

TEST SCRIPT OUTLINE FOR Project #3396

Domain:	Accumulator	
Total Test Cases:	239	
Author:	Naveen Kumar Reddy	
Create Date:	06/02/14	
Updated By:		
Updated On:		

Test Script Name: Project #3396 - RxNova Phase 2 Accumulator

Test Case Number	Test Case Description	Expected Results
Benefits Requirements -		
1	Verify a new commercial accumulator assignment screen is available in benefits copay assignment details tab and functioning as designed per the screen design document.	System should display a new commercial accumulator assignment screen in benefits copay assignment details tab and functioning as designed per the screen design document.
2	Verify the ability to insert new commercial accumulator assignment in benefits copay assignment details tab	A user has the ability to insert new commercial accumulator assignment in benefits copay assignment details tab.
3	Verify the ability to enter the priority section in new commercial accumulator assignment in benefits copay assignment details tab.	A user has the ability to enter the priority section in new commercial accumulator assignment in benefits copay assignment details tab.
4	Verify the ability to select copay field section in new commercial accumulator assignment in benefits copay assignment details tab.	A user has the ability to select copay field section in new commercial accumulator assignment in benefits copay assignment details tab.
5	Verify the ability to select accumulator type filed under claim criteria section in new commercial accumulator assignment in benefits copay assignment details tab.	A user has the ability to select accumulator type under claim criteria in new commercial accumulator assignment in benefits copay assignment details tab.

Test Case Number	Test Case Description	Expected Results
6	Verify the user can select the accumulator type from accumulator type drop down under claim criteria in new commercial accumulator assignment in benefits copay assignment details tab.	System should display the accumulator Types are, DED - Deductable (commercial) MOP - Maximum Out of Pocket MPP - Maximum Paid by Plan LFE - Lifetime SCR - Maximum Number of Scripts
7	Verify the ability to select rule under claim criteria in new commercial accumulator assignment in benefits copay assignment details tab.	A user has the ability to select rule under claim criteria in new commercial accumulator assignment in benefits copay assignment details tab.
8	Verify the ability to enter dollar amount under claim criteria in new commercial accumulator assignment in benefits copay assignment details tab.	A user has the ability to enter dollar amount under claim criteria in new commercial accumulator assignment in benefits copay assignment details tab.
9	Verify the ability to enter condition under claim criteria in new commercial accumulator assignment in benefits copay assignment details tab.	A user has the ability to enter condition under claim criteria in new commercial accumulator assignment in benefits copay assignment details tab.
10	Verify the ability to select the condition status as True/False under claim criteria in new commercial accumulator assignment in benefits copay assignment details tab.	A user has the ability to select the status of True/False under claim criteria in new commercial accumulator assignment in benefits copay assignment details tab.
11	Verify the ability to cancel the data in new commercial accumulator assignment in benefits copay assignment details tab.	A user has the ability to cancel the data in new commercial accumulator assignment in benefits copay assignment details tab.
12	Verify the displayed error message when user click on 'Cancel' for incomplete process.	System should display the error message that <i>"All updates since your last apply will be lost. Are you sure you want to exit?"</i>
13	Verify the ability to move to next page in new commercial accumulator assignment in benefits copay assignment details tab.	A user has the ability to navigate to Part D accum assignments.
14	Verify the ability to edit the data in new commercial accumulator assignment in benefits copay assignment details tab for existing records.	A user has the ability to edit the data in new commercial accumulator assignment in benefits copay assignment details tab. for existing records.

Test Case Number	Test Case Description	Expected Results
15	Verify the ability to delete the data in new commercial accumulator assignment in benefits copay assignment details tab for existing records.	A user has the ability to delete the data in new commercial accumulator assignment in benefits copay assignment details tab for existing records.
16	Verify that system has the ability to provide a commercial accumulator assignment within the copay assignment for rule is 'Under' the claim criteria based on accumulator types. Navigation: Benefits >> New Component >> Copay Assignment	System should display the details related to commercial accumulator assignment within the copay assignment for the rule is 'Under' .
17	Verify that system has the ability to provide a commercial accumulator assignment within the copay assignment for rule is 'Over' the claim criteria based on accumulator types. Navigation: Benefits >> New Component >> Copay Assignment	System should display the details related to commercial accumulator assignment within the copay assignment for the rule is 'Over' .
18	Verify that system has the ability to provide a commercial accumulator assignment within the copay assignment for rule is 'met' the claim criteria based on accumulator types. Navigation: Benefits >> New Component >> Copay Assignment	System should display the details related to commercial accumulator assignment within the copay assignment for the rule is 'Met' .
19	Verify a new Part D accumulator assignment screen is available in benefits copay assignment details tab and functioning as designed per the screen design document.	System should display a new Part D accumulator assignment screen in benefits copay assignment details tab and functional as designed per the screen design document.
20	Verify the ability to insert new Part D accumulator assignment in Part D accumulator assignment screen	A user has the ability to insert new Part D accumulator assignment in benefits home page.
21	Verify the ability to enter the priority section in new Part D accumulator assignment in benefits copay assignment details tab	A user has the ability to enter the priority section in new Part D accumulator assignment in benefits copay assignment details tab
22	Verify the ability to select costshare type field section in new Part D accumulator assignment in benefits copay assignment details tab.	A user has the ability to select costshare type field section in new Part D accumulator assignment in benefits copay assignment details tab.

Test Case Number	Test Case Description	Expected Results
23	Verify that the system has the ability to provide an online facility that requires A user to create Part D accumulator assignment within the copay assignment for costshare type of Part D. Navigation: Benefits >> New Component >> Copay Assignment	System should allow the user to create Part D accumulator assignment with costshare type of Part D.
24	Verify that the system has the ability to provide an online facility that requires A user to create Part D accumulator assignment within the copay assignment for costshare type of MME. Navigation: Benefits >> New Component >> Copay Assignment	System should allow the user to create Part D accumulator assignment with costshare type of MME.
25	Verify that the system has the ability to provide an online facility that requires A user to create Part D accumulator assignment within the copay assignment for costshare type of SWRP. Navigation: Benefits >> New Component >> Copay Assignment	System should allow the user to create Part D accumulator assignment with costshare type of SWRP.
26	Verify that the system has the ability to provide an online facility that requires A user to create Part D accumulator assignment within the copay assignment for costshare type of SPAP. Navigation: Benefits >> New Component >> Copay Assignment	System should allow the user to create Part D accumulator assignment with costshare type of SPAP.
27	Verify the ability to select phase details field section in new Part D accumulator assignment in benefits copay assignment details tab.	A user has the ability to select Phase details field section in new Part D accumulator assignment in benefits copay assignment details tab.
28	Verify the ability to enter condition in new Part D accumulator assignment in benefits copay assignment details tab.	A user has the ability to enter condition in new Part D accumulator assignment in benefits copay assignment details tab.

