Introduction

Welcome Welcome to the Pharmacy Network System. This section provides information on:

- What is the Pharmacy Network System?
- System Security
- System Access
- Pharmacy Network System Main Menu

What is the Pharmacy Network System?

The Pharmacy Network System or Pharmacy3 System is a centralized system for storing pharmacy information. Each pharmacy is uniquely identified by a pharmacy ID, usually the National Association of Boards of Pharmacy (NABP) number. Pharmacy3 has five components: Pharmacy Address Maintenance, Pharmacy Network Rate Maintenance, Pharmacy Plan Maintenance, Pharmacy Financial Balance, and Simulated Pharmacy Rate Retrieval Facility.

Global Address Maintenance stores each pharmacy's address information and is uniquely identified by Pharmacy ID (usually the NABP number) from the Global File. The information on each individual pharmacy includes pharmacy affiliate, and pharmacy chain data related to Argus and its customers.

Pharmacy Network Rate Maintenance stores pharmacy networks, identifies them by a unique network number, and describes how each network is used by the customer. The Pharmacy Network Rate Maintenance File associates pharmacy rates with the networks stored in the Pharmacy Network system. Pharmacy rates can be assigned at the pharmacy, affiliate, chain, or network level.

Pharmacy Plan Maintenance stores information on how pharmacy networks are configured. This file offers the user the ability to select the networks that will participate as a benefit, prioritize the network search order, and determine the networks that will be considered "In Network" and "Out of Network."

It also provides a user with the option to override network rate values. These overrides exist in four categories: status, reimbursement, dispense fees, and withholding.

Pharmacy Financial Balance stores financial information for a pharmacy or pharmacy affiliate. Up to five financial balances can be stored for a pharmacy or pharmacy affiliate.

Simulated Pharmacy Rate Retrieval Facility tests plans, networks, and rates configured in the Pharmacy Network System. Using the Customer ID, Plan ID, Pharmacy ID, and Fill Date to simulate a claim, it retrieves the appropriate pharmacy rates.

Introduction

Customer Pharmacy Search Facility searches pharmacies' address information which is uniquely identified by Pharmacy ID (usually the NABP number) for a customer. The information on each individual pharmacy includes pharmacy affiliate, and pharmacy chain data related to a customer. Eligibility information is also stored for each pharmacy by customer.

System Security

To use the Pharmacy Network System, the user must have access to Pharmacy3. Access is controlled by Argus Health Systems. The user might not have access to all processing options displayed on the Main Menu, or might be restricted to inquiry only (records may be viewed but not changed). An error message will be displayed if the user attempts to access or change an area for which there is no security clearance.

System Access

Access is controlled by Argus Health Systems, Inc. System security is assigned at the customer level. A user may access only information processed for the Customer Number(s) assigned to them. Each system may include various security levels that are set internally.

To use the Pharmacy Network Maintenance System, the user must have access to Pharmacy3. The user may have capability to use the inquire, add, update, or delete functions of the Pharmacy3 system.

System Entry

1. Upon entering the Argus system, the display will show the Welcome screen. Type **MENU** and press **Enter**.
2. The display will move to the Application Menu. Select CICSARG (by typing **S** next to it) and press **Enter**.

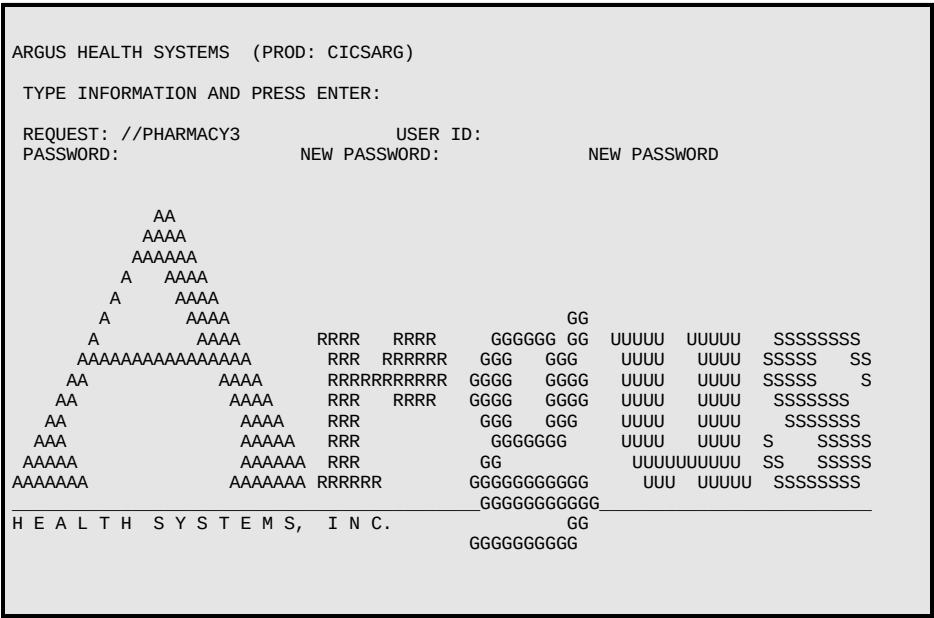

Figure 1-1: Argus Logon/Logoff Screen

3. The display will then show the Argus Logon/Logoff screen illustrated in figure 1-1, with the cursor in the first field in the upper left corner of the screen. Type **//PHARMACY3** followed by a **Tab** (NOT **Enter**) in the first field, the user logon followed by a **Tab** in the second field, and the user password followed by **Enter** when the cursor moves below the first field. The Pharmacy Network System Main Menu shown in figure 1-2 will be displayed.

System Exit

1. Return to the Pharmacy Network System Main Menu and press **PF04** to return to the Argus Logon/Logoff screen.
2. The cursor will be on the Request field. Type **LOGOFF** and press **Enter**. This will return the display to the Application Menu.
3. At the Application Menu, press **PF03** to exit. This will return the display to the Welcome screen.

Introduction

Pharmacy Network System Main Menu

```

6) CUSTOMER PHARMACY SEARCH FACILITY
PF04: RETURN TO LOGON ENTER: SELECT FUNCTION
```

Figure 1-2: Pharmacy Network System Main Menu

Figure 1-2 shows the Pharmacy Network System Main Menu. Five functions can be accessed from this screen. To select a function, type the function number, then press **Enter**.

Valid functions are as follows:

- 1 Global Address Maintenance
- 2 Pharmacy Network Rate Maintenance
- 3 Pharmacy Plan Maintenance
- 4 Pharmacy Financial Balance Maintenance
- 5 Simulated Pharmacy Rate Retrieval Facility
- 6 Customer Pharmacy Search Facility

Each of the above functions corresponds to a menu screen in Pharmacy3.

Note: The user is assigned to a specific level of security access in Pharmacy3 to determine inquiry, add, update, or delete capability. An error message will be displayed if the user attempts to perform a function without the assigned security access.

About PF Keys

The function or **PF** keys that may be used consistently throughout Pharmacy3 are as follows:

- PF03** display the previous screen
- PF04** display the corresponding menu screen
- PF05** confirm add, update, or delete
- PF07** scroll backward to the previous data
- PF08** scroll forward to display additional data
- PF09** redisplay screen with last information entered

Introduction

Global Address Maintenance

Global Address Maintenance

The Global Address Maintenance file allows the user to enter and update pharmacy information in Pharmacy3. Each unique Pharmacy ID, usually the National Association of Boards of Pharmacy (NABP) number, is stored in the file. Other information stored includes address, phone, National Council for Prescription Drug Programs, Inc. (NCPDP) classification, and NCPDP chain ID.

Section Definitions

Affiliate ID

A seven-digit code assigned by Argus to group pharmacies for reporting purposes.

Class

A one-digit code assigned by the NCPDP to identify the type of pharmacy. Valid values are as follows:

- 1 Community
- 2 Chain
- 3 Hospital
- 4 Clinic
- 5 Nursing home or extended care facility
- 6 Department store
- 7 Grocery store
- 8 Other
- 9 IV infusion

Chain ID

A seven-digit code assigned by Argus to identify pharmacies associated for identification purposes.

Global Address Maintenance

NCPDP Chain	A three-digit code assigned by the NCPDP to associate pharmacies.
Pharmacy ID	A seven-digit code used to identify an individual pharmacy. This code is usually the National Association of Boards of Pharmacy (NABP) code assigned to the pharmacy.
Tax ID	A 10-character field containing the 9-digit hyphenated tax identification number provided to Argus by the pharmacy for tax purposes.
Tax Rate	A five-digit field indicating the sales tax percentage charged for each prescription.

Figure 2-2: Pharmacy Address Maintenance Menu

The Pharmacy Address Maintenance Menu, figure 2-1, is accessed by selecting Function **1** at the Main Menu, figure 1-2, and pressing **Enter**.

The Pharmacy Address Maintenance Menu, figure 2-1, allows the user to inquire, update, add, delete, or view history for an Address record. The Customer ID is displayed in the Customer ID field.

Address records are created from the list of pharmacies provided to Argus by the National Council for Prescription Drug Programs, Inc. (NCPDP). This list of Address or “base” records is updated each month.

Global Address Maintenance

To view a list of Address records, enter **S** (Select) in the List Pharmacies field and press **Enter**. The user may also enter the required Pharmacy ID information and **S** (Select) in the Pharmacy Inquiry field, Pharmacy Update field, Pharmacy Add field, Pharmacy Delete field, or Pharmacy History field and press **Enter** to perform the corresponding function.

Note: If authorized to access multiple customers, type the appropriate Customer ID over the existing information in the Customer ID field in order to access pharmacy information for another customer.

The user will be assigned to a specific level of security access in Pharmacy3 which determines whether the user may inquire, add, update, or delete records. An error message will be displayed if the user attempts to perform a function without the assigned security access.

Options available from the Pharmacy Address Maintenance screens are as follows:

PF06 display the Pharmacy Network Rate Maintenance Menu, figure 3-1

PF10 display the Pharmacy Plan Maintenance Menu, figure 4-1

PF11 display the Simulated Pharmacy Rate Retrieval Facility, figure 6-1

PF12 display the Pharmacy Financial Balance Inquiry screen, figure 5-1

Figure 2-3: Pharmacy Selection List

Global Address Maintenance

The Pharmacy Selection List, figure 2-2, is accessed from the Pharmacy Address Maintenance Menu, figure 2-1, by entering **S** (Select) in the List Pharmacies field and pressing **Enter**.

The Pharmacy Selection List displays Address records from the global file of all pharmacy information submitted to Argus. These records are “base” records provided by NCPDP. The Customer ID appears at the top of the screen, figure 2-2. The Pharmacy, Affil (Affiliate), Chain, Pharmacy Name, City, ST (State), and Zip (Zip Code) fields are listed for each record. A highlighted search field appears below each field name.

The customer may choose to display pharmacies selectively by any one or combination of the following criteria: Pharmacy, Affiliate, Chain, Pharmacy Name, City, State, and/or Zip. Enter data in the preferred search field(s) and press **Enter**. All records will be sorted according to the data entered in the search fields. The user may enter information in each of these fields to narrow the search for data.

For example, the screen view in figure 2-2 shows pharmacies sorted by city. **KANSAS CIT** was entered in the City field to search for pharmacies located in Kansas City.

Note: The Pharmacy Selection List will display pharmacies numerically by Pharmacy ID after sorting by search field. If no data is entered in the search fields, the listings will appear in numerical order by Pharmacy ID.

To select an Address record to inquire or update, use the arrow or **Tab** keys to position the cursor in the SEL field of the preferred record. Type **I** (Inquiry) or **U** (Update), and press **Enter**. Only one Address record may be selected at a time. The corresponding Address screen for the selected record will be displayed.

Note: The Inquiry screen, figure 2-4, may also be accessed by entering **S** (Select) in the SEL field of the preferred record and pressing **Enter**.

The user may choose to view Address records for a different customer while in the Pharmacy Selection List. If authorized to display a different customer's list of pharmacies, type over the existing information in the Customer ID field, then press **Enter**.

More than 14 Address records may be present. The complete list may be viewed by pressing **PF07** to scroll backward and **PF08** to scroll forward.

The user may access other Pharmacy3 menus, without returning to the Main Menu shown in figure 1-2, by using the **PF** keys listed at the bottom of the screen.

Figure 2-3: Pharmacy Address Inquiry - Screen 1

The Pharmacy Address Inquiry screen, figure 2-3, allows the user to view a detailed description of the Address record.

This screen is accessed by entering the required Pharmacy ID information, entering **S** (Select) in the Pharmacy Inquiry field, and pressing **Enter** at the Pharmacy Address Maintenance Menu, figure 2-1, or by selecting the preferred Address record from the Pharmacy Selection List, figure 2-2.

Note: The Inquiry screen, figure 2-3, corresponds to the Address record or Exception record, as applicable. Address records are created from the list of pharmacies provided to Argus by the National Council for Prescription Drug Programs, Inc. (NCPDP). Exception records are records listing customer-specific pharmacy address information that varies from the information provided by NCPDP. If the record selected is a “base” Address record, or if the record is an Exception record with customer-specific information, the screen view will be identical to the Pharmacy Address Inquiry screen depicted in figure 2-3.

The Inquiry screen details address, phone, tax information, NCPDP classification, and NCPDP Chain ID for each pharmacy.

If the pharmacy is affiliated (associated with other pharmacies for financial processing and reporting purposes) the Affiliate ID and Affiliate Name will contain data. If the pharmacy is chained (it has multiple affiliates or individual pharmacies grouped together for identification purposes), the Chain ID and Chain Name will be detailed.

Global Address Maintenance

The Tax Rate, Tax ID, NCPDP Class, and NCPDP Chain ID are listed at the bottom of the screen.

The example in figure 2-3 depicts an affiliated pharmacy under the customer.

The Business Address and Mailing Address for the pharmacy are listed on the first Pharmacy Address Inquiry screen, figure 2-3.

To view the second Pharmacy Address Inquiry screen, press **PF09**. The user may toggle back and forth between the Inquiry screens by using the **PF09** key.

This screen is accessed through the Pharmacy Address Maintenance Menu, figure 2-1, by entering the required Pharmacy ID information, entering **S** (Select) in the Pharmacy Add field, and pressing **Enter**.

The Pharmacy ID and Customer ID will be displayed at the top of the screen.

The following fields are required to establish an Address record:

Business Address (Address Line1, City/State, Zip Code)

Effective Date

Pharmacy Name

Pharmacy3 will automatically generate the following information when the record is added:

Affiliate Name

Business Address (Address Line2, Attn Name, Phone Number)

Chain ID

Chain Name

Global Address Maintenance

The following fields are optional and may be utilized as applicable:

Affiliate ID

Close Date

Mailing Address (Address Line1, Address Line 2, City/State, Zip Code, Attn Name, Phone Number)

NCPDP Chain

NCPDP Class

Payment Claims Tape Address (Address Line1, Address Line2, City/State, Zip Code, Attn Name, Phone Number)

Tax ID

Tax Rate

Enter the Pharmacy Name and required fields of the Business Address (Address Line1, City/State, Zip Code) to create the Pharmacy Address record. Optional fields may then be entered. (See Section Definitions for values and formats.)

To enter the mailing address for a Payment Claims Tape (PCT), press **PF09** to display the second screen of the Address Add, figure 2-8. The Payment Claims Tape Address is optional and is used when a tape is shipped to an address other than the Business Address and Mailing Address. The user may add the record after completing the required information on Pharmacy Address Add - Screen 1. The user may toggle back and forth in the Address Add screens by using the **PF09** key.

