are shown with mandatory fields followed by situational fields that provide additional information. Situational segments and fields may or may not be transmitted, depending upon situational segment and field rules, and trading partner needs.

Segments will appear with the Header first (as required).

Transmission level Segments (in any order) appear next.

Transaction level Segments (in any order per Transaction) appear next.

Mandatory fields always appear first, and are in the order designated.

Required and situational fields appear in any order (but must follow the qualifier rule and count rules).

Formatting conventions: In the examples that follow, "bbbb..." denotes blanks and are included to populate required fixed length fields in the header segments.

For errors, the "VALUE" shown in **bold type** emphasizes the data in error.

15.2 CATEGORY (CAT) COLUMN

The **CAT** (Category) column:

LEGEND:		
Categorization		Explanation
M	Mandatory	Field has been defined as mandatory for the Segment for the Transaction, structural requirements.
R	Required	The situational field has been defined with the situation of " Required " for the Segment for the Transaction.
Q	Qualified Requirement	The situations defined have qualifications for usage ("Required if x", "Not required if y"). In examples, if a requirement is met for the field, the categorization of the field will be "R" (Required). For example, if a qualifier is dependent upon the qualified field. With the presence of the qualified field in the example, the qualifier becomes

LEGEND:		
Categorization		Explanation
		required. Or a count and a qualifier are dependent upon the qualified field. With the presence of the qualified field in the example, the count and the qualifier become required.
		Not all business cases can be represented, so where fields are categorized as "Q", if they are present in the example, it is assumed they meet the business requirements to satisfy the situation(s).

15.3 INQUIRY TO OLD PLAN, UPDATE TO NEW PLAN

15.3.1 FINANCIAL INFORMATION REPORTING INQUIRY – FROM FACILITATOR TO OLD PLAN

Facilitator sends Financial Information Reporting Inquiry to Old Plan. There is only one Old Plan in this scenario. The transmissions are taking place on 03/08/2008, after the coverage has moved to the New Plan. In this example the Old Plan needs the Patient Segment from the Facilitator in order to correctly match the patient.

Old Plan

15.4 INQUIRY TO OLD PLAN, REJECTED BY OLD PLAN

15.4.1 FINANCIAL INFORMATION REPORTING INQUIRY – FROM FACILITATOR TO OLD PLAN

New Scenario.

Facilitator sends Inquiry to Old Plan for Cardholder ID with CMS Part D Contract ID and Medicare Part D Plan Benefit Package (PBP), Group ID and Person Code. There is only one Old Plan in this scenario.

Patient is unknown to Old Plan for the criteria submitted; this may be due to eligibility/enrollment information not known to the Old Plan.

15.5 INQUIRY TO OLD PLAN A, EXCHANGE TO OLD PLAN B, UPDATE TO NEW PLAN – OVERLAP IN COVERAGE

15.5.1 FINANCIAL INFORMATION REPORTING INQUIRY – FROM FACILITATOR TO OLD PLAN A

New Scenario.

Facilitator sends Financial Information Reporting Inquiry to Old Plan A for Cardholder ID with CMS Part D Contract ID and Medicare Part D Plan Benefit Package (PBP), Group ID and Person Code. Old Plan A and Old Plan B both had coverage and claim activity for the patient in the same month, May. An example of this may be a retroactive enrollment, when the Old Plan A is not notified that the patient has terminated coverage at the end of the month.

Old Plan B will receive the amounts from Old Plan A and add their totals to the accumulators for the month of May based on any claims activity they have seen. The first set of transmissions take place on 05/29/2008, before coverage moves to the New Plan.

Transaction Identifier (651-S2) for the Financial Information Reporting Inquiry, Financial Information Reporting Exchange, and Financial Information Reporting Update transmissions is 123456789012345699665.

15.5.4 INQUIRY TO OLD PLAN A, EXCHANGE TO OLD PLAN B, UPDATE TO NEW PLAN – OVERLAP IN COVERAGE – MONTH UPDATES - CONTINUATION

15.5.4.1 FINANCIAL INFORMATION REPORTING INQUIRY – FROM FACILITATOR TO OLD PLAN A

Continuation of previous scenario.

It is now 06/09/2008 and Old Plan A has had claims activity and Old Plan B has had no new claims activity.