Test Case Number	Test Case Description	Expected Results
29	Verify the ability to select the condition status of True/False in new Part D accumulator assignment in benefits copay assignment details tab.	A user has the ability to select the status of True/False in new Part D accumulator assignment in benefits copay assignment details tab.
30	Verify the ability to select the copy field in new Part D accumulator assignment in benefits copay assignment details tab.	A user has the ability to select the copy field in new Part D accumulator assignment in benefits copay assignment details tab.
31	Verify the ability to cancel the data in new Part D accumulator assignment in benefits copay assignment details tab.	A user has the ability to cancel the data in new Part D accumulator assignment in benefits copay assignment details tab.
32	Verify the ability to save the data in new Part D accumulator assignment in benefits copay assignment details tab.	A user has the ability to Save the data in new Part D accumulator assignment in benefits copay assignment details tab.
33	Verify the ability to edit the data in new Part D accumulator assignment in benefits copay assignment details tab.	A user has the ability to edit the data in new Part D accumulator assignment in benefits copay assignment details tab.
34	Verify the ability to Apply Changes of SWRP Lesser of Processing in benefits copay assignment details tab.	A user has the ability to Apply Changes of SWRP Lesser of Processing in benefits copay assignment details tab.
35	Verify the ability to select the values for DD1 - Deductible indicator under SWRP Lesser of Processing in benefits copay assignment details tab.	A user has the ability to select the values for DD1 - Deductible indicator under SWRP Lesser of Processing in benefits copay assignment details tab.
36	Verify the ability to select the values for IC - Initial Coverage indicator under SWRP Lesser of Processing in benefits copay assignment details tab.	A user has the ability to select the values for IC - Initial Coverage indicator under SWRP Lesser of Processing in benefits copay assignment details tab.
37	Verify the ability to select the values for CG - Coverage Gap indicator under SWRP Lesser of Processing in benefits copay assignment details tab.	A user has the ability to select the values for CG - Coverage Gap indicator under SWRP Lesser of Processing in benefits copay assignment details tab.
38	Verify the ability to select the values for CAT - Catastrophic indicator under SWRP Lesser of Processing in benefits copay assignment details tab.	A user has the ability to select the values for CAT - Catastrophic indicator under SWRP Lesser of Processing in benefits copay assignment details tab.
39	Verify the ability to select the values for LICS indicator under SWRP Lesser of Processing in benefits copay assignment details tab.	A user has the ability to select the values for LICS indicator under SWRP Lesser of Processing in benefits copay assignment details tab.

Test Case Number	Test Case Description	Expected Results
Reports - New commercial & Part D accumulator assignment Screen		
40	Verify that the system has an ability to provide the updates on Part D accumulator assignment in the reports.	System should display the updates on Part D accumulator assignment in the reports. • Duplicate Report • Copay Assignment Full Detail Report • Component Filtered Detail Report • Impact Assessment • Compare Component Report • Compare Effective Date Ranges Report
41	Verify that the system has an ability to provide the updates on commercial accumulator assignment in the reports.	System should display the updates on Part D accumulator assignment in the reports. • Duplicate Report • Copay Assignment Full Detail Report • Component Filtered Detail Report • Impact Assessment • Compare Component Report • Compare Effective Date Ranges Report
Maintenance History - New commercial & Part D accumulator assignment Screen		
42	Verify the additions & updates of Part D accumulator assignments are captured in Maintenance History. Navigation: Benefits >> New Component >> Copay Assignment >> History	Maintenance History application should display the additions & updates of Part D accumulator assignments.
43	Verify the additions & updates of MME accumulator assignments are captured in Maintenance History. Navigation: Benefits >> New Component >> Copay Assignment >> History	Maintenance History application should display the additions & updates of MME accumulator assignments.

Test Case Number	Test Case Description	Expected Results
44	Verify the additions & updates of SWRP accumulator assignments are captured in Maintenance History. Navigation: Benefits >> New Component >> Copay Assignment >> History	Maintenance History application should display the additions & updates of SWRP accumulator assignments.
45	Verify the additions & updates of SPAP accumulator assignments are captured in Maintenance History. Navigation: Benefits >> New Component >> Copay Assignment >> History	Maintenance History application should display the additions & updates of SPAP accumulator assignments.
46	Verify the additions & updates of commercial accumulator assignments are captured in Maintenance History. Navigation: Benefits >> New Component >> Copay Assignment >> Accumulator Home >> History	Maintenance History application should display the additions & updates of commercial accumulator assignments.
47	Verify the additions & updates made to the criteria 'Under' for commercial accumulator assignments are captured in Maintenance History. Navigation: Benefits >> New Component >> Copay Assignment >> Accumulator Home >> History	Maintenance History application should display the additions & updates of commercial accumulator assignments for the rule 'Under'.
48	Verify the additions & updates made to the criteria 'Over' for commercial accumulator assignments are captured in Maintenance History. Navigation: Benefits >> New Component >> Copay Assignment >> Accumulator Home >> History	Maintenance History application should display the additions & updates of commercial accumulator assignments for the rule 'Over'.
49	Verify the additions & updates made to the criteria 'Met' for commercial accumulator assignments are captured in Maintenance History. Navigation: Benefits >> New Component >> Copay Assignment >> accumulator Home >> History	Maintenance History application should display the additions & updates of commercial accumulator assignments for the rule 'Met'.

Test Case Number	Test Case Description	Expected Results
50	Verify the additions & updates on Dollar Amount for multiple accumulator types in accumulator application. Navigation: Benefits >> New Component >> Copay Assignment >> accumulator Home >> History.	Maintenance History application should display the additions & updates of commercial accumulator assignments for multiple accumulator types in accumulator application.
51	Verify the additions & updates of commercial accumulator assignments by indicate whether to use the greater of or lesser of an SWRP costshare for costshare Type 'Part D'. Navigation: Benefits >> New Component >> Copay Assignment >> Accumulator Home >> Details >> History	Maintenance History application should display the additions & updates of commercial accumulator assignments for the greater of or lesser of an SWRP costshare for costshare Type 'Part D'.
52	Verify the additions & updates of commercial accumulator assignments by indicate whether to use the greater of or lesser of an SWRP costshare for costshare Type 'MME'. Navigation: Benefits >> New Component >> Copay Assignment >> Accumulator Home >> Details >> History	Maintenance History application should display the additions & updates of commercial accumulator assignments for the greater of or lesser of an SWRP costshare for costshare Type 'MME'.
53	Verify the additions & updates of commercial accumulator assignments by indicate whether to use the greater of or lesser of an SWRP costshare for costshare Type 'SPAP'. Navigation: Benefits >> New Component >> Copay Assignment >> Accumulator Home >> Details >> History	Maintenance History application should display the additions & updates of commercial accumulator assignments for the greater of or lesser of an SWRP costshare for costshare Type 'SPAP'.
Mass changes - New commercial & Part D accumulator assignment Screen		
54	Verify that the system allow user to make mass changes of Part D accumulator assignment. Navigation: Benefits >> New Component >> Copay Assignment >> Mass Change	System should allow the user to make mass changes of Part D accumulator assignment.
55	Verify that the system allow user to make mass changes of commercial accumulator assignment. Navigation: Benefits >> New Component >> Copay Assignment >> Mass Change	System should allow the user to make mass changes on commercial accumulator assignment.