Figure 2-10: Pharmacy History Selection List - Base Pharmacies

The Pharmacy History Selection List - Base Pharmacies, figure 2-10, allows the user to view a list of Address History records.

This screen is accessed through the Pharmacy Address Maintenance Menu, figure 2-1, by entering the required Pharmacy ID information, entering **S** (Select) in the Pharmacy History field, and pressing **Enter**.

When information is updated for a pharmacy or a pharmacy is closed, a copy of the previous record is moved to History. The Customer ID and Pharmacy ID are displayed at the top of the screen. The Pharmacy ID, Affil ID (Affiliate ID), Chain ID, Pharmacy Name, Moved To History Date, and Moved To History Time are listed in numerical order by Pharmacy ID.

Global Address Maintenance

If a pharmacy's address information has been updated multiple times, records are listed in reverse chronological order. If the pharmacy's address information has never been updated, the message **NO RECORDS FOUND FOR THIS SEARCH CRITERIA** will be displayed at the bottom of the screen.

To inquire history for all pharmacies, type **Y** in the View All Pharmacies field, then press **Enter**. A list of History records will be displayed only for those pharmacies for which changes have been made in the Pharmacy Address Maintenance file.

To select an Address History record to inquire, use the arrow or **Tab** keys to position the cursor in the SEL field of the preferred record. Type **S** (Select), and press **Enter**. Only one record may be selected at a time. The Pharmacy Address History Inquiry screen, figure 2-11, is then displayed.

To search for another pharmacy's History record, type the preferred Pharmacy ID over the existing Pharmacy ID, then press **Enter**.

More than 14 History records may be present for a single pharmacy. The complete list may be viewed by pressing **PF07** to scroll backward and **PF08** to scroll forward.

The user may access other Pharmacy3 menus, without returning to the Main Menu shown in figure 1-2, by using the **PF** keys listed at the bottom of the screen.

To view the Pharmacy History Selection List for Exception History records, press **PF09**. The **PF09** key allows the user to toggle between the history of "base" Address records, if they exist, and the history of Exception records, if they exist.

Note: Address records are created from the list of pharmacies provided to Argus by the NCPDP. Exception records are records listing customer-specific pharmacy access information that varies from the information provided by NCPDP. For example, a pharmacy that receives payment at an address other than the business address listed through NCPDP is recorded as an Exception record.

Figure 2-11: Pharmacy Address History Inquiry - Screen 1

The first Pharmacy Address History Inquiry screen, figure 2-11, allows the user to view previous Address records for a pharmacy.

This screen is accessed by selecting the preferred record from the Pharmacy History Selection List, figure 2-10 or by pressing **PF02** from the Pharmacy Address Inquiry screens, figure 2-4 and figure 2-5; the Pharmacy Address Update screens, figure 2-6 and figure 2-7; or the Pharmacy Address Delete screen, figure 2-9 . Each time information is updated for a pharmacy, a copy of the previous record is moved to History.

The following dates are displayed at the top of the screen:

- The Add field details the date and time that the pharmacy was added and the initials of the person who added the pharmacy to the Pharmacy Address file.
- The Update field details the date and time that the pharmacy's address information was updated and the initials of the person who updated the address information in the Pharmacy Address file.
- The Moved To History field details the date and time that the pharmacy's previous address information was moved to the Pharmacy Address History file prior to an update or delete.

Global Address Maintenance

To view the second screen of the Pharmacy Address History Inquiry, press **PF09**. The user may toggle back and forth between the History Inquiry screens by using the **PF09** key.

Figure 2-13: Pharmacy History Selection List - Exception Pharmacies

The Pharmacy History Selection List - Exception Pharmacies, figure 2-13, allows the user to view Exception History records. Exception records are records listing customer-specific pharmacy address information that varies from the information provided by NCPDP. An Exception History record is created each time that customer-specific pharmacy address information is changed.

This screen is accessed through the Pharmacy Address Maintenance Menu screen, figure 2-1, by entering the required the Pharmacy ID information, entering **S** (Select) in the Pharmacy History field, and pressing **Enter**. The user may also press **PF09** from the History Selection List for Address records shown in figure 2-10.

When information is updated for an exception pharmacy, a copy of the previous record is moved to History. The Customer ID and Pharmacy ID are displayed at the top of the screen. The Pharmacy ID, Affil ID (Affiliate ID), Chain ID, Pharmacy Name, Moved To History Date, and Moved To History Time are listed in numerical order by Pharmacy ID.

If a pharmacy's address information has been updated multiple times, records are listed in reverse chronological order. If the pharmacy's address information has never been updated, the message **NO RECORDS FOUND FOR THIS SEARCH CRITERIA** will be displayed at the bottom of the screen.

To inquire history for all pharmacies, type **Y** in the View All Pharmacies field, then press **Enter**. A list of History records will be displayed only for those pharmacies for which changes have been made in the Pharmacy Address Maintenance file.

Global Address Maintenance

To select an Exception History record to inquire, use the arrow or **Tab** keys to position the cursor in the SEL field of the preferred record. Type **S** (Select), and press **Enter**. Only one record may be selected at a time. The Pharmacy Exception History Inquiry screen, figure 2-14, is then displayed.

To search for another pharmacy's Exception History record, type the preferred Pharmacy ID over the existing Pharmacy ID, then press **Enter**.

More than 14 Exception History records may be present for a single pharmacy. The complete list may be viewed by pressing **PF07** to scroll backward and **PF08** to scroll forward.

The user may access other Pharmacy3 menus, without returning to the Main Menu shown in figure 1-2, by using the **PF** keys listed at the bottom of the screen.

To view the Pharmacy History Selection List for Address History records, press **PF09**. The **PF09** key allows the user to toggle between the history of "base" Address records, if they exist, and the history of Exception records, if they exist.

Note: Address records are created from the list of pharmacies provided to Argus by NCPDP. Exception records are records listing customer-specific pharmacy address information that varies from the information provided by NCPDP. For example, a pharmacy that receives a payment claims tape (PCT) at an address other than the business address listed through NCPDP is recorded as an Exception record.

Section Definitions

Active	A one-character alphanumeric code indicating if the record is current. Valid values are as follows: Y Yes, the record is current on file N No, the record is not current
Affiliate ID	A seven-digit code assigned by Argus to group pharmacies for reporting and financial purposes.
AWP Disc - All %	Average Wholesale Price (AWP) Discount - All % is a six-digit field indicating the percentage of Average Wholesale Price (AWP) discount used in pharmacy reimbursement for all drugs. This field uses two decimal places. For example, -10¼% would be entered as: -10.25.
AWP Disc - Brand %	Average Wholesale Price (AWP) Discount - Brand % is a six-digit field indicating the percentage of AWP discount used in pharmacy reimbursement for brand drugs. This field uses two decimal places. For example, -10¼% would be entered as: -10.25.

Pharmacy Network Rate Maintenance

AWP Disc - Genrc %	Average Wholesale Price (AWP) Discount - Generic % is a six-digit code indicating the percentage of AWP discount used in pharmacy reimbursement for generic drugs. This field uses two decimal places. For example, -10¼% would be entered as: -10.25.
Chain ID	A seven-digit code assigned by Argus to pharmacies associated for identification purposes.
Disc Fee - Brand \$	Dispense Fee - Brand \$ is a five-digit field indicating the amount paid to a pharmacy for dispensing a brand drug. This field uses two decimal places. For example, \$3.75 would be entered as follows: 3.75.
Disp Fee - Compd \$	Dispense Fee - Compound \$ is a five-digit field indicating the amount paid to a pharmacy for dispensing a compound drug. This field has two decimal places. For example, \$3.75 would be entered as follows: 3.75.
Disp Fee - Genrc \$	Dispense Fee - Generic \$ is a five-digit field indicating the amount paid to a pharmacy for dispensing a generic drug. This field has two decimal places. For example, \$3.75 would be entered as follows: 3.75.
Disp Fee - MAC \$	Dispense Fee - MAC \$ is a five-digit field indicating the amount paid to a pharmacy for dispensing a Maximum Allowable Cost (MAC) drug. This field has two decimal places. For example, \$3.75 would be entered as follows: 3.75.
Disp Fee - Misc1 \$	Dispense Fee - MISC1 \$ is a five-digit field indicating a customized dispense fee used for a customer. This field has two decimal places. For example, \$3.75 would be entered as follows: 3.75.
Disp Fee - Misc2 \$	Dispense Fee - MISC2 \$ is a five-digit field indicating a customized dispense fee used for a customer. This field has two decimal places. For example, \$3.75 would be entered as follows: 3.75.
Disp Fee - Misc3 %	Dispense Fee - MISC3 % is a five-digit field indicating a customized dispense fee percentage used for a customer. This field has three decimal places. For example, 14¼% would be entered as follows: 14.250.

Pharmacy Network Rate Maintenance

Disp Fee - Misc4 %	Dispense Fee - MISC4 % is a five-digit field indicating a customized dispense fee percentage used for a customer. This field has three decimal places. For example, 14¼% would be entered as follows: 14.250.
Eligible	A one-character code indicating eligibility for a network rate. Valid values are as follows: Y Yes, the rate is eligible N No, the rate is not eligible
Level	A one-character code indicating the level to which a pharmacy is assigned. Values are as follows: A Affiliate C Chain N Network P Pharmacy
Lock	A one-character code indicating if the pharmacy rate is guaranteed against plan overrides. Valid values are as follows: Y Yes, the pharmacy rate is guaranteed N No, the pharmacy rate is not guaranteed
Network ID	A four-digit code assigned by Argus to define a pharmacy network for a customer.
Pharmacy ID	A seven-digit code used to identify an individual pharmacy. This code is usually the National Association of Boards of Pharmacy (NABP) code assigned to the pharmacy.
Status Ind	Status Ind (Status Indicator) is a two-character alphanumeric code representing special pricing requirements.
Withhold - Amount	A five-digit field indicating the amount withheld from a pharmacy per claim. This field has two decimal places. For example, \$.07 would be entered as follows: .07.
Withhold - Percent	A five-digit field indicating the percentage withheld from a pharmacy per claim. This field has three decimal places. For example, 14.25% would be entered as follows: 14.250.

Figure 3-1: Pharmacy Network Rate Maintenance Menu

The Pharmacy Network Rate Maintenance Menu, figure 3-1, is accessed by selecting function 2 in the Main Menu, figure 1-2, and pressing **Enter**.

The Pharmacy Network Rate Maintenance Menu currently has two search categories, Network Maintenance and Pharmacy Maintenance. The Customer ID is displayed in the first blank field labeled Customer/Network ID.

Note: If authorized to access multiple customers, type the appropriate Customer ID over the existing information in the Customer field to access pharmacy information for another customer.

The user is assigned to a specific level of security access in Pharmacy3 to determine inquiry, add, update, or delete capability. An error message will be displayed if the user attempts to perform a function without the assigned security access.

Options available from the Pharmacy Network Rate Maintenance screens are as follows:

PF06 display the Pharmacy Address Maintenance Menu, figure 2-1

PF10 display the Pharmacy Plan Maintenance Menu, figure 4-1

PF11 display the Simulated Pharmacy Rate Retrieval Facility screen, figure 6-1

PF12 display the Pharmacy Financial Balance Inquiry screen, figure 5-1

Pharmacy Network Rate Maintenance

Network Maintenance

In Network Maintenance, the List Network(s), Network Inquiry, Network Update, and Network Add functions are available. The user may add, update or inquire about a customer's pharmacy network in the Network Maintenance screens.

To search for a Network record to update or inquire, the user must enter **S** (Select) in the List Network(s) field and press **Enter** to display the Networks Selection List, shown in figure 3-2. The user may then select the preferred Network record.

The user may also enter the required Network ID information, enter **S** (Select) in the Network Inquiry field or Network Update field, and press **Enter** at the Pharmacy Network Rate Maintenance Menu, figure 3-1. This will narrow the search for the Network record and bypass the Networks Selection List illustrated in figure 3-2. The corresponding Network record will be displayed.

To add a Network record to Pharmacy3, the user must enter **S** (Select) in the Network Add field and press **Enter** to access the Network Addition screen illustrated in figure 3-5.

Pharmacy Maintenance

In Pharmacy Maintenance, the List Pharmacies by Network, List Networks by Pharmacy, Pharmacy Inquiry, Pharmacy Update, Pharmacy Add, and Pharmacy History functions are available. The user may set up reimbursement rates for a pharmacy within a given network or across networks. The Pharmacy History function allows the user to view changes in a pharmacy's reimbursement rate over time.

The user may search for a Rate record under a given network or for the network(s) to which a given pharmacy belongs.

To search for a Rate record to inquire or update, the user must enter the required Network ID information, enter **S** (Select) in the List Pharmacies By Network field, and press **Enter** to display the Rates Selection List screen, shown in figure 3-6. The user may then select the preferred Rate record.

The user may also enter the required Network ID and Pharmacy ID information, enter **S** (Select) in the Pharmacy Inquiry field, Pharmacy Update field, or Pharmacy History field, and press **Enter** at the Pharmacy Rate Maintenance Menu, figure 3-1. This will narrow the search for the Rate record and bypass the Rates Selection List screens illustrated in figures 3-6 and 3-7. The corresponding Pharmacy Rate screen will be displayed (Pharmacy Network Rate Inquiry, figure 3-8; Pharmacy Network Rate Maintenance - Update, figure 3-9; or Pharmacy Rate History, figure 3-11).

To search for a list of networks to which a pharmacy belongs, the user must enter the required Pharmacy ID information, enter **S** (Select) in the List Networks By Pharmacy field, and press **Enter** at the Pharmacy Network Rate Maintenance Menu, figure 3-1. The Rates Selection List screen, illustrated in figure 3-7, will be displayed. The user may then select the preferred Rate record.

To add a Rate record to Pharmacy3, the user must enter the Network ID in the Network ID field, enter **S** (Select) in the Pharmacy Add field, and press **Enter** to access the Pharmacy Network Rate Maintenance - Add screen, figure 3-10.

Pharmacy Network Rate Maintenance

To view the Pharmacy Rate History, enter the required Network ID and Pharmacy ID information, enter **S** in the Pharmacy History field, and press **Enter** to display the Pharmacy Rate History screen, figure 3-11.

The user may access other Pharmacy3 menus, without returning to the Main Menu, by using the **PF** keys listed at the bottom of the screen.

Figure 3-2: Networks Selection List

The Networks Selection List, figure 3-2, is accessed from the Pharmacy Network Rate Maintenance Menu, figure 3-1, by entering **S** (Select) in the List Network(s) field and pressing **Enter**.

The Networks Selection List displays the networks assigned to a customer. The Network ID, Network Name, and Network Description are listed for each record in numerical order by Network ID.

If no networks are assigned to the customer, the message **NO RECORDS FOUND FOR DISPLAY** will appear at the bottom of the screen.

To select a Network record to update or inquire, use the arrow or **Tab** keys to position the cursor in the SEL field of the preferred record. Type **I** (Inquiry) or **U** (Update), and press **Enter**. Only one Network record may be selected at a time. The corresponding Network screen for the selected record is then displayed.

Note: The Network Inquiry screen, figure 3-3, may also be accessed by entering **S** (Select) in the SEL field of the preferred record and pressing **Enter**.

Pharmacy Network Rate Maintenance

The user may choose to view Network records for a different customer while in the Networks Selection List screen. If authorized to display a different customer's networks, type the preferred Customer ID over the existing Customer ID, then press **Enter**.

More than 12 Network records may be present for this customer. The complete list may be viewed by pressing **PF07** to scroll backward and **PF08** to scroll forward.