Facilitator sends Financial Information Reporting Inquiry to Old Plan A for Cardholder ID with CMS Part D Contract ID and Medicare Part D Plan Benefit Package (PBP), Group ID and Person Code. Old Plan A and Old Plan B both had coverage for the patient in the same month, May. An example of this may be a retroactive enrollment, when the Old Plan A is not notified that the patient has terminated coverage at the end of the month.

Old Plan B will receive the amounts from Old Plan A and add their totals to the accumulators for the month of May based on any claims activity they have seen.

15.9 INQUIRY TO OLD PLAN A, EXCHANGE TO OLD PLAN B, UPDATE TO NEW PLAN – MONTH UPDATES

15.9.1 FINANCIAL INFORMATION REPORTING INQUIRY – FROM FACILITATOR TO OLD PLAN A

New Scenario.

Facilitator sends Financial Information Reporting Inquiry to Old Plan A for Cardholder ID with CMS Part D Contract ID and Medicare Part D Plan Benefit Package (PBP), Group ID and Person Code.

In this scenario, the patient is covered under Old Plan A from January and February, Old Plan B from March through June, and New Plan from July through December. The Facilitator receives the enrollment change and sends the Financial Information Reporting Inquiry just before the coverage changes from Old Plan B to New Plan. This example shows each of the plans updating different months of financial information via the Financial Information Reporting Inquiry, Financial Information Reporting Exchange, and Financial Information Reporting Update transmissions.

The date of the transmission is 06/30/2008, just before coverage moves to New Plan.

Transaction Identifier (651-S2) for the Financial Information Reporting Inquiry, Financial Information Reporting Exchange, and Financial Information Reporting Update transmissions is 123456789012345699665.

15.9.3 FINANCIAL INFORMATION REPORTING UPDATE – FROM FACILITATOR TO NEW PLAN

Facilitator sends Financial Information Reporting Update to New Plan for same patient, but using New Plan's Cardholder ID, CMS Part D Contract ID and Medicare Part D Plan Benefit Package (PBP), (with no Group ID and Person Code) as identification, and passing the Old Plan A and B's information and patient financial information.

Transaction Identifier (651-S2) for the Financial Information Reporting Inquiry, Financial Information Reporting Exchange, and Financial Information Reporting Update transmissions is the same as above.

15.10 INQUIRY TO OLD PLAN A, EXCHANGE TO OLD PLAN B, UPDATE TO NEW PLAN – WHERE FIRST AND THIRD ENROLLMENT PERIODS ARE WITH THE SAME PLAN

15.10.1 FINANCIAL INFORMATION REPORTING INQUIRY – FROM FACILITATOR TO OLD PLAN A

New Scenario.

Facilitator sends Financial Information Reporting Inquiry to Old Plan A for Cardholder ID with CMS Part D Contract ID and Medicare Part D Plan Benefit Package (PBP), Group ID and Person Code.

In this scenario, the patient is covered under Old Plan A from January and February, Old Plan B from March through June, and New Plan from July through December. The New Plan is actually the same plan as Plan A because the patient has re-enrolled. The Facilitator receives the enrollment change and sends the Financial Information Reporting Inquiry just before the coverage changes from Old Plan B to New Plan. This example shows each of the plans updating different months of financial information via the Financial Information Reporting Inquiry, Financial Information Reporting Exchange, and Financial Information Reporting Update transmissions.

The date of the transmission is 06/30/2008, just before coverage moves to New Plan.

Transaction Identifier (651-S2) for the Financial Information Reporting Inquiry, Financial Information Reporting Exchange, and Financial Information Reporting Update transmissions is 112.

15.10.4 INQUIRY TO OLD PLAN A, EXCHANGE TO OLD PLAN B, UPDATE TO NEW PLAN – WHERE FIRST AND THIRD ENROLLMENT PERIODS ARE WITH THE SAME PLAN – SUBSEQUENT UPDATES - CONTINUATION

15.10.4.1 FINANCIAL INFORMATION REPORTING INQUIRY – FROM FACILITATOR TO OLD PLAN A

A continuation of the previous Scenario.

The previous scenario began with the Facilitator receiving the coverage change from Old Plan B to New Plan on June 30, 2008 and starting the Financial Information Reporting Inquiry transmission flow at that time. It is now July 15, 2008 and the Facilitator is checking for updated subsequent information.