Test Case Number	Test Case Description	Expected Results
56	Verify whether system allow user to import copay assignment with Part D accumulator assignments. Navigation: Benefits >> New Component >> Copay Assignment >> Mass Change	System should allow the user to import copay assignment with Part D accumulator assignments.
57	Verify whether system allow user to import copay assignment with commercial accumulator assignments. Navigation: Benefits >> New Component >> Copay Assignment >> Mass Change	System should allow the user to import copay assignment with commercial accumulator assignments.
Coverage Code Requirements		
58	Verify that system provides the Part D costshare Types with SWRP, SPAP, and MME drop down fields. Navigation: Plan Setup >> Coverage Code Home >> Details	System should display the Part D costshare types with SWRP, SPAP, and MME drop down fields.
59	Verify that the system has the ability to provide a user to select the status as Yes or No under 'SWRP' drop down fields. Navigation: Plan Setup >> Coverage Code Home >> Details >> Copay	System should allow the user to specify a coverage code as SWRP. System allows the user to select the status either Yes or No from SWRP dropdown.
60	Verify that the system has the ability to provide a user to select the status as Yes or No under 'SPAP' drop down fields. Navigation: Plan Setup >> Coverage Code Home >> Details >> Copay	System should allow the user to specify a coverage code as SPAP. System allows the user to select the status either Yes or No from SPAP dropdown.
61	Verify that the system has the ability to provide a user to select the status as Yes or No under 'MME' drop down fields. Navigation: Plan Setup >> Coverage Code Home >> Details >> Copay	System should allow the user to specify a coverage code as MME. System allows the user to select the status either Yes or No from MME dropdown.

Test Case Number	Test Case Description	Expected Results
62	Verify when the accumulator is added to the coverage code and processing option exists for the this coverage code with the effective date range are 01/01/2014 – No end date with Group Level in Assign Options under Processing Options and the accumulator ID will be in Coverage Code Level. Navigation: Customer Setup >> Processing Options Home >> Assign	System should display the message “Accumulators are at the Coverage Code level effective 01/01/2014” in RxNova accumulators page. System should function normally as both inquiry and edit modes in RxNova accumulators page.
63	Verify when the accumulator ID is setup, the user sees the correct message with the effective date ranges are: 01/01/2014 – 06/30/2014 - in Coverage level 07/01/2014 – 12/31/2014 - in Member Level 01/01/2015 – No end date - in Group Level in Assign Options under Processing Options and the accumulator ID will be in Coverage Code Level. Navigation: Customer Setup >> Processing Options Home >> Assign	System should display the message “Accumulators are at the Coverage Code level effective 01/01/2015” in RxNova accumulators page. System should function normally as both inquiry and edit modes in RxNova accumulators page.
64	Verify when the accumulator ID is setup, the user sees the correct message with the effective date ranges are: 01/01/2013 – 12/31/2013 - in Group level 01/01/2015 – 12/31/2015 - in Member Level 01/01/2016 – 12/31/2030 - in Group Level in Assign Options under Processing Options and the accumulator ID will be in Coverage Code Level. Navigation: Customer Setup >> Processing Options Home >> Assign	System should display the message “Accumulators are at the Coverage Code level effective 01/01/2016” in RxNova accumulators page. System should function normally as both inquiry and edit modes in RxNova accumulators page.
65	Verify that system has the ability to add an accumulator ID with the effective date range are 01/01/2018 – No end date with Group Level in Assign Options under Processing Options and the accumulator ID will be in Coverage Code Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should display the message “Accumulators are not established for this level, they are currently at Group Code level” in RxNova Member screen on the accumulator panel. System should function normally as both inquiry and edit modes in RxNova accumulators page.

Test Case Number	Test Case Description	Expected Results
66	Verify that system has the ability to add an accumulator ID with the effective date range are 01/01/2014 – 12/31/2020 with Member level in Assign Options under Processing Options and the accumulator ID will be in Coverage Code Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should display the message “Accumulators are not established for this level, they are currently at Member level” in RxNova accumulators page. System should function normally as both inquiry and edit modes in RxNova accumulators page.
67	Verify that system has the ability to add an accumulator ID when there is no accumulator level processing option in Coverage Code Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should not display any message.
68	Verify that system has the ability to add an accumulator ID with the effective date range are 01/01/2014 – 12/31/2014 with Group Level in Assign Options under Processing Options and the accumulator ID will be in Coverage Code Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should display the message “Accumulators are at the Group level effective 01/01/2014” in RxNova accumulators page. System should function normally as both inquiry and edit modes in RxNova accumulators page.
69	Verify that system has the ability to add an accumulator ID with the effective date ranges are 01/01/2014 – 12/31/2020 - in Coverage level 01/01/2021 – No end date - in Group Level in Assign Options under Processing Options and the accumulator ID will be in Coverage Code Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should display the message “Accumulators are at the Coverage Code level effective 01/01/2014” in RxNova accumulators page. System should function normally as both inquiry and edit modes in RxNova accumulators page.

Test Case Number	Test Case Description	Expected Results
70	Verify that system has the ability to add an accumulator ID with the effective date ranges are 01/01/2015 – 12/31/2020 - in Coverage level 06/01/2020 – No end date - in Group Level in Assign Options under Processing Options and the accumulator ID will be in Coverage Code Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should display the message “Accumulators are at the Member level effective 01/01/2015” in RxNova accumulators page. System should function normally as both inquiry and edit modes in RxNova accumulators page.
71	Verify Coverage Code Summary tab shows accumulator section that states to reference the accumulator tab due to potential date differences.	Coverage Code Summary tab should show accumulator Section that states to reference the accumulator tab due to potential date differences.
Reports		
72	Verify that the additions & updates are reflected that SWRP, SPAP, and MME fields in the reports. Navigation: Plan Setup >> Coverage Code >> Reports	System should display additions & updates are reflected that SWRP, SPAP, and MME fields in the reports. • Duplicate Report • Coverage Code Report • Compare Coverage Codes Report • Compare Effective Date Ranges Report
Maintenance History		
73	Verify that the system will capture maintenance history on all additions and updates to SWRP, SPAP, and MME fields. Navigation: Plan Setup >> Coverage Code >> History	Maintenance History application should display Coverage Code component details of SWRP fields with SWRP, SPAP, and/or MME fields.
74	Verify the maintenance history reports.	The system should display additions, updates and delete in the maintenance history reports.
Mass changes		
75	Verify that the system has the ability to provide a user to import a coverage code component with SWRP, SPAP, and/or MME field. Navigation: Plan Setup >> Coverage Code >> History	Maintenance History application should display the import a coverage code component details of SWRP fields with SWRP, SPAP, and/or MME field are captured in Maintenance History.