The user may access other Pharmacy3 menus, without returning to the Main Menu shown in figure 1-2, by using the **PF** keys listed at the bottom of the screen.

Figure 3-5: Network Addition

The Network Addition screen, figure 3-5, allows the user to add a Network record to Pharmacy3.

This screen is accessed through the Pharmacy Network Rate Maintenance Menu, figure, 3-1, by entering **S** (Select) in the Network Add field, and pressing **Enter**.

The Customer Number and Name are displayed at the top of the screen. When adding a Network record, the Network Name is a required field. The Network ID field is system-generated when the Network record is added. Invalid values or blank required fields will cause an error message to be displayed.

Enter the required network name in the Network Name field. Enter a description of the network in the Network Description field. The Network Description field should contain information on how the network is organized. For example, a network may be regional or may contain only 24-hour pharmacies.

To add the Network record, press the **PF05** key. The network ID number will be displayed in the Network ID field and the **RECORD ADDED - ENTER TO CONTINUE WITH NEW NETWORK** message will appear at the bottom of the screen. If the user presses **Enter** after typing information in the Network Addition screen, illustrated in figure 3-5, the message **PRESS PF05 TO UPDATE** will appear at the bottom of the screen.

Pharmacy Network Rate Maintenance

The user may access other Pharmacy3 menus, without returning to the Main Menu shown in figure 1-2, by using the **PF** keys listed at the bottom of the screen.

Figure 3-6: Rates Selection List - By Network

The Rates Selection List - By Network screen, figure 3-6, is accessed from the Pharmacy Network Rate Maintenance Menu, figure 3-1, by entering **S** in the List Pharmacies By Network field, and pressing **Enter**.

The Rates Selection List - By Network lists each pharmacy assigned to a specific network under a customer. The Pharmacy ID, Pharmacy Name, Effective Date, Eligibility, Level, Lock, Affil ID (Affiliate ID), and Chain ID fields are listed in numeric order by Pharmacy ID.

To select a Rate record to update or inquire, use the arrow or **Tab** keys to position the cursor in the SEL field of the preferred record. Type **I** (Inquiry) or **U** (Update), and press **Enter**. Only one Rate record may be selected at a time. The corresponding Rate screen for the selected record is then displayed.

Note: The Pharmacy Network Rate Inquiry screen, figure 3-9, may also be accessed by entering **S** (Select) in the SEL field of the preferred record and pressing **Enter**.

Pharmacy Network Rate Maintenance

The user may choose to inquire about or update a Rate record for a different customer and network. To access another customer's Rate record, type the preferred Customer ID over the existing Customer ID and/or type the preferred Network ID over the existing Network ID and press **Enter**.

More than 12 Rate records may be present for this network. The complete list may be viewed by pressing **PF07** to scroll backward or **PF08** to scroll forward.

The user may access other Pharmacy3 menus, without returning to the Main Menu shown in figure 1-2, by using the **PF** keys listed at the bottom of the screen.

Figure 3-8: Pharmacy Network Rate Inquiry

The Pharmacy Network Rate Inquiry screen, figure 3-8, allows the user to view the reimbursement rate(s) for a given pharmacy.

This screen is accessed through the Pharmacy Network Rate Maintenance Menu, figure 3-1, by entering the required data in the Network ID and Pharmacy ID fields, entering **S** (Select) in the Pharmacy Inquiry field, and pressing **Enter**. The user may also select the preferred Rate record from the Rate Selection List - By Network screen, figure 3-6, or the Rate Selection List - By Pharmacy screen, figure 3-7.

The top left portion of the screen lists the Customer ID and name, the Network ID and name, and the Pharmacy ID and name followed by the Pharmacy Address, Attention Name, and Phone Number.

Pharmacy Network Rate Maintenance

If applicable, the Affil (Affiliate ID) and the Chain ID are displayed. The Tax Rate appears in the lower left hand side of the screen.

Figure 3-8 illustrates a Pharmacy Network Rate Inquiry screen with three effective dates and corresponding rate information in columns on right side of the screen. The most recent rate information appears in the left column. Previous rate information is listed in descending chronological order from left to right.

The user may display previous rate information by using the **PF07** key to scroll backward and the **PF08** key to scroll forward.

The Effective Date for the reimbursement rate is listed at the top of each column. The user may also type an effective date over existing information in the Effective Date field in the left column and press **Enter** to search for the corresponding rate information. For each search, the requested rate information will appear in the left column. (See Section Definitions for values and formats.)

The Eligible indicator contains a value of (**Y** or **N**) to indicate if the pharmacy is eligible for the network, and the Active indicator will be **Y** (Yes) if a pharmacy rate is current.

The Level indicator (i.e., **A**, **C**, **N**, or **P**) shows the rate level at which the pharmacy is reimbursed. (See Section Definitions for values and formats.)

The Lock indicator contains a value of (**Y** or **N**) to indicate if the pharmacy rate is guaranteed against plan overrides.

The Status Ind (Status Indicator) field contains a two-character code indicating that special pricing requirements are in effect.

The Average Wholesale Price (AWP) discount fields detail the percentage discount received by the pharmacy for various types of drugs (i.e., AWP Disc - All %, AWP Disc - Brand %, and AWP Disc - Genrc %). (See Section Definitions for values and formats.)

The Dispense fee fields show the dispense fee(s) collected by the pharmacy (i.e., Disp Fee - Brand \$, Disp Fee Compd \$, Disp Fee - Genrc \$, and Disp Fee MAC \$). The Disp Fee - Misc1 \$ and Disp Fee - Misc2 \$ fields outline customized dispense fee amounts as specified by the customer. The Disp Fee - Misc3 % and Disp Fee - Misc4 % fields contain customized dispense fees listed as a percentage of ingredient cost for the drug.

The Withhold - Amount field lists the withhold amount expressed as a dollar value. The Withhold - Percent field lists the withhold amount expressed as a percentage of the balance due for the drug. Only one of these fields can contain a value in the Rate record. If there is withholding, it will be specified as either a dollar amount or a percentage.

The user may choose to inquire about a Rate record for this pharmacy under a different customer by typing the preferred Customer ID over the existing Customer ID and pressing **Enter**.

Pharmacy Network Rate Maintenance

The user may choose to inquire about a Rate record for this pharmacy and customer under a different network by typing the preferred Network ID over the existing Network ID and pressing **Enter**.

The user may choose to inquire about a Rate record for a different pharmacy under the same customer and network by typing the preferred Pharmacy ID over the existing Pharmacy ID and pressing **Enter**.

To display the Pharmacy Rate History screen, figure 3-11, press **PF02**.

Figure 3-9: Pharmacy Network Rate Maintenance - Update

The Pharmacy Network Rate Maintenance - Update screen, figure 3-9, allows the user to update the reimbursement rate(s) for a given pharmacy.

This screen is accessed through the Pharmacy Network Rate Maintenance Menu, figure 3-1, by entering the required data in the Network ID and Pharmacy ID fields, entering **S** (Select) in the Pharmacy Update field, and pressing **Enter**. The user may also select the preferred Rate record from the Rate Selection List - By Network screen, figure 3-6, or the Rate Selection List - By Pharmacy screen, figure 3-8.

The upper left side of the Pharmacy Network Rate Maintenance - Update screen, figure 3-9, lists the Customer ID and name, the Network ID and name, and the Pharmacy ID and name followed by the Pharmacy Address, Attention Name and Phone Number. The Affil (Affiliate ID), Chain (Chain ID), and Tax Rate appear in the lower left of the Rate Maintenance screen.

Pharmacy Network Rate Maintenance

Rate information is listed in columns on the right side of the Pharmacy Network Rate Maintenance - Update screen, figure 3-9. (See Section Definitions for values and formats.)

Note: All numbers must be entered as formatted on the screen to accurately reflect reimbursement rates. Use signs (+/-) and a decimal point as needed.

To update the reimbursement rate(s), type over existing information in the Rate Maintenance screen and press **PF05**. If the user presses **Enter** after typing over existing information in the reimbursement rate fields, the message **PRESS PF05 TO UPDATE** will appear at the bottom of the screen. The user may not proceed to other screens until this record has been updated; otherwise, the data entered will be lost.

Note: Any change in the reimbursement rate will generate corresponding information in the Pharmacy Network Rate Inquiry screen, figure 3-8, and in the Pharmacy Rate History screen, figure 3-11.

The user may display previous rate information by using the **PF07** key to scroll backward and the **PF08** key to scroll forward.

The user may choose to update a Rate record for a different pharmacy under the network by typing the preferred Pharmacy ID over the existing Pharmacy ID and pressing **Enter** or to update a Rate record for the same pharmacy under a different network by typing the preferred Network ID over the existing Network ID and pressing **Enter**.

To update a Rate record for the same pharmacy under a different customer and network, type the preferred Customer ID and Network ID over the existing Customer ID and Network ID and press **Enter**.

The user may access other Pharmacy3 menus, without returning to the Main Menu shown in figure 1-2, by using the **PF** keys listed at the bottom of the screen.

To display the Pharmacy Rate History screen, figure 3-11, press **PF02**.

Figure 3-10: Pharmacy Network Rate Maintenance - Add

The Pharmacy Network Rate Maintenance - Add screen, figure 3-10, allows the user to add reimbursement rate information for a pharmacy.

This screen is accessed through the Pharmacy Network Rate Maintenance Menu, figure 3-1, by entering the required data in the Network ID and Pharmacy ID fields, entering **S** (Select) in the Pharmacy Add field, and pressing **Enter**.

The Customer ID and name, Network ID and name, and Pharmacy ID and name will appear in the upper left of the Add screen, figure 3-10.

The pharmacy's address, attention name, phone number, Affil (Affiliate ID), Chain (Chain ID), and Tax Rate will appear in the lower left of the screen. These fields are system-generated and may not be changed in the Pharmacy Network Rate Maintenance - Add screen. (See Section Definitions for field values.)

When adding a Rate record, the Effective Date is the only required field. Invalid values or blank required fields will cause an error message to be displayed.

The Eligible field must contain (**Y** or **N**) to indicate if the pharmacy is eligible for the network. Enter **Y** in the Active field to indicate that the pharmacy rate is current. If the Active field contains **N** the rate is removed from the current record.

The Level field will show the level (i.e., **A**, **C**, **N**, or **P**) at which the pharmacy is reimbursed. (See Section Definitions for values and formats.)

Pharmacy Network Rate Maintenance

Enter (**Y** or **N**) the Lock field to indicate if the pharmacy rate is guaranteed against plan overrides.

The Status Ind (Status Indicator) field must contain a two-character value representing special pricing requirements for the customer as applicable.

Enter the reimbursement rate information as specified by the customer.

Note: Type all amounts over the zeros in the Pharmacy Network Rate Maintenance - Add screen, when adding pharmacy reimbursement rates. The numbers must be entered as formatted on the screen to accurately reflect the reimbursement rates outlined by the customer. Enter a (-) to indicate negative amounts, and enter a decimal point as needed.

The Average Wholesale Price (AWP) discount fields will contain discount data for all drugs or for brand and generic drugs (i.e., AWP Disc - All %, AWP Disc - Brand %, and AWP Disc - Genrc %). (See Section Definitions for field values, formats and definitions.)

Enter the dispense fees as applicable (i.e., Disp Fee - Brand \$, Disp Fee Genrc \$, Disp Fee Compd \$, and Disp Fee - MAC \$ fields). Include any customer-specific dispense fee information (i.e., Disp Fee - Misc1 \$, Disp Fee - Misc2 \$, Disp Fee - Misc3 %, and Disp Fee - Misc4 %).

Either the Withhold - Amount field will contain a dollar value or the Withhold - Percent field will contain a percentage value. Only one of these fields may contain withholding data.

To add the Rate record, press **PF05**. The message **RATE ADDED SUCCESSFULLY** will appear at the bottom of the screen. If the user presses **Enter** after entering information in the reimbursement rate fields, the message **PRESS PF05 TO ADD** will appear at the bottom of the screen. The user may not proceed to other screens until this record has been added; otherwise, the data entered will be lost.

The user may choose to add a Rate record for a different pharmacy under the network by typing the preferred Pharmacy ID over the existing Pharmacy ID and pressing **Enter**.

The user may choose to add a Rate record for the same pharmacy under a different network by typing the preferred Network ID over the existing Network ID and pressing **Enter**.

To add a Rate record for the same pharmacy under a different customer and network, type the preferred Customer ID and Network ID over the existing Customer ID and Network ID and press **Enter**.

The user may access other Pharmacy3 menus, without returning to the Main Menu shown in figure 1-2, by using the **PF** keys listed at the bottom of the screen.

To display the Pharmacy Rate History screen, figure 3-11, press **PF02**.

Figure 3-11: Pharmacy Rate History

The Pharmacy Rate History screen, figure 3-11, allows the user to view reimbursement rate information for both active and inactive Rate records.

This screen is accessed through the Pharmacy Network Rate Maintenance Menu, figure 3-1, by entering the required data in the Network ID and Pharmacy ID fields, entering **S** (Select) in the Pharmacy History field, and pressing **Enter**. The user may also press **PF02** from the Pharmacy Network Rate Inquiry screen, figure 3-8; the Pharmacy Network Rate Maintenance - Update screen, figure 3-9; or the Pharmacy Network Rate Maintenance - Add screen, figure 3-10.

Records are displayed in reverse chronological order by the date and time they were updated in the Pharmacy Network Rate Maintenance file. When a reimbursement rate is created or updated, a copy of the record is entered in the History. This screen displays rate history for each customer by Network ID and Pharmacy ID.

The first column of data on the left side of the screen displays the date, time, and user ID of the individual who added the Rate record in the A-DATE, A-TIME, and A-OPER fields.

The column labeled EFFECT details the effective date in the EFFECT field, the active indicator (**ACTIVE/INACTV**) in the ACTIVE field, and the program name in the A-PROG field.

Note: The Active field contains (**Y** or **N**) in all other Pharmacy3 screens. The Pharmacy Rate History screen, figure 3-11, is the only screen in which the Active field contains **ACTIVE** for a current record and **INACTV** for an inactive record.

Pharmacy Network Rate Maintenance

The column labeled ELG LEV lists eligibility (**Y** or **N**) in the ELG field and if rates are locked (**Y** or **N**) in the LOCK field. The level indicator is displayed in the LEV field. (See Section Definitions for indicator values.)

The column labeled STATUS lists the two-character Status Indicator in the STATUS field, the Average Wholesale Price (AWP) discount for all drugs in the AWP-AL field, and the update date in the U-DATE field.

The AWP-BR column details the AWP brand discount in the AWP-BR field, the AWP generic discount in the AWP-GN field, and the update time in the U-TIME field.

The column labeled BRAND shows the brand dispense fee in the BRAND field, the generic dispense fee in the GENRC field, and the update operator in the U-OPER field.

The COMPND column details the compound dispense fee in the COMPND field, the Maximum Allowable Cost (MAC) dispense fee in the MAC field, and the update program name in the U-PROG field.

The column labeled MISC1\$ lists the Misc1 dispense fee amount in the MISC1\$ field and the Misc2 dispense fee amount in the MISC2\$ field.

The column labeled MISC3% lists the Misc3 dispense fee percentage in the MISC3% field and the Misc4 dispense fee percentage in the MISC4% field.

The WTHLD\$ column shows either the withhold amount in the WTHLD\$ field or the withhold percentage in the WTHLD% field.

More than three History records may be present for this pharmacy. The complete list may be viewed by pressing **PF07** to scroll backward or **PF08** to scroll forward.

The user may access other Pharmacy3 menus, without returning to the Main Menu shown in figure 1-2, by using the **PF** keys listed at the bottom of the screen.