The patient is covered under Old Plan A from January and February, Old Plan B from March through June, and New Plan from July through December. The New Plan is actually the same plan as Old Plan A because the patient has re-enrolled. This example shows each of the plans updating different months of financial information via the Financial Information Reporting Inquiry, Financial Information Reporting Exchange, and Financial Information Reporting Update transmissions. Old Plan A and Old Plan B have either received claims or adjustments which have changed the financial information.

Facilitator sends Financial Information Reporting Inquiry to Old Plan A for Cardholder ID with CMS Part D Contract ID and Medicare Part D Plan Benefit Package (PBP), Group ID and Person Code.

Transaction Identifier (651-S2) for the Financial Information Reporting Inquiry, Financial Information Reporting Exchange, and Financial Information Reporting Update transmissions is 125.

15.10.4.2 FINANCIAL INFORMATION REPORTING EXCHANGE – FROM FACILITATOR TO OLD PLAN B

Facilitator sends Financial Information Reporting Exchange to Old Plan B for same patient using Old Plan B's Cardholder ID, CMS Part D Contract ID and Medicare Part D Plan Benefit Package (PBP) (no Group ID and Person Code) as identification, and patient financial information. The Financial Information Reporting Exchange shows Old Plan A's financial information. Old Plan B responds with Old Plan A's months, as well as Old Plan B's coverage month's financial information.

Transaction Identifier (651-S2) for the Financial Information Reporting Inquiry, Financial Information Reporting Exchange, and Financial Information Reporting Update transmissions is the same as above.

15.11 INQUIRY TO OLD PLAN A (NO CLAIM ACTIVITY), EXCHANGE TO OLD PLAN B, UPDATE TO NEW PLAN – WHERE FIRST AND THIRD ENROLLMENT PERIODS ARE WITH THE SAME PLAN

15.11.1 FINANCIAL INFORMATION REPORTING INQUIRY – FROM FACILITATOR TO OLD PLAN A

New Scenario.

Facilitator sends Financial Information Reporting Inquiry to Old Plan A for Cardholder ID with CMS Part D Contract ID and Medicare Part D Plan Benefit Package (PBP), Group ID and Person Code. CMS Part D Contract ID and Medicare Part D Plan Benefit Package (PBP) will be the same for Old Plan A and the new plan.

In this scenario, the patient is very healthy and has no claim activity for many months. The patient is covered under Old Plan A from January and February, Old Plan B from March through June, and New Plan from July through December. The New Plan is actually the same plan as Old Plan A because the patient has re-enrolled. The Facilitator receives the enrollment change and sends the Financial Information Reporting Inquiry just before the coverage changes from Old Plan B to New Plan.

Old Plan A has no claim activity so the Financial Information Reporting Inquiry response contains an Accumulator Month Count (656-S7) = 1, Accumulator Month (655-S6) = 1 (January) since this is the start of coverage month, and zeroes in the financial accumulators. Old Plan B has no claims activity to report and passes on the January accumulators from Old Plan A.

The date of the transmission is 06/30/2008.

Transaction Identifier (651-S2) for the Financial Information Reporting Inquiry, Financial Information Reporting Exchange, and Financial Information Reporting Update transmissions is 123456789012345699665.

15.11.2 FINANCIAL INFORMATION REPORTING EXCHANGE – FROM FACILITATOR TO OLD PLAN B

Facilitator sends Financial Information Reporting Exchange to Old Plan B for same patient using Old Plan B's Cardholder ID, CMS Part D Contract ID and Medicare Part D Plan Benefit Package (PBP), (no Group ID and Person Code) as identification, and patient financial information. The Financial Information Reporting Exchange shows Old Plan A's financial information. Old Plan B has no claim activity to report, so Old Plan B responds with Old Plan A's month.

Transaction Identifier (651-S2) for the Financial Information Reporting Inquiry, Financial Information Reporting Exchange, and Financial Information Reporting Update transmissions is the same as above.

15.11.4 INQUIRY TO OLD PLAN A, EXCHANGE TO OLD PLAN B, UPDATE TO NEW PLAN – WHERE FIRST AND THIRD ENROLLMENT PERIODS ARE WITH THE SAME PLAN – SUBSEQUENT UPDATES - CONTINUATION

15.11.4.1 FINANCIAL INFORMATION REPORTING INQUIRY – FROM FACILITATOR TO OLD PLAN A

A continuation of the previous Scenario.