Test Case Number	Test Case Description	Expected Results
76	Verify that the system allow user to make mass changes to the SWRP, SPAP, and MME field.	System should allow the user to make necessary mass changes
Group and Member Requirements		
77	Verify that the system allow user to add an accumulator ID to a group when effective date is prior to the accumulator processing option effective date. Navigation: Customer Setup >> Hierarchy >> Group	System should add an accumulator ID to a group when effective date is prior to the accumulator processing option effective date.
78	Verify that the system allow user to add an accumulator ID to a member when effective date is prior to the accumulator processing option effective date. Navigation: Customer Setup >> Hierarchy >> Member	System should add an accumulator ID to a member when effective date is prior to the accumulator processing option effective date.
79	Verify whether system allows user to modify member accumulation tab to displays family limit details. Navigation: Customer Setup >> Hierarchy >> Member	System should modify member accumulation tab to displays family limit details.
80	Verify whether system allows user to modify member accumulation tab to displays claim processed date & amount details. Navigation: Customer Setup >> Hierarchy >> Member	System should modify member accumulation tab to displays claim processed date & amount details.
81	Verify whether system allows user to adding accumulation renewal applied to the accumulator. Navigation: Customer Setup >> Hierarchy >> Member	System should add accumulation renewal applied to the accumulator.
Group Level		

Test Case Number	Test Case Description	Expected Results
82	Verify that the system has the ability to load the accumulator information and associate that information to group file. Navigation: Customer Setup >> Hierarchy >> Group	System should load the accumulator information and associate that information to group file.
83	Verify that system has the ability to add an accumulator ID with the effective date range are 01/01/2014 – No end date with Group Level in Assign Options under Processing Options and the accumulator ID will be in Group Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should display the message “Accumulators are at the Group level effective 01/01/2014” in RxNova accumulators page. System should function normally as both inquiry and edit modes in RxNova accumulators page.
84	Verify that system has the ability to add an accumulator ID with the effective date ranges are 01/01/2014 – 06/30/2014 - in Coverage level 07/01/2014 – 12/31/2014 - in Member Level 01/01/2015 – No end date - in Group Level in Assign Options under Processing Options and the accumulator ID will be in Group Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should display the message “Accumulators are at the Group level effective 01/01/2015” in RxNova accumulators page. System should function normally as both inquiry and edit modes in RxNova accumulators page.
85	Verify that system has the ability to add an accumulator ID with the effective date ranges are 01/01/2013 – 12/31/2013 - in Group level 01/01/2015 – 12/31/2015 - in Member Level 01/01/2016 – 12/31/2030 - in Group Level in Assign Options under Processing Options and the accumulator ID will be in Group Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should display the message “Accumulators are at the Group level effective 01/01/2016” in RxNova accumulators page. System should function normally as both inquiry and edit modes in RxNova accumulators page.

Test Case Number	Test Case Description	Expected Results
86	Verify that system has the ability to add an accumulator ID with the effective date range are 01/01/2018 – No end date with Coverage level in Assign Options under Processing Options and the accumulator ID will be in Group Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should display the message “Accumulators are not established for this level, they are currently at Coverage Code level” in RxNova accumulators page. System should function normally as both inquiry and edit modes in RxNova accumulators page.
87	Verify that system has the ability to add an accumulator ID with the effective date range are 01/01/2014 – 12/31/2020 with Member level in Assign Options under Processing Options and the accumulator ID will be in Group Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should display the message “Accumulators are not established for this level, they are currently at Member level” in RxNova accumulators page. System should function normally as both inquiry and edit modes in RxNova accumulators page.
88	Verify that system has the ability to add an accumulator ID when there is no accumulator level processing option in Group Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should not display any message.
89	Verify that system has the ability to add an accumulator ID with the effective date range are 01/01/2014 – 12/31/2014 with Group level in Assign Options under Processing Options and the accumulator ID will be in Group Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should display the message “Accumulators are at the Group level effective 01/01/2014” in RxNova accumulators page. System should function normally as both inquiry and edit modes in RxNova accumulators page.

Test Case Number	Test Case Description	Expected Results
90	Verify that system has the ability to add an accumulator ID with the effective date ranges are 01/01/2014 – 12/31/2020 - in Coverage level 01/01/2021 – No end date - in Group Level in Assign Options under Processing Options and the accumulator ID will be in Group Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should display the message “Accumulators are at the Coverage Code level effective 01/01/2014” in RxNova accumulators page. System should function normally as both inquiry and edit modes in RxNova accumulators page.
91	Verify that system has the ability to add an accumulator ID with the effective date ranges are 01/01/2015 – 12/31/2020 - in Coverage level 06/01/2020 – No end date - in Group Level in Assign Options under Processing Options and the accumulator ID will be in Group Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should display the message “Accumulators are at the Member level effective 01/01/2015” in RxNova accumulators page. System should function normally as both inquiry and edit modes in RxNova accumulators page.
92	Verify that system has the ability to add an accumulator ID when there is no accumulator level processing option in Group Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should not display any message.
93	Verify that system has the ability to add a deduct ID with there is no accumulator level processing option and Member Level Deduct Option status is set to 'N' in Group Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should display Legacy/Enhanced accumulator section panel and it display group level deductible data and editing will be allowed as normal.
94	Verify that system has the ability to add a deduct ID with there is no accumulator level processing option and Member Level Deduct Option status is not set to 'N' in Group Level.	System should not display not be able to display Legacy/Enhanced deductible. The Legacy/Enhanced deductible section should be disable in application.

Test Case Number	Test Case Description	Expected Results
95	Verify that system has the ability to add a deduct ID when if the Processing Option effective dates are current dates for group or member or coverage code & Member Level Deduct Option status is set to 'N' in Group Level.	System should display Legacy/Enhanced accumulator section panel and cannot be editable.
96	Verify that system has the ability to add a deduct ID when if the Processing Option effective dates are current dates for group or member or coverage code & Member Level Deduct Option status is Not set to 'N' in Group Level.	System should not display not be able to display Legacy/Enhanced deductible. The Legacy/Enhanced deductible section should be disable in application.
97	Verify that system has the ability to add a deduct ID when if the Processing Option effective dates are 06/01/2016 – No end date in Group Level & Member Level Deduct Option status is set to 'N' in Group Level.	System should display Legacy/Enhanced accumulator Section Panel with group level deductible data and editing will be allowed as normal
98	Verify that system has the ability to add a deduct ID when if the Processing Option effective dates are 06/01/2016 – No end date in Group Level & Member Level Deduct Option status is not set to 'N' in Group Level	System should not display not be able to display Legacy/Enhanced deductible. The Legacy/Enhanced deductible section should be disable in application.
Member Level		
99	Verify that the system has the ability to load the accumulator information and associate that information to member file. Navigation: Customer Setup >> Hierarchy >> Member	System should load the accumulator information and associate that information to member file.
100	Verify that system has the ability to add an accumulator ID with the effective date range are 01/01/2014 – No end date with Member level in Assign Options under Processing Options and the accumulator ID will be in Member Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should display the message “Accumulators are at the Member level effective 01/01/2014” in RxNova accumulators page. System should function normally as both inquiry and edit modes in RxNova accumulators page.