Pharmacy Plan Maintenance

Pharmacy Plan Maintenance

The Pharmacy Plan Maintenance file allows the user to define pharmacy benefits for a group. It lists networks included in plan specifications, prioritizes the network search order, and indicates if networks are considered "in network" or "out of network." The Pharmacy Plan Maintenance file also allows the user to override network rate values. The overrides exist in the following categories: status, reimbursement, dispense fees, and withholding.

Section Definitions

AWP Disc % ALL	Average Wholesale Price (AWP) Discount % ALL is a six-digit field indicating the percentage of AWP discount used in pharmacy reimbursement for all drugs. This field uses two decimal places. For example, -10¼% would be entered as: -10.25.
Brand Amount	A five-digit field indicating the amount paid to a pharmacy for dispensing a brand drug. This field has two decimal places. For example, \$3.75 would be entered as follows: 3.75.
Brand AWP Disc %	Brand Average Wholesale Price (AWP) Discount % is a six-digit field indicating the percentage of AWP discount used in pharmacy reimbursement for brand drugs. This field uses two decimal places. For example, -10¼% would be entered as: -10.25.
Compound Amount	A five-digit field indicating the amount paid to a pharmacy for dispensing a compound drug. This field has two decimal places. For example, \$3.75 would be entered as follows: 3.75.
Generic Amount	A five-digit field indicating the amount paid to a pharmacy for dispensing a generic drug. This field has two decimal places. For example, \$3.75 would be entered as follows: 3.75.

Pharmacy Plan Maintenance

Generic AWP Disc %	Generic Average Wholesale Price (AWP) Discount % is a six-digit code indicating the percentage of AWP discount used in pharmacy reimbursement for generic drugs. This field uses two decimal places. For example, -10¼% would be entered as: -10.25.
Indicator	A two-character alphanumeric code in the Plan record used to identify special pricing requirements for the customer.
In/Out Network	A one-character code indicating whether a network should be handled as "In Network" or "Out of Network." Valid values are as follows: I In Network O Out of Network
MAC Amount	Maximum Allowable Cost (MAC) amount is a five-digit field indicating the amount paid to a pharmacy for dispensing a MAC drug. This field has two decimal places. For example, \$3.75 would be entered as follows: 3.75.
Misc-1 Amount	Miscellaneous-1 Amount is a five-digit field indicating the customized dispense fee used for a customer. This field has two decimal places. For example, \$3.75 would be entered as follows: 3.75.
Misc-2 Amount	Miscellaneous-2 Amount is a five-digit field indicating the customized dispense fee used for a customer. This field has two decimal places. For example, \$3.75 would be entered as follows: 3.75.
Misc-3 Percent	Miscellaneous-3 Percent is a five-digit field indicating the customized dispense fee percentage used for a customer. This field has three decimal places. For example, 14¼% would be entered as follows: 14.250.
Misc-4 Percent	Miscellaneous-4 Percent is a five-digit field indicating the customized dispense fee percentage used for a customer. This field has three decimal places. For example, 14¼% would be entered as follows: 14.250.
Network Priority	A list of up to three networks in order of search priority (for reimbursement rates).

Pharmacy Plan Maintenance

Override Dispense Fees	A one-character indicator indicating that dispense fees have been overridden by the plan. Valid values are as follows: Y Yes, the dispense fee has been overridden N No, the dispense fee has not been overridden
Override Reimbursement	A one-character code indicating if reimbursement has been overridden by the plan. Valid values are as follows: Y Yes, the reimbursement has been overridden N No, the reimbursement has not been overridden
Override Status	A one-character code indicating if special pricing requirements are in effect. Valid values are as follows: Y Yes, special pricing requirements are in effect N No, special pricing requirements are not in effect
Override Withholding	A one-character code indicating if withholding has been overridden by the plan. Valid values are as follows: Y Yes, withholding has been overridden by the plan N No, withholding has not been overridden by the plan
Stat	Stat (Status) is a two-character alphanumeric code used to identify special pricing requirements in History. This corresponds to the Indicator field in the Plan record.
Withholding Amount	A five-digit field indicating the amount withheld from a pharmacy per claim. This field has two decimal places. For example, \$.07 would be entered as follows: .07.
Withholding Percent	A five-digit field to indicating the percentage withheld from a pharmacy per claim. This field has three decimal places. For example, 14.25% would be entered as follows: 14.250.

Figure 4-2: Pharmacy Plan Maintenance Menu

The Pharmacy Plan Maintenance Menu, figure 4-1, is accessed by selecting function **3** at the Main Menu shown in figure 1-2 and pressing **Enter**. The Pharmacy Plan Maintenance menu allows the user to inquire, update, add, or view history for a Plan record. The Customer ID is displayed in the Customer field.

To view a list of Plan records, enter **S** (Select) in the List Pharmacy Plan(s) field and press **Enter**. The user may also enter the required Plan and Effective Date information and **S** (Select) in the Pharmacy Plan Inquiry field, Pharmacy Plan Update field, Pharmacy Plan Add field, or Pharmacy Plan History field, and press **Enter** to perform the corresponding function.

Note: If authorized to access multiple customers, type the new Customer ID over the existing information Customer field to access plan information for another customer.

The user will be assigned to a specific level of security access in Pharmacy3 to determine inquiry, add, update, or delete capability. An error message will be displayed if the user attempts to perform a function without the assigned security access.

Pharmacy Plan Maintenance

Options available from the Pharmacy Plan Maintenance screens are as follows:

PF06 display the Pharmacy Address Maintenance Menu, figure 2-1

PF10 display the Pharmacy Network Rate Maintenance Menu, figure 3-1

PF11 display the Simulated Pharmacy Rate Retrieval Facility screen, figure 6-1

PF12 display the Pharmacy Financial Balance Inquiry screen, figure 5-1

Figure 4-3: Pharmacy Plan Inquiry

The Pharmacy Plan Inquiry screen, figure 4-3, allows the user to view a Plan record.

This screen is accessed through the Pharmacy Plan Maintenance Menu, figure 4-1, by entering the required data in the Plan and Effective Date fields, entering **S** (Select) in the Pharmacy Plan Inquiry field, and pressing **Enter**. The user may also select the preferred Plan record from the Selection List, figure 4-2.

The top left section of the Pharmacy Plan Inquiry screen, figure 4-3, lists the Customer ID and name, the Plan ID and name, and the Effective Date on the left side of the screen. At the top right section of the screen, the Network Search Priority fields list networks for the pharmacy in order of search priority for reimbursement rates in the First, Second, and Third fields. The In/Out Network fields indicate if the pharmacy network is considered "In Network," **I**, or "Out of Network," **O**.

Pharmacy Plan Maintenance

The remainder of the screen details the override fields and corresponding reimbursement information in the OVERRIDE ==> (Y/N) section. The Override Status field will contain (**Y** or **N**) to indicate if customized pricing requirements are in effect. If the Override Status field contains a value of **Y**, the Indicator field will contain a two-character alphanumeric code representing the customer-specific pricing requirements.

The Override Reimbursement field will contain (**Y** or **N**) to indicate if a reimbursement override is in effect. If the Override Reimbursement field contains a value of **Y**, then the Average Wholesale Price (AWP) discount percentage fields (i.e., AWP Disc % (All), Brand AWP Disc %, and/or Generic AWP Disc %) will override reimbursement rates listed in the Network record. (See Section Definitions for values, formats, and definitions.)

The Override Dispense Fees field will contain (**Y** or **N**) to indicate an override for dispense fees. If the Override Dispense Fees field contains a value of **Y**, then at least one of the dispense fee amount or percentage fields must contain a valid value (i.e., Brand Amount, Generic Amount, Compound Amount, MAC (Maximum Allowable Cost) Amount, Misc-1 Amount, Misc-2 Amount, Misc-3 Percent, and Misc-4 Percent). Values listed will override dispense fees provided in the Network records. (See Section Definitions for values, formats, and definitions.)

The Override Withholding field will contain (**Y** or **N**) to indicate if withholding should be overridden. If the Override Withholding indicator contains a value of **Y**, then the Withholding Amount field or the Withholding Percent field listed will override values listed in the Network records.

The user may choose to inquire about the Plan record for a different effective date under the Plan by typing over the existing information in the Effective Date field and pressing **Enter**.

The user may choose to inquire about a different Plan record under this customer by typing over the existing information in the Plan ID field and pressing **Enter**.

To inquire about a Plan record for a different customer, type the preferred Customer ID over the existing Customer ID and press **Enter**.

The user may access other Pharmacy3 menus, without returning to the Main Menu shown in figure 1-2, by using the **PF** keys listed at the bottom of the screen.

To display the Plan History screen, figure 4-6, press **PF02**.

Figure 4-4: Pharmacy Plan Update

The Pharmacy Plan Update screen, figure 4-4, allows the user to update a Plan record.

This screen is accessed through the Pharmacy Plan Maintenance Menu, figure 4-1, by entering the required data in the Plan and Effective Date fields, entering **S** (Select) in the Pharmacy Plan Update field, and pressing **Enter**. The user may also select the preferred Plan record from the Selection List, figure 4-2.

The top left section of the Pharmacy Plan Update screen, lists the Customer ID and name, the Plan ID and name, and the Effective Date.

At the top right section, the Network Search Priority fields list the pharmacy networks in order of search priority for reimbursement rates in the First, Second, and Third fields. The In/Out Network fields indicate if a network is **I** (In Network), or **O** (Out of Network). Any of these fields may be changed to reflect a new priority order or change in In/Out Network status.

The Override Status, Indicator, Override Reimbursement, Override Dispense Fee, and Override Withholding fields may be changed in the OVERRIDE ==> (Y/N) section. Corresponding reimbursement information must also be updated as applicable. (See Section Definitions for values, formats, and definitions.)

Note: All numbers must be entered as formatted on the screen to accurately reflect reimbursement rates. Use signs (+/-) and a decimal point as needed.

The user may choose to update a different Plan record under this customer by typing the preferred Plan ID over the existing Plan ID and pressing **Enter**.

Pharmacy Plan Maintenance

To update the Plan record for a different effective date under the Plan, type the preferred Effective Date over the existing Effective Date and press **Enter**.

The user may choose to update a Plan record for a different customer by typing the preferred Customer ID over the existing Customer ID and pressing **Enter**.

To update the Plan record, type over the existing information and press **PF05**.

The user may access other Pharmacy3 menus, without returning to the Main Menu shown in figure 1-2, by using the **PF** keys listed at the bottom of the screen.

To display the Plan History screen, figure 4-6, press **PF02**.

Figure 4-6: Pharmacy Plan Add

The Pharmacy Plan Add screen, figure 4-5, allows the user to add a Plan record under the customer.

This screen is accessed through the Pharmacy Plan Maintenance Menu, figure 4-1, by entering **S** (Select) in the Pharmacy Plan Add field and pressing **Enter**.

The Customer ID, Customer Name and Effective Date will appear on the Add screen. Enter the plan name in the field provided to the right of the Plan ID field. The Plan ID field contains a system-generated value that is assigned when the Plan record is added.

Pharmacy Plan Maintenance

The following are required fields:

Effective Date

Network Search Priority First and In/Out Network (I/O)

Plan ID name

Override Status

Override Reimbursement

Override Dispense Fees

Override Withholding

Note: If a value of **Y** is entered for the Override Status, Override Reimbursement, Override Dispense Fees, and/or Override Withholding fields, the corresponding rate information must be entered. It is possible to enter zero amounts or percentages in these fields. Invalid values or blank required fields will cause an error message to be displayed.

Network IDs must be entered in search priority order in the First, Second, and Third fields listed under Network Search Priority. For each network, enter the **I** (In Network) or **O** (Out of Network).

Enter the Override Status code (**Y** or **N**) in the Override Status field to indicate if a pricing procedure override will be in effect. If a value of **Y** is entered in the Override Status field, enter the two-character value representing special pricing requirements for the customer in the Indicator field.

The Override Reimbursement field must contain **Y** or **N** to indicate if reimbursement rates will be overridden. If a value of **Y** is entered in the Override Reimbursement field, enter the corresponding Average Wholesale Price (AWP) discount percentages as applicable (i.e., AWP Disc % (ALL), Brand AWP Disc %, or Generic AWP Disc %). (See Section Definitions for values, formats, and definitions.)

Note: Type amounts over the zeros in the Pharmacy Plan Add screen, when adding plan reimbursement rates. All numbers must be entered as formatted on the screen to accurately reflect reimbursement rates. Use signs (+/-) and a decimal point as needed.

Enter **Y** or **N** in the Override Dispense Fees field to indicate if dispense fees will be overridden. If a value of **Y** is entered in the Override Dispense Fees field, enter dispense fee amounts and/or percentages as applicable (i.e., Brand Amount, Generic Amount, Compound Amount, MAC (Maximum Allowable Cost) Amount, Misc-1 Amount, Misc-2 Amount, Misc-3 Percent, and/or Misc-4 Percent fields). (See Section Definitions for values, formats, and definitions.)

The Override Withholding field must contain **Y** or **N** to indicate if withholding is overridden. If the Override Withholding field contains a value of **Y**, then either the Withholding Amount field or the Withholding Percent field must contain a value to indicate the amount or percentage withheld from the pharmacy per claim.

Pharmacy Plan Maintenance

To add the Plan record, press **PF05**. The new Plan ID will appear in the Plan ID field, and the message **RECORD ADDED - ENTER TO CONTINUE WITH NEW PLAN** will appear at the bottom of the screen. If the user presses **Enter** after typing information in the Add screen, illustrated in figure 4-5, the message **PRESS PF05 TO ADD** will appear at the bottom of the screen.

The user may access other Pharmacy3 menus, without returning to the Main Menu shown in figure 1-2, by using the **PF** keys listed at the bottom of the screen.

Figure 4-6: Pharmacy Plan History

The Pharmacy Plan History screen, figure 4-6, allows the user to view History records for a plan. When information is added or updated for a plan, a History record is created.

This screen is accessed through the Pharmacy Plan Maintenance Menu, figure 4-1, by entering the required data in the Plan and Effective Date fields, entering **S** (Select) in the Pharmacy Plan History field, and pressing **Enter**. The user may also press **PF02** when in the Pharmacy Plan Inquiry screen, figure 4-3, or the Pharmacy Plan Update screen, figure 4-4.

The Pharmacy Plan History screen displays History records in reverse chronological order by effective date. Both active and inactive plans are listed by effective date. If there is more than one History record with the same effective date, dates will be listed in reverse chronological order by update time.

The first column from the left in the History screen, lists the effective date for the History record in the Effect (Effective Date) field and if the record is active with **ACTIVE** or **INACTV** (Inactive) in the Active field.

Pharmacy Plan Maintenance

The column labeled 1STNET lists the priority order for the networks in the 1STNET (1st Network), 2NDNET (2nd Network), and 3RDNET (3rd Network) fields along with the In/Out Network indicator for each. A values indicate **I** (In Network) or **O** (Out of Network).

The OVERRIDES column lists the STAT (Override Status), REIM (Override Reimbursement), DISP (Override Dispense Fees), and WITH (Override Withholding) fields. Each of these fields will contain **Y** or **N** to indicate if an override is in effect.

The column labeled STAT in the History screen, lists the STAT field. This field corresponds to the Indicator field in the Plan record (Pharmacy Plan Inquiry, figure 4-3; Pharmacy Plan Update, figure 4-4; or Pharmacy Plan Add, figure 4-5) and contains the two-character code used to identify special pricing requirements for the customer.