The previous scenario began with the Facilitator receiving the coverage change from Old Plan B to New Plan on June 30, 2008 and starting the Financial Information Reporting Inquiry transmission flow at that time. It is now July 15, 2008 and the Facilitator is checking for updated subsequent information.

The patient is very healthy and has no claim activity for many months. The patient is covered under Old Plan A from January and February, Old Plan B from March through June, and New Plan from July through December. The New Plan is actually the same plan as Old Plan A because the patient has re-enrolled.

Old Plan A has no claim activity so the Financial Information Reporting Inquiry response contains an Accumulator Month Count (656-S7) = 1, Accumulator Month (655-S6) = 1 (January) since this is the start of coverage month, and zeroes in the financial accumulators. Old Plan B has received claims or adjustments.

Facilitator sends Financial Information Reporting Inquiry to Old Plan A for Cardholder ID with CMS Part D Contract ID and Medicare Part D Plan Benefit Package (PBP), Group ID and Person Code.

Transaction Identifier (651-S2) for the Financial Information Reporting Inquiry, Financial Information Reporting Exchange, and Financial Information Reporting Update transmissions is 123456789012345699688.

15.11.4.2 FINANCIAL INFORMATION REPORTING EXCHANGE – FROM FACILITATOR TO OLD PLAN B

Facilitator sends Financial Information Reporting Exchange to Old Plan B for same patient using Old Plan B's Cardholder ID, CMS Part D Contract ID and Medicare Part D Plan Benefit Package (PBP), (no Group ID and Person Code) as identification, and patient financial information. The Financial Information Reporting Exchange shows Old Plan A's financial information. Old Plan B responds with Old Plan A's months, as well as Old Plan B's financial information for June.

Transaction Identifier (651-S2) for the Financial Information Reporting Inquiry, Financial Information Reporting Exchange, and Financial Information Reporting Update transmissions is the same as above.

15.11.4.3 FINANCIAL INFORMATION REPORTING UPDATE – FROM FACILITATOR TO NEW PLAN

Facilitator sends Financial Information Reporting Update to New Plan (which is the same as Old Plan A since the patient has re-enrolled) for Cardholder ID with CMS Part D Contract ID and Medicare Part D Plan Benefit Package (PBP), Group ID and Person Code as identification, and passing the Old Plan A and B's information and patient financial information. CMS Part D Contract ID and Medicare Part D Plan Benefit Package (PBP) will be the same for the Old Plan A and the new plan.

Transaction Identifier (651-S2) for the Financial Information Reporting Inquiry, Financial Information Reporting Exchange, and Financial Information Reporting Update transmissions is the same as above.

16. FREQUENTLY ASKED QUESTIONS

16.1 REJECTING FOR INVALID HEADER FIELDS

Question: How Should A Switch Or Payer Handle Rejecting A Transaction Sent From A Facilitator With An Invalid Version/Release Number (102-A2), Transaction Code (103-A3), Or Transaction Count (109-A9)?

Response: The recommendation is that when the Transaction Count (109-A9) is invalid, the processor system must generate a Transmission Rejected/Transaction Rejected format. The processor system must generate a response with a Transaction Count (109-A9) of 1 and appropriate Reject Codes (511-FB).

It is possible the processor system may not respond to this invalid transaction, or may respond with only a string or text message, not in NCPDP format. This would then appear as a timeout to the submitter system.

If the Version/Release Number (102-A2) is garbage (not a valid value, or values for example of “??” or “**”), the processor cannot build an appropriate response. In this case, a timeout at the submitter system is appropriate.

If the Transaction Code (103-A3) is garbage (not a valid value, or values for example of “??” or “**”), the processor system does not know how to build an appropriately formatted response.

If the Transaction Count (109-A9) is not a valid value (but the Version/Release and Transaction Code are appropriate), it is recommended the Transaction Count contain a value of 1 with the appropriate Financial Information Reporting Response Status Segment containing Reject Codes (511-FB) signifying the invalid Transaction Count field.

16.2 DUPLICATE TRANSACTIONS

Question: How Do I Handle Duplicate Transactions?

Response: Due to the nature of these transactions, if a duplicate transmission occurs, the response must contain the most updated information. See section “[Duplicate Transmission](#)” for criteria.