Test Case Number	Test Case Description	Expected Results
101	Verify that system has the ability to add an accumulator ID with the effective date ranges are 01/01/2014 – 06/30/2014 - in Coverage level 07/01/2014 – 12/31/2014 - in Group Level 01/01/2015 – No end date - in Member Level in Assign Options under Processing Options and the accumulator ID will be in Member Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should display the message “Accumulators are at the Member level effective 01/01/2015” in RxNova accumulators page. System should function normally as both inquiry and edit modes in RxNova accumulators page.
102	Verify that system has the ability to add an accumulator ID with the effective date ranges are 01/01/2001 – 12/31/2012 - in Member Level 01/01/2015 – 12/31/2015 - in Coverage Level 01/01/2016 – 12/31/2030 - in Member Level in Assign Options under Processing Options and the accumulator ID will be in Member Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should display the message “Accumulators are at the Member level effective 01/01/2016” in RxNova accumulators page. System should function normally as both inquiry and edit modes in RxNova accumulators page.
103	Verify that system has the ability to add an accumulator ID with the effective date range are 01/01/2018 – No end date with Coverage level in Assign Options under Processing Options and the accumulator ID will be in Member Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should display the message “Accumulators are not established for this level, they are currently at Coverage Code level” in RxNova accumulators page. System should function normally as both inquiry and edit modes in RxNova accumulators page.
104	Verify that system has the ability to add an accumulator ID with the effective date range are 01/01/2014 – 12/31/2020 with Member level in Assign Options under Processing Options and the accumulator ID will be in Member Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should display the message “Accumulators are not established for this level, they are currently at Group level” in RxNova accumulators page. System should function normally as both inquiry and edit modes in RxNova accumulators page.

Test Case Number	Test Case Description	Expected Results
105	Verify that system has the ability to add an accumulator ID when there is no accumulator level processing option in Member Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should not display any message.
106	Verify that system has the ability to add an accumulator ID with the effective date range are 01/01/2014 – 12/31/2014 with Member level in Assign Options under Processing Options and the accumulator ID will be in Member Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should display the message “Accumulators are at the Member level effective 01/01/2014” in RxNova accumulators page. System should function normally as both inquiry and edit modes in RxNova accumulators page.
107	Verify that system has the ability to add an accumulator ID with the effective date ranges are 01/01/2014 – 12/31/2020 - in Coverage level 01/01/2021 – No end date - in Member Level in Assign Options under Processing Options and the accumulator ID will be in Member Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should display the message “Accumulators are at the Coverage Code level effective 01/01/2014” in RxNova accumulators page. System should function normally as both inquiry and edit modes in RxNova accumulators page.
108	Verify that system has the ability to add an accumulator ID with the effective date ranges are 01/01/2015 – 12/31/2020 - in Group level 06/01/2020 – No end date - in Member Level in Assign Options under Processing Options and the accumulator ID will be in Member Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should display the message “Accumulators are at the Group level effective 01/01/2015” in RxNova accumulators page. System should function normally as both inquiry and edit modes in RxNova accumulators page.

Test Case Number	Test Case Description	Expected Results
109	Verify that system has the ability to add an accumulator ID when there is no accumulator level processing option in Member Level. Navigation: Customer Setup >> Processing Options Home >> Assign Options	System should not display any message.
110	Verify that system has the ability to add an accumulator ID with there is no accumulator level processing option and Member Level Deduct Option status is set to 'A' in Member Level.	System should display Legacy/Enhanced accumulator Section Panel and it display Member level deductible data and editing will be allowed as normal.
111	Verify that system has the ability to add an accumulator ID with there is no accumulator level processing option and Member Level Deduct Option status is not set to 'A' in Member Level.	System should not display not be able to display Legacy/Enhanced deductible. The Legacy/Enhanced deductible section should be disabled in application.
112	Verify that system has the ability to add an accumulator ID when if the Processing Option effective dates are current dates for group or member or coverage code & Member Level Deduct Option status is set to 'A' in Member Level.	System should display Legacy/Enhanced accumulator section panel and cannot be editable.
113	Verify that system has the ability to add an accumulator ID when if the Processing Option effective dates are current dates for group or member or coverage code & Member Level Deduct Option status is Not set to 'A' in Member Level.	System should not display not be able to display Legacy/Enhanced deductible. The Legacy/Enhanced deductible section should be disabled in application.
114	Verify that system has the ability to add an accumulator ID when if the Processing Option effective dates are 06/01/2016 – No end date in Group Level & Member Level Deduct Option status is set to 'A' in Member Level.	System should display Legacy/Enhanced accumulator section panel with group level deductible data and editing will be allowed as normal

Test Case Number	Test Case Description	Expected Results
115	Verify that system has the ability to add an accumulator ID when if the Processing Option effective dates are 06/01/2016 – No end date in Group Level & Member Level Deduct Option status is Not set to 'A' in Member Level.	System should not display not be able to display Legacy/Enhanced deductible. The Legacy/Enhanced deductible section should be disabled in application.
Mass Changes		
116	Verify that system has the ability to load the group files related to accumulator information when Effective End Date is blank. Navigation: Customer Setup >> Hierarchy >> Group >> Mass Change	System should load the group files related to accumulator information by specified benefit period end date.
117	System should load the group files related to accumulator information for a new benefit Period specification with a gap between BP date range and accumulator effective date. Navigation: Customer Setup >> Hierarchy >> Group >> Mass Change	System should load the group files by specify the accumulator effective dates changes.
118	System should load the group files related to accumulator information If benefit period dates match and effective dates match but accumulator ID is different. Navigation: Customer Setup >> Hierarchy >> Group >> Mass Change	System should load the group files with swap out IDs.
119	System should load the group files related to accumulator information for when benefit period date range and accumulator Ranges are matched with future dates. Navigation: Customer Setup >> Hierarchy >> Group >> Mass Change	System should load the group files with no changes.
120	System should load the group files related to accumulator information for when benefit period date range and accumulator ranges are matched with current dates. Navigation: Customer Setup >> Hierarchy >> Group >> Mass Change	System should load the group files with no changes.

Test Case Number	Test Case Description	Expected Results
121	System should load the group files related to accumulator information for when benefit period dates, accumulator IDs and effective dates are matched. Navigation: Customer Setup >> Hierarchy >> Group >> Mass Change	System should load the group files with no changes.
122	System should load the group files related to accumulator information for when benefit period dates match an existing benefit period. Navigation: Customer Setup >> Hierarchy >> Group >> Mass Change	System should load the group files with accumulator information to change.
123	System should load the group files related to accumulator information for when updating a benefit period effective prior to the processing date. Navigation: Customer Setup >> Hierarchy >> Group >> Mass Change	System should load the group files by adjust those dates of these previous entries.
124	System should load the group files related to accumulator information for when updating a benefit period effective within the processing date or dealing with a future dated benefit period. Navigation: Customer Setup >> Hierarchy >> Group >> Mass Change	System should load the group files by delete those entries and replace with new.
125	System should load the group files related to accumulator information for when all validation related to the processing option related to accumulator are 'Passed'. Navigation: Customer Setup >> Hierarchy >> Group >> Mass Change	System should load the group files with no changes.