Note: The STAT field in the OVERRIDES column corresponds to the Override Status field in the Plan record (Pharmacy Plan Inquiry, figure 4-3; Pharmacy Plan Update, figure 4-4; or Pharmacy Plan Add, figure 4-5).

The AWP-AL column lists the AWP-AL (Average Wholesale Price (AWP) Discount Percent for all drugs), the AWP-BR (Average Wholesale Price (AWP) Discount Percent for brand drugs), and the AWP-GN (Average Wholesale Price (AWP) Discount Percent for generic drugs) fields. (See Section Definitions for values, formats and definitions.)

The BRAND column lists the brand dispense fee in the Brand field and the compound dispense fee in the COMPND (Compound) field.

The column labeled GENRC details the generic dispense fee in the GENRC (Generic) field and the Maximum Allowable Cost (MAC) dispense fee in the MAC field.

The column labeled MISC1\$ lists the Misc-1 dispense fee amount in the MISC1\$ field, the Misc-3 dispense fee percentage in the MISC3% field, and the date that the record was updated in the D-DATE field.

The MISC2\$ column details the Misc-2 dispense fee amount in the MISC2\$ field, the Misc-4 dispense fee percentage in the MISC4% field, and the time that the record was updated in the D-TIME field.

The WTHLD\$ column lists the withholding amount in the WTHLD\$ field, the withholding percentage in the WTHLD% field, and the operator who updated the record in the D-OPER field.

The column labeled A-DATE lists the date that the plan record was added in the A-DATE field, the time the record was added in the A-TIME field, and the operator who added the record in the A-OPER field.

Pharmacy Plan Maintenance

More than three History records may be present for this plan. The complete list may be viewed by pressing **PF07** to scroll backward and **PF08** to scroll forward.

The user may access other Pharmacy3 menus, without returning to the Main Menu shown in figure 1-2, by using the **PF** keys listed at the bottom of the screen.

Pharmacy Plan Maintenance

Pharmacy Financial Balance

Pharmacy Financial Balance

The Pharmacy Financial Balance allows the user to view a Balance record for any outstanding financial balance. A positive or negative balance may be applied to the pharmacy's financial balance to account for claims adjustments made between financial processing cutoff dates.

Section Definitions

Balance

A nine-digit numeric field with two decimal places indicating the positive or negative balance amount adjusted for the pharmacy between financial cutoff dates.

Payment Group

A 14-digit numeric code generated in the Finance System to identify a payment group for financial processing. The Payment Group number appears in **CCYYMMDDHHmmSS** format, where the format is as follows:

CC Century
YY Year
MM Month
DD Day
HH Hour
mm Minute
SS Second

Update Date

A six-digit date indicating when a pharmacy balance was updated in **MMDDYY** format, where the format is as follows:

MM Month
DD Day
YY Year

Figure 5-1: Pharmacy Financial Balance Inquiry

The Pharmacy Financial Balance Inquiry screen, figure 5-1, allows the user to view balance updates. A Balance record may be created or updated in the Finance System between financial processing cutoff dates (i.e., before the next scheduled financial processing run). It is usually created or updated during financial processing. This screen displays up to five update dates and balances for a pharmacy.

The Pharmacy Financial Balance Inquiry screen is accessed by selecting function **4** at the Main Menu shown in figure 1-2 and pressing **Enter**.

To display update dates and balances, enter the Pharmacy ID in the Pharmacy ID field and press **Enter**. The Customer ID is displayed in the Customer Number field.

Note: Customer Affil (Customer Affiliate) and Payment Group are not required to view pharmacy financial balance information but will be appear in the future to uniquely define a pharmacy financial balance.

If authorized to access multiple customers, type the Customer ID in the Customer Number field to access pharmacy balance information for another customer.

This screen details the pharmacy name by the Pharmacy ID field, the Customer Affiliate ID in the Customer Affil field, the customer name by the Customer Number field, and the payment group number in the Payment Group field.

The Update Date(s) and Balance(s) appear in reverse chronological order.

Pharmacy Financial Balance

The user may choose to view a pharmacy balance for a different pharmacy under the customer by typing the preferred Pharmacy ID over the existing Pharmacy ID and pressing **Enter**.

To view a pharmacy balance for the same pharmacy under a different customer, type the preferred Customer ID over the existing Customer Number and press **Enter**.

The user may access other Pharmacy3 menus, without returning to the Main Menu shown in figure 1-2, by using the **PF** keys listed at the bottom of the screen.

Options available from the Pharmacy Financial Balance Inquiry screen are as follows:

PF06 display the Pharmacy Address Maintenance Menu, figure 2-1

PF10 display the Pharmacy Network Rate Maintenance Menu, figure 3-1

PF11 display the Pharmacy Plan Maintenance Menu, figure 4-1

PF12 display the Simulated Pharmacy Rate Retrieval Facility screen, figure 6-1

Pharmacy Financial Balance

Simulated Pharmacy Rate Retrieval

Simulated Pharmacy Rate Retrieval

The Simulated Pharmacy Rate Retrieval function simulates pharmacy plan rules and applies any rate override(s). The rate source is indicated (i.e., pharmacy plan or network rate) as well as the network in which the pharmacy is found.

Section Definitions

AWP Disc - All %	Average Wholesale Price (AWP) Discount - All % is a six-digit field indicating the percentage of AWP discount used in pharmacy reimbursement for all drugs. This field uses two decimal places. For example, -10¼% would be entered as: -10.25.
AWP Disc - Brand %	Average Wholesale Price (AWP) Discount - Brand % is a six-digit field indicating the percentage of AWP discount used in pharmacy reimbursement for brand drugs. This field uses two decimal places. For example, -10¼% would be entered as: -10.25.
AWP Disc - Genrc %	Average Wholesale Price (AWP) Discount - Generic % is a six-digit field indicating the percentage of AWP discount used in pharmacy reimbursement for generic drugs. This field uses two decimal places. For example, -10¼% would be entered as: -10.25.
Disp Fee - Brand \$	Dispense Fee - Brand \$ is a five-digit field indicating the amount paid to a pharmacy for dispensing a brand drug. This field has two decimal places. For example, \$3.75 would be entered as follows: 3.75.
Disp Fee - Genrc \$	Dispense Fee - Generic \$ is a five-digit field indicating the amount paid to a pharmacy for dispensing a generic drug. This field has two decimal places. For example, \$3.75 would be entered as follows: 3.75.
Disp Fee - Compd \$	Dispense Fee - Compound \$ is a five-digit field indicating the amount paid to a pharmacy for dispensing a compound drug. This field has two decimal places. For example, \$3.75 would be entered as follows: 3.75.
Disp Fee - MAC \$	Dispense Fee - Maximum Allowable Cost (MAC) \$ is a five-digit field indicating the amount paid to a pharmacy for dispensing a drug on the customer's MAC list. This field has two decimal places. For example, \$3.75 would be entered as follows: 3.75.

Pharmacy Simulated Rate Retrieval

Disp Fee - Misc1 \$	Dispense Fee - MISC1 \$ is a five-digit field indicating a customized dispense fee used for a customer. This field has two decimal places. For example, \$3.75 would be entered as follows: 3.75.								
Disp Fee - Misc2 \$	Dispense Fee - MISC2 \$ is a five-digit field indicating a customized dispense fee used for a customer. This field has two decimal places. For example, \$3.75 would be entered as follows: 3.75.								
Disp Fee - Misc3 %	Dispense Fee - MISC3 % is a five-digit numeric field indicating a customized dispense fee percentage used for a customer. This field has three decimal places. For example, 14¼% would be entered as follows: 14.250.								
Disp Fee - Misc4 %	Dispense Fee - MISC4 % is a five-digit field indicating a customized dispense fee percentage used for a customer. This field has three decimal places. For example, 14¼% would be entered as follows: 14.250.								
Eligible	A one-character code indicating eligibility of the pharmacy within that network. Valid values are as follows: <table><tr><td>Y</td><td>Yes, the rate is eligible</td></tr><tr><td>N</td><td>No, the rate is not eligible</td></tr></table>	Y	Yes, the rate is eligible	N	No, the rate is not eligible				
Y	Yes, the rate is eligible								
N	No, the rate is not eligible								
Fill Date	A six-digit field indicating the date that the prescription was filled in MMDDYY format, where the format is as follows: <table><tr><td>MM</td><td>Month</td></tr><tr><td>DD</td><td>Day</td></tr><tr><td>YY</td><td>Year</td></tr></table>	MM	Month	DD	Day	YY	Year		
MM	Month								
DD	Day								
YY	Year								
In/Out Network	A one-character code indicating a pharmacy as "In Network" or "Out of Network." Values are as follows: <table><tr><td>I</td><td>In Network</td></tr><tr><td>O</td><td>Out of Network</td></tr></table>	I	In Network	O	Out of Network				
I	In Network								
O	Out of Network								
Level	A one-character code indicating the level to which a pharmacy rate is assigned. Values are as follows: <table><tr><td>A</td><td>Affiliate</td></tr><tr><td>C</td><td>Chain</td></tr><tr><td>N</td><td>Network</td></tr><tr><td>P</td><td>Pharmacy</td></tr></table>	A	Affiliate	C	Chain	N	Network	P	Pharmacy
A	Affiliate								
C	Chain								
N	Network								
P	Pharmacy								

Simulated Pharmacy Rate Retrieval

Lock

A one-character code indicating if the pharmacy rate is guaranteed against plan overrides. A guaranteed rate may not be overridden by a plan. Valid values are as follows:

Y	Yes, the pharmacy rate is guaranteed
N	No, the pharmacy rate is not guaranteed

Status Ind

Status Ind (Status Indicator) is a two-character alphanumeric code representing special pricing requirements for the customer.

Figure 6-1: Simulated Pharmacy Rate Retrieval Facility

The Simulated Pharmacy Rate Retrieval Facility screen, figure 6-1, allows the user to simulate reimbursement rate information.

This screen is accessed by selecting function 5 at the Main Menu shown in figure 1-2 and pressing **Enter**.

The Simulated Pharmacy Rate Retrieval Facility screen, figure 6-1, simulates pharmacy plan rules and applies any overrides found in the rate categories. Also, this screen indicates the rate source (pharmacy plan or network rate) and the network in which the pharmacy is found.

To simulate pharmacy rates, type the Customer ID in the Customer field, the Plan ID in the Plan ID field, the Pharmacy ID in the Pharmacy field, and the Fill Date in the Fill Date field, and press **Enter**. If a Fill Date is not provided, the current date is used as a default in Pharmacy3.

Pharmacy Simulated Rate Retrieval

Note: If authorized to access multiple customers, type the Customer ID in the Customer field to simulate a pharmacy rate for another customer.

Once the Enter key is pressed, Pharmacy3 will retrieve the rates applicable for the information entered.

The customer name will appear by the Customer field, the plan name will appear by the Plan ID field, and the pharmacy name will appear by the Pharmacy field. The Affiliate ID will appear in the Affiliate field, and the chain ID number will appear in the Chain ID field as applicable. The Network Priority and In/Out Network fields on the lower left of the Simulated Pharmacy Rate Retrieval Facility screen will also contain valid values. The network in which the pharmacy was found to be eligible is indicated by the **FND=>** comment to the left of the Network Priority field(s). (See Section Definitions for values and formats.)

In the right section of the screen, the Pharmacy Plan and Network Rate columns allow the user to determine the source of the applied rate(s) in each rate category (i.e., Pharmacy Plan Rate, Network Rate, or a combination of both). For each rate, the Effective Date, Eligible indicator, Level indicator, Lock indicator, and Status Ind (Status indicator) are listed at the top of the column.

The Average Wholesale Price (AWP) discount fields are detailed for all drugs, or brand and generic drugs (i.e., AWP Disc - All %, AWP Disc - Brand %, and AWP Disc - Genrc %). (See Section Definitions for values and formats.)

The Dispense Fee fields indicate the various dispense fees for brand, generic, compound, and Maximum Allowable Cost (MAC) drugs (i.e., Disp Fee - Brand \$, Disp Fee Genrc \$, Disp Fee Compd \$, and Disp Fee - MAC \$). The Disp Fee - Misc1 \$ and Disp Fee - Misc2 \$ fields indicate any customized dispense fee amount(s) defined by the customer. The Disp Fee - Misc3 % and Disp Fee - Misc4 % fields indicate any customized dispense fee percentage(s) defined by the customer. (See Section Definitions for values and formats.)

Either the Withhold Amount field will contain the dollar amount or the Withhold Percent field will contain the percentage withheld per claim from the pharmacy.

Note: Pricing module overrides will not be reflected in rate simulations.

The example detailed in figure 6-1, shows that the pharmacy will be reimbursed at the rate established for the entire network (Level **N**). When a pharmacy is not found in any of the networks under the customer, the plan rates will be displayed and the error message **PHARMACY NOT ELIGIBLE ON NETWORK(S), DEFAULT TO PLAN RATES** will appear at the bottom of the screen.

The example provided in figure 6-2 illustrates a rate simulation that represents a failure to find a network rate and a default to the stated plan values.

Figure 6-2: Simulated Pharmacy Rate Retrieval Facility - Example

The user may choose to simulate the rates for a different plan under the customer by typing the preferred Plan ID over the existing Plan ID and pressing **Enter** or to simulate the rates for a different pharmacy under the customer by typing the preferred Pharmacy ID over the existing Pharmacy ID and pressing **Enter**.

The user may choose to simulate rates for a different fill date by typing the new Fill Date over the existing Fill Date and pressing **Enter**.

To simulate rates for a different customer, type the preferred Customer ID over the existing Customer ID and press **Enter**.

The user may access other Pharmacy3 menus, without returning to the Main Menu shown in figure 1-2, by using the **PF** keys listed at the bottom of the screen.

Options available from the Simulated Pharmacy Rate Retrieval Facility screen are as follows:

PF06 display the Pharmacy Address Maintenance Menu, figure 2-1

PF10 display the Pharmacy Network Rate Maintenance Menu, figure 3-1

PF11 display the Pharmacy Plan Maintenance Menu, figure 4-1

PF12 display the Pharmacy Financial Balance Inquiry screen, figure 5-1

Pharmacy Simulated Rate Retrieval

Customer Pharmacy Search Facility

Customer Pharmacy Search Facility

The Customer Pharmacy Search Facility function allows the user to view specific pharmacy information within a network or pharmacy plan for a given customer. The search may also be narrowed to include only eligible pharmacies for a customer or network and may be done by pharmacy plan or network. The search results will be included in a pharmacy list which gives basic pharmacy information, including customer, affiliation, chain, address, network, and eligibility information.

Section Definitions

Affiliate ID	A seven-digit field assigned by Argus to identify pharmacies associated for reporting and financial purposes.						
Chain ID	A seven-digit field assigned by Argus to identify pharmacies associated for identification purposes.						
City	An 18-character alphanumeric field indicating the city of a pharmacy's Business, Mailing, or PCT address. This field may also be a nine-character field on the Pharmacy Selection List screen indicating a pharmacy's business address.						
Customer ID	A four-digit numeric field assigned by Argus to uniquely identify a customer.						
Elig Ind	See Eligible (Customer Pharmacy Search Facility)						
Eligible	(Customer Pharmacy Search Facility) A one-character flag on the Customer Pharmacy Search Facility screen that indicates whether the search is to be limited to only eligible pharmacies. Valid values are as follows: <table><tr><td>N</td><td>No, include only ineligible pharmacies in the search</td></tr><tr><td>Y</td><td>Yes, include only eligible pharmacies in the search</td></tr><tr><td>Blank</td><td>Include eligible and ineligible pharmacies in the search</td></tr></table>	N	No, include only ineligible pharmacies in the search	Y	Yes, include only eligible pharmacies in the search	Blank	Include eligible and ineligible pharmacies in the search
N	No, include only ineligible pharmacies in the search						
Y	Yes, include only eligible pharmacies in the search						
Blank	Include eligible and ineligible pharmacies in the search						
Netwk	A four-digit field assigned by Argus to define a pharmacy network for a customer.						
Network ID	A four-digit field assigned by Argus to define a pharmacy network for a customer.						
Pharmacy	A seven-digit code used to identify a pharmacy. This code is usually the National Association of Boards of Pharmacy (NABP) number assigned to the pharmacy.						

