

3-MONTH GIT & JENKINS PIPELINE MASTER PLAN (PRINTABLE)

Month 1 — Git, GitHub & DevOps Basics (Weeks 1–4)

Week 1 — Git Basics

- Git fundamentals, clone/pull/push/commit
- Branching & merging
- Practice: create repos, branches, PRs

Week 2 — GitHub Collaboration

- Pull requests, reviews, issues
- Branch protection rules
- Practice: dummy PRs, conflict resolution

Week 3 — DevOps + Jenkins Intro

- What is CI/CD
- Jenkins architecture
- Freestyle jobs

Week 4 — Jenkins Pipeline Fundamentals

- Declarative vs scripted pipelines
- Jenkinsfile structure
- Build/test stages

Month 2 — Intermediate Jenkins + Automation Integration (Weeks 5–8)

Week 5 — Git + Jenkins Integration

- Webhooks, Poll SCM, credentials
- Multibranch pipelines

Week 6 — Running Automation

- Run Maven/Gradle tests
- Cucumber tags
- Archive JUnit + HTML reports

Week 7 — Advanced Pipeline Skills

- Shared libraries
- Notifications
- Post conditions, retry, timeout

Week 8 — Docker + Jenkins (Optional)

- Docker basics
- Jenkins agents in Docker

Month 3 — Framework Integration + Real Projects (Weeks 9–12)

Week 9 — JIRA + Xray Integration

- REST API upload
- Update test execution status

Week 10 — Real CI/CD Project

- Full automation pipeline

Week 11 — Cloud CI/CD (Optional)

- GitHub Actions / GitLab CI / Azure DevOps

Week 12 — Final Week

- Build complete portfolio CI/CD project

Outcome:

You become proficient in Git, Jenkins pipelines, CI/CD automation, Cucumber execution, and JIRA Xray integration.