Test Case Number	Test Case Description	Expected Results
126	System should load the group files related to accumulator information for new benefit period date range is different with accumulator range. Ex: BP - 01-01-14 to 06-30-14 , accumulator - 01-01-14 to 06-30-14 Navigation: Customer Setup >> Hierarchy >> Group >> Mass Change	System should delete existing accumulator entry.
127	System should load the group files related to accumulator information for new benefit period date range is different with accumulator range. Ex: BP - 01-01-14 to 06-30-14 , accumulator - 01-01-14 to 06-30-14 Navigation: Customer Setup >> Hierarchy >> Group >> Mass Change	System should load the group files with no changes.
Straddle Rules		
128	Verify the new SWRP costshare basis under the Straddle tab in accumulator home page as designed per the screen design document. Navigation: Plan Setup >> Accumulator Home >> New Accumulator >> Straddle	System should display the new SWRP costshare basis under the Straddle tab in accumulator home page as designed per the screen design document.
129	Verify the ability to select the value from DED (Part D) costshare basis dropdown list under SWRP costshare basis in accumulator Straddle tab. Navigation: Plan Setup >> Accumulator Home >> New Accumulator >> Straddle	A user has the ability to select the value from DED (Part D) costshare basis dropdown list under SWRP costshare basis in accumulator Straddle tab.

Test Case Number	Test Case Description	Expected Results
130	Verify the ability to select the value from IC costshare basis dropdown list under SWRP costshare Basis in accumulator Straddle tab. Navigation: Plan Setup >> accumulator Home >> New Accumulator >> Straddle	A user has the ability to select the value from IC costshare basis dropdown list under SWRP costshare basis in accumulator Straddle tab.
131	Verify the ability to select the value from CG costshare basis dropdown list under SWRP costshare basis in accumulator Straddle tab. Navigation: Plan Setup >> Accumulator Home >> New Accumulator >> Straddle	A user has the ability to select the value from CG costshare basis dropdown list under SWRP costshare basis in accumulator Straddle tab.
132	Verify the Part D field under Straddle tab in accumulator straddle page as designed per the screen design document. Navigation: Plan Setup >> Accumulator Home >> New Accumulator >> Straddle	System should display the Part D field under Straddle tab in accumulator straddle page as designed per the screen design document. Straddle Types dropdown should display: Part D, SWRP, SPAP
133	Verify that the system should display the value of Straddle type drop down in accumulator home page as designed per the screen design document. Navigation: Plan Setup >> Accumulator Home >> New Accumulator >> Straddle	System should display the values in Straddle type drop down & allows the user to select values. Straddle Types dropdown should display: Part D , SWRP, SPAP
134	Verify that the system should display the value From accumulator drop down in accumulator Home page as designed per the screen design document. Navigation: Plan Setup >> Accumulator Home >> New Accumulator >> Straddle	System should display the values From accumulator drop down & allows the user to select values.

Test Case Number	Test Case Description	Expected Results
135	Verify that the system should display the value To accumulator drop down in accumulator home page as designed per the screen design document. Navigation: Plan Setup >> Accumulator Home >> New Accumulator >> Straddle	System should display the values to accumulator drop down & allows the user to select values.
136	Verify that the system should display the value From Customer drop down in accumulator home page as designed per the screen design document. Navigation: Plan Setup >> Accumulator Home >> New Accumulator >> Straddle	System should display the values from customer drop down & allows the user to select values.
137	Verify that the system should display the value To Customer drop down in accumulator home page as designed per the screen design document. Navigation: Plan Setup >> Accumulator Home >> New Accumulator >> Straddle	System should display the values to customer drop down & allows the user to select values.
138	Verify that system has the ability to select the Rule for straddle in accumulator home page as designed per the screen design document. Navigation: Plan Setup >> Accumulator Home >> New Accumulator >> Straddle	System should display the selected rule for straddle in accumulator home page. The Rule should be Under, Over & Met based on selection.
139	Verify the ability to enter condition for straddle in accumulator home page. Navigation: Plan Setup >> Accumulator Home >> New Accumulator >> Straddle	A user has the ability to enter condition for straddle in accumulator home page.

Test Case Number	Test Case Description	Expected Results
140	Verify that system allow user to modify the accumulator component by establish & update the straddle rules to utilize when processing Part D, SWRP, and SPAP claims. Navigation: Plan Setup >> Accumulator Home >> Straddle	System should update accumulator component straddle rules to utilize when processing Part D, SWRP, and SPAP claims.
Reports		
141	Verify that the additions & updates are reflected on Part D straddle page. Navigation: Plan Setup >> Coverage Code >> Reports	System should display additions & updates are reflected that on Part D straddle field in the reports. • Full Detail Report • Filtered Detail Report • Compare accumulator Report
Maintenance History		
142	Verify that the system allow user to make mass changes of Part D straddle page. Navigation: Benefits >> New Component >> Copay Assignment >> Maintenance History	System should allow the user to make mass changes of Part D straddle page.
HIM		
143	Verify that system has the ability to provide CSR Indicator under accumulator Criteria tab in Details page. Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should display CSR Indicator under accumulator Criteria tab on details page.
144	Verify whether system allow user to search the accumulator details by CSR Indicator. Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should display the search results as per search criteria.

Test Case Number	Test Case Description	Expected Results
145	Verify whether system allow user to establish a new accumulator. Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should allow the user to add or establish a new accumulator.
146	Verify whether system allow user to update the accumulator under details page. Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should allow the user to update a new accumulator.
Reports		
147	Verify that the system has an ability to provide the updates of CSR indicator in the reports. Navigation: Plan Setup >> Accumulator Home >> Reports	System should display the updates of CSR indicator in the Reports. • Accumulator Full Detail Report • Filtered Detail Report • Compare Report
148	Verify that the system has an ability to provide the reports to include the CSR standard amount. Navigation: Plan Setup >> Accumulator Home >> Reports	System should display the reports to include the CSR standard amount. • Manual Preload Update and Error Preliminary Report • Manual Preload Update and Errol Final Report
Maintenance History		
149	Verify that system has ability to provide the updates on CSR indicator in Maintenance History. Navigation: Plan Setup >> Accumulator Home >> Details >> History	Maintenance History application should display the updates on CSR indicator.
Mass Changes		

Test Case Number	Test Case Description	Expected Results
150	Verify that system allows user to modify Mass Change on CSR indicator. Navigation: Plan Setup >> Accumulator Home >> Mass Change	System should display the change on CSR indicator in Mass Change.
151	Verify that system has ability to provide the updates include the CSR accumulators and associated values on CSR indicator in Maintenance History. Navigation: Plan Setup >> Accumulator Home >> Details >> History	Maintenance History application should display the updates include the CSR accumulators and associated values on CSR indicator in Maintenance History.
152	Verify that system has ability to provide the updates include the CSR accumulators and associated values on CSR indicator in Member accumulator Amounts tab. Navigation: Customer Setup >> Hierarchy >> Member >> Accumulator Amounts	System should display the CSR accumulators and associated values on CSR indicator in member accumulator amounts tab.
153	Verify that system has ability to provide the total standard accumulation amount and the actual accumulation for a CSR member in Member accumulator Amounts tab. Navigation: Customer Setup >> Hierarchy >> Member >> Accumulator Amounts	System should display the CSR accumulators and associated values on CSR indicator in member accumulator amounts tab.
154	Verify that system has ability to provide the Transfer to allow dollars in between accumulators with a CSR indicator and those additional accumulators. Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should display the Transfer to allow dollars in between accumulators with a CSR indicator and those additional accumulators.
155	Verify that system allows user to enter an actual amount of a standard amount the member would have paid without the costshare reduction for manual preload process.	System should display the amount of member would have paid without the costshare.