Customer Pharmacy Search Facility

Pharmacy ID (NABP)	A seven-digit code used to identify a pharmacy. This code is usually the National Association of Boards of Pharmacy (NABP) number assigned to the pharmacy.
Pharmacy Name	A 30-character alphanumeric field for pharmacy name, usually as indicated by NABP.
Pharmacy Plan ID	A five-digit field used to identify the pharmacy benefit (i.e., reimbursement rate(s), dispense fee(s), and withholding amount or withholding percentage assigned to the pharmacy).
ST	A two-digit field indicating the state in which the pharmacy is located in the Business, Mailing, or PCT address.
Zip	A five-digit field containing the zip code and a four-digit field containing the zip code extension for the pharmacy's zip code in the Mailing, Business, or PCT address.

Figure 7-1: Customer Pharmacy Search Facility Screen

The Customer Pharmacy Search Facility Screen, figure 7-1, allows the user to do a pharmacy search by customer, pharmacy plan or network, and by eligible, ineligible, or both eligible and ineligible pharmacies for that customer. This screen is accessed by selecting function **6** at the Main Menu shown in figure 1-2 and pressing **Enter**.

Customer Pharmacy Search Facility

To view a list of pharmacy records by customer, enter the Customer ID and **S** in the List Pharmacies field. The search may be further narrowed by entering the Pharmacy ID (NABP), a Pharmacy Plan ID or the Network ID, and a **Y**, **N**, or **Space** in the Eligible Only field. The system will search 3500 records at a time and will notify the user that additional records may be searched by pressing **Enter**. The Customer Pharmacy Selection List, figure 7-2, will display the search results.

Figure 7-2: Customer Pharmacy Selection List

The Customer Pharmacy Selection List screen, figure 7-2, displays address records from the customer's pharmacy file. The Customer ID and Pharmacy Plan ID are displayed at the top of the screen. The Pharmacy ID (NABP #), Affiliate, Chain, Pharmacy Name, City, State, Zip, Network, and Eligibility Indicator are listed for each record.

Pharmacies may be displayed by any one or combinations of the highlighted fields below or next to the field titles. For example all pharmacies on the list which are located in a certain city may be displayed by entering the city in the City field and pressing **Enter**. Similarly, all pharmacies belonging to a certain network may be displayed by entering the Network ID in the Netwk Field and pressing **Enter**.

To view the rate information on a particular pharmacy, type an **S** in the Sel field next to the Pharmacy's NABP number and press **Enter**. Only one pharmacy may be selected at a time. The Pharmacy Network Rate Inquiry screen, figure 7-3, will be displayed.

Figure 7-3: Pharmacy Network Rate Inquiry

To return to the Customer Pharmacy Selection List from the Pharmacy Network Rate Inquiry screen, press **PF03**. To display the Pharmacy3 Main Menu press **PF01**. To display the Pharmacy Network Rate Maintenance Menu press **PF04**.

Note: If the user has authority to update pharmacy rate information, a **U** may be typed in the Sel field next to a pharmacy record. This will allow the user to update rate information for the pharmacy selected.

The user may access other Pharmacy3 menus, without returning to the Main Menu by using the **PF** keys listed at the bottom of the screen.

Appendix A: Error Messages

Message	9999999 RECORDS SEARCHED PRESS ENTER TO CONTINUE
Meaning	An indication of how many records were searched to display the records on the screen. Pressing Enter allows the search to continue. Pausing at 3500 record increments, provides a breakpoint at which the search criteria may be changed.
Action	Either press Enter to continue, or change the search criteria.
Message	ACTIVE MUST BE Y OR N
Meaning	A value other than Y or N was entered.
Action	Enter a Y or N .
Message	ACTIVE MUST BE Y WHEN ADDING NEW RATE
Meaning	A value other than Y was entered.
Action	Enter a Y .
Message	AFFILIATE ID DOES NOT EXIST
Meaning	An Affiliate ID was entered that is not in the file.
Action	Enter a valid Affiliate ID.
Message	AFFILIATE ID MUST BE NUMERIC
Meaning	A non-numeric Affiliate ID was entered.
Action	Enter a numeric Affiliate ID.
Message	AFFILIATE ID RANGE IS 9000000 TO 9099999
Meaning	An Affiliate ID was entered that is not in the valid range.
Action	Enter a valid Affiliate ID.
Message	AFFILIATE RATE NOT FOUND
Meaning	An attempt was made to specify an Affiliate Rate from a pharmacy rate record when the Affiliate Rate record was not eligible for that time.
Action	Enter a valid Affiliate Rate, or change the rate level specified.
Message	AWP DISC - ALL INCOMPATIBLE WITH BRAND/GENERIC DISC
Meaning	An Average Wholesale Price (AWP) discount may be specified for all drugs or may be specified for brand and generic drugs -- not both.
Action	Enter either AWP Discount for all drugs or for brand and generic drugs.
Message	BUSINESS AREA CODE MUST BE NUMERIC
Meaning	A non-numeric Area Code was entered.
Action	Enter a numeric Area Code.
Message	BUSINESS PHONE NUMBER MUST BE NUMERIC
Meaning	A non-numeric Phone Number was entered.
Action	Enter a numeric Phone Number.

Appendix A: Error Messages

Message	BUSINESS PHONE NUMBER PREFIX MUST BE NUMERIC
Meaning	A non-numeric Phone Number Prefix was entered.
Action	Enter a numeric Phone Number Prefix.
Message	BUSINESS PHONE NUMBER SUFFIX MUST BE NUMERIC
Meaning	A non-numeric Phone Number Suffix was entered.
Action	Enter a numeric Phone Number Suffix.
Message	BUSINESS ZIP CODE EXTENSION MUST BE NUMERIC
Meaning	A non-numeric Zip Code Extension was entered.
Action	Enter a numeric Zip Code Extension.
Message	BUSINESS ZIP CODE MUST BE NUMERIC
Meaning	A non-numeric Zip Code was entered.
Action	Enter a numeric Zip Code.
Message	CANNOT ADD THE PHARMACY BECAUSE IT ALREADY EXISTS
Meaning	An attempt was made to add a pharmacy that already exists in the file.
Action	Verify the Pharmacy ID.
Message	CHAIN ID DOES NOT EXIST
Meaning	A Chain ID was entered that is not in the file.
Action	Verify and then re-enter the Chain ID.
Message	CHAIN ID MUST BE NUMERIC
Meaning	A non-numeric Chain ID was entered.
Action	Enter a numeric Chain ID.
Message	CHAIN ID RANGE IS 9500000 TO 9599999
Meaning	A Chain ID was entered that is not in the defined range.
Action	Make the Chain ID within the acceptable range.
Message	CHAIN RATE NOT FOUND
Meaning	A Chain Rate was entered that is not in the file.
Action	Verify and then re-enter the Chain Rate.
Message	CHANGING SEARCH CRITERIA NOT ALLOWED DURING PAGING
Meaning	An attempt was made to change the search criteria after paging either forward or backward.
Action	Complete the request to page forward or backward using the existing search criteria. Upon completion, the search criteria may be changed.
Message	CITY IS REQUIRED FOR BUSINESS ADDRESS
Meaning	A City was not entered.
Action	Enter the City.

Appendix A: Error Messages

Message	CUSTOMER AFFILIATE IS REQUIRED
Meaning	A Customer Affiliate ID was not entered.
Action	Enter the Customer Affiliate ID.
Message	CUSTOMER AFFILIATE MUST BE NUMERIC
Meaning	A non-numeric Customer Affiliate ID was entered.
Action	Enter a numeric Customer Affiliate ID.
Message	CUSTOMER ID MUST BE NUMERIC
Meaning	A non-numeric Customer ID was entered.
Action	Enter a numeric Customer ID.
Message	CUSTOMER NUMBER IS REQUIRED
Meaning	A Customer Number was not entered.
Action	Enter a numeric Customer Number.
Message	CUSTOMER SPECIFIED WAS NOT FOUND
Meaning	The Customer ID entered is not in the file.
Action	Verify and then re-enter the Customer ID.
Message	DATE NOT NUMERIC
Meaning	A non-numeric date was entered.
Action	Correct and then re-enter the date.
Message	DATE REQUIRED
Meaning	The function that was used requires a date.
Action	Enter the date.
Message	EFFECTIVE DATE (MMDDYY) REQUIRED
Meaning	The function that was used requires an Effective Date.
Action	Enter the Effective Date.
Message	EFFECTIVE DATE NOT NUMERIC
Meaning	A non-numeric Effective Date was entered.
Action	Enter a numeric Effective Date.
Message	EFFECTIVE DATE SPECIFIED IS NOT VALID
Meaning	An Effective Date was entered that is not valid.
Action	Correct and then re-enter the Effective Date.
Message	ELIGIBLE MUST BE Y OR N
Meaning	A value other than Y or N was entered in the Eligible field.
Action	Enter a Y or N .

Appendix A: Error Messages

Message	ENTER U FOR UPDATE OR S FOR SELECT
Meaning	A value other than U (Update) or S (Select) was entered.
Action	Enter a U to update or an S to select.
Message	ENTER AN "S" BESIDE THE DESIRED OPTION
Meaning	An S is required for the option selected.
Action	Enter an S to select the option.
Message	ENTER RATE INFORMATION TO ESTABLISH PHARMACY
Meaning	Rate information is missing for the pharmacy.
Action	Enter the pharmacy's rate information.
Message	FILL DATE SPECIFIED IS NOT A VALID DATE
Meaning	An invalid Fill Date was entered.
Action	Correct and then re-enter the Fill Date.
Message	HAVE REACHED BACKWARD SCROLLING LIMIT
Meaning	The beginning of the file has been reached.
Action	Press PF08 to scroll forward.
Message	HAVE REACHED FORWARD SCROLLING LIMIT
Meaning	The end of the file has been reached.
Action	Press PF07 to scroll backward.
Message	HAVE REACHED THE MOST RECENT EFFECTIVE DATE
Meaning	The most recent Effective Date is displayed.
Action	None
Message	HAVE REACHED THE OLDEST EFFECTIVE DATE
Meaning	The oldest Effective Date is displayed.
Action	None
Message	IN/OUT MUST BE I OR O
Meaning	A value other than I (in Network) or O (out of Network) was entered.
Action	Enter an I for in Network or an O for out of Network.
Message	INVALID AMOUNT
Meaning	An invalid amount was entered.
Action	Correct and then re-enter the amount.
Message	INVALID CLASS CODE MUST BE 1 THRU 9
Meaning	A Class code other than 1 through 9 was entered.
Action	Correct and then re-enter the Class code.

Appendix A: Error Messages

Message	INVALID CUSTOMER ID FOR ORIGINATING REGION
Meaning	An invalid Customer ID was entered for originating region.
Action	Correct and then re-enter the Customer ID.
Message	INVALID DATE
Meaning	An invalid date was entered.
Action	Verify and then re-enter the date.
Message	INVALID DECIMAL POSITION FOR TAX RATE USE .00000 FORMAT
Meaning	The decimal was misplaced in the Tax Rate field.
Action	Type the decimal first, then enter the Tax Rate.
Message	INVALID FUNCTION KEY - PLEASE RE-ENTER
Meaning	A function key was pressed that is not available on the current screen.
Action	Use the function keys at the bottom of the screen.
Message	INVALID PERCENT
Meaning	An invalid percentage was entered.
Action	Correct and then re-enter the percentage.
Message	INVALID PLUS-MINUS PERCENT
Meaning	An Average Wholesale Price (AWP) discount percentage requires either a (+) or a (-) before the percentage.
Action	Verify that the first character entered is either a (+) or (-).
Message	INVALID STATE ABBREVIATION
Meaning	An invalid State abbreviation was entered.
Action	Correct and then re-enter the State abbreviation.
Message	INVALID STATE ABBREVIATION FOR BUSINESS ADDRESS
Meaning	An invalid State abbreviation was entered.
Action	Correct and then re-enter the State abbreviation.
Message	INVALID STATE ABBREVIATION FOR MAILING ADDRESS
Meaning	An invalid State abbreviation was entered.
Action	Correct and then re-enter the State abbreviation.
Message	INVALID STATE ABBREVIATION FOR PCT ADDRESS
Meaning	An invalid State abbreviation was entered.
Action	Correct and then re-enter the State abbreviation.
Message	KEYS HAVE CHANGED - ENTER TO CONTINUE
Meaning	The search criteria was changed.
Action	Press Enter so that the system can adjust to the new search criteria.

Appendix A: Error Messages

Message	LEVEL MUST BE N OR SPACE FOR A CHAIN RATE
Meaning	A value other than N or space (blank) was entered for the level.
Action	Enter an N or leave blank.
Message	LEVEL MUST BE N, C, A, OR P FOR A PHARMACY RATE
Meaning	A value other than N , C , A , or P was entered for a pharmacy rate.
Action	Enter N , C , A , or P .
Message	LEVEL MUST BE N, C, OR SPACE FOR AN AFFILIATE RATE
Meaning	A value other than N , C , or space (blank) was entered for an affiliate rate.
Action	Enter an N , C , or leave blank.
Message	LEVEL SPECIFIED IS INVALID FOR A NETWORK RATE
Meaning	Network level is the highest rate level. It may not refer to another level.
Action	Remove the value entered in the Level field.
Message	LOCK IS FOR PHARMACY RATE ONLY
Meaning	Lock can be used with pharmacy level rate records only.
Action	None
Message	LOCK MUST BE Y OR N
Meaning	Lock must have a value of either Y or N .
Action	Enter a Y to lock the record, or enter an N to unlock the record.
Message	MAILING ADDRESS INCOMPLETE: CITY IS REQUIRED
Meaning	The City was not entered.
Action	Enter the City.
Message	MAILING ADDRESS INCOMPLETE: STATE IS REQUIRED
Meaning	The State was not entered.
Action	Enter the State.
Message	MAILING ADDRESS INCOMPLETE: STREET ADDRESS REQUIRED
Meaning	The street address was not entered.
Action	Enter the address number and street name.
Message	MAILING ADDRESS INCOMPLETE: ZIP CODE IS REQUIRED
Meaning	The Zip Code was not entered.
Action	Enter the Zip Code.
Message	MAILING AREA CODE MUST BE NUMERIC
Meaning	A non-numeric Area Code was entered.
Action	Enter a numeric Area Code.