16.3 REVERSAL TRANSACTIONS

Question: Why are Financial Information Reporting Reversal Transactions not supported?

Response: When this implementation guide was created, business cases for “backing out” or reversing transactions were examined and no case became apparent. It is important to note the Facilitator when sending Financial Information Reporting Transactions will always provide the total accumulated amounts as of that point in time.

16.4 COVERAGE SPANNING MULTIPLE YEARS

Question: Is there a business need to transmit Accumulator Month(s) (655-S6) that span more than one calendar year?

Response: No. Due to the directives from CMS in creating this guide, the financial information amounts are accumulated and reported within a calendar year. For a given requested Accumulator Year (650-S1), the maximum possible Accumulator Month(s) (655-S6) of coverage are 12 (1 “January” through 12 “December”).

Reporting financial information for multiple calendar years in one transmission is not supported (for example reporting December from one year and January through March from the next year). If financial

information is desired for multiple calendar years, two transmissions must be sent, each requesting the specific Accumulator Year (650-S1) (for example 2008 and 2009).

Employer Group Waiver Plans (EGWP) may span more than one calendar, but the information is reported per calendar year.

16.5 THREE PLANS – ELIGIBILITY REJECT FROM THE SECOND PLAN

Question: In the situation where there is an Old Plan A, Old Plan B, and New Plan, if the Old Plan B rejects the Exchange for an eligibility problem (such as patient not known), how does the New Plan receive any updates from Old Plan A?

Response: In this scenario, the Facilitator sends a Financial Information Reporting Inquiry to Old Plan A and receives an approved response. The Facilitator then sends a Financial Information Reporting Exchange to Old Plan B with Old Plan A's accumulators. Old Plan B does not have information on the patient and rejects the transaction with eligibility rejection codes. If the scenario stopped here, the New Plan would not receive the Financial Information Reporting Update with Old Plan A's information.

Therefore, to provide New Plan with Old Plan A's information, the Facilitator will generate a Financial Information Reporting Update to the New Plan with Old Plan A's information. Meanwhile, the Facilitator and CMS will work to resolve the eligibility information problem with Old Plan B according to their procedures.

16.6 THREE PLANS – SYNTAX OR TIMEOUT REJECT FROM THE SECOND PLAN

Question: In the situation where there is an Old Plan A, Old Plan B, and New Plan, if the Old Plan B rejects the Exchange for syntax problem (invalid value in a field, format incorrect, etc.), how does the New Plan receive any updates from Old Plan A?

Response: In this scenario, the Facilitator sends a Financial Information Reporting Inquiry to Old Plan A and receives an approved response. The Facilitator then sends a Financial Information Reporting Exchange to Old Plan B with Old Plan A's accumulators. For some reason, the transmission from the Facilitator has a syntax error or receives a timeout. If the scenario stopped here, the Old Plan B would not receive Old Plan A's accumulators and the New Plan would not receive the Financial Information Reporting Update with Old Plan A and B's information.

The Facilitator and Old Plan B must determine the problem and the solution and make the corrections. The Facilitator will then begin again by sending a Financial Information Reporting Inquiry to Old Plan A. The Facilitator will then generate a Financial Information Reporting Exchange to Old Plan B, and then a Financial Information Reporting Update to the New Plan with Old Plan A and B's information.

17. APPENDIX A. HISTORY OF DOCUMENT CHANGES

17.1 VERSION 1.1

The Financial Information Reporting Suspense and Release transactions were added.

17.2 VERSION 1.2

The following fields were added to the Financial Information Reporting Request Insurance Segment:

A33-ZX	CMS PART D CONTRACT ID	M
A34-ZY	MEDICARE PART D PLAN BENEFIT PACKAGE (PBP)	M

Usage guidance was included in section [“Financial Information Reporting Request Insurance Segment \(Inquiry, Update, Exchange, Suspense, Release\).”](#)

Examples were updated to support these fields.

Corrected Sections 8.1.2 and 8.2.2 Headings - changed “Transaction” Level to “Transmission” Level.

17.3 VERSION 13

All references to the Group Separator have been removed. The Group Separator is no longer being supported as of this version.

Sunset Financial Information Reporting transactions:

F4- Financial Information Reporting Suspense

F5- Financial Information Reporting Release