Test Case Number	Test Case Description	Expected Results
156	Verify that system allows user to modify the manual clear and build process to rebuild the standard amount when the selected accumulator has a CSR indicator.	System should display the modified & rebuild the standard amount when the selected accumulator has a CSR indicator.
Modify DED if MOP Met		
157	Verify that system to modify the accumulator type to force the 'DED met if MOP met' option to be consistent across all DED accumulator types. Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should select the values in 'DED met if MOP met:' drop down for the accumulator types DED - Deductible (Part D) & DED - Deductible (commercial).
158	Verify that system process to modify claims processing to include 'DED met if MOP met' functionality. Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should display 'DED met if MOP met' functionality for modify claims process.
159	Verify that the system allow user to select only 'Allowed Claim Amount' from Cost applied dropdown for all Part D types. Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should select only 'Allowed Claim Amount' from Cost Applied dropdown for all Part D types.
160	Verify that the system allow user to select 'Allowed Claim Amount', 'Submitted Allowed Claim Amount', 'Usual and Customary' from Cost applied dropdown for DED (commercial) and MOP accumulator types. Navigation: Plan Setup >> accumulator Home >> New accumulator	System should select 'Allowed Claim Amount', 'Submitted Allowed Claim Amount', 'Usual and Customary' from Cost Applied dropdown for DED (commercial) and MOP accumulator types.
161	Verify that the system allow user to select 'Allowed Claim Amount', 'Submitted Allowed Claim Amount', 'Usual and Customary' or 'Deductible Amount' from Cost applied dropdown for MPP - Maximum Paid by Plan, LFE - Lifetime accumulator types. Navigation: Plan Setup >> accumulator Home >> New accumulator	System should select 'Allowed Claim Amount', 'Submitted Allowed Claim Amount', 'Usual and Customary' or 'Deductible Amount' from Cost applied dropdown for MPP - Maximum Paid by Plan, LFE - Lifetime accumulator types.

Test Case Number	Test Case Description	Expected Results
162	Verify that the system do not allow user to select a cost applied option for SCR accumulator types. Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should not select a cost applied option for SCR accumulator types.
163	Verify that the system modify claims processing to include the cost applied types of 'Submitted Allowed Claim Amount', 'Deductible Amount' and 'Usual and Customary'. Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should display the modify claims processing to include the cost applied types of 'Submitted Allowed Claim Amount', 'Deductible Amount' and 'Usual and Customary'.
SWRP Limits		
164	Verify that the system allows user to modify accumulator type to allow a SWRP limit to be defined. Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should modify accumulator type to allow a SWRP limit to be defined.
165	Verify that system allows user to modify the manual preload process to allow amount to be preloaded to the SWRP accumulation. Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should display modified the manual preload process to allow amount to be preloaded to the SWRP accumulation.
166	Verify that the system modify claim inquiry to display the SWRP limit and accumulated amounts. Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should display modified claim inquiry to display the SWRP limit and accumulated amounts.
Reports		

Test Case Number	Test Case Description	Expected Results
167	Verify that system modifies the PDE to report the SWRP accumulated amounts. Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should display modified PDE to report the SWRP accumulated amounts. System should display the changes in below reports, • Compare Accumulator Report • Accumulator Filtered Detail Report • Accumulator Full Detail Report
Maintenance History		
168	Verify that the system allow user to make mass changes of Part D straddle page. Navigation: Benefits >> New Component >> Copay Assignment >> Mass Change	System should allow the user to make mass changes of Part D straddle page.
In/Out Processing		
169	Verify that system provide Apply IN/Out processing for new accumulator page. Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should display the drop down fields for In/Out Network are: In Network Out of Network None
170	Verify that system provide Apply IN/Out processing functionality when the corresponding accumulator type is established. Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should select the values of In/Out Network when the corresponding accumulator type is established.
Accumulator		
171	Verify whether the system displays the correct amount in the reported GAP discount for a claim.	System should have the ability to provide the correct amount in the reported GAP discount for a claim.
172	Verify the system displays the accumulator ID on the zero file.	System should have the ability to provide the zero file with accumulator ID.

Test Case Number	Test Case Description	Expected Results
173	Verify that system will have the ability to provide a Member Summary Accumulator Amounts Report contains current accumulator statuses for members with accumulator IDs.	System should display Member Summary Accumulator Amounts Report contains current accumulator statuses for members with accumulator ID.
174	Verify that system will have the ability to provide a Member Accumulator Claim Detail Report contains claim history information for members with accumulator IDs.	System should display Member Summary Accumulator Claim Detail Report contains claim history information for members with accumulator ID.
175	Verify that system provide an accumulator Filtered Detail Report contains all accumulator IDs that have a particular field and their association information.	System should display Member Summary Accumulator Filtered Detail Report contains all accumulator IDs that have a particular field and their association information.
176	Verify that system provide an Accumulator Compare Report contains accumulator comparison results of types & straddle rules.	System should display an Accumulator Compare Report contains accumulator comparison results of types & straddle rules.
177	Verify that system provide a modified new accumulator fields on the Full Detail Report.	System should display the Full Detail Report contains a modified new accumulator field.
178	Verify that system provide a benefit period start and end date on the Full Detail Report.	System should display the Full Detail Report contains a benefit period start and end date.
179	Verify that system allows user to modify accumulator type to remove the 'Apply Plan Dollars' selection for commercial accumulator. Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should remove the 'Apply Plan Dollars' selection by modify accumulator type.
180	Verify whether system allows user to modify the 'Plan Dollar' is added to available dollars section for commercial accumulator. Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should add 'Apply Plan Dollars' selection by modify accumulator type.

Test Case Number	Test Case Description	Expected Results
181	Verify that system allows user to modify accumulator type to remove the 'Coverage Gap', 'Sales Tax', and 'Health Plan Assistance' selection for commercial accumulator. Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should remove the 'Coverage Gap', 'Sales Tax', and 'Health Plan Assistance' by modify accumulator type.
182	Verify that system allows user to modify the accumulator Full Detail Report with dollar details. Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should display available dollar details in accumulator Full Detail Report.
183	Verify that charge brand penalty (MPD) field is disable for all accumulator types except MOP (Maximum Out of Pocket). Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should display charge brand penalty (MPD) field for all accumulator types except MOP (Maximum Out of Pocket).
184	Verify that the system allow user to select only 'Allowed Claim Amount' from Cost Applied dropdown for all Part D types. Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should select only 'Allowed Claim Amount' from Cost Applied dropdown for all Part D types.
185	Verify that the system allow user to select 'Allowed Claim Amount', 'Submitted Allowed Claim Amount', 'Usual and Customary' from Cost Applied dropdown for DED (commercial) and MOP accumulator types. Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should select 'Allowed Claim Amount', 'Submitted Allowed Claim Amount', 'Usual and Customary' from Cost Applied dropdown for DED (commercial) and MOP accumulator types.