Appendix A: Error Messages

Message	MAILING PHONE NUMBER MUST BE NUMERIC
Meaning	A non-numeric Phone Number was entered.
Action	Enter a numeric Phone Number.
Message	MAILING PHONE PREFIX MUST BE NUMERIC
Meaning	A non-numeric phone prefix was entered.
Action	Enter a numeric phone prefix.
Message	MAILING PHONE SUFFIX MUST BE NUMERIC
Meaning	A non-numeric phone suffix was entered.
Action	Enter a numeric phone suffix.
Meaning	MAILING ZIP CODE EXTENSION MUST BE NUMERIC
Meaning	A non-numeric Zip Code extension was entered.
Action	Enter a numeric Zip Code extension.
Message	MAILING ZIP CODE MUST BE NUMERIC
Meaning	A non-numeric Zip Code was entered.
Action	Enter a numeric Zip Code.
Message	MUST ENTER "S" FOR SELECTED OPTION
Meaning	An S must be entered to select the option.
Action	Enter an S .
Message	NCPDP CHAIN CODES MUST BE NUMERIC
Meaning	A non-numeric National Council for Prescription Drug Programs (NCPDP) Chain code was entered.
Action	Enter a numeric NCPDP Chain code.
Message	NCPDP CLASS CODE MUST BE 1 THRU 9
Meaning	An NCPDP Class code other than 1 through 9 was entered.
Action	Correct and then re-enter the Class code.
Message	NETWORK ALREADY ON FILE
Meaning	An attempt was made to add a network that is already on file.
Action	Verify and then re-enter the network.
Message	NETWORK NAME IS REQUIRED
Meaning	The function used required a Network Name to be entered.
Action	Enter the Network Name.
Message	NETWORK NOT FOUND
Meaning	The Network ID entered is not on file.
Action	Verify and then re-enter the Network ID.

Appendix A: Error Messages

Message	NETWORK NOT NUMERIC
Meaning	A non-numeric Network ID was entered.
Action	Enter a numeric Network ID.
Meaning	NETWORK NOT ON FILE
Meaning	A Network ID was entered that was not on file.
Action	Verify and then re-enter the Network ID.
Message	NETWORK RATE NOT FOUND
Meaning	The rate entered was not in the file.
Action	Verify and then re-enter the rate.
Message	NETWORK REQUIRED
Meaning	The function used required a Network ID to be entered.
Action	Enter the Network ID.
Message	NO CHANGES MADE -- PLEASE CONTINUE
Meaning	The system compared the data on the screen to the data on file and found them to be identical.
Action	Make the appropriate update and confirm the entry.
Message	NO FURTHER BACKWARD PAGING POSSIBLE
Meaning	The beginning of the file has been reached.
Action	None
Meaning	NO MORE RECORDS AVAILABLE
Meaning	There are no more records in the file for the criteria specified.
Action	None
Message	NO RATES FOUND ON FILE
Meaning	No rates were found for the criteria specified.
Action	None
Message	NO RECORDS FOUND FOR DISPLAY
Meaning	No records exist for the option chosen.
Action	None
Message	NO RECORDS FOUND FOR THIS SEARCH CRITERIA
Meaning	No records were found that met the search criteria.
Action	None
Message	NOT AUTHORIZED FOR UPDATE, USE "S" TO SELECT
Meaning	The user is not authorized to update the record specified.
Action	Enter S to select the record for viewing.

Meaning	A Pharmacy ID was entered that did not contain seven digits.
Action	Enter a seven-digit Pharmacy ID.
Message	PHARMACY INACTIVATED - PROCESS DENIED
Meaning	The pharmacy has been inactivated (terminated) on the global pharmacy address file.
Action	Contact Benefit Support to verify.
Message	PHARMACY NAME IS REQUIRED
Meaning	The option selected required a Pharmacy Name.
Action	Enter the Pharmacy Name.
Message	PHARMACY NOT ELIGIBLE ON NETWORK(S)
Meaning	The pharmacy specified was either not connected to the network(s) or has become ineligible on the network(s).
Action	Establish pharmacy eligibility on the network(s) by adding a pharmacy rate record eligible for the Effective Date.
Message	PHARMACY NOT FOUND
Meaning	The pharmacy was not in the file.
Action	Verify and then re-enter the Pharmacy ID.
Message	PHARMACY NOT NUMERIC
Meaning	A non-numeric Pharmacy ID was entered.
Action	Enter a numeric Pharmacy ID.
Message	PHARMACY PLAN ALREADY ON FILE
Meaning	A Plan ID was entered that is already on file.
Action	Verify and then re-enter the pharmacy plan.
Message	PHARMACY PLAN NOT ELIGIBLE FOR DATE SPECIFIED
Meaning	The pharmacy plan was not eligible on the date specified.
Action	Either change the date specified, or add a pharmacy plan effective on or before the date specified.
Message	PHARMACY PLAN NOT FOUND, TRY DIFFERENT DATE OR LIST
Meaning	A Plan ID does not exist for either the date entered or the list selected.
Action	Verify the date/list and then re-enter the appropriate information.
Message	PHARMACY PLAN NOT NUMERIC
Meaning	A non-numeric Plan ID was entered.
Action	Enter a numeric Plan ID.

Appendix A: Error Messages

Message	PHARMACY PLAN NOT ON FILE
Meaning	A Plan ID was entered that is not in the file.
Action	Verify and then re-enter the Plan ID.
Message	PHARMACY PLAN REQUIRED
Meaning	A Plan ID was required for the option chosen.
Action	Enter a Plan ID.
Message	PHARMACY RATE RECORD DIRECTS PROCESS TO AN INELIGIBLE RATE RECORD
Meaning	A pharmacy Rate record was using a rate level that is no longer eligible.
Action	Either establish a Rate record for the level designated, or change the level on the pharmacy rate.
Message	PHARMACY RATES NOT FOUND IN THIS NETWORK
Meaning	Pharmacy rates were not found for the search criteria.
Action	Correct the search criteria, or establish pharmacy Rate records in the network.
Message	PHARMACY TAX RATE MUST BE NUMERIC
Meaning	A non-numeric Tax Rate was entered.
Action	Enter a numeric Tax Rate.
Message	PLAN ID MUST BE NUMERIC
Meaning	A non-numeric Plan ID was entered.
Action	Enter a numeric Plan ID.
Message	PLAN NAME REQUIRED
Meaning	A Plan Name was required for the function selected.
Action	Enter a Plan Name.
Message	PLAN NOT NUMERIC
Meaning	A non-numeric Plan ID was entered.
Action	Enter a numeric Plan ID.
Message	PLAN NOT ON FILE
Meaning	The Plan ID entered was not in the file.
Action	Verify and then re-enter the Plan ID.
Message	PLAN RATE ALREADY ON FILE
Meaning	An attempt was made to add a plan rate already in the file.
Action	Verify and then re-enter the plan rate.
Meaning	PLAN RATE NOT ON FILE - PF05 TO UPDATE NEW EFFECTIVE DATE
Meaning	The plan Effective Date was changed.
Action	Verify the plan Effective Date, then press PF05 to create the new effective date.

Appendix A: Error Messages

Message	PLAN REQUIRED
Meaning	The function selected required a Plan ID.
Action	Enter a Plan ID.
Message	PLEASE DO NOT ENTER A CHAIN ID WHEN ADDING A CHAIN
Meaning	An attempt was made to create a chain relationship while adding a chain pharmacy.
Action	Remove the Chain ID from the Chain ID field.
Message	PLEASE DO NOT ENTER AFFILIATE ID IF ADDING A CHAIN
Meaning	An attempt was made to create an affiliate relationship while adding a chain pharmacy.
Action	Remove the Affiliate ID from the Affiliate field.
Message	PLEASE DO NOT ENTER AFFILIATE ID IF ADDING AN AFFILIATE
Meaning	An attempt was made to create an affiliate relationship while adding an affiliate pharmacy.
Action	Remove the Affiliate ID from the Affiliate field.
Message	PLEASE ENTER (Y) FOR ACTIVE OR (N) NOT ACTIVE
Meaning	This function requires a Y (active) or an N (not active).
Action	Enter Y (active) or N (not active).
Message	PLEASE ENTER A VALID FUNCTION
Meaning	An invalid function was selected.
Action	Select a valid function.
Message	PLEASE ENTER VALID BUSINESS ZIP CODE
Meaning	An invalid business Zip Code was entered.
Action	Enter a valid business Zip Code.
Message	PLEASE ENTER 7 DIGIT PHARMACY ID
Meaning	A seven-digit Pharmacy ID was not entered for the option selected.
Action	Enter a seven-digit Pharmacy ID.
Message	PLEASE INDICATE SELECTION "S" SELECTION
Meaning	This function required S to select.
Action	Enter S to select.
Message	PLEASE INDICATE SELECTION "S" SELECTION OR "U" UPDATE
Meaning	An S (Select) or U (Update) was required for the option selected.
Action	Enter S (Select) or U (Update).
Message	PLEASE SELECT AN OPTION
Meaning	An option was required.
Action	Enter an option.

Appendix A: Error Messages

Message	PLEASE SELECT ONE LINE AT A TIME
Meaning	An attempt was made to select more than one record.
Action	Select only one record.
Message	PLEASE SELECT ONE PHARMACY AT A TIME
Meaning	More than one pharmacy was selected.
Action	Select one pharmacy.
Message	PROGRAM ERROR PROGRAM NOT FOUND
Meaning	A system error has occurred.
Action	Contact Benefit Support.
Message	RATE ALREADY EXISTS FOR THIS DATE
Meaning	An attempt was made to add a rate for an Effective Date that already exists.
Action	Verify the Effective Date, then re-enter or update as required.
Message	RATE ALREADY ON FILE
Meaning	An attempt was made to add a rate already in the file.
Action	Verify and then re-enter the rate.
Message	RATE NOT FOUND
Meaning	A rate was selected that was not in the file
Action	Verify and then re-enter the rate.
Message	RATE RETRIEVAL ACCESS FAILURE
Meaning	The attempt to retrieve the pharmacy rate has failed.
Action	Contact Network Administration for assistance.
Message	RECORD NOT AVAILABLE FOR DELETE, PLEASE RETRY LATER
Meaning	Record is presently being updated.
Action	Retry later.
Message	RECORD NOT AVAILABLE FOR UPDATE, PLEASE RETRY LATER
Meaning	Record is presently being updated.
Action	Retry later.
Message	REMOVE NETWORK ID WHEN ADDING A NEW NETWORK ID (AUTOMATIC NUMBERING)
Meaning	The system automatically numbers the networks.
Action	Delete the Network ID, then retry adding the network.
Message	REMOVE PHARMACY PLAN ID WHEN ADDING A NEW PHARMACY PLAN (AUTOMATIC NUMBERING)
Meaning	The system automatically numbers the plans.
Action	Delete the Plan ID, then retry adding the plan.

Appendix A: Error Messages

Message	REVERIFY DISPENSE FEE AND PF05 TO UPDATE
Meaning	The Dispense Fee amount exceeded \$5.99.
Action	Verify the Dispense Fee, then press PF05 if correct.
Message	SELECTIONS ARE INVALID DURING PAGING
Meaning	A selection cannot be made while paging.
Action	Complete paging, then make a selection.
Message	STATE ABBREVIATION IS REQUIRED FOR BUSINESS ADDRESS
Meaning	A State abbreviation was not entered.
Action	Enter a State abbreviation.
Message	STREET IS REQUIRED FOR BUSINESS ADDRESS
Meaning	A street address was not entered.
Action	Enter the address number and street name.
Message	THIS IS A CHAIN DO NOT ENTER A CHAIN ID
Meaning	An attempt was made to relate a chain pharmacy to another chain pharmacy.
Action	Remove the Chain ID.
Message	THIS IS A CHAIN DO NOT ENTER AFFILIATE ID
Meaning	A chain Pharmacy ID may not have an affiliate relationship
Action	Remove the Affiliate ID.
Message	THIS IS AN AFFILIATE DO NOT ENTER AFFILIATE ID
Meaning	An Affiliate ID may not have an affiliate relationship.
Action	Remove the Affiliate ID.
Message	VALUE MUST BE "Y" OR "N"
Meaning	A value of Y or N was not entered for the option.
Action	Enter Y or N .
Message	WITHHOLD AMOUNT INCOMPATIBLE WITH WITHHOLD PERCENT
Meaning	The system will accept either a Withholding Amount or a Withholding Percent -- not both.
Action	Enter either a Withholding Amount or a Withholding Percent.
Message	ZIP CODE IS REQUIRED FOR BUSINESS ADDRESS
Meaning	A Zip Code was required for Business Address.
Action	Enter the Zip Code.
Message	ZIP CODE MUST BE NUMERIC
Meaning	A non-numeric Zip Code was entered.
Action	Enter a numeric Zip Code.

Appendix B: Data Dictionary

1stnet	A four-digit field containing the Network ID and a one-character field containing the In/Out Network indicator (I/O) for the first pharmacy network in the priority order for reimbursement.						
2ndnet	A four-digit field containing the Network ID and a one-character field containing the In/Out Network indicator (I/O) for the second pharmacy network in the priority order for reimbursement.						
3rdnet	A four-digit field containing the Network ID and a one-character field containing the In/Out Network indicator (I/O) for the third pharmacy network in the priority order for reimbursement.						
Active	A one-character field (Y/N) indicating if the record is current on file. Values are as follows: <table><tr><td>Y</td><td>Yes, record is current on file</td></tr><tr><td>N</td><td>No, record is not current</td></tr></table> Note: The Active field in the Pharmacy Rate History screen, figure 3-11, will contain a six-character code to indicate if the Rate record is current (ACTIVE) or inactive (INACTV).	Y	Yes, record is current on file	N	No, record is not current		
Y	Yes, record is current on file						
N	No, record is not current						
A-Date	A six-digit field indicating the date that the record was added in MMDDYY format, where the format is as follows: <table><tr><td>MM</td><td>Month</td></tr><tr><td>DD</td><td>Day</td></tr><tr><td>YY</td><td>Year</td></tr></table>	MM	Month	DD	Day	YY	Year
MM	Month						
DD	Day						
YY	Year						
A-Oper	A three-character alphanumeric field for the initials of the person who added the record.						
A-Prog	An eight-character alphanumeric field indicating the program used to generate the record.						
A-Time	A four-digit field for the time the record was added in HH:mm format where the format is as follows: <table><tr><td>HH</td><td>Hour</td></tr><tr><td>mm</td><td>Minute</td></tr></table>	HH	Hour	mm	Minute		
HH	Hour						
mm	Minute						
Address Line 1	A 30-character alphanumeric field for the first line of a pharmacy's Mailing, Business, or Payment Claims Tape (PCT) address.						
Address Line 2	A 30-character alphanumeric field for the second line of a pharmacy's Mailing, Business, or PCT address.						
Affil	See Affiliate ID.						

Appendix B: Data Dictionary

Affiliate	See Affiliate ID.
Affiliate ID	A seven-digit field assigned by Argus to identify pharmacies associated for reporting and financial purposes.
Affiliate Name	A 30-character field indicating the name given to pharmacies associated for reporting and financial purposes.
Attn Name	A 30-character alphanumeric field to identify the person or department to whom pharmacy mail is addressed.
Average Wholesale Price (AWP)	The average of the drug wholesalers list price for a drug. This price is derived by First DataBank's periodic survey of major drug wholesalers. Also known as the Blue Book Price.
AWP-AL	See AWP Disc - All %.
AWP-BR	See AWP Disc - Brand %.
AWP-GN	See AWP Disc - Generic %.
AWP Disc - All %	A five-digit field indicating the percentage of the Average Wholesale Price (AWP) discount used in pharmacy reimbursement for all drugs. This field uses two decimal places. For example, -10¼% would be entered as: -10.25.
AWP Disc - Brand %	A five-digit field indicating the percentage of the Average Wholesale Price (AWP) discount that is reimbursed to the pharmacy for a brand drug. This field uses two decimal places. For example, -10¼% would be entered as: -10.25.
AWP Disc - Generic %	A five-digit field indicating the percentage of the Average Wholesale Price (AWP) discount that is reimbursed to the pharmacy for a generic drug. This field uses two decimal places. For example, -10¼% would be entered as: -10.25.
AWP-GN	See AWP Disc - Generic % .
Balance	See Pharmacy Balance .
Brand	See Brand Amount .
Brand Amount	A five-digit field indicating the amount paid to a pharmacy for dispensing a brand drug. This field has two decimal places. For example, \$3.75 would be entered as follows: 3.75.
Brand Drug	A brand drug is a recognized, trade name product. Usually, it is an innovator product or a more expensive product marketed under a brand name for multi-source drugs.