Test Case Number	Test Case Description	Expected Results
186	Verify that the system allow user to select 'Allowed Claim Amount', 'Submitted Allowed Claim Amount', 'Usual and Customary' or 'Deductible Amount' from Cost Applied dropdown for MPP - Maximum Paid by Plan, LFE - Lifetime accumulator types. Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should select 'Allowed Claim Amount', 'Submitted Allowed Claim Amount', 'Usual and Customary' or 'Deductible Amount' from Cost applied dropdown for MPP - Maximum Paid by Plan, LFE - Lifetime accumulator types.
187	Verify that the system allow user to modify claims processing to include the cost applied types of "Submitted, Deduct, and Usual and Customary". Navigation: Plan Setup >> Accumulator Home >> New Accumulator	System should display modified claim details the cost applied types of "Submitted, Deduct, and Usual and Customary".
Maintenance History		
188	Verify that system allow user to modify the Maintenance History to track and display straddle rule details. Navigation: Plan Setup >> Accumulator Home >> Straddle >> History	Maintenance History application should display the modified straddle rule details.
Mass Changes		
189	Verify that system allows user to modify Mass Change with accumulator types. Navigation: Plan Setup >> Accumulator Home >> Mass Change	System should display the Mass Change for different accumulator types.
190	Verify that system allows user to modify Mass Change with dollar details. Navigation: Plan Setup >> Accumulator Home >> Mass Change	System should display the dollar details in Mass Change.
Commercial Claims		
191	Verify the claims process in the DED phase only using multiple accumulator criteria and rules.	The claim scenarios will process successfully.

Test Case Number	Test Case Description	Expected Results
192	Verify the claims process in the MOP phase only using multiple accumulator criteria and rules.	The claim scenarios will process successfully.
193	Verify the claims process in the MPP phase only using multiple accumulator criteria and rules.	The claim scenarios will process successfully.
194	Verify the claims process in the DED phase only using multiple DED buckets, multiple accumulator criteria and rules.	The claim scenarios will process successfully.
195	Verify the claims process in the MOP phase only using multiple DED buckets, multiple accumulator criteria and rules.	The claim scenarios will process successfully.
196	Verify the claims process in the MPP phase only using multiple DED buckets, multiple accumulator criteria and rules.	The claim scenarios will process successfully.
197	Verify the claims process in the DED and MOP phases only using multiple accumulator criteria and rules.	The claim scenarios will process successfully.
198	Verify the claims process in the DED, MOP and MPP phases only using multiple accumulator criteria and rules.	The claim scenarios will process successfully.
199	Verify the claims process in the DED, MOP, MPP and LFE phases only using multiple accumulator criteria and rules.	The claim scenarios will process successfully.
200	Verify the claims process in the DED, MOP, MPP, LFE and SCR phases only using multiple accumulator criteria and rules.	The claim scenarios will process successfully.
201	Verify the claims process in each phase using conditions that included or excluded.	The claim scenarios will process successfully.
202	Verify the claims with the CSR Indicator in the DED phase process successfully using multiple scenarios.	The claim scenarios will process successfully.
203	Verify the claims with the CSR Indicator in the MOP phase process successfully using multiple scenarios.	The claim scenarios will process successfully.
204	Verify the claims process successfully when the member pays 100% of the claim with available dollar scenarios.	The claim scenarios will process successfully.
205	Verify the system has the ability to override the commercial cost share when through the copay assignment component processing claims.	The claim scenarios will process successfully.
206	Verify the claims process using straddle rules between DED and MOP using multiple scenarios.	The claim scenarios will process successfully.
207	Verify the claims process using straddle rules between MOP and MPP using multiple scenarios.	The claim scenarios will process successfully.
208	Verify the claims process using straddle rules between DED and MPP using multiple scenarios.	The claim scenarios will process successfully.
209	Verify the Nx claims process using straddle rules between DED, MOP and MPP .	The claim scenarios will process successfully.
210	Verify claim scenarios when DED is met when MOP is met.	The claim scenarios will process successfully.

Test Case Number	Test Case Description	Expected Results
211	Verify claim scenarios where MOP and MPP process at the same time.	The claim scenarios will process successfully.
212	Verify the claims process using commercial buckets in conjunction with Part D.	The claim scenarios will process successfully.
213	Verify clear and build process rebuilds the claim amounts for selected accumulator scenarios.	The clear and build process will rebuild successfully.
214	Verify the batch file process (preload) works in conjunction with the accumulator process.	The batch file process works successfully.
215	Verify the SWRP claims in the DED phase process successfully using multiple scenarios.	The claim scenarios will process successfully.
216	Verify the SWRP claims in the MOP phase process successfully using multiple scenarios.	The claim scenarios will process successfully.
Part D Claims		
217	Verify the defined standard claims process successfully using multiple scenarios.	The claim scenarios will process successfully.
218	Verify the non standard claims process successfully using multiple scenarios.	The claim scenarios will process successfully.
219	Verify the defined standard with SWRP claims process successfully using multiple scenarios.	The claim scenarios will process successfully.
220	Verify the defined standard with SPAP claims process successfully using multiple scenarios.	The claim scenarios will process successfully.
221	Verify the defined standard with MME claims process successfully using multiple scenarios.	The claim scenarios will process successfully.
222	Verify the defined standard with SWRP and SPAP claims process successfully using multiple scenarios.	The claim scenarios will process successfully.
223	Verify the defined standard with SWRP, SPAP and MME claims process successfully using multiple scenarios.	The claim scenarios will process successfully.
224	Verify the defined standard with SWRP and MME claims process successfully using multiple scenarios.	The claim scenarios will process successfully.
225	Verify the non standard with Part D commercial claims process successfully using multiple scenarios.	The claim scenarios will process successfully.
226	Verify the defined standard with non Part D commercial claims process successfully using multiple scenarios.	The claim scenarios will process successfully.

Test Case Number	Test Case Description	Expected Results
227	Verify Part B claims process successfully with Part D accumulator types using multiple scenarios	The claim scenarios will process successfully.
228	Verify administrative drug claims process successfully with Part D accumulator types using multiple scenarios	The claim scenarios will process successfully.
Financials		
229	Verify financials can be run with the updated zero file for commercial claims. Verify all files and reports are correct.	Financials for commercial claims will run successfully.
230	Verify financials can be run with the updated zero file for Part D claims. Verify all files and reports are correct.	Financials for Part D claims will run successfully.
754 Defect Testing		
231	Verify once the Accumulator Process Option is turns on for a claim, the Enhanced Deduct information should not display on a claim. (When a group has an active Enhanced Deductible ID in GUI/3270 and Coverage Code/Group/Member has an active Accumulator ID in RxNova)	Claims should not display both Accumulator and Enhanced Deduct information.
232	Verify when viewing a preload claim, the claim will indicate where the money was added, replaced or subtracted.	The preload claim will indicate where the money was added, replaced or subtracted.
233	Verify when viewing a preload claim, the claim will show the amount involved in the preload.	The preload claim will show the amount involved in the preload.
234	Verify when viewing a preload claim, the NDC field is populated correctly. (Currently, the NDC is populated with all 0s where in legacy its populated with all 8s)	The NDC value in RxNova will match what is populated in Legacy.
235	Verify when updating data within an Accumulator Benefit period mass change in Coverage code, the Maintenance History provides one update line and not two separate MH lines.	Maintenance History will provide one update line.
236	Verify when manually updating an AM ID, the system will only provide the fields that were updated in Maintenance History.	The system will only display the fields in Maintenance History that were updated.