Appendix B: Data Dictionary

Chain	See Chain ID.
Chain ID	A seven-digit field assigned by Argus to identify pharmacies associated for identification purposes.
Chain Name	A 30-character alphanumeric field displaying the name of the collection of pharmacies associated for identification and reporting purposes.
City	An 18-character alphanumeric field indicating the city of a pharmacy's Business, Mailing, or PCT address.
Class	See NCPDP Class Code.
Close Date	An eight-digit field indicating the date a pharmacy will close in MMDDYY format, where the format is as follows: MM Month DD Day YY Year
Compnd	See Compound Amount .
Compound Amount	A five-digit field indicating the amount paid to a pharmacy for dispensing a compound drug. A compound drug is a prescription prepared at the pharmacy by combining two or more ingredients to produce a product that is not commercially available. This field has two decimal places. For example, \$3.75 would be entered as follows: 3.75.
Customer	See Customer ID .
Customer Affil	Reserved for future use, reporting and security purposes.
Customer ID	A four-digit numeric field assigned by Argus to uniquely identify a customer.
Customer Number	See Customer ID .
D-Date	A six-digit date indicating when the record was moved to the history file in MMDDYY format, where the format is as follows: MM Month DD Day YY Year
D-Oper	A three-character alphanumeric field indicating the initials of the person who moved the record to the history file.

Appendix B: Data Dictionary

D-Time	A six-digit field indicating the time the record was moved to the history file in HHmmSS format, where the format is as follows: HH Hour mm Minute SS Second
Disp	See Dispense Fee .
Dispense Fee	The dispense fee is a professional fee charged by pharmacies for dispensing drugs.
Disp Fee - Brand	See Brand Amount .
Disp Fee - Compound	See Compound Amount .
Disp Fee - Generic	See Generic Amount .
Disp Fee - MAC	See Maximum Allowable Cost (MAC) Amount .
Disp Fee - Misc1	See Misc-1 Amount .
Disp Fee - Misc2	See Misc-2 Amount .
Disp Fee - Misc3	See Misc-3 Percent .
Disp Fee - Misc4	See Misc-4 Percent .
Effect	See Effective Date .
Effective Date	An six-digit field indicating the date that the network rate or pharmacy plan should be applied in MMDDYY format, where the format is as follows: MM Month DD Day YY Year
Elig	See Eligible .

Appendix B: Data Dictionary

Eligible	(Pharmacy Network Rate) A one-character field indicating if the rate is eligible. Valid values are as follows: <table><tr><td>Y</td><td>Yes, the rate is eligible</td></tr><tr><td>N</td><td>No, the rate is not eligible</td></tr></table> (Customer Pharmacy Search) A one-character flag on the Customer Pharmacy Search Facility screen that indicates whether the search is to be limited to only eligible pharmacies. Valid values are as follows: <table><tr><td>N</td><td>No, include only ineligible pharmacies in the search</td></tr><tr><td>Y</td><td>Yes, include only eligible pharmacies in the search</td></tr><tr><td>Blank</td><td>Include eligible and ineligible pharmacies in the search</td></tr></table>	Y	Yes, the rate is eligible	N	No, the rate is not eligible	N	No, include only ineligible pharmacies in the search	Y	Yes, include only eligible pharmacies in the search	Blank	Include eligible and ineligible pharmacies in the search
Y	Yes, the rate is eligible										
N	No, the rate is not eligible										
N	No, include only ineligible pharmacies in the search										
Y	Yes, include only eligible pharmacies in the search										
Blank	Include eligible and ineligible pharmacies in the search										
Fill Date	A six-digit field indicating the date that the prescription was filled in MMDDYY format, where the format is as follows: <table><tr><td>MM</td><td>Month</td></tr><tr><td>DD</td><td>Day</td></tr><tr><td>YY</td><td>Year</td></tr></table>	MM	Month	DD	Day	YY	Year				
MM	Month										
DD	Day										
YY	Year										
Generic Amount	A five-digit field indicating the amount paid to a pharmacy for dispensing a generic drug. This field has two decimal places. For example, \$3.75 would be entered as follows: 3.75.										
Generic Drug	A generic drug is a drug that is available from more than one source and is priced well below equivalent brand name products. Often, the generic drug is marketed under the generic name and has no trademarked name.										
Genrc	See Generic Amount .										
History Time	The time a record was moved to the history file.										
Inactive	A record that is no longer current (no longer used for on-line claims pricing).										
Indicator	A two-character alphanumeric code in the Plan record representing special pricing requirements for the customer.										
In/Out Network	A one-character field used to identify a pharmacy as In Network (I) or Out of Network (O).										

Appendix B: Data Dictionary

Level	A one-character field indicating the level to which a pharmacy rate is assigned. Values are as follows: <table><tr><td>A</td><td>Affiliate</td></tr><tr><td>C</td><td>Chain</td></tr><tr><td>N</td><td>Network</td></tr><tr><td>P</td><td>Pharmacy</td></tr></table>	A	Affiliate	C	Chain	N	Network	P	Pharmacy
A	Affiliate								
C	Chain								
N	Network								
P	Pharmacy								
Lock	A one-character field guaranteeing the pharmacy rate against plan overrides. Valid values are as follows: <table><tr><td>Y</td><td>Yes, the pharmacy rate is guaranteed</td></tr><tr><td>N</td><td>No, the pharmacy rate is not guaranteed</td></tr></table>	Y	Yes, the pharmacy rate is guaranteed	N	No, the pharmacy rate is not guaranteed				
Y	Yes, the pharmacy rate is guaranteed								
N	No, the pharmacy rate is not guaranteed								
MAC	See Maximum Allowable Cost (MAC) Amount .								
Maximum Allowable Cost (MAC) Amount	A five-digit field indicating the amount paid to a pharmacy for dispensing a maximum allowable cost (MAC) drug. MAC is the maximum amount a health plan will reimburse the pharmacy for drug cost. MAC prices are assigned for a GCN, or group of generically equivalent products. This field has two decimal places. For example, \$3.75 would be entered as follows: 3.75.								
Misc1\$	See Misc-1 Amount .								
Misc-1 Amount	A five-digit field indicating the amount of the customized dispense fee used for a customer. This field has two decimal places. For example, \$3.75 would be entered as follows: 3.75.								
Misc2\$	See Misc-2 Amount .								
Misc-2 Amount	A five-digit field indicating the amount of the customized dispense fee used for a customer. This field has two decimal places. For example, \$3.75 would be entered as follows: 3.75.								
Misc3%	See Misc-3 Percent .								
Misc-3 Percent	A five-digit field indicating the amount of the customized dispense fee percentage used for a customer. This field has three decimal places. For example, 14¼% would be entered as follows: 14.250.								
Misc4%	See Misc-4 Percent .								
Misc-4 Percent	A five-digit field indicating the amount of the customized dispense fee percentage used for a customer. This field has three decimal places. For example, 14¼% would be entered as follows: 14.250.								

Appendix B: Data Dictionary

NCPDP Chain	A three-digit code established by the National Council for Prescription Drug Processing (NCPDP) to associate pharmacies.																		
NCPDP Class	A one-digit code assigned by NCPDP to identify types of pharmacies. Values are as follows: <table><tr><td>1</td><td>Community</td></tr><tr><td>2</td><td>Chain</td></tr><tr><td>3</td><td>Hospital</td></tr><tr><td>4</td><td>Clinic</td></tr><tr><td>5</td><td>Nursing home or extended care facility</td></tr><tr><td>6</td><td>Department store</td></tr><tr><td>7</td><td>Grocery store</td></tr><tr><td>8</td><td>Other</td></tr><tr><td>9</td><td>IV infusion</td></tr></table>	1	Community	2	Chain	3	Hospital	4	Clinic	5	Nursing home or extended care facility	6	Department store	7	Grocery store	8	Other	9	IV infusion
1	Community																		
2	Chain																		
3	Hospital																		
4	Clinic																		
5	Nursing home or extended care facility																		
6	Department store																		
7	Grocery store																		
8	Other																		
9	IV infusion																		
Network	A group of pharmacies designated by the customer.																		
Network Description	A 400-character alphanumeric field containing a detailed description of the network and its use.																		
Network ID	A four-digit field assigned by Argus to define a pharmacy network for a customer.																		
Network Name	A 20-character alphanumeric field indicating the name assigned to the network by the customer.																		
Network Priority	See Network Search Priority .																		
Network Rate	The reimbursement rate(s), dispense fee(s), and withholding amount or withholding percentage established for a pharmacy network.																		
Network Search Priority	A four-digit field indicating the order in which pharmacy networks are searched to determine eligibility for a pharmacy.																		
Origin Region	A four-digit numeric field indicating the region in which the pharmacy is located for reporting purposes.																		
Override Dispense Fee	A one-character field indicating the if the dispense fee has been overridden. Valid values are as follows: <table><tr><td>Y</td><td>Yes, the dispense fee has been overridden</td></tr><tr><td>N</td><td>No, the dispense fee has not been overridden</td></tr></table>	Y	Yes, the dispense fee has been overridden	N	No, the dispense fee has not been overridden														
Y	Yes, the dispense fee has been overridden																		
N	No, the dispense fee has not been overridden																		

Appendix B: Data Dictionary

Override Reimbursement	A one-character field used to indicate if the reimbursement has been overridden. Valid values are as follows: <table><tr><td>Y</td><td>Yes, reimbursement has been overridden</td></tr><tr><td>N</td><td>No, reimbursement has not been overridden</td></tr></table>	Y	Yes, reimbursement has been overridden	N	No, reimbursement has not been overridden										
Y	Yes, reimbursement has been overridden														
N	No, reimbursement has not been overridden														
Override Status	A one-character code indicating if special pricing requirements are in effect. Valid values are as follows: <table><tr><td>Y</td><td>Yes, special pricing requirements are in effect</td></tr><tr><td>N</td><td>No, special pricing requirements are not in effect</td></tr></table>	Y	Yes, special pricing requirements are in effect	N	No, special pricing requirements are not in effect										
Y	Yes, special pricing requirements are in effect														
N	No, special pricing requirements are not in effect														
Override Withholding	A one-character code indicating if withholding has been overridden by the plan. Valid values are as follows: <table><tr><td>Y</td><td>Yes, withholding has been overridden by the plan</td></tr><tr><td>N</td><td>No, withholding has not been overridden by the plan</td></tr></table>	Y	Yes, withholding has been overridden by the plan	N	No, withholding has not been overridden by the plan										
Y	Yes, withholding has been overridden by the plan														
N	No, withholding has not been overridden by the plan														
Payment Claims Tape (PCT) Address	The address information required to send a Payment Claims Tape (PCT) to the pharmacy. This address may differ from the Business Address and Mailing Address.														
Payment Group	A 14-digit code generated in the Finance system to identify a payment group for financial processing. The Payment Group number appears in CCYYMMDDHHmmSS format, where the format is set up as follows: <table><tr><td>CC</td><td>Century</td></tr><tr><td>YY</td><td>Year</td></tr><tr><td>MM</td><td>Month</td></tr><tr><td>DD</td><td>Day</td></tr><tr><td>HH</td><td>Hour</td></tr><tr><td>mm</td><td>Minute</td></tr><tr><td>SS</td><td>Second</td></tr></table>	CC	Century	YY	Year	MM	Month	DD	Day	HH	Hour	mm	Minute	SS	Second
CC	Century														
YY	Year														
MM	Month														
DD	Day														
HH	Hour														
mm	Minute														
SS	Second														
Pharmacy	See Pharmacy ID .														
Pharmacy Balance	A nine-digit field with two decimal places indicating the positive or negative balance amount adjusted for the pharmacy between financial cutoff dates.														
Pharmacy ID	A seven-digit code used to identify a pharmacy. This code is usually the National Association of Boards of Pharmacy (NABP) number assigned to the pharmacy.														
Pharmacy Name	A 30-character alphanumeric field for pharmacy name, usually as indicated by NABP.														
Pharmacy Plan	See Plan ID .														

Appendix B: Data Dictionary

Pharmacy Plan ID	See Plan ID .						
Phone Number	A ten-digit field for the pharmacy's phone number in the Mailing, Business, or PCT address.						
Plan Description	A 20-character alphanumeric field containing text used to describe a pharmacy plan and its use.						
Plan ID	A five-digit field used to identify the pharmacy benefit (i.e., reimbursement rate(s), dispense fee(s), and withholding amount or withholding percentage assigned to the pharmacy).						
Plan Name	A 20-character alphanumeric field indicating the name used to describe a pharmacy plan.						
Reim	See Override Reimbursement .						
SEL	A one-character field (S) allowing the user to select a record.						
ST	A two-digit field indicating the state in which the pharmacy is located in the Business, Mailing, or PCT address.						
STAT	STAT (Status) is a two character alphanumeric code used to represent special pricing requirements for the customer.						
State	See ST .						
State Fee	This field is reserved for future use.						
Status Ind	See Indicator .						
Tax ID	A 10-character field containing the 9-digit hyphenated tax identification number provided to Argus for tax purposes.						
Tax Rate	A five-digit field with five decimal places indicating the sales tax percentage.						
U-Date	A six-digit date indicating when the record was updated in MMDDYY format, where the format is as follows: <table><tr><td>MM</td><td>Month</td></tr><tr><td>DD</td><td>Day</td></tr><tr><td>YY</td><td>Year</td></tr></table>	MM	Month	DD	Day	YY	Year
MM	Month						
DD	Day						
YY	Year						
U-Prog	An eight-digit alphanumeric field indicating the program used to update the record.						

Appendix B: Data Dictionary

U-Time	A six-digit numeric field indicating the time that the record was updated in HHmmSS format, where the format is as follows: <table><tr><td>HH</td><td>Hour</td></tr><tr><td>mm</td><td>Minute</td></tr><tr><td>SS</td><td>Second</td></tr></table>	HH	Hour	mm	Minute	SS	Second
HH	Hour						
mm	Minute						
SS	Second						
Update Date	See U-Date .						
View All Pharmacies	A one-character field used in the Pharmacy History Selection List to increase the scope of the search. Valid values are as follows: <table><tr><td>Y</td><td>Yes, view all pharmacies</td></tr><tr><td>N</td><td>No, do not view all pharmacies</td></tr></table>	Y	Yes, view all pharmacies	N	No, do not view all pharmacies		
Y	Yes, view all pharmacies						
N	No, do not view all pharmacies						
With	See Override Withholding .						
Withhold - Amount	See Withholding - Amount .						
Withholding - Amount	A five-digit field indicating the amount withheld from a pharmacy (per claim). This field has two decimal places. For example, \$.07 would be entered as follows: .07.						
Withhold - Percent	See Withholding - Percent .						
Withholding - Percent	A five-digit field indicating the percentage withheld from a pharmacy (per claim). This field has three decimal places. For example, 141/4% would be entered as follows: 14.250.						
Wthld\$	See Withholding - Amount .						
Wthld%	See Withholding - Percent .						
Zip	A five-digit field containing the zip code and a four-digit field containing the zip code extension for the pharmacy's zip code in the Mailing, Business, or PCT address.						
Zip Code	See Zip .						
Zip Code Extension	See Zip .
